PART I

This Annual Report on Form 10-K, the documents incorporated by reference into the Company's Annual Report to shareholders, and press releases (as well as oral statements and other written statements made or to be made by the Company) contain forward-looking statements that are made pursuant to the provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements related to potential future acquisitions and our strategy and plans for our business contained in Item 1 Business, Item 2 Properties, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations, and other parts of this Annual Report. Such forward-looking statements are based on our current expectations, estimates and projections about our industry, management's beliefs, and certain assumptions made by our management. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict; therefore, actual results may differ materially from those expressed or forecasted in any such forward-looking statements. Such risks and uncertainties include those set forth in this Annual Report under Factors That May Affect Operating Results, as well as those noted in the documents incorporated by reference into this Annual Report. You are cautioned not to place undue reliance on these forward looking statements, which speak only as of the date on which they were made. Unless required by law, we undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. However, readers should carefully review the risk factors set forth in other reports or documents we file from time to time with the Securities and Exchange Commission, particularly the Quarterly Reports on Form 10-Q and any Current Reports on Form 8-K.

ITEM 1. Business

Company Profile

infoUSA Inc. (the Company or infoUSA) creates the finest proprietary databases of nearly 14 million businesses and 220 million consumers in the United States and Canada compiled and updated under one roof in Omaha, Nebraska. These databases are compiled from thousands of public sources. We believe our databases are the most content rich in the industry. In order to improve the quality of our databases, we make over 17 million phone calls per year to gather additional content and verify existing information. We maintain a staff of approximately 500 full-time employees in Omaha to manage the database. The data content changes by nearly 70 percent every year, which includes change of address, phone number, SIC code and other data within a record. Customers return to us to purchase updated products to continually update their databases. Recurring revenue is a major component of our revenue and accounts for approximately two-thirds of our annual sales.

More than 4 million customers have used our information in the form of sales leads, prospect lists, mailing labels, printed directories, 3 x 5 cards, computer diskettes, business credit reports, consumer products and on the Internet. Our information is used by businesses for sales leads, mailing lists, credit decisions, market research, competitive analysis and managing vendor relationships. Consumers use our information for travel planning, job searches, and due diligence among other things. During 2001 and 2002, the Company launched two new proprietary technologies, infoConnect^{DM} ONE PASS and Customer Analyzer and Prospect BuilderTM. infoConnect^{DM} ONE PASS is an Internet driven data hygiene and enhancement software that was developed to cleanse our customer's house files by matching their databases against our databases online. Customer Analyzer and Prospect BuilderTM analyzes the customer base of our clients and delivers prospects that have similar characteristics. infoUSA is the industry's dominant provider of both business and consumer information, offering databases of 220 million consumers and 14 million businesses for endless customer applications.

Business Strategy

There are approximately 14 million businesses in the United States and Canada. All of these businesses are looking for cost effective solutions to find new customers and increase their sales, especially during the slow economy.

Our goal is to be the leader in proprietary databases of businesses and consumers in the United States and Canada, and to produce innovative products and services that meet the needs of these 14 million businesses for finding new prospects and increasing their sales. The information provided by our databases is integral to the decision-making process for businesses. Our organization is divided into three distinct groups: Database Compilation and Update Group, Small & Medium Business Group and Large Business Customer Group. Additionally, we utilize the Internet for distribution of our proprietary content and business credit reports. We believe the Internet complements our core business and in the future will be a dominant distribution channel. This expands our marketplace by allowing small businesses and consumers worldwide to access our databases and to purchase information with more frequency.

Table of Contents

The Company's introduction of *infoConnect* and Customer Analyzer and Prospect Builder is targeted toward salespeople and small business owners. These Internet based technologies will help to find new prospects and grow sales at a fraction of the cost of existing prospecting methods, such as trade shows, print advertising, billboards and television and radio advertising.

Database Compilation and Update Group

In 2002 we focused on creating the freshest, most up-to-date information, while expanding our core coverage and adding depth to our proprietary databases. We believe that we are the premier provider of databases of both businesses and consumers compiled and updated under one roof. We use thousands of sources and hundreds of proprietary processes developed over the last thirty years to compile and enhance our databases. We employ nearly 500 people, and spend over \$50 million annually to create, maintain, enhance and deliver our databases.

Business Database. Our proprietary business database contains information on nearly 14 million businesses in the United States and Canada. The database contains a wealth of information about businesses such as: **name, address, phone number, SIC codes, number of employees, business owner and key executive names, credit score and sales volume.** We also **provide fax and toll free numbers, website addresses, headline news, and public filings** including liens, judgments and bankruptcies. Our data can be categorized in various segments such as Small Business Owners, Executives at Home, Big Businesses and their Corporate Affiliations, Growing Businesses, and Female Business Owners. Additionally, vertical industry data segments are created such as Physicians and Surgeons, Schools, Restaurants, Places of Interest, Churches, and Government Offices.

We compile the business information from over 15,000 sources. Sources such as the yellow pages are used to identify businesses for inclusion in the database. As an innovative industry leader in database compilation, we now include utility service connects and disconnects in our database. This information allows us to provide our customers with the freshest, most accurate data available in the industry, as we are now able to identify new and out of business records much more quickly. Other sources, such as primary telephone research surveys, are used to enhance the database with key data elements like names of executives, primary SIC code, number of employees, fax numbers and Internet addresses. Additional sources, such as annual reports, SEC filings and public filings, are used to update the database with liens, judgments, bankruptcies, headline news, commercial debtor data, changes in leadership, address changes, corporate affiliation changes, and the like. In addition, we use information licensed from the United States Postal Service's National Change of Address (NCOA) and Delivery Sequence File (DSF) to update and maintain our business database. Accuracy is the most important characteristic of any database and our database is approximately 95% accurate at any given time. This is the highest degree of accuracy in the industry.

Consumer Database. With the acquisition of Donnelley Marketing, we gained over 85 years of consumer database compilation technology and proprietary models. We built upon this foundation to create the most comprehensive and accurate consumer database in the industry. Key elements in our database include **name, address, phone number, age, income, marital status, presence of children, active bank card, religion, ethnicity, dwelling type and size, home value, length of residence, vehicle data, and dozens of self-reported behavioral and lifestyle elements.**

The foundation of the consumer database begins with the compilation of all households listed in telephone directories and other public sources such as real estate records. This core data source is compiled with the highest accuracy standards in the industry. The white page file is then enhanced with nearly 2 billion records from public sources and proprietary third parties to add individuals not listed in the telephone directories and to further enhance the records with demographic and psychographic data required to segment consumer prospects. In addition, our investment into a new, nationwide source of utility new connects and disconnects allowed us to identify new movers and homeowners as they transact with utility services and to update our core consumer file with the most recent information available. The end result is a database of 220 million consumers, 115 million households, and 55 million homeowners. In addition, we offer other specialty consumer files including: New Homeowners, New Movers, Occupant Addresses, Bankruptcies, Tax Liens and Judgments.

Our e-Shareforce database is comprised of self-reported psychographic and demographic information collected via electronic surveys over the Internet. Information obtained through the Internet is timely, less expensive and the respondents have all provided the information voluntarily. Respondents to the e-survey provide information regarding purchase intention and habits, lifestyle characteristics and product usage. The e-Shareforce database consists of over 13 million households. Our marketing material has expanded our e-Shareforce brand to include many of our other business and consumer niche databases as well.

Our Mastermatch file is the largest, most comprehensive multi-sourced consumer enhancement tool for appending consumer data to our client's customer databases at both a household and individual level. This database allows customers to achieve the highest match rates possible for database enhancement purposes.

Table of Contents

Email Marketing. In 2002, we made great strides in the collection and acquisition of opt-in business and consumer email addresses. We now offer a file of over 40 million consumer emails and 1.2 million business emails with postal addresses that are available for email marketing and email append applications. We have matched the emails to the demographic and firmographic information in our proprietary databases, to create highly targeted niches for email marketing.

Products and Services Derived from the Database

We create many products and services from our database to meet the needs of millions of potential customers. From our databases of 14 million businesses in the United States and Canada and 220 million consumers in the United States we produce products such as prospect lists, mailing labels, 3 x 5 cards, diskettes, printed directories, consumer products, business credit reports, and many other products and services. We also offer our information on the Internet through our various websites, such as infoUSA.com, BusinessCreditUSA.com, CityDirectory.com, Drlists.com, referenceUSA.com, newleadsUSA.com and autolistsUSA.com. Our products and data processing services are used by clients identifying and qualifying prospective customers, initiating direct mail campaigns, telemarketing, analyzing and assessing market potential, monitoring the effectiveness of marketing efforts and surveying competitive markets in order to find new customers and increase their sales at low costs. We are organized around two main customer groups: the Small & Medium Business Group and the Large Business Customers Group. Our products and services are designed for the unique needs of each group.

Our Customers and Potential Markets

Small & Medium Business Group

Approximately 60% of all businesses are small companies with less than 5 employees. Small businesses are the lifeblood of our company and are often ignored by our competitors. We dedicated this division to meet the unique sales and marketing needs of small- and medium-sized businesses, including small office and home office businesses, and aspiring entrepreneurs. This market holds about 6 million potential prospects for infoUSA. Our products and services are used to find new customers, analyze current customers, research new markets and verify business information. Our database changes by nearly 70% annually. As a result, our customers have a great need for current information. Our Small & Medium Business Group offers sales leads and mailing lists in the following formats:

Printed Prospect Lists, Mailing Labels, and Sales Lead Cards. The Company's database can be sliced and diced to create customized sales lead and mailing lists for our customers. Our small business consultants work with a business to select the right criteria such as geography, type of business and size of business to generate the most revenue. The custom list can then be delivered in printed format, put on mailing labels or provided on 3 x 5 index cards.

Diskette / CD / DVD Products. Many businesses prefer the flexibility of getting their list electronically so they can import the data into any software application. Customers have the flexibility of ordering their list on disk, DVD, CD, or downloading it from an FTP site.

Sales Leads on the Internet. Our customers can buy all of our databases on the Internet at infoUSA.com, 24 hours a day, 7 days a week. Our site allows businesses to search our database by any number of variables, retrieve a count of the number of businesses in a particular market, or obtain a credit report on a particular company.

Business-to-Business Sales & Marketing Directories - Printed, CD-ROM and Internet access. The Company offers a variety of titles: US Business Directory, State Business Directories, Big Business Directory, Manufacturers Directory, 575,000 Physicians and Surgeons, Households USA, and Entrepreneurs Directory. Each printed directory is bundled with a CD-ROM or DVD and allows for access to the information on the Internet, for one low price. Our customers use the directories for lead generation, telemarketing and reference purposes.

Business Credit Directories and Reports. Our business credit directories include a printed directory bundled with a CD-ROM or DVD and access to Business Credit Reports on BusinessCreditUSA.com. The product is used by customers for making credit decisions, verifying company information, assisting in collection support, and identifying potential new customers. Customers can purchase individual business credit reports for \$5 from the Internet or they may select a subscription based plan.

Customer Analyzer and Prospect Builder. Our research and development efforts over the last two years are now bearing fruit. On infoUSA.com we offer small businesses an easy and affordable way to analyze their current customers.

Table of Contents

We find the common qualities and then locate prospects that match these characteristics. The biggest challenge of most small businesses is finding the right new prospects. Our tool makes it fast and simple. Small businesses that can't afford the luxury of high-dollar research and weeks of analysis can now go online and have a list of prospects in less than an hour.

Polk Directories. Since 1870, The Polk City Directory® has been the trusted brand for providing residential, demographic, and business data information to small and medium businesses across the United States. Annually, over 900 versions of the directory are produced and delivered in hard cover book and CD-ROM format. Sales of these products are generated from the 200 plus field sales representatives, 20 plus telemarketing sales representatives, and on-going direct mail programs. Polk Directories' 110,000 customers cover a wide range of industries including service, financial, and retail businesses.

The Polk City Directory® consists of seven directories in one, designed to help businesses save time by planning sales calls efficiently, saving money by reducing undeliverable mail, and increasing sales by identifying prospects.

InfoTYME®, our CD-ROM version of The Polk City Directory®, allows the customer to quickly search and select prospects, download prospect records into other applications for lead generation programs, and produce labels for telemarketing or direct mail campaigns.

infoUSA acquired Polk Directories in the fourth quarter of 2001. Polk Directories provides us with another major channel for the sales and distribution of related *infoUSA* directory and list services products. We plan to offer Internet access and more directories in more cities to our subscribers.

Hill-Donnelly Directories. During 2002, *infoUSA* acquired Hill-Donnelly, the nation's original publisher of Cross-Reference Directories. Hill-Donnelly, founded in 1917, offers Cross-Reference Directories in over 300 metro markets totaling more than 40 million listings. Cross-Reference Directories may be searched by telephone number or by street address (e.g. cross-reference directories).

Consumer & Small Office -Home Office Markets Products. The Company's CD-ROM Retail division includes popular business and consumer titles such as Select Phone, PowerFinder, Directory Assistance USA, Caller ID, Yellow Pages USA, Streets USA and Business Credit Ratings USA. These products are sold at over 5,000 retail outlets in North America, including Office Depot, Staples, CompUSA, Fry's Electronics, Electronics Boutique, Micro Center and Future Shop. Consumers and small business owners use these products to develop targeted direct mail campaigns, directory assistance, job search, travel planning, sales leads and general reference purposes. The retail products come in the form of a DVD/CD and are currently priced between \$9.95 and \$119.00.

The retail channel is an excellent vehicle to build awareness and sales of *infoUSA* products. These retail products encourage a one-time purchase with the goal of registering the customer for an annual subscription. It is also an excellent way to cross-sell the many other *InfoUSA* products and services.

Large Business Customer Group

Our Large Business Customer Group is comprised of Donnelley Marketing, Walter Karl and the *infoUSA* Database Licensing Group.

Donnelley Marketing is one of the nation's leading direct marketing solution providers, targeting medium and large size firms where quality data and customer service count. Our mission is to help businesses find new customers, grow their sales, reduce selling costs and become more profitable. Donnelley's reputation has been built by delivering consistent results to clients for 85 years.

Donnelley Marketing serves a variety of industries including traditional direct marketers, packaged goods, retailers, financial institutions, telecommunications, utilities, technology, fund raising, automotive and catalog companies. Donnelley Marketing maintains over 300 marketing databases, processes over 50 billion records annually, creates 200 custom models each year and delivers personalized care to more than 2,000 customers.

Our goal in 2002 was to increase client access to our databases and data processing services while reducing turnaround time and lowering costs. We were pleased to increase the revenue of *infoConnect*™ ONE PASS, which was introduced last year. *infoConnect*™ ONE PASS is an Internet driven software that performs data cleansing and enhancement services online. In the past, customers sent their tapes to us and we would match those tapes against our databases and send them back to the customers in days or weeks. Now, they can do it online, 24 hours a day, seven days

Table of Contents

a week. Not only does it save our customers money, but also our fulfillment costs are lower. We are in the process of transitioning our clients to a recurring revenue model through this automated system. This offering is attractive to large, medium and small organizations.

infoConnect^{DM} ONE PASS provides online, real-time data enhancement and file cleansing access to the following databases:

220 Million National Consumer Database the industry's largest and most comprehensive consumer database.

14 Million National Business Database the world's finest business content.

15 Million National Privacy Database provides marketers with the ability to eliminate people who will not respond to their offer.

All Major USPS Data Hygiene Databases Donnelley Marketing licenses all five of the major United State Postal Service data hygiene databases.

2002 also proved to be a highly successful year for our client marketing database unit. *MarketZone Analytics*, a closed loop, Internet enabled, fully relational database tool for decision support, campaign management and execution system, was introduced to provide our clients the ability to expertly manage their customer relationships. This new product is an e-CRM (customer relationship management) solution that integrates the entire suite of Donnelley Marketing products to create real-time customer content integration.

*CatalogVision*TM, a division of Donnelley Marketing, has been specializing in the catalog marketing industry for over 30 years serving both business-to-business and consumer direct marketers. *CatalogVision*TM clients maximize the return on their promotion dollars through use of our information and processing services. Address integrity and merge/purge toolsets eliminate wasted mailings and optimize postal discounts. Relational marketing database systems enable multichannel contact management and personalization.

Walter Karl, a division of Donnelley Marketing, provides list brokerage, list management services and an array of database services to a broad range of direct marketing clients. Walter Karl also specializes in email list management and brokerage services for on-line marketers. Our specialized list management services provide a strong revenue base for our customers. In addition, we have our list brokerage business, which recommends and sells specialty lists to a wide range of businesses in many industries.

The *infoUSA* Database Licensing Group continued its strategy of working with customers for whom data remains the core foundation of their product or service. The strength of our customers' products is predicated on the accuracy, timeliness, and relevance of the data that drives it. Our distribution channel of Value Added Resellers and Original Equipment Manufacturers understand that the success and profitability of their service is largely dependent on the integration of *infoUSA*'s best-in-breed business and consumer information.

The Database Licensing Group has customers that use the data in a variety of verticals, all which are unique in their integration of the database. In 2002, we re-organized the team to better reflect our customers' unique needs and to respond to their database concerns. A new layer of account representatives was added to proactively service our customers, and sales employees with specific vertical expertise were deployed in strategic geographic markets. These changes were made to reflect our customers' distinctive needs, and to gain a better foothold in the Directory Assistance, Risk Management, and CRM marketplaces.

In 2002 the Database Licensing Group also focused itself on maintaining and expanding its relationships with some of the most recognizable brands in the Internet, including AOL, Yahoo!, and Microsoft. Furthermore, we increased our market share in Directory Assistance, Risk Management, and Navigation spaces.

Most significant in 2002 was the announcement of our multi-year relationship with the Microsoft Small Business Group. *infoUSA* has licensed its Business Database for delivery through the Microsoft bCentral online marketplace. Small business users will be able to use *infoUSA* data through the Microsoft bCentral solution for lead generation, prospect marketing, and sales lead management. Further integration of the *infoUSA* database suite will occur in the second half of 2003.

Also of note in 2002 was the Database Licensing Group continued success in the Vehicular Navigation System market. *infoUSA* has relationships with the OEM providers of navigation systems for select General Motors, Lexis, Mercedes, and Acura vehicles, among others, for access to on-demand point-of-interest (POI) information. The leaders

Table of Contents

of this market all rely on infoUSA to provide the highest quality POI and emergency services information. When a driver of one of these vehicles search for a gas station, restaurant, or other service, infoUSA data powers the response.

infoUSA's databases impact every aspect of our customer's business. From enterprise partnerships to direct consumer access, infoUSA provides a quality foundation to our partner's database applications.

During 2002, infoUSA acquired ClickAction. ClickAction has developed a customer acquisition and retention solution designed for direct marketers, publishers and organizations that want to grow their customer database, develop personalized relationships with these customers and execute more effective email marketing campaigns. ClickAction provides an email marketing solution that expertly combines acquisition and retention strategies along with applied educational programs to deliver high returns on investment and strong overall results.

Distribution Channels

We sell our products and services through direct mail, telemarketing and a large team of Account Executives. We also sell through value added resellers and various websites, such as infoUSA.com, ListBazaar.com, CityDirectory.com, ReferenceUSA.com, DirectoriesUSA.com and BusinessCreditUSA.com. Our sales channels vary widely by product line. We currently employ over 650 sales executives who work with our customers.

Internet Strategy

The Company views the Internet as a dominant and important distribution channel for its information in the future. As the owner of the databases, infoUSA is uniquely able to use its content to exploit this channel. We use many website addresses to sell our products and services: infoUSA.com, ListBazaar.com, CityDirectory.com, ReferenceUSA.com, DirectoriesUSA.com and BusinessCreditUSA.com to name a few.

infoUSA.com is actively making all of its content available via internet. To date, the following databases are available: 14 million business database, 115 million households database, doctors and dentists database, monthly new business database and new home owners and new movers database.

During 2002, the Company launched a revolutionary software called Customer Analyzer and Prospect Builder™. This Internet based tool will help small business owners and salespeople find prospects just like their current customers. This proprietary software developed by the Company takes the guesswork out of finding new prospects. Our client sends the phone numbers of its existing customers to the Customer Analyzer and Prospect Builder™ software. The software matches the phone numbers of the customers to infoUSA's business database of 14 million businesses and 220 million consumers. The business customers are analyzed by modeling software that takes into account number of employees, sales volume, credit rating code, years in business etc. The consumer customers are analyzed by such factors as age, income, home value and other characteristics. At the completion of the analysis the customer can see their prospects on the Internet and choose prospective customers by any zip code, city, state or county. They can preview the names and cherry pick only the prospects they want and save the rest for later. The software also suppresses their existing customers.

infoConnect^{DM} ONE PASS is a state-of-the-art, scalable, on-line, real-time system enabling clients to integrate data from multiple touch points across their enterprise. infoConnect presents an evolution in customer integration and sets a new standard in delivering speed, accuracy, and customer information management.

We have websites for all our divisions to sell their products and the products of other divisions on the Internet. We are sending approximately 4 million e-mails per month to advertise our web sites.

We have advanced our development as e-infomediary by using the Internet as a valuable tool for data compilation as well as distribution. We have introduced Internet opt-in consumer surveys, where consumers can volunteer lifestyle and buyer behavior that can be used to assist web marketers in targeting advertising to best meet their needs. The opt-in feature also allows us to match online and offline data to form a complete profile of consumer purchase intentions and decisions. This self-reported survey information can be obtained on the Internet with more speed, greater accuracy and at lower cost than mail-based surveys. In this way, we intend to use the Internet to increase productivity, reduce data compilation costs and obtain more relevant real-time information in the database. As with the consumer surveys, we are adding self-reported options to the infoUSA.com site in order to enhance our database with more unique and valuable information. For example, businesses will be able to update their own database information online, adding content such as names, titles and e-mail addresses of executives, as well as other demographics.

Table of Contents

Computer Operations and Database Protection

The Company currently operates four interdependent data centers located in Omaha, Nebraska; Papillion, Nebraska; Carter Lake, Iowa; and Greenwich, Connecticut. Together these sites host the core product offerings that are infoUSA. The Company contracts all mainframe data processing functions through (i)Structure, a subsidiary of Level3, headquartered in Omaha, Nebraska.

The Company's current initiative is the construction of an N+1 central data center in Carter Lake, Iowa resulting in the elimination of the Greenwich, Connecticut data center. This initiative is expected to consolidate select hardware and services into a protected facility providing fault tolerance and greater control over business operations and business resumption. Business continuity will be assured through our use of the enhanced Carter Lake facility and the remaining Ralston and Papillion data center locations along with our partnered mainframe processor (i)Structure.

Given the new initiative, with minimal effort the Company will be able to reestablish administrative functions, sales and marketing operations, data delivery and limited product order fulfillment at any combination of the unaffected data center locations.

Currently, the Omaha Data Center supports our sales order entry systems, contact management system, several Internet website systems, electronic data delivery systems, company enterprise systems (e.g. email, file/print servers) and accounting systems.

Sales Order Entry and accounting systems run on an IBM AS/400 model 820 P30 Series and two SUN UNIX machines. Contact Management is loaded on a SUN E3500 system.

The Internet websites reside on approximately 18 SUN E420-E250-E220 model servers and 13 DELL 2650 and 4600 servers.

Electronic data delivery systems run on 5 SUN units 3 E4500's, 2 E3500's and 1 SUN E6000 server.

Enterprise systems are driven by DELL 6600 servers running Microsoft NT.

This center is also the central node for the Local and Wide Area Network connectivity for desktop computers and application servers. Data communications have been enhanced by the installation of the Qwest Self Healing Network Service.

WAN connectivity is achieved through 6 Meg of X.25 FRAME service.

Data connectivity is facilitated through an ATM OC3 pipe integrated in our OC48 Self Healing Network between the Omaha Papillion Carter Lake facilities. Internet access is established through Tier 1 services of AT&T and Qwest at 12 Megs each.

This center also houses a Nortel Option 81C PBX for telephone and ACD Sales call center services within the facility. WorldCom and Qwest provide primary long distance and local dial tone service over the Self Healing Network.

The Omaha data center is protected by a chemical fire suppression system and a battery UPS backup system. Business and financial data is backed up daily and transferred to an off-site storage facility.

Our Papillion Data Center contains the data compilation systems, enterprise support systems, and software development platforms.

The business database compilation process operates on an IBM AS/400 Model 640 P40 Series 4-Way in conjunction with 5 SUN units, 3 ULTRA 60 and 2 ULTRA 5 systems to support the Davox predictive dialing program.

Software development and testing is done on a mixture of three other IBM AS/400s, a Model640 P40, a Model 530 P40, and a Model S20 P10.

The consumer database compilation process utilizes several DELL servers running Microsoft Windows 2000. Enterprise systems are run on large-scale servers running Microsoft NT.

Network services to desktop computers and terminals and other data centers are supported in this center.

Like the Omaha center, this center also contains a Nortel Option 81C PBX with dial tone services provided by WorldCom and Qwest across the Self Healing Network.

A chemical fire suppression system, UPS battery backup system, and a diesel generator insure protected operations at the Papillion center. Critical data is backed up daily and stored off-site. This facility is staffed with a team of over 80 Information Technology professionals.

Table of Contents

The Carter Lake Data Center is home to the business and consumer order fulfillment systems.

An IBM AS/400 model 740 P50 Series 8-Way, a myriad of DELL servers running Microsoft Windows NT and SUN E3500 and 250 systems, provide order fulfillment services.

Various high-end printers, CDROM, magnetic tape, and diskette devices are used to produce the customer's product.

A Nortel Option 11C PBX provides facility telephone services. All communications, data and voice ride the Self Healing Network.

The Carter Lake center is protected by a chemical fire suppression system and an UPS battery backup system. Data is backed up daily and stored off-site. This facility is staffed by 20 production, operations, and shipping professionals.

The Greenwich data center supports Donnelley Marketing for the receipt of customer files and the creation of all customer outputs. Donnelley Marketing has entered into a computer services agreement with (i)Structure to outsource all of its mainframe processing. (i)Structure provides Donnelley a secure processing environment and state-of-the-art facilities infrastructure with a dedicated mainframe, disk storage, and a combination of virtual, silo, and manual tape. (i)Structure is considered one of the premier mainframe outsourcers in the industry. They focus heavily on providing superior customer service and maintaining a high level of security. This relationship will transition to the new Carter Lake facility.

Mainframe hardware at the Greenwich Data Center utilized for customer file processing is connected to (i)Structure via multiple high speed DS3 data circuits employing CNT channel extender technology. Heavy emphasis is placed on quick turnaround, while maintaining a high level of quality control, to ensure that customer needs are being met.

All product and service fulfillment processes, procedures and hardware utilized at the Greenwich data center have been identified. The best of these identified elements will be brought to Carter Lake and integrated ensuring a seamless transition of products and services.

The Greenwich Data Center houses eight midrange UNIX Servers, five midrange OpenVMS Servers, multiple high-end NT Servers, and a large PC/LAN Network.

A Nortel Option 61C PBX provides telephone services for the facility. The facility also maintains direct connectivity to the Internet via UUNet and a WAN connection to all other Company computer facilities.

All midrange and mainframe class computers are used to service direct marketing needs to large and mid-sized clients, many in the Fortune 500 marketplace. The mainframe is used in every aspect of direct marketing computer services while the mid-range systems are used in a client server or three tiered architecture to house relational database marketing files.

The Greenwich data center is protected by a chemical fire suppression system, a UPS battery backup system and a diesel generator. Data is backed up daily and stored off-site.

Intellectual Property and Other Proprietary Rights

For more than 85 years, Donnelley Marketing, and over the last 30 years, *infoUSA* have developed a lot of processes, software, techniques and models that are unique, sophisticated and proprietary. Our databases are copyrighted, and we depend on trade secret and non-disclosure safeguards for protection of our intellectual property. We distribute our products under agreements that grant customers a license to use our products in the ordinary course of their businesses and contain terms and conditions prohibiting the unauthorized reproduction of our products. In addition, we generally enter into confidentiality agreements with our management and programming staff and limit access to and distribution of our proprietary information. There can be no assurance that the steps taken by us will be adequate to deter misappropriation of our proprietary rights or independent third party development of substantially similar products and technology. We believe, however, that legal protection of our database and software is less significant than the knowledge and experience of our management and personnel, and their ability to develop and market existing and new products and services to millions of customers.

Competition

The business and consumer marketing information industry is highly competitive. We believe that competition in our industry is based on the quality and comprehensiveness of the information provided, the ability to deliver the information in products and formats that the customer needs, the distribution channel and to a lesser extent, on the pricing of information products and services. We also believe that the ability to provide proprietary consumer and business

Table of Contents

databases along with data processing and database marketing services is a key competitive advantage. A number of competitors are active in specific aspects of our business. In business sales lead products and credit report market, we face competition primarily from D & B (e.g. Dun & Bradstreet). D & B relies upon information compiled from its credit database. In consumer sales lead products, we compete primarily with Acxiom, Experian, Equifax and Harte-Hanks Data Technologies, both directly and through reseller networks. In data processing services, we compete primarily with Acxiom, Experian and Harte-Hanks Data Technologies.

Employees

As of December 31, 2002, we employed a total of 2,000 people on a full-time basis. None of our employees is represented by a labor union or is the subject of a collective bargaining agreement. We have never experienced a work stoppage and believe that our employee relations are good.

Executive Officers of the Registrant

The current executive officers of the Company are as follows:

Name	Age	Position
Vinod Gupta	56	Chairman of the Board and Chief Executive Officer
Stormy L. Dean	45	Chief Financial Officer
Scott C. Roberts	37	Corporate Controller
Fred Vakili	49	Executive Vice President of Administration and Chief Administrative Officer
Ray Butkus	51	President, Donnelley Marketing
Allen F. Ambrosino	59	Executive Vice President, Business Development & Cross Selling Opportunities
D. Joseph Thayer	36	President, Small Business Group
Monica Messer	40	Chief Operations Officer, Database Compilation and Technology Group
Edward C. Mallin	53	President, Walter Karl

Vinod Gupta is the founder of the Company and has been Chairman of the Board of the Company since its incorporation in 1972. Mr. Gupta served as Chief Executive Officer of the Company from the time of its incorporation in 1972 until September 1997 and since August 1998. Mr. Gupta holds a B.S. in Engineering from the Indian Institute of Technology, Kharagpur, India, and an M.S. in Engineering and an M.B.A. from the University of Nebraska.

Stormy L. Dean has served as Chief Financial Officer since January 2000. He served as the Corporate Controller from September 1998 until January 2000 and as the acting Chief Financial Officer from January 1999 to August 1999. From August 1995 to September 1998, Mr. Dean served as the Company's Tax Director. Prior to that, Mr. Dean worked in the Tax Department of Peter Kiewit Sons Inc., a construction and telecommunications company, from January 1990 until joining the Company in August 1995. Mr. Dean holds a B.S. in Accounting from the University of Nebraska at Omaha, an M.B.A from the University of Nebraska at Omaha, and a Certified Public Accountant certificate.

Scott C. Roberts has served as Corporate Controller since joining the Company in February 2000. From August 1995 until February 2000, Mr. Roberts was the Controller for the Life Cycle Services division of Inacom Corp, a technology management services company headquartered in Omaha, Nebraska. From May 1991 until August 1995 Mr. Roberts was the Director of Internal Audit for First National of Nebraska, Inc., a multi-billion dollar bank holding company. Mr. Roberts holds a B.S. in Accounting from the University of Nebraska at Omaha and is a Certified Public Accountant (inactive registrant) in the state of Nebraska.

Fred Vakili has served as Executive Vice President of Administration and Chief Administrative Officer since August 1998. Mr. Vakili served as Senior Vice President of Special Projects from October 1997 to August 1998, as Senior Vice President of Value Added-Resellers Group and Canada Operations from May 1987 to October 1997, and as Senior Vice President of various Company divisions from 1985 to 1987. Mr. Vakili joined the Company in 1985 as the Product Manager for the Directory Group. Mr. Vakili holds a B.S. in Industrial Engineering and Management from Iowa State University.

Ray Butkus has served as President of Donnelley Marketing since December 2002. Mr. Butkus previously served as President and Chief Operating Officer of Naviant Marketing Solutions from early 1999 until the successful merger of the Company in late 2001. Mr. Butkus was the Vice President and General Manager for IntelliQuest's IQ2.Net division from January 1998 through August 1999. Mr. Butkus was President and Chief Operating Officer of GEN Logistics Systems, a start-up Cyberspace venture providing information services to the transportation industry, from 1996 to 1997. Mr. Butkus worked for AT&T from 1976 to 1996, most recently as Sales Vice President, where he was responsible for a 700

Edgar Filing: INFOUSA INC - Form 10-K

person sales force and \$650 million in annual revenues. Mr. Butkus holds a B.S. in Business Management from Providence College. Mr. Butkus also holds a MBA from the University of Puget Sound and is a graduate of Harvard Business School's Advanced Management Program.

Table of Contents

Allen F. Ambrosino has served as Executive Vice President of Business Development & Cross Selling Opportunities since December 2002. Mr. Ambrosino served as President of Donnelley Marketing from September 2000 to December 2002, as Executive Vice President of Donnelley Marketing from July 1999 to September 2000, and as President of Database America (DBA) from November 1991 to July 1999. The Company acquired DBA in February 1997. Mr. Ambrosino holds a B.S. in Business Administration from Fairleigh Dickinson University.

D. Joseph Thayer has served as President of the Small Business Group since May 1999, as Senior Vice President from October 1997 to May 1999, and as a Vice President and General Manager since joining the Company in 1993. Prior to that, Mr. Thayer worked for US West, Inc., and as a legislative aide in the U.S. House of Representatives. Mr. Thayer holds a B.A. in Political Science from the University of Nebraska, and an M.B.A. from Auburn University.

Monica Messer has served as President of the Database and Technology Group and Chief Information Officer of the Company since February 1997, and served as a Senior Vice President of the Company from January 1996 to January 1997. Ms. Messer joined the Company in 1983 and has served as a Vice President of the Company since 1985. Ms. Messer holds a B.S. in Business Administration from Bellevue University.

Edward C. Mallin has served as President of Walter Karl since June 1998, as Executive Vice President of the National Accounts Division from January 1997 to June 1998 and as President of Compilers Plus from January 1990 to May 1998. Prior to that, Mr. Mallin was Executive Vice President of Compilers Plus which the Company acquired in January 1990. Mr. Mallin holds a B.A. in History from the University of Bridgeport and an M.A. in Business Administration from New York University.

Website Information

The Company has a website at www.infousa.com. Contents of the website are not part of, or incorporated by this reference, into this Annual Report.

Since November 15, 2002, the Company has made available on its website all annual and quarterly reports, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after the Company has filed such material with, or furnished it to, the SEC.

ITEM 2. Properties

Our headquarters are located in a 148,000 square foot facility in Omaha, Nebraska, where we perform sales and administrative activities. Order fulfillment and shipping is conducted at our 30,000 square foot Carter Lake, Iowa facility, which is located 15 miles from our headquarters. Administration and management are also located in a 24,000 square foot facility in Omaha, Nebraska, which is adjacent to our sales and administration facility. Data compilation, telephone verification, data and product development, and information technology services are conducted at our 130,000 square foot Papillion, Nebraska facility which is located about 5 miles from our headquarters. Donnelley Marketing catalog sales operations are performed in a 40,000 square foot location in Marshfield, Wisconsin. We own these facilities, as well as adjacent land at certain locations for possible future expansion.

In addition, we lease a 69,000 square foot facility in Greenwich, Connecticut which lease expires in October 2003. The Greenwich, Connecticut facility houses various Donnelley Marketing sales and operations functions, and serves as one of our data centers. Donnelley Marketing also leases a 60,000 square foot facility in Ames, Iowa, which houses consumer database and client services operations. Donnelley Marketing is currently headquartered in Omaha, Nebraska. We also lease sales office space at approximately 45 different locations in the United States, Canada and the United Kingdom, the aggregate rental obligations of which are not significant.

ITEM 3. Legal Proceedings

During 2002, the Company settled legal issues totaling \$0.4 million in connection with the settlement of two contractual disputes. There are no material pending legal or governmental proceedings involving the Company, other than ordinary routine litigation, incidental to the business of the Company.

ITEM 4. Submission of Matters to a Vote of Securityholders

Edgar Filing: INFOUSA INC - Form 10-K

No matters were submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this 2002 Annual Report on Form 10-K.

Table of Contents**PART II****ITEM 5. Market for the Registrant's Common Equity and Related Stockholder Matters**

Our Common Stock, \$0.0025 par value, is traded on the NASDAQ National Market System under the symbol IUSA:

The following table sets forth the high and low closing sales prices for our Common Stock during each quarter of 2002 and 2001.

COMMON STOCK

	<u>High</u>	<u>Low</u>
2002		
Fourth Quarter	\$5.14	\$2.86
Third Quarter	\$5.96	\$3.92
Second Quarter	\$8.20	\$5.47
First Quarter	\$8.60	\$6.55
2001		
Fourth Quarter	\$6.94	\$4.00
Third Quarter	\$6.75	\$3.84
Second Quarter	\$6.00	\$3.95
First Quarter	\$5.12	\$2.25

As of March 5, 2003, there were 144 stockholders of record of the Common Stock, and an estimated additional 3,500 stockholders who held beneficial interests in shares of common stock registered in nominee names of banks and brokerage houses.

We have not declared or paid any cash dividends on our capital stock. We intend to retain future earnings to fund the development and growth of our business and, therefore, do not anticipate paying cash dividends within the foreseeable future. Any future payment of dividends will be determined by our Board of Directors and will depend on our financial condition, results of operations and other factors deemed relevant by our Board of Directors. Existing credit agreements generally prohibit the payment of dividends or other distributions with respect to our common stock.

Table of Contents**ITEM 6. Selected Consolidated Financial Data**

The following selected consolidated financial data as of the end of, and for each of the years in the five-year period ended December 31, 2002 are derived from the Company's audited Consolidated Financial Statements and should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the Consolidated Financial Statements and related notes included elsewhere in this Form 10-K. The Company has made several acquisitions since 1998 that would affect the comparability of historical data. See Management's Discussion and Analysis of Financial Condition and Results of Operations. The Consolidated Financial Statements as of December 31, 2002 and 2001, and for each of the years in the three-year period ended December 31, 2002, are included elsewhere in this Form 10-K.

	Year Ended December 31,				
	2002	2001	2000	1999	1998
	(in thousands, except per share data)				
Consolidated Statement of Operations Data:

- (1) Effective July 1, 2001, the Company adopted the provisions of Statement of Financial Accounting Standard (SFAS) No. 141, Business Combinations, and the provisions of SFAS No. 142, Goodwill and Other

Table of Contents

Intangible Assets. As required by SFAS 142, goodwill amortization was not recorded on new acquisitions after July 1, 2001 for fiscal year 2001 and no goodwill amortization was recorded during 2002.

- (2) During 2000, the Company recorded an impairment loss of \$2.1 million for certain capitalized software development costs, fixed assets related to the abandoned infoPIX business photograph project, as well as a cost for a proposed public offering and leasehold improvement costs of *infoUSA.com*, a subsidiary of the Company.

During 1999, the Company recorded an impairment loss of \$3.9 million on the Company's existing consumer database due to the acquisition of Donnelley Marketing and an impairment loss of \$1.7 million on leasehold improvements and in-process construction projects due to the move of the Company's data processing operations from Montvale, NY to Greenwich, CT.

- (3) Includes the following acquisition costs: 1) \$0.2 million related to various acquisitions made during 2002, 2) \$0.5 million in 2001 for the acquisition of Polk City Directories from Equifax, Inc., 3) \$1.8 million in 2000 for the attempted acquisition of the consumer database division of R.L. Polk and \$0.5 million related to the acquisitions of idEXEC, American Church Lists and Getko Direct Response, 4) \$4.2 million in 1999 associated with the acquisition and integration of Donnelley Marketing, and 5) \$3.0 million in 1998 of costs associated with the Company's bid to acquire Metromail Corporation and \$0.6 million associated with the Company's offering to sell Common Stock which was not completed. These costs are not direct costs of acquisition and therefore can not be capitalized as part of the purchase price. Rather, these are general and administrative costs incurred in connection with the integration of these businesses.
- (4) During 2002, the Company recorded restructuring charges for severance costs of \$2.5 million for 230 employees terminated during the year. During 2001, the Company recorded the following restructuring charges: 1) \$2.1 million of severance costs for the termination of 265 employees, and 2) estimated lease termination costs of \$2.8 million associated with the *infoUSA.com* Foster City, California location. During 2000, the Company recorded the following restructuring charges: 1) \$2.1 million of severance costs for 350 employees terminated during December 2000, and 2) estimated lease termination costs of \$3.7 million associated with the *infoUSA.com* Foster City, California location. During 1998, the Company recorded the following restructuring charges: 1) \$1.4 million related to the Company's compilation and sales activities for new businesses, and 2) \$1.2 million related to certain cost reduction measures enacted by the Company.
- (5) During 2002 and 2001, the Company settled legal issues totaling \$0.4 million and \$1.1 million, respectively, in connection with the settlement of various contractual disputes. During 1998, the Company incurred \$4.5 million in damages awarded to Experian Information Solutions, Inc. in connection with arbitration of a contractual dispute.
- (6) During 1998, the Company incurred charges of \$3.8 million for purchased in-process research and development costs associated with the acquisition of Walter Karl, Inc.
- (7) During 2000 and 1999, *infoUSA.com*, completed its first and second rounds of venture capital financing. As a result of the issuance of common stock of this subsidiary, the Company recorded gains of \$14.6 million and \$8.9 million, respectively.
- (8) During 2002, the Company recorded other charges totaling \$2.7 million for: 1) a loss of \$1.1 million for an other-than-temporary decline in the value of a nonmarketable equity investment, 2) a charge of \$1.2 million for the reclassification of an interest rate swap agreement due to the refinancing of the Company's senior debt credit facility during the year, and 3) the Company repurchased \$9.0 million of its Senior Subordinated Notes. As part of the repurchases, the Company recorded charges totaling \$0.4 million for net unamortized debt issue costs related to the Senior Subordinated Notes and for amounts paid in excess of carrying value. During 1998, the Company recorded a charge of \$2.0 million for an other-than-temporary decline in the value of a nonmarketable investment.
- (9) During December 2000, the Company discontinued the operations of its VideoYellowPages.com Internet unit and recorded a loss of \$4.2 million, net of tax. The loss is comprised of two components: 1) the loss of its results of operations of \$3.4 million, net of tax for the full fiscal year, and 2) charges totaling \$0.8 million, net of tax, for asset impairments. The loss from this discontinued operation for 1999 was \$1.5 million, net of tax.

Table of Contents

- (10) During 2002, the Company refinanced its senior debt credit facility resulting in a charge of \$1.8 million, net of tax, for the net unamortized debt issue costs related to the extinguishment of the senior debt credit facility. During 1999, the Company repurchased \$9.0 million of its Senior Subordinated Notes. As part of the repurchase, the Company recorded a net gain of \$0.1 million.
- (11) During 2000, the Company changed its revenue recognition method for data licensing revenue. Effective January 1, 2000, the Company began to recognize revenue on data license arrangements on a straight-line basis. This change in method was made because a growing proportion of such license revenue is from long-term and continuous access agreements. The Company believes the newly adopted method of accounting better reflects the service commitment inherent in its various license agreements. The cumulative effect of the change in method of \$10.3 million is net of income tax benefit of \$3.5 million. Assuming the above described revenue recognition policy had been implemented on January 1, 1998, pro forma consolidated net sales, net income from continuing operations and net income from continuing operations per share would have been as follows:

	For the years ended	
	December 31, 1999	December 31, 1998
	(In thousands, except per share amounts)	
Net sales	\$261,466	\$226,754
Net income from continuing operations	\$ 21,812	\$ 965
Basic earnings per share	\$ 0.45	\$ 0.02
Diluted earnings per share	\$ 0.45	\$ 0.02

- (12) EBITDA, as adjusted, is defined as operating income (loss) adjusted to exclude depreciation and amortization, impairment of assets, non-cash stock compensation expense and in-process research and development charges. EBITDA is presented because it is a widely accepted indicator of a company's ability to incur and service debt and of the Company's cash flows from operations excluding any non-cash items. However, EBITDA, as adjusted, does not purport to represent cash provided by operating activities as reflected in the Company's consolidated statements of cash flows, is not a measure of financial performance under generally accepted accounting principles (GAAP) and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Also, the measure of EBITDA, as adjusted, may not be comparable to similar measures reported by other companies.

The following provides a reconciliation of operating income (loss) to EBITDA, as adjusted:

	Year Ended December 31,				
	2002	2001	2000	1999	1998
Operating income (loss)	\$54,557	\$40,385	\$(11,414)	\$34,076	\$ 2,570
Non-cash charges:					
Depreciation of operating assets	14,773	17,873	20,005	12,872	9,325
Amortization of intangible assets	13,310	30,254	32,190	22,061	18,147
Impairment of assets			2,135	5,599	
Non-cash stock compensation expense	52	448	3,113		
In-process research and development					3,834
EBITDA, as adjusted(1)	\$82,692	\$88,960	\$ 46,029	\$74,608	\$33,876

ITEM 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

Overview

infoUSA is a leading provider of business and consumer information, data processing, and database marketing services. The Company's key assets include proprietary databases of nearly 14 million businesses and 220 million consumers in the United States and Canada. We believe our proprietary content is the most comprehensive and accurate data available. We leverage these key assets by selling through multiple distribution channels to over 4 million customers that include small and medium-sized businesses, Fortune 1000 companies, consumers, and Internet users.

EBITDA, as adjusted, margins were down from 31% in 2001 to 27% in 2002 as the Company continued to experience softer customer demand and the loss of higher margin license contracts with Internet companies that went out of business. The Company offset the lost Internet license revenue with the complete integration of Polk City Directories and six acquisitions completed during 2002. The higher cost structure of the acquired companies contributed in large part to the lower margins.

During 2001 and 2002, the Large Business Customer Group continued to experience softer customer demand due to the macroeconomic downturn that began in the fourth quarter of 2000. As a result, some of its Fortune 1000 customers were impacted by budgetary constraints, forced to postpone capital spending decisions, reduced spending on direct marketing, and in certain cases, the customers brought much of the direct marketing function in-house. The Database Licensing Group was also impacted by the slow economy and by many of the Internet companies which licensed data but subsequently went out of business. Accordingly, the large business segment reduced its operating cost structure and is well positioned to continue to focus on expense control and profitable revenue growth through the development and introduction of innovative new products. These include the recently introduced *info Connect ONE PASS* that provides for automated data enhancement and file cleansing services, and *MarketZone DS*, a premier e-CRM solution that integrates the entire suite of Donnelley products to create a real-time customer content integration and decision support tool. Recent additions to the Donnelley Marketing management team will bring a fresh approach to selling a complete package of data and data processing services to its customers, creating a value model that positions Donnelley Marketing for profitable revenue growth.

The Company has supplemented its internal growth through strategic acquisitions. The Company has completed 20 acquisitions since mid 1996. The Company has increased its presence in the consumer marketing information industry, greatly increased its ability to provide data processing solutions, increased its presence in list management and list brokerage services and broadened its offerings for e-mail and business marketing information. During 2002, the Company completed the integration of Polk City Directories and enhanced its presence in e-mail marketing services with the acquisition of DoubleClick's email deployment business and Clickaction. The Company also continued to consolidate the printed and online directory industry with its acquisition of Hill-Donnelley and City Publishing directory companies.

Since 1996, the Company has systematically integrated the operations of the acquired companies into existing operations of the Company. In most cases, the results of operations for these acquired activities are no longer separately accounted for from existing activities. The Company cannot report the results of the operations of acquired companies upon completion of the integration as the results are commingled with existing results. Additionally, upon integration of the acquired operations, the Company frequently combines acquired products or features with existing products, and experiences significant cross selling of products between business units, including sales of acquired products by existing business units and sales by acquired business units of existing products. Due to recent and potential future acquisitions, future results of operations will not be comparable to historical data.

Critical Accounting Policies

Our significant accounting policies are described in Note 2 to the audited Consolidated Financial Statements. Of those policies, we have identified the following to be the most critical because they are the most important to our portrayal of our results of operations and financial condition and they require subjective or complex management judgments:

Revenue recognition and related estimates of valuation allowances for doubtful accounts, sales returns and other allowances;

Database acquisition, development and maintenance expenses; and

Valuation of long-lived and intangible assets and goodwill.

Table of Contents

Revenue recognition. Our revenue has historically been derived predominantly through the sale of customized sales lead generation products. We have successfully capitalized on new markets and applications for our proprietary databases, as our Company expanded product and service offerings. We began to recognize significant revenue from data processing services in 1997, following the acquisition of Database America and continued expanding our data processing revenue with the acquisition of Donnelley Marketing in July of 1999. The acquisition of Donnelley Marketing enhanced our proprietary consumer database and database marketing services. The merger made us the only company in our industry to offer proprietary business and consumer data, data processing, and database marketing services and gave us the ability to offer complete solutions and fulfill substantially all the database, data processing, and database marketing needs of our Fortune 1000 customers. With the expansion of our Consumer Products Division, and the acquisition of Pro CD and Digital Directory Assistance, revenue from consumer CD-Rom products increased substantially between 1993 and 1997. Retail sales of consumer products generate leads for our subscription sales department, which is highly profitable. Walter Karl was acquired in 1998 and combined with JAMI Marketing Services to form what is now known as Walter Karl, our list brokerage business. Finally, the Company has recognized strong Internet license revenue and Internet content sales since 1999 and believes there is significant opportunity to expand the market for our products and services over the Internet. We estimate that no customer represented greater than approximately 4% of net sales in 2002. As described below, significant management judgments and estimates must be made and used in connection with the revenue recognized in any accounting period.

Revenue from the sale of prospect lists, mailing labels, published directories, other sales lead products and DVD and CD information products are recognized upon shipment. These product sales are typically evidenced by a written purchase order or by credit card authorization. Terms and conditions for the sales of DVD and CD information products include rights of return. Accordingly, we estimate and record an allowance for product returns and reduce the amount of recognized revenue by anticipated product returns. The estimate of the product returns is made by giving consideration to the historical trends in sales and product returns, estimates of product inventory currently in the channel of distribution, and the timing and release of new product versions.

Data processing revenues are billed on a time and materials basis, with the recognition of revenue occurring as the services are rendered to the customer.

Revenue from the licensing of our data to third parties is recognized on a straight-line basis over the life of the agreement, when we commit to provide the customer either continuous data access (i.e., 24/7 access via the Internet) or updates of data files over a period of time. Licenses are typically evidenced by written contracts. We adopted this policy in 2000 because we believe this method better reflects the service commitment inherent in the licensing agreements in light of a growing proportion of such long-term and continuous access agreements. We also license data to customers with no such commitments. In those cases, we recognize revenue when the data is shipped to the customer, provided all the revenue recognition criteria have been met.

We assess collectibility of revenues and our allowance for doubtful accounts based on a number of factors, including past transaction history with the customer and the credit-worthiness of the customer. We do not request collateral from our customers. An allowance for doubtful accounts is established to record our trade accounts receivable at estimated net realizable value. If we determine that collection of revenues are not reasonably assured at or prior to the delivery of our products, we recognize revenue upon the receipt of cash. Cash-basis revenue recognition periodically occurs in those cases where we sell or license our information products to a poorly capitalized company, such as an Internet startup company. However, sales recognized on this basis are not a significant portion of our total revenues.

Database Costs. The Company's database and production costs are generally charged to expense as incurred and relate principally to maintaining, verifying and updating its databases, fulfilling customer orders and the production of DVD/CD titles. Costs to develop new databases are capitalized by the Company and amortized upon the successful completion of the databases, over a period ranging from one to five years. Our cost of maintaining the Company's consumer and business databases does not necessarily vary directly with revenues since a significant portion of the cost is the maintenance and verification of our existing data. Consequently, operating income may vary significantly with changes in revenue from period-to-period, as our ability to adjust certain elements of our cost structure is limited in the short-run.

At December 31, 2002, the Company had no capitalized database costs (net of accumulated amortization). Because we expense the costs of maintaining and verifying the Company's existing database, our balance sheet does not include an asset for the value of our database. We believe that our databases of consumer and business information are valuable intellectual property assets. Our success in marketing our products and services depends, in large part, on our ability to maintain an accurate and reliable database of business and consumer information.

Related party transactions. As discussed in Note 12 to the audited Consolidated Financial Statements included elsewhere in this Form 10-K, the Company paid \$2.2 million during 2002 to Annapurna Corporation, which is 100%

Table of Contents

owned by Mr. Gupta, who is Chairman and Chief Executive Officer of the Company, for use of NetJets aircraft for *infoUSA* management and employee travel expenses. The expenses are authorized by the Company's management and board of directors to support Mr. Gupta's and other executives' responsibilities related to customer relationship, business development, new acquisitions and other strategic initiatives. Arrangements between the Company and Annapurna Corporation are subject to periodic review by the Company's management and board of directors.

Valuation of long-lived and intangible assets and goodwill. Prior to the adoption of SFAS No. 142, the Company assessed the impairment of identifiable intangibles, long-lived assets and related goodwill and enterprise level goodwill whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors the Company considered important which could trigger an impairment review included the following:

Significant underperformance relative to expected historical or projected future operating results,

Significant changes in the manner or use of the acquired assets or the strategy for our overall business,

Significant negative industry or economic trends,

Significant decline in our stock price, and

Our market capitalization relative to net book value.

When we determine that the carrying value of intangibles, long-lived assets and related goodwill and enterprise level goodwill may not be recoverable based upon the existence of one or more of the above indicators of impairment, we measure impairment based on estimated fair value of the assets. Net intangible assets, long-lived assets, and goodwill amounted to \$273.2 million as of December 31, 2002.

The Company adopted the provisions of SFAS No. 142 (SFAS 142), Goodwill and Other Intangible Assets effective January 1, 2002. Therefore, the Company ceased to recognize annual amortization of approximately \$16.5 million of goodwill effective January 1, 2002, that was amortized during 2001. In accordance with SFAS No. 142, the Company performed an initial impairment test of goodwill and concluded no impairment existed at January 1, 2002. In addition, the Company completed an impairment test as of October 31, 2002 and determined that no impairment existed.

Income Taxes. Accounting for income taxes requires significant judgments in the development of estimates used in income tax calculations. Such judgments include, but would not be limited to, the likelihood the Company would realize the benefits of net operating loss carryforwards, the adequacy of valuation allowances, and the rates used to measure transactions with foreign subsidiaries. As part of the process of preparing the Company's financial statements, the Company is required to estimate its income taxes in each of the jurisdictions in which the Company operates. The judgments and estimates used are subject to challenge by domestic and foreign taxing authorities. It is possible that either domestic or foreign taxing authorities could challenge those judgments and estimates and draw conclusions that would cause the Company to incur tax liabilities in excess of those currently recorded. Changes in the geographical mix or estimated amount of annual pretax income could impact the Company's overall effective tax rate.

To the extent recovery of deferred tax assets is not likely based on estimation of future taxable income in each jurisdiction, the Company records a valuation allowance to reduce its deferred tax assets to the amount that is more likely than not to be realized. Although the Company has considered future taxable income along with prudent and feasible tax planning strategies in assessing the need for the valuation allowance, if the Company should determine that it would not be able to realize all or part of its deferred tax assets in the future, and adjustment to deferred tax assets would be charged to income in the period any such determination was made. Likewise, in the event the Company was able to realize its deferred tax assets in the future in excess of the net recorded amount, an adjustment to deferred tax assets would increase income in the period any such determination was made.

Investments. The Company records a non-cash charge to earnings when it determines that an investment has experienced an other than temporary decline in market value. To make this determination, the Company reviews the carrying value of its marketable equity security investments at the end of each reporting period for impairment. Other-than-temporary impairments are generally recognized if the market value of the investment is below its current carrying value for an extended period, which the Company generally defines as six to nine months, or if the issuer has experienced significant financial declines or difficulties in raising capital to continue operations, among other factors. Future adverse changes in market conditions or poor operating results of underlying investments could result in an inability to recover the carrying value of the recorded marketable securities, thereby possibly requiring additional impairment charges in the future.

Table of Contents

The Company has supplemented its internal growth through strategic acquisitions. The Company has completed numerous acquisitions since mid-1996. Through these acquisitions, the Company has increased its presence in the consumer marketing information industry, greatly increased its ability to provide data processing solutions, added two consumer CD-ROM product lines, increased its presence in list management and list brokerage services and broadened its offerings of business and consumer marketing information. The following table summarizes the more significant acquisitions:

Acquired Company	Key Asset	Principal Business Segment	Type of Acquisition	Date Acquired	Transaction Value (in millions)(1)
Digital Directory Assistance	Consumer CD-Rom Products	Small business	Asset purchase	August 1996	\$ 17
County Data Corporation	New Businesses Database	Small business	Pooling-of-interests	November 1996	\$ 11
Marketing Data Systems	Data Processing Services	Large business	Asset purchase	November 1996	\$ 3
BJ Hunter Database America	Canadian Business Database	Small business	Stock purchase	December 1996	\$ 3
Companies Pro CD	Consumer Database and Data Processing Services	Large business	Stock purchase	February 1997	\$ 105
Walter Karl	Consumer CD-Rom Products	Small business	Asset purchase	August 1997	\$ 18
JAMI Marketing	Data Processing and List Management Services	Large business	Stock purchase	March 1998	\$ 19
Contacts Target Marketing	List Management Services	Large business	Asset purchase	June 1998	\$ 13
Donnelley Marketing	Canadian Business Database	Small business	Asset purchase	July 1998	\$ 1
American Church Lists	Consumer Database and Data Processing Services	Large business	Stock purchase	July 1999	\$ 200
IdEXEC	Religious Institution Database	Small Business	Stock purchase	March 2000	\$ 2
Getko Direct Response	Executives Database	Large Business	Asset purchase	May 2000	\$ 7
InfoUSA.com minority interest	Canadian Consumer Database and Data Processing Services	Small Business	Asset Purchase	May 2000	\$ 2

City Publishing	Business Directories Products	Small Business	Asset Purchase	June 2002	\$ 2
ClickAction	Business Directories Products	Small Business	Asset Purchase	September 2002	\$ 2
	E-mail solutions provider and e-mail list business	Large Business	Stock purchase	December 2002	\$ 4

(1) Transaction value includes total consideration paid including cash paid, debt and stock issued plus long-term debt repaid or assumed at the date of acquisition plus, in the case of DBA, a subsequent purchase price adjustment in October 1997.

As part of these strategic acquisitions, the Company has incurred various acquisition-related charges to integrate operations, consisting of: 1) \$0.2 million in 2002 in connection with several acquisitions, 2) \$0.5 million in 2001 in connection with the acquisition of Polk City Directories, 3) \$2.3 million in 2000 for the attempted acquisition of the consumer database division of R.L. Polk and the acquisitions of idEXEC, American Church Lists and Getko Direct Response, 4) \$9.8 million in 1999 in connection with the acquisition of Donnelley Marketing, 5) \$10.1 million in 1998 in connection with the acquisitions of Walter Karl and JAMI Marketing and for certain internal restructuring charges, and 6) \$56.1 million in 1997 in connection with the acquisitions of DBA and Pro CD.

While there are currently no binding commitments with respect to any particular future acquisitions, the Company frequently evaluates the strategic opportunities available and intends to pursue strategic acquisitions of complementary products, technologies or businesses that it

Edgar Filing: INFOUSA INC - Form 10-K

believes fit its business strategy. In connection with future acquisitions, the Company expects that it will be required to incur additional acquisition-related charges to operations.

Associated with the acquisitions previously described, the Company recorded amortization expense on goodwill and other purchased intangibles as summarized in the following table (amounts in thousands):

Fiscal Year	Amount
1998	18,147
1999	22,061
2000	32,190
2001	30,254
2002	13,310

Table of Contents**Results of Operations**

The following table sets forth, for the periods indicated, certain items from the Company's statement of operations data expressed as a percentage of net sales. The amounts and related percentages may not be fully comparable due to the minority interest in infoUSA.com during 2000 and 2001 and the acquisition of American Church Lists in March 2000, idEXEC and Getko Direct Response in May 2000, Polk City Directories in October 2001, the e-mail business from DoubleClick in March 2002, Hill Donnelly in June 2002, City Publishing in September 2002 and ClickAction in December 2002:

- (1) EBITDA, as adjusted, is defined as operating income (loss) adjusted to exclude depreciation and amortization, impairment of assets, non-cash stock compensation expense and in-process research and development charges. EBITDA, as adjusted, is presented because it is a widely accepted indicator of a company's ability to incur and service debt and of the Company's cash flows from operations excluding any non-recurring items. However, EBITDA, as adjusted, does not purport to represent cash provided by operating activities as reflected in the Company's consolidated statements of cash flows, is not a measure of financial performance under generally accepted accounting principles (GAAP) and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Also, the measure of EBITDA, as adjusted, may not be comparable to similar measures reported by other companies.

The following provides a reconciliation of operating income (loss) to EBITDA, as adjusted:

	Year Ended December 31,		
	2002	2001	2000
Operating income (loss)	\$54,557	\$40,385	\$(11,414)
Non-cash charges:			
Depreciation of operating assets	14,773	17,873	20,005
Amortization of intangible assets	13,310	30,254	32,190
Impairment of assets			2,135
Non-cash stock compensation expense	52	448	3,113
EBITDA, as adjusted(1)	\$82,692	\$88,960	\$ 46,029

Table of Contents**2002 Compared to 2001**

Net sales

Net sales for 2002 were \$302.5 million, an increase of 5% from \$288.7 million in 2001. The increase in net sales is principally due to the acquisition of Polk Directories in October 2001, and to a lesser extent, other smaller acquisitions made during 2002. The overall increase was offset by declines in data processing services and database licensing. Poor general economic conditions, the loss of certain larger data processing customers and the loss of certain internet database license customers contributed most significantly to the declines identified above.

Net sales of the small business segment for 2002 were \$155.4 million, a 16% increase from \$133.7 million in 2001. The small business segment principally engages in the selling of sales lead generation and consumer DVD products to small to medium sized companies, small office and home office businesses and individual consumers. This segment also includes the sale of content via the Internet. The increase in net sales is principally due to the acquisition of Polk Directories in October 2001 and various smaller acquisitions during 2002, including Hill-Donnelly, City Publishing, Key Contacts, Inc. and Database Concepts, Inc. The Company immediately integrated the operations of its various acquisitions into existing operations. As discussed in the overview above, the Company cannot separately report the results of operations of its various acquisitions upon completion of the integration.

Net sales of the large business segment for 2002 were \$147.1 million, a 5% decrease from \$155.0 in 2001. The large business segment principally engages in the selling of data processing services, licensed databases, database marketing solutions and list brokerage and list management services to large companies. This segment includes the licensing of databases for Internet directory assistance services. The decrease in net sales is principally due to softer customer demand for Internet licensing and the loss of certain larger data processing customers. The overall decrease was offset by the acquisition of the e-mail list business of DoubleClick and ClickAction during 2002. Database license sales for 2002 were \$38.6 million, compared to \$46.5 million in 2001. Data processing sales for 2002 were \$70.1 million, compared to \$76.2 million in 2001.

Database and production costs

Database and production costs for 2002 were \$84.7 million, or 28% of net sales, compared to \$80.9 million, or 28% of net sales in 2001. The dollar increase in database and production costs is primarily due to the acquisition of Polk City Directories in October 2001 and reflects additional printing and binding costs.

Selling, general and administrative expenses

Selling, general and administrative expenses for 2002 were \$132.0 million, or 44% of net sales, compared to \$112.4 million, or 39% of net sales in 2001. The increase in selling, general and administrative expenses as a percentage of net sales is principally due to the acquisition of Polk Directories in October 2001, and to a lesser extent, the acquisitions of Hill-Donnelly and City Publishing during 2002. Polk City Directories utilizes a dedicated sales force that has a higher operating cost structure as a percentage of net sales than the Company's existing businesses.

Depreciation and amortization expenses

Depreciation and amortization expenses for 2002 totaled \$28.1 million, or 9% of net sales, compared to \$48.1 million, or 17% of net sales in 2001. The decrease in depreciation and amortization expenses is due to the Company's adoption of SFAS No. 142, Goodwill and Other Intangible Assets as of January 1, 2002. SFAS No. 142 requires the Company to complete an annual impairment test on goodwill and other intangible assets with an indefinite life rather than record amortization expense on those assets. The Company completed impairment tests as of January 1, 2002 and October 31, 2002, as required by SFAS 142, and established that no impairment exists.

Non-cash stock compensation expense

During 2002, the Company recorded a non-cash charge of \$52 thousand, compared to \$0.4 million in 2001. The Company recorded non-cash stock compensation expenses during 2002 related to a non-employee consulting agreement. During 2001, non-cash stock compensation expense related to stock options granted by the Company's former subsidiary, infoUSA.com. The decrease is due to the fact that the Company eliminated the minority interest in its infoUSA.com subsidiary through the purchase of assets as of September 30, 2001, and therefore did not incur non-cash stock compensation expense related to the infoUSA.com subsidiary options for the fourth quarter of 2001 and subsequent periods. However, the Company will incur additional non-cash compensation expense for the 2002 consultant options during the vesting period of those options. The amount of compensation expense will be affected by changes in the fair value of the Company's common stock.

Table of Contents

Restructuring costs

During 2002, the Company recorded restructuring charges due to workforce reductions of \$2.5 million as a part of the Company's continuing strategy to reduce costs and focus on core operations. The workforce reduction charges included involuntary employee separation costs for approximately 230 employees in 2002.

The Company recorded restructuring charges of \$4.9 million for 2001, due to fiscal year 2001 workforce reductions totaling \$2.1 million and early lease termination costs of \$2.8 million, as a part of the Company's overall strategy to reduce costs and focus its commitment on core business lines. The fiscal year 2001 workforce reduction charges included involuntary employee separation costs for approximately 265 employees.

Litigation settlement charges

The Company is involved in various legal proceedings of a nature considered normal to its business. The Company recorded charges during 2002 and 2001 of \$0.4 million and \$1.1 million, respectively, related to the Company's disposition of certain legal matters.

Acquisition costs

The Company recorded integration-related costs during 2002 and 2001 of \$0.2 million and \$0.5 million, respectively. The integration-related costs included consulting costs, information system conversion and other direct integration-related charges. These costs were not directly related to the recent acquisition of various companies, and therefore could not be capitalized.

Operating income

Including the factors previously described, the Company had operating income of \$54.6 million, or 18% of net sales for 2002, compared to operating income of \$40.4 million, or 14% of net sales in 2001.

Operating income for the small business segment for 2002 was \$60.2 million, or 39% of net sales, as compared to \$60.4 million, or 45% of net sales in 2001. The decrease in operating income as a percentage of net sales is principally due to increased sales and marketing expenses represented as a percentage of net sales associated with Polk Directories as discussed in the selling, general administrative section above.

Operating income for the large business segment for 2002 was \$76.9 million, or 52% of net sales, as compared to \$81.1 million, or 52% of net sales in 2001. Operating income as a percentage of net sales remained constant although net sales in dollars decreased, as the Company was proactive in continuing cost reduction measures during 2002.

Other income or expense, net

Other expense, net was \$18.6 million, or 6% of net sales, and \$24.1 million, or 8% of net sales, for 2002 and 2001, respectively. Other income or expense, net is comprised of interest expense, investment income, minority interest in subsidiary and other income or expense items which do not represent components of operating expense of the Company.

The Company recorded a non-cash loss of \$1.2 million, on the interest rate swap agreement designated as a cash flow hedge for the Company's Senior Debt Credit Facility described in Note 8 to the accompanying consolidated financial statements. The Senior Debt Credit Facility was refinanced on March 6, 2002. As a result of the refinancing, the Company recorded a charge of \$1.2 million for unrealized interest expense that had been accounted for as a component of Other Comprehensive Income a stockholders' equity account included on the accompanying Balance Sheet.

During 2002, the Company recorded a loss of \$1.1 million for an other-than-temporary decline in the value of a nonmarketable equity investment. The investment was determined to be impaired by management after consideration of recent equity transactions by the investee.

During 2002, the Company wrote-off \$0.4 million for net unamortized debt issue costs and amounts paid in excess of par related to the retirement of \$9.0 million of the Company's 9.5% senior notes.

Table of Contents

Interest expense was \$16.1 million and \$25.3 million for 2002 and 2001, respectively. The decrease is principally due to lower interest rates as a result of the refinancing of the senior credit facility in March 2002 and the continued pay down of total debt facilities by the Company. Investment income was \$179 thousand and \$1.0 million, for 2002 and 2001, respectively.

Minority interest in gain of subsidiary of \$0.3 million in 2001 represents the unaffiliated investors' share of infoUSA.com's net gain for the year ended December 31, 2001.

Income taxes

A provision for income taxes of \$13.8 million and \$11.4 million was recorded for 2002 and 2001, respectively. The decrease in the Company's effective tax rate to 38% in 2002 from 70% in 2001 is the result of two factors. First, the Company's 2001 net income did not include any deferred tax benefits related to operating losses of its former subsidiary infoUSA.com due to uncertainties surrounding the recoverability of these deferred tax assets. infoUSA.com was not previously included in the Company's consolidated Federal income tax return. Second, the Company's pre-tax book income for the fiscal year 2001 included nondeductible amortization expense of \$16.5 million for goodwill and intangible assets with indefinite lives. Upon the adoption of SFAS No. 142 on January 1, 2002, the Company ceased amortizing these assets for financial reporting purposes and consequently, the amortization expense for those assets does not affect either book or taxable income in 2002.

Extraordinary item, net of tax

On March 6, 2002, the Company refinanced its senior debt credit facility administered by Deutsche Bank with a new facility administered by Bank of America Securities, LLC. On March 6, 2002, the Company recorded an extraordinary item of \$1.8 million, net of income tax benefit of \$1.1 million, for the net unamortized debt issue costs related to the senior debt credit facility with Deutsche Bank.

EBITDA, as adjusted

The Company's EBITDA, as adjusted was \$82.7 million, or 27% of net sales for 2002, and \$89.0 million, or 31% of net sales in 2001.

Table of Contents**2001 Compared to 2000***Net sales*

Net sales for 2001 were \$288.7 million, a decrease of 6% from \$305.7 million in 2000. The decrease in net sales is principally due to softer customer demand and a general slow-down in the United States economy. Net sales of the small business segment for 2001 were \$133.7 million, a 5% decrease from \$140.2 million in 2000. The decrease in net sales is principally due to softer customer demand related to the general slow-down in the United States economy and the tragic events of September 11. \$9.0 million of the decrease specifically related to the sale of content to list brokers and resellers, who are more adversely affected by the economic downturn. The net sales amounts are not fully comparable due to the acquisition of Polk City Directories in October 2001. The Company immediately integrated the operations of Polk City Directories into existing operations and cannot report the results of operations of Polk City Directories upon completion of the integration, as the results are commingled with existing results. Additionally, upon integration of acquired operations, the Company frequently combines acquired products or features with existing products, and experiences significant cross-selling of products between business units, including sales of acquired products by existing business units and sales by acquired business units of existing products. The small business segment principally engages in the selling of sales lead generation and consumer DVD products to small to medium sized companies, small office and home office businesses and individual consumers. This segment also includes the sale of content via the Internet.

Net sales of the large business segment for 2001 were \$155.0 million, a 6% decline from \$165.5 million in 2000. The decrease in net sales is principally due to softer customer demand related to the general slow-down in the United States economy and the adverse impact from the continued decline by its Internet license customers. License revenues were \$46.5 million in 2001, a decline of \$5.1 million from \$51.6 million for 2000, primarily due to a decreased number of Internet license customers directly related to the down turn experienced by many Internet companies since early 2000.

Database and production costs

Database and production costs for 2001 were \$80.9 million, or 28% of net sales, compared to \$101.8 million, or 33% of net sales for 2000. The decrease in database and production costs as a percentage of net sales is primarily due to headcount reductions and favorable changes in product sales mix in the large business segment and reduced costs associated with the Internet businesses initiated by the Company in December 2000. Database and production costs for the large business segment were 22% of net sales for 2001, a decrease of \$8.5 million, compared to the rate of 26% of net sales for 2000. Database and production costs for corporate activities for 2001 decreased \$3.9 million compared to 2000, due to decreased data compilation and data acquisition costs. Database and production costs for the Internet businesses decreased \$4.9 million to \$0.7 million for 2001, compared to \$5.6 million for 2000.

Selling, general and administrative expenses

Selling, general and administrative expenses for 2001 were \$112.4 million, or 39% of net sales, compared to \$149.7 million, or 49% of net sales for the same period of 2000. The decrease in selling, general and administrative expenses is principally due to: 1) reduced marketing and advertising costs, principally related to the various Internet initiatives, and 2) headcount reductions between December 2000 and June 2001. Marketing and advertising costs for 2001 were \$12.2 million, or 4% of net sales, compared to \$31.8 million, or 10% of net sales for 2000. Marketing and advertising expenses related to the various Internet divisions were \$0.3 million for 2001, reflecting a decrease of \$13.8 million, or 5% of net sales, compared to \$14.1 million for 2000. Marketing and advertising expenses related to the core businesses were \$11.9 million for 2001, or \$5.7 million lower compared to 2000. Salaries and wages for marketing and general administration for 2001 were \$63.3 million, or 22% of net sales, a reduction of \$15.9 million compared to \$79.2 million, or 26% of net sales for 2000.

Depreciation and amortization expenses

Depreciation and amortization expenses for 2001 were \$48.1 million (comprised of \$30.2 million for amortization of goodwill and other intangible assets and \$17.9 million for depreciation of operating assets), or 17% of net sales, compared to \$52.2 million (comprised of \$32.2 million for amortization of goodwill and other intangible assets and \$20.0 million for depreciation of operating assets), or 17% of net sales for 2000. The decrease in depreciation and amortization expenses is principally due to certain intangible assets and software development costs becoming fully amortized.

Table of Contents

Non-cash stock compensation expense

Non-cash stock compensation expenses were \$0.4 million, or less than 1% of net sales, compared to \$3.1 million, or 1% of net sales for 2000. The decrease in non-cash stock compensation expense is principally due to the workforce reduction of infoUSA.com, described above in the Overview section. Additionally, due to the fact that the Company eliminated the minority interest in its infoUSA.com subsidiary through the purchase of assets, it did not and will not incur non-cash stock compensation expense related to the infoUSA.com subsidiary options during the fourth quarter of 2001 and subsequent periods.

Restructuring costs

During 2001, the Company recorded restructuring charges of \$4.9 million due to a lease termination agreement and charges related to workforce reductions. On July 30, 2001, infoUSA.com, a subsidiary of the Company, negotiated a lease termination agreement for its Foster City, California facility. The Company paid \$4.7 million to satisfy the remaining eight-year term of the lease agreement, and recorded additional charges of \$2.8 million for costs of the lease settlement not previously recorded. The Company also recorded \$2.1 million for workforce reduction charges that included involuntary employee separation costs for approximately 265 employees discharged during 2001, in administration, sales support and marketing functions.

During 2000, the Company recorded restructuring charges totaling \$5.8 million as a part of the Company's overall strategy to reduce costs and continue commitment to its core businesses. The cost containment program included a reduction in the planned investment in the Company's Internet businesses and plans to reduce total headcount. The Company recorded an accrual of \$3.7 million for lease payments for the former Foster City, California facility and an accrual of \$2.1 million for workforce reductions of approximately 350 employees. Employees discharged during 2000 received cash severance payments totaling \$2.1 million during the first six months of 2001, with no severance payments remaining deferred and payable as of June 30, 2001.

Litigation settlement charge

The Company is involved in various legal proceedings, including product liability and other matters of a nature considered normal to its business. During 2001, the Company settled two legal matters totaling \$1.1 million.

Acquisition costs

During 2001, the Company recorded charges of \$0.5 million related to the Company's acquisition of Polk City Directories, representing costs to integrate these operations into the Company's existing operations. These costs were not directly related to the acquisition of Polk City Directories, and therefore could not be capitalized as part of the purchase price.

During 2000, the Company recorded acquisition costs of \$2.3 million, including \$0.5 million principally related to the Company's acquisition of American Church Lists, idEXEC and Getko, representing costs to integrate these acquired operations into the Company's existing operations. The Company also recorded \$1.8 million of costs associated with the Company's bid to acquire the consumer database division of R.L. Polk.

Operating income

Including the factors previously described, the Company had operating income of \$40.4 million, or 14% of net sales for 2001, compared to an operating loss of \$11.4 million, or 4% of net sales for 2000.

Operating income for the small business segment for 2001 was \$60.4 million, or 45% of net sales, as compared to \$32.4 million, or 23% of net sales for 2000. The increase in operating income as a percentage of net sales is principally due to staffing reductions previously described and the Company's cost reduction efforts related to various Internet initiatives. Substantially all costs related to the Internet divisions are included in the small business segment. See the sections Overview and Selling, general and administrative expenses for additional information describing the Internet divisions and the effects on the results of operations.

Operating income for the large business segment for 2001 was \$81.1 million, or 52% of net sales, as compared to \$75.5 million, or 46% of net sales for 2000. The increase in operating income as a percentage of net sales is principally related to the Company's staffing reductions previously described and a change in the product sales mix previously described in the section Database and production costs.

Table of Contents

Other expense, net

Other expense net, was \$24.1 million, or 8% of net sales, and \$4.5 million, or 1% of net sales, for 2001 and 2000, respectively. Other expense is comprised of interest expense, investment income, minority interest in subsidiary and other income or expense items that do not represent components of operating income or expense of the Company.

Interest expense was \$25.3 million and \$26.7 million for 2001 and 2000, respectively. Investment income was \$1.0 million and \$1.3 million, for 2001 and 2000, respectively. During the year 2000, infoUSA.com, a subsidiary of the Company, completed additional venture capital financing and recorded a gain of \$14.6 million on the issuance of stock of this subsidiary. The issuance of subsidiary stock to outside investors allowed the Company to continue to execute its planned expansion related to infoUSA.com as an online provider of white and yellow page directory assistance and an internet destination for sales and marketing tools and information, without effecting working capital of existing operations.

Minority interest in loss of subsidiary of \$0.3 million and \$6.3 million for 2001 and 2000, respectively, represents the minority investors share of infoUSA.com's net loss for the periods then ended. Effective August 30, 2001, the Company eliminated the minority interest of its subsidiary, infoUSA.com, through the acquisition of the subsidiary's operating assets.

Income taxes

A provision for income taxes of \$11.4 million and \$1.3 million was recorded for 2001 and 2000, respectively. The gain the Company recorded on the issuance of subsidiary stock during 2000 was not subject to income tax expense. The provisions for income taxes also reflect the inclusion of amortization of certain intangibles in taxable income not deductible for tax purposes.

Discontinued operations, net of tax

During December 2000, the Company closed the operations of its VideoYellowPages.com Internet unit. VideoYellowPages.com recorded revenues of \$0.2 million and operating expenses of \$6.9 million, for a pre-tax operating loss of \$6.7 million and an after-tax loss of \$4.2 million during 2000. Included in the operating expenses of \$6.9 million for 2000, the Company recorded asset impairment charges of \$1.2 million and restructuring charges of \$0.1 million related to discontinuing the operations of VideoYellowPages.com.

Cumulative effect of accounting change, net of tax

During 2000, the Company changed its revenue recognition method for data licensing revenue. Effective January 1, 2000 the Company began to recognize revenue on data license arrangements on a straight-line basis. This change in method was made because a growing proportion of such license revenue is from long-term and continuous access agreements. The Company believes the newly adopted method better reflects the service commitment inherent in its various license agreements. The cumulative effect of the change in method of \$10.3 million is net of income tax benefit of \$3.5 million.

EBITDA, as adjusted

The Company's EBITDA, as adjusted was \$89.0 million, or 31% of net sales for 2001, compared to \$46.0 million, or 15% of net sales for 2000.

Table of Contents

Liquidity and Capital Resources

General information:

During 1999 in conjunction with the acquisition of Donnelley Marketing, the Company negotiated a credit arrangement with Deutsche Bank. On March 6, 2002, the Company refinanced the senior debt credit facility administered by Deutsche Bank with a new facility administered by Bank of America Securities, LLC. Under the refinanced Senior Secured Credit facility, the payment terms of the Term Loans A and B were changed such that the total debt will be due in March 2006. The new Senior Secured Credit facility at the time of refinancing was comprised of: \$47.0 million for Term A with a maturity of 3 years, \$45.0 million for Term B with a maturity of 4 years and \$18.0 million under a Revolving Credit Facility with a maturity of 3 years. As of December 31, 2002, the Company had no borrowings under the Revolving Credit Facility, including no outstanding letters of credit.

The Company is subject to certain financial covenants in its various credit facilities, including total funded debt leverage ratio, senior debt leverage ratio, fixed charge coverage ratio and minimum consolidated EBITDA. Management believes the Company is in compliance with all restrictive covenants of the Company's various debt facilities.

The Company believes that its existing sources of liquidity and cash generated from operations will satisfy the Company's projected working capital, debt repayments and other cash requirements for at least the next 12 months. Acquisitions of other technologies, products or companies, or internal product development efforts may require the Company to obtain additional equity or debt financing, which may not be available or may be dilutive.

Consolidated Statements of Cash Flows Information:

As of December 31, 2002, the Company's principal sources of liquidity included \$18.0 million available under the Revolving Credit Facility previously described. As of December 31, 2002, the Company had a working capital deficit of \$13.3 million.

Net cash provided by operating activities during 2002 totaled \$53.2 million compared to \$54.5 million in 2001.

During 2002, the Company spent \$2.9 million for additions of property and equipment, \$2.0 million related to software and database development costs and \$36.1 million on the repayment of long-term debt. The repayments on long-term debt included voluntary prepayments totaling \$10.6 million on its senior debt credit facility and the repurchase of \$9.0 million of 9.5% Senior Notes on the open market.

During 2002, the Company spent \$9.8 million for acquisitions of businesses, net of cash acquired of \$1.5 million. The Company acquired all issued and outstanding common stock of Database Concepts, Inc. for \$0.2 million, purchased certain assets and assumed certain liabilities related to the email list business of Doubleclick, Inc. in March 2002 for \$2.0 million, purchased certain assets and assumed certain liabilities of Key Contacts, Inc. in April 2002 for \$0.2 million, purchased certain assets and assumed certain liabilities of Hill-Donnelly in June 2002 for \$1.8 million, purchased certain assets and assumed certain liabilities of City Publishing Company in September 2002 for \$1.6 million and acquired the outstanding common stock of ClickAction in December 2002 for \$4.1 million. In addition, the Company incurred direct acquisition costs totaling \$1.4 million in connection with the purchase of these businesses that were capitalized as part of the purchase price of these businesses.

Consolidated Balance Sheet Information:

Trade accounts receivable decreased to \$39.4 million at December 31, 2002 from \$44.9 million at December 31, 2001. The day's sales outstanding (DSO) ratio for 2002 was 47 days compared to 56 days in 2001. The decrease in the DSO ratio reflects the Company's continued commitment towards the maintenance of stringent credit and collection practices.

Accounts payable increased to \$13.3 million at December 31, 2002 from \$7.8 million at December 31, 2001. The increase is due to the acquisition of various companies during 2002 as previously described and payment timing differences related to various operating expenses.

Accrued expenses decreased to \$1.8 million at December 31, 2002 from \$9.2 million at December 31, 2001. The decrease is principally due to reductions in accrued interest expense, accrued interest related to the interest rate swap agreement and prepaid 401(k) contributions.

Deferred revenue decreased to \$13.8 million at December 31, 2002 from \$17.4 million at December 31, 2001. The decrease is principally due to the decrease in internet database license sales from 2001 to 2002.

Table of Contents

Long-term debt, net of current portion decreased to \$164.1 million at December 31, 2002 from \$205.9 million at December 31, 2001. The Company made repayments on long-term debt totaling \$36.1 million during 2002.

The following table summarizes the Company's contractual obligations as of December 31, 2002:

	Less than 1 year	1 to 3 years	4 to 5 years	After 5 years
(In thousands)				
Long-term debt	\$25,819	\$22,177	\$44,924	\$97,000
Capital lease obligations	493	15		
Operating leases	7,008	8,307	4,506	2,899
Unconditional purchase obligations	10,095	18,315	3,630	
Other long-term obligations				
Total cash contractual obligations	\$43,415	\$48,814	\$53,060	\$99,899

Accounting Standards

In June 2001, the FASB released SFAS No. 143, *Accounting for Asset Retirement Obligations*, which addresses financial accounting and reporting for obligations associated with retirement of tangible long-lived assets and the associated asset retirement costs. SFAS No. 143 requires recognition of asset retirement obligations as a liability rather than a contra-asset. SFAS No. 143 is effective for the Company's fiscal year ending December 31, 2003. SFAS No. 143 is not expected to have an impact on the Company's consolidated financial statements.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13 and Technical Corrections*. SFAS No. 145, among other things, rescinds SFAS No. 4 which required all gains and losses from the extinguishments of debt to be classified as an extraordinary item and amends SFAS No. 13 to require that certain lease modification that have economic effect similar to sale-leaseback transactions be accounted for in the same manner as sale-leaseback transactions. Upon adoption of the new accounting standard in 2003, the Company is required to reclassify the extraordinary item of \$1.8 million related to the extinguishment of debt as reported in the 2002 consolidated statement of operations. The reclassification will increase other non-operating expense by \$2.9 million and decrease income tax expense by \$1.1 million.

In June 2002, the FASB released SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, which addresses accounting and reporting for costs associated with exit or disposal activities, and nullifies EITF 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity*. SFAS No. 146 addresses involuntary one-time employee termination benefits, cost to terminate a contract that is not a capital lease, and other associated exit costs. Existing accounting guidelines require companies to recognize a liability when management commits itself or announces plans to exit or dispose of an activity. SFAS No. 146 will prohibit companies from recognizing an exit or disposal liability can be measured at fair value. The Company is required to be in conformity with the provisions of SFAS No. 146 for exit or disposal activities that are initiated after December 31, 2002. The adoption of SFAS No. 146 is not expected to have a material effect on the Company's financial position or results of operations.

In October 2002, the Emerging Issues Task Force of the FASB reached tentative conclusion on the accounting for revenues in transactions that involve multiple deliverables. The expected guidance will govern how to identify whether goods or services or both, that are to be delivered separately in a bundled sales arrangement, should be accounted for separately. The guidance from the tentative reaches a consensus on the issue. The Company would, therefore, be required to adopt the guidance in the financial statements for the quarter ended March 31, 2003. The Company has not yet determined the impact of this issue on the consolidated financial statements.

In November 2002, the FASB issued Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, an interpretation of SFAS No. 5, 57 and 107 and rescission of FASB Interpretation No. 34. This interpretation requires additional disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also specifies the requirements for liability recognition (at fair value) for obligations undertaken in issuing the guarantee. The disclosure requirements are effective for interim and annual financial statements ending after December 15, 2002, (December 31, 2002 financial statements for calendar year companies). The initial recognition and measurement provisions are effective for all guarantees within the scope of Interpretation 45 issued or modified after December 31, 2002. The Company has not yet determined the effect of Interpretation No. 45 on its financial statements with respect to initial recognition and measurement.

Table of Contents

Factors That May Affect Operating Results

Our Internet strategy is subject to review and revision.

Our Internet strategy is to leverage our proprietary content into multiple vertical market applications and provide marketing solutions for electronic commerce applications. The strategy of developing more efficient and profitable applications of our content through the Internet is evolving. We cannot guarantee that our customers will choose to have our products and services delivered to them over the Internet. If we are successful in developing Internet applications, we may face strong competition from current and potential competitors, including other Internet companies and other providers of business and consumer databases. We will review our Internet strategy from time to time and may continue to revise it.

Our markets are highly competitive and many of our competitors have greater resources than we do.

The business and consumer marketing information industry in which we operate is highly competitive. Intense competition could harm us by causing, among other things, price reductions, reduced gross margins, and loss of market share. Our competition includes:

In consumer sales lead generation products, Acxiom, Experian (a subsidiary of Great Universal Stores, P.L.C. (GUS)), and Equifax, both directly and through reseller networks.

In data processing services, Acxiom, Experian, Direct Marketing Technologies (a subsidiary of GUS) and Harte-Hanks Communications, Inc.

In business sales lead generation products, Experian and Dun s Marketing Services (DMS), a division of Dun & Bradstreet. DMS, which relies upon information compiled from Dun & Bradstreet s credit database, tends to focus on marketing to large companies.

In business directory publishing, we compete with Regional Bell Operating Companies and many smaller, regional directory publishers.

In consumer products, certain smaller producers of CD-Rom products.

Technologies which companies may install and implement in-house as part of their internal information systems functions, instead of purchasing or outsourcing such functions.

In addition, we may face competition from new entrants to the business and consumer marketing information industry as a result of the rapid expansion of the Internet, which creates a substantial new channel for distributing business information to the market. Many of our competitors have longer operating histories, better name recognition and greater financial resources than we do, which may enable them to implement their business strategies more readily than we can.

We are highly leveraged. If we are unable to service our debt as it becomes due, our business would be harmed.

As of December 31, 2002, we had total indebtedness of approximately \$190.4 million, including \$97.0 million of Notes due under an indenture (the Indenture) and \$75.0 million under a \$195 million Senior Secured Credit facility. On March 6, 2002, the Company refinanced the Senior Secured Credit facility with Banc of America Securities, LLC. Under the refinanced Senior Secured Credit facility, the payment terms of the Term Loans A and B were changed such that the total debt will be due on December 31, 2005. Substantially all of our assets are pledged as security under the terms of the Senior Secured Credit facility. The indebtedness under the Senior Secured Credit facility was incurred in connection with our acquisition of Donnelley Marketing in 1999.

Our ability to pay principal and interest on the Notes issued under the Indenture and the indebtedness under the Senior Secured Credit facility and our ability to satisfy our other debt obligations will depend upon our future operating performance. Our performance will be affected by prevailing economic conditions and financial, business and other factors. Certain of these factors are beyond our control. The future availability of revolving credit under the Senior Secured Credit facility will depend on, among other things, our ability to meet certain specified financial ratios and maintenance tests. We expect that our operating cash flow should be sufficient to meet our operating expenses, to make necessary capital expenditures and to service our debt requirements as they become due. If we are unable to

Table of Contents

service our indebtedness, however, we will be forced to take actions such as reducing or delaying acquisitions and/or capital expenditures, selling assets, restructuring or refinancing our indebtedness (including the Notes issued under the Indenture and the Senior Secured Credit facility) or seeking additional equity capital. We may not be able to implement any such measures or obtain additional financing or terms that are favorable or satisfactory to us, if at all.

The terms of our current indebtedness may restrict our ability to take certain actions that fit our business strategy.

Our existing credit facilities contain certain covenants that restrict our ability to:

Incur additional indebtedness;

Pay dividends and make certain other similar payments;

Guarantee indebtedness of others;

Enter into certain transactions with affiliates;

Consummate certain asset sales, certain mergers and consolidations, sales or other dispositions of all or substantially all of our assets

Acquire other companies; and

Obtain dividends or certain other payments from our subsidiaries.

These restrictions may impair our ability to take certain actions that fit our business strategy. A breach of any of these covenants could result in an event of default under the terms of our existing credit facilities. Upon the occurrence of an event of default, the lenders could elect to declare all amounts outstanding, together with accrued interest, to be immediately due and payable. If the payment of any such indebtedness is accelerated, our assets may not be sufficient to repay in full the indebtedness under our credit facilities and our other indebtedness. Moreover, if we were unable to repay amounts owed to the lenders under our credit facilities, the lenders could foreclose on our assets that secure the indebtedness.

Under the terms of our current indebtedness, the occurrence of a change of control of infoUSA could have serious adverse financial consequences to us.

If a change of control of infoUSA were to occur, we would in certain circumstances be required to make an offer to purchase all outstanding Notes under the Indenture at a purchase price equal to 101% of the principal amount of the Notes, together with accrued and unpaid interest. There can be no guarantee that, if this were to happen, we would have sufficient funds to purchase the Notes. In addition, a change of control and any repurchase of the Notes upon a change of control may constitute an event of default under our other current or future credit facilities. In that event, our obligations under such credit facilities could be declared due and payable by the lenders, and the lenders may also have the right to be paid for all outstanding obligations under such credit facilities before we repurchase any of the Notes.

Fluctuations in our operating results may result in decreases in the market price of our common stock.

Our operating results may fluctuate on a quarterly and annual basis. Our expense levels are relatively fixed and are based, in part, on our expectations as to future revenues. As a result, unexpected changes in revenue levels may have a disproportionate effect on operating performance in any given period. In some period or periods our operating results may be below the expectations of public market analysts and investors. Our failure to meet analyst or investor expectations could result in a decrease in the market price of our common stock.

If we do not adapt our products and services to respond to changes in technology, they could become obsolete.

We provide marketing information and services to our customers in a variety of formats, including printed formats, electronic formats such as CD-Rom and DVD, and over the Internet. Advances in information technology may result in changing customer preferences for products and product delivery formats. If we do not successfully adapt our products and services to take advantage of changes in technology and customer preferences, our business, financial condition and results of operations would be adversely affected.

We have adopted an Internet strategy because we believe that the Internet represents an important and rapidly

Table of Contents

evolving market for marketing information products and services. Our business, financial condition and results of operations would be adversely affected if we:

Fail to develop products and services that are well suited to the Internet market;

Experience difficulties that delay or prevent the successful development, introduction and marketing of these products and services; or

Fail to achieve sufficient traffic to our Internet sites to generate significant revenues, or to successfully implement electronic commerce operations.

Changes in laws and regulations relating to data privacy could adversely affect our business.

We engage in direct marketing, as do many of our customers. Certain data and services provided by us are subject to regulation by federal, state and local authorities in the United States as well as those in Canada and the United Kingdom. In addition, growing concerns about individual privacy and the collection, distribution and use of information about individuals have led to self-regulation of such practices by the direct marketing industry through guidelines suggested by the Direct Marketing Association and to increased federal and state regulation. There is increasing awareness and concern among the general public regarding marketing and privacy concerns, particularly as it relates to the Internet. This concern is likely to result in new laws and regulations. Compliance with existing federal, state and local laws and regulations and industry self-regulation has not to date seriously affected our business, financial condition or results of operations. Nonetheless, federal, state and local laws and regulations designed to protect the public from the misuse of personal information in the marketplace and adverse publicity or potential litigation concerning the commercial use of such information may increasingly affect our operations. This could result in substantial regulatory compliance or litigation expense or a loss of revenue.

Our business would be harmed if we do not successfully integrate future acquisitions.

Our business strategy includes continued growth through acquisitions of complementary products, technologies or businesses. We have made fourteen acquisitions since mid-1996 and completed the integration of these acquisitions into our existing business by the end of 2001. We continue to evaluate strategic opportunities available to us and intend to pursue opportunities that we believe fit our business strategy. Acquisitions of companies, products or technologies may result in the diversion of management's time and attention from day-to-day operations of our business and may entail numerous other risks, including difficulties in assimilating and integrating acquired operations, databases, products, corporate cultures and personnel, potential loss of key employees of acquired businesses, difficulties in applying our internal controls to acquired businesses, and particular problems, liabilities or contingencies related to the businesses being acquired. To the extent our efforts to integrate future acquisitions fail, our business, financial condition and results of operations would be adversely affected.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company is not exposed to material future earnings or cash flow exposures from changes in interest rates as over one-half of the Company's debt is at fixed rates. At December 31, 2002, the fair value of the Company's long-term debt is based on quoted market prices at the reporting date or is estimated by discounting the future cash flows of each instrument at rates currently offered to the Company for similar debt instruments of comparable maturities. At December 31, 2002, the Company had long-term debt with a carrying value of \$190.4 million and estimated fair value of approximately \$191.5 million. The market risk is estimated as the potential decrease in fair value of the Company's long-term debt resulting from a hypothetical increase of 10% in the rates currently offered to the Company. An increase in interest rates would result in approximately a \$0.8 million increase in fair value of the Company's long-term debt. The Company does not have operations subject to risks of foreign currency fluctuations.

Table of Contents**ITEM 8. Financial Statements and Supplementary Data**

The information required by this item (other than selected quarterly financial data which is set forth below) is incorporated by reference to the Consolidated Financial Statements included elsewhere in this Form 10-K. The following table sets forth selected financial information for each of the eight quarters in the two-year period ended December 31, 2002. This unaudited information has been prepared by the Company on the same basis as the consolidated financial statements and includes all normal recurring adjustments necessary to present fairly this information when read in conjunction with the Company's audited consolidated financial statements and the notes thereto.

	2002 Quarter Ended				2001 Quarter Ended

- (1) Effective July 1, 2001, the Company adopted the provisions of Statement of Financial Accounting Standard (SFAS) No. 141, Business Combinations, and the provisions of SFAS No. 142, Goodwill and Other Intangible Assets. As required by SFAS No. 142, goodwill amortization was not recorded on new acquisitions after July 1, 2001 for fiscal year 2001 and no goodwill amortization was recorded during 2002.
- (2) Includes the following acquisition costs: 1) \$0.2 million related to various acquisitions made during 2002, and 2) \$0.5 million for the acquisition of Polk City Directories from Equifax, Inc during 2001. These costs are not direct costs of acquisition and therefore can not be capitalized as part of the purchase price. Rather, these are general and administrative costs incurred in connection with the integration of these businesses.
- (3) During 2002 and 2001, the Company settled legal issues totaling \$0.4 million and \$1.1 million, respectively, in connection with the settlement of various contractual disputes.
- (4) During 2002, the Company recorded restructuring charges for severance costs of \$2.5 million for 230 employees terminated during the year. During 2001, the Company recorded the following restructuring charges: 1) \$2.1 million severance costs for 265 employees terminated during 2001, and 2) estimated lease termination costs of \$2.8 million associated with the *infoUSA.com* Foster City, California location.

Table of Contents

- (5) During 2002, the Company recorded other charges totaling \$2.7 million for: 1) a loss of \$1.1 million for an other-than-temporary decline in the value of a nonmarketable equity investment, 2) a charge of \$1.2 million for the reclassification of an interest rate swap agreement due to the refinancing of the Company's senior debt credit facility during the year, and 3) the Company repurchased \$9.0 million of its Senior Subordinated Notes. As part of the repurchases, the Company recorded charges totaling \$0.4 million for net unamortized debt issue costs related to the Senior Subordinated Notes and for amounts paid in excess of par.
- (6) During 2002, the Company refinanced its senior debt credit facility resulting in a charge of \$1.8 million, net of tax, for the net unamortized debt issue costs related to the extinguishment of the senior debt credit facility.

PART III

ITEM 10. *Directors and Executive Officers of the Registrant*

The required information regarding Directors of the registrant is incorporated by reference to the information under the caption "Nominees for Election at the Annual Meeting" and "Incumbent Directors whose Terms of Office Continue After the Annual Meeting" in the Company's definitive proxy statement for the Annual Meeting of Stockholders to be held on April 21, 2003.

The required information regarding Executive Officers of the registrant is contained in Part I of this Form 10-K.

The required information regarding compliance with Section 16(a) of the Securities Exchange Act is incorporated by reference to the information under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" in the Company's definitive proxy statement for the Annual Meeting of Stockholders to be held on April 21, 2003.

ITEM 11. *Executive Compensation*

Incorporated by reference to the information under the captions "Election of Directors", "Board Compensation", "Executive Compensation", and "Certain Transactions" in the Company's definitive proxy statement for the Annual Meeting of Stockholders to be held on April 21, 2003.

ITEM 12. *Security Ownership of Certain Beneficial Owners and Management*

Incorporated by reference to the information under the caption "Security Ownership" and "Executive Compensation - Equity Compensation Plan Table" in the Company's definitive proxy statement for the Annual Meeting of Stockholders to be held on April 21, 2003.

ITEM 13. *Certain Relationships and Related Transactions*

Incorporated by reference to the information under the captions "Certain Transactions" in the Company's definitive proxy statement for the Annual Meeting of Stockholders to be held on April 21, 2003.

ITEM 14. *Controls and Procedures*

Within the 90-day period prior to the filing of this Annual Report on Form 10-K, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. Disclosure controls and procedures are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, such as this Form 10-K, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Based on that evaluation, our CEO and CFO have concluded that our disclosure controls and procedures are effective to satisfy the objectives for which they are intended. Subsequent to the date of our management's evaluation, there were no significant changes in our internal controls or in other factors that could significantly affect these controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

Table of Contents**PART IV****ITEM 15. Exhibits, Financial Statement Schedules and Reports on Form 8-K**

(a) The following documents are filed as a part of the Report:

1. *Financial Statements.* The following Consolidated Financial Statements of *infoUSA* Inc. and Subsidiaries and Report of Independent Accountants are included elsewhere in this Form 10-K:

Description	Page No.

CERTIFICATIONS

I, Vinod Gupta, certify that:

1. I have reviewed this annual report on Form 10-K of infoUSA Inc.;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the Evaluation Date); and
 - c) presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this annual report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

INDEPENDENT AUDITORS REPORT

The Stockholders and Board of Directors
infoUSA Inc.:

We have audited the accompanying consolidated balance sheets of *infoUSA* Inc. and subsidiaries (the Company) as of December 31, 2002 and 2001, and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2002. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of *infoUSA* Inc. and subsidiaries as of December 31, 2002 and 2001, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2002, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the consolidated financial statements, during 2000 the Company changed its method of accounting for data licensing arrangements sold with updates.

As discussed in Note 2 to the consolidated financial statements, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations, for all acquisitions subsequent to July 1, 2001 and SFAS No. 142, Goodwill and Other Intangible Assets as of January 1, 2002.
