***CVRD settles 2006 iron ore and pellet prices with the Japanese steel mills***

Rio de Janeiro, May 17, 2006 Companhia Vale do Rio Doce (CVRD), the world's largest iron ore producer, concluded the iron ore price negotiations for 2006 with the Japanese steel mills. As an outcome of these negotiations, iron ore prices for Carajás (SFCJ) and Southern System (SSF) fines increased by 19.0% relatively to 2005. Blast furnace pellets, both from Tubarão and São Luís, will be reduced by 3.0%

CVRD reinforces its long-term commitment with clients, investing a significant amount of resources, despite of rising investment costs, in the production and logistics of iron ore. For 2006, CVRD capex budget allocated US\$2.1 billion for investments in ferrous minerals. Currently, CVRD is developing seven projects for iron ore and pellet production capacity expansion, which will come on stream between 2006 and 2008.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
