---

---

**EXPLANATORY NOTE RESTATEMENT**

This Form 10-Q/A is being filed to amend the Form 10-Q for the quarter ended March 31, 2007 to reflect a change to the Condensed Consolidated Balance Sheets as of March 31, 2007 for Public Service Enterprise Group Incorporated (PSEG) and PSEG Energy Holdings L.L.C. (Energy Holdings) to reclass \$207 million from Long-Term Debt to Long-Term Debt Due Within One Year. This change relates to an error in the classification of \$207 million of Energy Holdings Senior Notes due in February 2008 as reported in the PSEG and Energy Holdings March 31, 2007, Form 10-Q. In addition, during the second quarter of 2007, an immaterial error was discovered in the calculation of the cumulative effect of adopting Financial Accounting Standards Board (FASB) Staff Position (FSP) No. FAS 13-2

Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction (FSP 13-2) recorded in the first quarter of 2007. As a result, Energy Holdings recognized an additional \$15 million reduction in Retained Earnings, an increase of \$19 million in Deferred Taxes and an increase of \$4 million in Investment in Leveraged Leases. This restatement is limited to these line items and time period, and had no effect on PSEG's or Energy Holdings' results of operations, cash flows or margins.

For purposes of this Form 10-Q/A, and in accordance with Rule 12b-15 under the Securities Exchange Act of 1934, as amended, each item of the Form 10-Q for the quarter ended March 31, 2007 as originally filed on May 4, 2007 that was affected by the restatement has been amended to the extent affected and restated in its entirety. No attempt has been made in this Form 10-Q/A to modify or update other disclosures as presented in the original Form 10-Q except as required to reflect the effects of the restatement.

This combined Form 10-Q/A for the quarter ended March 31, 2007 is being filed by PSEG and Energy Holdings. Except for Part I, Items 1, 2 and 4 and certain exhibits under Part II, Item 6, no other information included in the Form 10-Q, as originally filed on May 4, 2007, is being revised by or being repeated in this document.

## FORWARD-LOOKING STATEMENTS

Certain of the matters discussed in this report constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words anticipate, intend, estimate, believe, expect, plan, hypothetical, potential, forecast, of such words and similar expressions are intended to identify forward-looking statements. Public Service Enterprise Group Incorporated (PSEG), Public Service Electric and Gas Company (PSE&G), PSEG Power LLC (Power) and PSEG Energy Holdings L.L.C. (Energy Holdings) undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The following review should not be construed as a complete list of factors that could affect forward-looking statements. In addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements discussed above, factors that could cause actual results to differ materially from those contemplated in any forward-looking statements include, among others, the following:

regulatory issues  
that significantly  
impact operations;

ability to attain  
satisfactory  
regulatory results;

operating  
performance or  
cash flow from  
investments  
falling below  
projected levels;

credit, commodity,  
interest rate,  
counterparty and  
other financial  
market risks;

liquidity and the  
ability to access  
capital and  
maintain adequate  
credit ratings;

adverse or  
unanticipated  
weather conditions  
that significantly  
impact costs  
and/or operations,  
including

generation;

ability to attract  
and retain  
management and  
other key  
employees;

changes in the  
electric industry,  
including changes  
to regional  
transmission  
organizations and

power pools;

changes in energy  
policies and  
regulation;

changes in  
demand;

changes in the  
number of market  
participants and  
the risk profiles of  
such participants;

availability of  
power  
transmission  
facilities that  
impact the ability  
to deliver output  
to customers;

growth in costs  
and expenses;

environmental  
regulations that  
significantly  
impact operations;

changes in rates of  
return on overall  
debt and equity  
markets that could  
adversely impact

the value of  
pension and other  
postretirement  
benefits assets and  
liabilities and the  
Nuclear  
Decommissioning  
Trust Funds;

changes in  
political  
conditions;

changes in  
technology that  
make generation,  
transmission  
and/or distribution  
assets less  
competitive;

continued  
availability of  
insurance  
coverage at  
commercially  
reasonable rates;

involvement in  
lawsuits, including  
liability claims  
and commercial  
disputes;

acquisitions,  
divestitures,  
mergers,  
restructurings or  
strategic initiatives  
that change  
PSEG's, PSE&G's,  
Power's and  
Energy Holdings  
strategy or  
structure;

business  
combinations  
among  
competitors and  
major customers;

general economic conditions, including inflation or deflation;

changes in tax laws and regulations;

changes to accounting standards or accounting principles generally accepted in the U.S., which may require adjustments to financial statements;

ability to recover investments or service debt as a result of any of the risks or uncertainties mentioned herein;

acts of war or terrorism;

**PSEG, PSE&G and Energy Holdings**

adverse  
changes in  
rate  
regulation  
and/or  
ability to  
obtain  
adequate  
and timely  
rate relief;

**PSEG, Power and Energy Holdings**

inability to  
effectively  
manage  
portfolios of  
electric  
generation  
assets, gas  
supply contracts  
and electric and  
gas supply  
obligations;

inability to meet  
generation  
operating  
performance  
expectations;

energy  
transmission  
constraints or  
lack thereof;

adverse changes  
in the market  
for energy,  
capacity, natural  
gas, coal,  
nuclear fuel,  
emissions  
credits,  
congestion  
credits and  
other  
commodity

prices,  
especially  
during  
significant price  
movements for  
natural gas and  
power;

adverse market  
developments  
or changes in  
market rules,  
including delays  
or impediments  
to  
implementation  
of reasonable  
capacity  
markets;

surplus of  
energy capacity  
and excess  
supply;

substantial  
competition in  
the domestic  
and worldwide  
energy markets;

margin posting  
requirements,  
especially  
during  
significant price  
movements for  
natural gas and  
power;

availability of  
fuel and timely  
transportation at  
reasonable  
prices;

effects on  
competitive  
position of  
actions  
involving

competitors or  
major  
customers;

changes in  
product or  
sourcing mix;

delays, cost  
escalations or  
unsuccessful  
construction  
and  
development;

**PSEG and Power**

changes in  
regulation  
and safety  
and security  
measures at  
nuclear  
facilities;

ability to  
maintain  
nuclear  
operating  
performance  
at projected  
levels;

**PSEG and Energy Holdings**

changes in  
foreign  
currency  
exchange  
rates;

deterioration  
in the credit of  
lessees and  
their ability to  
adequately  
service lease  
rentals;

ability to  
realize tax

benefits and  
favorably  
resolve tax  
audit claims;

changes in  
political  
regimes in  
foreign  
countries; and

international  
developments  
negatively  
impacting  
business.

Consequently, all of the forward-looking statements made in this report are qualified by these cautionary statements and PSEG, PSE&G, Power and Energy Holdings cannot assure you that the results or developments anticipated by management will be realized, or even if realized, will have the expected consequences to, or effects on, PSEG, PSE&G, Power and Energy Holdings or their respective business prospects, financial condition or results of operations. Undue reliance should not be placed on these forward-looking statements in making any investment decision. Each of PSEG, PSE&G, Power and Energy Holdings expressly disclaims any obligation or undertaking to release publicly any updates or revisions to these forward-looking statements to reflect events or circumstances that occur or arise or are anticipated to occur or arise after the date hereof. In making any investment decision regarding PSEG s, PSE&G s, Power s and Energy Holdings securities, PSEG, PSE&G, Power and Energy Holdings are not making, and you should not infer, any representation about the likely existence of any particular future set of facts or circumstances. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

This combined Form 10-Q/A is separately filed by Public Service Enterprise Group Incorporated (PSEG), and PSEG Energy Holdings L.L.C. (Energy Holdings). Information contained herein relating to any individual company is filed by such company on its own behalf. Energy Holdings makes representations only as to itself and makes no representations as to any other company.

**Note 1. Organization and Basis of Presentation**

**Organization**

**PSEG**

PSEG has four principal direct wholly owned subsidiaries: PSE&G, Power, Energy Holdings and PSEG Services Corporation (Services).

**PSE&G**

PSE&G is an operating public utility engaged principally in the transmission of electric energy and distribution of electric energy and natural gas in certain areas of New Jersey. PSE&G is subject to regulation by the New Jersey Board of Public Utilities (BPU) and the Federal Energy Regulatory Commission (FERC).

PSE&G also owns PSE&G Transition Funding LLC (Transition Funding) and PSE&G Transition Funding II LLC (Transition Funding II), bankruptcy-remote entities that purchased certain transition property from PSE&G and issued transition bonds secured by such property. The transition property consists principally of the rights to receive electricity consumption-based per kilowatt-hour (kWh) charges from PSE&G electric distribution customers, which represent irrevocable rights to receive amounts sufficient to recover certain of PSE&G's transition costs related to deregulation, as approved by the BPU.

**Power**

Power is a multi-regional, wholesale energy supply company that integrates its generating asset operations and gas supply commitments with its wholesale energy, fuel supply, energy trading and marketing and risk management function through three principal direct wholly owned subsidiaries: PSEG Nuclear LLC (Nuclear), PSEG Fossil LLC (Fossil) and PSEG Energy Resources & Trade LLC (ER&T). Nuclear and Fossil own and operate generation and generation-related facilities. ER&T is responsible for the day-to-day management of Power's portfolio. Fossil, Nuclear and ER&T are subject to regulation by FERC, and certain Fossil subsidiaries are also subject to state regulation, and Nuclear is also subject to regulation by the Nuclear Regulatory Commission (NRC).

**Energy Holdings**

Energy Holdings has two principal direct wholly owned subsidiaries: PSEG Global L.L.C. (Global), which owns and operates international and domestic projects engaged in the generation and distribution of energy and PSEG Resources L.L.C. (Resources), which has invested primarily in energy-related leveraged leases. Energy Holdings also owns Enterprise Group Development Corporation (EGDC), a commercial real estate property management business.

**Services**

Services provides management and administrative and general services to PSEG and its subsidiaries. These include accounting, treasury, risk management, planning, information technology, tax, law, corporate secretarial, human

resources, investor relations, corporate communications and certain other services. Services charges PSEG and its subsidiaries for the cost of work performed and services provided pursuant to the terms and conditions of intercompany service agreements.

### **Basis of Presentation**

#### **PSEG, PSE&G, Power and Energy Holdings**

The respective financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for Quarterly Reports on Form 10-Q. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) have been condensed or omitted pursuant to such rules and regulations. These Condensed Consolidated Financial Statements and Notes to

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

Condensed Consolidated Financial Statements (Notes) should be read in conjunction with, and update and supplement matters discussed in PSEG's, PSE&G's, Power's and Energy Holdings' respective Annual Reports on Form 10-K for the year ended December 31, 2006.

The unaudited condensed consolidated financial information furnished herein reflects all adjustments which are, in the opinion of management, necessary to fairly state the results for the interim periods presented. All such adjustments are of a normal recurring nature. The year-end Condensed Consolidated Balance Sheets were derived from the audited Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2006.

**Reclassifications**

**PSEG, PSE&G, Power and Energy Holdings**

Certain reclassifications have been made to the prior quarter financial statements to conform to the current quarter presentation. The reclassifications relate primarily to PSE&G's determination, during the fourth quarter of 2006, that the revenues and expenses related to one of its contracts that had been recorded on a gross basis would more appropriately be recorded on a net basis in Operating Revenues based upon the provisions of EITF 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent. Therefore, prior amounts have been reclassified, resulting in a reduction of \$57 million in both Operating Revenues and Energy Costs for the quarter ended March 31, 2006 for PSEG and PSE&G, with no impact on Operating Income.

**Note 2. Recent Accounting Standards**

**The following accounting standards were issued by the Financial Accounting Standards Board (FASB), but have not yet been adopted by PSEG, PSE&G, Power and Energy Holdings.**

**Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157)**

**PSEG, PSE&G, Power and Energy Holdings**

In September 2006, the FASB issued SFAS 157, which provides a single definition of fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Prior to SFAS 157, guidance for applying fair value was incorporated into several accounting pronouncements. SFAS 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and sets out a fair value hierarchy that distinguishes between assumptions based on market data obtained from independent sources (observable inputs) and those based on an entity's own assumptions (unobservable inputs). Under SFAS 157, fair value measurements are disclosed by level within that hierarchy, with the highest priority being quoted prices in active markets. While this statement does not require any new fair value measurements, the application of this statement will change current practice for some fair value measurements.

This statement also nullifies the guidance in footnote 3 of Emerging Issues Task Force (EITF) Issue No. 02-3, Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities (EITF 02-3). The guidance in footnote 3 applies to derivative instruments measured at fair value at initial recognition, and it precludes immediate recognition in earnings of an unrealized gain or loss, measured as the difference between the transaction price and the fair value of the instrument at initial recognition, if the fair value of the instrument is determined using significant unobservable inputs. Under EITF 02-3, an entity cannot recognize an unrealized gain or loss at inception of a derivative instrument unless the fair value of that instrument is

obtained from a quoted market price in an active market or is otherwise evidenced by comparison to other observable current market transactions or based on a valuation technique incorporating observable market data. SFAS 157 requires that the principles of fair value measurement apply for derivatives and other financial instruments at initial recognition and in all subsequent periods.

SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007; however, earlier application is encouraged. PSEG, PSE&G, Power and Energy Holdings are currently assessing the potential impact of SFAS 157 on their respective consolidated financial positions and results of operations.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159)**

**PSEG, PSE&G, Power and Energy Holdings**

In February 2007, the FASB issued SFAS 159, which permits entities to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. An entity will report unrealized gains and losses on items where the fair value option has been elected in earnings at each subsequent reporting date. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The decision about whether to elect the fair value option is applied instrument by instrument, with a few exceptions; the decision is irrevocable; and the decision is required to be applied to entire instruments and not to portions of instruments.

The statement requires disclosures that facilitate comparisons (a) between entities that choose different measurement attributes for similar assets and liabilities and (b) between assets and liabilities in the financial statements of an entity that selects different measurement attributes for similar assets and liabilities.

SFAS 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007. Upon implementation, an entity shall report the effect of the first remeasurement to fair value as a cumulative effect adjustment to the opening balance of Retained Earnings. PSEG, PSE&G, Power and Energy Holdings are currently assessing the potential impact of SFAS 159 on their respective consolidated financial positions and results of operations.

**The following new accounting standards were adopted by PSEG, PSE&G, Power and Energy Holdings during 2007.**

**FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109 (FIN 48)**

**PSEG, PSE&G, Power and Energy Holdings**

In July 2006, the FASB issued FIN 48, which prescribes a model for how a company should recognize, measure, present and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on a tax return. Under FIN 48, the financial statements reflect expected future tax consequences of such positions presuming the tax authorities' full knowledge of the position and all relevant facts. FIN 48 permits recognition of the benefit of tax positions only when it is more likely-than-not that the position is sustainable based on the merits of the position. It further limits the amount of tax benefit to be recognized to the largest amount of benefit that is greater than 50% likely of being realized. FIN 48 also requires explicit disclosures about uncertainties in income tax positions, including a detailed roll-forward of unrecognized tax benefits taken that do not qualify for financial statement recognition.

FIN 48 was effective January 1, 2007. In general, companies record the change in net assets that resulted from the application of FIN 48 as an adjustment to Retained Earnings. However, for PSE&G, because any charges to income arising from the adoption of FIN 48 would be recoverable in future rates, the offset to any incremental PSE&G liability is recorded as a Regulatory Asset rather than Retained Earnings. The following table presents the impact at January 1, 2007 on the Condensed Consolidated Balance Sheets for PSEG and its subsidiaries as a result of implementing FIN 48:

	<b>PSE&amp;G</b>	<b>Power</b>	<b>Energy Holdings</b>	<b>PSEG Consolidated</b>
<b>Balance Sheet</b>			(Millions)	
Increase to Long Term Accrued Taxes	\$ 20	\$ 21	\$ 355	\$ 396
Decrease to Accumulated Deferred Income Tax Liability	\$ 9	\$ 7	\$ 246	\$ 262
Increase to Regulatory Assets	\$ 11	\$	\$	\$ 11
Decrease to Retained Earnings	\$	\$ 14	\$ 109	\$ 123

The impact to earnings resulting from the adoption of FIN 48 for the quarter ended March 31, 2007 was an after-tax decrease of \$6 million for PSEG, including \$1 million for Power and \$5 million for Energy Holdings. There was no impact on earnings for PSE&G. For additional information relating to the impacts of FIN 48, see Note 11. Income Taxes.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**FASB Staff Position (FSP) No. FAS 13-2, Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction (FSP 13-2)**

**PSEG and Energy Holdings**

In July 2006, the FASB issued FSP 13-2, which addressed how a change or projected change in the timing of cash flows relating to income taxes generated by a leveraged lease transaction affects the accounting by a lessor for that lease. The FSP amends SFAS 13, Accounting for Leases, stating that a change in the timing of the above referenced cash flows must be reviewed at least annually or more frequently, if events or circumstances indicate a change in timing is probable. If a change in timing has occurred, or is projected to occur, the rate of return and the allocation of income to positive investment years must be recalculated from the inception of the lease.

The guidance in this FSP was adopted January 1, 2007. The cumulative effect of applying the provisions of this FSP is reported as an adjustment to the beginning balance of Retained Earnings as of the date of adoption. As a result of implementing FSP 13-2, upon adoption PSEG and Energy Holdings each recognized a reduction in Investment in Leveraged Leases of \$69 million, a reduction in Deferred Income Taxes of \$2 million and a reduction in Retained Earnings of \$67 million.

The impact to earnings resulting from the adoption of FSP 13-2 for the quarter ended March 31, 2007 was an after-tax decrease of \$3 million for PSEG and Energy Holdings.

**Note 3. Discontinued Operations, Dispositions and Impairments**

**Discontinued Operations**

**Power**

***Lawrenceburg Energy Center (Lawrenceburg)***

On December 29, 2006, Power entered into an agreement to sell its natural gas-fired Lawrenceburg facility located in Lawrenceburg, Indiana to AEP Generating Company, a subsidiary of American Electric Power Company, Inc. (AEP).

The sale price for the facility and inventory is \$325 million. The proceeds, together with anticipated reduction in tax liability, are expected to be approximately \$425 million and will be used to retire debt. The transaction will result in an after-tax charge to PSEG's and Power's earnings of approximately \$208 million, or about \$0.82 cents per share of PSEG common stock, which was reflected as a charge in Discontinued Operations in the fourth quarter of 2006.

Power has received the required regulatory approvals for the sale and anticipates that the transaction will close in the second quarter of 2007.

Lawrenceburg's operating results for the quarters ended March 31, 2007 and 2006, which were reclassified to Discontinued Operations, are summarized below:

<b>Quarters Ended</b>	
<b>March 31,</b>	
<b>2007</b>	<b>2006</b>

**(Millions)**

Operating Revenues	\$		\$	
Loss Before Income Taxes	\$	(10 )	\$	(15 )
Net Loss	\$	(6 )	\$	(9 )

The carrying amounts of the assets of Lawrenceburg as of March 31, 2007 and December 31, 2006 are summarized in the following table:

	<b>As of</b>		<b>As of</b>	
	<b>March 31,</b>		<b>December 31,</b>

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**Energy Holdings***Elektrociepownia Chorzow Elcho Sp. Z o.o. (Elcho) and Elektrownia Skawina SA (Skawina)*

On May 29, 2006, Global completed the sale of its interest in two coal-fired plants in Poland, Elcho and Skawina. Proceeds, net of transaction costs, were \$476 million, resulting in a gain of \$227 million net of tax expense of \$142 million. The 2006 operating results for Global's assets in Poland have been reclassified to Discontinued Operations.

Elcho's and Skawina's operating results for the quarter ended March 31, 2006 are summarized below:

	<b>Quarter Ended March 31, 2006</b>	
	<b>Elcho</b>	<b>Skawina</b>
	<b>(Millions)</b>	
Operating Revenues	\$ 30	\$ 33
Income Before Income Taxes	\$ 3	\$ 2
Net Income	\$ 3	\$ 1

**Dispositions****Power**

In December 2006, Power recorded a pre-tax impairment loss of \$44 million to write down four turbines to their estimated realizable value and reclassified them to Assets Held for Sale on Power's Condensed Consolidated Balance Sheet. In April 2007, Power sold the four turbines to a third party and received proceeds of approximately \$40 million, which approximates the recorded book value.

**Energy Holdings***Thermal Energy Development Partnership, L.P. (Tracy Biomass)*

On December 22, 2006, Global entered into an agreement to sell its 34.5% interest in Tracy Biomass for approximately \$7 million. The sale closed on January 26, 2007 and resulted in a 2007 pre-tax gain of approximately \$7 million (\$6 million after-tax).

**Impairment****Energy Holdings***Venezuela*

PSEG has indirect ownership interests in two generating facilities in Maracay and Cagua, Venezuela that have a total capacity of 120 MW. The projects are owned and operated by Turboven, an entity which is jointly-owned by Global (50%) and Corporacion Industrial de Energia (CIE). Global also has a 9% indirect interest in TGM through a partnership with CIE. As of March 31, 2007, the book value of these investments was approximately \$35 million.

During Global's year-end review of its equity method investments, management concluded that due to the current political situation in Venezuela, it is probable that Global would not be able to recover its capitalized costs associated with its investments in Venezuela. Therefore, Global recorded a pre-tax impairment loss of approximately \$7 million to write down these investments in the fourth quarter of 2006.

In January 2007, the Venezuelan government announced its intention to nationalize certain sectors of Venezuelan industry and commerce, including certain foreign-owned energy and communications companies. In a subsequent press release, Turboven was named as one of the companies that Venezuela intended to nationalize. Since these announcements, Venezuela has proceeded to nationalize certain companies; however, Global has not received any further official communication from the government of Venezuela regarding Turboven.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**Note 4. Earnings Per Share (EPS)****PSEG**

Diluted EPS is calculated by dividing Net Income by the weighted average number of shares of common stock outstanding, including shares issuable upon exercise of stock options outstanding under PSEG's stock option plans and upon payment of performance units. The following table shows the effect of these stock options and performance units on the weighted average number of shares outstanding used in calculating diluted EPS:

	<b>Quarters Ended March 31,</b>			
	<b>2007</b>		<b>2006</b>	
	<b>Basic</b>	<b>Diluted</b>	<b>Basic</b>	<b>Diluted</b>
<b>EPS Numerator:</b>				
<b>Earnings (Millions)</b>				
Continuing Operations	\$ 335	\$ 335	\$ 208	\$ 208
Discontinued Operations	(6)	(6)	(5)	(5)
<b>Net Income</b>	<b>\$ 329</b>	<b>\$ 329</b>	<b>\$ 203</b>	<b>\$ 203</b>
<b>EPS Denominator (Thousands):</b>				
Weighted Average Common Shares Outstanding	252,892	252,892	251,187	251,187
Effect of Stock Options		390		787
Effect of Stock Performance Units		74		91
<b>Total Shares</b>	<b>252,892</b>	<b>253,356</b>	<b>251,187</b>	<b>252,065</b>
<b>EPS:</b>				
Continuing Operations	\$ 1.32	\$ 1.32	\$ 0.83	\$ 0.83
Discontinued Operations	(0.02)	(0.02)	(0.02)	(0.02)
<b>Net Income</b>	<b>\$ 1.30</b>	<b>\$ 1.30</b>	<b>\$ 0.81</b>	<b>\$ 0.81</b>

Dividend payments on common stock for the quarter ended March 31, 2007 were \$0.585 per share and totaled approximately \$148 million. Dividend payments on common stock for the quarter ended March 31, 2006 were \$0.57 per share and totaled approximately \$143 million.

**Note 5. Commitments and Contingent Liabilities**

## Guaranteed Obligations

### Power

Power contracts for electricity, natural gas, oil, coal, pipeline capacity, transportation and emission allowances and engages in risk management activities through ER&T. These activities primarily involve the purchase and sale of energy and related products under transportation, physical, financial and forward contracts at fixed and variable prices. These transactions are executed with both numerous counterparties and brokers. Counterparties and brokers may require guarantees, cash or cash related instruments to be deposited on these transactions as described below.

Power has unconditionally guaranteed payments by its subsidiaries, ER&T and PSEG Power New York Inc. (Power New York) in commodity-related transactions to support current exposure, interest and other costs on sums due and payable in the ordinary course of business. These payment guarantees are provided to counterparties in order to obtain credit. Under these agreements, guarantees cover lines of credit between entities and are often reciprocal in nature. The exposure between counterparties can move in either direction. The face value of the guarantees outstanding as of March 31, 2007 and December 31, 2006 was approximately \$1.6 billion.

In order for Power to incur a liability for the face value of the outstanding guarantees, ER&T and Power New York would have to fully utilize the credit granted to them by every counterparty to whom Power has provided a guarantee and all of ER&T's and Power New York's contracts would have to be out-of-the-

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

money (if the contracts are terminated, Power would owe money to the counterparties). The probability of all contracts at ER&T and Power New York being simultaneously out-of-the-money is highly unlikely due to offsetting positions within the portfolio. For this reason, the current exposure at any point in time is a more meaningful representation of the potential liability to Power under these guarantees. The current exposure consists of the net of accounts receivable and accounts payable and the forward value on open positions, less any margins posted. The current exposure from such liabilities was \$532 million and \$518 million as of March 31, 2007 and December 31, 2006, respectively.

Power is subject to counterparty collateral calls related to commodity contracts that are bilateral and are subject to certain creditworthiness standards as guarantor under performance guarantees for ER&T's agreements. Changes in commodity prices, including fuel, emissions allowances and electricity, can have a material impact on margin requirements under such contracts. As of March 31, 2007, Power had posted margin of approximately \$66 million, primarily in the form of letters of credit, and received margin of approximately \$57 million to satisfy collateral obligations and support various contractual and environmental obligations. As of December 31, 2006, Power had posted margin of approximately \$40 million, primarily in the form of letters of credit, and received margin of approximately \$86 million, including approximately \$82 million in the form of letters of credit.

Power also routinely enters into exchange-traded futures and options transactions for electricity and natural gas as part of its operations. Generally, such future contracts require a deposit of cash margin, the amount of which is subject to change based on market movement and in accordance with exchange rules. As of March 31, 2007 and December 31, 2006, Power had deposited margin of approximately \$164 million and \$89 million, respectively. Exchange-traded transactions that are margined and monitored separately from physical trading activity may not be subject to change in the event of a downgrade to Power's rating.

In the event of a deterioration of Power's credit rating to below investment grade, which would represent a two level downgrade from its current ratings, many of these agreements allow the counterparty to demand that ER&T provide further performance assurance. As of March 31, 2007, if Power were to lose its investment grade rating and, assuming all counterparties to which ER&T is out-of-the-money were contractually entitled to demand, and demanded, performance assurance, ER&T could be required to post additional collateral in an amount equal to approximately \$664 million. Power believes that it has sufficient liquidity to post such collateral, if necessary.

### **Energy Holdings**

Energy Holdings and/or Global have guaranteed certain obligations of their subsidiaries or affiliates, including the successful completion, performance or other obligations related to certain projects.

In 2006, Global sold its investments in Poland. As of March 31, 2007 and December 31, 2006, Global was still obligated for the \$6 million equity commitment guarantee at Skawina. The guarantee expires in August 2007. If payments are required, such payments are indemnified by the purchaser in accordance with the purchase agreement.

Global also has a contingent guarantee expiring in April 2011 related to debt service obligations associated with Chilquinta Energia S.A., an energy distribution company in Chile in which Global owns 50%. As of March 31, 2007 and December 31, 2006, the contingent guarantee was approximately \$25 million.

In September 2003, Energy Holdings completed the sale of PSEG Energy Technologies Inc. (Energy Technologies) and nearly all of its assets. However, Energy Holdings retained certain outstanding construction and warranty obligations related to ongoing construction projects previously performed by Energy Technologies. These construction obligations have performance bonds issued by insurance companies for which exposure is adequately

supported by the outstanding letters of credit shown in the table above for PSEG Energy Technologies Asset Management Company LLC. As of March 31, 2007 and December 31, 2006, there were \$14 million of such bonds outstanding, which are related to uncompleted construction projects. As of March 31, 2007 and December 31, 2006, there was an additional \$2 million of performance guarantees related to Energy Technologies.

As of March 31, 2007 and December 31, 2006, Energy Holdings and/or Global have various other guarantees amounting to \$28 million and \$30 million, respectively.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**Environmental Matters**

**PSEG, PSE&G and Power**

*Hazardous Substances*

The New Jersey Department of Environmental Protection (NJDEP) has regulations in effect concerning site investigation and remediation that require an ecological evaluation of potential damages to natural resources in connection with an environmental investigation of contaminated sites. These regulations may substantially increase the costs of environmental investigations and necessary remediation, particularly at sites situated on surface water bodies. PSE&G, Power and their respective predecessor companies own or owned and/or operate or operated certain facilities situated on surface water bodies, certain of which are currently the subject of remedial activities.

The U.S. Environmental Protection Agency (EPA) has determined that a six-mile stretch of the Passaic River in the area of Newark, New Jersey is a facility within the meaning of that term under the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA). PSE&G and certain of its predecessors conducted industrial operations at properties adjacent to the Passaic River facility. The operations included one operating electric generating station (Essex Site), one former generating station and four former manufactured gas plants (MGPs). PSE&G's costs to clean up former MGPs are recoverable from utility customers through the Societal Benefits Clause (SBC). PSE&G has sold the site of the former generating station and obtained releases and indemnities for liabilities arising out of the site in connection with the sale. The Essex Site was transferred to Power in August 2000. Power assumed any environmental liabilities of PSE&G associated with the electric generating stations that PSE&G transferred to it, including the Essex Site.

In 2003, the EPA notified 41 potentially responsible parties (PRPs), including PSE&G and Power, that it was expanding its assessment of the Passaic River Study Area to the entire 17-mile tidal reach of the lower Passaic River. The EPA further indicated, with respect to PSE&G, that it believed that hazardous substances had been released from the Essex Site and a former MGP located in Harrison, New Jersey (Harrison Site), which also includes facilities for PSE&G's ongoing gas operations. The EPA estimated that its study would require five to eight years to complete and would cost approximately \$20 million, of which it would seek to recover \$10 million from the PRPs, including PSE&G and Power. Power has provided notice to insurers concerning this potential claim.

Also, in 2003, PSEG, PSE&G and 56 other PRPs received a Directive and Notice to Insurers from the NJDEP that directed the PRPs to arrange for a natural resource damage assessment and interim compensatory restoration of natural resource injuries along the lower Passaic River and its tributaries pursuant to the New Jersey Spill Compensation and Control Act. The NJDEP alleged in the Directive that it had determined that hazardous substances had been discharged from the Essex Site and the Harrison Site. The NJDEP announced that it had estimated the cost of interim natural resource injury restoration activities along the lower Passaic River to approximate \$950 million.

PSE&G and Power have indicated to both the EPA and NJDEP that they are willing to work with the agencies in an effort to resolve their respective claims and, along with approximately 65 other PRPs, have entered into an agreement with the EPA or have indicated their intention to enter an agreement that provides for sharing the costs of the \$20 million study between the government organizations and the PRPs. In 2006, the EPA notified the PRPs that the cost of the study will greatly exceed the \$20 million initially estimated and offered to the PRPs the opportunity to conduct the study themselves rather than reimburse the government for the additional costs it incurs. The PRP group has engaged in discussions with the EPA regarding the offer and approximately 70 PRPs, including PSE&G and Power, have agreed to assume responsibility for the study pursuant to an Administrative Order on Consent and to divide the associated costs among themselves according to a mutually agreed-upon formula. PSEG, PSE&G and Power cannot

predict what further actions, if any, or the costs or the timing thereof, that may be required with respect to the Passaic River or natural resource damages. However, such costs could be material.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**PSE&G**

***MGP Remediation Program***

PSE&G is currently working with the NJDEP under a program to assess, investigate and remediate environmental conditions at PSE&G's former MGP sites (Remediation Program). To date, 38 sites have been identified as sites requiring some level of remedial action. In addition, the NJDEP has announced initiatives to accelerate the investigation and subsequent remediation of the riverbeds underlying surface water bodies that have been impacted by hazardous substances from adjoining sites. Specifically, in 2005 the NJDEP initiated a program on the Delaware River aimed at identifying the 10 most significant sites for cleanup. One of the sites identified is a former MGP facility located in Camden. The Remediation Program is periodically reviewed, and the estimated costs are revised by PSE&G based on regulatory requirements, experience with the program and available remediation technologies. Since the inception of the Remediation Program in 1988 through March 31, 2007, PSE&G had expenditures of approximately \$390 million.

During the fourth quarter of 2006, PSE&G refined the detailed site estimates. The cost of remediating all sites to completion, as well as the anticipated costs to address MGP-related material discovered in two rivers adjacent to former MGP sites, could range between \$798 million and \$838 million, including amounts spent to date. No amount within the range was considered to be most likely. Therefore, \$408 million was accrued at March 31, 2007, which represents the difference between the low end of the total program cost estimate of \$798 million and the total incurred costs through March 31, 2007 of \$390 million. Of this amount, approximately \$45 million was recorded in Other Current Liabilities and \$363 million was reflected in Other Noncurrent Liabilities. The costs associated with the MGP Remediation Program have historically been recovered through the SBC charges to PSE&G ratepayers. As such, a \$408 million Regulatory Asset was recorded.

Costs for the MGP Remediation Program were approximately \$42 million for 2006. PSE&G anticipates spending \$47 million in 2007, \$50 million in 2008, and an average of approximately \$40 million per year each year thereafter through 2016.

**Power**

***Prevention of Significant Deterioration (PSD)/New Source Review (NSR)***

The PSD/NSR regulations, promulgated under the Clean Air Act (CAA), require major sources of certain air pollutants to obtain permits, install pollution control technology and obtain offsets, in some circumstances, when those sources undergo a major modification, as defined in the regulations. The Federal government may order companies not in compliance with the PSD/NSR regulations to install the best available control technology at the affected plants and to pay monetary penalties of up to approximately \$27,500 for each day of continued violation.

The EPA and the NJDEP issued a demand in March 2000 under the CAA requiring information to assess whether projects completed since 1978 at the Hudson and Mercer coal-burning units were implemented in accordance with applicable PSD/NSR regulations. Power completed its response to requests for information and, in January 2002, reached an agreement with the NJDEP and the EPA to resolve allegations of noncompliance with PSD/NSR regulations. Under that agreement, over the course of 10 years, Power agreed to install advanced air pollution controls to reduce emissions of Sulfur Dioxide (SO<sub>2</sub>), Nitrogen Oxide (NO<sub>x</sub>), particulate matter and mercury from the coal-burning units at the Mercer and Hudson generating stations to ensure compliance with PSD/NSR. Power also agreed to spend at least \$6 million on supplemental environmental projects and pay a \$1 million civil penalty. The agreement resolving the NSR allegations concerning the Hudson and Mercer coal-fired units also resolved a dispute

over Bergen 2 regarding the applicability of PSD requirements and allowed construction of the unit to be completed and operations to commence.

Power subsequently notified the EPA and the NJDEP that it was evaluating the continued operation of the Hudson coal unit in light of changes in the energy and capacity markets, increases in the cost of pollution control equipment and other necessary modifications to the unit. On November 30, 2006, Power reached an agreement with the EPA and NJDEP on an amendment to its 2002 agreement intended to achieve the

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

emissions reductions targets of this agreement while providing more time to assess the feasibility of installing additional advanced emissions controls at Hudson.

The amended agreement with the EPA and the NJDEP, which is pending final approval, would allow Power to continue operating Hudson and extend for four years the deadline for installing environmental controls beyond the previous December 31, 2006 deadline. Power will be required to undertake a number of technology projects (SCRs, scrubbers, baghouses, carbon injection), plant modifications and operating procedure changes at Hudson and Mercer designed to meet targeted reductions in emissions of NO<sub>x</sub>, SO<sub>2</sub>, particulate matter and mercury. In addition, Power has agreed to notify the EPA and NJDEP by the end of 2007 whether it will install the additional emissions controls at Hudson by the end of 2010, or plan for the orderly shut down of the unit.

Under the program to date, Power has installed SCRs at Mercer at a cost of approximately \$114 million. The cost of implementing the balance of the amended agreement at Mercer and Hudson is estimated at approximately \$500 million for Mercer and at \$600 million to \$750 million for Hudson and will be incurred in the 2007-2010 timeframe. As part of the agreement, Fossil has agreed to purchase and retire emissions allowances, contribute approximately \$3 million for programs to reduce particulate emissions from diesel engines in New Jersey and pay a \$6 million civil penalty. In addition, in March 2007, Fossil entered into an engineering, procurement and construction contract with a third party contractor to complete all back-end technology requirements for the Mercer station, as referenced above.

As a result of the agreement, Power increased its environmental reserves by approximately \$15 million to account for civil penalties associated with the amendment to the agreement and other costs. PSEG and Power recorded the charge in Other Deductions on their respective Condensed Consolidated Statements of Operations in the fourth quarter of 2006.

***Mercury Regulation***

New Jersey and Connecticut have adopted standards for the reduction of emissions of mercury from coal-fired electric generating units. In February 2007, Pennsylvania also issued new requirements for the reduction of mercury emissions from coal-fired power plants. Connecticut requires coal-fired power plants in Connecticut to achieve either an emissions limit or a 90% mercury removal efficiency through technology installed to control mercury emissions effective in July 2008. The regulations in New Jersey require coal-fired electric generating units in New Jersey to meet certain emissions limits or reduce emissions by 90% by December 15, 2007.

Under the New Jersey regulations, companies that are parties to multi-pollutant reduction agreements are permitted to postpone such reductions on half of their coal-fired electric generating capacity until December 15, 2012. With respect to Power's New Jersey facilities, the other half of the reductions that are required to be achieved by December 15, 2007 will be achieved through the installation of carbon injection technology and baghouses as part of Power's multi-pollutant reduction agreement with the NJDEP, which resulted from the amended 2002 agreement that resolved issues arising out of the PSD and the NSR air pollution control programs at the Hudson, Mercer and Bergen facilities, discussed above. The estimated costs of technology believed to be capable of meeting these emissions limits at Power's coal-fired unit in Connecticut and at its Mercer Station are included in Power's capital expenditures forecast. Total estimated costs for each project are between \$150 million and \$200 million. The Mercer expenditures are included in the PSD/NSR discussion above.

Connecticut has released proposed revisions to mercury regulations that encompass Permit Requirements for Mercury Emissions from Coal-Fired Electric Generating Units. On March 13, 2007, the Connecticut Department of Environmental Protection (CTDEP) released its hearing report on the Permit Requirements from Mercury Emissions from Coal-Fired Electric Generating Units. On February 17, 2007, Pennsylvania finalized its State-specific

requirements to reduce mercury emissions from coal-fired electric generating units. As written, the regulations would not materially affect the costs already identified in Power's capital expenditures forecast.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

***New Jersey Industrial Site Recovery Act (ISRA)***

Potential environmental liabilities related to subsurface contamination at certain generating stations have been identified. In the second quarter of 1999, in anticipation of the transfer of PSE&G's generation-related assets to Power, a study was conducted pursuant to ISRA, which applies to the sale of certain assets. Power had a \$51 million liability as of March 31, 2007 and December 31, 2006, related to these obligations, which is included in Other Noncurrent Liabilities on Power's Condensed Consolidated Balance Sheets and Environmental Costs on PSEG's Condensed Consolidated Balance Sheets.

***Permit Renewals***

In June 2001, the NJDEP issued a renewed New Jersey Pollutant Discharge Elimination System (NJPDDES) permit for Salem, expiring in July 2006, allowing for the continued operation of Salem with its existing cooling water intake system. A renewal application prepared in accordance with Federal Water Pollution Control Act (FWPCA) Section 316(b) and the Phase II 316(b) rule was filed in February 2006 with the NJDEP, which allows the station to continue operating under its existing NJPDDES permit until a new permit is issued. Power's application to renew Salem's NJPDDES permit demonstrates that the station satisfies FWPCA Section 316(b) and meets the Phase II 316(b) rule's performance standards for reduction of impingement and entrainment through the station's existing cooling water intake technology and operations plus implemented restoration measures. The application further demonstrates that even without the benefits of restoration, the station meets the Phase II 316(b) rule's site-specific determination standards, both on a comparison of the costs and benefits of new intake technology as well as a comparison of the costs to implement the technology at the facility to the cost estimates prepared by the EPA. The U.S. Court of Appeals for the Second Circuit issued a decision after Power filed its application that rejected the use of restoration and the site-specific cost-benefit test under the Phase II 316(b) rule. The Second Circuit Court and the United States Supreme Court have granted requests by the EPA and the industry petitioners for additional time to appeal the Second Circuit Court's decision. If NJDEP were to require the installation of structures at the Salem facility to reduce cooling water intake flow commensurate with closed cycle cooling as a result of the unfavorable decision in the Phase II litigation, the costs would be material. Power's application to renew the permit estimated that the costs associated with cooling towers for Salem are approximately \$1 billion, of which Power's share would be approximately \$575 million. If NJDEP and the CTDEP were to require installation of closed-cycle cooling or its equivalent at Power's five once-through cooled facilities, compliance with that requirement could have a significant impact on the facilities. These costs are not included in Power's currently forecasted capital expenditures.

***Energy Holdings***

***Bioenergie S.p.A. (Bioenergie)***

In May 2006, Global became the majority shareholder of Prisma 2000 S.p.A. In March 2007, the shareholders of Prisma 2000 S.p.A. agreed to change the company name to Bioenergie. Bioenergie holds 100% of the stock of San Marco Bioenergie S.p.A (San Marco), owner of a 20 MW biomass generation facility in Italy. Global also assumed operational responsibility for the facility in May 2006, which was previously operated by Carlo Gavazzi Green Power pursuant to a Services Agreement with a Global subsidiary. Global's total investment in Bioenergie is approximately \$80 million.

In August 2006, Global became aware that the Italian government was conducting a criminal investigation regarding allegations of violations of the facility's air permit. The scope of the investigation was subsequently expanded to include alleged violations of the facility's waste recycling and waste storage permits. The alleged violations include exceedances of permit limits for regulated pollutants, manipulation of the facility's continuous emission monitoring

system, false reporting and the use of fuels not authorized by the permit.

The Italian government has named five individuals as targets of the criminal investigation, including three former San Marco employees (including the former Managing Director and former plant and operations managers) and two former members of the facility's Board of Directors. While San Marco has not been named as a target, there is a potential risk that it could be so named. In December 2006 and January

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

2007, the facility was served with orders that prohibit it from conducting operations (Sequestration Orders) to prevent recurring violations and the destruction of evidence. Counsel for San Marco has advised the Prosecuting Attorney that it will fully cooperate with the ongoing investigation and will implement the corrective actions required to prevent recurrence of the violations.

On April 26, 2007, the Prosecutor issued an order lifting the Sequestration Orders and returning control of the plant to San Marco. It is anticipated that the facility will resume commercial operations in the summer of 2007.

***Electroandes S.A. (Electroandes)***

In July 2005, Electroandes received a notice from Superintendencia Nacional de Administracion Tributaria (SUNAT), the governing tax authority in Peru, claiming past due taxes for 2002 totaling approximately \$2 million related to certain interest deductions. Electroandes has taken similar interest deductions subsequent to 2002. The total cumulative estimated potential amount for past due taxes, including associated interest and penalties, is approximately \$9 million through March 31, 2007. Electroandes believes it has valid legal defenses to these claims, and has filed an appeal with SUNAT with respect to which it has not yet received a response; however, no assurances can be given regarding the outcome of this matter. In March 2007, Global announced that it is exploring a potential sale of Electroandes.

***Luz del Sur S.A.A. (LDS)***

In January 2007, SUNAT filed two tax assessments against LDS totaling approximately \$18 million, of which Global's share would be approximately \$7 million based on its 38% interest in LDS. The assessments relate to deductions LDS claimed beginning in 2000 for certain operating fees it paid to International Technical Operators under a technical services agreement, for certain bad debt deductions and certain other matters. The above assessments include interest and penalties claimed by SUNAT. LDS believes that most of such deductions were appropriate and filed an appeal in February 2007. LDS has obtained a legal opinion that it should be successful in contesting these material items/disallowances, however, no assurances can be given.

**New Generation and Development**

**Power**

Power has contracts with outside parties to purchase upgraded turbines for Salem Unit 2 and to purchase upgraded turbines and complete a power uprate for Hope Creek to modestly increase its generating capacity. Phase II of the Salem Unit 2 turbine upgrade is currently scheduled for 2008 concurrent with steam generator replacement and is anticipated to increase capacity by 26 MW. Phase II of the Hope Creek turbine replacement is expected to be completed in 2007 along with the thermal power uprate and is expected to add approximately 125 MW of capacity. Power's expenditures to date approximate \$184 million (including Interest Capitalized During Construction (IDC) of \$20 million) with an aggregate estimated share of total costs for these projects of \$207 million (including IDC of \$23 million). Timing, costs and results of these projects are dependent on timely completion of work, timely approval from the NRC and various other factors.

Completion of the projects discussed above within the estimated time frames and cost estimates cannot be assured. Construction delays, cost increases and various other factors could result in changes in the operational dates or ultimate costs to complete.

**Basic Generation Service (BGS) and Basic Gas Supply Service (BGSS)**

**PSE&G and Power**

PSE&G is required to obtain all electric supply requirements through the annual New Jersey BGS auctions for customers who do not purchase electric supply from third-party suppliers. PSE&G enters into the Supplier Master Agreement (SMA) with the winners of these BGS auctions within three business days following the BPU's approval. PSE&G has entered into contracts with Power, as well as with other winning BGS suppliers, to purchase BGS for PSE&G's anticipated load requirements. The winners of the auction are responsible for fulfilling all the requirements of a PJM Interconnection, L.L.C. (PJM) Load Serving Entity

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

(LSE) including capacity, energy, ancillary services, transmission and any other services required by PJM. BGS suppliers assume any migration risk and must satisfy New Jersey's renewable portfolio standards.

Through the BGS auctions, PSE&G has contracted for its anticipated BGS-Fixed Price load, as follows:

<b>Term</b>	<b>Term Ending</b>			
	<b>May 2007(a) 34 months</b>	<b>May 2008(b) 36 months</b>	<b>May 2009(c) 36 months</b>	<b>May 2010(d) 36 months</b>
Load (MW)	2,840	2,840	2,882	2,758
\$ per kWh	\$ 0.05515	\$ 0.06541	\$ 0.10251	\$ 0.09888

(a) Prices set in the February 2004 BGS auction.

(b) Prices set in the February 2005 BGS auction.

(c) Prices set in the February 2006 BGS auction.

(d) Prices set in the February 2007 BGS auction, which becomes effective on June 1, 2007 when the agreements for the

34-month  
(May 2007)  
BGS-FP  
supply  
agreements  
expire.

---

Power seeks to mitigate volatility in its results by contracting in advance for its anticipated electric output as well as its anticipated fuel needs.

As part of its objective, Power has entered into contracts to directly supply PSE&G and other New Jersey Electric Distribution Companies (EDCs) with a portion of their respective BGS requirements through the New Jersey BGS auction process, described above. In addition to the BGS-related contracts, Power enters into firm supply contracts with EDCs, as well as other firm sales and commitments.

PSE&G has a full requirements contract with Power to meet the gas supply requirements of PSE&G's gas customers. The contract extends through March 31, 2012, and year-to-year thereafter. Power has entered into hedges for a portion of these anticipated BGSS obligations, as permitted by the BPU. The BPU permits recovery of the cost of gas hedging up to 115 billion cubic feet or approximately 80% of PSE&G's residential gas supply annually through the BGSS tariff. For additional information, see Note 13. Related-Party Transactions.

### **Minimum Fuel Purchase Requirements**

#### **Power**

##### *Coal and Oil*

Power purchases coal and oil for certain of its fossil generation stations through various long-term commitments. The coal purchase commitments through 2009 amount to approximately 70% of its average anticipated coal needs, including transportation. These commitments total approximately \$659 million.

##### *Nuclear Fuel*

Power has several long-term purchase contracts for the supply of nuclear fuel for the Salem and Hope Creek Nuclear Generating Stations. Power has inventory and commitments to purchase sufficient quantities of uranium (concentrates and uranium hexafluoride) to meet 100% of its total estimated requirements through 2011. Additionally, Power has commitments covering approximately 55% of its estimated requirements for 2012 and 15% from 2013 through 2016. These commitments, based on current market prices, total approximately \$577 million (\$428 million Power's estimated share). Power's policy is to maintain certain levels of concentrates and uranium hexafluoride in inventory and to make periodic purchases to support such levels. As such, the commitments referred to above include estimated quantities to be purchased that are in excess of contractual minimum quantities.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

Power also has commitments that provide 100% of its uranium enrichment requirements through 2010 that total approximately \$200 million (\$147 million Power's estimated share).

Power has commitments for the fabrication of fuel assemblies for reloads required through 2011 for Salem and through 2012 for Hope Creek that total approximately \$123 million (\$93 million Power's estimated share).

***Natural Gas***

In addition to its fuel requirements, Power has entered into various multi-year contracts for firm transportation and storage capacity for natural gas, primarily to meet its gas supply obligations to PSE&G. As of March 31, 2007, the total minimum requirements under these contracts were approximately \$1.1 billion through 2016.

These purchase obligations are consistent with Power's strategy to enter into contracts for its fuel supply in comparable volumes to its sales contracts.

**Energy Holdings**

The Texas generation facilities have entered into gas supply agreements for their anticipated fuel requirements to satisfy obligations under their forward energy sales contracts. The plants had fuel purchase commitments totaling \$106 million to support all of their contracted energy sales.

**Operating Services Contract (OSC)**

**Power**

On January 17, 2005, Nuclear entered into an OSC with Exelon Generation LLC (Exelon) relating to the operation of the Hope Creek and Salem nuclear generating stations. The OSC requires Exelon to provide key personnel to oversee daily plant operations at the Hope Creek and Salem nuclear generating stations and to implement a management model that Exelon has used to manage its own nuclear facilities. Nuclear continues as the license holder with exclusive legal authority to operate and maintain the plants, retains responsibility for management oversight and has full authority with respect to the marketing of its share of the output from the facilities. Exelon is entitled to receive reimbursement of its costs in discharging its obligations, an annual operating services fee of \$3 million and incentive fees up to \$12 million annually based on attainment of goals relating to safety, capacity factor and operation and maintenance expenses. On October 27, 2006, Nuclear informed Exelon that it was electing to continue the OSC for up to two years beyond the initial January 2007 period.

In December 2006, Power announced its plans to resume direct management of the Salem and Hope Creek nuclear generating stations before the expiration of the OSC. As part of this plan, on January 1, 2007, the senior management team at Salem and Hope Creek, which consisted of three senior executives from Exelon, became employees of Power. Power has continued to recruit additional employees to build its organizational structure. Power is analyzing its various options and expects to implement a plan during the second quarter to fully resume functions that Exelon currently performs, which would put Power in a position to terminate the OSC by the end of 2007.

**Maintenance Agreement**

**Power**

Power entered into a long-term contractual services agreement with a vendor in September 2003 to provide the outage and service needs for certain of Power's generating units at market rates. The contract covers approximately 25 years and could result in annual payments ranging from approximately \$10 million to \$50 million for services, parts and materials rendered.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**Investment Tax Credits (ITC)**

**PSEG and PSE&G**

As of June 1999, the Internal Revenue Service (IRS) had issued several private letter rulings (PLRs) that concluded that the refunding of excess deferred tax and ITC balances to utility customers was permitted only over the related assets' regulatory lives, which for PSE&G, were terminated upon New Jersey's electric industry deregulation. Based on this fact, PSEG and PSE&G reversed the deferred tax and ITC liability relating to PSE&G's generation assets that were transferred to Power, and recorded a \$235 million reduction of the extraordinary charge in 1999 due to the restructuring of the utility industry in New Jersey. PSE&G was directed by the BPU to seek a PLR from the IRS to determine if the ITC included in the impairment write-down of generation assets could be credited to customers without violating the tax normalization rules of the Internal Revenue Code. PSE&G filed a PLR request with the IRS in 2002.

On May 11, 2006, the IRS issued a PLR to PSE&G. The PLR concluded that none of the generation ITC could be passed to utility customers without violating the normalization rules. While the holding in the PLR is a favorable development for PSE&G, an outstanding Treasury regulation project could overturn the holding in the PLR if the Treasury were to alter a position set out in certain December 21, 2005 proposed regulations. The issue cannot be fully resolved until the final Treasury regulations are issued.

On May 16, 2006, the BPU voted in favor of a special investigation and hearing before the BPU concerning PSE&G's actions leading up to receiving the PLR, specifically its failure to abide by a BPU order to withdraw the request. An order detailing such special investigation has not yet been issued and no investigation has begun.

On October 13, 2006, the Appellate Division of the Superior Court of New Jersey granted PSE&G's motion to dismiss PSE&G's appeal of the BPU's order to withdraw the PLR since PSE&G has already received the PLR. The court also determined that if the BPU seeks to take future action against PSE&G based on the alleged violation of its order, PSE&G can restart the appeal.

**BPU Deferral Audit**

**PSEG and PSE&G**

The BPU Energy and Audit Division conducts audits of deferred balances, which are under various adjustment clauses. A draft Deferral Audit Phase II report relating to the 12-month period ended July 31, 2003 was released by the consultant to the BPU in April 2005. The draft report addresses the SBC, Market Transition Charge (MTC) and Non-Utility Generation (NUG) deferred balances. The BPU released the report on May 13, 2005.

While the consultant to the BPU found that the Phase II deferral balances complied in all material respects with the BPU Orders regarding such deferrals, the consultant noted that the BPU Staff had raised certain questions with respect to the reconciliation method PSE&G employed in calculating the overrecovery of its MTC and other charges during the Phase I and Phase II four-year transition period. The amount in dispute is approximately \$130 million.

On January 31, 2007, PSE&G requested that the matter be transmitted to the Office of Administrative Law for the development of an evidentiary record and an initial decision. The BPU granted the request on February 7, 2007.

While PSE&G believes the MTC methodology it used was fully litigated and resolved, without exception, by the BPU and other intervening parties in its previous electric base rate case, deferral audit and deferral proceeding that were

approved by the BPU in its order on April 22, 2004, and that such order is non-appealable, PSE&G cannot predict the impact of the outcome of this proceeding.

**New Jersey Clean Energy Program**

**PSE&G**

The BPU has approved a funding requirement for each New Jersey utility applicable to its Renewable Energy and Energy Efficiency programs for the years 2005 to 2008. The sum of PSE&G's electric and gas funding requirement was \$37 million and \$30 million for the three months ended March 31, 2007 and 2006,

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

respectively. The remaining liability has been recorded at a discounted present value with an offsetting Regulatory Asset, since the costs associated with this program are expected to be recovered from PSE&G ratepayers through the SBC. The liability for the funding requirement as of March 31, 2007 and December 31, 2006 was \$228 million and \$253 million, respectively.

**Leveraged Lease Investments**

**PSEG and Energy Holdings**

On November 16, 2006, the IRS issued a report with respect to its audit of PSEG's corporate tax returns for tax years 1997 through 2000, which disallowed all deductions associated with certain of Resources' lease transactions that are similar to a type that the IRS publicly announced its intention to challenge. In addition, the IRS imposed a 20% penalty for substantial understatement of tax liability. In February 2007, PSEG filed a protest to the Office of Appeals of the IRS. As of March 31, 2007 and December 31, 2006, Resources' total gross investment in such transactions was approximately \$1.4 billion and \$1.5 billion, respectively.

If all deductions associated with these lease transactions, entered into by PSEG between 1997 and 2002, are successfully challenged by the IRS, it could have a material adverse impact on PSEG's and Energy Holdings' financial position, results of operations and net cash flows and could impact future returns on these transactions. PSEG believes that its tax position related to these transactions is proper based on applicable statutes, regulations and case law and will aggressively contest the IRS's disallowance. PSEG believes that it is more likely than not that it will prevail with respect to the IRS's challenge, although no assurances can be given.

If the IRS's disallowance of tax benefits associated with all of these lease transactions was sustained, approximately \$796 million of PSEG's deferred tax liabilities that have been recorded under leveraged lease accounting through March 31, 2007 would become currently payable. In addition, current interest would be charged of approximately \$132 million after-tax, and penalties of \$159 million may become payable. Energy Holdings' management has assessed the probability of various outcomes to this matter and recorded reserves in accordance with FIN 48.

For additional information and guidance for leveraged leases, see Note 2. Recent Accounting Standards.

**Note 6. Financial Risk Management Activities**

**PSEG, PSE&G, Power and Energy Holdings**

The operations of PSEG, PSE&G, Power and Energy Holdings are exposed to market risks from changes in commodity prices, foreign currency exchange rates, interest rates and equity prices that could affect their results of operations and financial conditions. PSEG, PSE&G, Power and Energy Holdings manage exposure to these market risks through their regular operating and financing activities and, when deemed appropriate, hedge these risks through the use of derivative financial instruments. PSEG, PSE&G, Power and Energy Holdings use the term "hedge" to mean a strategy designed to manage risks of volatility in prices or rate movements on certain assets, liabilities or anticipated transactions and by creating a relationship in which gains or losses on derivative instruments are expected to counterbalance the gains or losses on the assets, liabilities or anticipated transactions exposed to such market risks. Each of PSEG, PSE&G, Power and Energy Holdings uses derivative instruments as risk management tools consistent with its respective business plan and prudent business practices.

**Derivative Instruments and Hedging Activities**

**Commodity Contracts**

*Power*

Power actively transacts in energy and energy-related products, including electricity, natural gas, electric capacity, firm transmission rights (FTRs), coal, oil and emission allowances in the spot, forward and futures markets, primarily in the Northeastern and Mid Atlantic United States.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

Power maintains a strategy of entering into positions to optimize the value of its portfolio and reduce earnings volatility of generation assets, gas supply contracts and its electric and gas supply obligations. Power engages in physical and financial transactions in the electricity wholesale markets and executes an overall risk management strategy seeking to mitigate the effects of adverse movements in the fuel and electricity markets. These contracts also involve financial transactions including swaps, options, futures and FTRs. During the quarter ended March 31, 2007, higher market prices for electricity have resulted in additional unrealized losses on many of these contracts leading to an increase in Accumulated Other Comprehensive Loss (OCL). Power marks its derivative energy-related contracts to market in accordance with SFAS 133, with changes in fair value charged to the Condensed Consolidated Statements of Operations. Wherever possible, fair values for these contracts are obtained from quoted market sources. For contracts where no quoted market exists, modeling techniques are employed using assumptions reflective of current market rates, yield curves and forward prices, as applicable, to interpolate certain prices. The effect of using such modeling techniques is not material to Power's financial results.

**Cash Flow Hedges**

Power uses forward sale and purchase contracts, swaps and FTR contracts to hedge forecasted energy sales from its generation stations and to hedge related load obligations. Power also enters into swaps and futures transactions to hedge the price of fuel to meet its fuel purchase requirements. These derivative transactions are designated and effective as cash flow hedges under SFAS 133. As of March 31, 2007, the fair value of these hedges was \$(449) million and resulted in \$(267) million after-tax recorded in OCL. As of December 31, 2006, the fair value of these hedges was \$(166) million. These hedges, along with realized losses on hedges of \$(19) million retained in OCL, resulted in a \$(108) million after-tax balance in OCL. The increase of \$159 million in OCL during the quarter ended March 31, 2007 was caused mainly by higher electricity market prices. During the 12 months ending March 31, 2008, \$186 million after-tax of net unrealized losses on these commodity derivatives is expected to be reclassified to earnings. Approximately \$85 million of after-tax unrealized losses on these commodity derivatives in OCL is expected to be reclassified to earnings for the 12 months ending March 31, 2009. Ineffectiveness associated with these hedges, as defined in SFAS 133, was \$(2) million at March 31, 2007. The expiration date of the longest dated cash flow hedge is in 2010.

**Other Derivatives**

Power also enters into certain other contracts that are derivatives, but do not qualify for hedge accounting under SFAS 133. Most of these contracts are used for fuel purchases for generation requirements and for electricity purchases for contractual sales obligations. Therefore, the changes in fair market value of these derivative contracts are recorded in Energy Costs or Operating Revenues, as appropriate, on the Condensed Consolidated Statements of Operations. The net fair value of these instruments as of March 31, 2007 was less than \$(1) million. The net fair value of these instruments as of December 31, 2006 was \$1 million.

**Energy Holdings**

**Other Derivatives**

The Texas generation facilities enter into electricity forward and capacity sale contracts to sell their 2,000 MW capacity for portions of the current calendar year, with the balance sold into the daily spot market. The Texas generation facilities also enter into gas purchase contracts to specifically match the generation requirements to support the electricity forward sales contracts. Although these contracts fix the amount of revenue, fuel costs and cash flows, and thereby provide financial stability to the Texas generation facilities, these contracts are, based on their terms, derivatives that do not meet the specific accounting criteria in SFAS 133 to qualify for the normal purchases and

normal sales exception, or to be designated as a hedge for accounting purposes. As a result, these contracts must be recorded at fair value. The net fair value of the open positions was approximately \$9 million and \$38 million as of March 31, 2007 and December 31, 2006, respectively.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

**Interest Rates**

**PSEG, PSE&G, Power and Energy Holdings**

PSEG, PSE&G, Power and Energy Holdings are subject to the risk of fluctuating interest rates in the normal course of business. PSEG's policy is to manage interest rate risk through the use of fixed and floating rate debt and interest rate derivatives.

**Fair Value Hedges**

***PSEG and Power***

In March 2004, Power issued \$250 million of 3.75% Senior Notes due April 2009. PSEG used an interest rate swap to convert Power's fixed-rate debt into variable-rate debt. The interest rate swap is designated and effective as a fair value hedge. The fair value changes of the interest rate swap are fully offset by the fair value changes in the underlying debt. As of March 31, 2007 and December 31, 2006, the fair value of the hedge was \$(7) million and \$(9) million, respectively.

**Cash Flow Hedges**

***PSEG, PSE&G and Energy Holdings***

PSEG, PSE&G and Energy Holdings use interest rate swaps and other interest rate derivatives to manage their exposures to the variability of cash flows, primarily related to variable-rate debt instruments. The interest rate derivatives used are designated and effective as cash flow hedges. Except for PSE&G's cash flow hedges, the fair value changes of these derivatives are initially recorded in Accumulated Other Comprehensive Income/Loss. As of March 31, 2007, the fair value of these cash flow hedges was \$(5) million, consisting of \$(4) million and \$(1) million at PSE&G and Energy Holdings, respectively. As of December 31, 2006, the fair value of these cash flow hedges was \$(4) million, primarily at PSE&G. The \$(4) million at PSE&G as of both March 31, 2007 and December 31, 2006 is not included in Accumulated Other Comprehensive Income/Loss, as it is deferred as a Regulatory Asset and is expected to be recovered from PSE&G's customers. During the next 12 months, approximately \$1 million of unrealized losses (net of taxes) on interest rate derivatives in OCL is expected to be reclassified at PSEG. As of March 31, 2007, there was no hedge ineffectiveness associated with these hedges.

**Foreign Currencies**

**Energy Holdings**

Global is exposed to foreign currency risk and other foreign operations risk that arise from investments in foreign subsidiaries and affiliates. A key component of its risks is that some of its foreign subsidiaries and affiliates have functional currencies other than the consolidated reporting currency, the U.S. Dollar. Additionally, Global and certain of its foreign subsidiaries and affiliates have entered into monetary obligations and maintain receipts/receivables in U.S. Dollars or currencies other than their own functional currencies. Global, a U.S. Dollar functional currency entity, is primarily exposed to changes in the Peruvian Nuevo Sol and the Chilean Peso and to a lesser extent, the Euro. Changes in valuation of these currencies can impact the value of Global's investments, results of operations, financial condition and cash flows. Global has attempted to limit potential foreign exchange exposure by entering into revenue contracts that adjust for changes in foreign exchange rates. Global may also use foreign currency forward, swap and option agreements to manage risk related to certain foreign currency fluctuations.

Although the Chilean Peso and the Peruvian Nuevo Sol had originally depreciated relative to the U.S. Dollar after Global's initial investments, the currencies have appreciated significantly over the past few years. The net cumulative foreign currency revaluations have increased the total amount of Energy Holdings' Member's Equity by \$124 million as of March 31, 2007.

### **Hedges of Net Investments in Foreign Operations**

#### **Energy Holdings**

In March 2004 and April 2004, Energy Holdings entered into four cross-currency interest rate swap agreements. The swaps are designed to hedge the net investment in a foreign subsidiary associated with the

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

exposure in the U.S. Dollar to Chilean Peso exchange rate. The fair value of the cross-currency swaps was \$(22) million and \$(25) million as of March 31, 2007 and December 31, 2006, respectively. The change in fair value of the majority of the swaps is recorded in Cumulative Translation Adjustment within OCL. As a result, Energy Holdings Member's Equity was reduced by \$22 million as of March 31, 2007.

**Note 7. Comprehensive Income, Net of Tax**

eliminations.

#### **Note 8. Changes in Capitalization**

##### **PSEG**

On April 13, 2007, PSEG called for redemption on May 15, 2007, the outstanding \$375 million of its Floating Rate Notes Due 2008 at 100% of the principal amount.

For the quarter ended March 31, 2007, PSEG issued 393,355 shares of its common stock in connection with settling stock options for approximately \$16 million.

For the quarter ended March 31, 2007, PSEG issued approximately 204,068 shares of its common stock under its Dividend Reinvestment Program and its Employee Stock Purchase Program for approximately \$17 million.

##### **PSE&G**

On January 2, 2007, PSE&G repaid at maturity \$113 million of its 6.25% Series WW First and Refunding Mortgage Bonds.

For the quarter ended March 31, 2007, Transition Funding repaid approximately \$38 million of its transition bonds.

**Power**

In March 2007, Power paid a cash dividend to PSEG of \$125 million.

**Energy Holdings**

In March 2007, Energy Holdings made a cash distribution to PSEG of \$145 million in the form of a return of capital.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)**

During the first three months of 2007, Energy Holdings subsidiaries repaid approximately \$16 million of non-recourse debt, including \$14 million by Global, primarily related to the Texas generation facilities, \$1 million by Resources and \$1 million by EGDC.

## Note 10. Pension and Other Postretirement Benefits (OPEB)

## PSEG

PSEG sponsors several qualified and nonqualified pension plans and OPEB plans covering PSEG's and its participating affiliates' current and former employees who meet certain eligibility criteria. The following table provides the components of net periodic benefit costs relating to all qualified and nonqualified pension and OPEB plans on an aggregate basis. OPEB costs are presented net of the federal subsidy expected for prescription drugs under the Medicare Prescription Drug Improvement and Modernization Act of 2003.

	Pension Benefits		OPEB	
	Quarters Ended March 31,		Quarters Ended March 31,	
	2007	2006	2007	2006
	(Millions)			
<b>Components of Net Periodic Benefit Costs:</b>				
Service Cost	\$ 21	\$ 21	\$ 4	\$ 5
Interest Cost	54	53	18	17
Expected Return on Plan Assets	(72 )	(67 )	(4 )	(3 )
Amortization of Net Transition Obligation			7	7
Prior Service Cost	3	3	3	3
Loss	5	13	2	2
Net Periodic Benefit Cost	11	23	30	31
Effect of Regulatory Asset			5	5
Total Benefit Costs	\$ 11	\$ 23	\$ 35	\$ 36

## PSE&amp;G, Power, Energy Holdings and Services

Pension costs and OPEB costs for PSE&G, Power, Energy Holdings and Services are detailed as follows:

	Pension Benefits		OPEB	
	Quarters Ended March 31,		Quarters Ended March 31,	
	2007	2006	2007	2006
	(Millions)			
PSE&G	\$ 5	\$ 12	\$ 30	\$ 30
Power	3	7	4	4

Energy Holdings				
Services	3	4	1	2
Total PSEG Consolidated Benefit Costs	\$ 11	\$ 23	\$ 35	\$ 36

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## Note 11. Income Taxes

An analysis of the tax provision expense is as follows:

	PSE&G	Power	Energy Holdings (Millions)	Other (A)	Consolidated Total
<b><u>For the Quarter Ended March 31, 2007:</u></b>					
Income (Loss) Before Income Taxes	\$ 231	\$ 374	\$ 23	\$ (31 )	\$ 597
Tax Computed at the Statutory Rate	\$ 81	\$ 131	\$ 8	\$ (11 )	\$ 209
Increase (Decrease) Attributable to Flow Through of Certain Tax Adjustments:					
State Income Taxes after Federal Benefit	16	23	(1 )	(1 )	37
Rate Differential of Foreign Operations			9		9
Reserve for Tax Contingencies		1	5		6
Other	2		(1 )		1
Total Income Tax Expense (Benefit)	\$ 99	\$ 155	\$ 20	\$ (12 )	\$ 262
Effective Income Tax Rate	42.9 %	41.4 %	87.0 %(B)	38.7 %	43.9 %
<b><u>For the Quarter Ended March 31, 2006:</u></b>					
Income (Loss) Before Income Taxes	\$ 143	\$ 207	\$ 40	\$ (33 )	\$ 357
	\$ 50	\$ 73	\$ 14	\$ (12 )	\$ 125

Tax Computed at the Statutory Rate					
Increase (Decrease) Attributable to Flow Through of Certain Tax Adjustments:					
State Income Taxes after Federal Benefit					
	11	11	(2 )	(2 )	18
Plant Related Items	3				3

Effective Income Tax Rate					
	45.5 %	41.5 %	30.0 %	42.4 %	41.7 %

(A) PSEG's other activities include amounts applicable to PSEG (as parent corporation) that primarily relate to financing and certain administrative and general costs.

(B) Reflects interim period distortion due to asset sales and other one-time adjustments.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

PSEG, PSE&G, Power and Energy Holdings adopted FIN 48 effective January 1, 2007, which prescribes a model for how a company should recognize, measure, present and disclose in its financial statements uncertain tax positions that it has taken or expects to take on a tax return. For additional information, see Note 2. Recent Accounting Standards. Upon adoption, PSEG, PSE&G, Power and Energy Holdings recorded the following amounts related to their respective uncertain tax positions:

	<b>PSE&amp;G</b>	<b>Power</b>	<b>Energy Holdings</b>	<b>Other(B)</b>	<b>Consolidated Total</b>
Unrecognized Tax Benefits(A)	\$ 49	\$ 21	\$ 408	\$ 1	\$ 479
Accumulated Deferred Income Taxes associated with Unrecognized Tax Benefits	(9)	(7)	(246)		(262)
Regulatory Asset-Unrecognized Tax Benefits	(11)				(11)
Unrecognized Tax Benefits that, if recognized, would impact the effective tax rate(A)	\$ 29	\$ 14	\$ 162	\$ 1	\$ 206
Interest and Penalties Accrued	\$ 5	\$ 3	\$ 81	\$	\$ 89

(A) Includes interest and penalties

(B) PSEG's other activities include amounts applicable to PSEG (as parent corporation) that primarily relate to financing and certain administrative and general costs.

There were no material changes to the amounts above during the quarter ended March 31, 2007 and no significant increases or decreases in unrecognized tax benefits are reasonably possible to occur within the next 12 months. PSEG, PSE&G, Power and Energy Holdings include all accrued interest and penalties, required to be recorded under FIN 48, as income tax expense.

Edgar Filing: PSEG ENERGY HOLDINGS LLC - Form 10-Q/A

Income tax years for PSEG, PSE&G, Power and Energy Holdings that remain subject to examination by material jurisdictions, where an examination has not already concluded, are as follows:

	<b>PSE&amp;G</b>	<b>Power</b>	<b>Energy Holdings</b>	<b>Consolidated Total</b>

**December**  
**31, 2006:**

Total Assets	\$ 14,553	\$ 8,146	\$ 2,969	\$ 3,095	\$ 100	\$ (293)
Investments in Equity Method Subsidiaries	\$	\$ 16	\$ 5	\$ 817	\$	\$

(A) Energy Holdings other activities include amounts applicable to Energy Holdings (as parent

company) and EGDC. The net losses primarily relate to financing and certain administrative and general costs of Energy Holdings.

- (B) PSEG's other activities include amounts applicable to PSEG (as parent corporation), and intercompany eliminations, primarily relating to intercompany transactions between Power and PSE&G. No gains or losses are recorded on any intercompany transactions; rather, all intercompany transactions are at cost or, in the case of the BGS and BGSS contracts between Power and PSE&G, at rates prescribed by the BPU. For a further

discussion of  
the  
intercompany  
transactions  
between  
Power and  
PSE&G, see  
Note 13.  
Related-Party  
Transactions.  
The net losses  
primarily  
relate to  
financing and  
certain  
administrative  
and general  
costs at PSEG,  
as parent  
corporation.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Note 13. Related-Party Transactions**

The majority of the following discussion relates to intercompany transactions. These transactions were recognized on each company's stand-alone financial statements and were eliminated during the consolidation process in accordance with GAAP when preparing PSEG's Condensed Consolidated Financial Statements.

**BGS and BGSS Contracts****PSE&G and Power**

PSE&G has entered into a requirements contract with Power under which Power provides the gas supply services needed to meet PSE&G's BGSS and other contractual requirements through March 2012 and year-to-year thereafter. Power has also entered into contracts to supply energy, capacity and ancillary services to PSE&G through the BGS auction process.

The amounts which Power charged to PSE&G for BGS and BGSS are presented below:

	<b>Power's Billings for the Quarters Ended March 31,</b>	
	<b>2007</b>	<b>2006</b>
	<b>(Millions)</b>	
BGS	\$ 218	\$ 101
BGSS	\$ 1,049	\$ 1,003

As of March 31, 2007 and December 31, 2006, Power had net receivables from PSE&G of approximately \$379 million and \$370 million, respectively, primarily related to the BGS and BGSS contracts. In addition, as of March 31, 2007 and December 31, 2006, PSE&G had a payable to Power of approximately \$5 million and \$174 million, respectively, related to gas supply hedges Power entered into for BGSS.

**Services****PSE&G, Power and Energy Holdings**

Services provides and bills administrative services to PSE&G, Power and Energy Holdings. In addition, PSE&G, Power and Energy Holdings have other payables to Services, including amounts related to certain common costs, such as pension and OPEB costs, which Services pays on behalf of each of the operating companies. The billings for administrative services and payables are presented below:

	<b>Services Billings for the Quarters Ended March 31,</b>		<b>Payable to Services as of</b>	
	<b>2007</b>	<b>2006</b>	<b>March 31, 2007</b>	<b>December 31, 2006</b>
	<b>(Millions)</b>			
PSE&G	\$ 49	\$ 55	\$ 32	\$ 41

Edgar Filing: PSEG ENERGY HOLDINGS LLC - Form 10-Q/A

Power	\$ 33	\$ 37	\$ 18	\$ 21
Energy Holdings	\$ 5	\$ 5	\$ 2	\$ 2

PSE&G, Power and Energy Holdings believe that the costs of services provided by Services approximate market value for such services.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Tax Sharing Agreements****PSEG, PSE&G, Power and Energy Holdings**

PSE&G, Power and Energy Holdings had (payables to) receivables from PSEG related to taxes as follows:

	<b>(Payable to) Receivable from PSEG as of</b>	
	<b>March 31, 2007</b>	<b>December 31, 2006</b>
	<b>(Millions)</b>	
PSE&G	\$ (89 )	\$ (63 )
Power	\$ (122 )	\$ (28 )
Energy Holdings	\$ 30	\$ (10 )

As a result of the adoption of FIN 48, PSE&G, Power and Energy Holdings each recorded payables to PSEG related to uncertain tax positions. See Note 2. Recent Accounting Standards. Such amounts as of March 31, 2007 were as follows:

	<b>Payable to PSEG as of March 31, 2007</b>	
	<b>(Millions)</b>	
PSE&G	\$ 51	
Power	\$ 22	
Energy Holdings	\$ 424	

**Affiliate Loans and Advances****PSEG and Power**

As of March 31, 2007, Power had a demand note receivable of \$525 million due from PSEG. As of December 31, 2006, Power had a demand note payable to PSEG of approximately \$54 million for short-term funding needs.

**PSEG and Energy Holdings**

As of March 31, 2007 and December 31, 2006, Energy Holdings had a demand note receivable due from PSEG of \$25 million and \$28 million, respectively. These notes reflect the investment of Energy Holdings' excess cash with PSEG.

**PSE&G and Services**

As of each of March 31, 2007 and December 31, 2006, PSE&G had advanced working capital to Services of approximately \$33 million. This amount is included in Other Noncurrent Assets on PSE&G's Condensed Consolidated Balance Sheets.

**Power and Services**

As of each of March 31, 2007 and December 31, 2006, Power had advanced working capital to Services of approximately \$17 million. This amount is included in Other Noncurrent Assets on Power's Condensed Consolidated Balance Sheets.

**Other**

**PSEG and PSE&G**

As of March 31, 2007 and December 31, 2006, PSE&G had net receivables from PSEG of approximately \$2 million and \$3 million, respectively, related to amounts that PSEG had collected on PSE&G's behalf.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****PSEG and Power**

As of March 31, 2007 and December 31, 2006, Power had net receivables from PSEG of approximately \$6 million and \$1 million, respectively, related to amounts that PSEG had collected on Power's behalf.

**PSEG and Energy Holdings**

As of March 31, 2007, Energy Holdings had net receivables from PSEG of approximately \$2 million, primarily for interest due on the demand note receivable from PSEG.

**Energy Holdings and PSE&G**

As of each of March 31, 2007 and December 31, 2006, Energy Holdings had a receivable of approximately \$1 million related to efficiency incentive initiatives performed for PSE&G's customers. Energy Holdings recorded revenues for such services of approximately \$1 million and \$4 million for the quarters ended March 31, 2007 and 2006, respectively.

**Note 14. Guarantees of Debt****Power**

Each series of Power's Senior Notes and Pollution Control Notes is fully and unconditionally and jointly and severally guaranteed by Fossil, Nuclear and ER&T. The following table presents condensed financial information for the guarantor subsidiaries, as well as Power's non-guarantor subsidiaries.

	<b>Power</b>	<b>Guarantor Subsidiaries</b>	<b>Other Subsidiaries</b>	<b>Consolidating Adjustments</b>	<b>Consolidated Total</b>

**Note 15. Restatement****PSEG and Energy Holdings**

On July 26, 2007, PSEG and Energy Holdings concluded that their respective Condensed Consolidated Balance Sheets as of March 31, 2007 required restatement. PSEG and Energy Holdings determined \$207 million of Energy Holdings Senior Notes due in February 2008 had been erroneously classified as Long-Term Debt on Form 10-Q for the quarter ended March 31, 2007, instead of Long-Term Debt due Within One Year on the Condensed Consolidated Balance Sheets.

In addition to the misclassification described above, an adjustment considered immaterial is also recorded in the Condensed Consolidated Balance Sheets as of March 31, 2007. During the second quarter of 2007, an error was discovered in the calculation of the cumulative effect of adopting FSP 13-2. As a result, Energy Holdings recognized an additional \$15 million reduction in Retained Earnings, an increase of \$19 million in Deferred Taxes and an increase of \$4 million in Investment in Leveraged Leases.

The adjustments described above had no effect on the results of operations, cash flows or margins. The effects on the financial statements of all adjustments are detailed as follows:

**Condensed Consolidated Balance Sheets**

## **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)**

Following are the significant changes in or additions to information reported in the 2006 Annual Report on Form 10-K affecting the consolidated financial condition and the results of operations. This discussion refers to the Condensed Consolidated Financial Statements (Statements) and the related Notes to Condensed Consolidated Financial Statements (Notes) and should be read in conjunction with such Statements and Notes.

This combined MD&A is separately filed by Public Service Enterprise Group Incorporated (PSEG), and PSEG Energy Holdings L.L.C. (Energy Holdings). Information contained herein relating to any individual company is filed by such company on its own behalf. Energy Holdings makes representations only as to itself and makes no other representations whatsoever as to any other company.

This combined MD&A has been revised for the effects of the restatement discussed in Note 15 to the Financial Statements.

### **OVERVIEW OF 2007 AND FUTURE OUTLOOK**

#### **PSEG, PSE&G, Power and Energy Holdings**

PSEG's business consists of four reportable segments, which are PSE&G, Power and the two direct subsidiaries of Energy Holdings: PSEG Global L.L.C. (Global) and PSEG Resources L.L.C. (Resources). The following discussion relates to the markets in which PSEG's subsidiaries compete, the corporate strategy for the conduct of PSEG's businesses within these markets, significant events that have occurred during the first quarter of 2007 and future outlook for PSE&G, Power and Energy Holdings, as well as the key factors that will drive the future performance of these businesses.

#### **PSE&G**

PSE&G operates as an electric and gas public utility in New Jersey under cost-based regulation by the New Jersey Board of Public Utilities (BPU) for its distribution operations and by the Federal Energy Regulatory Commission (FERC) for its electric transmission and wholesale sales operations.

Consequently, the earnings of PSE&G are largely determined by the regulation of its rates by those agencies. On November 9, 2006, PSE&G reached settlement agreements in the Gas Base Rate Case and Electric Distribution Financial Review, which were approved by the BPU. The settlement in the Gas Base Rate Case provides for an annual increase in gas revenues of \$40 million, an adjustment to lower book depreciation expense for PSE&G by approximately \$26 million annually and the amortization of accumulated cost of removal that will further reduce depreciation and amortization expense by \$13 million annually for five years. The electric settlement authorizes a reduction in the former excess depreciation rate credit to \$22 million, resulting in additional revenue to PSE&G of approximately \$47 million annually based on current sales volumes.

#### **Overview and Future Outlook**

In February 2007, the BPU approved the results of New Jersey's annual Basic Generation Service (BGS)-Fixed Price (FP) and BGS-Commercial and Industrial Energy Price (CIEP) auctions and PSE&G successfully secured contracts to provide the electricity requirements for the majority of its customers' needs.

PSE&G believes that the decisions in November 2006 for both gas and electric base rates position it to earn reasonable returns on investment in the future. The full year impact of these decisions combined with an anticipated return to more normal weather conditions is expected to improve PSE&G's margins for 2007 and beyond.

The risks to PSE&G's business generally relate to the treatment of the various rate and other issues by the state and federal regulatory agencies, specifically the BPU and FERC. PSE&G's success will depend, in part, on its ability to attain a reasonable rate of return, continue cost containment initiatives, maintain system reliability and safety levels and continued recovery, with an adequate return, of the regulatory assets it has deferred and the investments it plans to make in its electric and gas transmission and distribution system. FERC's recent ruling regarding PJM transmission rate design is also expected to have a positive impact as PSE&G's current transmission rate structure will remain in place. Since PSE&G earns no margin on the

commodity portion of its electric and gas sales through tariff agreements, there is no anticipated commodity price volatility for PSE&G.

## **Power**

Power is an electric generation and wholesale energy marketing and trading company that is focused on a generation market in the Northeast and Mid Atlantic U.S. Power's principal operating subsidiaries, PSEG Fossil LLC (Fossil), PSEG Nuclear LLC (Nuclear) and PSEG Energy Resources & Trade LLC (ER&T) are regulated by FERC. Through its subsidiaries, Power seeks to produce low-cost energy through efficient operations of its nuclear, coal and gas-fired generation facilities, balance its generation production, fuel requirements and supply obligations through energy portfolio management and pursue disciplined growth. Changes in the operation of Power's generating facilities, fuel and capacity prices, expected contract prices, capacity factors or other assumptions could materially affect its ability to meet earnings targets and/or liquidity requirements. In addition to the electric generation business described above, Power's revenues include gas supply sales under the Basic Gas Supply Service (BGSS) contract with PSE&G.

As a merchant generator, Power's profit is derived from selling under contract or on the spot market a range of diverse products such as energy, capacity, emissions credits, congestion credits and a series of energy-related products that the system operator uses to optimize the operation of the energy grid, known as ancillary services. Accordingly, the prices of commodities, such as electricity, gas, coal and emissions, as well as the availability of Power's diverse fleet of generation units to produce these products, can have a material effect on Power's profitability. In recent years, the prices at which transactions are entered into for future delivery of these products, as evidenced through the market for forward contracts at points such as PJM Interconnection, L.L.C. (PJM) West, have escalated considerably over historical prices. Broad market price increases such as these are expected to have a positive effect on Power's results. Historically, Power's nuclear and coal-fired facilities have produced over 50% and 25% of Power's production, respectively. With the vast majority of its power sourced from these lower-cost units, the rise in electric prices is anticipated to yield higher near-term margins for Power. Over a longer-term horizon, if these higher prices are sustained at levels reflective of what the current forward markets indicate, it would yield an attractive environment for Power to contract the sale of its anticipated output, allowing for potentially sustained higher profitability than recognized in prior years. These prices also increase the cost of replacement power, thereby placing incremental risk on the operations of the generating units to produce these products.

Power seeks to mitigate volatility in its results by contracting in advance for a significant portion of its anticipated electric output and fuel needs. Power believes this contracting strategy increases stability of earnings and cash flow. By keeping some portion of its output uncontracted, Power is able to retain some exposure to market changes as well as provide some protection in the event of unexpected generation outages.

Power seeks to sell a portion of its anticipated low-cost nuclear and coal-fired generation over a multi-year forward horizon, normally over a period of approximately two to three years. By contrast, Power takes a more opportunistic approach in hedging its anticipated natural gas-fired generation. The generation from these units is less predictable, as these units are generally dispatched only when aggregate market demand has exceeded the supply provided by lower-cost units. The natural gas-fired units generally provide a lower contribution to the margin of Power than either the nuclear or coal units. Power will generally purchase natural gas as gas-fired generation is required to supply forward sale commitments.

In a changing market environment, this hedging strategy may cause Power's realized prices to be materially different than current market prices. At the present time, some of Power's existing contractual obligations, entered into during lower-priced periods, are anticipated to result in lower margins than would have been the case if no or little hedging activity had been conducted. Alternatively, in a falling price environment, this hedging strategy will tend to create margins in excess of those implied by the then current market.

## **Overview and Future Outlook**

During the first quarter of 2007, Power continued to benefit from strong energy markets and sustained improvement in the performance of its generating facilities. The resulting improvement in margins allowed Power to make a dividend payment to PSEG of \$125 million in March 2007. Going forward, Power expects

margin improvements to continue in 2007 as higher prices for its nuclear and coal-fired generation output are realized due to the rolling nature of its forward hedge positions and the expiration of older power contracts.

In PJM, the Reliability Pricing Model (RPM) will provide generators with capacity payments for the reliability provided by their respective facilities. The Forward Capacity Market (FCM) settlement in NEPOOL provides for similar reliability-based capacity payments. FERC has approved the market changes in each of these markets, with the anticipated start date for RPM set for June 1, 2007 and FCM transition period having begun on December 1, 2006. Power believes that this redesign in capacity markets will lead to changes in the value of the majority of its generating capacity and could result in incremental margin of \$125 million to \$175 million in 2007, with higher increases in future years as the full year impact is realized and existing capacity contracts expire.

On April 13, 2007, PJM announced the results of its first base residual auction for the 2007-2008 delivery year. The price for the Eastern Mid Atlantic Area Council (MAAC) zone, received by generation assets located within this zone, including those of Power, cleared at \$197.67/MW-day (\$72/kW-yr). The auction clearing price, received by generation assets, including those of Power, located in PJM but not within Eastern or Southwest MAAC zones was \$40.80/MW-day (\$15/kW-yr). The capacity price that will be charged to load serving entities for obligations in the Eastern MAAC zone is \$177.51/MW-day (\$65/kW-yr). These prices will be in effect for the June 2007 to May 2008 PJM planning year. On a prospective basis, many factors will affect the pricing for capacity in PJM, including but not limited to, changes in demand, changes in available generating capacity (including retirements, additions, derates, forced outage rates, etc.), transmission capability between zones and market design criteria used in creating the administratively determined demand curve mechanism. Management cannot predict what pricing will result from future auctions.

Power completed the sale of four turbines to a third party in April 2007 and received proceeds of \$40 million, which approximates the recorded book value. Power also expects to close on the sale of the Lawrenceburg facility in the second quarter of 2007, the proceeds of which are expected to support future dividends to PSEG and contribute to reducing PSEG's debt. PSEG has called for redemption on May 15, 2007, the outstanding \$375 million of its Senior Floating Rate Notes Due 2008.

A key factor in Power's ability to achieve its objectives is its ability to operate its nuclear and fossil stations at sufficient capacity factors to limit the need to purchase higher-priced electricity to satisfy its obligations. Power's ability to achieve its objectives will also depend on the implementation of reasonable capacity markets. Power must also be able to effectively manage its construction projects and continue to economically operate its generation facilities under increasingly stringent environmental requirements. In addition, with an increase in competition and market complexity and constantly changing forward prices, there is no assurance that Power will be able to contract its output at attractive prices. While these increases may have a potentially significant beneficial impact on margins, they could also raise any replacement power costs that Power may incur in the event of unanticipated outages, and could also further increase liquidity requirements as a result of contract obligations. Power could also be impacted by a number of market and regulatory events, including but not limited to, the lack of consistent rules in markets outside of PJM, rate-regulated utility ownership of generation and other regulatory actions favoring non-competitive markets, and regulatory policies favoring the construction of west-to-east rate based transmission that may result in increased imports of western generation into New Jersey. For additional information on liquidity requirements, see Liquidity and Capital Resources.

## **Energy Holdings**

Energy Holdings' operations are principally conducted through its subsidiaries Global, which has invested in international rate-regulated distribution companies and domestic and international generation companies, and Resources, which primarily invests in energy-related leveraged leases.

## **Global**

Global owns investments in power producers and distributors that own and operate electric generation and distribution facilities in select domestic and international markets.

Global's earnings are primarily derived from its investments in the United States, Chile and Peru. Approximately 69% of Global's investments are in Chile and Peru, with another 23% in the United States. Other modest-sized investments in Italy, India and Venezuela comprise the remaining 8% of Global's portfolio. As such, Global's success will depend on continued strong energy markets in Texas and the

economic and efficient operation of its electric distribution companies in Chile and Peru, including its ability to achieve reasonable rates and meet expected growth in demand. The success of Global's foreign investments will also depend on stable political, regulatory and economic policies, including foreign currency exchange rates and interest rates, particularly for Chile and Peru.

Energy Holdings continues to review Global's portfolio, with a focus on optimizing operations at its distribution companies to improve earnings and increase value and will consider opportunistic monetizations, as appropriate, based on valuations and potential alternate uses of capital. In March 2007, Global announced that it is exploring a potential sale of Electroandes S.A. (Electroandes), its hydro-electric generation and transmission company in Peru, and would evaluate offers to decide if proceeds from a sale might be better used for other opportunities.

## **Resources**

Resources primarily has invested in energy-related leveraged leases. Resources is focused on maintaining its current investment portfolio and does not expect to make any new investments.

## **Overview and Future Outlook**

Energy Holdings expects decreased margins at Global in 2007 primarily relating to the anticipated absence of mark-to-market (MTM) gains at the Texas generation facilities and anticipated maintenance outages at the Texas generation facilities. Also contributing to the expected decrease at Energy Holdings are higher taxes, the impact of adopting Financial Accounting Standards Board (FASB) Interpretation No. (FIN) 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement 109 (FIN 48) and related standards and lower earnings due to asset sales.

During the first quarter of 2007, Energy Holdings made a cash distribution to PSEG of \$145 million in the form of a return of capital.

Energy Holdings faces risks related to the tax treatment of uncertain tax positions which will be impacted by new accounting guidance under FIN 48 and FASB Staff Position No. FAS 13-2, Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction (FAS 13-2), both of which were effective as of January 1, 2007. Based on its evaluation of this new guidance, Energy Holdings recorded a reduction to opening 2007 Retained Earnings of approximately \$176 million. In addition, this new guidance will have an impact on Energy Holdings' future earnings, including an anticipated earnings after-tax reduction of \$32 million in 2007, which represents the majority of the anticipated impact on PSEG. In addition, Energy Holdings faces risks related to the resolution of tax audit claims associated with Resources' leveraged lease transactions. See Note 2. Recent Accounting Standards and Note 5. Commitments and Contingent Liabilities of the Notes for further discussion.

**RESULTS OF OPERATIONS**

The results for PSEG, PSE&G, Power and Energy Holdings for the quarters ended March 31, 2007 and 2006 are presented below:

	<b>Earnings (Losses)</b>	
	<b>Quarters Ended March 31,</b>	
	<b>2007</b>	<b>2006</b>
PSE&G	\$ 132	\$ 78
Power	219	121
Energy Holdings:		
Global	(13 )	9
Resources	17	20
Other (A)	(1 )	(1 )
Total Energy Holdings	3	28
Other (B)	(19 )	(19 )
<b>PSEG Income from Continuing Operations</b>	<b>335</b>	<b>208</b>
Loss from Discontinued Operations (C)	(6 )	(5 )
<b>PSEG Net Income</b>	<b>\$ 329</b>	<b>\$ 203</b>

(A) Other activities include non-segment amounts of Energy Holdings and its subsidiaries and intercompany eliminations. Specific amounts include interest on certain financing transactions

and certain other administrative and general expenses at Energy Holdings.

- (B) Other activities include non-segment amounts of PSEG (as parent company) and intercompany eliminations. Specific amounts include preferred securities dividends for PSE&G in 2007 and 2006, merger expenses in 2006, interest on certain financing transactions and certain other administrative and general expenses at PSEG (as parent company) in 2007 and 2006.
- (C) Includes Discontinued Operations of Lawrenceburg in 2007 and 2006 and Skawina and Elcho in 2006.

See Note 3.  
Discontinued  
Operations,  
Dispositions  
and  
Impairments  
of the Notes.

As shown in the table above, PSEG had Income from Continuing Operations of \$335 million, or \$1.32 per share for the quarter ended March 31, 2007, as compared to \$208 million, or \$0.83 per share for the same quarter in 2006. PSEG's Net Income for the quarter ended March 31, 2007 was \$329 million, or \$1.30 per share, as compared to Net Income of \$203 million, or \$0.81 per share for the first quarter of 2006. The quarter over quarter changes in PSEG's Income from Continuing Operations and Net Income primarily relate to changes in Net Income for PSE&G, Power and Energy Holdings, discussed below.

**PSEG**

	<b>For the Quarters Ended March 31,</b>		<b>Increase (Decrease)</b>	<b>%</b>
	<b>2007</b>	<b>2006</b>		
	<b>(Millions)</b>			
Operating Revenues	\$ 3,614	\$ 3,461	\$ 153	4
Energy Costs	\$ 2,041	\$ 2,146	\$ (105 )	(5 )
Operation and Maintenance	\$ 610	\$ 578	\$ 32	6
Depreciation and Amortization	\$ 196	\$ 201	\$ (5 )	(2 )
Income from Equity Method Investments	\$ 26	\$ 33	\$ (7 )	(21 )
Other Income and Deductions	\$ 35	\$ 23	\$ 12	52
Interest Expense	\$ (187 )	\$ (193 )	\$ (6 )	(3 )
Income Tax Expense	\$ (262 )	\$ (149 )	\$ 113	76
Loss from Discontinued Operations, net of tax	\$ (6 )	\$ (5 )	\$ 1	20

PSEG's results of operations are primarily comprised of the results of operations of its operating subsidiaries, PSE&G, Power and Energy Holdings, excluding changes related to intercompany transactions, which are eliminated in consolidation, and certain financing costs at the parent company. For additional information on intercompany transactions, see Note 13. Related-Party Transactions of the Notes. For a discussion of the causes for the variances at PSEG in the table above, see the discussions for PSE&G, Power and Energy Holdings that follow.

**PSE&G**

For the quarter ended March 31, 2007, PSE&G had Net Income of \$132 million, an increase of \$54 million as compared to the quarter ended March 31, 2006. This increase was primarily due to increased volumes due to weather and price increases resulting from the electric and gas base rate cases settled in November 2006. For the quarter as compared to the same period in 2006, gas delivery volumes increased 9% and electric delivery volumes increased 2%. The weather was the primary cause of the increase as degree days increased 14%.

The quarter-over-quarter detail for the variances is discussed below:

	<b>For the Quarters Ended March 31,</b>		<b>Increase (Decrease)</b>	<b>%</b>
	<b>2007</b>	<b>2006</b>		
	<b>(Millions)</b>			
Operating Revenues	\$ 2,486	\$ 2,293	\$ 193	8
Energy Costs	\$ 1,665	\$ 1,574	\$ 91	6
Operation and Maintenance	\$ 325	\$ 301	\$ 24	8
Depreciation and Amortization	\$ 145	\$ 152	\$ (7 )	(5 )
Other Income and Other Deductions	\$ 4	\$ 3	\$ 1	33
Interest Expense	\$ (81 )	\$ (85 )	\$ (4 )	(5 )
Income Tax Expense	\$ (99 )	\$ (65 )	\$ 34	52

**Operating Revenues**

PSE&G has three sources of revenue: commodity revenues from the sales of energy to customers and in the PJM spot market; delivery revenues from the transmission and distribution of energy through its system; and other operating revenues from the provision of various services.

PSE&G makes no margin on gas commodity sales as the costs are passed through to customers. The difference between the gas costs paid under the requirements contract for residential customers and the revenues received from residential customers is deferred and collected from or returned to customers in future periods. Gas commodity prices fluctuate monthly for commercial and industrial customers and annually through the BGSS tariff for residential customers. In addition, for residential gas customers, PSE&G has the ability to adjust rates upward two additional times and downward at any time, if warranted, between annual BGSS proceedings.

PSE&G makes no margin on electric commodity sales as the costs are passed through to customers. PSE&G secures its electric commodity through the annual BGS auction. Electric commodity supply prices are set based on the results of these auctions for residential and smaller industrial and commercial customers,

and are translated into seasonally-adjusted fixed rates. Electric supply for larger industrial and commercial customers is provided at a rate principally based on the hourly PJM real-time energy price. Customers may obtain their electric supply through either the BGS default electric supply service or through competitive third-party electric suppliers, and the majority of the customers subject to hourly pricing are currently receiving electric supply from third-party suppliers. Any differences between amounts paid by PSE&G to BGS suppliers for electric commodity, and the amounts of electric commodity revenue collected from customers is deferred and collected or returned to customers in subsequent months.

The \$193 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was due to increases of \$99 million in delivery revenues and \$91 million in commodity revenues, described below and \$3 million in other operating revenues, primarily related to appliance service contracts.

### ***Commodity***

The \$91 million increase in commodity revenues for the quarter ended March 31, 2007, as compared to 2006, was due to an increase in electric commodity revenues of \$120 million offset by a decrease of \$29 million in gas commodity revenues. The increase in electric revenues was primarily due to \$129 million in higher BGS and NGC revenues (higher auction prices of \$117 million and increased sales of \$12 million) offset by \$9 million in lower Non-Utility Generation (NUG) revenues, primarily due to lower volumes. The \$29 million decrease in gas revenues was primarily due to \$114 million in lower BGSS prices offset by \$85 million in higher volumes due to weather.

### ***Delivery***

The \$99 million increase in delivery revenues for the quarter ended March 31, 2007, as compared to 2006, was due to a \$69 million increase in gas and a \$30 million increase in electric revenues. The gas increase was due to \$27 million in higher volumes primarily due to weather, \$19 million due to rate relief effective November 9, 2006 and \$18 million due to the Societal Benefits Clause (SBC) rate increases November 1, 2006 and March 9, 2007. The electric increase was due primarily to \$11 million from a rate increase effective November 9, 2006 and \$3 million for increased SBC rates, \$16 million in higher volumes and demands primarily due to weather. PSE&G retains no margins from SBC collections as the revenues are offset in operating expenses below.

## **Operating Expenses**

### ***Energy Costs***

The \$91 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was comprised of increases of \$121 million in electric costs offset by a decrease of \$30 million in gas costs. The increase in electric costs was primarily caused by a \$123 million or 30% increase in prices. The gas decrease is due to \$113 million or 3% lower prices offset by \$82 million in higher volumes due to weather.

### ***Operation and Maintenance***

The \$24 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was due primarily to increased SBC expenses, resulting from rate increases in November 2006 and March 2007.

### ***Depreciation and Amortization***

The \$7 million decrease for the quarter ended March 31, 2007, as compared to the same period in 2006, was due primarily to decreases of \$9 million due to revised plant depreciation rates and \$3 million due to lower cost of removal rates resulting from the November 2006 rate case. This was offset by increases of \$3 million due to amortization of regulatory assets and \$2 million due to additional plant in service.

**Interest Expense**

The \$4 million decrease for the quarter ended March 31, 2007, as compared to the same period in 2006, due primarily to lower amounts of long-term and securitization debt outstanding.

**Income Taxes**

The \$34 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to increased taxes of \$35 million on higher pre-tax income offset by \$1 million in various tax adjustments.

**Power**

For the quarter ended March 31, 2007, Power had Net Income of \$213 million, an increase of \$101 million as compared to the same period in the prior year. The primary reasons for the increase were higher prices realized as a result of recontracting combined with higher sales volumes and lower generation costs. Improved margins and higher sales volumes under the BGSS contract due to a colder winter heating season and fuel pricing in 2007 also contributed to the increase.

The quarter-over-quarter detail for the variances is discussed below:

	<b>For the Quarters Ended March 31,</b>		<b>Increase (Decrease)</b>	<b>%</b>
	<b>2007</b>	<b>2006</b>		
	<b>(Millions)</b>			
Operating Revenues	\$ 2,149	\$ 1,967	\$ 182	9
Energy Costs	\$ 1,488	\$ 1,487	\$ 1	
Operation and Maintenance	\$ 238	\$ 232	\$ 6	3
Depreciation and Amortization	\$ 34	\$ 31	\$ 3	10
Other Income and Deductions	\$ 22	\$ 22	\$	
Interest Expense	\$ (37 )	\$ (32 )	\$ 5	16
Income Tax Expense	\$ (155 )	\$ (86 )	\$ 69	80
Loss from Discontinued Operations, net of tax	\$ (6 )	\$ (9 )	\$ (3 )	(33 )

**Operating Revenues**

The \$182 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was due to increases of \$94 million in generation revenues and \$102 million in gas supply revenues partially offset by a decrease of \$14 million in trading revenues.

**Generation**

Generation revenues increased \$94 million for the quarter ended March 31, 2007, as compared to the same period in 2006, primarily due to higher revenues of approximately \$71 million from higher prices on BGS fixed-price contracts, partially offset by reduced load being served under the BGS contracts and \$24 million from increased sales volumes at the Bethlehem Energy Center.

**Gas Supply**

Gas supply revenues increased \$102 million for the quarter ended March 31, 2007, as compared to the same period in 2006, principally due to higher sales volumes under the BGSS contract largely due to colder average temperatures in the 2007 winter heating season.

***Trading Revenues***

Trading revenues decreased \$14 million for the quarter ended March 31, 2007, as compared to the same period in 2006, due primarily to the absence in 2007 of \$15 million of realized gains in 2006 from sales of excess emissions credits.

**Operating Expenses**

***Energy Costs***

Energy Costs represent the cost of generation, which includes fuel purchases for generation as well as purchased energy in the market, and gas purchases to meet Power's obligation under its BGSS contract with PSE&G.

Energy Costs increased approximately \$1 million for the quarter ended March 31, 2007, as compared to the same period in 2006, primarily due to an increase in gas costs of \$37 million, reflecting a higher volume of gas purchased at lower prices to satisfy Power's BGSS obligations partially offset by a decrease in sales prices charged to other gas distributors for gas and pipeline capacity. Generation costs decreased \$36 million, reflecting lower pool prices and lower load obligations somewhat offset by higher prices and volumes of fossil fuel.

### ***Operation and Maintenance***

Operation and Maintenance expense increased \$6 million for the quarter ended March 31, 2007, as compared to the same period in 2006, primarily due to maintenance costs related to projects at certain fossil stations, mainly Hudson and Mercer.

### ***Depreciation and Amortization***

The \$3 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to the Linden facility being placed into service in May 2006.

### **Other Income and Deductions**

Other Income and Deductions remained flat for the quarter ended March 31, 2007, as compared to the same period in 2006, as an increase in other income primarily attributable to a \$9 million increase in realized gains, interest and dividend income related to the Nuclear Decommissioning Trust (NDT) Funds was offset principally by a \$10 million other-than-temporary impairment of certain NDT Funds securities.

### **Interest Expense**

Interest Expense increased \$5 million for the quarter ended March 31, 2007, as compared to the same period in 2006, due primarily to lower capitalized interest costs of \$15 million in 2007 related to commencement of operations of the Linden facility in May 2006 partially offset by a reduction in interest expense of \$9 million due to the maturity on April 15, 2006 of \$500 million of 6.875% Senior Notes.

### **Income Taxes**

Income Taxes increased \$69 million for the quarter ended March 31, 2007, as compared to the same period in 2006, primarily due to higher pre-tax income.

### **Loss from Discontinued Operations, net of tax**

On December 29, 2006, Power entered into an agreement to sell its Lawrenceburg generation facility for approximately \$325 million and recognized an estimated loss on disposal of \$208 million, net of tax, in December 2006, for the initial write-down of its carrying amount of Lawrenceburg to its fair value less cost to sell. The transaction is anticipated to close in the second quarter of 2007. Losses from Discontinued Operations were \$6 million and \$9 million the quarters ended March 31, 2007 and 2006, respectively.

### **Energy Holdings**

For the quarter ended March 31, 2007, Energy Holdings had Net Income of \$3 million, a decrease of \$29 million as compared to the same period in 2006. The decrease was primarily due to lower income from the Texas generation facilities due to the recognition of MTM losses of \$29 million in 2007 as compared to \$6 million in 2006 and a scheduled maintenance outage at the Guadalupe plant, the adoption of certain accounting pronouncements in 2007 and the absence of equity earnings from Rio Grande Energia (RGE), which was sold in June 2006. Also contributing to the

variance was a loss at Prisma 2000 S.p.A. in 2007 because it was prohibited from conducting operations at the San Marco Facility as a result of legal proceedings regarding alleged violations of the facility's air permit. In March 2007, the shareholders of Prisma 2000 S.p.A. agreed to change the company name to Bioenergie S.p.A. (Bioenergie). Global anticipates that the facility will resume commercial operations in the summer of 2007. These reductions were partially offset by improved operations at Sociedad Austral de Electricidad S.A. (SAESA), a gain on the sale of the Tracy project and an arbitration award received relating to the Konya-Ilgın dispute. See Note 5.

Commitments and Contingent Liabilities of the Notes for additional information regarding Bioenergie. See Part II. Other Information, Item 1. Legal Proceedings for additional information regarding the Konya-Ilgin dispute.

The quarter-over-quarter detail for the variances is discussed below including the consolidation of Bioenergie in May 2006 and the related effects of the shutdown:

	<b>For the Quarters Ended March 31,</b>		<b>Increase (Decrease)</b>	<b>%</b>
	<b>2007</b>	<b>2006</b>		
	<b>(Millions)</b>			
Operating Revenues	\$ 254	\$ 312	\$ (58 )	(19 )
Energy Costs	\$ 161	\$ 194	\$ (33 )	(17 )
Operation and Maintenance	\$ 53	\$ 49	\$ 4	8
Depreciation and Amortization	\$ 14	\$ 12	\$ 2	17
Income from Equity Method Investments	\$ 26	\$ 33	\$ (7 )	(21 )
Other Income and Deductions	\$ 14	\$	\$ 14	N/A
Interest Expense	\$ (43 )	\$ (50 )	\$ (7 )	(14 )
Income Tax Expense	\$ (20 )	\$ (12 )	\$ 8	67
Income from Discontinued Operations, net of tax	\$	\$ 4	\$ (4 )	(100 )

The classification of the results of Global's investments on Energy Holdings' Condensed Consolidated Financial Statements is dependent upon Global's ownership percentage in the underlying investment which determines whether the investment is consolidated into Energy Holdings' Condensed Consolidated Financial Statements or if it is accounted for under the equity method of accounting. Global's investments in Texas generation facilities, SAESA and Electroandes and Bioenergie are consolidated. As a result, the revenues, expenses, assets and liabilities of those investments are reflected on Energy Holdings' Condensed Consolidated Financial Statements. Global's investments in Chilquinta Energia S.A. (Chilquinta), Luz del Sur S.A.A. (LDS), GWF Power Systems, L.P., GWF Energy LLC, Kalaeloa Partners, L.P. (Kalaeloa) and several other smaller investments are accounted for under the equity method or cost method of accounting, as appropriate. Therefore, Energy Holdings only records its share of the net income from these projects as Income from Equity Method Investments on its Condensed Consolidated Statements of Operations.

### **Operating Revenues**

The \$58 million decrease for the quarter ended March 31, 2007, as compared to the same period in 2006, was due to lower revenues at Global of \$55 million, which was primarily the net result of decreased revenues consisting of a \$76 million decrease at the Texas generation facilities mainly due to a reduction in average price per MWh and unrealized MTM losses on contracts in 2007 as opposed to unrealized MTM gains in 2006; and a \$3 million decrease at Electroandes due to scheduled maintenance closing of one of its four hydro-electric generating plants. These decreases were partially offset by a \$21 million increase at SAESA due to increased tariff rates and energy sales volume and a \$7 million increase due to a gain on sale of Global's 34.5% interest in Tracy Biomass in January 2007.

In addition, there were lower leveraged lease revenues at Resources of \$3 million primarily due to the adoption of FIN 48 and FAS 13-2 and decreased Demand Side Management revenue due to contract expirations, partially offset by a gain on settlement of its investment in a collateralized bond fund.

### **Operating Expenses**

#### ***Energy Costs***

The \$33 million decrease for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to a \$49 million decrease at the Texas generation facilities primarily due to MTM unrealized gains on gas contracts in 2007 as opposed to unrealized MTM losses in 2006, offset by a \$16 million increase at SAESA due to higher energy purchase price and volume.

***Operation and Maintenance***

The \$4 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to a \$7 million increase at the Texas generation facilities due to a scheduled maintenance

outage at the Guadalupe plant and a \$2 million increase due to the consolidation of Bioenergie in May 2006, partially offset by a \$4 million decrease due to lower corporate assessments.

### ***Depreciation and Amortization***

The \$2 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to the consolidation of Bioenergie in May 2006.

### **Income from Equity Method Investments**

The \$7 million decrease for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to the sale of RGE in June 2006.

### **Other Income and Deductions**

The \$14 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to a \$9 million pre-tax gain in 2007 from the award against the Turkish Government related to an arbitration proceeding regarding the construction of a power plant in the Konya-Ilgın region of Turkey and a \$2 million dividend received from Global's investment in PPN Power Generating Company Limited in India.

### **Interest Expense**

The \$7 million decrease for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to a decrease in debt outstanding.

### **Income Taxes**

The \$8 million increase for the quarter ended March 31, 2007, as compared to the same period in 2006, was primarily due to assets sales and the Konya-Ilgın settlement, a higher effective tax rate due to timing and the adoption of FIN 48.

### **Income from Discontinued Operations, net of tax**

In May 2006, Energy Holdings completed the sale of its interest in two coal-fired plants in Poland, Elcho and Skawina. Income from Discontinued Operations related to Elcho and Skawina for the quarter ended March 31, 2006 was \$4 million net of tax. See Note 3. Discontinued Operations, Dispositions and Impairments of the Notes for additional information.

## **LIQUIDITY AND CAPITAL RESOURCES**

The following discussion of liquidity and capital resources is on a consolidated basis for PSEG, noting the uses and contributions of PSEG's three direct operating subsidiaries, PSE&G, Power and Energy Holdings.

### **Operating Cash Flows**

#### **PSEG**

For the quarter ended March 31, 2007, PSEG's operating cash flow increased by approximately \$46 million from \$910 million to \$956 million, as compared to the same period in 2006, due to changes from its subsidiaries as discussed below. Excess cash is currently being used to reduce debt and beginning in mid-2008, it is expected that excess cash will be available for new investments and/or repurchasing shares.

**PSE&G**

PSE&G's operating cash flow decreased approximately \$206 million from \$267 million to \$61 million for the quarter ended March 31, 2007, as compared to the same period in 2006, primarily due to the change in customer receivables. Billed revenues grew \$193 million while collections declined \$158 million, largely due

to warmer than normal weather conditions in late 2006 and January 2007. Offsetting the increase in customer receivables was a \$200 million increase in accounts payable and current liabilities.

### **Power**

Power's operating cash flow increased approximately \$142 million from \$682 million to \$824 million for the quarter ended March 31, 2007, as compared to the same period in 2006, primarily due to higher net income of \$101 million, and working capital changes driven by an increase of \$349 million in accounts payable due mainly to energy and fuel purchases and a decrease of \$77 million in inventories due to higher gas sendouts partially offset by an increase in customer receivables of \$365 million largely attributable to increased revenues.

### **Energy Holdings**

Energy Holdings' operating cash flow increased approximately \$90 million from \$1 million to \$91 million for the quarter ended March 31, 2007, as compared to the same period in 2006. The increase was mainly attributable to higher distributions from equity method investments in Global's GWF and Hanford projects and Resources' limited partnerships.

### **Common Stock Dividends**

#### **PSEG**

Dividend payments on common stock for the quarters ended March 31, 2007 and 2006 were \$0.585 and \$0.57 per share, respectively, and totaled approximately \$148 million and \$143 million, respectively. Future dividends declared will be dependent upon PSEG's future earnings, cash flows, financial requirements, alternative investment opportunities and other factors. Improved earnings would cause PSEG's dividend payout ratio to decline, providing PSEG the flexibility to raise its dividend at a rate higher than its prior dividend increases. On April 17, 2007, PSEG's Board of Directors approved a common stock dividend of \$0.585 per share for the second quarter of 2007, reflecting an indicated annual dividend rate of \$2.34 per share.

### **Short-Term Liquidity**

#### **PSEG, PSE&G, Power and Energy Holdings**

As of March 31, 2007, PSEG and its subsidiaries had a total of approximately \$3.7 billion of committed credit facilities with approximately \$3.3 billion of available liquidity under these facilities. In addition, PSEG and PSE&G have access to certain uncommitted credit facilities. Each of the facilities is restricted to availability and use to the specific companies as listed below. As of March 31, 2007, PSEG had no loans outstanding under its uncommitted facility and PSE&G had \$48 million of loans outstanding under its uncommitted facility.

<b>Company</b>	<b>Expiration Date</b>	<b>Total Facility</b>	<b>Primary Purpose</b> (Millions)	<b>Usage as of March 31, 2007</b>	<b>Available Liquidity as of March 31, 2007</b>
<b><u>PSEG:</u></b>					
5-year Credit Facility	Dec 2011	\$ 1,000	CP Support/Funding/ Letters of Credit	\$ 1 (C)	\$ 999
Uncommitted Bilateral Agreement	N/A	N/A	Funding	\$	\$ N/A
<b><u>PSE&amp;G:</u></b>					
5-year Credit Facility	June 2011	\$ 600	CP Support/Funding/ Letters of Credit	\$ 222	\$ 378
Uncommitted Bilateral Agreement	N/A	N/A	Funding	\$ 48	\$ N/A
<b><u>PSEG and Power:</u></b>					
Bilateral Credit Facility(A)	June 2007	\$ 200	Funding/Letters of Credit	\$ 10 (C)	\$ 190
<b><u>Power:</u></b>					
5-year Credit Facility	Dec 2011	\$ 1,600	Funding/Letters of Credit	\$ 20 (C)	\$ 1,580
Bilateral Credit Facility	March 2010	\$ 100	Funding/Letters of Credit	\$ 26 (C)	\$ 74
<b><u>Energy Holdings:</u></b>					
5-year Credit Facility(B)	June 2010	\$ 150	Funding/Letters of Credit	\$ 27 (D)	\$ 123

(A) PSEG/Power joint and several co-borrower facility.

(B) Energy Holdings/Global/Resources joint and several co-borrower facility.

(C) These amounts relate to letters of credit outstanding.

(D) Includes \$19 million relating to letters of credit outstanding.

**PSEG and PSE&G**

PSEG and PSE&G believe sufficient liquidity exists to fund their short-term cash needs.

### **Power**

As of March 31, 2007, Power had loaned \$525 million to PSEG in the form of an intercompany loan.

During the quarter ending March 31, 2007, Power's required margin postings for sales contracts entered into in the normal course of business increased slightly. The required margin postings will fluctuate based on volatility in commodity prices. Should commodity prices rise, additional margin calls may be necessary relative to existing power sales contracts. As Power's contract obligations are fulfilled, liquidity requirements are reduced.

In addition, ER&T maintains agreements that require Power, as its guarantor under performance guarantees, to satisfy certain creditworthiness standards. In the event of a deterioration of Power's credit rating to below investment grade, which represents at least a two level downgrade from its current ratings, many of these agreements allow the counterparty to demand that ER&T provide performance assurance, generally in the form of a letter of credit or cash. Providing this support would increase Power's costs of doing business and could restrict the ability of ER&T to manage and optimize Power's asset portfolio. Power believes it has sufficient liquidity to meet any required posting of collateral resulting from a credit rating downgrade. See Note 5. Commitments and Contingent Liabilities of the Notes for further information.

## **Energy Holdings**

Energy Holdings and its subsidiaries had \$65 million in cash, including \$6 million invested offshore as of March 31, 2007. In addition, as of March 31, 2007, Energy Holdings had an outstanding demand loan receivable from PSEG of \$25 million. Energy Holdings believes that sufficient liquidity exists to fund short-term cash needs. See External Financings Energy Holdings below for Energy Holdings' additional use of its excess cash.

## **External Financings**

### **PSEG**

On April 13, 2007, PSEG called for redemption on May 15, 2007 the outstanding \$375 million of its Floating Rate Notes Due 2008 at 100% of the principal amount.

For the quarter ended March 31, 2007, PSEG issued 393,355 shares of its common stock in connection with settling stock options for approximately \$16 million.

For the quarter ended March 31, 2007, PSEG issued 204,068 shares of its common stock under its Dividend Reinvestment Program and its Employee Stock Purchase Program for approximately \$17 million.

### **PSE&G**

On January 2, 2007, PSE&G repaid at maturity \$113 million of its 6.25% Series WW First and Refunding Mortgage Bonds.

For the quarter ended March 31, 2007, PSE&G Transition Funding LLC (Transition Funding) repaid approximately \$38 million of its transition bonds.

## **Power**

In March 2007, Power paid a cash dividend to PSEG of \$125 million.

## **Energy Holdings**

In March 2007, Energy Holdings made a cash distribution to PSEG of \$145 million in the form of a return of capital.

During the first quarter of 2007, Energy Holdings' subsidiaries repaid approximately \$16 million of non-recourse debt, including \$14 million by Global, primarily related to the Texas generation facilities, \$1 million by Resources and \$1 million by EGDC.

## **Debt Covenants**

### **PSEG, PSE&G, Power and Energy Holdings**

PSEG's, PSE&G's, Power's and Energy Holdings' respective credit agreements may contain maximum debt to equity ratios, minimum cash flow tests and other restrictive covenants and conditions to borrowing. Compliance with applicable financial covenants will depend upon the respective future financial position, level of earnings and cash flows of PSEG, PSE&G, Power and Energy Holdings, as to which no assurances can be given. The ratios presented below are for the benefit of the investors of the related securities to which the covenants apply. They are not intended as financial performance or liquidity measures. The debt underlying the preferred securities of PSEG, which is presented in Long-Term Debt in accordance with FIN 46 Consolidation of Variable Interest Entities, is not included as

debt when calculating these ratios, as provided for in the various credit agreements.

Energy Holdings' credit agreement also contains customary provisions under which the lender could refuse to advance loans in the event of a material adverse change in the borrower's business or financial condition.

## **PSEG**

Financial covenants contained in PSEG's credit facilities include a ratio of debt (excluding non-recourse project financings, securitization debt and debt underlying preferred securities and including commercial paper and loans, certain letters of credit not related to collateral postings for commodity/energy contracts and similar instruments) to total capitalization (including preferred securities outstanding and excluding any impacts for Accumulated Other Comprehensive Income adjustments related to marking energy contracts to market and equity reductions from the funded status of pensions or benefit plans associated with SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans ) covenant. This covenant requires that such ratio not be more than 70.0%. As of March 31, 2007, PSEG's ratio of debt to capitalization (as defined above) was 50.7%.

## **PSE&G**

Financial covenants contained in PSE&G's credit facilities include a ratio of long-term debt (excluding securitization debt, long-term debt maturing within one year and short-term debt) to total capitalization covenant. This covenant requires that such ratio will not be more than 65.0%. As of March 31, 2007, PSE&G's ratio of long-term debt to total capitalization (as defined above) was 47.5%.

In addition, under its First and Refunding Mortgage (Mortgage), PSE&G may issue new First and Refunding Mortgage Bonds against previous additions and improvements, provided that its ratio of earnings to fixed charges calculated in accordance with its Mortgage is at least 2 to 1, and/or against retired Mortgage Bonds. As of March 31, 2007, PSE&G's Mortgage coverage ratio was 4.8 to 1 and the Mortgage would permit up to approximately \$2.1 billion aggregate principal amount of new Mortgage Bonds to be issued against previous additions and improvements.

## **Power**

Financial covenants contained in Power's credit facility include a ratio of debt to total capitalization covenant. The Power ratio is the same debt to total capitalization calculation as set forth above for PSEG except common equity is adjusted for the \$986 million Basis Adjustment (see Condensed Consolidated Balance Sheets). This covenant requires that such ratio will not exceed 65.0%. As of March 31, 2007, Power's ratio of debt to total capitalization (as defined above) was 37.5%.

## **Energy Holdings**

Energy Holdings' bank revolving credit agreement has a covenant requiring the ratio of Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) to fixed charges to be greater than or equal to 1.75. As of March 31, 2007, Energy Holdings' coverage of this covenant was 3.63. Additionally, the bank revolving credit agreement has a covenant requiring that Energy Holdings maintain a ratio of net debt (recourse debt offset by funds loaned to PSEG) to EBITDA of less than 5.25. As of March 31, 2007, Energy Holdings' ratio under this covenant was 2.63. Energy Holdings is a co-borrower under this facility with Global and Resources, which are joint and several obligors. The terms of the agreement include a pledge of Energy Holdings' membership interest in Global, restrictions on the use of proceeds related to material sales of assets and the satisfaction of certain financial covenants. Net cash proceeds from asset sales in excess of 5% of total assets of Energy Holdings during any 12-month period must be used to repay any outstanding amounts under the credit agreement. Net cash proceeds from asset sales during any 12-month period in excess of 10% of total assets must be retained by Energy Holdings or used to repay the debt of Energy Holdings, Global or Resources.

Energy Holdings' indenture with respect to its senior notes does not permit liens securing indebtedness in excess of 10% of consolidated net tangible assets as calculated under the terms of the indenture. The terms of Energy Holdings' Senior Notes allow the holders to demand repayment if a transaction or series of related transactions causes the assets of Resources to be reduced by 20% or more and as a direct result there is a downgrade of ratings.

**Credit Ratings****PSEG, PSE&G, Power and Energy Holdings**

The credit ratings of PSEG and its subsidiaries are shown in the table below.

If the rating agencies lower or withdraw the credit ratings, such revisions may adversely affect the market price of PSEG's, PSE&G's, Power's and Energy Holdings' securities and serve to materially increase those companies' cost of capital and limit their access to capital. Outlooks assigned to ratings are as follows: stable, negative (Neg) or positive (Pos). There is no assurance that the ratings will continue for any given period of time or that they will not be revised by the rating agencies, if, in their respective judgments, circumstances so warrant. Each rating given by an agency should be evaluated independently of the other agencies' ratings. The ratings should not be construed as an indication to buy, hold or sell any security.

### **Other Comprehensive Income**

#### **PSEG, Power and Energy Holdings**

For the quarter ended March 31, 2007, PSEG, Power and Energy Holdings had Other Comprehensive Losses of \$164 million, \$155 million and \$9 million, respectively, due primarily to an increase in the net unrealized losses on derivatives accounted for as hedges in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS 133) at Power and foreign currency translation adjustments at Energy Holdings.

During the quarter ended March 31, 2007, Power's Accumulated Other Comprehensive Loss increased from \$177 million to \$332 million. The primary cause related to energy and related contracts that qualify for hedge accounting that were entered into by Power in the normal course of business. During the quarter ended March 31, 2007, higher market prices for electricity resulted in additional unrealized losses on many of those contracts.

As of March 31, 2007, Energy Holdings had Accumulated Other Comprehensive Income of \$94 million. The primary reason for the decrease, as compared to the Accumulated Other Comprehensive Income of \$103 million as of December 31, 2006, was currency fluctuations at SAESA and Chilquinta Energia S.A.

## **CAPITAL REQUIREMENTS**

### **PSEG, PSE&G, Power and Energy Holdings**

It is expected that the majority of funding for capital requirements of PSE&G, Power and Energy Holdings will come from their respective internally generated funds. The balance will be provided by the issuance of debt at the respective subsidiary or project level and, for PSE&G and Power, equity contributions from PSEG. PSEG does not expect to contribute any additional equity to Energy Holdings. Projected construction and investment expenditures for PSEG, PSE&G, Power and Energy Holdings are materially consistent with amounts disclosed in the Annual Reports on Form 10-K of PSEG, PSE&G, Power and Energy Holdings for the year ended December 31, 2006.

### **PSE&G**

During the quarter ended March 31, 2007, PSE&G made approximately \$130 million of capital expenditures, primarily for reliability of transmission and distribution systems. The \$130 million does not include expenditures for cost of removal, net of salvage, of approximately \$8 million, which are included in operating cash flows.

### **Power**

During the quarter ended March 31, 2007, Power made approximately \$123 million of capital expenditures (excluding \$3 million for nuclear fuel), primarily related to various projects at Fossil and Nuclear.

### **Energy Holdings**

During the quarter ended March 31, 2007, Energy Holdings made approximately \$16 million of capital expenditures, primarily related to upgrades and expansions of SAESA's transmission and distribution systems and expenditures at Electroandes.

## **ACCOUNTING MATTERS**

### **PSEG, PSE&G, Power and Energy Holdings**

For information related to recent accounting matters, see Note 2. Recent Accounting Standards of the Notes.

## ITEM 4. CONTROLS AND PROCEDURES

### Disclosure Controls and Procedures

#### PSEG, PSE&G, Power and Energy Holdings

PSEG, PSE&G, Power and Energy Holdings have established and maintain disclosure controls and procedures which are designed to provide reasonable assurance that information required to be disclosed is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that material information relating to each company, including their respective consolidated subsidiaries, is accumulated and communicated to the respective company's management, including the Chief Executive Officer and Chief Financial Officer of each company by others within those entities to allow timely decisions regarding required disclosure. PSEG, PSE&G, Power and Energy Holdings have established a disclosure committee (the committee) which is made up of several key management employees and which reports directly to the Chief Financial Officer and Chief Executive Officer of each respective company. The committee monitors and evaluates the effectiveness of these disclosure controls and procedures.

#### PSEG, PSE&G and Power

The Chief Financial Officer and Chief Executive Officer for PSEG, PSE&G and Power have evaluated the effectiveness of the disclosure controls and procedures as of the end of the period covered by the quarterly report and, based on this evaluation, have concluded that disclosure controls and procedures were effective in providing reasonable assurance during the period covered in this quarterly report on Form 10-Q/A.

#### Energy Holdings

In connection with this quarterly report on Form 10-Q/A, the Chief Financial Officer and Chief Executive Officer of Energy Holdings reevaluated the effectiveness of the disclosure controls and procedures as of the end of the period covered by the quarterly report and, based on that reevaluation have concluded that disclosure controls and procedures were not effective as of March 31, 2007 because of a material weakness in internal control over financial reporting that caused the incorrect classification of \$207 million of long-term debt on the Condensed Consolidated Balance Sheet. Specifically, controls pertaining to the reconciliation and review processes within the accounting and treasury functions were not operating effectively to ensure that the Senior Notes due in February 2008 were classified within Long-Term Debt due Within One Year on the Condensed Consolidated Balance Sheet. This material weakness resulted in the restatement of Energy Holdings' Condensed Consolidated Financial Statements for the interim period ended March 31, 2007, included in this quarterly report on Form 10-Q/A.

#### Changes in Internal Controls

#### PSEG, PSE&G, Power and Energy Holdings

PSEG, PSE&G, Power and Energy Holdings continually review their respective disclosure controls and procedures and make changes, as necessary, to ensure the quality of their financial reporting. There have been no changes in internal control over financial reporting that occurred during the first quarter of 2007 that have materially affected, or are reasonably likely to materially affect, each registrant's internal control over financial reporting. As indicated below, significant changes to internal control over financial reporting at Energy Holdings were made effective as of the filing date of this document.

#### Energy Holdings

As of the date of filing this quarterly report on Form 10-Q/A, Energy Holdings has remediated the material weakness that resulted in the restatement of the Energy Holdings Condensed Consolidated Balance Sheet. Specifically, Energy Holdings enhanced the controls around reconciliation processes within the accounting and treasury functions relative to the classification of Long Term Debt on the Condensed Consolidated Balance Sheet. These controls will be evaluated as part of the overall assessment of internal controls over financial reporting to be included in Energy Holdings 2007 Annual Report.

**PART II. OTHER INFORMATION**

**ITEM 6. EXHIBITS**

**A listing of exhibits being filed with this document is as follows:**

- a. PSEG:
  - Exhibit 3.1(a): Certificate of Incorporation of Public Service Enterprise Group Incorporated(1)
