F5 Networks, Inc.

(Exact name of Registrant as specified in its charter)

WASHINGTON

*(State or other jurisdiction of
incorporation or organization)*

91-1714307

*(I.R.S. Employer
Identification No.)*

**401 Elliott Ave West
Seattle, Washington 98119**

(Address of principal executive offices)

(206) 272-5555

(Registrant's telephone number, including area code)

**Securities registered pursuant to Section 12(b) of the Act:
Common Stock, no par value**

Title of Each Class
Common stock, no par value

Name of Each Exchange on Which Registered
NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of March 31, 2008, the aggregate market value of the Registrant's Common Stock held by non-affiliates of the Registrant was \$1,466,793,746 based on the closing sales price of the Registrant's Common Stock on the Nasdaq Global Market on that date.

As of November 19, 2008, the number of shares of the Registrant's common stock outstanding was 79,651,844.

DOCUMENTS INCORPORATED BY REFERENCE

Information required in response to Part III of this Form 10-K (Items 10, 11, 12, 13 and 14) is hereby incorporated by reference to the specified portions of the Registrant's Definitive Proxy Statement for the Annual Shareholders Meeting for fiscal year 2008, which Definitive Proxy Statement shall be filed with the Securities and Exchange Commission pursuant to Regulation 14A within 120 days of the end of the fiscal year to which this Report relates.

Unless the context otherwise requires, in this Annual Report on Form 10-K, the terms F5 Networks, the Company, we, us, and our refer to F5 Networks, Inc. and its subsidiaries. Our fiscal year ends on September 30 and fiscal years are referred to by the calendar year in which they end. For example, fiscal year 2008 and fiscal 2008 refer to the fiscal year ended September 30, 2008.

Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 and Section 27A of the Securities Act of 1933. These statements include, but are not limited to, statements about our plans, objectives, expectations, strategies, intentions or other characterizations of future events or circumstances and are generally identified by the words expects, anticipates, intends, plans, believes, seeks, estimates, and similar expressions. These forward-looking statements are based on current information and expectations and are subject to a number of risks and uncertainties. Our actual results could differ materially and adversely from those expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed under Item 1A. Risk Factors below and in other documents we file from time to time with the Securities and Exchange Commission. We assume no obligation to revise or update any such forward-looking statements.

Item 1. Business

General

F5 Networks is a leading provider of technology that optimizes the delivery of network-based applications and the performance and availability of servers, data storage devices and other network resources.

Founded in 1996, F5 pioneered load-balancing technology that distributes internet traffic evenly across multiple web servers, making them look like a single server. Today, our BIG-IP application delivery controllers sit in front of web and application servers, balancing traffic and performing compute-intensive functions such as encrypting and unencrypting transmissions, screening traffic for security threats, maintaining open connections with servers, speeding the flow of traffic and a variety of other functions that improve the performance, availability and security of applications and would otherwise be performed by the servers themselves. By offloading functions from servers, BIG-IP makes servers more efficient and reduces the number of servers needed to run specific applications. BIG-IP also supports software modules that manage the flow of traffic between multiple data centers and across multiple service provider connections, ensuring that this traffic is always routed to the most available resource. In addition, we

offer complementary products that provide secure remote access to corporate networks and optimize the delivery of applications over wide-area networks.

We believe our application delivery controllers and related products are superior to competing technology in both functionality and performance. The core of these products is our full-proxy Traffic Management Operating System (TMOS) that enables them to inspect and modify traffic flows to and from servers at

Table of Contents

network speed and supports a broad array of functions that enhance the speed, performance and availability of applications. iRules, a scripting language based on TCL (Tools Command Language), is a unique feature of TMOS that enables customers and third parties to write customized rules to inspect and modify traffic. TMOS also supports a common software interface called iControl, which enables our products to communicate with one another and with third-party products, including custom and commercial enterprise applications. TMOS is designed to support the addition of new functionality as software modules and to exploit the performance-enhancing features of our purpose-built hardware platforms. Correspondingly, our hardware architecture integrates industry standard components in ways that exploit the unique features and characteristics of TMOS to deliver performance that is demonstrably superior to competing products.

Just as our application delivery controllers make many servers look like one, ARX storage virtualization products sit in front of networked attached storage (NAS), making multiple storage devices from different vendors look like a single device to the individual clients, servers and applications that use them. This frees users and storage administrators from the time-consuming task of mapping individual drives to specific clients and applications. In addition, ARX products simplify the migration of data between storage devices, the addition of new storage devices, and the distribution of data across tiers of storage that reflect the relative importance or immediacy of the data.

In connection with our products, we offer a broad range of services including consulting, training, installation, maintenance and other technical support services.

F5 Networks was incorporated on February 26, 1996 in the State of Washington. Our headquarters is in Seattle, Washington and our mailing address is 401 Elliott Avenue West, Seattle, Washington 98119. The telephone number at our executive offices is (206) 272-5555. We have subsidiaries or branch offices in Australia, Belgium, China, France, Germany, Hong Kong, India, Israel, Italy, Japan, Malaysia, Netherlands, New Zealand, Northern Ireland, Russia, Singapore, South Korea, Spain, Taiwan, Thailand and the United Kingdom. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports are available free of charge on our website, www.f5.com, as soon as reasonably practicable after such material is electronically filed with the Securities and Exchange Commission.

Industry Background

Growth of IP Networks

Internet Protocol (IP) is a communications language used to transmit data over the Internet. Since the late 1990s, businesses have responded to the power, flexibility and efficiency of the Internet by deploying new IP-based applications, upgrading their client-server applications to new IP-enabled versions, and enabling existing or legacy applications for use over the Internet. At the same time, organizations have become more geographically dispersed, and increasingly mobile workforces depend on access to corporate applications and data from remote locations and a variety of client devices such as cellular telephones, personal digital assistants and notebook computers.

Over the next several years, we believe these trends will accelerate as more organizations discover the benefits of IP-enabled applications. In addition, we believe the growth of Internet usage will continue to be driven by new applications, such as Web Services and Voice over IP, the growth of broadband Internet access and new usage and infrastructure models such as cloud computing.

In conjunction with the growth of Internet traffic, the proliferation of data and, in particular, unstructured data such as voice, video, images, email, spreadsheets and formatted text files, presents an enormous and increasing challenge to IT organizations. Along with the growing volume of unstructured data that is business-critical and must be retained and readily accessible to individuals and applications, new regulations mandate that company email, web pages and

other files must be retained indefinitely. In response to this challenge, IT organizations spend an increasing amount of their budget on NAS and other types of storage systems.

Table of Contents

Trend Toward Virtualization

From a broad perspective, the goal of IT organizations is to optimize the secure delivery of applications and data to users wherever they are and whenever they need them. To achieve this goal, organizations are embracing virtualization technologies that enable them to group or partition data center resources to meet user demand and reconfigure these virtual resources easily and quickly as demand changes. Server virtualization, which allows organizations to improve utilization of physical servers by partitioning them into multiple virtual servers, is well known and widely deployed. Application delivery controllers free up both physical and virtual server processing power by offloading common functions, such as encryption and compression from multiple physical or virtual servers, and dynamically manage the flow of traffic between users and both virtual and physical servers, making them look like a single resource to the user. Server virtualization puts additional pressure on storage resources by increasing storage capacity and traffic requirements. Sitting in front of storage systems, file virtualization devices perform functions similar to application delivery controllers, presenting the appearance of a single resource to users and applications and dynamically managing the transfer of files between users and applications and multiple storage devices.

Application Delivery Networking

Internet traffic passing between client devices and servers is divided into discrete packets which travel by multiple routes to their destination where they are reassembled. The disassembly, routing, and reassembly of transmissions are relatively straightforward and require little intelligence. By contrast, application delivery networking managing, inspecting, modifying and redirecting application traffic going to and from servers requires intelligent systems capable of performing a broad array of functions.

Basic application delivery networking (ADN) functions include load-balancing (distributing traffic across multiple servers while making them appear to be a single server) and health-checking (monitoring the performance of servers and applications to ensure that they are working properly before routing traffic to them). In addition, ADN encompasses a growing number of functions that have typically been performed by the server or the application itself, or by point solutions running on separate devices. These include:

SSL Acceleration using Secure Socket Layer (SSL) encryption to secure traffic between the server and the browser on an end user's client device;

Rate Shaping prioritizing transmissions according to preset rules that give precedence to different types of traffic;

Compression reducing the volume of data transmitted to take maximum advantage of available bandwidth;

TCP Optimization improving server efficiency by maintaining an open connection with a server during interactive sessions;

IPv6 Translation enabling communication and interoperability between networked devices using IPv6, the newest version of the Internet Protocol, and those using the older version IPv4;

Application Security protecting critical web applications from attacks such as Google hacking, cross-site scripting, and parameter tampering;

Web Acceleration enhancing the performance of web applications over wide area networks by reducing latency, eliminating errors, and resolving other issues that slow delivery;

WAN Optimization improving the performance of applications accessed over wide area network links by reducing the number of round trips required and ensuring maximum use of available bandwidth;

Global Traffic Management ensuring high availability, maximum performance and global management for applications running across multiple, globally-dispersed data centers; and

Link Load Balancing monitoring availability and performance of multiple WAN connections and intelligently managing bi-directional traffic flows to ensure uninterrupted, optimized Internet access.

Table of Contents

Since most large enterprises have hundreds if not thousands of servers and applications, it is not practical to replicate these functions on each server or build them into the applications themselves. Even if it were, maintenance costs would be prohibitive and the net result would be a negative impact on the overall performance of servers and applications. Deploying point solutions in the network eliminates those problems but creates a new set of challenges. Using point solutions from multiple vendors can create interoperability issues, and problems that do occur can be difficult to troubleshoot. From a security standpoint, it is also much more difficult to audit traffic passing through multiple devices. As a result, enterprise customers are increasingly demanding products that integrate ADN functions on a single platform.

File Virtualization

Along with other types of IP traffic, the volume of file-based information created and accessed by Internet users and network applications is growing rapidly. According to some estimates, the volume of unstructured files is expected to triple annually over the next several years. The challenge of storing and managing unstructured files is becoming increasingly costly and complex, and reducing the cost and complexity is quickly moving up the list of data center priorities.

In many large organizations whose employees are geographically dispersed, unstructured data is stored on local file servers, which are difficult to manage, costly to maintain and generally underutilized. Information on these devices is easy for local users to access but often inaccessible to others in the organization. To reduce the cost, complexity, and redundancy of dispersed file systems, many IT organizations are consolidating file storage on centralized NAS devices and other types of storage systems. Migrating and consolidating files is difficult and time-consuming, however, and centralized storage systems pose a different set of problems.

Centralized storage of files can slow access for remote users and applications, spurring interest in technology that can speed the transfer of files across wide area networks (WANs). In addition, only users and applications that are physically mapped to a specific drive can store and access data on that drive. As the drive fills up, files must be moved manually to a new drive and affected users and applications must be remapped to that drive. In large organizations, this often constitutes a round-the-clock chore for many highly-skilled employees.

Another major storage problem stems from the fact that all files are not created equal. Many businesses and other organizations have policies or other obligations to retain email and other files, increasing the volume of data to archive and, in some cases, to keep indefinitely. Since it is unlikely that these files will be accessed frequently, if at all, in the course of normal business, it makes little sense to store them on expensive, high-performance systems designed to provide immediate access to business-critical information. As a result, IT organizations are beginning to deploy tiers of storage systems that match cost, capacity, and performance to the type of information being stored, how frequently it is accessed, and its relative importance to the business. Often, the most cost-effective solution is a combination of storage systems from different vendors, an approach that typically entails migrating huge amounts of data between incompatible devices. Once that is completed, organizations face the challenge of automating the tiering process and the management of aging files.

Whether or not they deploy tiered file systems, many organizations are beginning to address the mounting cost in time and resources of backing up data stored on employee desktops, local file servers, and other devices. According to some estimates, approximately 80% of the files organizations back up have not changed since the previous back-up. Worse yet, a large and growing percentage are music and video files, family photographs, and other personal files.

Responding to increasing demand from IT organizations, a number of storage vendors and a handful of other companies offer solutions that address some or all of these issues and can be loosely grouped under the heading of file

virtualization. Collectively, these solutions encompass a variety of technological approaches designed to optimize and simplify the storage of unstructured data.

Table of Contents

F5 Solutions

Application Delivery Networking

F5 is a leading provider of application delivery networking products that ensure the security, optimization and availability of applications for any user, anywhere. We believe our products offer the most intelligent architecture and advanced functionality in the marketplace along with performance, flexibility and usability features that help organizations improve the way they serve their employees, customers, and partners while lowering operational costs.

Software Based Products. From inception, we have been committed to the belief that the complexity of application-level processing requires the flexibility of a software-based solution. We believe our modular software architecture enables us to deliver the broadest range of integrated functionality in the market and facilitates the addition and integration of new functionality. We also believe that integrating our software with commodity hardware components enables us to build products that deliver superior performance, functionality and flexibility at competitive prices.

Full Proxy Architecture. The core of our software technology is the Traffic Management Operating System (TMOS) introduced in September 2004 as part of BIG-IP version 9. We believe this is a major enhancement of our previous technology that enables our products to deliver functionality that is superior on many levels to any other application delivery networking product in the market. With TMOS, our products can inspect, modify and direct both inbound and outbound traffic flows across multiple packets. This ability to manage application traffic to and from servers adds value to applications that pass through our devices in ways that are not possible with other application delivery networking solutions.

Modular Functionality. In addition to its full proxy architecture, TMOS is specifically designed to facilitate the development and integration of application delivery networking functions as modules that can be added to BIG-IP's core functionality to keep pace with rapidly evolving customer needs. Add-on modules currently available with BIG-IP include: Intelligent Compression; SSL Acceleration; Rate Shaping; Advanced Client Authentication; IPv6 Gateway; Caching; and others. We also offer Application Security Manager (ASM), Global Traffic Manager (GTM), Link Controller, and WebAccelerator as software modules on BIG-IP.

Application Awareness. The open architecture of TMOS includes an application programming interface (API) called iControl that allows our products to communicate with one another and with third-party software and devices. Through this unique feature, third-party applications and network devices can take an active role in shaping IP network traffic, directing traffic based on exact business requirements defined by our customers and solutions partners and tailored to specific applications. This application awareness capability is one of the most important features of our software-based products and further differentiates our solutions from those of our competitors.

Adaptive Intelligence. The full-proxy capabilities of TMOS enable it to inspect or read the entire contents of a transmission across multiple packets and identify specific elements of that transmission, including items such as names, dates, and any type of number or label. By taking advantage of our unique scripting capability, based on Tool Command Language (TCL), customers can use those elements as variables to create iRules that modify the content and direct the flow of traffic in ways tailored to the dynamic needs of their applications. iRules is a unique feature of TMOS that gives our products flexibility unmatched by competing products.

Integrated Application Layer Solutions. The combination of our full proxy architecture and enhanced iRules enables BIG-IP to intercept, inspect and act on the contents of traffic from virtually every type of IP-enabled application. In addition, the modularity of the TMOS architecture allows us to deliver tightly integrated solutions that secure, optimize and ensure the availability of applications and the networks they run on.

Table of Contents

Data Solutions

F5's data solutions products address many of the problems associated with managing today's rapidly expanding file storage infrastructure. Our ARX product family of intelligent file virtualization devices represents a unique set of capabilities that optimize the performance and utilization of NAS storage systems.

Non-disruptive Data Migration. ARX automates the movement of files between heterogeneous storage devices without affecting access and without requiring client reconfiguration. Enterprises can perform seamless hardware & software upgrades on file storage platforms, server consolidation, even vendor switches, all during business hours.

Automated Storage Tiering. ARX automates the movement of data between tiers of storage, and the placement of data on appropriate tiers of storage, irrespective of platform or vendor. Organizations can lower the cost of storage and shrink backup and recovery windows by automatically placing data on appropriate storage devices without affecting access to the data.

Dynamic Load Balancing. ARX dynamically distributes files across multiple file storage devices, eliminating hotspots or bottlenecks. Companies can improve application performance and increase productivity using the storage infrastructure that is already in place.

Efficient Data Replication. ARX provides the ability to replicate files between heterogeneous storage platforms for efficient and cost effective disaster recovery and centralized backup applications.

Strategy

Our objective is to lead the industry in delivering the enabling architectures that integrate IP networks with applications and data. Our products provide strategic points of control in the IT infrastructure that allow business policies to be implemented where information is exchanged, allowing organizations to respond quickly to changing business needs, improve costly and time consuming business processes and develop new sources of revenue through highly differentiated offerings. Key components of our strategy include:

Offering a complete, integrated application delivery product suite.

Since the introduction of our TMOS architecture for application delivery networking, we have developed TMOS-based versions of our own legacy products, such as GTM and Link Controller, and acquired technology, including Application Security Manager (ASM), WebAccelerator, and WANJet. ASM and WebAccelerator are currently available as software modules on our BIG-IP family of application delivery controllers. In addition, we are currently developing the next generation of TMOS-based versions of our WAN Optimization and secure remote access products, TMOS-based versions of WANJet and FirePass, which we plan to release in fiscal year 2009. We believe this approach sharply differentiates our products from our competitors' offerings and provides customers with an expanding array of integrated application delivery networking solutions that can be customized to meet their specific needs.

Investing in technology to continue to meet customer needs.

We continue to invest in research and development to provide our customers with comprehensive, integrated solutions. In application delivery networking, our product development efforts leverage the unique attributes of our software-based platforms to deliver new features and functions that address the complex and changing needs of our customers. Our acquisition investments in ARX are aimed at providing data solutions to the complex challenge of efficiently storing and managing the huge and growing volume of unstructured files created by network users and

applications. For both our application delivery controllers and file virtualization products, development of high-performance, proprietary hardware is a key component of our investment strategy. In developing these products, we will continue to use commodity hardware in order to ensure performance and cost competitiveness.

Table of Contents

Enhancing channel sales and distribution model.

We continue to invest significant resources in developing and expanding our indirect sales and distribution channels by cultivating our relationships with our existing partners and actively developing new relationships. Our efforts to recruit new partners are aimed primarily at large value-added resellers, systems integrators, and industry-leading systems manufacturers.

Continuing to build and expand relationships with strategic technology partners.

To compete successfully against Cisco and other large competitors who have an established presence in our target accounts, we have developed strategic technology partnerships with enterprise software vendors, such as Microsoft, Oracle and SAP, who also have an established presence in those accounts. By taking advantage of our open application programming interface, called iControl, these vendors can enable their applications to control our products in the network, enhancing overall application performance. In addition, we have worked closely with several of these vendors to develop configurations of our products, called application ready networks that are specifically tuned to simplify deployment and optimize the performance of their applications. In return, these vendors provide us significant leverage in the selling process by recommending our products to their customers. We plan to continue building on our existing relationships and to extend our competitive edge by developing new relationships with other strategic partners.

Leveraging DevCentral, our online community of network architects and developers.

Customization of our products using iRules enhances their stickiness by allowing customers to solve problems in both their applications and their networks that would be difficult if not impossible to solve by other means. To promote the use of iRules, we host an online community where network architects and developers can discuss and share the ways in which they use iRules to solve problems and enhance the security, performance and availability of applications. A corollary benefit is that many of the iRules solutions posted by DevCentral participants have become standard features in new releases of TMOS.

Enhancing our brand.

We plan to continue building awareness of F5 as a leading provider of application delivery networking products that enable agility, improve efficiency and optimize the security, performance and availability of network applications, servers and storage systems. Our goal is to make the F5 brand synonymous with superior technology, high quality customer service, trusted advice and definitive business value.

Products

Our core technology is hardware and software for application delivery networking, including application security, secure remote access, WAN optimization and file virtualization.

All of our products are systems that integrate our software with purpose-built hardware that incorporates commodity components. Our BIG-IP product family, which represents the bulk of our sales, supports a growing number of features and functions as software modules including GTM (Global Traffic Manager), Link Controller, ASM (Application Security Manager) and WebAccelerator. We also sell FirePass, WANJet and WebAccelerator as separate, stand-alone appliances.

BIG-IP

Products in our family of BIG-IP application delivery controllers all run TMOS and differ primarily in the hardware configurations that make up each system. Our current BIG-IP systems include five hardware platforms. In fiscal year 2008 we introduced new entry- level products (BIG-IP 1600 and 3600), which replaced BIG-IP 1500 and 3400, delivering more functionality and twice the performance at approximately the same price. During fiscal year 2009, we also plan to introduce new products to replace our mid-range (BIG-IP 6400 and 6800) and high-end (BIG-IP 8400 and 8800) platforms. In addition to local area traffic management, which is standard on every system, BIG-IP supports a growing number of add-on software products and

Table of Contents

features. Software products currently available on all BIG-IP platforms except BIG-IP 1600 include GTM, Link Controller, ASM, and WebAccelerator. Standard features on all platforms include Advanced Client Authentication, Advanced Routing, Fast Cache, Intelligent Compression, IPv6 Gateway, L7 Rate Shaping, Message Security Module, Protocol Security Module and SSL Acceleration.

VIPRION

Introduced in January 2007, VIPRION is our chassis-based application delivery controller that scales from one to four blades, each equipped with two dual-core processors and equivalent in performance to a BIG-IP 8800. Using clustered multiprocessing, custom disaggregation ASICs and advanced software, VIPRION allows customers to add or remove blades without disrupting traffic and distributes traffic across all available processors, effectively creating a single virtual processor. VIPRION helps customers simplify their networks by offloading servers and consolidating devices, saving management costs as well as power, space, and cooling in the datacenter and by reducing the number of application delivery controllers they need to deliver even the most demanding applications. By offloading computationally intense processes, VIPRION can also significantly reduce the number of application servers needed.

FirePass

FirePass appliances provide SSL VPN access for remote users of IP networks and any applications connected to those networks from any standard Web browser on any device. The components of FirePass include a dynamic policy engine, which manages user authentication and authorization privileges, and special components that enable corporations to give remote users controlled access to the full array of applications and resources within the network. FirePass also supports Application Ready Access, providing full reverse-proxy services for market-leading application portals including those of SAP, Oracle, Microsoft, and others.

Currently, we sell three FirePass products: The FirePass 1200 appliance is designed for small to medium enterprises and branch offices and supports from 10 to 100 concurrent users. The FirePass 4100 controller is designed for medium size enterprises and, from a price/performance standpoint, is recommended for up to 500 concurrent users. The FirePass 4300 appliance is designed for medium to large enterprises and service providers and supports up to 2,000 concurrent users.

Application Security Manager (ASM)

Application Security Manager is a Web application firewall that provides comprehensive, proactive, application-layer protection against both generalized and targeted attacks. Available as a software module on BIG-IP LTM, ASM employs a positive security model (deny all unless allowed) combined with signature-based detection. As a result, ASM can prevent day-zero attacks in addition to known security threats. ASM is available as a stand-alone hardware platform.

WebAccelerator

WebAccelerator speeds web transactions by optimizing individual network object requests, connections, and end-to-end transactions from the browser through to databases. WebAccelerator enhances web application performance from any location, speeding up interactive performance, improving download times, utilizing bandwidth more efficiently, and dramatically reducing the cost and response time of delivering Web-enabled applications to distributed users where it is not possible to deploy an end point device. WebAccelerator devices can also be placed at key remote locations to provide acceleration to end-users above and beyond TCP optimizations and HTTP compression.

WebAccelerator is available as a software module on BIG-IP LTM or as a stand-alone appliance.

WANJet

WANJet combines WAN optimization and traffic-shaping in a single device to accelerate file transfers, email, data replication, and other applications over IP networks. It provides LAN-like performance on any

Table of Contents

WAN, ensuring predictable application performance for all users, and encrypts and secures all transfers without performance penalties. WANJet is deployed as a dual-sided (symmetric) solution that optimizes application traffic to and from data centers and branch offices.

For data centers, the WANJet 500 features pass-through fault tolerance and scalability for up to 20,000 optimized connections. For branch offices, the WANJet 300 combines pass-through fault tolerant features, silent operation, and performance for up to 1,000 optimized connections. WANJet solutions work seamlessly across all wide-area networks including dedicated links, IP VPNs, frame relay, and even satellite connections.

Enterprise Manager

Enterprise Manager takes advantage of our iControl interface to provide a single, centralized management console for our ADN products. Enterprise Manager allows customers with dozens or hundreds of our products to discover and view those products in a single window, and to upgrade or modify the software on those products simultaneously. This lowers the cost and simplifies the task of deploying, managing and maintaining our products and reduces the likelihood of error when blanket changes are implemented.

Enterprise Manager 500 and Enterprise Manager 3000 are appliance-based devices on dedicated, enterprise-grade platforms. Enterprise Manager 500 provides control for up to 50 F5 devices, and Enterprise Manager 3000 provides control for up to 300 F5 devices.

ARX

The ARX product family is a series of high performance, enterprise-class intelligent file virtualization devices that dramatically simplify the management of file storage environments and lower total storage costs by automating data management tasks and eliminating the disruption associated with storage management operations. The ARX series is powered by the FreedomFabric network operating system, which automates many storage management tasks that are performed manually today, and eliminates the disruption associated with those tasks. FreedomFabric's unique suite of storage management policies includes data migration, automated storage tiering, data replication, and dynamic load balancing.

Currently, the ARX series includes four products. The ARX 500, the low end of the series, is a stand-alone device that can manage more than 120 million files. The ARX 1000 is a stand-alone device and can manage more than 380 million files. In October 2008, we introduced the ARX 4000, a fixed form-factor device supporting 10 gigabit Ethernet and capable of managing more than 2 billion files. The high-end ARX 6000 is a chassis-based device with multiple blades that can manage more than 2 billion files.

Additionally in October 2008, we introduced F5 Data Manager, a software product that interfaces directly with most file storage devices, including ARX file virtualization platforms. Data Manager gathers valuable file storage statistics and provides graphical reporting and trending functions to give users visibility into their constantly changing data storage environments, helping them respond to business needs and better plan for future growth.

Enabling Technologies

iControl is an application programming interface that allows customers and independent software vendors to modify their programs to communicate with our products, eliminating the need for human involvement, lowering the cost of performing basic network functions and reducing the likelihood of error. Although we do not derive revenue from iControl itself, the sale of iControl-enabled applications by independent software vendors such as Microsoft and Oracle helps promote and often leads directly to the sale of our other products.

iRules is a built-in feature of our TMOS architecture that allows customers to manipulate and manage any IP application traffic that passes through our TMOS-based products. iRules has an easy-to-learn scripting syntax and enables users to customize how they intercept, inspect, transform, and direct inbound or outbound application traffic.

Table of Contents

Product Development

We believe our future success depends on our ability to maintain technology leadership by continuing to improve our products and by developing new products to meet the changing needs of our customers. Our product development group employs a standard process for the development, documentation and quality control of software and systems that is designed to meet these goals. This process includes working with management, product management, customers and partners to identify new or improved solutions that meet the evolving needs of our addressable markets.

Our principal software engineering group is located in our headquarters in Seattle, Washington. Our core product development teams for FirePass, WANJet and WebAccelerator are located in San Jose, California. We also have a smaller development facility for WANJet and WebAccelerator in Belfast, Northern Ireland. Our core Application Security Manager (ASM) product development team is located in Tel Aviv, Israel. Our ARX product development team is located in Lowell, Massachusetts. Our hardware engineering group is located in Spokane, Washington. In addition, we maintain a dedicated facility for product testing and quality control in Tomsk, Russia. Members of all these teams collaborate closely with one another to ensure the interoperability and performance of our hardware and software systems.

During the fiscal years ended September 30, 2008, 2007 and 2006, we had research and product development expenses of \$103.4 million, \$69.0 million, and \$49.2 million, respectively.

Customers

Our customers include a wide variety of enterprise customers and service providers among Fortune 1000 and Business Week Global 1000 companies, including those in technology, telecommunications, financial services, transportation, and manufacturing industries, along with government customers. In fiscal year 2008, international sales represented 42.5% of our net revenues. Refer to Note 10 of our consolidated financial statements included in this Annual Report on Form 10-K for additional information regarding our revenues by geographic area.

Sales and Marketing

Sales

We sell our products and services to large enterprise customers and service providers through a variety of channels, including distributors, value-added resellers (VARs) and systems integrators. A substantial amount of our revenue for fiscal year 2008 was derived from these channel sales. Our sales teams work closely with our channel partners and sell our products and services directly to a limited number of major accounts.

F5 sales teams. Our inside sales team generates and qualifies leads for regional sales managers and helps manage accounts by serving as a liaison between the field and internal corporate resources. Our field sales personnel are located in major cities in four sales regions: the Americas; Europe, the Middle East, and Africa (EMEA); Japan; and the Asia Pacific region (APAC). Field sales personnel work closely with our channel partners to assist them, as necessary, in the sale of our products and services to their customers. We also sell our products and services directly to a limited group of customers, primarily large enterprises, whose accounts are managed by our major account services team. Field systems engineers support our regional sales managers and channel partners by participating in joint sales calls and providing pre-sale technical resources as needed.

Distributors and VARs. Consistent with our goal of building a strong channel sales model, we have established relationships with a number of large national and international distributors, local and specialized distributors and VARs. We derive a majority of our product sales from these distributors and VARs.

Our agreements with these channel partners are not exclusive and do not prevent them from selling competitive products. These agreements typically have terms of one year with no obligation to renew, and typically do not provide for exclusive sales territories or minimum purchase requirements.

Table of Contents

For fiscal year 2008, sales to two of our distributors, Ingram Micro, Inc., and Avnet Technologies, represented 10.5% and 14.0% of our total revenues, respectively. Our agreements with these distributors are standard, non-exclusive distribution agreements that renew automatically on an annual basis and can be terminated by either party with 30 days prior written notice. The agreements grant Ingram Micro and Avnet Technologies the right to distribute our products to resellers in North America and certain other territories internationally, with no minimum purchase requirements.

Systems integrators. We also market our products through strategic relationships with systems integrators, who include our products as core components of application or network-based solutions they deploy for their customers. In most cases, systems integrators do not directly purchase our products for resale to their customers. Instead they typically recommend our products as part of broader solutions, such as enterprise resource planning (ERP) or customer relationship management (CRM) solutions, that incorporate our products for high availability and enhanced performance.

Marketing

Our marketing strategy is driven by the belief that our continued success depends on our ability to understand and anticipate the dynamic needs of our addressable markets and to develop valuable solutions that meet those needs. In line with this belief, our marketing organization works directly with customers, partners and our product development teams to identify and create innovative solutions to further enhance our leadership position. In addition, our business development team, which is a component of our marketing organization, closely monitors technology companies in adjacent and complementary markets for opportunities to acquire or partner with those whose solutions are complementary to ours and could enable us to expand our addressable market.

Another key component of our marketing strategy is to develop and expand our iControl partnerships. Working closely with our partners, we have developed solution sets called Application Ready Networks (ARNs) that help ensure the successful deployment and delivery of their applications over the network. The result of methodical testing and research, ARNs provide architecture-based, best-practice documentation on how to deploy F5 products with applications from major software vendors such as Microsoft, Oracle and SAP, helping joint customers unlock the full potential of those applications.

To support the growing number of developers using our products, including network and application architects, we continue to promote and expand DevCentral, our on-line community website that provides technical resources to customers, prospects and partners wanting to extend and optimize F5 solutions using iRules. A key aspect of DevCentral is an on-line forum where developers as well as application and network architects discuss and share solutions they have written with iRules. At the end of fiscal 2008, DevCentral had more than 32,600 registered members.

We also engage in a number of marketing programs and initiatives aimed at promoting our brand and creating market awareness of our technology and products. These include actively participating in industry trade shows and joint marketing events with channel and technology partners, and briefing industry analysts and members of the trade press on our latest products, business relationships and technology partnerships. In addition, we market our products to chief information officers and other information technology professionals through targeted advertising, direct mail and high-profile Web events.

Backlog

At the end of fiscal years 2008 and 2007, we had product backlog of approximately \$10.9 million and \$9.9 million, respectively. Backlog represents orders confirmed with a purchase order for products to be shipped generally within

90 days to customers with approved credit status. Orders are subject to cancellation, rescheduling by customers or product specification changes by customers. Although we believe that the backlog orders are firm, purchase orders may be cancelled by the customer prior to shipment without significant penalty. For this reason, we believe that our product backlog at any given date is not a reliable indicator of future revenues.

Table of Contents

Customer Service and Technical Support

We believe that our ability to provide consistent, high-quality customer service and technical support is a key factor in attracting and retaining large enterprise customers. Accordingly, we offer a broad range of support services that include installation, phone support, hardware repair and replacement, software updates, consulting and training services. We deliver these services directly to end users and also utilize a multi-tiered support model, leveraging the capabilities of our channel partners when applicable. Our technical support staff is strategically located in regional service centers to support our global customer base.

Prior to the installation of our products, our services personnel work with customers to analyze their network needs and determine the best way to deploy our products and configure product features and functions to meet those needs. Our services personnel also provide on-site installation and training services to help customers make optimal use of product features and functions.

Our customers typically purchase a one-year maintenance contract which entitles them to an array of services provided by our technical support team. Maintenance services provided under the contract include online updates, software error correction releases, hardware repair and replacement, and remote support through a 24 hours a day, 7 days a week help desk, although not all service contracts entitle a customer to round-the-clock call center support. Updates to our software are only available to customers with a current maintenance contract. Our technical support team also offers seminars and training classes for customers on the configuration and use of products, including local and wide area network system administration and management. In addition, we have a professional services team able to provide a full range of fee-based consulting services, including comprehensive network management, documentation and performance analysis, and capacity planning to assist in predicting future network requirements.

We also offer, as part of our maintenance service, an online, automated, self-help customer support function called Ask F5 that allows customers to answer many commonly asked questions without having to call our support desk. This allows the customer to rapidly address issues and questions, while significantly reducing the number of calls to our support desk. This enables us to provide comprehensive customer support while keeping our support-related expenses at a manageable, consistent level.

Manufacturing

We outsource the manufacturing of our pre-configured hardware platforms to third party contract manufacturers for assembly according to our specifications.

Flextronics was our primary third party manufacturer in 2008. Flextronics also installs our software onto the hardware platforms and conducts functionality testing, quality assurance and documentation control prior to shipping our products. Our agreement with Flextronics allows it to procure component inventory on our behalf based upon a rolling production forecast. Subcontractors supply Flextronics with standard parts and components for our products based on our production forecast. We are contractually obligated to purchase component inventory that our contract manufacturer procures in accordance with the forecast, unless we give notice of order cancellation in advance of applicable lead times. As protection against component shortages and to provide replacement parts for our service teams, we also stock limited supplies of certain key components for our products.

Hardware platforms for our products consist primarily of commodity parts and certain custom components designed and approved by our hardware engineering group. Most of our components are purchased from sources which we believe are readily available from other suppliers. However, several components used in the assembly of our products are purchased from single or limited sources such as our proprietary Packet Velocity ASIC for Layer 4 processing that is manufactured for us by a third-party contract semiconductor foundry.

Competition

The increasing breadth of our product offerings has enabled us to address a growing array of opportunities, many of which are outside the bounds of the traditional Layer 4-7 market. Within what Gartner Group calls the Application Acceleration market, we compete in the Application Delivery Controller (ADC) market,

Table of Contents

which encompasses the traditional Layer 4-7 market, and the WAN Optimization Controller market. Over the next several years, we believe these two market segments will merge as WAN optimization effectively becomes a feature of Application Delivery. With the availability of ASM and WebAccelerator as software modules on BIG-IP, these products have already become features of our overall ADN solution, and our strategic roadmap includes plans to integrate FirePass with BIG-IP over the next 12 to 18 months. For the immediate future, however, the WAN optimization and secure remote access application security market segments will continue to be viewed as discrete markets.

In 2008, approximately 88% of our products and services were sold into the ADC market where our primary competitor is Cisco Systems, Inc. Other competitors in this market include Citrix Systems, Inc., and to a lesser degree Nortel Networks Corporation and Radware Ltd.

In the adjacent WAN Optimization market, WANJet competes mainly with products from BlueCoat Systems, Cisco, Citrix, Juniper Networks, Inc. and Riverbed Technology, Inc. None of our competitors offers an integrated product with advanced features comparable to WebAccelerator.

In the SSL VPN remote access market, we compete with Juniper, Citrix, Nokia Corporation, Nortel, SonicWall, Inc., Symantec Corporation and a number of smaller players. Because SSL VPNs are a potential replacement for IPSec VPNs, the most widely deployed solution for secure remote access today, we also compete with Check Point Software Technologies, Ltd. which, along with Juniper, is a market leader in IPSec VPNs. Citrix offers a web firewall acquired from Teros, Inc. as a module on its Netscaler products.

Application firewalls represent an emerging market that is populated mainly by private, early-development-stage companies. Other companies that have acquired products similar to ASM include Citrix Systems. None of our competitors offers a high-performance product similar to our Application Security Module, which is tightly integrated with our application delivery products.

File virtualization remains an early-stage market, the growth of which has been slowed by the recent global economic downturn. We believe our ARX file virtualization products are unique in terms of technology and functionality and are well positioned within this emerging market. However, large storage vendors such as EMC Corporation, NetApp Inc., Brocade Communications Systems, Inc., and Cisco offer competing products with overlapping functionality.

Many of our competitors have a longer operating history and greater financial, technical, marketing and other resources than we do. These larger competitors also have a more extensive customer base and broader customer relationships, including relationships with many of our current and potential customers. In addition, many have large, well-established, worldwide customer support and professional services organizations and more extensive direct sales force and sales channels. Because of our relatively smaller size, market presence and resources, our larger competitors may be able to respond more quickly than we can to new or emerging technologies and changes in customer requirements. These companies may also adopt aggressive pricing policies to gain market share. As a result, our competitors could undermine our ability to win new customers and maintain our existing customer base.

Intellectual Property

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. We have obtained 32 patents in the United States and have applications pending for various aspects of our technology. Our future success depends in part on our ability to protect our proprietary rights to the technologies used in our principal products. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or to obtain and use trade secrets or other information that we regard as proprietary. In addition, the laws of some foreign countries do not protect our

proprietary rights as fully as do the laws of the United States. Any issued patent may not preserve our proprietary position, and competitors or others may develop technologies similar to or superior to our technology. Our failure to enforce and protect our intellectual property rights could harm our business, operating results and financial condition.

Table of Contents

In addition to our own proprietary software, we incorporate software licensed from several third-party sources into our products. These licenses generally renew automatically on an annual basis. We believe that alternative technologies for these licenses are available both domestically and internationally.

Employees

As of September 30, 2008, we had 1,694 full-time employees, including 460 in product development, 716 in sales and marketing, 323 in professional services and technical support and 195 in finance, administration and operations. None of our employees is represented by a labor union. We have experienced no work stoppages and believe that our employee relations are good.

Directors and Executive Officers of the Registrant

The following table sets forth certain information with respect to our executive officers and directors as of November 21, 2008:

Name	Age	Position
John McAdam	57	President, Chief Executive Officer and Director
Mark Anderson	46	Senior Vice President of Worldwide Sales
Jeffrey A. Christianson	51	Senior Vice President and General Counsel
Edward J. Eames	50	Senior Vice President of Business Operations
Christopher P. Lynch	45	Senior Vice President of Data Solutions
Dan Matte	42	Senior Vice President of Marketing and Business Development
Andy Reinland	44	Senior Vice President and Chief Finance Officer
John Rodriguez	48	Senior Vice President and Chief Accounting Officer
Karl Triebes	41	Senior Vice President of Product Development and Chief Technical Officer
A. Gary Ames(2)(3)(4)	64	Director
Deborah L. Bevier(1)(2)(4)	57	Director
Karl D. Guelich(1)(3)	66	Director
Alan J. Higginson(2)(3)	61	Chairman of the Board of Directors
Scott Thompson(1)(3)	51	Director

- (1) Member of the Audit Committee.
- (2) Member of the Compensation Committee.
- (3) Member of the Governance and Nominating Committee.
- (4) Member of the Special Committee.

John McAdam has served as our President, Chief Executive Officer and a director since July 2000. Prior to joining us, Mr. McAdam served as General Manager of the Web server sales business at International Business Machines Corporation from September 1999 to July 2000. From January 1995 until August 1999, Mr. McAdam served as the President and Chief Operating Officer of Sequent Computer Systems, Inc., a manufacturer of high-end open systems,

which was sold to International Business Machines Corporation in September 1999. Mr. McAdam holds a B.S. in Computer Science from the University of Glasgow, Scotland.

Mark Anderson has served as our Senior Vice President of Worldwide Sales since October 2007. He joined F5 Networks in October 2004 as Vice President of North American Sales. Prior to joining F5, Mr. Anderson served as Executive Vice President of North American Sales at Lucent Technologies from 2003 to 2004. From 2002 through 2003, Mr. Anderson was Vice President of Business Development at RadioFrame Networks. From 1997 to 2001, he served as a Sales Director at Cisco Systems, Inc. From 1986 to 1996, he was Vice President of Western U.S. Sales at Comdisco. Mr. Anderson holds a B.A. in Business and Economics from York University in Toronto.

Table of Contents

Jeffrey A. Christianson has served as our Senior Vice President and General Counsel of the Company since December 2006. From February 2000 to July 2006, Mr. Christianson was Sr. Vice President and General Counsel of Western Wireless Corporation, a wireless service. From March 1996 to January 2000, Mr. Christianson served as Sr. Vice President of Business Development, General Counsel and Corporate Secretary at Wizards of the Coast, Inc., a game and software company. From September 1992 to March 1996, he served as General Counsel and Secretary of Heart Technology, Inc., a medical device company. From September 1990 to September 1992, he was Vice-President and General Counsel of Spider Staging Corporation and Vice President of Administration and Corporate Counsel for Flow International Corporation after its acquisition of Spider Staging Corporation. Mr. Christianson holds a B.A. from Whitman College and a J.D. from the University of Washington, and serves on the Board of Directors of the Northwest Children's Fund, a Seattle-based community foundation, Family Services, and the Humane Society for Seattle/King County.

Edward J. Eames has served as our Senior Vice President of Business Operations since January 2001 and as our Vice President of Professional Services from October 2000 to January 2001. From September 1999 to October 2000, Mr. Eames served as Vice President of e-Business Services for International Business Machines Corporation. From June 1992 to September 1999, Mr. Eames served as the European Services Director and the Worldwide Vice President of Customer Service for Sequent Computer Systems, Inc., a manufacturer of high-end open systems. Mr. Eames holds a Higher National Diploma in Business Studies from Bristol Polytechnic and in 1994 completed the Senior Executive Program at the London Business School.

Christopher P. Lynch has served as our Senior Vice President, of Data Solutions since the acquisition of Acopia in September 2007. Mr. Lynch served as President and Chief Executive Officer of Acopia from July 2002 to September 2007. Prior to joining Acopia, Mr. Lynch served as Vice President of Worldwide Content Delivery Networking Sales at Cisco Systems. From January 1998 to June 2002, he served as Vice President of Worldwide Sales, Marketing, and Support at ArrowPoint Communications, which was acquired by Cisco Systems. From January 1997 to January 1998, Mr. Lynch served as Vice President of North American sales at Prominet Corp., an Ethernet switch manufacturer, which was acquired by Lucent. Mr. Lynch holds a Master's in Business Administration from Bentley College and a Bachelor's in Business Management from Suffolk University.

Dan Matte has served as our Senior Vice President of Marketing since June 2004, and as Vice President of Product Marketing and Management from March 2002 through May 2004. He has served as our Senior Director of Product Marketing and Management from February 2001 through February 2002. From March 1999 to February 2001, Mr. Matte served as our Director of Product Management. He holds a Bachelor of Commerce from Queen's University and an MBA from the University of British Columbia.

Andy Reinland has served as our Senior Vice President and Chief Finance Officer since October 2005. Mr. Reinland joined F5 in 1998, serving as a senior financial analyst and, most recently, Vice President of Finance. Prior to joining F5, Mr. Reinland was Chief Financial Officer for RTIME, Inc., a developer of real-time 3D software for Internet applications, which was acquired by Sony. Mr. Reinland started his career in public accounting. Mr. Reinland holds a B.A. in Business from Washington State University.

John Rodriguez has served as our Senior Vice President and Chief Accounting Officer since October 2005. For SEC reporting purposes, Mr. Rodriguez is the principal financial officer. Rodriguez joined F5 in 2001 as Corporate Controller. His most recent position held was Vice President and Corporate Controller. Prior to F5, Mr. Rodriguez was Vice President and Chief Financial Officer of CyberSafe, a security solutions company, and Senior Director of Finance and Operations at Mosaix, which was acquired by Lucent Technologies. Mr. Rodriguez started his career in public accounting. Mr. Rodriguez holds a B.A. in Business from the University of Washington.

Karl Triebes has served as our Senior Vice President of Product Development and Chief Technical Officer since August 2004. Prior to joining us, Mr. Triebes served as Chief Technology Officer and Vice President of Engineering of Foundry Networks, Inc. from January 2003 to August 2004. From June 2001 to January 2003, he served as Foundry's Vice President of Hardware Engineering. From May 2000 to June 2001, Mr. Triebes was Vice President of Engineering at Alcatel U.S.A., a telecommunications company. From December 1999 to May 2000, he was Assistant Vice President of Newbridge Networks Corp., a networking company

Table of Contents

subsequently acquired by Alcatel. Mr. Triebes holds a B.S. in Electrical Engineering from San Diego State University.

A. Gary Ames has served as one of our directors since July 2004. Mr. Ames served as President and Chief Executive Officer of MediaOne International, a provider of broadband and wireless communications from July 1995 until his retirement in June of 2000. From January 1990 to July 1995, he served as President and Chief Executive Officer of U S West Communications, a regional provider of residential and business telephone services, and operator and carrier services. Mr. Ames also serves as director of SuperValu, Inc. and iPass, Inc.

Deborah L. Bevier has served as one of our directors since July 2006. Ms. Bevier has been the principal of DL Bevier Consulting LLC, an organizational and management consulting firm, since 2004. Prior to that time, from 1996 until 2003, Ms. Bevier served as a director, president and chief executive officer of Laird Norton Financial Group and its predecessor companies, an independent financial advisory services firm. From 1973 to 1996, Ms. Bevier held numerous leadership positions with KeyCorp including chairman and chief executive officer of Key Bank of Washington. Ms. Bevier currently serves on the Board of Directors of Fisher Communications, Inc. and Coinstar, Inc. Ms. Bevier holds a B.S. in Economics from SUNY New Paltz and a graduate degree from the Stonier Graduate School of Banking at Rutgers University.

Karl D. Guelich has served as one of our directors since June 1999 and as board chair from January 2003 through April 2004. Mr. Guelich retired from Ernst & Young LLP in 1993, where he served as the Area Managing Partner for the Pacific Northwest offices headquartered in Seattle from October 1986 to November 1992. Mr. Guelich was in private practice as a certified public accountant until August 2006. Mr. Guelich holds a B.S. in Accounting from Arizona State University.

Alan J. Higginson has served as board chair since April 2004, and as one of our directors since May 1996. Mr. Higginson is Chairman of Hubspan, Inc., an e-business infrastructure provider. He served as President and Chief Executive Officer of Hubspan from August 2001 to September, 2007. From November 1995 to November 1998, Mr. Higginson served as President of Atrieva Corporation, a provider of advanced data backup and retrieval technology. Mr. Higginson holds a B.S. in Commerce and an M.B.A. from the University of Santa Clara.

Scott Thompson has served as one of our directors since January 2008. Mr. Thompson is President of PayPal, an eBay Company. From February 2005 to January 2008, he served as Senior Vice President and Chief Technology Officer, Payments, Risk and Technology at PayPal. From April 2000 to February 2005, he served as Executive Vice President and Global Chief Information Officer for Inovant/VISA International. From August 1997 to April 2000, he served as Chief Technology Officer and Executive Vice President, Systems Group at VISA USA. Mr. Thompson holds a B.S. in Accounting from Stonehill College.

Keith D. Grinstein served as one of our directors from December 1999 until his death on September 28, 2008. Mr. Grinstein was a member of the Audit Committee and was chair of the Compensation Committee. Subsequent to Mr. Grinstein's death, the Board of Directors decreased the authorized number of directors from seven to six.

Item 1A. Risk Factors

In addition to the other information in this report, the following risk factors should be carefully considered in evaluating our company and its business.

Our success depends on our timely development of new products and features, market acceptance of new product offerings and proper management of the timing of the life cycle of our products

The application delivery networking and file virtualization markets are characterized by rapid technological change, frequent new product introductions, changes in customer requirements and evolving industry standards. Our continued success depends on our ability to identify and develop new products and new features for our existing products to meet the demands of these changes, and the acceptance of those products

Table of Contents

and features by our existing and target customers. If we are unable to identify, develop and deploy new products and new product features on a timely basis, our business and results of operations may be harmed.

The current life cycle of our products is typically 12 to 24 months. The introduction of new products or product enhancements may shorten the life cycle of our existing products, or replace sales of some of our current products, thereby offsetting the benefit of even a successful product introduction, and may cause customers to defer purchasing our existing products in anticipation of the new products. This could harm our operating results by decreasing sales, increasing our inventory levels of older products and exposing us to greater risk of product obsolescence. We have also experienced, and may in the future experience, delays in developing and releasing new products and product enhancements. This has led to, and may in the future lead to, delayed sales, increased expenses and lower quarterly revenue than anticipated. Also, in the development of our products, we have experienced delays in the prototyping of our products, which in turn has led to delays in product introductions. In addition, complexity and difficulties in managing product transitions at the end-of-life stage of a product can create excess inventory of components associated with the outgoing product that can lead to increased expenses. Any or all of the above problems could materially harm our business and results of operations.

Our success depends on sales and continued innovation of our Application Delivery Networking product lines

For the fiscal year ended September 30, 2008, we derived approximately 92.0% of our net product revenues, or approximately 64.1% of our total net revenues, from sales of our Application Delivery Networking (ADN) product lines. We continue to expect to derive a significant portion of our net revenues from sales of our ADN products in the future. Implementation of our strategy depends upon these products being able to solve critical network availability and performance problems of our customers. If our ADN products are unable to solve these problems for our customers or if we are unable to sustain the high levels of innovation in our ADN product feature set needed to maintain leadership in what will continue to be a competitive market environment, our business and results of operations will be harmed.

We may not be able to compete effectively in the emerging application delivery networking and file virtualization markets

The markets we serve are new, rapidly evolving and highly competitive, and we expect competition to persist and intensify in the future. Our principal competitors in the application delivery networking market include Cisco, Nortel, Citrix, and Radware. In the adjacent WAN Optimization market, we compete with Riverbed, Juniper, Blue Coat Systems, Cisco and Citrix. In the file virtualization market, we compete with EMC, Net-App, Brocade and Cisco. We expect to continue to face additional competition as new participants enter our markets. As we continue to expand globally, we may see new competitors in different geographic regions. In addition, larger companies with significant resources, brand recognition, and sales channels may form alliances with or acquire competing application delivery networking solutions from other companies and emerge as significant competitors. Potential competitors may bundle their products or incorporate an Internet traffic management or security component into existing products in a manner that discourages users from purchasing our products. Any of these circumstances may limit our opportunities for growth and negatively impact our financial performance.

Our quarterly and annual operating results are inherently unpredictable and may cause our stock price to fluctuate

Our quarterly and annual operating results have varied significantly in the past and will vary significantly in the future, which makes it difficult for us to predict our future operating results. In particular, we anticipate that the size of customer orders may increase as we continue to focus on larger business accounts. A delay in the recognition of revenue, even from just one account, may have a significant negative impact on our results of operations for a given period. In the past, a majority of our sales have been realized near the end of a quarter. Accordingly, a delay in an

anticipated sale past the end of a particular quarter may negatively impact our results of operations for that quarter, or in some cases, that fiscal year. Additionally, we have exposure to

Table of Contents

the credit risks of some of our customers and sub-tenants. Although we have programs in place that are designed to monitor and mitigate the associated risk, there can be no assurance that such programs will be effective in reducing our credit risks adequately. We monitor individual payment capability in granting credit arrangements, seek to limit the total credit to amounts we believe our customers can pay and maintain reserves we believe are adequate to cover exposure for potential losses. If there is a deterioration of a sub-tenant's or a major customer's creditworthiness or actual defaults are higher than expected, future losses, if incurred, could harm our business and have a material adverse effect on our operating results.

Further, our operating results may be below the expectations of securities analysts and investors in future quarters or years. Our failure to meet these expectations will likely harm the market price of our common stock. Such a decline could occur, and has occurred in the past, even when we have met our publicly stated revenue and/or earnings guidance.

The average selling price of our products may decrease and our costs may increase, which may negatively impact gross profits

It is possible that the average selling prices of our products will decrease in the future in response to competitive pricing pressures, increased sales discounts, new product introductions by us or our competitors or other factors. Therefore, in order to maintain our gross profits, we must develop and introduce new products and product enhancements on a timely basis and continually reduce our product costs. Our failure to do so will cause our net revenue and gross profits to decline, which will harm our business and results of operations. In addition, we may experience substantial period-to-period fluctuations in future operating results due to the erosion of our average selling prices.

It is difficult to predict our future operating results because we have an unpredictable sales cycle

Our products have a lengthy sales cycle and the timing of our revenue is difficult to predict. Historically, our sales cycle has ranged from approximately two to three months and has tended to lengthen as we have increasingly focused our sales efforts on the enterprise market. Also, as our distribution strategy has evolved into more of a channel model, utilizing value-added resellers, distributors and systems integrators, the level of variability in the length of sales cycle across transactions has increased and made it more difficult to predict the timing of many of our sales transactions. Sales of our products require us to educate potential customers in their use and benefits. Sales of our products are subject to delays from the lengthy internal budgeting, approval and competitive evaluation processes that large corporations and governmental entities may require. For example, customers frequently begin by evaluating our products on a limited basis and devote time and resources to testing our products before they decide whether or not to purchase. Customers may also defer orders as a result of anticipated releases of new products or enhancements by our competitors or us. As a result, our products have an unpredictable sales cycle that contributes to the uncertainty of our future operating results.

Our business may be harmed if our contract manufacturers are not able to provide us with adequate supplies of our products or if a single source of hardware assembly is lost or impaired

We outsource the manufacturing of our hardware platforms to third party contract manufacturers who assemble these hardware platforms to our specifications. We have experienced minor delays in shipments from contract manufacturers in the past. However, if we experience major delays in the future or other problems, such as inferior quality and insufficient quantity of product, any one or a combination of these factors may harm our business and results of operations. The inability of our contract manufacturers to provide us with adequate supplies of our products or the loss of one or more of our contract manufacturers may cause a delay in our ability to fulfill orders while we obtain a replacement manufacturer and may harm our business and results of operations. In particular, we currently

subcontract manufacturing of our application delivery networking products to a single contract manufacturer with whom we do not have a long-term contract. If our arrangement with this single source of hardware assembly was terminated or otherwise impaired, and we were not able to engage another contract manufacturer in a timely manner, our business, financial condition and results of operation could be adversely affected.

Table of Contents

If the demand for our products grows, we will need to increase our raw material and component purchases, contract manufacturing capacity and internal test and quality control functions. Any disruptions in product flow may limit our revenue, may harm our competitive position and may result in additional costs or cancellation of orders by our customers.

Our business could suffer if there are any interruptions or delays in the supply of hardware components from our third-party sources

We currently purchase several hardware components used in the assembly of our products from a number of single or limited sources. Lead times for these components vary significantly. The unavailability of suitable components, any interruption or delay in the supply of any of these hardware components or the inability to procure a similar component from alternate sources at acceptable prices within a reasonable time, may delay assembly and sales of our products and, hence, our revenues, and may harm our business and results of operations.

We are subject to governmental export and import controls that could subject us to liability or impair our ability to compete in international markets

Our products are subject to U.S. export controls and may be exported outside the U.S. only with the required level of export license or through an export license exception because we incorporate encryption technology into our products. In addition, various countries regulate the import of certain encryption technology and have enacted laws that could limit our ability to distribute our products or our customers' ability to implement our products in those countries. Changes in our products or changes in export and import regulations may create delays in the introduction of our products in international markets, prevent our customers with international operations from deploying our products throughout their global systems or, in some cases, prevent the export or import of our products to certain countries altogether. Any change in export or import regulations or related legislation, shift in approach to the enforcement or scope of existing regulations or change in the countries, persons or technologies targeted by such regulations, could result in decreased use of our products by, or in our decreased ability to export or sell our products to, existing or potential customers with international operations. For example, we will need to comply with Waste Electrical and Electronic Equipment Directive laws, which are being adopted by certain European Economic Area countries on a country-by-country basis. Failure to comply with these and similar laws on a timely basis, or at all, could have a material adverse effect on our business, operating results and financial condition. Any decreased use of our products or limitation on our ability to export or sell our products would likely adversely affect our business, operating results and financial condition.

We may not be able to adequately protect our intellectual property and our products may infringe on the intellectual property rights of third parties

We rely on a combination of patent, copyright, trademark and trade secret laws, and restrictions on disclosure of confidential and proprietary information to protect our intellectual property rights. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy or otherwise obtain and use our products or technology. Monitoring unauthorized use of our products is difficult, and we cannot be certain that the steps we have taken will prevent misappropriation of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States.

Our industry is characterized by the existence of a large number of patents and frequent claims and related litigation regarding patent and other intellectual property rights. In the ordinary course of our business, we are involved in disputes and licensing discussions with others regarding their claimed proprietary rights and cannot assure you that we will always successfully defend ourselves against such claims. If we are found to infringe the proprietary rights of others, or if we otherwise settle such claims, we could be compelled to pay damages or royalties and either obtain a

license to those intellectual property rights or alter our products so that they no longer infringe upon such proprietary rights. Any license could be very expensive to obtain or may not be available at all. Similarly, changing our products or processes to avoid infringing upon the rights of others may be costly or impractical. In addition, we have initiated, and may in the future initiate, claims or

Table of Contents

litigation against third parties for infringement of our proprietary rights, or to determine the scope and validity of our proprietary rights or those of our competitors. Any of these claims, whether claims that we are infringing the proprietary rights of others, or vice versa, with or without merit, may be time-consuming, result in costly litigation and diversion of technical and management personnel or require us to cease using infringing technology, develop non-infringing technology or enter into royalty or licensing agreements. Further, our license agreements typically require us to indemnify our customers, distributors and resellers for infringement actions related to our technology, which could cause us to become involved in infringement claims made against our customers, distributors or resellers. Any of the above-described circumstances relating to intellectual property rights disputes could result in our business and results of operations being harmed.

Many of our products include intellectual property licensed from third parties. In the future, it may be necessary to renew licenses for third party intellectual property or obtain new licenses for other technology. These third party licenses may not be available to us on acceptable terms, if at all. The inability to obtain certain licenses, or litigation regarding the interpretation or enforcement of license rights and related intellectual property issues, could have a material adverse effect on our business, operating results and financial condition. Furthermore, we license some third party intellectual property on a non-exclusive basis and this may limit our ability to protect our intellectual property rights in our products.

We may not be able to sustain or develop new distribution relationships and a reduction or delay in sales to significant distribution partners could hurt our business

We sell our products and services through multiple distribution channels in the United States and internationally, including leading industry distributors, value-added resellers, systems integrators, and other indirect channel partners. We have a limited number of agreements with companies in these channels, and we may not be able to increase our number of distribution relationships or maintain our existing relationships. Recruiting and retaining qualified channel partners and training them in our technologies requires significant time and resources. If we are unable to establish or maintain our indirect sales channels, our business and results of operations will be harmed. In addition, two domestic distributors of our products together accounted for 24.5% and 24.8% of our total net revenue for the fiscal years 2008 and 2007, respectively. A substantial reduction or delay in sales of our products to these distribution partners, if not replaced by sales to other indirect channel partners and distributors, could harm our business, operating results and financial condition.

Undetected software or hardware errors may harm our business and results of operations

Our products may contain undetected errors or defects when first introduced or as new versions are released. We have experienced these errors or defects in the past in connection with new products and product upgrades. We expect that these errors or defects will be found from time to time in new or enhanced products after commencement of commercial shipments. These problems may cause us to incur significant warranty and repair costs, divert the attention of our engineering personnel from our product development efforts and cause significant customer relations problems. We may also be subject to liability claims for damages related to product errors or defects. While we carry insurance policies covering this type of liability, these policies may not provide sufficient protection should a claim be asserted. A material product liability claim may harm our business and results of operations.

Our products must successfully operate with products from other vendors. As a result, when problems occur in a network, it may be difficult to identify the source of the problem. The occurrence of software or hardware problems, whether caused by our products or another vendor's products, may result in the delay or loss of market acceptance of our products. The occurrence of any of these problems may harm our business and results of operations.

Adverse general economic conditions or reduced information technology spending may adversely impact our business

A substantial portion of our business depends on the demand for information technology by large enterprise customers and service providers, the overall economic health of our current and prospective

Table of Contents

customers and the continued growth and evolution of the Internet. National, regional and local economic conditions, such as recessionary economic cycles, protracted economic slowdown or further deterioration of the economy could adversely impact demand for our products. The purchase of our products is often discretionary and may involve a significant commitment of capital and other resources. Continued weak economic conditions or a reduction in information technology spending even if economic conditions improve would likely result in longer sales cycles and reduced product sales, each of which would adversely impact our business, results of operations and financial condition.

Our investments in auction rate securities are subject to risks that may cause losses and affect the liquidity of these investments

At September 30, 2008, the fair value of our AAA rated municipal auction rate securities, (ARS) that were valued at reported market prices was approximately \$47.5 million. Beginning in February 2008, auctions failed for approximately \$53.4 million in par value of municipal ARS we held because sell orders exceeded buy orders. We may not be able to liquidate these investments and realize their full carrying value unless the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process, or the security matures. While we do not believe the decline in the carrying values of these municipal ARS is permanent, if the issuers of these securities are unable to successfully close future auctions and their credit ratings are lowered, we may be required to record future impairment charges related to these investments, which would harm our results of operations. We believe these investments may remain illiquid for longer than twelve months and as a result, we have classified these investments as long-term as of September 30, 2008.

Our operating results are exposed to risks associated with international commerce

As our international sales increase, our operating results become more exposed to international operating risks. These risks include risks related to recessionary economic cycles or protracted slowdowns in economies outside the United States, foreign currency exchange rates, managing foreign sales offices, regulatory, political or economic conditions in specific countries, military conflict or terrorist activities, changes in laws and tariffs, inadequate protection of intellectual property rights in foreign countries, foreign regulatory requirements and natural disasters. All of these factors could have a material adverse effect on our business. We intend to continue expanding into international markets. International sales represented 42.5% and 41.6% of our net revenues for the fiscal years ended September 30, 2008 and 2007, respectively. In particular, in fiscal year 2008, we derived 9.0% of our total revenue from the Japanese market. This revenue is dependent on a number of factors outside our control, including the viability and success of our resellers and the strength of the Japanese economy.

Changes in governmental regulations could negatively affect our revenues

Our products are subject to various regulations promulgated by the United States and various foreign governments including, but not limited to, environmental regulations and regulations implementing export license requirements and restrictions on the import or export of some technologies, especially encryption technology. Changes in governmental regulation and our inability or failure to obtain required approvals, permits or registrations could harm our international and domestic sales and adversely affect our revenues, business and operations.

Acquisitions present many risks and we may not realize the financial and strategic goals that are contemplated at the time of the transaction

With respect to our past acquisitions, as well as any other future acquisitions we may undertake, we may find that the acquired businesses, products or technologies do not further our business strategy as expected, that we paid more than what the assets are later worth or that economic conditions change, all of which may generate future impairment

charges. Our acquisitions may be viewed negatively by customers, financial markets or investors. There may be difficulty integrating the operations and personnel of the acquired business, and we may have difficulty retaining the key personnel of the acquired business. We may have difficulty in integrating the acquired technologies or products with our existing product lines. Our ongoing business and

Table of Contents

management's attention may be disrupted or diverted by transition or integration issues and the complexity of managing geographically and culturally diverse locations. We may have difficulty maintaining uniform standards, controls, procedures and policies across locations. We may experience significant problems or liabilities associated with product quality, technology and other matters.

Our inability to successfully operate and integrate newly-acquired businesses appropriately, effectively and in a timely manner, or to retain key personnel of any acquired business, could have a material adverse effect on our ability to take advantage of further growth in demand for integrated traffic management and security solutions and other advances in technology, as well as on our revenues, gross margins and expenses.

Our success depends on our key personnel and our ability to attract and retain qualified sales and marketing, operations, product development and professional services personnel

Our success depends to a significant degree upon the continued contributions of our key management, product development, sales, marketing and finance personnel, many of whom may be difficult to replace. The complexity of our application delivery networking products and their integration into existing networks and ongoing support, as well as the sophistication of our sales and marketing effort, requires us to retain highly trained professional services, customer support and sales personnel. Competition for qualified professional services, customer support and sales personnel in our industry is intense because of the limited number of people available with the necessary technical skills and understanding of our products. Our ability to retain and hire these personnel may be adversely affected by volatility or reductions in the price of our common stock, since these employees are generally granted restricted stock units or stock options. The loss of services of any of our key personnel, the inability to retain and attract qualified personnel in the future or delays in hiring qualified personnel, may harm our business and results of operations.

We face litigation risks

We are a party to lawsuits in the normal course of our business. Litigation in general, and intellectual property and securities litigation in particular, can be expensive, lengthy and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. Responding to lawsuits has been, and will likely continue to be, expensive and time-consuming for us. An unfavorable resolution of these lawsuits could adversely affect our business, results of operations or financial condition.

Our historical stock option practices and the restatement of our prior financial statements have exposed us to greater risks associated with litigation. Beginning in May 2006 several derivative actions were filed against certain current and former directors and officers (as discussed further in Part II, Item 8, Note 7, "Commitments and Contingencies Litigation") based on allegations relating to our historical stock option practices. We cannot assure you that this current litigation will result in the same conclusions reached by the special committee of outside directors formed by our Board of Directors to conduct a review of our stock option practices (the "Special Committee").

We may in the future be subject to additional litigation arising in relation to our historical stock option practices and the restatement of our prior financial statements. Litigation may be time consuming, expensive and distracting for management from the conduct of our business. The adverse resolution of any lawsuit could have a material adverse effect on our business, financial condition and results of operations. We cannot assure you that any future litigation relating to our historical stock option practices will result in the same conclusions reached by the Special Committee. Furthermore, if we are subject to adverse findings in any of these matters, we could be required to pay damages or penalties or have other remedies imposed upon us which could adversely affect our business, results of operations or financial condition.

Table of Contents

The matters relating to the Special Committee's review of our historical stock option practices and the restatement of our consolidated financial statements has resulted in regulatory proceedings against us and may result in future regulatory proceedings, which could have a material adverse impact on our financial condition

On November 8, 2006, we announced that the Special Committee had completed its review of our historical stock option practices. Upon completion of its review, the Special Committee found that the recorded grant dates for certain stock options granted during fiscal years 1999 to 2004 should be adjusted as the measurement date for accounting purposes and the accounting treatment used for the vesting of certain stock options was incorrect. Based on the Special Committee's review, to correct the accounting treatment, we amended our Annual Report on Form 10-K/A (as amended) for the year ended September 30, 2005 and our Quarterly Reports on Form 10-Q for the three months ended December 31, 2005 and March 31, 2006 to restate the consolidated financial statements contained in those reports.

In May 2006, we received notice from both the Securities and Exchange Commission (SEC) and the United States Attorney's Office for the Eastern District of New York (the Department of Justice) that they were conducting informal inquiries into our historical stock option practices. We have fully cooperated with both agencies. Considerable legal and accounting expenses related to our historical stock option practices have been incurred and we may in the future be subject to additional regulatory proceedings or actions arising in relation to our historical stock option practices and the restatement of our prior period financial statements. Any potential regulatory proceeding or action may be time consuming, expensive and distracting for management from the conduct of our business. The adverse resolution of any potential regulatory proceeding or action could adversely affect our business, results of operations or financial condition. We cannot assure you that the SEC and Department of Justice inquiries, or any future regulatory action relating to our historical stock option practices, will result in the same conclusions reached by the Special Committee. Furthermore, if we are subject to adverse findings in any of these matters, we could be required to pay damages or penalties or have other remedies imposed upon us, including criminal penalties, which could adversely affect our business, results of operations or financial condition.

Anti-takeover provisions could make it more difficult for a third party to acquire us

Our Board of Directors has the authority to issue up to 10,000,000 shares of preferred stock and to determine the price, rights, preferences, privileges and restrictions, including voting rights, of those shares without any further vote or action by the shareholders. The rights of the holders of common stock may be subject to, and may be adversely affected by, the rights of the holders of any preferred stock that may be issued in the future. The issuance of preferred stock may have the effect of delaying, deferring or preventing a change of control of our company without further action by our shareholders and may adversely affect the voting and other rights of the holders of common stock. Further, certain provisions of our bylaws, including a provision limiting the ability of stockholders to raise matters at a meeting of shareholders without giving advance notice, may have the effect of delaying or preventing changes in control or management of our company, which could have an adverse effect on the market price of our common stock. In addition, our articles of incorporation provide for a staggered board, which may make it more difficult for a third party to gain control of our Board of Directors. Similarly, state anti-takeover laws in the State of Washington related to corporate takeovers may prevent or delay a change of control of our company.

Item 1B. *Unresolved Staff Comments*

Not applicable.

Item 2. *Properties*

Our principal administrative, sales, marketing, research and development facilities are located in Seattle, Washington and consist of approximately 190,000 square feet. In April 2000, we amended and restated the lease agreement on two

of the three buildings for our corporate headquarters. The lease commenced in July 2000 on the first building; and the lease on the second building commenced in September 2000. The lease for

Table of Contents

both buildings expires in 2012 with an option for renewal. The lease for the second building has been partially subleased through 2012. We believe that our existing properties are in good condition and suitable for the conduct of our business. We also lease office space for our product development personnel in Spokane, Washington, San Jose, California, Lowell, Massachusetts, Israel, Northern Ireland, and Russia and for our sales and support personnel in Illinois, Washington D.C., New York, New Jersey, Hong Kong, Singapore, China, Taiwan, Thailand, India, Malaysia, South Korea, Japan, Australia, New Zealand, Germany, France, Belgium, Spain, Italy, Netherlands and the United Kingdom. We believe that our future growth can be accommodated by our current facilities or by leasing additional space if necessary.

In October 2006, we entered into an office lease agreement to lease a total of approximately 137,000 square feet of office space in a building known as 333 Elliott West, which is adjacent to the three buildings that serve as our corporate headquarters. The lease expires in 2018. Construction on this project was substantially completed in the third quarter of fiscal year 2008. During 2008, as part of an office consolidation we entered into two separate sublease agreements to sublease approximately 112,500 square feet of building 333 Elliott West. These sublease terms expire in 2011 and 2013, respectively.

Item 3. *Legal Proceedings***Regulatory proceedings**

Derivative Suits. Beginning on or about May 24, 2006, several derivative actions were filed against certain of our current and former directors and officers. These derivative lawsuits were filed in: (1) the Superior Court of King County, Washington, as *In re F5 Networks, Inc. State Court Derivative Litigation* (Case No. 06-2-17195-1 SEA), which consolidates *Adams v. Amdahl, et al.* (Case No. 06-2-17195-1 SEA), *Wright v. Amdahl, et al.* (Case No. 06-2-19159-5 SEA), and *Sommer v. McAdam, et al.* (Case No. 06-2-26248-4 SEA) (the *State Court Derivative Litigation*); and (2) in the U.S. District Court for the Western District of Washington, as *In re F5 Networks, Inc. Derivative Litigation*, Master File No. C06-0794RSL, which consolidates *Hutton v. McAdam, et al.* (Case No. 06-794RSL), *Locals 302 and 612 of the International Union of Operating Engineers-Employers Construction Industry Retirement Trust v. McAdam et al.* (Case No. C06-1057RSL), and *Easton v. McAdam et al.* (Case No. C06-1145RSL) (the *Federal Court Derivative Litigation*). On August 2, 2007, another derivative lawsuit, *Barone v. McAdam et al.* (Case No. C07-1200P) was filed in the U.S. District Court for the Western District of Washington. The Barone lawsuit was designated a related case to the Federal Court Derivative Litigation on September 4, 2007. The complaints generally allege that certain of our current and former directors and officers, including, in general, each of our current outside directors (other than Deborah L. Bevier and Scott Thompson who joined our Board of Directors in July 2006 and January 2008, respectively) breached their fiduciary duties to the Company by engaging in alleged wrongful conduct concerning the manipulation of certain stock option grant dates. We are named solely as a nominal defendant against whom the plaintiffs seek no recovery. Our combined motion to consolidate and stay the State Court Derivative Litigation was granted in a court order dated April 3, 2007. Our motion to dismiss the consolidated federal derivative actions based on plaintiffs' failure to make demand on our Board of Directors prior to filing suit was granted in a court order dated August 6, 2007 with leave to amend the allegations in plaintiffs' complaint. Plaintiffs filed an amended consolidated federal derivative action complaint on September 14, 2007. We filed a motion to dismiss the amended complaint based on plaintiff's failure to make demand on our Board of Directors prior to filing suit. On July 3, 2008, before ruling on our pending dismissal motion, the federal court entered an order certifying certain issues of Washington state law to the Washington Supreme Court for resolution. Briefing the Washington Supreme Court on the certified issues began on September 15, 2008 and the hearing is currently set for March 24, 2009. The federal derivative actions are stayed pending resolution of the certification proceeding. We intend to continue to vigorously pursue dismissal of the derivative actions.

SEC and Department of Justice Inquiries. In May 2006, we received notice from both the SEC and the Department of Justice that they were conducting informal inquiries into our historical stock option practices, and have fully cooperated with both agencies. Considerable legal and accounting expenses related to our historical stock option practices have been incurred to date. We may in the future be subject to additional regulatory proceedings or actions arising in relation to our historical stock option practices and the restatement

Table of Contents

of our prior period financial statements. Although regulatory proceedings are subject to inherent uncertainties, we do not believe the results of any pending actions will, individually or in the aggregate, have a material adverse impact on our consolidated financial position or results of operations.

We are not aware of any other pending legal proceedings than those mentioned above that, individually or in the aggregate, would have a material adverse effect on our business, operating results, or financial condition. We may in the future be party to litigation arising in the ordinary course of business, including claims that we allegedly infringe upon third-party trademarks or other intellectual property rights. Such claims, even if not meritorious, could result in the expenditure of significant financial and managerial resources.

Item 4. *Submission of Matters to a Vote of Securities Holders*

No matters were submitted to a vote of the shareholders during the fourth quarter of fiscal 2008.

Table of Contents**PART II****Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*****Market Prices of Common Stock**

Our common stock is traded on the Nasdaq Global Market under the symbol FFIV. The following table sets forth the high and low sales prices of our common stock as reported on the Nasdaq Global Market, as adjusted to reflect our two-for-one stock split effective in August 2007.

	Fiscal Year 2008		Fiscal Year 2007	
	High	Low	High	Low
First Quarter	\$ 44.55	\$ 25.91	\$ 39.27	\$ 26.15
Second Quarter	\$ 28.21	\$ 18.11	\$ 40.42	\$ 33.27
Third Quarter	\$ 32.60	\$ 17.70	\$ 43.24	\$ 32.21
Fourth Quarter	\$ 35.85	\$ 21.00	\$ 46.93	\$ 34.32

The last reported sales price of our common stock on the Nasdaq Global Market on November 19, 2008 was \$21.37.

As of November 19, 2008, there were 85 holders of record of our common stock. As many of our shares of common stock are held by brokers and other institutions on behalf of shareholders, we are unable to estimate the total number of beneficial holders of our common stock represented by these record holders.

Dividend Policy

Our policy has been to retain cash to fund future growth. Accordingly, we have not paid dividends and do not anticipate declaring dividends on our common stock in the foreseeable future.

Unregistered Securities Sold in 2008

We did not sell any unregistered shares of our common stock during the fiscal year 2008.

Issuer Purchases of Equity Securities

On January 23, 2008, we announced that our Board of Directors approved a new program to repurchase up to \$200 million of our outstanding common stock. As of September 30, 2008 we had repurchased and retired approximately 7.7 million shares at an average price of \$25.90 per share.

Table of Contents

Shares repurchased during the second, third and fourth quarters of fiscal 2008 are as follows (in thousands, except shares and per share data):

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased per the Publicly Announced Plan	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plan
January 1, 2008 – January 31, 2008		\$		\$ 200,000
February 1, 2008 – February 29, 2008	4,381,353	\$ 22.77	4,381,353	\$ 100,000
March 1, 2008 – March 31, 2008		\$		\$ 100,000
April 1, 2008 – April 30, 2008		\$		\$ 100,000
May 1, 2008 – May 31, 2008	1,768,517	\$ 28.22	1,768,517	\$ 50,000
June 1, 2008 – June 30, 2008		\$		\$ 50,000
July 1, 2008 – July 31, 2008		\$		\$ 50,000
August 1, 2008 – August 31, 2008	1,556,335	\$ 32.08	1,556,335	\$
September 1, 2008 – September 30, 2008		\$		\$

On October 22, 2008, we announced that our Board of Directors approved a new program to repurchase up to an additional \$200 million of our outstanding common stock. Acquisitions for the share repurchase program will be made from time to time in private transactions or open market purchases as permitted by securities laws and other legal requirements. The program may be discontinued at any time. As of November 19, 2008, we had repurchased and retired approximately 373,200 shares, not including the shares described in the table above at an average price of \$22.76 per share.

Table of Contents

Performance Measurement Comparison of Shareholder Return

The following graph compares the annual percentage change in the cumulative total return on shares of our common stock, the Nasdaq Composite Index and the Nasdaq Computer Index for the period commencing September 30, 2003, and ending September 30, 2008.

**Comparison of Cumulative Total Return
On Investment Since September 30, 2003***

The Company's closing stock price on September 30, 2008, the last trading day of the Company's 2008 fiscal year, was \$23.38 per share.

* Assumes that \$100 was invested September 30, 2003 in shares of Common Stock and in each index, and that all dividends were reinvested. Shareholder returns over the indicated period should not be considered indicative of future shareholder returns.

Table of Contents**Item 6. Selected Financial Data**

The following selected consolidated historical financial data are derived from our audited financial statements. The consolidated balance sheet data as of September 30, 2008 and 2007 and the consolidated statement of operations data for the years ended September 30, 2008, 2007 and 2006 are derived from our audited financial statements and related notes that are included elsewhere in this report. The consolidated balance sheet data as of September 30, 2006, 2005 and 2004 and the consolidated statement of operations for the years ended September 30, 2005 and 2004 are derived from our audited financial statements and related notes which are not included in this report. The information set forth below should be read in conjunction with our historical financial statements, including the notes thereto, and

Management's Discussion and Analysis of Financial Condition and Results of Operations, included elsewhere in this report.

(1) Amortization of unearned compensation reported in fiscal year 2004 has been reclassified to attribute amounts to the respective categories within operating expenses.

Table of Contents

- (2) In-process research and development (IPR&D) expense represents the amount of IPR&D that we acquired in the Acopia Networks, Inc. (Acopia) acquisition.
- (3) Loss on facility exit and sublease expense represents a one-time charge related to the closure of our office space in Bellevue, Washington and the consolidation of our corporate headquarters in Seattle, Washington.
- (4) Share and per share amounts have been adjusted as appropriate to reflect a two-for-one stock-split effective August 2007.
- (5) In our Form 10-K/A No. 2 (filed on December 12, 2006), we restated our consolidated financial statements for the years ended September 30, 2005, 2004 and 2003, and the selected consolidated financial data as of and for the years ended September 30, 2005, 2004, 2003, 2002 and 2001. In addition, we restated our consolidated financial statements for the quarters ended December 31, 2005 and March 31, 2006 in our Quarterly Reports on Form 10-Q/A for the quarters ended December 31, 2005 and March 31, 2006, each of which was filed on December 13, 2006. All financial information included in this annual report on Form 10-K reflects our restatement.
- (6) Restricted cash represents escrow accounts established in connection with lease agreements for our facilities.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following discussion of our financial condition and results of operations contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 and Section 27A of the Securities Act of 1933. These statements include, but are not limited to, statements about our plans, objectives, expectations, strategies, intentions or other characterizations of future events or circumstances and are generally identified by the words expects, anticipates, intends, plans, believes, seeks, estimates, and similar expressions. These forward-looking statements are based on current information and expectations and are subject to a number of risks and uncertainties. Our actual results could differ materially from those expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed under Item 1A. Risk Factors herein and in other documents we file from time to time with the Securities and Exchange Commission. We assume no obligation to revise or update any such forward-looking statements.

Restatement of Consolidated Financial Statements

In our Annual Report on Form 10-K/A No. 2 for the fiscal year ended September 30, 2005 (filed on December 12, 2006), we restated our consolidated financial statements for the years ended September 30, 2005, 2004 and 2003, and the selected consolidated financial data as of and for the years ended September 30, 2005, 2004, 2003, 2002 and 2001. In addition, we restated our consolidated financial statements for the quarters ended December 31, 2005 and March 31, 2006 in our Quarterly Reports on Form 10-Q/A for the quarters ended December 31, 2005 and March 31, 2006, each of which was filed on December 13, 2006. All financial information included in this Annual Report on Form 10-K reflects our restatement.

Overview

We are a global provider of software and hardware products and services that help companies efficiently and securely manage the delivery, optimization and security of application and data traffic on Internet-based networks, and to optimize the performance and utilization of data storage infrastructure and other network resources. We market and sell our products primarily through multiple indirect sales channels in the Americas (primarily the United States);

Europe, the Middle East, and Africa (EMEA); Japan; and the Asia Pacific region (APAC). Enterprise customers (Fortune 1000 or Business Week Global 1000 companies) in technology, telecommunications, financial services, transportation, and manufacturing industries, along with government customers, continue to make up the largest percentage of our customer base.

Table of Contents

Our management monitors and analyzes a number of key performance indicators in order to manage our business and evaluate our financial and operating performance. Those indicators include:

Revenues. The majority of our revenues are derived from sales of our Application Delivery Networking (ADN) products; BIG-IP Local Traffic Manager, BIG-IP Global Traffic Manager, BIG-IP ISP Traffic Manager, TrafficShield Application Firewall, WANJet, and WebAccelerator; FirePass SSL VPN servers; and our ARX file virtualization products. We also derive revenues from the sales of services including annual maintenance contracts, installation, training and consulting services. We carefully monitor the sales mix of our revenues within each reporting period. We believe customer acceptance rates of our new products and feature enhancements are key indicators of future trends. We also consider overall revenue concentration by customer and by geographic region as additional indicators of current and future trends.

Cost of revenues and gross margins. We strive to control our cost of revenues and thereby maintain our gross margins. Significant items impacting cost of revenues are hardware costs paid to our contract manufacturers, third-party software license fees, amortization of developed technology and personnel and overhead expenses. Our margins have remained relatively stable over the past two years. However, factors such as sales price, product mix, inventory obsolescence, returns, component price increases and warranty costs could significantly impact our gross margins from quarter to quarter and represent significant indicators we monitor on a regular basis.

Operating expenses. Operating expenses are substantially driven by personnel and related overhead expenses. Existing headcount and future hiring plans are the predominant factors in analyzing and forecasting future operating expense trends. Other significant operating expenses that we monitor include marketing and promotions, travel, professional fees, computer costs related to the development of new products, facilities and depreciation expenses.

Liquidity and cash flows. Our financial condition remains strong with significant cash and investments and no long term debt. The decrease in cash and investments was primarily due to \$200 million of cash used to repurchase outstanding common stock under our stock repurchase program in fiscal 2008, largely offset by cash provided by operating activities of \$193.7 million for the fiscal year ended September 30, 2008. Going forward, we believe the primary driver of cash flows will be net income from operations. Capital expenditures for fiscal year 2008 were comprised primarily of tenant improvements and information technology infrastructure and equipment to support the growth of our core business activities. We will continue to evaluate possible acquisitions of, or investments in businesses, products, or technologies that we believe are strategic, which may require the use of cash.

Balance sheet. We view cash, short-term and long-term investments, deferred revenue, accounts receivable balances and days sales outstanding as important indicators of our financial health. Deferred revenues continued to increase due to the growth in the amount of annual maintenance contracts purchased on new products and maintenance renewal contracts related to our existing product installation base. Our days sales outstanding for the fourth quarter of fiscal year 2008 was 51 days. We expect to maintain this metric in the mid 50-day range going forward.

Critical Accounting Policies

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that

are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect the more significant estimates and judgments used in the preparation of our financial statements.

Table of Contents

Revenue Recognition. We recognize revenue in accordance with the guidance provided under Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, and SOP No. 98-9 *Modification of SOP No. 97-2, Software Revenue Recognition, with Respect to Certain Transactions*, Statement of Financial Accounting Standards (SFAS) No. 48, *Revenue Recognition When Right of Return Exists*, and SEC Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, and SAB No. 104, *Revenue Recognition*.

We sell products through distributors, resellers, and directly to end users. We recognize product revenue upon shipment, net of estimated returns, provided that collection is determined to be probable and no significant obligations remain. In certain regions where we do not have the ability to reasonably estimate returns, we defer revenue on sales to our distributors until we receive information from the channel partner indicating that the distributor has sold the product to its customer. Payment terms to domestic customers are generally net 30 days to net 45 days. Payment terms to international customers range from net 30 days to net 90 days based on normal and customary trade practices in the individual markets. We have offered extended payment terms ranging from three to six months to certain customers, in which case revenue is recognized when payments are made.

Whenever product, training and post-contract customer support (PCS) elements are combined into a package with a single bundled price, a portion of the sales price is allocated to each element of the bundled package based on their respective fair values as determined when the individual elements are sold separately. We determine fair value based on the type of customer and region in which the package is sold. Where fair value of certain elements are not available, we recognize revenue on the residual method permitted under SOP 98-9 based on the fair value of undelivered elements. Revenues from the sale of product are recognized when the product has been shipped and the customer is obligated to pay for the product. When rights of return are present and we cannot estimate returns, we recognize revenue when such rights of return lapse. Revenues for PCS are recognized on a straight-line basis over the service contract term. PCS includes a limited period of telephone support updates, repair or replacement of any failed product or component that fails during the term of the agreement, bug fixes and rights to upgrades, when and if available. Consulting services are customarily billed at fixed rates, plus out-of-pocket expenses, and revenues are recognized when the consulting has been completed. Training revenue is recognized when the training has been completed.

Reserve for Doubtful Accounts. Estimates are used in determining our allowance for doubtful accounts and are based upon an assessment of selected accounts and as a percentage of our remaining accounts receivable by aging category. In determining these percentages, we evaluate historical write-offs, current trends in the credit quality of our customer base, as well as changes in the credit policies. We perform ongoing credit evaluations of our customers' financial condition and do not require any collateral. If there is deterioration of a major customer's credit worthiness or actual defaults are higher than our historical experience, our allowance for doubtful accounts may not be sufficient.

Reserve for Product Returns. In some instances, product revenue from distributors is subject to agreements allowing rights of return. Product returns are estimated based on historical experience and are recorded at the time revenues are recognized. Accordingly, we reduce recognized revenue for estimated future returns at the time revenue is recorded. When rights of return are present and we cannot estimate returns, revenue is recognized when such rights lapse. The estimates for returns are adjusted periodically based upon changes in historical rates of returns and other related factors. It is possible that these estimates will change in the future or that the actual amounts could vary from our estimates.

Reserve for Warranties. A warranty reserve is established based on our historical experience and an estimate of the amounts necessary to settle future and existing claims on products sold as of the balance sheet date to those customers with no service contract. While we believe that our warranty reserve is adequate and that the judgment applied is appropriate, such amounts estimated to be due and payable could differ materially from what will actually transpire in the future.

Accounting for Income Taxes. We utilize the liability method of accounting for income taxes as set forth in SFAS No. 109, *Accounting for Income Taxes* (SFAS 109). Accordingly, we are required to estimate our income taxes in each of the jurisdictions in which we operate as part of the process of preparing our

Table of Contents

consolidated financial statements. This process involves estimating our actual current tax exposure, including assessing the risks associated with tax audits, together with assessing temporary differences resulting from the different treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities. Due to the evolving nature and complexity of tax rules combined with the large number of jurisdictions in which we operate, it is possible that our estimates of our tax liability could change in the future, which may result in additional tax liabilities and adversely affect our results of operations, financial condition and cash flows.

Effective at the beginning of fiscal 2008, we adopted Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109* (FIN 48). Further information may be found in Note 5, *Income Taxes* in the Notes to Consolidated Financial Statements of this Form 10-K.

Stock-Based Compensation. We account for stock-based compensation in accordance with Financial Accounting Standards Board (FASB) Statement No. 123(R), *Share-Based Payment* (FAS 123R), using the straight-line attribution method for recognizing compensation expense. We recognized \$60.6 million and \$41.2 million of stock-based compensation expense for the years ended September 30, 2008 and 2007, respectively. As of September 30, 2008, there was \$82.9 million of total unrecognized stock-based compensation cost, the majority of which will be recognized over the next two years. Going forward, stock-based compensation expenses may increase as we issue additional equity-based awards to continue to attract and retain key employees.

We issue incentive awards to our employees through stock-based compensation consisting of stock options and restricted stock units (RSUs). The value of RSUs is determined using the fair value method, which in this case, is based on the number of shares granted and the quoted price of our common stock on the date of grant. Alternatively, in determining the fair value of stock options, we use the Black-Scholes option pricing model that employs the following key assumptions. Expected volatility is based on the annualized daily historical volatility of our stock price over the expected life of the option. Expected term of the option is based on historical employee stock option exercise behavior, the vesting terms of the respective option and a contractual life of ten years. Our stock price volatility and option lives involve management's best estimates at that time, both of which impact the fair value of the option calculated under the Black-Scholes methodology and, ultimately, the expense that will be recognized over the life of the option.

FAS 123R also requires that we recognize compensation expense for only the portion of stock options or RSUs that are expected to vest. Therefore, we apply estimated forfeiture rates that are derived from historical employee termination behavior. In the fourth quarter of fiscal 2008, we began estimating forfeitures by class of employee to better reflect our historical behavior. Based on historical differences with forfeitures of stock-based awards granted to our executive officers and Board of Directors versus grants awarded to all other employees, we developed separate forfeiture expectations for these two groups. In the fourth quarter of fiscal 2008, the estimated forfeiture rate for grants awarded to our executive officers and Board of Directors was approximately 4% and the estimated forfeiture rate for grants awarded to all other employees was approximately 10%. If the actual number of forfeitures differs from those estimated by management, additional adjustments to stock-based compensation expense may be required in future periods.

Compensation cost recognized for the year ended September 30, 2008 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of July 1, 2005, based on the grant-date fair value estimated in accordance with the original provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation* and (b) compensation cost for all share-based payments granted subsequent to July 1, 2005, based on the grant-date fair value estimated in accordance with the provisions of FAS 123R.

In August 2008, we granted 383,400 RSUs to certain current executive officers. Fifty percent of the aggregate number of RSUs granted at such time vest in equal quarterly increments over two years, until such portion of the grant is fully

vested on August 1, 2010. Twenty-five percent of the RSU grant, or a portion thereof, is subject to our achievement of specified percentage increases in total revenue during the period beginning in the fourth quarter of fiscal year 2008 through the third quarter of fiscal year 2009, relative to the same periods in fiscal years 2007 and 2008. The executive officers can receive additional RSUs in amounts up

Table of Contents

to 25% of that number of RSUs subject to this total revenue increase target if the target is exceeded. The remaining twenty-five percent is subject to our achievement of specified percentage increases in total revenue during the period beginning in the fourth quarter of fiscal year 2009 through the third quarter of fiscal year 2010, relative to the same periods in fiscal years 2008 and 2009, as will be set by the Compensation Committee of our Board of Directors.

In August 2007, we granted 276,400 RSUs to certain current executive officers. Fifty percent of the aggregate number of RSUs granted at such time vest in equal quarterly increments over two years, until such portion of the grant is fully vested on August 1, 2009. Twenty-five percent of the RSU grant is subject to our achievement of specified percentage increases in total revenue during the period beginning in the fourth quarter of fiscal year 2007 through the third quarter of fiscal year 2008, relative to the same periods in fiscal years 2006 and 2007. This twenty-five percent was fully earned in fiscal 2008. The remaining twenty-five percent is subject to our achievement of specified percentage increases in total revenue during the period beginning in the fourth quarter of fiscal year 2008 through the third quarter of fiscal year 2009, relative to the same periods in fiscal years 2007 and 2008, as set by the Compensation Committee of our Board of Directors.

In December 2006, we granted 456,000 RSUs to certain current executive officers. Fifty percent of the aggregate number of RSUs granted at such time vest in equal quarterly increments over two years, until such portion of the grant is fully vested on November 1, 2008. Twenty-five percent of the RSU grant was subject to our achievement of specified percentage increases in total revenue for fiscal year 2007, relative to fiscal year 2006. This twenty-five percent was fully earned in fiscal 2007. The remaining twenty-five percent was subject to our achievement of specified percentage increases in total revenue for fiscal year 2008, relative to fiscal year 2007. This twenty-five percent was fully earned in fiscal 2008.

We recognize compensation costs for awards with performance conditions when we conclude it is probable that the performance condition will be achieved. We reassess the probability of vesting at each balance sheet date and adjust compensation costs based on our probability assessment.

On January 23, 2008, we announced that our Board of Directors had approved a new program to repurchase up to \$200 million of our outstanding common stock. As of September 30, 2008, we had completed the repurchase and repurchased and retired approximately 7.7 million shares at an average price of \$25.90 per share.

Goodwill and intangible assets. We have a significant amount of goodwill and intangible assets on our balance sheet related to acquisitions. Intangible assets are carried and reported at acquisition cost, net of accumulated amortization subsequent to acquisition. Intangible assets are amortized over the estimated useful lives, which generally range from three to five years. Intangible assets are reviewed for impairment whenever events or circumstances indicate impairment might exist in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. Projected undiscounted net cash flows expected to be derived from the use of those assets are compared to the respective net carrying amounts to determine whether any impairment exists. Impairment, if any, is based on the excess of the carrying amount over the fair value of those assets.

The determination of the net carrying value of goodwill and intangible assets and the extent to which, if any, there is impairment are dependent on material estimates and judgments on our part, including the useful life over which the intangible assets are to be amortized, and the estimates of the value of future net cash flows, which are based upon further estimates of future revenues, expenses and operating margins. In applying SFAS No. 142, *Goodwill and Other Intangible Assets*, we review our goodwill annually for impairment in the second fiscal quarter, or more frequently when indicators of impairment are present. As a result of the current economic environment, we re-evaluated our goodwill and intangible assets at September 30, 2008, and concluded that there were no indicators of impairment.

Investments. Our investments are diversified among high-credit quality debt securities in accordance with our investment policy. We classify our investments as available-for-sale, which are reported at fair market value with the related unrealized gains and losses included in accumulated other comprehensive income or loss in stockholders equity. Realized gains and losses and declines in value of investments judged to be other than

Table of Contents

temporary are included in other income (expense). To date, we have not deemed it necessary to record any charges related to other-than-temporary declines in the estimated fair values of our marketable debt securities. However, the fair value of our investments is subject to volatility. Declines in the fair value of our investments judged to be other than temporary could adversely affect our future operating results. We used the income approach to determine the fair value of our auction rate securities (ARS) using a discounted cash flow analysis. The assumptions we used in preparing the discounted cash flow model include estimates for interest rates; estimates for discount rates using yields of comparable traded instruments adjusted for illiquidity and other risk factors, amount of cash flows and expected holding periods for the ARS. We believe these investments may remain illiquid for longer than twelve months and as a result, we have classified these investments as long-term as of September 30, 2008.

Results of Operations

The following discussion and analysis should be read in conjunction with our consolidated financial statements and related notes included elsewhere in this Annual Report on Form 10-K.

	Years Ended September 30,		
	2008	2007	2006
	(In thousands, except for percentages)		
Net Revenues			
Products	\$ 452,929	\$ 392,921	\$ 304,878
Services	197,244	132,746	89,171
Total	\$ 650,173	\$ 525,667	\$ 394,049
Percentage of net revenues			
Products	69.7%	74.7%	77.4%
Services	30.3	25.3	22.6
Total	100.0%	100.0%	100.0%

Net Revenues. Total net revenues increased 23.7% in fiscal year 2008 from fiscal year 2007, compared to an increase of 33.4% in fiscal year 2007 from fiscal year 2006. The revenue growth was due to increased demand for our core ADN products and revenue from our ARX file virtualization products. In addition, service revenues contributed to the overall revenue growth as a result of our increased installed base of products. International revenues represented 42.5%, 41.6% and 42.6% of net revenues in fiscal years 2008, 2007 and 2006, respectively. We expect international sales will continue to represent a significant portion of net revenues, although we cannot provide assurance that international revenues as a percentage of net revenues will remain at current levels.

Net product revenues increased 15.3% in fiscal year 2008 from fiscal year 2007 and 28.9% in fiscal year 2007 as compared to fiscal year 2006. The increase of \$60.0 million in net product sales for fiscal year 2008 was primarily due to growth in the volume of product sales of our ADN products of \$45.4 million. In addition, net product revenue from our ARX file virtualization products, introduced at the end of fiscal year 2007 increased \$17.6 million. Sales of our ADN products represented 92.0%, 94.5% and 93.8% of total product revenues in fiscal years 2008, 2007 and 2006, respectively.

Net service revenues increased 48.6% in fiscal year 2008 from fiscal year 2007 and 48.9% in fiscal year 2007 as compared to the fiscal year 2006. The increases in service revenue were the result of increased purchases or renewals of maintenance contracts as our installed base of products continues to increase.

Ingram Micro Inc., one of our domestic distributors, accounted for 10.5%, 11.6% and 13.6% of our total net revenues in fiscal years 2008, 2007 and 2006, respectively. Avnet Technology Solutions, another domestic distributor, accounted for 14.0%, 13.2% and 11.6% of our total net revenue in fiscal years 2008, 2007 and 2006, respectively. Avnet Technology Solutions accounted for 10.5% of our accounts receivable as of September 30, 2008.

Table of Contents

	Years Ended September 30,		
	2008	2007	2006
	(In thousands, except for percentages)		
Cost of net revenues and Gross margin			
Products	\$ 102,400	\$ 84,094	\$ 63,619
Services	46,618	34,230	24,534
Total	149,018	118,324	88,153
Gross margin	\$ 501,155	\$ 407,343	\$ 305,896
Cost of net revenues and Gross margin (as a percentage of related net revenue)			
Products	22.6%	21.4%	20.9%
Services	23.6	25.8	27.5
Total	22.9	22.5	22.4
Gross margin	77.1%	77.5%	77.6%

Cost of Net Product Revenues. Cost of net product revenues consist of finished products purchased from our contract manufacturers, manufacturing overhead, freight, warranty, provisions for excess and obsolete inventory and amortization expenses in connection with developed technology from acquisitions. Product cost increased to \$102.4 million in fiscal year 2008 as compared to \$84.1 million and \$63.6 million in fiscal years 2007 and 2006, respectively. The year over year increases were primarily due to a higher volume of units shipped. The fiscal year 2008 increase also included shipments of our ARX file virtualization products and increased indirect manufacturing costs over prior periods. The fiscal year 2007 increase also include an increase in warranty expense and indirect manufacturing cost over the prior period.

Cost of Net Service Revenues. Cost of net service revenues consist of the salaries and related benefits of our professional services staff, travel, facilities and depreciation expenses. Cost of net service revenues as a percentage of net service revenues decreased to 23.6% in fiscal year 2008 from 25.8% in fiscal year 2007 and 27.5% in fiscal year 2006 primarily due to the scalability of our existing customer support infrastructure and increased revenue from maintenance contracts. The absolute dollar increase year over year is primarily due to increased salary and benefits attributed to growth in headcount. Professional services headcount at the end of fiscal year 2008 increased to 323 from 279 at the end of fiscal year 2007 and 205 at the end of fiscal year 2006. Going forward, we expect to continue to increase our cost of service revenues to support our expanded product lines and growing customer base.

Sales and Marketing. Sales and marketing expenses consist of salaries, commissions and related benefits of our sales and marketing staff, the costs of our marketing programs, including public relations, advertising and trade shows, travel, facilities and depreciation expenses. Sales and marketing expense increased 35.1% in fiscal year 2008 as compared to 37.7% and 41.9% in fiscal years 2007 and 2006, respectively. The increase in sales and marketing expense was primarily due to increased commissions and personnel costs which totaled \$42.3 million, \$25.4 million and \$21.0 million for fiscal years 2008, 2007 and 2006, respectively, which is consistent with the increased revenue for the corresponding periods. The fiscal year 2008 increase over the prior period was primarily due to a full year of expenses related to our ARX file virtualization personnel as compared to the 17 days of comparable expenses in fiscal year 2007. Sales and marketing headcount at the end of fiscal 2008 increased to 716 from 669 at the end of fiscal 2007 and 442 at the end of fiscal 2006. Stock-based compensation charges of \$24.1 million, \$15.8 million and \$10.1 million also contributed to the overall increase in fiscal years 2008, 2007 and 2006, respectively. We expect to continue to increase sales and marketing expenses in order to grow revenues and increase our market share.

Research and Development. Research and development expenses consist of the salaries and related benefits for our product development personnel, prototype materials and expenses related to the development of new and improved products, facilities and depreciation expenses. Research and development expenses increased 49.8% in fiscal year 2008 as compared to increases of 40.4% and 56.0% in fiscal years 2007 and 2006, respectively. The increase in research and development expense was primarily due to increased personnel costs which totaled \$19.7 million, \$12.2 million and \$8.4 million in fiscal years 2008, 2007 and 2006, respectively, which is consistent with the increased revenue for the corresponding periods. The fiscal year 2008 increase over the prior period was primarily due to a full year of expenses related to our ARX file virtualization personnel as compared to the 17 days of comparable expenses in fiscal year 2007. Research and development headcount at the end of fiscal 2008 increased to 460 from 450 at the end of fiscal 2007 and 287 at the end of fiscal 2006. The growth in headcount was primarily related to the enhancement of our current products, the development of new, technologically advanced products that meet the changing needs of our customers and additional headcount related to our ARX file virtualization products.

Stock-based compensation charges of \$16.3 million, \$10.2 million and \$6.9 million also contributed to the overall increase in fiscal years 2008, 2007 and 2006, respectively. We expect to continue to increase research and development expenses as our future success is dependent on the continued development of our products.

General and Administrative. General and administrative expenses consist of the salaries, benefits and related costs of our executive, finance, information technology, human resource and legal personnel, third-party

Table of Contents

professional service fees, bad debt charges, facilities, and depreciation expenses. General and administrative expenses increased 13.7% in fiscal year 2008 as compared with 25.9% in fiscal year 2007 and 53.5% in fiscal year 2006. The increase in fiscal year 2008 of \$6.7 million was due primarily to an increase of \$3.2 million in stock-based compensation charges and an increase of \$3.5 million in salary and benefit expenses. The increase in fiscal year 2007 of \$10.1 million was due primarily to increases of \$6.5 million in stock-based compensation charges, \$4.0 million in salary and benefit expenses and \$3.1 million in other general operating expenses. General and administrative headcount at the end of fiscal 2008 increased to 195 from 184 at the end of fiscal 2007 and 134 at the end of fiscal 2006. General and administrative expense is expected to remain at these increased levels as we continue to build our infrastructure to support the worldwide growth of our business.

In-process research and development. Acquired in-process research and development (IPR&D) expense was \$14.0 million in 2007 and reflects the amount allocated to IPR&D that we acquired in the Acopia Networks, Inc. (Acopia) acquisition. IPR&D represents the present value of estimated after-tax cash flows expected to be generated by purchased technology, which, at the acquisition date, had not yet reached technological feasibility. We based our estimates and projections related to IPR&D on assumptions we believed to be reasonable at the time of the acquisition but that are inherently uncertain and unpredictable. If we do not successfully develop this product, our business, operating results and financial condition may be adversely affected.

Loss on facility exit and sublease. During 2008, we exited a research and development facility in Bellevue, Washington for which there was remaining operating lease obligations through 2014. In addition, during this period we consolidated our corporate headquarters, partially subleasing the building located at 333 Elliott Avenue West in Seattle, Washington for which there was remaining operating lease obligations through 2018. As a result of the expected loss on the facility exit and sublease agreements, we recorded a charge of \$5.3 million in the fourth quarter of fiscal 2008 pursuant to SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146), and FTB No. 79-15, *Accounting for Loss on a Sublease Not Involving the Disposal of a Segment* (FTB 79-15).

Provision for income taxes	6.8	9.6	10.5
Net income	11.4%	14.6%	16.8%

Other Income, Net. Other income, net, consists of interest income and foreign currency transaction gains and losses. Other income, net decreased 32.8% in fiscal year 2008, as compared to fiscal year 2007 and increased 61.7% in fiscal year 2007 as compared to the fiscal years 2006. Interest income was \$17.5 million, \$27.3 million and \$17.2 million for fiscal years 2008, 2007 and 2006, respectively. The decrease in other income, net for fiscal year 2008 compared to fiscal year 2007 was primarily due to decreased interest income as a result of reduced investment balances, partially offset by cash provided from operating and investing

Table of Contents

activities. Investment balances decreased in fiscal year 2008 as a result of the repurchase of outstanding common stock under our stock repurchase program and additional cash required for the acquisition of Acopia in September 2007. The fiscal year 2007 increase was due to a combination of higher yields and increased investment balance over the prior period. The increased investment balances in fiscal year 2007 and 2006 are the result of additional cash provided from operating and financing activities during the respective fiscal years.

Provision for Income Taxes. We recorded a 37.1% provision for income taxes for the fiscal year 2008 compared to 39.7% in fiscal year 2007 and 38.6% in fiscal year 2006. The reduction in the effective tax rate from fiscal year end 2007 to fiscal year end 2008 is largely attributable to an increase in the U.S. Domestic Manufacturing Deduction and a decrease in the limitation on deductibility of the compensation of certain officers.

At September 30, 2008, we did not have a valuation allowance on any of our deferred tax assets in any of the jurisdictions in which we operate because we believe that the assets are more likely than not to be realized. In making this determination we have considered projected future taxable income and ongoing prudent and feasible tax planning strategies in assessing the appropriateness of a valuation allowance. Our net deferred tax assets as of fiscal year end 2008, 2007 and 2006 were \$52.8 million, \$43.3 million and \$23.3 million, respectively. Our worldwide effective tax rate may fluctuate based on a number of factors, including variations in projected taxable income in our various geographic locations in which we operate, changes in the valuation of our net deferred tax assets, resolution of potential exposures, tax positions taken on tax returns filed in the various geographic locations in which we operate, and the introduction of new accounting standards or changes in tax laws or interpretations thereof in the various geographic locations in which we operate. We have recorded liabilities to address potential tax exposures related to business and income tax positions we have taken that could be challenged by taxing authorities. The ultimate resolution of these potential exposures may be greater or less than the liabilities recorded which could result in an adjustment to our future tax expense.

Liquidity and Capital Resources

We have funded our operations with our cash balances, cash generated from operations and proceeds from public offerings of our securities.

	Years Ended September 30,		
	2008	2007	2006
	(In thousands)		
Liquidity and Capital Resources			
Cash and cash equivalents and investments	\$ 451,272	\$ 474,831	\$ 492,176
Cash provided by operating activities	193,692	169,650	125,378
Cash provided by (used in) investing activities	13,710	(188,141)	(204,409)
Cash (used in) provided by financing activities	(181,719)	35,486	65,145

Cash and cash equivalents, short-term investments and long-term investments totaled \$451.3 million as of September 30, 2008 compared to \$474.8 million as of September 30, 2007, representing a decrease of \$23.5 million. The decrease was primarily due to approximately \$200 million of cash used to repurchase outstanding common stock under our stock repurchase program in fiscal 2008 which amount was largely offset by cash provided by operating activities of \$193.7 million for the year ended September 30, 2008. In fiscal year 2007, overall cash provided by investing activities decreased \$17.4 million compared to fiscal year 2006. The net decrease was primarily due to cash requirements for the purchase of Acopia in the fourth quarter of fiscal 2007, which amounts were partially offset by cash flow from operations.

At September 30, 2008, we held \$52.3 million (par value) of long-term investments comprised of tax-exempt ARS, which are variable-rate debt securities and have a long-term maturity with the interest being reset through Dutch auctions that are typically held every 7, 28 or 35 days. The securities have historically traded at par and are callable at par at the option of the issuer. Interest is typically paid at the end of each auction period or semi-annually. We limit our investments in ARS to securities that carry an AAA (or equivalent) rating from recognized rating agencies and limit the amount of credit exposure to any one issuer.

Table of Contents

At the time of initial investment and at the date of this Annual Report on Form 10-K, all of our ARS remain AAA rated.

Beginning in February 2008, auctions failed for approximately \$53.4 million in par value of municipal ARS we held because sell orders exceeded buy orders. When these auctions failed to clear, higher interest rates for those securities went into effect. However, the funds associated with these failed auctions will not be accessible until the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process or the security matures. The underlying assets of the municipal ARS we hold, including the securities for which auctions have failed, are generally student loans which are guaranteed by the U.S. government.

We have no reason to believe that any of the underlying issuers of our ARS are presently at risk of default. Through September 30, 2008, we have continued to receive interest payments on the ARS in accordance with their terms. We believe we will be able to liquidate our investments without significant loss primarily due to the government guarantee of the underlying securities. However, due to recent changes and uncertainty in the ARS market, we believe these investments may remain illiquid for longer than twelve months and as a result, we have classified these investments as long-term as of September 30, 2008. We currently have the ability and the intent to hold these ARS investments until recovery of the auction process or until maturity.

Cash provided by operating activities during fiscal year 2008 was \$193.7 million compared to \$169.7 million in fiscal year 2007 and \$125.4 million in fiscal year 2006. Cash provided by operating activities resulted primarily from cash generated from net income, after adjusting for non-cash charges such as stock-based compensation, depreciation and amortization charges and changes in operating assets and liabilities.

Cash provided by investing activities was \$13.7 million for fiscal year 2008, compared to cash used in investing activities of \$188.1 million for fiscal year 2007 and \$204.4 million for fiscal year 2006. The cash provided by investing activities in fiscal year 2008 was primarily the result of the sale of investments partially offset by the purchase of investments. The cash used in fiscal year 2007 was primarily the result of the purchase of investments partially offset by the sale of investments and \$207.1 million of cash payments, net of cash acquired, to shareholders of Acopia, which was acquired in September 2007. The cash used in fiscal year 2006 was primarily due to the purchase of investments and property and equipment, partially offset by the sale of investments.

Cash used in financing activities was \$181.7 million for fiscal year 2008, compared to cash provided by financing activities of \$35.5 million and \$65.1 million in fiscal years 2007 and 2006, respectively. In the second quarter of fiscal 2008, our Board of Directors approved a stock repurchase program to repurchase up to \$200 million of the Company's outstanding common stock. Cash used in financing activities for fiscal 2008 included \$200 million to repurchase common stock under this plan, which was partially offset by the exercise of employee stock options and purchases under our employee stock purchase plan. During fiscal years 2007 and 2006 our financing activities consisted entirely of cash proceeds and tax benefits received from the exercise of stock options and stock purchases under our employee stock purchase plan.

We expect that our existing cash and investment balances and cash from operations will be sufficient to meet our anticipated working capital and capital expenditures for the foreseeable future.

Table of Contents**Obligations and Commitments**

The following table summarizes our contractual payment obligations and commitments as of September 30, 2008:

	2009	2010	Payment Obligations by Year			Thereafter	Total
			2011	2012	2013		
			(In thousands)				
Operating leases	\$ 17,917	\$ 17,300	\$ 13,726	\$ 11,229	\$ 6,830	\$ 25,676	\$ 92,678
Purchase obligations	17,783						17,783
Total	\$ 35,700	\$ 17,300	\$ 13,726	\$ 11,229	\$ 6,830	\$ 25,676	\$ 110,461

We lease our facilities under operating leases that expire at various dates through 2018. We have excluded from the above table the impact of approximately \$4.2 million related to unrecognized income tax benefits as of September 30, 2008, due to the adoption of FASB interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109. We cannot make reliable estimates of the future cash flows by period related to this obligation.

Purchase obligations are comprised of purchase commitments with our contract manufacturers. The agreement with our primary contract manufacturer allows them to procure component inventory on our behalf based on our production forecast. We are obligated to purchase component inventory that the contract manufacturer procures in accordance with the forecast, unless cancellation is given within applicable lead times.

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (SFAS 160), which amends Accounting Research Bulletin No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for the Company's fiscal years beginning October 1, 2010. The Company does not expect the adoption of SFAS 160 to have a material impact on its consolidated financial position, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations* (SFAS 141R), which establishes principles and requirements for recognizing and measuring identifiable assets and goodwill acquired, liabilities assumed, and any noncontrolling interest in an acquisition, at their fair value as of the acquisition date. SFAS 141R is effective for business combinations for which the acquisition date is on or after October 1, 2009. This standard will change the Company's accounting treatment for business combinations on a prospective basis.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159), which allows entities to measure eligible financial instruments and certain other items at fair value. The Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. SFAS 159 is effective for the Company's fiscal years beginning October 1, 2008. The Company is currently assessing the potential effect if any of implementing this standard but does not expect it to have a material effect on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. In February 2008, the FASB released a FASB Staff Position (FSP FAS 157-2 -*Effective Date of FASB Statement No. 157*) which delays the effective date of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008. The Company adopted this standard on October 1, 2008. The Company is currently assessing the potential effect if any of

Table of Contents

implementing this standard but does not expect it to have a material effect on its consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosure About Market Risk

Interest Rate Risk. Our cash equivalents consist of high-quality securities, as specified in our investment policy guidelines. The policy limits the amount of credit exposure to any one issue or issuer to a maximum of 5% of the total portfolio with the exception of U.S. treasury securities, commercial paper and money market funds, which are exempt from size limitation. The policy requires investments in securities that mature in three years or less, with the average maturity being no greater than one and a half years. These securities are subject to interest rate risk and will decrease in value if interest rates increase. A decrease of one percent in the average interest rate would have resulted in a decrease of approximately \$3.7 million in our interest income for the fiscal year 2008.

Table of Contents

At September 30, 2008, the fair value of our AAA rated municipal ARS was approximately \$47.5 million. ARS are collateralized long-term debt instruments that provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined intervals, typically every 7, 28 or 35 days. Beginning in February 2008, auctions failed for approximately \$53.4 million in par value of municipal ARS we held because sell orders exceeded buy orders. When these auctions failed to clear, higher interest rates for those securities went into effect. However, the funds associated with these failed auctions will not be accessible until the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process or the security matures. The underlying assets of the municipal ARS we hold, including the securities for which auctions have failed, are generally student loans which are guaranteed by the U.S. government. Based on our expected operating cash flows and our other sources of cash, we do not believe that any reduction in liquidity of our municipal ARS will have a material impact on our overall ability to meet our liquidity needs. We have the intent and ability to hold these securities until liquidation. These securities have been classified as long-term at September 30, 2008 based on the fact that we believe it could take longer than twelve months to liquidate the positions.

Foreign Currency Risk. The majority of our sales and expenses are denominated in U.S. dollars and as a result, we have not experienced significant foreign currency transaction gains and losses to date. While we have conducted some transactions in foreign currencies during the fiscal year ended September 30, 2008 and expect to continue to do so, we do not anticipate that foreign currency transaction gains or losses will be significant at our current level of operations. However, as we continue to expand our operations internationally, transaction gains or losses may become significant in the future. We have not engaged in foreign currency hedging to date. However, we may do so in the future.

Report of Independent Registered Public Accounting Firm

To The Board of Directors and Shareholders
of F5 Networks, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of F5 Networks, Inc. and its subsidiaries at September 30, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2008 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the financial statements, on October 1, 2007 the Company adopted the provisions of Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109*.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become

inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

F5 NETWORKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

The Company

F5 Networks, Inc. (the Company) provides products and services to help companies manage their Internet Protocol (IP) traffic and file storage infrastructure efficiently and securely. The Company's application delivery networking products improve the performance, availability and security of applications on Internet-based networks. Internet traffic between network-based applications and clients passes through these devices where the content is inspected to ensure that it is safe and modified as necessary to ensure that it is delivered securely and in a way that optimizes the performance of both the network and the applications. The Company's storage virtualization products simplify and reduce the cost of managing files and file storage devices, and ensure fast, secure, easy access to files for users and applications. The Company also offers a broad range of services that include consulting, training, installation, maintenance and other technical support services.

Accounting Principles

The Company's consolidated financial statements and accompanying notes are prepared on the accrual basis of accounting in accordance with generally accepted accounting principles in the United States of America.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Estimates are used in accounting for revenue recognition, reserves for doubtful accounts, product returns, obsolete and excess inventory, warranties, valuation allowances on deferred tax assets and purchase price allocations. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. The Company invests its cash and cash equivalents in deposits with three major financial institutions, which, at times, exceed federally insured limits. The Company has not experienced any losses on its cash and cash equivalents.

Investments

The Company classifies its investment securities as available for sale. Investment securities, consisting of corporate and municipal bonds and notes and United States government securities, are reported at fair value with the related unrealized gains and losses included as a component of accumulated other comprehensive income (loss) in

shareholders' equity. Realized gains and losses and declines in value of securities judged to be other than temporary are included in other income (expense). The cost of investments for purposes of computing realized and unrealized gains and losses is based on the specific identification method. Investments in securities with maturities of less than one year or where management's intent is to use the investments to

Table of Contents

F5 NETWORKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

fund current operations are classified as short-term investments. Investments, other than auction rate securities (ARS) with maturities of greater than one year are classified as long-term investments.

The Company s ARS securities are classified as available-for-sale and are reported as long term, as the Company does not believe that they will be able to liquidate these securities in the next twelve months. The Company has the intent and ability to hold these securities until liquidation. The Company used a discounted cash flow analysis to determine the fair value of ARS. The assumptions the Company used in preparing the discounted cash flow model include estimates for interest rates; estimates for discount rates using yields of comparable traded instruments adjusted for illiquidity and other risk factors, amount of cash flows and expected holding periods for the ARS.

Concentration of Credit Risk

The Company extends credit to customers and is therefore subject to credit risk. The Company performs initial and ongoing credit evaluations of its customers financial condition and does not require collateral. An allowance for doubtful accounts is recorded to account for potential bad debts. Estimates are used in determining the allowance for doubtful accounts and are based upon an assessment of selected accounts and as a percentage of remaining accounts receivable by aging category. In determining these percentages, the Company evaluates historical write-offs, and current trends in customer credit quality, as well as changes in credit policies.

The Company maintains its cash and investment balances with high credit quality financial institutions. Included within the Company s investment portfolio are investments in ARS. The Company s ARS investments are currently not liquid as a result of continued auction failures. If the issuers are not able to meet their payment obligations or if the Company sells its ARS investments before they recover, the Company may lose some or all of its principal invested or may be required to further reduce the carrying value.

Fair Value of Financial Instruments

Short-term and long-term investments are recorded at fair value as the underlying securities are classified as available for sale and marked-to-market at each reporting period. The fair value is determined using quoted market prices for the securities held with the exception of ARS, which are valued based on a discounted cash flow model.

Inventories

The Company outsources the manufacturing of its pre-configured hardware platforms to contract manufacturers, who assemble each product to the Company s specifications. As protection against component shortages and to provide replacement parts for its service teams, the Company also stocks limited supplies of certain key product components. The Company reduces inventory to net realizable value based on excess and obsolete inventories determined primarily by historical usage and forecasted demand. Inventories consist of hardware and related component parts and are recorded at the lower of cost or market (as determined by the first-in, first-out method).

Inventories consist of the following (in thousands):

Years Ended

	September 30,	
	2008	2007
Finished goods	\$ 6,391	\$ 7,703
Raw materials	3,757	2,969
	\$ 10,148	\$ 10,672

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Restricted Cash***

Restricted cash primarily represents escrow accounts established in connection with lease agreements for the Company's corporate headquarters and, to a lesser extent, the Company's international facilities. Under the terms of the lease for the Company's corporate headquarters, the amount required to be held in escrow reduces and eventually eliminates at various dates throughout the duration of the lease term. During fiscal year 2008, the amount required to be held in escrow was \$2.4 million as set forth in the lease agreement for the Company's corporate headquarters.

Property and Equipment

Property and equipment is stated at cost. Depreciation of property and equipment are provided using the straight-line method over the estimated useful lives of the assets, ranging from two to five years. Leasehold improvements are amortized over the lesser of the lease term or the estimated useful life of the improvements. The cost of normal maintenance and repairs is charged to expense as incurred and expenditures for major improvements are capitalized at cost. Gains or losses on the disposition of assets are reflected in the income statements at the time of disposal.

Property and equipment consist of the following (in thousands):

	Years Ended September 30,	
	2008	2007
Computer equipment	\$ 50,878	\$ 41,547
Office furniture and equipment	10,334	7,766
Leasehold improvements	34,069	21,048
	95,281	70,361
Accumulated depreciation and amortization	(47,724)	(34,337)
	\$ 47,557	\$ 36,024

Depreciation and amortization expense totaled approximately \$16.3 million, \$11.7 million, and \$7.6 million for the fiscal years ended September 30, 2008, 2007 and 2006, respectively.

Goodwill

Goodwill represents the excess purchase price over the estimated fair value of net assets acquired as of the acquisition date. The Company has adopted the requirements of Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). SFAS No. 142 requires goodwill to be tested for impairment on an annual basis and between annual tests in certain circumstances, and written down when impaired. Goodwill of \$150.2 million was recorded in connection with the acquisition of Acopia Networks, Inc. (Acopia), in the fourth quarter of 2007, goodwill of \$32.0 million was recorded in connection with the acquisition of Swan Labs, Inc. (Swan

Labs) in fiscal year 2006, goodwill of \$25.5 million was recorded in connection with the acquisition of MagniFire Websystems Inc. in fiscal year 2004 and goodwill of \$24.2 million was recorded in connection with the acquisition of uRoam, Inc. in fiscal year 2003. In March 2008, the Company completed its annual impairment test and concluded that there was no impairment of goodwill. Additionally, as a result of the current economic environment the Company re-evaluated goodwill for impairment at September 30, 2008, and concluded that there was no impairment.

Other Assets

Other assets primarily consist of software development costs and acquired technology.

Table of Contents

F5 NETWORKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Software development costs are charged to research and development expense until technological feasibility is established. The Company accounts for internally-generated software development costs in accordance with SFAS No. 86, *Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed*. Thereafter, until the product is released for sale, software development costs are capitalized and reported at the lower of unamortized cost or net realizable value of each product. The establishment of technological feasibility and the ongoing assessment of recoverability of costs require considerable judgment by the Company with respect to certain internal and external factors, including, but not limited to, anticipated future gross product revenues, estimated economic life and changes in hardware and software technology. During fiscal year 2008, the Company capitalized \$1.7 million of software development costs. The Company did not capitalize any software development costs in fiscal years 2007 or 2006. Amortization costs related to capitalized software development was \$202,000, \$249,000, and \$272,000 for fiscal years 2008, 2007, and 2006, respectively and has been recorded as additional cost of product revenues.

Acquired technology and customer relationship assets are recorded at cost and amortized over their estimated useful lives of five years. The estimated useful life of these assets is assessed and evaluated for reasonableness periodically. Acquired technology of \$15.0 million in fiscal 2007 and \$8.0 million in fiscal 2006 was recorded in connection with the acquisitions of Acopia and Swan Labs, respectively. Amortization expense related to acquired technology, which is charged to cost of product revenues, totaled \$6.1 million, \$3.4 million and \$3.2 million during the fiscal years 2008, 2007 and 2006, respectively.

Amortization of all other intangible assets, including customer relationships, patents and trademarks was \$969,000, \$486,000 and \$464,000 during the fiscal years 2008, 2007 and 2006, respectively.

Impairment of Long-Lived Assets

The Company assesses the impairment of long-lived assets whenever events or changes in business circumstances indicate that the carrying amount of an asset may not be recoverable. When such events occur, management determines whether there has been impairment by comparing the anticipated undiscounted net future cash flows to the related asset's carrying value. If impairment exists, the asset is written down to its estimated fair value. No impairment of long-lived assets was noted at September 30, 2008.

Revenue Recognition

The Company's products are integrated with software that is essential to the functionality of the equipment. Accordingly, the Company recognizes revenue in accordance with the guidance provided under Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, and SOP No. 98-9 *Modification of SOP No. 97-2, Software Revenue Recognition, with Respect to Certain Transactions*, Statement of Financial Accounting Standards (SFAS) No. 48, *Revenue Recognition When Right of Return Exists*, and SEC Staff Accounting Bulletin (SAB) No. 104, *Revenue Recognition*.

The Company sells products through distributors, resellers, and directly to end users. The Company recognizes product revenue upon shipment, net of estimated returns, provided that collection is determined to be probable and no significant performance obligations remain. In certain regions where the Company does not have the ability to reasonably estimate returns, the Company defers revenue on sales to its distributors until they have received

information from the channel partner indicating that the distributor has sold the product to its customer. Payment terms to domestic customers are generally net 30 days to net 45 days. Payment terms to international customers range from net 30 days to net 90 days based on normal and customary trade practices in the individual markets. The Company offers extended payment terms to certain customers, in which case, revenue is recognized when payments are due.

Whenever product, training and post-contract customer support (PCS) elements are sold together, a portion of the sales price is allocated to each element based on their respective fair values as determined when

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the individual elements are sold separately. The Company determines fair value based on the type of customer and region in which the package is sold. Where fair value of certain elements are not available, the Company recognizes revenue on the residual method permitted under SOP 98-9 based on the fair value of undelivered elements. Revenues from the sale of product are recognized when the product has been shipped and the customer is obligated to pay for the product. When rights of return are present and the Company cannot estimate returns, it recognizes revenue when such rights of return lapse. Revenues for PCS are recognized on a straight-line basis over the service contract term. PCS includes a limited period of telephone support updates, repair or replacement of any failed product or component that fails during the term of the agreement, bug fixes and rights to upgrades, when and if available. Consulting services are customarily billed at fixed rates, plus out-of-pocket expenses, and revenues are recognized when the consulting has been completed. Training revenue is recognized when the training has been completed.

In accordance with Emerging Issues Task Force (EITF) 06-03, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)*, the Company accounts for taxes collected from customers and remitted to governmental authorities on a net basis and excluded from revenues.

Shipping and Handling

Shipping and handling fees charged to the Company's customers are recognized as product revenue in the period shipped and the related costs for providing these services are recorded as a cost of sale.

Guarantees and Product Warranties

In the normal course of business to facilitate sales of its products, the Company indemnifies other parties, including customers, resellers, lessors, and parties to other transactions with the Company, with respect to certain matters. The Company has agreed to hold the other party harmless against losses arising from a breach of representations or covenants, or out of intellectual property infringement or other claims made against certain parties. These agreements may limit the time within which an indemnification claim can be made and the amount of the claim. The Company has entered into indemnification agreements with its officers and directors, and the Company's bylaws contain similar indemnification obligations to the Company's agents. It is not possible to determine the maximum potential amount under these indemnification agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement.

The Company offers warranties of one year for hardware for those customers without service contracts, with the option of purchasing additional warranty coverage in yearly increments. The Company accrues for warranty costs as part of its cost of sales based on associated material product costs and technical support labor costs. During the years ended September 30, 2008, 2007 and 2006, warranty expense was \$10.4 million, \$8.4 million and \$4.3 million, respectively.

The following table summarizes the activity related to product warranties (in thousands):

Table of Contents

F5 NETWORKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Research and Development

Research and development expenses consist of salaries and related benefits of product development personnel, prototype materials and expenses related to the development of new and improved products, and an allocation of facilities and depreciation expense. Research and development expenses are reflected in the statements of income as incurred.

In-Process Research and Development

Acquired in-process research and development (IPR&D) reflects the amount allocated to IPR&D that the Company acquired in acquisitions. IPR&D represents the present value of estimated after-tax cash flows expected to be generated by purchased technology, which, at the acquisition date, had not yet reached technological feasibility and had no alternative future use. The Company recorded \$14.0 million of IPR&D cost in fiscal 2007 related to its acquisition of Acopia.

Advertising

Advertising costs are expensed as incurred. The Company incurred \$1.5 million, \$2.2 million and \$1.3 million in advertising costs during the fiscal years 2008, 2007 and 2006, respectively.

Income Taxes

The Company utilizes the liability method of accounting for income taxes as set forth by SFAS No. 109, *Accounting for Income Taxes* (SFAS 109). Deferred income tax assets and liabilities are determined based upon differences between the financial statement and income tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The realization of deferred tax assets is based on historical tax positions and estimates of future taxable income. A valuation allowance is recorded when it is more likely than not that some of the deferred tax assets will not be realized.

In fiscal year 2008, the Company adopted the Financial Accounting Standard Board's (FASB) Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). FIN 48 clarifies the application of SFAS No. 109, *Accounting for Income Taxes*. The Interpretation addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under FIN 48, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. FIN 48 also provides guidance on derecognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

Foreign Currency

The functional currency for the Company's foreign subsidiaries is the local currency in which the respective entity is located, with the exception of F5 Networks, Ltd., in the United Kingdom that uses the U.S. dollar as its functional

currency. An entity's functional currency is determined by the currency of the economic environment in which the majority of cash is generated and expended by the entity. The financial statements of all majority-owned subsidiaries and related entities, with a functional currency other than the U.S. dollar, have been translated into U.S. dollars in accordance with SFAS No. 52 *Foreign Currency Translation*. All assets and liabilities of the respective entities are translated at year-end exchange rates and all revenues and expenses are translated at average rates during the respective period. Translation adjustments are reported as a separate component of accumulated other comprehensive income (loss) in shareholder's equity.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Foreign currency transaction gains and losses are a result of the effect of exchange rate changes on transactions denominated in currencies other than the functional currency, including U.S. dollars. Gains and losses on those foreign currency transactions are included in determining net income or loss for the period of exchange. The net effect of foreign currency gains and losses were not significant during the fiscal years ended September 30, 2008, 2007 and 2006.

Segments

The Company complies with the requirements of SFAS No. 131, *Disclosure about Segments of an Enterprise and Related Information*, which establishes annual and interim reporting standards for an enterprise's operating segments and related disclosures about its products, services, geographic areas and major customers. Management has determined that the Company operated in one segment for fiscal 2008 and prior years and will continue to evaluate its reporting structure prospectively.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with Financial Accounting Standards Board (FASB) Statement No. 123(R), *Share-Based Payment* (FAS 123R), using the straight-line attribution method for recognizing compensation expense. The Company recognized \$60.6 million, \$41.2 million and \$24.8 million of stock-based compensation expense for the fiscal years ended September 30, 2008, 2007 and 2006, respectively. As of September 30, 2008, there was \$82.9 million of total unrecognized stock-based compensation cost, the majority of which will be recognized over the next two years. Going forward, stock-based compensation expenses may increase as the Company issues additional equity-based awards to continue to attract and retain key employees.

The Company issues incentive awards to its employees through stock-based compensation consisting of stock options and restricted stock units (RSUs). On August 1, 2008, the Company awarded approximately 1.5 million RSUs to employees and executive officers pursuant to the Company's annual equity awards program. The value of RSUs is determined using the intrinsic value method, which in this case, is based on the number of shares granted and the quoted price of the Company's common stock on the date of grant. Alternatively, in determining the fair value of stock options, the Company uses the Black-Scholes option pricing model that employs the following key assumptions.

	Stock Option Plan			Employee Stock Purchase Plan		
	Years Ended September 30,			Years Ended September 30,		
	2008	2007	2006	2008	2007	2006
Risk-free interest rate	2.87%	4.46%	4.86%	1.73%	5.03%	4.90%
Expected dividend						
Expected term	4.1 years	6.3 years	6.3 years	0.5 years	0.5 years	0.5 years
Expected volatility	52.64%	65.76%	51.07%	65.91%	42.62%	45.35%

The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant. The Company does not anticipate declaring dividends in the foreseeable future. Expected volatility is based on the annualized daily historical volatility of the Company's stock price commensurate with the expected life of the option. Expected term of the option

is based on an evaluation of the historical employee stock option exercise behavior, the vesting terms of the respective option and a contractual life of ten years. The Company's stock price volatility and option lives involve management's best estimates at that time, both of which impact the fair value of the option calculated under the Black-Scholes methodology and, ultimately, the expense that will be recognized over the life of the option. SFAS 123R also requires the Company to recognize compensation expense for only the portion of options or stock units that are expected to vest. Therefore, the Company applies estimated forfeiture rates that are derived from historical employee termination behavior. In the fourth quarter of fiscal 2008, the Company began estimating forfeitures by class of employee to better reflect

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

historical behavior. Based on historical differences with forfeitures of stock-based awards granted to the Company's executive officers and Board of Directors versus grants awarded to all other employees, the Company has developed separate forfeiture expectations for these two groups. The estimated forfeiture rate for grants awarded to the Company's executive officers and Board of Directors was approximately 4% and the estimated forfeiture rate for grants awarded to all other employees was approximately 10% in the fourth quarter of fiscal 2008. An estimated forfeiture rate of 4% was used for the first three quarters of fiscal 2008 and for fiscal 2007 and an estimated forfeiture rate of 5% was used for fiscal 2006. If the actual number of forfeitures differs from those estimated by management, additional adjustments to compensation expense may be required in future periods.

Compensation cost recognized for the fiscal year ended September 30, 2008 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of July 1, 2005, based on the grant-date fair value estimated in accordance with the original provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation* and (b) compensation cost for all share-based payments granted or modified subsequent to July 1, 2005, based on the grant-date fair value estimated in accordance with the provisions of FAS 123R.

Earnings Per Share

Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing net income by the weighted average number of common and dilutive common stock equivalent shares outstanding during the period.

The following table sets forth the computation of basic and diluted net income per share (in thousands, except per share data).

	Years Ended September 30,		
	2008	2007	2006
Numerator			
Net income	\$ 74,331	\$ 77,000	\$ 66,005
Denominator			
Weighted average shares outstanding - basic	82,290	83,205	80,278
Dilutive effect of common shares from stock options and restricted stock units	1,138	1,932	2,742
Weighted average shares outstanding - diluted	83,428	85,137	83,020
Basic net income per share	\$ 0.90	\$ 0.93	\$ 0.82
Diluted net income per share	\$ 0.89	\$ 0.90	\$ 0.80

Approximately 0.6 million, 0.2 million, and 0.4 million of common shares potentially issuable from stock options for the years ended September 30, 2008, 2007 and 2006 are excluded from the calculation of diluted earnings per share

because the exercise price was greater than the market price.

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of Accounting Research Bulletin No. 51* (SFAS 160), which amends Accounting Research Bulletin No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for the Company s

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

fiscal years beginning October 1, 2010. The Company does not expect the adoption of SFAS 160 to have a material impact on its consolidated financial position, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations* (SFAS 141R), which establishes principles and requirements for recognizing and measuring identifiable assets and goodwill acquired, liabilities assumed, and any noncontrolling interest in an acquisition, at their fair value as of the acquisition date. SFAS 141R is effective for business combinations for which the acquisition date is on or after October 1, 2009. This standard will change the Company's accounting treatment for business combinations on a prospective basis.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159), which allows entities to measure eligible financial instruments and certain other items at fair value. The Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. The Company adopted this standard on October 1, 2008. The Company is currently assessing the potential effect if any of implementing this standard but does not expect it to have a material effect on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. In February 2008, the FASB released a FASB Staff Position (FSP FAS 157-2 -*Effective Date of FASB Statement No. 157*) which delays the effective date of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008. The Company adopted this standard on October 1, 2008. The Company is currently assessing the potential effect if any of implementing this standard but does not expect it to have a material effect on its consolidated financial statements.

2. Short-Term and Long-Term Investments

Short-term investments consist of the following (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2008				
Corporate bonds and notes	\$ 3,033	\$	\$ (69)	\$ 2,964
Municipal bonds and notes	40,587	138	(30)	40,695
U.S. government securities	68,301	38	(115)	68,224
	\$ 111,921	\$ 176	\$ (214)	\$ 111,883

Corporate bonds and notes	\$ 17,923	\$ 20	\$ (29)	\$ 17,914
Municipal bonds and notes	9,000	2		9,002
Auction rate securities	70,100			70,100
U.S. government securities	107,185	38	(70)	107,153
	\$ 204,208	\$ 60	\$ (99)	\$ 204,169

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Long-term investments consist of the following (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2008				
Corporate bonds and notes	\$ 12,815	\$	\$ (456)	\$ 12,359
Municipal bonds and notes	100,154	57	(361)	99,850
Auction rate securities	52,250		(4,728)	47,522
U.S. government securities	101,534	111	(290)	101,355
	\$ 266,753	\$ 168	\$ (5,835)	\$ 261,086

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2007				
Corporate bonds and notes	\$ 2,648	\$	\$	\$ 2,648
Municipal bonds and notes	29,414	61		29,475
U.S. government securities	183,784	459		184,243
	\$ 215,846	\$ 520	\$	\$ 216,366

The amortized cost and fair value of fixed maturities at September 30, 2008, by contractual years-to-maturity, are presented below (in thousands):

	Amortized Cost	Fair Value
One year or less	\$ 111,921	\$ 111,883
Over one year through five years	266,753	261,086
	\$ 378,674	\$ 372,969

The Company invests in securities that are rated investment grade or better. The unrealized losses on investments for fiscal 2008 were primarily caused by reductions in the values of the ARS due to the illiquid markets and were partially

offset by unrealized gains related to interest rate decreases. The Company has determined the unrealized losses are temporary as the duration of the decline in value of investments has been short, the extent of the decline, in both dollars and as a percentage of costs, is not significant, and the Company has the ability and intent to hold the investments until it recovers at least substantially all of the cost of the investments.

The following table summarizes investments that have been in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for more than 12 months as of September 30, 2008 (in thousands):

	Less Than 12 Months		12 Months of Greater		Total	
	Fair	Gross	Fair	Gross	Fair	Gross
	Value	Unrealized	Value	Unrealized	Value	Unrealized
		Losses		Losses		Losses
September 30, 2008						
Corporate bonds and notes	\$ 15,323	\$ 525	\$	\$	\$ 15,323	\$ 525
Municipal bonds and notes	88,950	391			88,950	391
Auction rate securities	47,522	4,728			47,522	4,728
U.S. government securities	103,952	405			103,952	405
Total	\$ 255,747	\$ 6,049	\$	\$	\$ 255,747	\$ 6,049

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company's investments include ARS, which are variable-rate debt securities. The Company limits its investments in ARS to securities that carry an AAA (or equivalent) rating from recognized rating agencies and limits the amount of credit exposure to any one issuer. At the time of initial investment and at the date of this report, all ARS remain AAA rated. In the past, the auction process allowed investors to obtain immediate liquidity if so desired by selling the securities at their face amounts. Liquidity for these securities has historically been provided by an auction process that resets interest rates on these investments on average every 7-35 days. However, as has been reported in the financial press, the disruptions in the credit markets adversely affected the auction market for these types of securities. The Company believes that the appropriate presentation of these securities is long-term investments as reflected in the Company's consolidated balance sheet at September 30, 2008, as the Company does not believe it will be able to liquidate these securities in the next twelve months.

Beginning in February 2008, auctions failed for approximately \$53.4 million in par value of municipal ARS the Company held because sell orders exceeded buy orders. The funds associated with failed auctions will not be accessible until a successful auction occurs or a buyer is found outside the auction process. The Company recorded an unrealized loss on these securities of \$4.7 million as of September 30, 2008. The Company does not believe this loss to be other than temporary. However, the Company will reassess this conclusion in future reporting periods based on several factors, including continued failure of auctions, failure of investments to be redeemed, deterioration of the credit ratings of investments, market risk and other factors. Such a reassessment may result in a conclusion that the investments are more than temporarily impaired.

The Company liquidated two of its ARS at par value for \$2.5 million and \$1.1 million in the fourth quarter of fiscal 2008. The Company also liquidated one other ARS subsequent to September 30, 2008, at par value for \$4.9 million.

3. Business Combinations

The Company's acquisitions are accounted for under the purchase method of accounting in accordance with SFAS No. 141, *Business Combinations*. The total purchase price is allocated to the tangible and intangible assets acquired and the liabilities assumed based on their estimated fair values. The excess of the purchase price over those fair values is recorded as goodwill. The fair value assigned to the tangible and intangible assets acquired and liabilities assumed are based on estimates and assumptions provided by management, and other information compiled by management, including independent valuations, prepared by valuation specialists that utilize established valuation techniques appropriate for the technology industry. In accordance with SFAS No. 142, *Goodwill and other Intangible Assets*, goodwill is not amortized but instead is tested for impairment at least annually.

Fiscal Year 2007 Acquisition of Acopia

On September 12, 2007, the Company acquired all of the capital stock of Acopia, a privately held Delaware corporation headquartered in Lowell, Massachusetts for \$207.8 million in cash. The Company also incurred \$2.2 million of direct transaction costs for a total purchase price of approximately \$210.0 million. Acopia provides high-performance, intelligent file virtualization solutions. These solutions will be highly complementary to Company's strategy of optimizing the application infrastructure from the core of the datacenter to the edge of the network. As a result of the merger, the Company acquired all the assets of Acopia, all property, equipment and other assets that Acopia used in its business and assumed all the liabilities of Acopia. The results of operations of Acopia have been included in the Company's consolidated financial statements from the date of acquisition.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The purchase price allocation is as follows (in thousands):

Assets acquired

Cash	\$ 1,855
Fair value of assets	4,364
Deferred tax assets, net	26,799
Developed technology, customer relationships and other intangibles	17,500
In-process research and development	14,000
Goodwill	152,296
 Total assets acquired	 \$ 216,814

Liabilities assumed

Accrued liabilities	\$ (2,093)
Deferred revenue	(4,708)
 Total liabilities assumed	 (6,801)
 Net assets acquired	 \$ 210,013

Of the total estimated purchase price, \$15.0 million was allocated to developed technology, \$14.0 million to in-process research and development, \$2.1 million to customer relationships and \$0.4 million to trade name and a specific non-compete agreement. To determine the value of the developed technology, a combination of cost and market approaches were used. The cost approach required an estimation of the costs required to reproduce the developed technology. The market approach measures the fair value of the technology through an analysis of recent comparable transactions. To determine the value of customer relationships, the income approach was used. The income approach estimates the fair value based on the earnings and cash flow capacity of an asset.

Developed technology, customer relationships and trade name will be amortized on a straight-line basis over their estimated useful life of five years. The non-compete agreement will be amortized on a straight-line basis over the thirty six month term of the agreement.

Fiscal Year 2006 Acquisition of Swan Labs

On October 4, 2005, the Company acquired all of the capital stock of Swan Labs, a privately held Delaware corporation headquartered in San Jose, California for \$43.0 million in cash. The Company also incurred \$3.2 million of direct transaction costs for a total purchase price of approximately \$46.2 million. As a result of the merger, the Company acquired all the assets of Swan Labs, all property, equipment and other assets that Swan Labs used in its business and assumed all the liabilities of Swan Labs. Swan Labs provides WAN (Wide Area Network) optimization and application acceleration products and services. The addition of Swan Labs is intended to allow us to quickly enter the WAN optimization market, broaden the Company's customer base, and augment the Company's existing product line. The results of operations of Swan Labs have been included in the Company's consolidated financial statements

from the date of acquisition.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The purchase price allocation is as follows (in thousands):

Assets acquired	
Cash	\$ 3,448
Fair value of assets	1,497
Deferred tax assets, net	2,341
Developed technology and customer relationships	8,589
Goodwill	31,975
 Total assets acquired	 \$ 47,850
Liabilities assumed	
Accrued liabilities	\$ (1,405)
Deferred revenue	(229)
 Total liabilities assumed	 (1,634)
 Net assets acquired	 \$ 46,216

Of the total estimated purchase price, \$8.0 million and \$0.6 million was allocated to developed technology and customer relationships, respectively. To determine the value of the developed technology, a combination of cost and market approaches were used. The cost approach required an estimation of the costs required to reproduce the developed technology. The market approach measures the fair value of the technology through an analysis of recent comparable transactions. To determine the value of customer relationships, the income approach was used. The income approach estimates the fair value based on the earnings and cash flow capacity of an asset. The \$8.6 million allocated to developed technology and customer relationships will be amortized on a straight-line basis over an estimated useful life of five years.

Pro Forma Results

The unaudited pro forma condensed combined consolidated summary financial information below, presents the combined results of operations as if the acquisitions had occurred at the beginning of the previous fiscal year. For pro forma reporting purposes, the fiscal year 2007 presentation includes the results of operations of Acopia from October 1, 2006 through September 12, 2007, the date of acquisition. The 2006 presentation included the results of operations of Acopia from October 1, 2005 through September 30, 2006.

Unaudited pro forma financial information is as follows (in thousands, except per share data):

Year Ended	Year Ended
September 30,	September 30,
2007	2006

Net revenues pro forma	\$	531,512	\$	396,413
Net income pro forma	\$	48,700	\$	39,396
Net income per share basic pro forma	\$	0.59	\$	0.49
Net income per share diluted pro forma	\$	0.57	\$	0.47

The unaudited pro forma financial information does not reflect integration costs, or cost savings or other synergies anticipated as a result of the acquisition. This information provided for illustrative purposes only and is not necessarily indicative of the operating results that would have occurred if the acquisition had been consummated on the date indicated nor is it necessarily indicative of future operating results of the combined enterprise.

	61,943	53,657
Deferred tax liabilities		
Purchased intangibles and other	(9,116)	(10,316)
Net deferred tax assets	\$ 52,827	\$ 43,341

At September 30, 2008, the Company had U.S. net operating loss carry-forwards of approximately \$80.2 million, a portion of which begins to expire in fiscal 2022 if not utilized. All U.S. net operating loss carry-forwards relate to entities acquired by the Company and are limited in use by I.R.C. Sec. 382. At September 30, 2008, the Company also had net operating loss carry-forwards of approximately \$413,000 related to operations in the United Kingdom that carry forward indefinitely. At September 30, 2008 the Company also had federal research and development credit carry-forwards of approximately \$2.4 million which, if not utilized, will begin to expire in 2022 and state research and development and investment credit carry-forwards of approximately \$1.2 million, which if not utilized, may begin to expire in fiscal year 2017. The aforementioned credit carry-forwards are limited in use under I.R.C. Sec. 383. At September 30, 2007 the Company had approximately \$93 million of net operating loss carry-forwards of which approximately \$2.4 million were related to operations in the United Kingdom which carry-forward indefinitely. At September 30, 2007, the Company had federal research credit and other credit carry-forwards of approximately \$2.4 million and state research and investment credit carry-forwards of approximately \$1.2 million.

United States income and foreign withholding taxes have not been provided on approximately \$670,000 of undistributed earnings from the Company's international subsidiaries. The Company has not recognized a deferred tax liability for the undistributed earnings of its foreign subsidiaries because the Company currently does not expect to remit those earnings in the foreseeable future. Determination of the amount of unrecognized deferred tax liability related to undistributed earnings of foreign subsidiaries is not practicable because such liability, if any, is dependent on circumstances existing if and when remittance occurs.

At December 31, 2007 the federal tax credit for increasing research activities expired. This credit was reinstated into law on October 3, 2008 retroactive to January 1, 2008 for qualifying expenditures through December 31, 2009. This reinstatement will have a material impact on the Company's effective tax rate for the quarter ending December 31, 2009. It is estimated that the impact of this reinstatement upon the Company's effective tax rate for the quarter ending December 31, 2009 will be 6.5%.

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109* (FIN 48), on October 1, 2007. Previously, the Company had accounted for tax contingencies in accordance with Statement of Financial Accounting

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Standards 5, *Accounting for Contingencies*. As required by FIN 48, which clarifies Statement 109, *Accounting for Income Taxes*, the Company recognizes the financial statement impact of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest impact that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. At the adoption date, the Company applied FIN 48 to all tax positions where the statute of limitations remained open for all of the Company's tax years. As a result of the implementation of FIN 48, the Company did not incur any change in the liability for unrecognized tax benefits.

The following table provides a reconciliation of the beginning and ending amount of unrecognized tax benefits in fiscal 2008:

Balance at October 1, 2007	\$ 3,810
Gross increases related to current period tax positions	265
Balance at September 30, 2008	\$ 4,075

The Company recognizes interest and, if applicable, penalties (not included in the unrecognized tax benefits table above) for any uncertain tax positions. This interest and penalty expense will be a component of income tax expense. At the adoption of FIN 48 the Company had not accrued any interest or penalties on unrecognized tax benefits. In the three months and twelve months ended September 30, 2008, the Company accrued approximately \$32,000 and \$146,000, respectively, of interest expense related to its liability for unrecognized tax benefits under FIN 48. No penalties were recognized in fiscal 2008 or accrued for at September 30, 2008.

All unrecognized tax benefits, if recognized, would affect the effective tax rate.

The Company and its subsidiaries are subject to U.S. federal income tax as well as the income tax of multiple state and foreign jurisdictions. The Company has concluded all U.S. federal income tax matters for fiscal years through September 30, 2004. Major jurisdictions where there are wholly owned subsidiaries of F5 Networks, Inc. which require income tax filings include the United Kingdom, Japan, Australia and Germany. Periods open for review by local taxing authorities are fiscal years 2006, 2003, 2004 and 2003 for the United Kingdom, Japan, Australia and Germany, respectively. Within the next four fiscal quarters, the statute of limitations will begin to close on the fiscal years ended 2003 and 2004 tax returns filed in various states and the fiscal year ended 2005 federal income tax return.

6. Shareholders' Equity***Common Stock******Equity Incentive Plans***

In fiscal 2005, the Company modified the method in which it issues incentive awards to its employees through stock-based compensation. In prior years, stock-based compensation consisted only of stock options. Beginning in

2005, the majority of awards consisted of restricted stock unit awards and to a lesser degree stock options. Employees vest in restricted stock units and stock options ratably over the corresponding service term, generally one to four years. The Company's stock options expire 10 years from the date of grant. Restricted stock units are payable in shares of the Company's common stock as the periodic vesting requirements are satisfied. The value of a restricted stock unit is based upon the fair market value of the Company's common stock on the date of grant. The value of restricted stock units is determined using the intrinsic value method and is based on the number of shares granted and the quoted price of the Company's common stock on the date of grant. Alternatively, the Company uses the Black-Scholes option pricing model

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

to determine the fair value of its stock options. Compensation expense related to restricted stock units and stock options is recognized over the vesting period. The Company has adopted a number of stock-based compensation plans as discussed below.

1998 Equity Incentive Plan. In November 1998, the Company adopted the 1998 Equity Incentive Plan, or the 1998 Plan, which provides for discretionary grants of non-qualified and incentive stock options, stock purchase awards and stock bonuses for employees and other service providers. The 1998 Plan terminates on November 11, 2008. Upon certain changes in control of the Company, all outstanding and unvested options or stock awards under the 1998 Plan will vest at the rate of 50%, unless assumed or substituted by the acquiring entity. During the fiscal year 2007, the Company issued no non-qualified and incentive stock options or stock purchase awards and issued 119,630 stock bonuses to employees. During the fiscal year 2008, the Company issued no stock options, stock purchase awards or stock bonuses under this plan. As of September 30, 2008, there were options to purchase 777,878 shares outstanding, 59,756 unvested stock bonuses, and 33,089 shares available for awards under the 1998 Plan.

1999 Employee Stock Purchase Plan. In May 1999, the board of directors approved the adoption of the 1999 Employee Stock Purchase Plan, or the Employee Stock Purchase Plan. A total of 4,000,000 shares of common stock have been reserved for issuance under the Employee Stock Purchase Plan. The Employee Stock Purchase Plan permits eligible employees to acquire shares of the Company's common stock through periodic payroll deductions of up to 15% of base compensation. No employee may purchase more than \$25,000 worth of stock, determined at the fair market value of the shares at the time such option is granted, in one calendar year. The Employee Stock Purchase Plan has been implemented in a series of offering periods, each 6 months in duration. The price at which the common stock may be purchased is 85% of the lesser of the fair market value of the Company's common stock on the first day of the applicable offering period or on the last day of the respective purchase period. As of September 30, 2008 there were 992,968 shares available for awards under the Employee Stock Purchase Plan.

2000 Equity Incentive Plan. In July 2000, the Company adopted the 2000 Employee Equity Incentive Plan, or the 2000 Plan, which provides for discretionary grants of non-qualified stock options, stock purchase awards and stock bonuses for non-executive employees and other service providers. A total of 7,000,000 shares of common stock have been reserved for issuance under the 2000 Plan. Upon certain changes in control of the Company, all outstanding and unvested options or stock awards under the 2000 Plan will vest at the rate of 50%, unless assumed or substituted by the acquiring entity. As of September 30, 2008, there were options to purchase 618,554 shares outstanding and 154,347 shares available for awards under the 2000 Plan. The Company terminated the 2000 Plan effective November 1, 2008 and no additional shares may be issued from the 2000 Plan.

New Hire Incentive Plans. In August 2004, the Company adopted a non-qualified stock option plan, or the Triebes Plan, in connection with the hiring of Karl Triebes, the Company's Senior Vice President of Product Development and Chief Technology Officer. The Triebes Plan provided for a grant of 600,000 non-qualified stock options for Mr. Triebes. As of September 30, 2008, there were options to purchase 113,000 shares outstanding and no shares available for awards under the Triebes Plan. Upon certain changes in control of the Company, 100% of all outstanding and unvested options remaining under the Triebes Plan will vest and become immediately exercisable.

Acquisition Incentive Plans. In July 2003, the Company adopted the uRoam Acquisition Equity Incentive Plan, or the uRoam Plan, in connection with the hiring of the former employees of uRoam, Inc. A total of 500,000 shares of common stock were reserved for issuance under the uRoam Plan. The plan provided for discretionary grants of

non-qualified and incentive stock options, stock purchase awards and stock bonuses. The Company has not granted any stock purchase awards or stock bonuses under this plan. As of September 30, 2008 there were options to purchase 28,382 shares outstanding and no shares available for awards under the uRoam Plan.

F5 NETWORKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In July 2004, the Company adopted the MagniFire Acquisition Equity Incentive Plan, or the MagniFire Plan, in connection with the hiring of the former employees of MagniFire Websystems, Inc. A total of 830,000 shares of common stock were reserved for issuance under the MagniFire Plan. The plan provides for discretionary grants of non-qualified and incentive stock options, stock purchase awards and stock bonuses. The Company has not granted any stock purchase awards or stock bonuses under this plan. As of September 30, 2008 there were options to purchase 62,367 shares outstanding and no shares available for awards under the MagniFire Plan.

Options that expire under the uRoam Plan or the MagniFire Plan, whether due to termination of employment or otherwise, are not available for future grant.

In August 2007, the Company adopted the 2007 Acopia Acquisition Equity Incentive Plan, or the 2007 Acopia Plan. The 2007 Acopia Plan provides for discretionary grants of non-statutory stock options and stock units for employees, directors and consultant of Acopia to whom the Company offers employment in connection with the Company's acquisition of Acopia. A total of 600,000 shares of common stock have been reserved for issuance under the 2007 Acopia Plan. Upon certain changes in control of the Company, the surviving entity will either assume or substitute all outstanding Stock Awards under the 2007 Acopia Plan. During the fiscal year 2008, the Company issued no stock options and 392,250 stock units under the 2007 Acopia Plan. As of September 30, 2008, there were no stock options outstanding and 207,750 shares available for awards under the 2007 Acopia Plan. The Company terminated the 2007 Acopia Plan effective November 1, 2008 and no additional shares may be issued from the 2007 Acopia Plan.

In connection with the Company's acquisition of Acopia, the Company assumed the Acopia 2001 Stock Incentive Plan, or the Acopia Plan. Unvested options to acquire Acopia's common stock were converted into options to acquire the Company's common stock in connection with the acquisition. A total of 2,230,703 shares of common stock were reserved for issuance under the Acopia Plan. The plan provides for discretionary grants of non-qualified and incentive stock options, restricted stock awards and other stock-based awards to persons who were employees, officers, directors, consultants or advisors to Acopia on or prior to September 12, 2007. During the fiscal year 2008, the Company issued no stock options and 159,680 stock units under the Acopia Plan. As of September 30, 2008, there were options to purchase 294,496 shares outstanding and 1,718,856 shares available for awards under the Acopia Plan.

2005 Equity Incentive Plan. In December 2004, the Company adopted the 2005 Equity Incentive Plan, or the 2005 Plan, which provides for discretionary grants of non-statutory stock options and stock units for employees, including officers, and other service providers. A total of 7,400,000 shares of common stock have been reserved for issuance under the 2005 Plan. Upon certain changes in control of the Company, the surviving entity will either assume or substitute all outstanding Stock Awards under the 2005 Plan. During the fiscal year 2008, the Company issued no stock options and 1,700,162 stock units under the 2005 Plan. As of September 30, 2008, there were options to purchase 60,000 shares outstanding and 1,951,350 shares available for awards under the 2005 Plan.

A majority of the restricted stock units granted in fiscal 2008, 2007 and 2006 vest quarterly over a two-year period. The restricted stock units were granted during fiscal 2008, 2007 and 2006 with a per-share weighted average fair value of \$30.47, \$40.98 and \$27.21, respectively. Restricted stock units were granted during the fourth quarter of fiscal year 2005 with a per share weighted average fair value of \$22.30. The fair value of restricted stock vested during fiscal years 2008, 2007 and 2006 was \$36.5 million, \$45.3 million and \$17.1 million, respectively.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of restricted stock unit activity under the 2005 Plan is as follows:

	Outstanding Stock Units	Weighted Average Grant Date Fair Value
Balance, September 30, 2005	1,436,368	\$ 22.30
Units granted	1,023,750	27.21
Units vested	(604,270)	28.27
Units cancelled	(144,884)	22.76

Cancelled	314,558
Additional shares reserved (terminated), net	(36,343)
Balance, September 30, 2008	4,065,392

As of September 30, 2008, there was \$82.9 million of total unrecognized compensation cost, related to unvested stock options and restricted stock units, the majority of which will be recognized ratably over the next two years. An assumption of approximately a four percent forfeiture rate is utilized when arriving at the amount of stock compensation expense for executive officers and the Company's Board of Directors. An assumption of approximately a ten percent forfeiture rate is utilized when arriving at the amount of stock compensation expense for all other employees. The Company recognized \$60.6 million, \$41.2 million and \$24.8 million of pre-tax stock compensation expense for the years ended September 30, 2008, 2007 and 2006, respectively.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****7. Commitments and Contingencies*****Operating Leases***

The majority of the Company's operating lease payments relate to the Company's three building corporate headquarters in Seattle, Washington. The lease on the first and second buildings commenced in July and October of 2000. The lease for both buildings expires in 2012 and the second building has been partially subleased for the remaining term. The lease on the third building commenced in June 2008 and will expire in 2018. The Company also leases additional office space for product development and sales and support personnel in the United States and internationally.

In October 2006, the Company entered into an office lease agreement to lease a total of approximately 137,000 square feet of office space in a building known as 333 Elliott West, which is adjacent to the three buildings that serve as our corporate headquarters. The lease expires in 2018. Construction on this project was substantially completed in the third quarter of fiscal year 2008. During 2008, the Company entered into two separate sublease agreements to sublease approximately 112,500 square feet of building 333 Elliott West. These sublease terms expire in 2011 and 2013, respectively.

Future minimum operating lease payments, net of sublease income, are as follows (in thousands):

	Gross Lease Payments	Sublease Income	Net Lease Payments
2009	17,917	5,632	12,285
2010	17,300	6,657	10,643
2011	13,726	6,431	7,295
2012	11,229	4,505	6,724
2013	6,830	1,112	5,718
Thereafter	25,676		25,676
	\$ 92,678	\$ 24,337	\$ 68,341

Rent expense under non-cancelable operating leases amounted to approximately \$15.8 million, \$10.4 million, and \$8.2 million for the fiscal years ended September 30, 2008, 2007, and 2006, respectively.

Purchase Obligations

Purchase obligations are comprised of purchase commitments with our contract manufacturers. The agreement with our primary contract manufacturer allows them to procure component inventory on our behalf based on our production forecast. We are obligated to purchase component inventory that the contract manufacturer procures in accordance with the forecast, unless cancellation is given within applicable lead times.

Litigation

Derivative Suits. Beginning on or about May 24, 2006, several derivative actions were filed against certain current and former directors and officers of the Company. These derivative lawsuits were filed in: (1) the Superior Court of King County, Washington, as In re F5 Networks, Inc. State Court Derivative Litigation (Case No. 06-2-17195-1 SEA), which consolidates Adams v. Amdahl, et al. (Case No. 06-2-17195-1 SEA), Wright v. Amdahl, et al. (Case No. 06-2-19159-5 SEA), and Sommer v. McAdam, et al. (Case No. 06-2-26248-4 SEA) (the State Court Derivative Litigation); and (2) in the U.S. District Court for the Western District of Washington, as In re F5 Networks, Inc. Derivative Litigation, Master File No. C06-0794RSL, which consolidates Hutton v. McAdam, et al. (Case No. 06-794RSL), Locals 302 and 612 of the International Union of Operating Engineers-Employers Construction Industry Retirement Trust v.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

McAdam et al. (Case No. C06-1057RSL), and Easton v. McAdam et al. (Case No. C06-1145RSL)(the Federal Court Derivative Litigation). On August 2, 2007, another derivative lawsuit, Barone v. McAdam et al. (Case No. C07-1200P), was filed in the U.S. District Court for the Western District of Washington. It is expected that this lawsuit will be consolidated with the other lawsuits pending in the U.S. District Court for the Western District of Washington. The complaints generally allege that certain of the Company's current and former directors and officers, including, in general, each of the Company's current outside directors (other than Deborah L. Bevier and Scott Thompson who joined the Company's Board of Directors in July 2006 and January 2008, respectively) breached their fiduciary duties to the Company by engaging in alleged wrongful conduct concerning the manipulation of certain stock option grant dates. The Company is named solely as a nominal defendant against whom the plaintiffs seek no recovery. The Company's combined motion to consolidate and stay the State Court Derivative Litigation was granted in a court order dated April 3, 2007. The Company's motion to dismiss the consolidated federal derivative actions based on plaintiffs' failure to make demand on the Company's Board of Directors prior to filing suit was granted in a court order dated August 6, 2007 with leave to amend the allegations in plaintiffs' complaint. Plaintiffs filed an amended consolidated federal derivative action complaint on September 14, 2007. The Company filed a motion to dismiss the amended complaint based on plaintiff's failure to make demand on the Company's Board of Directors prior to filing suit. On July 3, 2008, before ruling on the Company's pending dismissal motion, the federal court entered an order certifying certain issues of Washington state law to the Washington Supreme Court for resolution. Briefing the Washington Supreme Court on the certified issues began on September 15, 2008 and the hearing is currently set for March 24, 2009. The federal derivative actions are stayed pending resolution of the certification proceeding. The Company intends to continue to vigorously pursue dismissal of the derivative actions.

SEC and Department of Justice Inquiries. In May 2006, the Company received notice from both the SEC and the Department of Justice that they were conducting informal inquiries into the Company's historical stock option practices. The Company has fully cooperated with both agencies. Considerable legal and accounting expenses related to our historical stock option practices have been incurred to date. The Company may in the future be subject to additional regulatory proceedings or actions arising in relation to its historical stock option practices and the restatement of its prior period financial statements. Although regulatory proceedings are subject to inherent uncertainties, the Company does not believe the results of any pending actions will, individually or in the aggregate, have a material adverse impact its consolidated financial position or results of operations.

The Company is not aware of any additional pending legal proceedings that, individually or in the aggregate, would have a material adverse effect on the Company's business, operating results, or financial condition. The Company may in the future be party to litigation arising in the ordinary course of business, including claims that we allegedly infringe upon third-party trademarks or other intellectual property rights. Such claims, even if not meritorious, could result in the expenditure of significant financial and managerial resources.

8. Facility Exit and Sublease Agreements

During fiscal year 2008, the Company exited a research and development facility in Bellevue, Washington for which it has remaining operating lease obligations through 2014. In addition, the Company consolidated its corporate headquarters, partially subleasing the building located at 333 Elliott Avenue West in Seattle, Washington for which it has remaining operating lease obligations through 2018. As a result of the expected loss on the facility exit and sublease agreements, the Company recorded a charge of \$5.3 million in the fourth quarter of fiscal 2008 pursuant to SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146) and FTB No. 79-15,

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****9. Employee Benefit Plans**

The Company has a 401(k) savings plan whereby eligible employees may voluntarily contribute a percentage of their compensation. The Company may, at its discretion, match a portion of the employees' eligible contributions. Contributions by the Company to the plan during the years ended September 30, 2008, 2007, and 2006 were approximately \$3.5 million, \$2.5 million and \$1.3 million, respectively. Contributions made by the Company vest over four years.

10. Geographic Sales and Significant Customers

Operating segments are defined as components of an enterprise for which separate financial information is available and evaluated regularly by the chief operating decision-maker, or decision-making group, in deciding how to allocate resources and in assessing performance. For fiscal years 2008, 2007 and 2006, the Company was organized as, and operated in, one reportable segment: the development, marketing and sale of application delivery networking products that optimize the security, performance & availability of network applications, servers and storage systems. The Company manages its business based on four geographic regions: the Americas (primarily the United States); Europe, the Middle East, and Africa (EMEA); Japan; and the Asia Pacific region (APAC). The Company's chief operating decision-making group reviews financial information presented on a consolidated basis accompanied by information about revenues by geographic region. The Company's foreign offices conduct sales, marketing and support activities. Management evaluates performance based primarily on revenues in the geographic locations in which the Company operates. Revenues are attributed by geographic location based on the location of the customer. The Company's assets are primarily located in the United States and not allocated to any specific region. Therefore, geographic information is presented only for net product revenue.

The following presents revenues by geographic region (in thousands):

	Years Ended September 30,		
	2008	2007	2006
Americas	\$ 373,906	\$ 307,087	\$ 226,242
EMEA	138,810	92,674	70,716
Japan	58,736	64,346	51,560
Asia Pacific	78,721	61,560	45,531
	\$ 650,173	\$ 525,667	\$ 394,049

Net revenues from international customers are primarily denominated in U.S. dollars and totaled \$276.3 million, \$218.6 million, and \$167.8 million for the years ended September 30, 2008, 2007 and 2006, respectively. One domestic distributor accounted for 10.5%, 11.6% and 13.6% of total net revenue for the fiscal years 2008, 2007 and 2006, respectively. Another domestic distributor accounted for 14.0%, 13.2% and 11.6% of total net revenue for the fiscal years 2008, 2007 and 2006. This distributor accounted for 10.5% of accounts receivable as of September 30, 2008.

Table of Contents**F5 NETWORKS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****11. Quarterly Results of Operations**

The following presents the Company's unaudited quarterly results of operations for the eight quarters ended September 30, 2008. The information should be read in conjunction with the Company's financial statements and related notes included elsewhere in this report. This unaudited information has been prepared on the same basis as the audited financial statements and includes all adjustments, consisting only of normal recurring adjustments that were considered necessary for a fair statement of the Company's operating results for the quarters presented.

F5 NETWORKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. Subsequent Events

On October 8, 2008 the Company received a letter from UBS Financial Services, Inc. (UBS), offering nontransferable rights to sell \$33.3 million of eligible ARS, at par value to UBS any time during the period June 30, 2010 and July 2, 2012. The Company elected to accept the UBS offer on October 15, 2008.

On October 22, 2008, the Company announced that its Board of Directors approved a new program to repurchase up to an additional \$200 million of the Company's outstanding common stock. Acquisitions for the share repurchase program will be made from time to time in private transactions or open market purchases as permitted by securities laws and other legal requirements. The program may be discontinued at any time. As of November 19, 2008, the Company had repurchased and retired approximately 373,200 shares at an average price of \$22.76 per share.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to ensure that required information is recorded, processed, summarized and reported within the required timeframe, as specified in the rules set forth by the Securities Exchange Commission. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed is accumulated and communicated to management, including the Chief Executive Officer and Chief Accounting Officer, to allow timely decisions regarding required disclosures.

Our management, with the participation of our Chief Executive Officer and Chief Accounting Officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2008 and, based on this evaluation, our Chief Executive Officer and Chief Accounting Officer have concluded that our disclosure controls and procedures were effective as of September 30, 2008.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

Management conducted an assessment of the effectiveness of our internal control over financial reporting as of September 30, 2008. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control - Integrated Framework*. Based on the results of this assessment and on those criteria, management concluded that our internal control over financial reporting was effective as of September 30, 2008.

The effectiveness of the Company's internal control over financial reporting as of September 30, 2008 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Changes in Internal Control over Financial Reporting

During the fourth fiscal quarter, there were no changes to our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Item 9B. *Other Information*

None.

Table of Contents

PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

Certain information required by this item regarding the company's directors and executive officers is incorporated herein by reference to the sections entitled Board of Directors Nominees and Continuing Directors, Corporate Governance Committees of the Board Audit Committee and Code of Ethics for Senior Financial Officers and Director Nomination, and Security Ownership of Certain Beneficial Owners and Management Section 16(a) Beneficial Ownership Reporting Compliance in the company's definitive Proxy Statement that will be furnished to the SEC no later than January 28, 2009 (the Proxy Statement). Additional information regarding the company's directors and executive officers is set forth in Item 1 of Part I of this Annual Report on Form 10-K under the caption Directors and Executive Officers of the Registrant.

Item 11. *Executive Compensation*

The information required by this item is incorporated by reference to the sections entitled Executive Compensation and Corporate Governance Committees of the Board Compensation Committee and Compensation Committee Interlocks and Insider Participation and Compensation Committee Report in the Proxy Statement.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters*

The information required by this item is incorporated by reference to the section entitled Security Ownership of Certain Beneficial Owners and Management in the Proxy Statement.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required by this item is incorporated by reference to the sections entitled Board of Directors Director Independence and Corporate Governance Related Person Transactions Policy and Procedures and Certain Relationships and Related Person Transactions in the Proxy Statement.

Item 14. *Principal Accountant Fees and Services*

The information required by this item is incorporated by reference to the section entitled Executive Compensation Fees Paid to PricewaterhouseCoopers LLP and Audit Committee Pre-Approval Procedures and Annual Independence Determination in the Proxy Statement.

PART IV

Item 15. *Exhibits and Financial Statement Schedules*

(a) Documents filed as part of this report are as follows:

1. *Consolidated Financial Statements:*

Our Consolidated Financial Statements are listed in the Index to Consolidated Financial Statements.

2. *Financial Statement Schedule:*

Our consolidated valuation and qualifying accounts and receivables (Schedule II) financial statement schedule is listed in the Index to Consolidated Financial Statements. All other schedules have been omitted because the information required to be set forth therein is not applicable or is shown in the Consolidated Financial Statements or the notes hereto.

3. *Exhibits:*

The required exhibits are included at the end of this Annual Report on Form 10-K and are described in the Exhibit Index immediately preceding the first exhibit.
