Table of Contents**Notes to the Condensed Consolidated Financial Information**

Expressed in millions of United States dollars, unless otherwise stated (unaudited)

1 The Company and its operations

Companhia Vale do Rio Doce (CVRD) is a limited liability company, duly organized and existing under the laws of the Federative Republic of Brazil. Our operations are carried out through CVRD and its subsidiary companies, joint ventures and affiliates, and mainly consist of mining, non-ferrous metal production and logistics, as well as energy, aluminum and steel activities. Further details of our operations and those of our joint ventures and affiliates are described in Note 8.

The main operating subsidiaries we consolidate are as follows:

Subsidiary	% ownership	Head office location	Principal activity
Alumina do Norte do Brasil S.A - Alunorte	57	Brazil	Aluminum
CADAM S.A. (2) (4)	61	Brazil	Kaolin
CELMAR S.A. - Indústria de Celulose e Papel (3)	100	Brazil	Forestry
CVRD Overseas Ltd.	100	Cayman Island	Trading
Ferrovias Centro-Atlântica S.A. (4)	100	Brazil	Logistics
Ferteco Mineração S.A. - FERTECO (3)	100	Brazil	Iron ore and Pellets
Florestas Rio Doce S.A.	100	Brazil	Forestry
Itabira Rio Doce Company Ltd. - ITACO	100	Cayman Island	Trading
Mineração Serra do Sossego S.A. (1)	100	Brazil	Copper
Minerações Brasileiras Reunidas S.A. - MBR (2) (4)	85	Brazil	Iron ore
Navegação Vale do Rio Doce S.A. - DOCENAVE	100	Brazil	Shipping
Pará Pigmentos S.A.	76	Brazil	Kaolin
Rio Doce International Finance Ltd. - RDIF	100	Bahamas	International finance
Rio Doce Manganèse Europe - RDME	100	France	Ferroalloys
Rio Doce Manganese Norway - RDMN	100	Norway	Ferroalloys
Salobo Metais S.A. (1)	100	Brazil	Copper
SIBRA - Eletrosiderúrgica Brasileira S.A.	100	Brazil	Manganese and Ferroalloys
Urucum Mineração S.A.	100	Brazil	Iron ore, Ferroalloys and Manganese
Vale do Rio Doce Alumínio S.A. - ALUVALE	100	Brazil	Aluminum

- (1) Development stage companies
(2) Through Caemi Mineração e Metalurgia S.A.
(3) Merged with CVRD as from August 29, 2003
(4) Consolidated as from September 1, 2003

2 Basis of consolidation

All majority-owned subsidiaries where we have both share and management control are consolidated, with elimination of all significant intercompany accounts and transactions. Investments in unconsolidated affiliates and joint ventures are reported at cost plus our equity in undistributed earnings or losses. Included in this category are certain joint ventures in which we have majority ownership but, by force of shareholders agreements, do not have effective management control. We provide for losses on equity investments with negative stockholders equity where applicable (see Note 8).

We evaluate the carrying value of our listed investments relative to publicly available quoted market prices. If the quoted market price is below book value, and such decline is considered other than temporary, we write-down our equity investments to quoted market value.

We define joint ventures as businesses in which we and a small group of other partners each participate actively in the overall entity management, based on a shareholders agreement. We define affiliates as businesses in which we participate as a minority stockholder but with significant influence over the operating and financial policies of the investee.

Table of Contents

3 Summary of significant accounting policies

Our condensed consolidated interim financial information as of September 30, 2003 for the three-month periods ended September 30, 2003, June 30, 2003, and September 30, 2002 and for the nine month periods ended September 30, 2003 and 2002 is unaudited. However, in our opinion, such condensed consolidated financial information includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for interim periods. The results of operations for the nine-month period ended September 30, 2003 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2003.

This condensed interim financial information should be read in conjunction with our consolidated financial statements for the year ended December 31, 2002.

The provision for losses on equity investments relates to our investments in affiliates which have reported negative stockholders' equity in their financial information prepared in accordance with US GAAP and in circumstances where we have assumed commitments to fund our share of the accumulated losses, if necessary, through additional capital contributions or other means. Accordingly we (a) first reduce the value of the investment to zero and (b) subsequently provide for our portion of negative equity.

Other current assets include \$30 related to ships held for sale, at September 30, 2003.

4 Change in accounting practice

In June 2001, the FASB issued SFAS 143 - Accounting for Asset Retirement Obligations. We adopted SFAS 143 as from January 1, 2003, as a consequence an additional \$26 for asset retirement obligations was recorded as Others - long-term liabilities, a net increase of \$11 in mine development costs was registered within Property, plant and equipment and a resulting change of \$10 was registered as Change in Accounting Practice for Asset Retirement Obligations on the Statement of Income, net of income tax (\$15 gross of deferred income tax). Over time the liabilities will be accreted for the change in their present value and initial capitalized costs will be depleted over the useful lives of the related assets.

5 Recently-issued accounting pronouncements

In June 2002, the FASB has issued SFAS 146 - Accounting for Costs Associated with Exit or Disposal Activities. The standard requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. SFAS 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. We adopted SFAS 146 as from January 1, 2003. We have not committed to disposal of or disposed of any significant activities since adoption.

In November 2002 the FASB issued FIN 45 - Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The Interpretation elaborates on the existing disclosure requirements for most guarantees, including loan guarantees such as standby letters of credit. It also clarifies that at the time a company issues a guarantee, the company must recognize an initial liability for the fair value, or market value, of the obligations it assumes under that guarantee and must disclose that information in its interim and annual financial information. The initial recognition and initial measurement provisions apply on a prospective basis to guarantees issued or modified after December 31, 2002, regardless of the guarantor's fiscal year-end. The disclosure requirements in the Interpretation, applicable as from December 31, 2002 are disclosed in Note 9. We have not issued any material guarantees since December 31, 2002.

Table of Contents

In January 2003, FASB issued Interpretation No. 46 (FIN 46) Consolidation of Variable Interest Entities. FIN 46 provides guidance on when certain entities should be consolidated or the interests in those entities should be disclosed by enterprises that do not control them through majority voting interest. This interpretation applies immediately to variable interest entities created after January 31, 2003. We are evaluating the impact on our financial statements.

In May 2003, FASB issued SFAS No. 150, Accounting For Certain Financial Instruments with Characteristics of both Liabilities and Equity (SFAS 150) this Statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). The Board decided to make this statement effective shortly after issuance for contracts created or modified after it is issued and for existing contracts at the beginning of the first interim period beginning after June 15, 2003. We do not expect SFAS 150 to have a material impact on our financial statements.

6 Income taxes

Income taxes in Brazil comprise federal income tax and social contribution, which is an additional federal tax. The statutory enacted tax rates applicable in the periods presented are as follows:

	Nine months ended September 30 - %	
	2003	2002
Federal income tax	25	25
Social contribution	9	9
	—	—
Composite tax rate	34	34

Table of Contents

The amount reported as income tax expense in our consolidated financial information is reconciled to the statutory rates as follows:

	Three months ended			Nine months ended September 30,	
	September 30, 2003	June 30, 2003	September 30, 2002	2003	2002
Income before income taxes, equity results and minority interests	388	610	(185)	1,357	11
Federal income tax and social contribution expense at statutory enacted rates	(132)	(207)	63	(461)	(4)
Adjustments to derive effective tax rate:					
Tax benefit on interest attributed to stockholders	107	59	47	229	90
Exempt foreign income (expenses)	9	(26)	82	(33)	174
Tax incentives	8	40		48	2
Valuation allowance	4		(43)	13	(37)
Other non-taxable gains (losses)	4	(26)	23	(27)	33
Adjustment to reflect expected annual effective tax rate			(24)		
Federal income tax and social contribution expense in consolidated statements of income		(160)	148	(231)	258

We have certain tax incentives relative to our iron ore and manganese operations in Carajás and relative to alumina in Barcarena. The incentives relative to iron ore and manganese comprise full income tax exemption on defined production levels up to 2005 and partial exemption up to 2013. Both incentives relative to alumina expires in 2010. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed in the form of cash dividends.

(3) Includes elimination of goodwill write-off related to Caemi equity investment - \$86.
Acquisition cost of Caemi, net of cash acquired:

	September 1, 2003
Estimated fair value of assets	1,699
Estimated fair value of liabilities	(716)
Net assets at fair value	983
Interest in total capital acquired	43.37%
Estimated fair value of net assets acquired	426
Purchase price	426
Less cash acquired	(46)
Acquisition cost of Caemi, net of cash acquired	380

9 Commitments and contingencies

- (a) At September 30, 2003, we had extended guarantees for borrowings obtained by affiliates and joint ventures in the amount of \$326, of which \$278 is denominated in United States dollars and the remaining \$48 in local currency, as follows:

F - 13

Table of Contents

<u>Affiliate or Joint Venture</u>	<u>Amount of guarantee</u>	<u>Denominated currency</u>	<u>Purpose</u>	<u>Final maturity</u>	<u>Counter guarantees</u>
ALBRAS	249	US\$	Debt guarantee	2007	None
	42	R\$	Debt guarantee	2010	None
SEPETIBA TECON	18	US\$	Debt guarantee	2005	None
	5	R\$	Debt guarantee	2012	None
SAMARCO	9	US\$	Debt guarantee	2020	None
VALESUL	1	R\$	Debt guarantee	2006	None
NIBRASCO	2	US\$	Debt guarantee	2004	Collateral Pledge
	326				

We expect no losses to arise as a result of the above guarantees. We have made no charges for extending these guarantees except for commissions charged to Albras and Samarco.

- (b) CVRD and its subsidiaries are defendants in numerous legal actions in the normal course of business. Based on the advice of our legal counsel, management believes that the provision made against contingent losses is sufficient to cover probable losses in connection with such actions.

The provision for contingencies and the related judicial deposits are composed as follows:

	<u>September 30, 2003</u>		<u>December 31, 2002</u>	
	<u>Provision for contingencies</u>	<u>Judicial deposits</u>	<u>Provision for contingencies</u>	<u>Judicial deposits</u>
Labor claims	164	75	109	52
Civil claims	151	48	95	32
Tax - related actions	239	266	220	153
Others	9	1	4	2
	563	390	428	239

Labor - related actions principally comprise employee claims for (i) payment of time spent travelling from their residences to the work-place, (ii) additional payments for alleged dangerous or unhealthy working conditions and (iii) various other matters, often in connection with disputes about the amount of indemnities paid upon dismissal.

Civil actions principally relate to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted.

Tax - related actions principally comprise our challenges of certain revenue taxes, VAT and of the tax on financial movements - CPMF.

We continue to vigorously pursue our interests in all the above actions but recognize that probably we will incur some losses in the final instance, for which we have made provisions.

Our judicial deposits are made as required by the courts for us to be able to enter or continue a legal action. When judgment is favorable to us, we receive the deposits back; when unfavorable, the deposits are delivered to the prevailing party. An increase of \$113 for tax deposits during 2003 relates to an action in which we challenged the annual limitation on use our tax loss carryforward.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

Contingencies settled in the nine-month period ended September 30, 2003 and 2002, three-month period ended September 30, 2003, and 2002 and June 30, 2003 aggregated \$191 \$158, \$138, \$111 and \$32, respectively, and additional provisions aggregated \$114, \$212, \$66, \$105 and \$18, respectively.

(c) We are defendants in two actions seeking substantial compensatory damages brought by the

F - 14

Table of Contents

Municipality of Itabira, State of Minas Gerais, which we believe are without merit. Due to the remote likelihood that any loss will arise therefrom no provision has been made in the financial information with respect to these two actions.

- (d) We are committed under a take-or-pay agreement to take annual delivery of approximately 207,060 metric tons per year of aluminum from ALBRAS at market prices. This estimate is based on 51% of ALBRAS expected production and, at a market price of \$1,423.50 per metric ton, which at September 30, 2003, represents an annual commitment of \$295. Actual take from Albras was \$215, \$192, \$83, \$64 and \$67 during the nine-month period ended September 2003 and 2002, three-month period ended September 30, 2003 and 2002 and June 30, 2003, respectively.
- (e) We and BNDES entered into a contract, known as the Mineral Risk Contract, in March 1997, relating to prospecting authorizations for mining regions where drilling and exploration are still in their early stages. The Mineral Risk Contract provides for the joint development of certain unexplored mineral deposits in approximately two million identified hectares of land in the Carajás region, as well as proportional participation in any financial benefits earned from the development of such resources. Iron ore and manganese deposits already identified and subject to development are specifically excluded from the Mineral Risk Contract.

Pursuant to the Mineral Risk Contract, we and BNDES each agreed to provide \$205, which represents half of the \$410 in expenditures estimated as necessary to complete geological exploration and mineral resource development projects in the region over a period of five years. This period was extended for an additional two years. We oversee these projects and BNDES advances us half of our costs on a quarterly basis. Under the Mineral Risk Contract, As of September 30, 2003, both we and BNDES had remaining commitments to contribute an additional \$54 towards exploration and development activities. In the event that either of us wishes to conduct further exploration and development after having spent such \$205, the contract provides that each party may either choose to match the other party's contributions, or may choose to have its financial interest proportionally diluted. If a party's participation in the project is diluted to an amount lower than 40% of the amount invested in connection with exploration and development projects, then the Mineral Risk Contract provides that the diluted party will lose (1) all the rights and benefits provided for in the Mineral Risk Contract and (2) any amount previously contributed to the project.

Under the Mineral Risk Contract, BNDES has agreed to compensate us through a finder's fee production royalty on their share of mineral resources that are discovered and placed into production. This finder's fee is equal to 3.5% of the revenues derived from the sale of gold, silver and platinum group metals and 1.5% of the revenues derived from the sale of other minerals, including copper, except for gold and other minerals discovered at Serra Leste, for which the finder's fee is equal to 6.5% of revenues.

- (f) At the time of our privatization in 1997, we issued shareholder revenue interests known in Brazil as debentures to our then-existing shareholders, including the Brazilian Government. The terms of the debentures, were set to ensure that our pre-privatization shareholders, including the Brazilian Government, would participate alongside us in potential future financial benefits that we are able to derive from exploiting our mineral resources.
- (g) We use various judgments and assumptions when measuring our environmental liabilities and asset retirement obligations. Changes in circumstances, law or technology may affect our estimates and we periodically review the amounts accrued and adjust them as necessary. Our accruals do not reflect unasserted claims because we are currently not aware of any such issues. Also the amounts provided are not reduced by any potential recoveries under cost sharing, insurance or indemnification arrangements because such recoveries are considered uncertain. The changes are demonstrated as follows:

10 Segment and geographical information

In 1999 we adopted SFAS 131 Disclosures about Segments of an Enterprise and Related Information with respect to the information we present about our operating segments. SFAS 131 introduced a management approach concept for reporting segment information, whereby financial information is required to be reported on the basis that the top decision-maker uses such information internally for evaluating segment performance and deciding how to allocate resources to segments. Our business segments are currently organized as follows:

Ferrous products - comprises iron ore mining and pellet production, as well as the Northern and Southern transportation systems, including railroads, ports and terminals, as they pertain to mining operations. Manganese mining and ferroalloys are also included in this segment.

Non-ferrous products - comprises the production of non-ferrous minerals.

Logistics - comprises our transportation systems as they pertain to the operation of our ships, ports and railroads for third-party cargos.

Holdings - divided into the following sub-groups:

Aluminum - comprises aluminum trading activities, alumina refining and investments joint ventures and affiliates engaged in bauxite mining and aluminum metal smelting.

Steel - comprises our investments in joint ventures and affiliates operating in the steel industry.

Others - comprises our investments in joint ventures and affiliates engaged in other businesses.

Information presented to top management with respect to the performance of each segment is generally derived directly from the accounting records maintained in accordance with accounting practices generally accepted in Brazil together with certain minor inter-segment allocations.

Table of Contents

Consolidated net income and principal assets are reconciled as follows:

11 Derivative financial instruments

Volatility of interest rates, exchange rates and commodity prices are the main market risks to which we are exposed - all three are managed through derivative operations. These have the exclusive aim of reducing exposure to risk. We do not use derivatives for speculation purposes.

We monitor and evaluate our derivative positions on a regular basis and adjust our strategy in response to market conditions. We also periodically review the credit limits and credit worthiness of our counter-parties in these transactions. In view of the policies and practices established for operations with derivatives, management considers the occurrence of non-measurable risk situations as unlikely.

Table of Contents

The asset (liability) balances At September 30, 2003, 2002 and June 30, 2003 and the movement in fair value of derivative financial instruments is as follows:

	Gold	Interest rates (libor)	Currencies	Alumina	Total
Unrealized gains (losses) at July 1, 2003	(11)	(65)	(1)	1	(76)

Realized and unrealized gains (losses) are included in our income statement under the following captions:

Gold operating costs and expenses;
Interest rates financial expenses;
Currencies foreign exchange and monetary losses, net;
Alumina operating costs and expenses.

Table of Contents

Final maturity dates for the above instruments are as follows:

Gold	Dec 2007
Interest rates (libor)	Oct 2007
Currencies	Dec 2011
Alumina	Sep 2005

(a) Interest Rate and Exchange Rate Risk

Interest rate risks mainly relate to that part of the foreign debt borrowed at floating rates. The foreign currency debt is largely subject to fluctuations in the London Interbank Offered Rate - LIBOR. That portion of local currency denominated debt that is subject to floating rates is linked to the Long Term Interest Rate - TJLP, fixed quarterly by the Brazilian Central Bank. Since May 1998, we have used derivative instruments to protect ourselves against fluctuations in the LIBOR rate.

There is an exchange rate risk associated with our foreign currency denominated debt. On the other hand, 89% of our revenues are denominated in, or automatically indexed to, the U.S. dollar, while 49% of our costs are expressed in reais. This provides a natural hedge against any devaluation of the Brazilian real against the U.S. dollar. When events of this nature occur, the immediate negative impact on foreign currency denominated debt is offset over time by the positive effect of devaluation on future cash flows.

With the floating exchange rate regime in Brazil, we adopt a strategy of monitoring market fluctuations, using derivatives to protect against specific risks from exchange rate variation.

From time to time we enter into foreign exchange derivative swap transactions seeking to change the characteristics of our real-denominated cash investments to US dollar-indexed instruments. The extent of such transactions depends on our perception of market and currency risk, but is never speculative in nature. All such operations are marked-to-market at each balance sheet date and the effect included in financial income or expense. During the periods presented our use of such instruments was not significant.

(b) Commodity Price Risk

We also use derivative instruments to manage exposure to changing gold prices and to ensure an average minimum profit level for future and alumina production. However, they may also have the effect of eliminating potential gains on certain price increases in the spot market. We manage our contract positions actively, and the results are reviewed at least monthly, allowing adjustments to targets and strategy to be made in response to changing market conditions.

In the case of gold and alumina derivatives, our policy has been to settle all contracts through cash payments or receipts, without physical delivery of product.

12 Subsequent Events

(a) CVRD Dividend Payment

On October 15, 2003 the Board of Directors approved the second installment of the minimum dividend payment to shareholders, as proposed by the Company's Executive Board on January 30, 2003. The second installment of the minimum dividend was paid as distribution of interest on stockholders' equity in the amount of R\$ 1.48 per outstanding preferred A share or common share is equal to US\$ 0.52 on October 14, 2003.

On August 27, 2003 CVRD announced that the additional dividend payment to CVRD shareholders was equal to R\$ 1.94 per outstanding preferred A share and common share and that the respective amount was paid on October 31, 2003.

(b) CVRD Sells Its Stake in Fosfertil

On October 24, 2003 we concluded the sale of our 11.12% participation Fertilizantes Fosfatados S.A. (Fosfertil) shares to Bunge Fertilizantes S.A. for R\$ 240 million, equivalent to US\$ 84, on the date.

This transaction is consistent with CVRD's focus in mining and logistics and with its strategy of selling portfolio investments.

(c) CVRD Simplifies Operational Structure

On October 28, 2003 CVRD announced that its manganese and ferroalloy operations will be held as from January, 2004 through four wholly owned subsidiaries: Rio Doce Manganês S.A. (RDM - previously known as Sibra), Urucum Mineração S.A., in Corumbá, Mato Grosso do Sul state, Rio Doce Manganese Europe (RDME), in Dunkerque, France, and Rio Doce Manganese Norway (RDMN), in Mo I Rana, Norway.

(d) CVRD Concludes the Restructuring of Logistics Companies

The conclusion of the transactions aimed at the elimination of the relationships between CVRD and Companhia Siderúrgica Nacional (CSN) in the shareholding structure of Ferrovia Centro-Atlântica S.A. (FCA), Companhia Ferroviária do Nordeste (CFN) and CSN Aceros S.A. (CSN Aceros).

CVRD transferred its interests in CFN and CSN Aceros to CSN and received CSN's interest in FCA, resulting in a net investment of \$ 8, and these operations were concluded on July 11, 2003.
