CVRD wins international bid to explore phosphate in Peru

Rio de Janeiro, March 16, 2005 Companhia Vale do Rio Doce (CVRD) won an international bid promoted by the Government of Peru, to explore the Bayóvar phosphate deposit, located in the Piura region.

The bid presented by CVRD involved the largest production capacity in the long term, 3.3 million tons per year. Consequently, CVRD will have the right to perform studies for the future exploration of this world-class deposit. The Bayóvar deposit holds reserves preliminarily estimated at 816 million tons of phosphate rocks. CVRD will have the right to evaluate and to develop a multimodal maritime terminal in the Piura region, to ship phosphate and leverage other projects in northern Peru.

CVRD will have two years to perform the feasibility study. After the conclusion of this study, it will have a thirty-six month period to implement the project.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
