Notes to Consolidated Financial Statements (unaudited)

(Expressed in thousands of U.S. dollars, except share and per share information)

1. Basis of preparation and consolidation

These unaudited consolidated financial statements include Validus Holdings, Ltd. and its wholly and majority owned subsidiaries (together, the Company) and have been prepared in accordance with generally accepted accounting principles in the United States of America (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 in Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In addition, the year-end balance sheet data was derived from audited financial statements but does not include all disclosures required by U.S. GAAP. This Quarterly Report should be read in conjunction with the financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010, as filed with the U.S. Securities and Exchange Commission (the SEC).

In the opinion of management, these unaudited consolidated financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the Company's financial position and results of operations as at the end of and for the periods presented. Certain amounts in prior periods have been reclassified to conform to current period presentation. All significant intercompany accounts and transactions have been eliminated. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The major estimates reflected in the Company's consolidated financial statements include the reserve for losses and loss expenses, premium estimates for business written on a line slip or proportional basis, the valuation of goodwill and intangible assets, reinsurance recoverable balances including the provision for unrecoverable reinsurance recoverable balances and investment valuation. Actual results could differ from those estimates. The results of operations for any interim period are not necessarily indicative of the results for a full year. The term ASC used in these notes refers to Accounting Standard Codifications issued by the United States Financial Accounting Standards Board (FASB).

2. Recent accounting pronouncements

In January 2010, the FASB issued authoritative guidance on *Fair Value Measurements and Disclosures* (ASC 820). This update requires additional disclosures regarding the activity within Level 3 fair value measurements, including information on a gross basis for purchases, sales, issuances, and settlements. This guidance is effective for interim and annual reporting periods beginning after December 15, 2010. The adoption of this update has not had a material impact on the Company's consolidated financial statements.

In April 2010, the FASB issued authoritative guidance which clarifies the *Stock Compensation* guidance (ASC 718). This guidance clarifies the accounting for certain employee share-based payment awards. Awards with an exercise price denominated in the currency of a market in which a substantial portion of the entity's equity securities trades would not be considered to contain a condition that is not a market, performance or service condition. Therefore, an entity would not classify such an award as a liability if it otherwise qualifies as equity. This accounting guidance is effective for accounting periods beginning after December 15, 2010. The adoption of this update did not impact the Company's consolidated financial statements.

In July 2010, the FASB issued Accounting Standards Update No. 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* (ASU 2010-20). The objective of ASU 2010-20 is to

Table of Contents**Validus Holdings, Ltd.**

Notes to Consolidated Financial Statements (unaudited)

(Expressed in thousands of U.S. dollars, except share and per share information)

provide financial statement users with greater transparency about an entity's allowance for credit losses and the credit quality of its financing receivables. ASU 2010-20 was effective for interim and annual periods ending on or after December 15, 2010. The adoption of this update did not have a material impact on the Company's consolidated financial statements.

In October 2010, the FASB issued Accounting Standards Update No. 2010-26, *Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts* (ASU 2010-26). The objective of ASU 2010-26 is to address diversity in practice regarding the interpretation of which costs relating to the acquisition of new or renewal insurance contracts qualify for deferral. ASU 2010-26 is effective for interim and annual periods beginning after December 15, 2011 and may be applied prospectively or retrospectively. The Company early adopted this update effective January 1, 2011 and the adoption did not have an impact on the Company's consolidated financial statements.

3. Investments

The Company's investments in fixed maturities are classified as trading and carried at fair value, with related net unrealized gains or losses included in earnings. The Company has adopted all authoritative guidance in effect as of the balance sheet date regarding certain market conditions that allow for fair value measurements that incorporate unobservable inputs where active market transaction based measurements are unavailable.

(a) Classification within the fair value hierarchy

Under U.S. GAAP, a company must determine the appropriate level in the fair value hierarchy for each fair value measurement. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. A significant adjustment to a Level 2 input could result in the Level 2 measurement becoming a Level 3 measurement. Level 3 inputs are unobservable inputs for the asset or liability.

Level 1 primarily consists of financial instruments whose value is based on quoted market prices or alternative indices including overnight repos and commercial paper. Level 2 includes financial instruments that are valued through independent external sources using models or other valuation methodologies. These models are primarily industry-standard models that consider various assumptions, including time value, yield curve, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. The Company performs internal procedures on the valuations received from independent external sources. Financial instruments in this category include U.S. and U.K. Treasuries, sovereign debt, corporate debt, catastrophe bonds, U.S. agency and non-agency mortgage and asset-backed securities and bank loans. Level 3 includes financial instruments that are valued using market approach and income approach valuation techniques. These models incorporate both observable and unobservable inputs. A hedge fund is the only financial instrument in this category as at March 31, 2011.

The Company's management and external investment advisors had noted illiquidity and dislocation in the non-Agency RMBS market for the period September 30, 2008 through to June 30, 2010. During this period, the Company identified certain non-Agency RMBS securities in its portfolio trading in inactive markets (identified RMBS securities). In order to gauge market activity for the identified RMBS securities, the Company, with

Table of Contents**Validus Holdings, Ltd.**

Notes to Consolidated Financial Statements (unaudited)

(Expressed in thousands of U.S. dollars, except share and per share information)

assistance from external investment advisors, reviewed the pricing sources for each security in the portfolio. The Company utilized various pricing vendors to obtain market pricing information for investment securities.

Consistent with U.S. GAAP, market approach fair value measurements for securities trading in inactive markets are not determinative. In weighing the fair value measurements resulting from market approach and income approach valuation techniques, the Company previously placed less reliance on the market approach fair value measurements. The income approach valuation technique determines the fair value of each security on the basis of contractual cash flows, discounted using a risk-adjusted discount rate. As the income approach valuation technique incorporates both observable and significant unobservable inputs, the securities were included as Level 3 assets with respect to the fair value hierarchy. The foundation for the income approach was the amount and timing of future cash flows.

During the three month period ended September 30, 2010, the Company, with assistance from external investment advisors, determined that market activity had increased for the identified RMBS securities. Therefore, a market approach valuation technique was adopted for the identified RMBS securities. Because the market approach incorporates observable inputs, the identified RMBS securities are classified as Level 2 with respect to the fair value hierarchy at September 30, 2010. During the three months ended December 31, 2010, the Company liquidated substantially all of the identified RMBS securities which had previously been classified as Level 3 securities.

Other investments consist of an investment in a fund of hedge funds and a deferred compensation trust held in mutual funds. The fund of hedge funds is a side pocket valued at \$10,713 at March 31, 2011. While a redemption request has been submitted, the timing of receipt of proceeds on the side pocket is unknown. The fund investment manager provides monthly reported net asset values (NAV) with a one-month delay in its valuation. As a result, the fund investment manager's February 28, 2011 NAV was used as a partial basis for fair value measurement in the Company's March 31, 2011 balance sheet. The fund investment manager's NAV relies on an estimate of the performance of the fund based on the month end positions from the underlying third-party funds. The Company utilizes the fund investment manager's primary market approach estimated NAV that incorporates relevant valuation sources on a timely basis. As this valuation technique incorporates both observable and significant unobservable inputs, the fund of hedge funds is classified as a Level 3 asset. To determine the reasonableness of the estimated NAV, the Company assesses the variance between the estimated NAV and the one-month delayed fund investment manager's NAV. Immaterial variances are recorded in the following reporting period.

At March 31, 2011, the Company's investments were allocated between Levels 1, 2 and 3 as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|---|----------------|----------------|----------------|--------------|

The Company has a five year, \$500,000 secured letter of credit facility provided by a syndicate of commercial banks. At March 31, 2011, approximately \$285,048 (December 31, 2010: \$268,944) of letters of credit were issued and outstanding under this facility for which \$348,182 of investments were pledged as collateral (December 31, 2010: \$325,532). In 2007, the Company entered into a \$100,000 standby letter of credit facility which provides Funds at Lloyd's (the Talbot FAL Facility). On November 19, 2009, the Company entered into a Second Amendment to the Talbot FAL Facility to reduce the commitment from \$100,000 to \$25,000. At March 31, 2011, \$25,000 (December 31, 2010: \$25,000) of letters of credit were issued and outstanding under the Talbot FAL Facility for which \$45,278 of investments were pledged as collateral (December 31, 2010: \$45,504). In addition, \$1,810,402 of investments were held in trust at March 31, 2011 (December 31, 2010: \$1,729,631). Of those, \$1,553,756 were held in trust for the benefit of Talbot's cedants and policyholders, and to facilitate the accreditation of Talbot as an alien insurer/reinsurer by certain regulators (December 31, 2010: \$1,489,243).

The Company assumed two letters of credit facilities as part of the acquisition of IPC Holdings, Ltd. (IPC) and such acquisition, the IPC Acquisition. A Credit Facility between IPC, IPCRe Limited, the Lenders party thereto and Wachovia Bank, National Association (the IPC Syndicated Facility) and a Letters of Credit Master Agreement between Citibank N.A. and IPCRe Limited (the IPC Bi-Lateral Facility). At March 31, 2010, the IPC Syndicated Facility was closed. At March 31, 2011, the IPC Bi-Lateral Facility had \$64,368 (December 31, 2010: \$68,063) letters of credit issued and outstanding for which \$105,771 (December 31, 2010: \$105,310) of investments were held in an associated collateral account.

(d) Securities lending

The Company participates in a securities lending program whereby certain securities from its portfolio are loaned to third parties for short periods of time through a lending agent. The Company retains all economic interest in the securities it lends and receives a fee from the borrower for the temporary use of the securities. Collateral in the form of cash, government securities and letters of credit is required at a rate of 102% of the market value of the loaned securities and is held by a third party. As at March 31, 2011, the Company had \$33,407 (December 31, 2010: \$22,566) in securities on loan. During the three months ended March 31, 2011, the Company recorded a \$30 unrealized gain on this collateral in its Statements of Operations (March 31, 2010: unrealized loss \$1,014).

Securities lending collateral reinvested includes corporate floating rate securities and overnight repo with an average reset period of 4.0 days (December 31, 2010: 17.6 days). As at March 31, 2011, the securities lending collateral reinvested by the Company in connection with its securities lending program was allocated between Levels 1, 2 and 3 as follows:

4. Derivative Instruments Used in Hedging Activities

The Company enters into derivative instruments for risk management purposes, specifically to economically hedge unmatched foreign currency exposures. During the three months ended March 31, 2011, the Company entered into foreign currency forward exchange contracts to mitigate the risk of fluctuations in the Euro and Australian dollar to U.S. dollar rates. During the year ended December 31, 2010, the Company entered into a foreign currency forward contract to mitigate the risk of foreign currency exposure of unpaid losses denominated in Chilean Pesos (CLP). The CLP foreign currency forward contract was renewed during the three months ended March 31, 2011. The following table summarizes information on the location and amount of the derivative fair value on the consolidated balance sheet at March 31, 2011:

| | Notional Amount | Asset Derivatives Balance Sheet | | Liability Derivatives Balance Sheet | |
|--|--------------------|---------------------------------------|---------------|--|---------------|
| | | location Other assets | Fair value | location Other liabilities | Fair value |
| Derivatives designated as hedging instruments: | | | | | |
| Foreign exchange contracts | \$ 70,416 | | \$ 551 | | \$ 843 |

The following table summarizes information on the location and amount of the derivative fair value on the consolidated balance sheet at December 31, 2010:

| | Notional Amount | Asset Derivatives Balance Sheet | | Liability Derivatives Balance Sheet | |
|--|--------------------|---------------------------------------|---------------|--|---------------|
| | | location Other assets | Fair value | location Other liabilities | Fair value |

(a) Classification within the fair value hierarchy

As described in Note 3 Investments under U.S. GAAP, a company must determine the appropriate level in the fair value hierarchy for each fair value measurement. We estimate the fair value for these asset derivatives using a valuation obtained from an independent external source. The assumptions used within the valuation are observable in the marketplace, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. Accordingly, these derivatives were classified within Level 2 of the fair value hierarchy.

(b) Derivative instruments designated as a fair value hedge

The Company designates its derivative instruments as fair value hedges and formally and contemporaneously documents all relationships between the hedging instruments and hedged items and links the hedging derivatives to specific assets and liabilities. The Company assesses the effectiveness of the hedges, both at inception and on an on-going basis and determines whether the hedges are highly effective in offsetting changes in fair value of the linked hedged items.

Notes to Consolidated Financial Statements (unaudited)

(Expressed in thousands of U.S. dollars, except share and per share information)

The following table provides the total impact on earnings relating to the derivative instruments formally designated as fair value hedges along with the impact of the related hedged items for the three months ended March 31, 2011:

| | Three months ended March 31, 2011 | | |
|---|--------------------------------------|--|---|
| | Amount of Gain (Loss) on Hedged Item | Amount of Gain (Loss) on Recognized Income in Derivative | Amount of Gain (Loss) on Recognized Income to Risk Being Hedged (Ineffective Portion) |
| Derivatives designated as fair value hedges and related hedged item: | | | |
| Foreign exchange | Foreign exchange (losses) gains | \$ (3,822) | \$ 3,822 |

There was no derivative activity for the three months ended March 31, 2010.

5. Reserve for losses and loss expenses

Reserves for losses and loss expenses are based in part upon the estimation of case losses reported from brokers, insureds and ceding companies. The Company also uses statistical and actuarial methods to estimate ultimate expected losses and loss expenses. The period of time from the occurrence of a loss, the reporting of a loss to the Company and the settlement of the Company's liability may be several months or years. During this period, additional facts and trends may be revealed. As these factors become apparent, case reserves will be adjusted, sometimes requiring an increase or decrease in the overall reserves of the Company, and at other times requiring a reallocation of incurred but not reported reserves to specific case reserves.
