Notes to Consolidated Financial Statements

These interim statements and management s related discussion and analysis should be read in conjunction with the Consolidated Financial Statements and their related notes and management s discussion and analysis of results of operations and financial condition included in our 2008 Annual Report on Form 10-K (2008 Form 10-K). These interim statements are unaudited. We have historically operated on a 52/53 week fiscal year ending on the Friday closest to the last day of the quarter. For ease of presentation, December 31 and March 31 are utilized consistently throughout these financial statements and notes to represent the period end date. In the opinion of our management, all adjustments, including normal recurring accruals, necessary for a fair presentation of the results for the interim periods have been made.

Note 1. Accounting Changes

Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 FAS 160

We adopted FAS 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (FAS 160) as of January 1, 2009 which requires us to classify our noncontrolling interest in consolidated subsidiaries (previously referred to as minority interest) as a separate component of shareholders equity. Through December 31, 2008, such noncontrolling interest had been included in Other liabilities in our Consolidated Balance Sheet. Any applicable (income) expense attributable to the noncontrolling interest is included in Other (income) expense, net in the accompanying Consolidated Statement of Income due to its immateriality and, as such, is not included separately in comprehensive income.

Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB No. 133 - SFAS No. 161

We adopted SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133 (FAS 161) as of January 1, 2009. FAS 161 amends and expands the disclosure requirements of SFAS No. 133 by requiring enhanced disclosures regarding the objectives and strategies for using derivatives, how derivative instruments are accounted for, and how derivative instruments and related hedged items affect an entity s financial position, financial performance and cash flows. The adoption of this statement had no impact on our financial position or results of operations. The additional disclosures required by this statement are included in Note 12.

Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities FSP EITF 03-6-1

We adopted FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities (FSP EITF 03-6-1) as of January 1, 2009. FSP EITF 03-6-1 considers unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) as participating securities and requires them to be included in the computation of basic earnings per share pursuant to the two-class method described in SFAS No. 128, Earnings per Share". The adoption of this FSP did not have a material impact on our Consolidated Financial Statements and is explained in detail in Note 3.

Note 2. Reclassifications:

Certain reclassifications have been made to the prior periods financial statements to conform to 2009 classifications. In addition, as a result of the adoption of FAS 160 as discussed in Note 1 above, we reclassified Noncontrolling interest of $7.5 million from Other liabilities to a separate component of Shareholders Equity in the Consolidated Balance Sheet.

Note 3. Net Income Per Share:

Net income per share is based on the weighted average number of shares outstanding. A reconciliation of the shares used in the computation of basic and diluted net income per share is as follows:

	Three Months Ended March 31,	
(Shares in thousands)	**2009**	**2008**
Basic	78,195	80,296
Assumed conversion under stock plan	552	783

Diluted	78,747	81,079

Stock options and stock settled appreciation rights (SSARs) to purchase 2,268,159 and 331,593 shares were outstanding for the first quarter of 2009 and 2008, respectively, but were not included in the computation of diluted net income per share for the respective periods since the impact was anti-dilutive.

Our PRS contain nonforfeitable rights to dividends and thus are considered participating securities which are required to be included in the computation of basic and diluted earnings per share pursuant to the two-class method. We did not reflect presentation of the two-class method as basic and diluted net income per share for both common shareholders and PRS shareholders was the same for each period and the number of PRS outstanding as of March 31, 2009 and 2008 was immaterial (0.6% of the total number of shares outstanding). Net income allocated to such PRS was approximately $0.3 million in each period. Diluted shares and net income per share for the three months ended March 31, 2008 have been adjusted to reflect the adoption of FSP EITF 03-6-1.

Note 4. Restructuring and Other Charges:

The 2008 charge primarily related to employee separation expenses in connection with the implementation of a global shared service center and a performance improvement plan. Movements in restructuring liabilities, included in Restructuring and other charges in the accompanying Consolidated Balance Sheet, were (in millions):

	Employee-Related
Balance December 31, 2008	$ 14.8
Cash and other costs	(2.0)
Balance March 31, 2009	$ 12.8

The balance of the employee-related liabilities is expected to be utilized by the end of 2010 as obligations are satisfied.

Note 5. Goodwill and Other Intangible Assets, Net:

Goodwill by operating segment at March 31, 2009 and December 31, 2008 is as follows:

(DOLLARS IN THOUSANDS)	Amount
Flavors	$ 319,479
Fragrances	346,103
Total	$ 665,582

Trademark and other intangible assets consist of the following amounts:

(DOLLARS IN THOUSANDS)	March 31, 2009	December 31, 2008
Gross carrying value	$ 165,406	$ 165,406
Accumulated amortization	105,844	104,305
Total	$ 59,562	$ 61,101

Amortization expense for the three months ended March 31, 2009 and March 31, 2008 was $1.5 million for each period. Annual amortization is estimated to be $6 million in 2009 and $6 million in each year from 2010 through 2013.

Note 6. Comprehensive Income:

Changes in the Accumulated other comprehensive income (loss) component of shareholders equity were as follows:

6

(DOLLARS IN THOUSANDS)	Translation adjustments	Accumulated (losses) gains on derivatives qualifying as hedges, net of tax	Pension and postretirement liability adjustment, net of tax	Total
Balance December 31, 2008	$ (149,846)	$ (3,832)	$ (171,427)	$ (325,105)
Change	24,041	1,581	1,824	27,446
Balance March 31, 2009	$ (125,805)	$ (2,251)	$ (169,603)	$ (297,659)

(DOLLARS IN THOUSANDS)	Translation adjustments	Accumulated (losses) gains on derivatives qualifying as hedges, net of tax	Pension and postretirement liability adjustment, net of tax	Total
Balance December 31, 2007	$ (32,990)	$ (1,843)	$ (109,514)	$ (144,347)
Change	(32,474)	(2,521)	3,388	(31,607)
Balance March 31, 2008	$ (65,464)	$ (4,364)	$ (106,126)	$ (175,954)

Note 7. Borrowings:

Debt consists of the following:

(DOLLARS IN THOUSANDS)	Rate	Maturities	March 31, 2009	December 31, 2008
Bank borrowings and overdrafts			$ 40,465	$ 51,982
Current portion of long-term debt	5.89%		50,000	50,000
Total current debt			90,465	101,982
Senior notes - 2007	6.38%	2017-27	500,000	500,000
Senior notes - 2006	6.06%	2011-16	325,000	325,000
Bank borrowings	1.36%	2012	132,305	141,575
Japanese Yen loan - 2008	2.21%	2011	133,044	149,758
Japanese Yen notes	2.81%	2011	18,142	20,422
Other			17	24
Deferred realized gains on interest rate swaps			16,395	16,893
Total long-term debt			1,124,903	1,153,672
Total debt			$ 1,215,368	$ 1,255,654

Note 8. Income Taxes:

As of March 31, 2009, we had $59 million of gross unrecognized tax benefits recorded in Other liabilities, that if recognized, would be recorded as a component of income tax expense and affect the effective tax rate.

We have consistently recognized interest and penalties related to unrecognized tax benefits as a component of income tax expense. At March 31, 2009, we had accrued $8 million of interest and penalties.

We have several tax audits in process and have open tax years with various significant taxing jurisdictions that range primarily from 2002 to 2008. Based on currently available information, we do not believe the ultimate outcome of these tax audits and other tax positions related to open tax years, when finalized, will have a material adverse effect on our financial position, results of operations or cash flows.

The effective tax rate for the three months ended March 31, 2009 was 24.4% compared with 25.4% in the three months ended March 31, 2008. The 2008 quarter includes the benefit from favorable tax rulings with respect to prior

periods of $2.1 million resulting in a 280 basis point reduction in the effective tax rate. The decline in the effective tax rate in 2009 is mainly attributable to the closure of open tax positions and the mix of earnings across the countries in which we operate.

Note 9. Equity Compensation Plans:

We have various plans under which our officers, senior management, other key employees and directors may be granted equity-based awards, including PRS, restricted stock units (RSUs), SSARs or stock options to purchase our common stock.

We offer a Long-Term Incentive Plan (LTIP) for senior management. LTIP plan awards are based on meeting certain targeted financial and/or strategic goals established by the Compensation Committee of the Board of Directors early in each cycle. Beginning with the LTIP 2007-2009 cycle and thereafter, the targeted payout is 50% cash and 50% IFF stock. The number of shares for the 50% stock portion is determined by the closing share price on the first trading day at the beginning of the cycle. The executive generally must remain employed with IFF during the cycle to receive the award.

Stock option and SSAR activity for the three months ended March 31, 2009 was as follows:

(SHARE AMOUNTS IN THOUSANDS)	Shares Subject to Options/SSARs	Weighted Average Exercise Price
Balance at December 31, 2008	2,422	$ 35.86
Exercised	(12)	$ 28.99
Cancelled	(27)	$ 31.69
Balance at March 31, 2009	2,383	$ 35.95

Restricted stock and RSU activity for the three months ended March 31, 2009 was as follows:

(SHARE AMOUNTS IN THOUSANDS)	Number of Shares	Weighted Average Grant Date Fair Value Per Share
Balance at December 31, 2008	1,408	$ 33.34
Cancelled	(12)	$ 42.98
Balance at March 31, 2009	1,396	$ 33.33

Pre-tax expense related to all forms of equity compensation was as follows:

	Three Months Ended March 31,	
(DOLLARS IN THOUSANDS)	2009	2008
Restricted stock and RSUs	$ 4,088	$ 3,134
Stock options and SSARs	671	751
Total equity compensation expense	$ 4,759	$ 3,885

Tax related benefits of $1.5 million and $1 million were recognized for the first quarter of 2009 and 2008, respectively.

Note 10. Segment Information:

We are organized into two business segments, Flavors and Fragrances; these segments align with the internal structure used to manage these businesses. Accounting policies used for segment reporting are described in Note 1 of the Notes to the Consolidated Financial Statements included in our 2008 Form 10-K.

We evaluate the performance of business units based on operating profit before interest expense, other income (expense), net and income taxes. The Global expense caption represents corporate and headquarters-related expenses which include legal, finance, human resources and other administrative expenses that are not allocated to individual business units. The first three months of 2008 includes approximately $3 million of restructuring costs offset by a $3 million benefit from an insurance recovery related to a prior year product contamination matter. Unallocated assets are principally cash, short-term investments and other corporate and headquarters-related assets.

Our reportable segment information was as follows:

	Three Months Ended March 31, 2009			
(DOLLARS IN THOUSANDS)	**Flavors**	**Fragrances**	**Global Expenses**	**Consolidated**
Net sales	$ 266,121	$ 293,509		$ 559,630
Operating profit	$ 52,840	$ 35,991	$ (7,782)	81,049
Interest expense				(19,781)
Other income (expense), net				1,162
Income before taxes on income				$ 62,430

	Three Months Ended March 31, 2008			
(DOLLARS IN THOUSANDS)	**Flavors**	**Fragrances**	**Global Expenses**	**Consolidated**
Net sales	$ 273,807	$ 322,798		$ 596,605
Operating profit	$ 56,928	$ 46,896	$ (8,307)	95,517
Interest expense				(18,219)
Other income (expense), net				(2,307)
Income before taxes on income				$ 74,991

Segment assets were $1,132 million for Flavors and $1,391 million for Fragrances at December 31, 2008. Global assets were $227 million at December 31, 2008. There were no significant changes in segment assets from December 31, 2008 to March 31, 2009.

Note 11. Retirement Benefits:

Pension expense included the following components:

U.S. Plans	**Three Months Ended March 31,**	
(DOLLARS IN THOUSANDS)	**2009**	**2008**
Service cost for benefits earned	$ 1,180	$ 1,187
Interest cost on projected benefit obligation	5,985	5,943
Expected return on plan assets	(6,042)	(6,235)
Net amortization and deferrals	1,584	1,417
Defined benefit plans	2,707	2,312
Defined contribution and other retirement plans	1,999	1,854
Total pension expense	$ 4,706	$ 4,166

Non-U.S. Plans	**Three Months Ended March 31,**	
(DOLLARS IN THOUSANDS)	**2009**	**2008**
Service cost for benefits earned	$ 1,983	$ 2,609
Interest cost on projected benefit obligation	7,136	9,316
Expected return on plan assets	(9,351)	(13,075)
Net amortization and deferrals	697	790
Defined benefit plans	465	(360)
Defined contribution and other retirement plans	1,031	1,052
Total pension expense	$ 1,496	$ 692

In 2009, we may contribute up to $20 million and $14 million to our U.S. pension plans and non-U.S. pension plans, respectively. In the quarter ended March 31, 2009, $3 million of contributions were made to our qualified U.S. pension plan. In the quarter ended March 31, 2009, no contributions were made to our non-qualified U.S. pension plan, and $4 million of contributions were made to the non-U.S. plans.

The financial returns of our investment trusts during the first quarter of 2009 continue to be in line with the markets by asset class. We had little exposure to financial equities and had no direct investments in sub-prime related assets.

Expense recognized for postretirement benefits other than pensions included the following components:

	Three Months Ended March 31,	
(DOLLARS IN THOUSANDS)	**2009**	**2008**
Service cost for benefits earned	$ 441	$ 671
Interest on benefit obligation	1,556	1,542
Net amortization and deferrals	(565)	(153)
Total postretirement benefit expense	$ 1,432	$ 2,060

We expect to contribute $5 million to our postretirement benefit plans in 2009. In the three months ended March 31, 2009, $1 million of contributions were made.

Note 12. Financial Instruments:

Fair Value

SFAS No. 157, Fair Value Measurements (FAS 157) specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1 Quoted prices for *identical* instruments in active markets.

Level 2 Quoted prices for *similar* instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires us to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

When available, we generally use quoted market prices to determine fair value, and classify such items in Level 1. We determine the fair value of structured liabilities (where performance is linked to structured interest rates, inflation or currency risks) using the LIBOR (London InterBank Offer Rate) swap curve and forward interest and exchange rates at period end. Such instruments are classified as Level 2 based on the observability of significant inputs to the model. The fair value of these liabilities was approximately $4 million at March 31, 2009. We do not have any instruments classified as Level 3.

The market valuation adjustments include a bilateral or own credit risk adjustment applied to reflect our own credit risk when valuing all liabilities measured at fair value, in accordance with the requirements of FAS 157. The methodology is consistent with that applied in generating counterparty credit risk adjustments, but incorporates our own credit risk as observed in the credit default swap market. As for counterparty credit risk, our own credit risk adjustments include the impact of credit risk mitigants. The estimated change in the fair value of these liabilities due to such changes in our own credit risk (or instrument-specific credit risk) was immaterial.

Derivatives

We periodically enter into foreign currency forward contracts with the objective of reducing exposure to cash flow volatility associated with our intercompany loans. These contracts, the counterparties to which are major international financial institutions, generally involve the exchange of one currency for a second currency at a future date, and have maturities not exceeding three months. As of March 31, 2009 we held foreign currency swaps not designated as hedging instruments under FAS 133 of $0.8 million classified in Accounts payable in the Consolidated Balance Sheet. During the three months ended March 31, 2009 we recognized a gain of $3 million recorded in Other (income) expense, net, related to these foreign currency contracts which offset the recognized loss arising from the revaluation of the intercompany loans during the same period.

In 2003, we executed a 10-year Yen U.S. dollar currency swap related to the monthly sale and purchase of products between the U.S. and Japan which has been designated as a cash flow hedge under FAS 133. As of March 31, 2009, this cash flow hedge experienced no ineffectiveness. As of March 31, 2009, the fair value of this foreign currency contract was a liability of $3.6 million classified in Other current liabilities in the Consolidated Balance Sheet. During the three months ended March 31, 2009, a gain of $1.6 million was recognized in Other comprehensive income representing the change in fair value of the remaining hedge balance outstanding which is marked to market in Accumulated other comprehensive income (loss) (AOCI) as a hedge of forecasted future cash flow and released ratably through earnings over the ten-year period of the hedge. During the three months ended March 31, 2009 we reclassified a $0.2 million loss from AOCI to Other (income) expense, net, in the Consolidated Statement of Income.

In 2005, we entered into an interest rate swap agreement effectively converting the fixed rate on our long-term Japanese Yen borrowings to a variable short-term rate based on the Tokyo InterBank Offering Rate (TIBOR) plus an interest markup. This swap was designated as a fair value hedge under FAS 133. As of March 31, 2009, the fair value of this interest rate contract was less than $0.1 million and is classified in Other assets in the Consolidated Balance Sheet. This fair value hedge experienced no ineffectiveness. Interest income on the periodic settlement and reset of the floating interest rate of less than $0.1 million was recorded in Interest expense in the Consolidated Statement of Income for the three months ended March 31, 2009.

In February 2009, we paid $16 million to close out the $300 million USD LIBOR to European InterBank Offer Rate (EURIBOR) interest rate swap. As this swap was designated as a net investment hedge under FAS 133, $12 million of the loss was deferred in AOCI where it will remain until the Euro net investment is divested and $4 million was included currently in earnings as a component of interest expense.

Note 13. Commitments and Contingencies:

We are party to a number of lawsuits and claims related primarily to flavoring supplied by us and by other third party suppliers, in most instances to manufacturers of butter flavored microwave popcorn. A total of 15 actions

involving 368 claimants are currently pending against us and other flavor suppliers and related companies based on similar claims of alleged respiratory illness. In certain cases, plaintiffs are unable to demonstrate that they have suffered a compensable loss as a result

Table of Contents

of exposure to our flavored products, or that injuries which did occur are in fact the result of such exposure. In most of the complaints, the damages sought by the plaintiff(s) are not alleged at the pleading stage and may not be specified until a much later time in the proceeding, if at all. During the first quarter of 2009, no new actions were filed against us, three actions involving 11 plaintiffs were resolved through confidential settlement or voluntary dismissal for a net out-of-pocket amount which is not material to us, including insurance recovery. In addition, 10 other plaintiffs were voluntarily dismissed from the other pending cases.

At each balance sheet date, or more frequently as conditions warrant, we review the status of each pending claim, as well as our insurance coverage for such claims with due consideration given to potentially applicable deductibles, retentions and reservation of rights under insurance policies with respect to all these matters. The liabilities are recorded at management s best estimate of the outcome of the lawsuits and claims, taking into consideration the facts and circumstances of the individual matters as well as past experience on similar matters. Amounts accrued are also based upon our historical experience with these claims, including claims which have been closed with no liability as well as claims settled to date. Settled claims, since the inception of the flavor-related claims, have not been material to us in any reporting period including insurance recovery. At each balance sheet date, the key issues that management assesses are whether it is probable that a loss as to asserted or unasserted claims has been incurred and, if so, whether the amount of loss can be reasonably estimated. We are not able to provide an amount or range of estimated loss in excess of the liability currently accrued at the balance sheet date as to asserted and unasserted claims because such estimate cannot reasonably be made.

While the ultimate outcome of any litigation cannot be predicted, management believes that adequate provision has been made with respect to all known claims. Based on information presently available and in light of the merits of our defenses and the availability of insurance, we do not expect the outcome of the above cases, singly or in the aggregate, to have a material adverse effect on our financial condition, results of operation or liquidity. There can be no assurance that future events will not require us to increase the amount we have accrued for any matter or accrue for a matter that has not been previously accrued.

We periodically assess our insurance coverage for all known claims, taking into account aggregate coverages by occurrence, limits of coverage, self-insured retentions and deductibles, historical claims experience and claims experience with insurers.

We record the expected liability with respect to these claims in Other liabilities and expected recoveries from our insurance carrier group in Other assets. We believe that realization of the insurance receivable is probable due to the terms of the insurance policies and the payment experience to date of the carrier group as it relates to these claims.

Over the past approximately 20 years, various federal and state authorities and private parties have claimed that we are a Potentially Responsible Party (PRP) as a generator of waste materials for alleged pollution at a number of waste sites operated by third parties located principally in New Jersey and have sought to recover costs incurred and to be incurred to clean up the sites.

We have been identified as a PRP at ten facilities operated by third parties at which investigation and/or remediation activities may be ongoing. We analyze our liability on a regular basis and accrue for environmental liabilities when they are probable and estimable. At March 31, 2009, we estimated our share of the total future costs for these sites to be less than $5 million.

While joint and several liability is authorized under federal and state environmental laws, we believe that the amounts we have paid and anticipate paying in the future for clean-up costs and damages at all sites are not and will not be material to our financial condition, results of operations or liquidity. This conclusion is based upon, among other things, the involvement of other PRP s at most sites, the status of the proceedings, including various settlement agreements and consent decrees, the extended time period over which payment will likely be made and an agreement reached in July 1994 with three of our liability insurers pursuant to which defense costs and indemnity amounts payable by us in respect of the sites will be shared by the insurers up to an agreed amount.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a leading creator and manufacturer of flavor and fragrance compounds used to impart or improve the flavor or fragrance in a wide variety of consumer products.

IFF is organized into two units that reflect our flavor and fragrance businesses. Flavor compounds are sold to the food and beverage industries for use in consumer products such as prepared foods, beverages, dairy, food and confectionery products. The fragrance business unit consists of three fragrance categories: functional fragrances, including fragrance compounds for personal care (e.g., soaps) and household products (e.g., detergents and cleaning agents); fine fragrance and beauty care, including perfumes, colognes and toiletries; and ingredients, consisting of natural and synthetic ingredients that can be combined with other materials to create unique functional and fine fragrance compounds. Approximately 55% of our ingredient production is consumed internally; the balance is sold to third party customers.

Changing social habits resulting from such factors as increases in personal income, leisure time, health concerns, urbanization and population growth stimulate demand for consumer products utilizing flavors and fragrances. These developments expand the market for products with finer fragrance quality, as well as the market for colognes and toiletries. Such developments also stimulate demand for convenience foods, soft drinks and low-fat and organic food products that must conform to expected tastes. These developments necessitate the creation and development of flavors and fragrances and ingredients that are compatible with newly introduced materials and methods of application used in consumer products.

Flavors and fragrances are generally:

- created for the exclusive use of a specific customer;
- sold in powder, or liquid form, in amounts ranging from a few pounds to several tons depending on the nature of the end product in which they are used;
- a small percentage of the volume and cost of the end product sold to the consumer; and
- a major factor in consumer selection and acceptance of the product.

The flavors and fragrances industry can be impacted by macroeconomic factors in all product categories and geographic regions. Such factors may include the impact of currency on the price of raw materials, and operating costs, as well as on translation of reported results. In addition, IFF is susceptible to margin pressure due to customers cost improvement programs and input cost increases. However, these pressures can often be mitigated through a combination of product reformulation, sourcing strategies and material substitution plus internal cost containment efforts, and the development of innovative and streamlined solutions and processes.

STRATEGIC DRIVERS

We are well positioned to increase shareholder value by executing the following key drivers: targeting strategically important global and regional customers in both developed and emerging markets; attracting, developing and retaining top talent, and fostering a culture of innovation and continuous improvement. Our goal is to deliver differentiated solutions that enable our customers brands to win in the marketplace. Our success is based on demonstrated expertise in material science, extensive consumer insights and knowledge of factors driving consumer preferences, and our creative ability to bridge this gap.

Customers

We believe there is a great deal of opportunity to grow sales by earning a greater share of our customers business across multiple categories, both in the developed and emerging markets. We use our proprietary tools of consumer insight to understand the connections between the consumer, the product, and the brand. This enables us to create flavors and fragrances that resonate with consumers and drive brand loyalty.

People

As a leading creator of flavors and fragrances, our ability to succeed is highly dependent on our greatest asset our people. We continue to invest considerable time and resources in developing our leaders to build IFF for the long-term.

Table of Contents

Innovation

IFF continues to focus on creating innovative processes, technologies and delivery systems, which includes a significant financial commitment to research and development. We see potential to gain market share by providing unique solutions to our customers that enable their brands to win in the marketplace. In addition, by streamlining internal processes, we are better able to allocate resources to appropriate initiatives.

As implementation of our strategy progresses, setting strategic initiatives requires regular establishment and reassessment of priorities and necessitates choices in order to provide the best opportunity for continuous improvement in shareholder value.

Operations

First Quarter 2009

Sales Commentary

First quarter 2009 sales totaled $560 million, decreasing 6% from the prior year quarter, as flavor sales declined 3% and fragrance sales decreased 9%. Foreign exchange had a negative impact on reported sales for the 2009 quarter as the U.S. dollar strengthened against most currencies; at comparable exchange rates, sales would have decreased 2% in comparison to the 2008 quarter.

On a reported basis Flavor sales decreased 3%; excluding the impact of currencies, sales for the Flavors business increased 2% from the prior year period. The strongest performance was in North America with 6% growth as a result of higher volumes and new wins particularly in the savory category. We experienced lower sales in EAME (Europe, Africa and Middle East) as a result of the economic slowdown and inventory corrections by our customers. Latin America and Greater Asia saw weaker sales performance as a result of supply chain corrections and depressed demand resulting from a stronger U.S. dollar.

Fragrance sales declined 9% including 4% from foreign exchange rates. Fine & Beauty Care sales experienced declines in North America and Greater Russia primarily related to de-stocking of fine fragrances by our customers. Functional sales improved in North America due to new wins in the fabric care and personal wash categories. We did experience decreased volumes and some lost business in fabric care across the emerging markets. Ingredients sales declined 8%, 4% excluding foreign exchange, as increases in North America and Latin America were offset by a decline in EAME. The decline in EAME was mainly attributable to inventory corrections.

Sales performance by region and product category in comparison to the prior year quarter in both reported dollars and local currency, where applicable, was as follows:

		% Change in Sales-First Quarter 2009 vs First Quarter 2008					
		Fine & Beauty Care	**Functional**	**Ingredients**	**Total Frag.**	**Flavors**	**Total**
North America	**Reported**	**-14%**	**8%**	**13%**	**2%**	**6%**	**4%**
EAME	**Reported**	**-33%**	**-11%**	**-27%**	**-24%**	**-11%**	**-19%**
	Local Currency	***-26%***	***-2%***	***-20%***	***-16%***	***-1%***	***-11%***
Latin America	**Reported**	**14%**	**1%**	**16%**	**7%**	**-2%**	**3%**
Greater Asia	**Reported**	**12%**	**-4%**	**7%**	**2%**	**-2%**	**-1%**
	Local Currency	***14%***	***-3%***	***3%***	***2%***	***2%***	***2%***
Total	**Reported**	**-17%**	**-3%**	**-8%**	**-9%**	**-3%**	**-6%**
	Local Currency	***-12%***	***0%***	***-4%***	***-5%***	***2%***	***-2%***

§ North America Flavor sales growth was driven primarily by new wins and price increases. Weak economic conditions and customer de-stocking led to volume declines in fine fragrance compounds, while new product introductions drove the increase in functional compounds. Ingredient sales growth was driven by price increases

and mix.

§ EAME Flavor sales decline was driven by de-stocking by our customers. Fragrance compounds sales declined, particularly in fine, as new product introductions were offset by volume erosion. Fabric care was particularly strong as a result of new product introductions. Ingredients volume declines more than offset price increases.

§ Latin America Flavor sales decline was driven mainly by the weakening of the Brazil real, resulting in lower dollar sales. Fine fragrance growth was driven by higher volume. Functional fragrance price increases were more than offset by volume decreases. Ingredients sales benefited from gains in market share.

§ Greater Asia Flavor sales growth was driven by new product introductions partially offset by volume decreases. The decrease in functional fragrance sales was driven by volume declines, largely in regional accounts. Fine Fragrance sales growth was primarily the result of new product introductions.

Consolidated Operating Results

The percentage relationship of cost of goods sold and other operating expenses to reported sales is as follows:

	First Quarter	
	2009	**2008**
Cost of goods sold	60.3%	58.9%
Research and development expenses	9.0%	8.7%
Selling and administrative expenses	16.0%	15.1%

Cost of goods sold includes the cost of materials and manufacturing expenses; raw materials generally constitute 70% of the total. Research and development expenses are for the development of new and improved products, technical product support, compliance with governmental regulations, and help in maintaining relationships with customers who are often dependent on technological advances. Selling and administrative expenses support our sales and operating levels.

Cost of goods sold, as a percentage of sales, was 60.3% compared with 58.9% in 2008. This increase was mainly the result of lower absorption and volume, and product mix, partially offset by cost recovery efforts.

Research and development (R&D) expenses were down approximately $2 million from the prior year as tight cost control on applied research and development was partially offset by increased spending on basic R&D.

Selling and administrative expenses (S&A), as a percentage of sales, increased to 16.0% as compared to 15.1% in the first quarter 2008. The prior year amount includes the benefit of a $3 million insurance recovery related to a prior period product liability claim. The increase in S&A is attributable to $1 million higher pension expense and $2 million for bad debts and product claims, primarily in the Flavors business. Excluding the insurance recovery in 2008, S&A as a percentage of sales was 15.5%.

Restructuring and Other Charges

Restructuring and other charges primarily consist of separation costs for employees, including severance, outplacement and other benefit costs.

The 2008 charge primarily related to employee separation expenses in connection with the implementation of a global shared service center. Positions eliminated and charges by business segment are detailed in the table below. There were no such actions taken in 2009.

(In Thousands)	**Restructuring Charges 2008**	**Positions Eliminated 2008**
Flavors	$ 925	17
Fragrances	2,480	19
Global	2,817	87

Total	$	6,222	123

15

Table of Contents

Interest Expense

In the first quarter 2009, interest expense totaled $19.8 million as compared to $18.2 million in 2008. The 2009 amount includes $4 million of interest paid on the close-out of a cross-currency interest rate swap classified as a net investment hedge. Average cost of debt was 6.0% for 2009 compared to 5.9% in 2008.

Other (Income) Expense, Net

Other income in 2009 of $1 million as compared to other expense of $2 million in 2008 was mainly due to gains on foreign exchange transactions, compared to losses in the prior year.

Income Taxes

The effective tax rate was 24.4% as compared to a rate of 25.4% in the prior year quarter. The 2008 effective tax rate would have been 28.2% excluding a $2.1 million benefit from favorable tax rulings related to prior periods. The decline in the effective tax rate in 2009 is mainly attributable to the closure of open tax positions and the mix of earnings across the countries in which we operate.

Operating Results by Business Unit

We evaluate the performance of business units based on operating profit before interest expense, other income (expense), net and income taxes. See Note 10 to our Consolidated Financial Statements for the reconciliation to Income before taxes.

Flavors

In the first quarter 2009, Flavors operating profit totaled $53 million, or 19.9%, as a percentage of sales, compared to $57 million or 20.8% in 2008. The 2008 amount includes $0.9 million of restructuring expenses. The decline in profitability was primarily the result of unfavorable foreign exchange impacts, higher S&A costs, as described above, and higher input costs partially offset by cost recovery efforts.

Fragrances

Fragrance operating profit for the first quarter of 2009 was $36 million, or 12.3%, as a percentage of sales, compared to $47 million or 14.5% reported in 2008. The 2008 amount includes $2 million of restructuring expenses. The decline in profit was driven by lower volumes and unfavorable mix partially offset by cost recovery efforts and lower S&A expenses.

Global Expenses

Global expenses represent corporate and headquarters-related expenses which include legal, finance, human resources and other administrative expenses that are not allocated to an individual business unit. In 2009, Global expenses for the first quarter were $8 million. The first quarter 2008 Global expenses of $8 million included a $3 million insurance recovery related to a prior period product liability claim offset by $3 million of restructuring expenses.

Financial Condition

Cash and cash equivalents totaled $88 million at March 31, 2009 compared to $60 million at March 31, 2008. Working capital of $705 million at March 31, 2009 was comparable to the $710 million at December 31, 2008. Additions to property, plant and equipment for the three-month period ended March 31, 2009 totaled $8 million. Gross additions to property, plant and equipment are expected to approximate $80 million for the full year 2009.

Operating cash flows in 2009 were an outflow of $14 million, compared to an inflow of $8 million in the prior year period. Operating cash flows in 2008 benefited from the receipt of $18 million on termination of an interest rate swap.

At March 31, 2009, we had $1,215 million of debt outstanding comparable to the $1,224 million outstanding at March 31, 2008.

In February 2009, we closed out the $300 million USD London InterBank Offer Rate (LIBOR) to European InterBank Offer Rate (EURIBOR) interest rate swap for $16 million, of which a $12 million loss was deferred in AOCI where it will

remain until the Euro net investment is divested and $4 million was included currently in earnings as a component of interest expense.

In January 2009 and April 2009 we funded a quarterly cash dividend of $0.25 per share to shareholders, a 9% increase from the prior year quarterly dividend payment.

In the quarter ended March 31, 2009, we repurchased 75,000 shares on the open market at a cost of $2 million or $26.22 per share. In the quarter ended March 31, 2008, we repurchased 0.7 million shares at a cost of $30 million or $42.11 per share.

We continue to generate strong operating cash flows and our revolving credit facility (the Facility) remains in place. As of March 31, 2009, the drawdown capacity on the multi-year revolver is approximately $310 million. Cash flows from operations and availability under our existing credit facilities are expected to be sufficient to fund our currently anticipated normal capital spending and other expected cash requirements for at least the next eighteen months.

The Facility and 2008 Japanese Yen loan contain the most restrictive covenants requiring us to maintain, at the end of each fiscal quarter, a ratio of net debt for borrowed money to adjusted EBITDA in respect of the previous 12-month period of not more than 3.25 to 1. At March 31, 2009, we were in compliance with all financial and other covenants. At March 31, 2009 our Net Debt/ adjusted EBITDA [(1)] was 2.54 to 1 as defined by the debt agreements.

Failure to comply with the financial and other covenants under these agreements would constitute default and would allow the lenders to accelerate the maturity of all indebtedness under the related agreement. If such acceleration were to occur, we would not have sufficient liquidity available to repay the indebtedness. We would likely have to seek amendments under the agreements for relief from the financial covenants or repay the debt with proceeds from the issuance of new debt or equity, and/or asset sales, if necessary. We may be unable to amend the agreements or raise sufficient capital to repay such obligations in the event the maturities are accelerated.

(1) Adjusted EBITDA and Net Debt, which are non-GAAP measures used for these covenants, are calculated in accordance with the definition in the debt agreements. In this context, these measures are used solely to provide information on the extent to which we are in compliance with debt covenants and may not be comparable to adjusted EBITDA and Net Debt used

by other companies. Reconciliations of adjusted EBITDA to net income and net debt to total debt are as follows:

(In Millions)	*12 Months Ended March 31,* 2009	2008
Net Income	*$220.9*	*$240.3*
Interest expense	*75.6*	*51.4*
Income taxes	*47.1*	*76.2*
Depreciation	*68.9*	*70.6*
Amortization	*6.2*	*10.8*
Specified items	*19.3*	*12.1*
Adjusted EBITDA	*$438.0*	*$461.4*

(In Millions)	*March 31,* 2009	2008
Total Debt	*$1,215.4*	*$1,224.2*
FAS 133 Fair Value Adjustment	*16.4*	*18.4*
Cash and Cash Equivalents	*87.6*	*60.5*
Net Debt	*$1,111.4*	*$1,145.3*

Cautionary Statement Under the Private Securities Litigation Reform Act of 1995

Statements in this Quarterly Report, which are not historical facts or information, are forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based on management s current assumptions, estimates and expectations. Certain of such forward-looking information may be identified by such terms as expect , anticipate , believe , outlook , guidance , and similar terms or variations thereof. All information concerning future revenues, tax rates or benefits, interest and other savings, earnings and other future financial results or financial position, constitutes forward-looking information. Such forward-looking statements involve significant risks, uncertainties and other factors. Actual results of the Company may differ materially from any future results expressed or implied by such forward-looking statements. Such factors include, among others, the following: general economic and business conditions in the Company s markets, especially given the current disruption in global economic conditions, including economic and recessionary pressures; energy and commodity prices; decline in consumer confidence and spending; significant fluctuations in the value of the U.S. dollar; population health and political uncertainties, and the difficulty in projecting the short and long-term effects of global economic conditions; rising interest rates; continued volatility and deterioration of the capital and credit markets, including continued disruption in the commercial paper market, and any adverse impact on our cost of and access to capital and credit; fluctuations in the price, quality and availability of raw materials; the Company s ability to implement its business strategy, including the achievement of anticipated cost savings, profitability and growth targets; the impact of currency fluctuation or devaluation in the Company s principal foreign markets, especially given the current disruptions to such currency markets, and the impact on the availability, effectiveness and cost of the Company s hedging and risk management strategies; the outcome of uncertainties related to litigation; the impact of possible pension funding obligations and increased pension expense on the Company s cash flow and results of operations; and the effect of legal and regulatory proceedings, as well as restrictions imposed on the Company, its operations or its representatives by U.S. and foreign governments. The Company intends its forward-looking statements to speak only as of the time of such statements and does not undertake or plan to update or revise them as more information becomes available or to reflect changes in expectations, assumptions or results.

Any public statements or disclosures by IFF following this report that modify or impact any of the forward-looking statements contained in or accompanying this report will be deemed to modify or supersede such outlook or other forward-looking statements in or accompanying this report.

Non-GAAP Financial Measures

In certain instances we present financial results excluding the effect of the benefit of an insurance recovery and benefits of favorable tax rulings relating to prior years. In addition, in certain instances, we exclude the effects of exchange rate fluctuations when discussing our historical performance. Such information is supplemental to information presented in accordance with GAAP and is not intended to represent a presentation in accordance with GAAP. In discussing our historical and expected future results and financial condition, we believe it is meaningful for investors to be made aware of and to be assisted in a better understanding of, on a period-to-period comparative basis, of financial amounts both including and excluding these identified items, as well as the impact of exchange rate fluctuations on operating results and financial condition. We believe such additional non-GAAP information provides investors with an overall perspective of the period-to-period performance of our core business. In addition, management internally reviews each of these non-GAAP measures to evaluate performance on a comparative period-to-period basis in terms of absolute performance, trends and expected future performance with respect to our core continuing business. A material limitation of these non-GAAP measures is that such measures do not reflect actual GAAP amounts, an insurance recovery is an actual cash recovery and benefits from favorable tax rulings reflect actual accounting and cash benefits realized. We compensate for such limitations by presenting the accompanying reconciliation to the most directly comparable GAAP measure. These non-GAAP measures may not be comparable to similarly titled measures used by other companies.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There are no material changes in market risk from the information provided in the Company s 2008 Annual Report on Form 10-K.

Item 4. Controls and Procedures

Our Chief Executive Officer and Interim Chief Financial Officer, with the assistance of other members of our management, have evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our Chief Executive Officer and Interim Chief Financial

Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this Quarterly Report on Form 10-Q.

We have established controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms and is accumulated and communicated to management, including the principal executive officer and the principal financial officer, to allow timely decisions regarding required disclosure.

Our Chief Executive Officer and Interim Chief Financial Officer have also concluded that there have not been any changes in our internal control over financial reporting during the quarter ended April 3, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes in the risk factors previously disclosed in the Company s 2008 Annual Report on Form 10-K.

Item 1. Legal Proceedings

We are subject to various claims and legal actions in the ordinary course of our business. For purposes of reporting these actions, Bush Boake Allen (BBA), a wholly-owned subsidiary of IFF, and/or IFF are referred to as the Company .

In September 2001, the Company was named as a defendant in a purported class action brought against it in the Circuit Court of Jasper County, Missouri, on behalf of employees of a plant owned and operated by Gilster-Mary Lee Corp. in Jasper, Missouri (Benavides case). The plaintiffs alleged that they sustained respiratory injuries in the workplace due to the use by Gilster-Mary Lee of a BBA and/or IFF flavor.

In January 2004, the Court ruled that class action status was not warranted. As a result of this decision, each of the 47 plaintiff cases was to be tried separately. Subsequently, 8 cases were tried to a verdict, 4 verdicts resulted for the plaintiffs and 4 verdicts resulted for the Company, all of which were appealed by the losing party. Subsequently all plaintiff cases related to the Benavides case, including those on appeal, were settled.

Fifteen actions based on similar claims of alleged respiratory illness due to workplace exposure to flavor ingredients are currently pending against the Company and other flavor suppliers and related companies.

In May 2004, the Company and another flavor supplier were named defendants, and subsequently 14 third and fourth party defendants were added, in a lawsuit by 4 former workers and their spouses at a Ridgeway, Illinois factory in an action brought in the Circuit Court for the Second Judicial Circuit, Gallatin County, Illinois (Barker case), which has been dismissed, and another concerning 5 other workers and 2 spouses at this same plant was filed in July 2004 and is pending in this same Court against the same defendants (Batteese case). In August 2005, the Company and 16 other companies were named defendants in a lawsuit by 3 former employees of the Gilster-Mary Lee facility in McBride, Missouri in the Missouri Circuit Court, 32nd Judicial Circuit (Fults case). In August 2006, the Company and 3 other flavor and chemical suppliers were named defendants in a lawsuit by 34 current and former employees and/or a neighbor of the Gilster-Mary Lee facility in Jasper, Missouri in the Missouri Circuit Court of Jasper County (Arles case) and 5 other current and former employees in the same Court (Bowan case). In November 2006, the Company, 15 other flavor and chemical suppliers, a trade association and a third party defendant company were named defendants in a lawsuit filed in the Circuit Court of Cook County, Illinois by 1 plaintiff allegedly injured by exposure to butter flavor and other substances at various facilities in which he worked (Solis case). This case has been settled.

In January 2007, the Company and another flavor supplier were named defendants in a lawsuit in Hamilton County, Ohio Court of Common Pleas by 102 current and former employees (plus 42 spousal loss of consortium claims) of two separate Marion, Ohio factories (Aldrich case). In June 2007, the Company and another flavor supplier were named defendants in a lawsuit filed in Hamilton County, Ohio Court of Common Pleas by 28 current and former employees (plus 7 spousal loss of consortium claims) of a Marion, Ohio facility (Arnold case). In July 2007, the Company and another flavor

manufacturer were named defendants in a lawsuit filed in Hamilton County, Ohio Court of Common Pleas by 52 current and former workers (plus 17 spousal loss of consortium claims) of two Marion, Ohio facilities (Adamson case). In July 2007, the Company was joined as a defendant in a case filed in June 2005 against 5 companies and a trade association in the 8th Judicial District Court of Montana by the widow of the former owner/operator of a popcorn business in Montana (Yatsko case).

In March 2008, the Company and another flavor supplier were named defendants in two lawsuits in the Hamilton County, Ohio Court of Common Pleas, one by 12 current and former employees and 4 spouses of such employees of a popcorn plant in Marion, Ohio (Ferguson case) and the other by 14 current and former employees and 6 spouses of such employees of the same plant (Brown case). In May 2008, the Company and 8 other companies were named defendants in a lawsuit in the District Court of Colorado by a consumer of microwave popcorn and his spouse (Watson case). In August 2008, the Company and 8 other flavor and material suppliers were named defendants in a lawsuit by 16 plaintiffs (plus 12 loss of consortium claims) in the Hamilton County Court of Common Pleas (Auld case). In September 2008, the Company, 3 other flavor companies and 3 other companies were named defendants in a lawsuit in the U.S. District Court for the Eastern District of Washington by a consumer of microwave popcorn and his spouse (Newkirk case). In September 2008, the Company, another flavor manufacturer and 2 chemical suppliers were named defendants in a lawsuit by 1 plaintiff in the Missouri Circuit Court of Jasper County (Meredith case). In September 2008, the Company, another flavor company and a microwave popcorn manufacturer were named defendants in a lawsuit by 1 plaintiff and her spouse in the Missouri Circuit Court of Jasper County (McNary case). This case has been dismissed. In October 2008, the Company, 2 other flavor compounders, 2 chemical companies, a microwave popcorn manufacturer and a distributor were named defendants in a lawsuit by a consumer of microwave popcorn and her spouse in the Circuit Court of Jackson County, Missouri (Khouri case).

The Company believes that all IFF and BBA flavors at issue in these matters meet the requirements of the U.S. Food and Drug Administration and are safe for handling and use by workers in food manufacturing plants when used according to specified safety procedures. These procedures are detailed in instructions that IFF and BBA provided to all their customers for the safe handling and use of their flavors. It is the responsibility of IFF s customers to ensure that these instructions, which include the use of appropriate engineering controls, such as adequate ventilation, prior handling procedures and respiratory protection for workers, are followed in the workplace.

At each balance sheet date, or more frequently as conditions warrant, the Company reviews the status of each pending claim, as well as its insurance coverage for such claims with due consideration given to potentially applicable deductibles, retentions and reservation of rights under its insurance policies, and the advice of its outside legal counsel and a third party expert in modeling insurance deductible amounts with respect to all of these matters. While the ultimate outcome of any litigation cannot be predicted, management believes that adequate provision has been made with respect to all known claims. Based on information presently available and in light of the merits of its defenses and the availability of insurance, the Company does not expect the outcome of the above cases, singly or in the aggregate, to have a material adverse effect on the Company s financial condition, results of operation or liquidity. There can be no assurance that future events will not require the Company to increase the amount it has accrued for any matter or accrue for a matter that has not been previously accrued. See Note 13 of the Notes to the Consolidated Financial Statements.

Over the past 20 years, various federal and state authorities and private parties have claimed that the Company is a Potentially Responsible Party (PRP) as a generator of waste materials for alleged pollution at a number of waste sites operated by third parties located principally in New Jersey and have sought to recover costs incurred and to be incurred to clean up the sites.

The Company has been identified as a PRP at ten facilities operated by third parties at which investigation and/or remediation activities may be ongoing. The Company analyzes its liability on a regular basis. The Company accrues for environmental liabilities when they are probable and estimable. The Company estimates its share of the total future cost for these sites to be less than $5 million.

While joint and several liability is authorized under federal and state environmental laws, the Company believes the amounts it has paid and anticipates paying in the future for clean-up costs and damages at all sites are not and will not be material to the Company s financial condition, results of operations or liquidity. This conclusion is based upon,

among other things, the involvement of other PRPs at most sites, the status of proceedings, including various settlement agreements and consent decrees, the extended time period over which payments will likely be made and an agreement reached in July 1994 with three of the Company s liability insurers pursuant to which defense costs and indemnity amounts payable by the Company in respect of the sites will be shared by the insurers up to an agreed amount.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

The following table presents the total number of shares purchased during the first quarter of 2009, the average price paid per share, the number of shares that were purchased as part of a publicly announced repurchase program, and the approximate dollar value of shares that still could have been purchased for the quarter ended March 31, 2009:

	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (1)	Approximate Dollar Value of Shares that may yet be purchased under the Program (1)
January 1 31, 2009	0	$ 0	0	$ 268,732,316
February 1 28, 2009	34,000	$26.82	34,000	$ 267,820,596
March 1 31, 2009	41,000	$25.73	41,000	$ 266,765,771
Total shares purchased	75,000	$26.22		

(1) Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program reflects our $750 million share repurchase program less the $450 million purchased under the previously announced accelerated share repurchase (ASR) program and any open market purchases made under the program. The July 2007 repurchase program is also

subject to a 15% limitation, under which we still have the ability to repurchase approximately 2 million shares. There is no stated expiration for the July 2007 share repurchase program.

Item 6. Exhibits

3.1	By-laws of International Flavors & Fragrances Inc. as amended and restated effective as of April 28, 2009, incorporated by reference to Exhibit 3.1 to the Company s Report on Form 8-K filed on February 9, 2009.
10.1	Performance Criteria for 2009 under the Company s Annual Incentive Plan, incorporated by reference to Exhibit 10.1 to the Company s Report on Form 8-K filed on March 13, 2009.
10.2	Performance Criteria for the 2009-2011 cycle under the Company s Long-Term Incentive Plan, incorporated by reference Exhibit 10.2 to the Company s Report on Form 8-K filed on March 13, 2009.
10.3	Compensation arrangements of Kevin Berryman, effective as of May 15, 2009, incorporated by reference to the Company s Report on Form 8-K filed on April 16, 2009.
31.1	Certification of Robert M. Amen pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Richard A. O Leary pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32	Certification of Robert M. Amen and Richard A. O Leary pursuant to 18 U.S.C. Section 1350 as adopted pursuant to the Sarbanes-Oxley Act of 2002.
