EMAGEON INC.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(1) BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The accompanying unaudited condensed consolidated financial statements of Emageon Inc. ("Emageon" or the Company) have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, for a fair presentation have been included. Operating results for the three months ended March 31, 2005 are not necessarily indicative of the results that may be expected for the year ending December 31, 2005. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2004. Certain amounts in the prior period financial statements have been reclassified to conform to the current financial statement presentation.

Securities Held-to-Maturity

The Company is required to classify debt securities as held-to-maturity, available-for-sale or trading. The appropriateness of each classification is reassessed at each reporting date. As of March 31, 2005, the Company classified all debt securities as held-to-maturity. At March 31, 2005, securities held-to-maturity totaling \$29,582,046 consisted of U.S. Government Agency securities as well as marketable debt securities carried at amortized cost in accordance with the Financial Accounting Standards Board Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The estimated fair value of all held-to-maturity securities at March 31, 2005 was approximately \$29,609,900.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Deferred income tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. The Company has established a full valuation allowance against its deferred tax assets.

Indemnification Provisions

In November 2002, the FASB issued Financial Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* ("FIN 45"), which is an interpretation of SFAS Nos. 5, 57, and 107 and rescission of FASB Interpretation No. 34. FIN 45 requires that a guarantor recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken by issuing the guarantee. FIN 45 also requires additional disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees it has issued. The accounting requirements for the initial recognition of guarantees are applicable on a prospective basis for guarantees issued or modified after December 31, 2002. The following is a summary of those of our agreements that we have determined to be within the scope of FIN 45:

(1) Our sales agreements with customers generally contain infringement indemnity provisions. Under these agreements, we agree to indemnify, defend and hold harmless the customer in connection with patent, copyright or trade secret infringement claims made by third parties with respect to the customer's authorized use of our products and services. The indemnity provisions generally provide for our control of any required defense and settlement and cover costs and damages finally awarded against the customer. Our infringement indemnity provisions typically give us the option to make modifications of the product so it is no longer infringing or, if it cannot be corrected, to require the customer to return the product in exchange for a specified payment for loss of use. Our sales agreements

Table of Contents

with customers sometimes also contain indemnity provisions for death, personal injury or property damage caused by our personnel or contractors in the course of performing services to customers. Under these agreements, we agree to indemnify, defend and hold harmless the customer in connection with death, personal injury and property damage claims made by third parties with respect to actions of our personnel or contractors. The indemnity provisions generally provide for our control of any required defense and settlement and cover costs and damages finally awarded against the customer. The indemnity obligations contained in sales agreements generally have no specified expiration date but typically limit the amount of award covered to some portion of the fees paid by the customer over some portion of the contract term. To date, we have not incurred costs to settle claims or pay awards under these indemnification obligations. Accordingly, we have no liabilities recorded for these provisions as of March 31, 2005.

(2) We warrant that our software products will perform in all material respects in accordance with our standard published specifications in effect at the time of delivery of the licensed products to the customer as long as the contract remains in effect. Additionally, we warrant that our services will be performed by qualified personnel in a manner consistent with normally accepted industry standards. If necessary, we would provide for the estimated cost of product and service warranties based on specific warranty claims and claim history. However, we have not incurred significant recurring expense under our product or service warranties. Accordingly, we have no liabilities recorded for these provisions as of March 31, 2005.

(3) Our standard contracts with customers typically provide for a 99% guarantee of system availability and a 98% guarantee of component availability with penalty provisions if our solution fails to meet the guarantee thresholds. Our 99% system availability guarantee covers our solution as a whole, while the component guarantee covers each individual component, as in certain circumstances a component may fail without affecting system availability. The penalty provisions in our contracts typically allow for a reduction in the software maintenance fee related to failure to meet guaranteed uptime percentages. We calculate these penalties as a percentage of the software maintenance fee and would reduce the amount of the software maintenance fee charged in a specific period for these penalties. To date, we have not incurred any penalties associated with these guarantees. Accordingly, we have no liabilities recorded for these provisions as of March 31, 2005.

(2) COMPUTATION OF NET LOSS PER SHARE

Net loss per share - basic is computed using the weighted average common shares outstanding during the period. Net loss per share -diluted is computed using the weighted average common shares outstanding and common share equivalents shares outstanding during the period. Common share equivalents consist of common convertible preferred stock, stock warrants and options to purchase common stock. Certain potential dilutive shares of common stock were excluded from periods with a net loss because they were anti-dilutive.

Table of Contents

The computations for basic and diluted net loss per share for each period are as follows:

	Three Months Ended March 31,	
	2005	2004
Numerator:		
Net loss	\$ (4,818,092)	\$ (3,592,028)
Accretion of redemption value related to redeemable preferred stock	(8,300)	(16,599)
Net loss allocable to common stockholders	\$ (4,826,392)	\$ (3,608,627)
Denominator:		
Common stock outstanding at beginning of period	2,709,370	2,429,742
Weighted average effect of the conversion of preferred stock to common stock	5,542,188	
Weighted average effect of the issuance of common stock in initial public offering	2,905,556	
Weighted average effect of the issuance of common stock and preferred stock pursuant to stock option and warrant exercises	287,447	906
Weighted average effect of the release of escrowed common stock upon completion of initial public offering	87,425	
Weighted average number of shares of common stock-basic and diluted	11,531,986	2,430,648
Net loss per share-basic and diluted	\$ (0.42)	\$ (1.48)

Preferred stock convertible into 10,827,403 shares of common stock for the three months ended March 31, 2004 was not included in the computation of diluted earnings per share because the effect on earnings per share would have been anti-dilutive. Options and warrants to purchase 2,400,388 and 3,340,888 shares of common stock for the three month periods ended March 31, 2005 and 2004, respectively, and warrants to purchase none and 216,138 shares of Series D preferred stock for the three month periods ended March 31, 2005 and 2004, respectively, were not included in the computation of diluted earnings per share because their effect on earnings per share would have been anti-dilutive.

(3) STOCK-BASED COMPENSATION

The Company recognizes compensation expense for its stock-based employee and director compensation plans using the intrinsic value method prescribed in Accounting Principles Board Opinion (APB) No. 25, *Accounting for Stock Issued to Employees* (APB 25), and complies with the disclosure provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, as amended. Under APB 25, compensation expense of fixed stock options is based on the difference, if any, on the date of the grant between the fair value of the stock and the exercise price of the option. Compensation expense is recognized on a straight-line basis over the vesting period, which is generally three years. The Company recognizes expense for stock-based compensation issued to non-employees and non-directors at fair value in accordance with the provisions of SFAS No. 123 and EITF Issue No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*.

Had compensation expense for the stock-based compensation plans been determined using the fair-value method at the grant date for all employee and director awards using the Black-Scholes pricing model, the net loss and related net

loss per share would have been as follows for the periods indicated:

6

Table of Contents

	Three Months Ended March 31,	
	2005	2004
Numerator:		
Actual net loss	\$ (4,818,092)	\$ (3,592,028)
Deduct: Accretion of redemption value related to redeemable preferred stock	(8,300)	(16,599)
Add: Total stock-based employee compensation expense determined under APB 25	281,988	59,206
Deduct: Total stock-based employee compensation expense determined under fair value method for all awards	(526,022)	(73,866)
Pro forma net loss allocable to common stockholders	\$ (5,070,426)	\$ (3,623,287)
Denominator:		
Weighted average number of shares of common stock-basic and diluted	11,531,986	2,430,648
Pro forma net loss per share -basic and diluted	\$ (0.44)	\$ (1.49)

The pro forma effects on the net loss for the periods presented above are not necessarily representative of the pro forma effects that may occur in future periods.

(4) INITIAL PUBLIC OFFERING

On February 14, 2005, the Company completed the initial public offering of its common stock. The Company sold 5,000,000 shares of its common stock at a price of \$13.00 per share. On February 18, 2005, the over-allotment option to purchase 750,000 additional shares of common stock was exercised at \$13.00 per share. Total proceeds from the initial public offering (net of underwriting discount and offering expenses) were approximately \$67.2 million. In conjunction with the initial public offering, the Company issued 10,827,403 shares of common stock upon the automatic conversion of outstanding shares of preferred stock into shares of common stock. The Company also issued 537,082 shares of common stock upon the required exercise of warrants to purchase common stock upon the closing of the offering. The Company also released the remaining escrow holdback related to the Ultravision Medical Systems Corporation (Ultravision) merger upon the closing of the offering. Upon completion of the offering, 552,661 of common stock warrants with an exercise price of \$0.00825 per share were canceled. As of the close of the initial public offering, the Company had no remaining warrants to purchase preferred stock outstanding.

With a portion of the proceeds from the offering, the Company repaid \$4.0 million of its subordinated debt on February 18, 2005. Concurrent with this repayment, the Company recorded a non-cash interest charge of \$621,012 for the write-off of the debt discount related to warrants issued in connection with the subordinated debt.

(5) NEW ACCOUNTING PRONOUNCEMENT

In December 2004, the Financial Accounting Standards Board issued Statement No. 123 (revised 2004), Share-Based Payment (SFAS 123R). SFAS 123R establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. SFAS 123R requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award and the estimated number of awards that are expected to vest. That cost will be recognized over the period during which an employee is required to provide service in exchange for the award, which is usually the vesting period. SFAS 123R supersedes APB 25, which the Company had previously elected to follow.

SFAS 123R will be effective for the Company at the beginning of the fiscal first quarter of 2006. SFAS 123R applies to all awards granted after the required effective date and to awards modified, repurchased, or canceled after that date. Compensation cost is recognized on or after the required effective date for the portion of outstanding awards for which the requisite service has not yet been rendered, based on the grant-date fair value of those awards calculated under SFAS 123 that the Company has followed for disclosure purposes. For periods before the required effective date, the Company may elect to adjust financial statements of prior periods on a basis consistent with the pro forma disclosures required for those periods by SFAS 123. The Company has elected not to restate prior

Table of Contents

periods. Based on stock options granted through March 31, 2005, the Company estimates that it will record additional costs relating to compensation expense as a result of the adoption of SFAS 123R starting in the first quarter of 2006.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our consolidated financial statements and related notes included in Item 1 of Part I of this quarterly report and the audited consolidated financial statements and notes and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2004.

Company Overview

We provide an enterprise-level information technology solution for the clinical analysis and management of digital medical images within health care provider organizations. Our solution consists of advanced visualization and image management software, third-party components and comprehensive support services. Our web-enabled advanced visualization software, which is hosted by the customer, provides physicians across the enterprise -in multiple medical specialties and at any network access point -with tools to manipulate and analyze images in 2D and 3D. We enable physicians to better understand internal anatomic structure and pathology, improving clinical diagnoses, disease screening and therapy planning. We believe our solution improves physician productivity and patient care, enhances customer revenue opportunities, automates complex medical imaging workflow and helps to maximize our customers investment in capital equipment and clinical information systems.

Summary

Our revenue for the quarter ended March 31, 2005 was \$11.3 million, which represents a 59.3% increase over the corresponding period in 2004. This increase was comprised of a 57.2% increase in system sales revenue and a 63.8% increase in support services revenue. Our overall gross margin percentage increased from 18.9% for the quarter ended March 31, 2004 to 30.3% for the quarter ended March 31, 2005. We achieved gross margin percentages of 37.5% and 14.8% for system sales and support services revenue, respectively, during the quarter ended March 31, 2005, compared to 28.9% and (3.2%) for the corresponding period in 2004. We recorded a net loss for the quarter ended March 31, 2005 of \$4.8 million, compared with a net loss of \$3.6 million for the corresponding period in 2004.

Also, during February 2005, we completed our initial public offering, selling a total of 5,750,000 shares of our common stock at a price of \$13.00 per share, which resulted in net proceeds to the Company of approximately \$67.2 million. With a portion of the proceeds from the offering, we repaid \$4.0 million of our subordinated debt. We also recorded a non-cash interest charge of \$0.6 million for the write-off of the debt discount related to warrants issued in connection with the subordinated debt.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions. Our actual results may differ from these estimates.

We believe that of our significant accounting policies, which are described in Note 2 of the notes to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31,

2004, the following accounting policies involve a greater degree of judgment and complexity. Accordingly, these are the policies we believe are the most critical to aid in fully understanding and evaluating our consolidated financial condition and results of operations.

Table of Contents

Revenue Recognition and Deferred Revenue

We derive revenue from two primary sources: (1) system sales revenue, which includes software license revenue and third-party component sales revenue and (2) support services revenue, which includes fees related to implementation, training, software maintenance, ongoing customer support and third-party component maintenance. While the basis for software license revenue recognition is substantially governed by the provisions of AICPA Statement of Position 97-2, (SOP 97-2), *Software Revenue Recognition*, as amended, in the application of this standard, we exercise judgment and use estimates in connection with the determination of the amount of software license and support services revenue to be recognized in each accounting period.

We sell software under three types of licenses:

(1) Perpetual licenses: software licensed on a perpetual basis to a customer based on a fixed number of users and/or estimates of annual study volumes where the customer has no right to return the licensed software.

(2) Enterprise licenses: software licensed on a perpetual basis to a customer (typically a multi-facility health care provider), as opposed to licensing based on a fixed number of users or on estimates of annual study volumes, where the customer has no right to return the licensed software.

(3) Term licenses: software licensed for a specific period of time according to a fixed number of users and/or estimates of annual study volumes.

Generally, our software license arrangements do not include significant modification or customization of the underlying software and, as a result, we recognize license revenue when: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred; (3) customer payment is deemed fixed or determinable and (4) collection is probable. We assess each of the four criteria as follows:

Persuasive evidence of an arrangement exists: Before we recognize revenue, we conduct an assessment to determine whether a binding arrangement exists with the customer counterparty. To this end, it is our customary practice to have a written contract, which is signed by both the customer and us, or a purchase order from those customers that have previously negotiated a standard end-user license arrangement, prior to recognizing revenue on an arrangement.

Delivery has occurred: Before we recognize revenue under any arrangement, we determine whether our software has been actually delivered to the customer counterparty. It is our customary practice to obtain formal acceptance for our software, which is evidenced by written customer acknowledgement. In the event that we grant a customer the right to specified upgrades, we defer recognition of the entire arrangement fee until we deliver the specified upgrades as we have not established vendor-specific objective evidence (VSOE) of fair value for specified upgrades. Specified upgrades include, but are not limited to, future software deliverables that are stated in the customer contract.

The customer's payment is deemed fixed or determinable: If we find that an arrangement exists and that delivery has occurred, before we recognize revenue in respect of any particular customer, we assess whether fees are fixed or determinable and free of contingencies or significant uncertainties at the time of sale and recognize revenue when all other applicable revenue recognition requirements are met. While our standard payment terms are net 30 days, we have, on a few occasions, extended payment terms beyond 30 days (but none greater than six months) to creditworthy customers. We have established a successful history of collection, without concessions, on these receivables; therefore satisfying the required criteria for revenue recognition. If the fee is determined not to be fixed or determinable, we recognize revenue as the amounts

become due and payable.

Collection is probable: In addition to the three foregoing factors which we review for each customer arrangement, before we recognize any revenue for any particular customer, we also conduct an assessment of the likelihood of collection from that customer. Both new and existing customers are subjected to a credit review that evaluates such customer's financial position and ultimately its ability to pay. For follow-on sales to existing customers, prior payment history is also used to evaluate probability of collection. If it is determined from the outset of the arrangement that collection is not probable based upon our credit review

Table of Contents

process, revenue is recognized on a cash-collected basis if all other applicable revenue recognition criteria are met.

We account for software license and non-recurring support services revenue included in multiple element arrangements using the residual method. Under the residual method, the fair value of the undelivered elements (*i.e.*, software maintenance and ongoing support services) based on VSOE of fair value is deferred and the remaining portion of the arrangement fee is allocated to the delivered elements (*i.e.*, software license and non-recurring support services). If evidence of the fair value of one or more of the undelivered services does not exist, revenue is deferred and recognized when delivery of those services occurs or fair value can be established. We determine VSOE of fair value for ongoing support services revenue based upon the renewal rates for the maintenance and ongoing support, which coincide with our pricing model. Significant incremental discounts offered in multiple element arrangements that would be characterized as separate elements are infrequent and are allocated to software license revenue under the residual method.

For term license arrangements, we recognize revenue for the multiple element arrangement over the term of the arrangement beginning in the month after we receive customer acceptance, provided that the other applicable revenue recognition criteria have been met.

Software maintenance services generally include rights to upgrades (when and if available), telephone support, updates and bug fixes. Software maintenance revenue is recognized ratably over the term of the maintenance contract on a straight-line basis when all of the applicable revenue recognition requirements are met. We include the first year of software maintenance in the software license fee. We defer this software maintenance fee based on its fair value and recognize it ratably over the first year of the arrangement.

Ongoing support services generally include telephone support related to third-party components as well as quarterly customer metric reporting and other services. Ongoing support service revenue is recognized ratably over the term of the ongoing support services contract on a straight-line basis when all of the applicable revenue recognition requirements are met.

We recognize revenue related to the third-party components according to guidance set forth in Emerging Issues Task Force Issue No. 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables* (EITF 00-21). Third-party component revenue, including hardware sales and hardware maintenance, is recognized in accordance with contractual terms. When we are responsible for installing the third-party components, revenue is recognized when the third-party components are delivered, installed and accepted by the customer. When we are not responsible for installing the third-party components, revenue is recognized when the third-party components are delivered to the customer. We qualify to recognize hardware sales and hardware maintenance under EITF 00-21 as a result of the following factors: (1) our software is not essential to the functionality of the hardware, (2) our customers have the ability to purchase the hardware from other vendors and (3) the purchase price of the hardware and hardware maintenance is separately stated in our contracts.

The following is a summary of our product warranty and guarantee and our related accounting policies for these agreements:

(1) Our sales agreements with customers generally contain infringement indemnity provisions. Under these agreements, we agree to indemnify, defend and hold harmless the customer in connection with patent, copyright or trade secret infringement claims made by third parties with respect to the customer's authorized use of our products and services. The indemnity provisions generally provide for our control of any required defense and settlement and cover costs and damages finally awarded against the customer. Our infringement indemnity provisions typically give us the option to make modifications of the product so it is no longer infringing or, if it cannot be corrected, to require the customer to return the product in exchange for a specified payment for loss of use. Our sales agreements with

customers sometimes also contain indemnity provisions for death, personal injury or property damage caused by our personnel or contractors in the course of performing services to customers. Under these agreements, we agree to indemnify, defend and hold harmless the customer in connection with death, personal injury and property damage claims made by third parties with respect to actions of our personnel or contractors. The indemnity provisions generally provide for our control of any required defense and settlement and cover costs and damages finally awarded against the customer. The indemnity obligations contained in sales agreements generally have no

Table of Contents

specified expiration date but typically limit the amount of award covered to some portion of the fees paid by the customer over some portion of the contract term. To date, we have not incurred costs to settle claims or pay awards under these indemnification obligations. Accordingly, we have no liabilities recorded for these provisions as of March 31, 2005.

(2) We warrant that our software products will perform in all material respects in accordance with our standard published specifications in effect at the time of delivery of the licensed products to the customer as long as the contract remains in effect. Additionally, we warrant that our services will be performed by qualified personnel in a manner consistent with normally accepted industry standards. If necessary, we would provide for the estimated cost of product and service warranties based on specific warranty claims and claim history. However, we have not incurred significant recurring expense under our product or service warranties. Accordingly, we have no liabilities recorded for these provisions as of March 31, 2005.

(3) Our standard contracts with customers typically provide for a 99% guarantee of system availability and a 98% guarantee of component availability with penalty provisions if our solution fails to meet the guarantee thresholds. Our 99% system availability guarantee covers our solution as a whole, while the component guarantee covers each individual component, as in certain circumstances a component may fail without affecting system availability. The penalty provisions in our contracts typically allow for a reduction in the software maintenance fee related to failure to meet guaranteed uptime percentages. We calculate these penalties as a percentage of the software maintenance fee and would reduce the amount of the software maintenance fee charged in a specific period for these penalties. To date, we have not incurred any penalties associated with these guarantees. Accordingly, we have no liabilities recorded for these provisions as of March 31, 2005.

Billings may not coincide with the recognition of revenue. Unbilled revenue occurs when revenue recognition precedes billing to the customer, and arises primarily from sales with predetermined billing schedules. Billings in excess of sales (deferred revenue) occur when billing to the customer precedes revenue recognition, and arise primarily from sales with partial prepayments upon contract execution and from maintenance revenue billed in advance of performance of the maintenance activity. At March 31, 2005, approximately \$4.7 million of the balance in current deferred revenue is related to three contracts where we have deferred all contract revenue accounted for under SOP 97-2 as a result of specified upgrades. The remaining balance in deferred revenue is primarily a result of timing of differences in contract execution and acceptance. The majority of our current deferred revenue relates to system sales and non-recurring services, such as implementation and training. Deferred revenue is recognized upon delivery of our products, as ongoing services are rendered or as other requirements requiring deferral under SOP 97-2 are satisfied.

The timing of customer acceptances could significantly affect the results of operations during a given period. As noted above, we generally require written acknowledgement from the customer to evidence that delivery of the products or services has occurred. Delays in the implementation process could negatively affect operations in a given period by increasing volatility in revenue recognition.

Capitalization of Software Development Costs

Research and development costs are charged to expense as incurred. However, the costs incurred for the development of software that will be sold, leased or otherwise marketed are capitalized when technological feasibility has been established and capitalization ceases when the software is generally available for release. Judgment is involved in determining when technological feasibility is reached. We believe that technological feasibility is reached when we have completed a working model that is ready to be beta-tested at a customer site. These capitalized costs are subject to an ongoing assessment of recoverability based on anticipated future revenue and changes in technologies. Costs that are capitalized primarily consist of direct labor.

Amortization of capitalized software development costs begins when the product is available for general release. Amortization is provided on a product-by-product basis using the straight-line method over periods not exceeding two years. Unamortized capitalized software development costs determined to be in excess of net realizable values are expensed immediately. Historically, we have had very short periods of time between when we believe a product has reached technological feasibility and the date on which we typically release our products for general release. As a result, we have not capitalized material software development costs.

Table of Contents

Intangible and Other Long-Lived Assets

In June 2001, the Financial Accounting Standards Board issued Statement No. 141 (SFAS No. 141) and SFAS No. 142. SFAS No. 141 requires the purchase method of accounting for all business combinations after June 30, 2001, and that certain acquired intangible assets in a business combination be recognized as assets separate from goodwill. We have applied SFAS No. 141 in our allocation of the purchase price of the Ultravision Medical Systems Corporation (Ultravision) merger, which occurred in May 2003. Accordingly, we have identified and allocated a value to the intangibles based on discounted cash flow analyses and market research, as well as our judgment. SFAS No. 142 requires that intangibles determined to have an indefinite life are not to be amortized but are to be tested for impairment at least annually. We will evaluate intangible assets for impairment on an annual basis and when impairment indicators are identified. In assessing the recoverability of intangibles, we must make assumptions regarding estimated future cash flows and other factors to determine the fair value of the respective assets. These estimates include forecasted revenue, which is inherently difficult to predict. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for these assets. Historically, intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Property, equipment and intangible assets are amortized over their useful lives. Useful lives of the intangible assets are based on management's estimates of the period that such assets will generate revenue.

Change in Financial Position

As noted above, we completed our initial public offering during February 2005. The following significant changes in our financial position occurred as a result of the completion of the initial public offering:

We issued 10,827,403 shares of common stock upon the automatic conversion of outstanding shares of preferred stock into shares of common stock.

We issued 5,750,000 shares of common stock in connection with the initial public offering.

We issued 537,082 shares of common stock upon exercise of mandatorily redeemable warrants in conjunction with the initial public offering.

We received total cash proceeds from the initial public offering (net of underwriting discount and offering expenses) of \$67.2 million.

With a portion of the proceeds from the offering, we repaid \$4.0 million of our subordinated debt.

We invested the remaining proceeds from the offering in cash equivalents and short-term investments.

As of March 31, 2005, we have 20,203,378 shares of common stock issued, 20,027,621 shares of common stock outstanding and warrants to purchase 57,114 shares of common stock outstanding at exercise prices ranging from \$1.65 to \$5.52 per share. As of the close of the initial public offering, we had no remaining warrants to purchase preferred stock outstanding.

Results of Operations

The following tables set forth information from our unaudited Consolidated Statements of Operations for the quarters ended March 31, 2005 and 2004. The first table sets forth the unaudited Consolidated Statements of Operations with accompanying calculations of the variances from quarter to quarter, in dollars and on a percentage basis for each line item. The second table presents information expressed as a percentage of total revenue except for

cost of revenue related to system sales and support services, which are expressed as a percentage of system sales and support services revenue, respectively. Explanations of the reported variances from period to period are contained in the paragraphs following the tables.

Table of Contents

	Quarter Ended March 31,		Variances	
	2005	2004	\$	%
	(Dollars in thousands)			
Revenue:				
System sales	\$ 7,719	\$ 4,909	\$ 2,810	57.2%

Total other income (expense)	(5.5)	(2.7)
Net loss	(42.5)%	(50.5)%

Revenue

Total revenue, consisting of system sales and support services, increased by \$4.2 million, or 59.3%. The increase in revenue was attributable to an increase in the size and number of new customer installations as well as more of our system installations being perpetual licenses rather than term licenses. During the quarters ended March

Table of Contents

31, 2004 and 2005, we recognized initial system sales revenue related to four and 13 customer contracts, respectively. All contracts for which initial system sales revenue was recognized during the quarters ended March 31, 2004 and 2005 were perpetual software licenses.

We believe that the increased number of our contracts was a result of increased customer awareness and acceptance of our products and services with multi-facility healthcare providers. This customer awareness and acceptance was largely attributable to our marketing activities associated with these providers, which included up-front research on prospects, increased responses to Requests for Proposals and marketing campaigns, such as programs and exhibits at major trade shows, specifically targeting multi-facility health care providers. We expect revenue to continue to increase as we recognize revenue from our existing long-term customer agreements while also recognizing revenue related to new customer agreements.

System sales revenue increased by \$2.8 million, or 57.2%. Approximately \$1.4 million of the increase was attributable to more health care institutions buying and installing our solution, and approximately \$1.4 million of the increase is related to a shift in our sales from primarily term licenses, in which revenue is recognized ratably over the multiple years covered by the licenses, to primarily perpetual licenses, in which revenue for the license fee is recognized at system acceptance assuming all applicable revenue recognition criteria have been satisfied.

Support services revenue increased by \$1.4 million, or 63.8%. Approximately \$0.9 million of the increase in support services revenue was attributable to a larger number of customers that have implemented our solution and are paying us ongoing support and maintenance fees. The remaining \$0.5 million increase in support services revenue was related to the increase in the recognition of non-recurring revenue related to services such as implementation and training for these new customers.

Cost of Revenue

Cost of revenue increased by \$2.1 million, or 37.1%. This increase was attributable to increased purchases of third-party components as a result of the increased number and size of new customer installations. Cost of revenue as a percentage of total revenue decreased from 81.1% for the quarter ended March 31, 2004 to 69.7% for the quarter ended March 31, 2005. The decrease in cost of revenue as a percentage of total revenue was a result of increased software license revenue as a portion of total revenue as a result of our continued transition to selling perpetual software licenses. Our costs associated with software licenses as a percentage of total revenue were significantly lower than costs associated with other components of our revenue.

Cost of system sales increased by \$1.3 million, or 38.2%. This increase was caused by the larger number of health care institutions that acquired and installed our solution. Cost of system sales as a percentage of system sales revenue decreased from 71.1% for the quarter ended March 31, 2004 to 62.5% for the quarter ended March 31, 2005. We anticipate that our cost of revenue will continue to increase in absolute dollars as a result of additional purchases of third-party components related to customer installations.

Cost of support services increased by \$0.8 million, or 35.3%. This increase was caused by an increase in staffing levels in our support services teams. Cost of support services as a percentage of support services revenue decreased from 103.2% for the quarter ended March 31, 2004 to 85.2% for the quarter ended March 31, 2005. The decrease in cost of support services as a percentage of total support services revenue was a result of efficiencies realized as our customer base grew and the cost of support services was spread over the broader base of customers. Additionally, in early 2004, we acquired software that enabled some of our previously manual methods of providing support to be automated, thereby lowering the cost of service delivery. During the first quarter of 2005, we recorded accelerated depreciation of approximately \$0.3 million related to hardware and third-party visualization software located at one customer site that we replaced with newer equipment and UltraVisual software.

Gross Margin Percentage

Our gross margin percentage increased from 18.9% of total revenue for the quarter ended March 31, 2004 to 30.3% of total revenue for the quarter ended March 31, 2005 primarily as a result of the increased revenue attributable to software licenses that have a higher margin than other components of our revenue.

Table of Contents

Research and Development

Research and development expenses increased by \$1.1 million, or 87.9%. This increase is attributable to an increase in the number of personnel, which accounted for approximately \$0.6 million of the increase, as well as increased spending for outside consultants, which accounted for approximately \$0.2 million of the increase. Research and development headcount increased to 63 employees at March 31, 2005 from 49 employees at January 1, 2004. In the future, we expect to continue to invest in research and development as we continue to improve our existing technology and expand our software offering.

Sales and Marketing

Sales and marketing expenses increased by \$1.0 million, or 54.7%. This increase was attributable to increases in personnel-related and commission expenses as a result of an increase in the number of sales representatives, sales support and marketing personnel, the signing of additional contracts and expansion of our marketing efforts, including targeted campaigns related to multi-facility health care providers. Sales and marketing headcount increased to 38 employees at March 31, 2005 from 29 employees at January 1, 2004. As a result, personnel expenses increased approximately \$0.4 million, in addition to an increase in commission expense of approximately \$0.4 million. Sales and marketing expenses as a percentage of total revenue remained relatively consistent (24.4% for the quarter ended March 31, 2004 as compared to 23.7% for the quarter ended March 31, 2005). We expect to increase our sales and marketing expenses as we hire additional sales and marketing personnel and focus on increasing market awareness of our products and service offerings.

General and Administrative

General and administrative expenses increased by \$0.8 million, or 46.7%. This increase was attributable to an increase in personnel related expenses of approximately \$0.2 million from January 1, 2004 to March 31, 2005, as well as increased expenses related to insurance and professional services, such as accounting and legal, of approximately \$0.2 million and increased stock-based compensation expense of approximately \$0.3 million. General and administrative expenses as a percentage of total revenue decreased from 24.5% for the quarter ended March 31, 2004 to 22.6% for the quarter ended March 31, 2005, which is primarily a factor of our rapid revenue growth. We expect our general and administrative expenses to continue to increase in absolute dollars as a result of being a public company. Specifically, we expect to incur increased costs associated with accounting, consulting, legal and other professional services, increased insurance costs and increased personnel in our finance and legal functions.

Operating Loss

Operating loss increased by \$0.8 million, or 23.5%. Operating loss as a percentage of total revenue decreased from 47.8% for the quarter ended March 31, 2004 to 37.0% for the quarter ended March 31, 2005 as a result of the total revenue increase of \$4.2 million coupled with the increased leverage in operating costs discussed above.

Interest Income

Interest income increased by \$0.2 million. This increase is a result of investing the proceeds from our initial public offering.

Interest expense increased by \$0.7 million, or 339.2%. During the quarter ended March 31, 2005, we used a portion of the proceeds from our initial public offering to repay \$4.0 million of our subordinated debt. In conjunction with this extinguishment, we recorded a non-cash interest charge of \$0.6 million for the write-off of the subordinated debt discount related to warrants issued in connection with the subordinated debt.

Liquidity and Capital Resources

As of March 31, 2005, we had \$70.2 million in cash, cash equivalents and marketable securities, working capital of \$49.8 million and \$5.5 million of borrowings, as compared to \$6.0 million of cash and cash equivalents, working capital deficit of \$9.4 million and \$9.5 million of borrowings as of December 31, 2004. As of March 31, 2005 and

Table of Contents

December 31, 2004, we had approximately \$0.5 million and \$0.8 million, respectively, of restricted cash and cash equivalents held as collateral for equipment loans related to customer third-party components and one internal equipment lease. During the quarter ended March 31, 2005, the restrictions related to one of the equipment loans were satisfied and therefore we reclassified the amount of \$0.4 million to unrestricted cash. The remaining restrictions on the cash will be released in connection with the maturity of the remaining equipment loan and the expiration of the lease.

Operating Activities

During the three months ended March 31, 2005, cash provided by operations was \$1.8 million, which consisted of an increase of \$4.3 million from changes in working capital accounts and \$2.5 million of cash used resulting from our net loss offset by non-cash items. Changes in the working capital accounts primarily related to a decrease in trade accounts receivable and an increase in deferred revenue due to an increased customer base. There was also an increase in accounts payable that was offset by a decrease in accrued expenses. In addition, we have accounted for a decrease of \$1.3 million in certain prepaid assets during the period as cash flow from financing activities because these prepaid assets related to our anticipated initial public offering. If we had not completed our initial public offering, this decrease would have been accounted for as cash flow from operating activities. Our days sales outstanding on an annualized basis as of March 31, 2004, December 31, 2004 and March 31, 2005 were 74 days, 114 days and 88 days, respectively. Our weighted average collection period as of March 31, 2005 was 60 days compared to 55 days at December 31, 2004. The changes in other working capital accounts were primarily driven by increased operations and the timing of cash payments.

During the three months ended March 31, 2004, cash provided by operations was \$0.4 million, which consisted of an increase of \$2.6 million from changes in working capital accounts and \$2.2 million of cash used in operations. Changes in the working capital accounts primarily related to a decrease in trade accounts receivable and an increase in deferred revenue due to an increased customer base and timing of customer payments. The changes in other working capital accounts were primarily driven by increased operations and the timing of cash payments.

Cash provided by and used in operating activities has historically been affected by changes in working capital accounts, primarily deferred revenue, accounts receivable and accrued expenses. Fluctuations within accounts receivable and deferred revenue are primarily related to the timing of billings and the associated revenue recognition.

Investing Activities

We used cash of \$32.4 million and \$0.3 million for investing activities during the first three months of 2005 and 2004, respectively.

We used \$2.7 million and \$0.3 million for property and equipment purchases during the first three months of 2005 and 2004, respectively. Approximately \$2.0 million of the purchases for the first quarter of 2005 related to investments in equipment for internal use, including test equipment for our research and development and quality assurance departments as well as computer equipment for new and existing personnel. Substantially all of the purchases for the first quarter of 2004 related to computer equipment for new and existing personnel. We anticipate that we will continue to purchase property and equipment as necessary in the normal course of business. Approximately \$0.7 million of the purchases for the first quarter of 2005 related to investments in equipment located at contracted customer sites. We anticipate that we will incur additional capital expenditures at customer sites as we further standardize and update our equipment platform.

We used \$29.6 million for the purchase of marketable securities during the first three months of 2005. The marketable securities consist of U.S. government agency obligations and corporate commercial paper, all with

maturities of less than one year.

Financing Activities

Cash provided by (used in) financing activities totaled \$65.2 million and \$(0.7) million for the three months ended March 31, 2005 and 2004, respectively. The cash provided by financing activities for the first three months

Table of Contents

of 2005 resulted primarily from the completion of our initial public offering. This inflow of cash was offset by our \$4.0 million repayment of our subordinated debt and other payments on borrowings. During the three months ended March 31, 2005, we also had \$0.4 million of restricted cash released from restriction. The cash used in financing activities for the first three months of 2004 resulted from payments on existing borrowings and an addition to restricted cash used to secure a letter of credit for an operating lease.

The following table summarizes, as of March 31, 2005, the general timing of future payments under our outstanding loan agreements, lease agreements and other long-term contractual obligations:

	Total	Payments Due by Period			More Than 5
		Less than 1	1-3 Years	3-5 Years	
Contractual Cash Obligations		Year			Years
			(Dollars in thousands)		
Long-term debt	\$ 4,579	\$ 2,181	\$ 2,398	\$	\$
Capital lease obligations	1,545	782	763		
Operating leases	3,203	809	1,167	1,227	
Total contractual cash obligations	\$ 9,327	\$ 3,772	\$ 4,328	\$ 1,227	\$

In April 2004, we entered into a loan and security agreement with a bank under which we can borrow up to \$4.0 million subject to certain restrictions. Interest accrues at the prime rate plus 1.5% to 2.0%, depending on our net income. This line of credit was amended as of July 31, 2004 and expires April 30, 2006 at which time all advances will be due and payable. As of March 31, 2005 we had no outstanding balance under this line of credit.

We believe our existing cash, together with future cash flows from operations and the availability under our loan and security agreement will be sufficient to execute our business plan in 2005. However, any projections of future cash inflows and outflows are subject to uncertainty. Our future capital requirements will depend on many factors, including our rate of revenue growth, the expansion of our marketing and sales activities, the timing and extent of spending to support product development efforts and expansion into new territories, the timing of introductions of new products and services and enhancements to existing products and services, and the continuing market acceptance of our solution. To the extent that our existing cash, together with future cash flows from operations and the availability under our loan and security agreement are insufficient to fund our future activities, we may need to raise additional funds through equity or debt financing. Although we are currently not a party to any binding agreement or letter of intent with respect to potential investments in, or acquisitions of, complementary businesses, services or technologies, we may enter into these types of arrangements in the future, which could also require us to seek additional equity or debt financing. Additional funds may not be available on terms favorable to us or at all.

Recently Issued Accounting Pronouncements

In December 2004, the FASB issued Statement No. 123 (revised 2004), Share-Based Payment (SFAS 123R). SFAS 123R establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. SFAS 123R requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award and the estimated number of awards that are expected to vest. That cost will be recognized over the period

during which an employee is required to provide service in exchange for the award, which is usually the vesting period. SFAS 123R supersedes APB 25, which the Company has elected to follow. SFAS 123R will be effective for the Company at the beginning of the fiscal first quarter of 2006. SFAS 123R applies to all awards granted after the required effective date and to awards modified, repurchased, or canceled after that date. Compensation cost is recognized on or after the required effective date for the portion of outstanding awards for which the requisite service has not yet been rendered, based on the grant-date fair value of those awards calculated under SFAS 123 that the Company has followed for disclosure purposes. For periods before the required effective date, the Company may elect to adjust financial statements of prior periods on a basis consistent with the pro forma disclosures required for those periods by SFAS 123. The Company has elected not to restate prior periods. Based on stock options granted through March 31, 2005, the Company estimates that it will record additional costs relating to compensation expense as a result of the adoption of SFAS 123R starting in the first quarter of 2006.

Forward Looking Statements; Important Factors Affecting Future Results

Some of the statements made in this section captioned Management's Discussion and Analysis of Financial Condition and Results of Operations contain forward-looking statements which reflect our plans, beliefs and current views with respect to, among other things, future events and financial performance. We often identify these forward-looking statements by the use of forward-looking words such as believe, expect, potential, continue, may, will, should, could, would, seek, predict, intend, plan, estimate, anticipate or the negative version of other comparable words. Any forward-looking statements contained in this Quarterly Report are based upon our historical performance and on current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. Such forward-looking statements are subject to various risks and uncertainties. These risks, uncertainties and other factors include, among others, the risk that we may not compete successfully against larger competitors, risks associated with our history of operating losses, the risk that we may not manage our growth effectively, risks associated with our reliance on continuing relationships with large customers, the risk of significant product errors or product failures, our reliance on reseller arrangements for important components of our solution, the risk that we may not respond effectively to changes in our industry, our customers' reliance on third party reimbursements, and the potential impact on our business of FDA regulations and other applicable health care regulations. In addition, there are or will be important factors that could cause our actual results to differ materially from those indicated in these forward-looking statements.

These cautionary statements should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this Quarterly Report and in our 2004 Annual Report on Form 10-K. Moreover, we operate in a continually changing business environment, and new risks and uncertainties emerge from time to time. Management cannot predict these new risks or uncertainties, nor can it assess the impact, if any, that any such risks or uncertainties may have on our business or the extent to which any factor, or combination of factors, may cause actual results to differ from those projected in any forward-looking statement. Accordingly, the risks and uncertainties to which we are subject can be expected to change over time, and we undertake no obligation to update publicly or review the risks or uncertainties described herein. We also undertake no obligation to update publicly or review any of the forward-looking statements made in this Quarterly Report, whether as a result of new information, future developments or otherwise.

If one or more of the risks or uncertainties referred to in this Quarterly Report or in our 2004 Annual Report on Form 10-K materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from what we projected. Any forward-looking statements you read in this prospectus reflect our current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to our operations, financial condition, growth strategy and liquidity. You should specifically consider the factors identified in this Quarterly Report that could cause actual results to differ.

For a more complete discussion of the important factors that may impact future performance and prospects, please refer to the discussion of Risk Factors as set forth in our 2004 Annual Report on Form 10-K in the portion of Item 7 labeled Management's Discussion and Analysis of Financial Condition and Results of Operations Risk Factors.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our debt instruments do not expose us to material market risks relating to changes in interest rates. Some of the proceeds of our initial public offering have been invested in short-term, interest-bearing, investment grade securities pending their application. The value of these securities will be subject to interest rate risk and could fall in value if interest rates rise.

The primary objective of our investment activities is to preserve principal while maximizing the income we receive from our investments without significantly increasing our risk. We invest excess cash principally in U.S. marketable debt securities from a diversified portfolio of institutions with strong credit ratings and in U.S. government and agency bills and notes, and by policy, limit the amount of credit exposure at any one institution.

Table of Contents

These investments are generally not collateralized and mature within one year. Some of the securities we invest in may have market risk. This means that a change in prevailing interest rates may cause the fair value of the principal amount of the investment to fluctuate. To minimize this risk, we schedule our investments to have maturities that coincide with our expected cash flow needs, thus avoiding the need to redeem an investment prior to its maturity date. Accordingly, we believe we have no material exposure to interest rate risk arising from our investments. Therefore, no quantitative tabular disclosure is provided.

ITEM 4: CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2005. Based on this evaluation, our chief executive officer and chief financial officer concluded that, as of March 31, 2005, our disclosure controls and procedures were (1) designed to ensure that material information relating to us is made known to our chief executive officer and chief financial officer by others within our company, particularly during the period in which this report was being prepared and (2) effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2005 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1: LEGAL PROCEEDINGS

None

ITEM 2: UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Unregistered Sales of Equity Securities

As previously reported in our 8-K submitted on February 15, 2005, on February 14, 2005, and in connection with the Company's Public Offering, holders of certain warrants to purchase shares of Common Stock were required by the terms of their warrants to exercise such warrants. Some of these elected to exercise their warrants by paying cash for the exercise price. In connection with these exercises, the Company issued 141,217 shares of Common Stock and received \$735,718.64 upon exercise and no underwriting discounts or commissions were paid. Other holders of such warrants exercised their warrants on a cashless basis by surrendering their right to purchase a portion of the shares of Common Stock based on a deemed value of \$13.00 per share, representing the price of the Common Stock to the public in the Public Offering. In connection with the cashless exercise of warrants, these warrants were surrendered

and the Company issued 395,865 shares of Common Stock upon exercise, and no underwriting discounts or commissions were paid.

The Company offered and sold the Common Stock issued in connection with the cashless exercise of warrants in reliance on the exemption from registration for exchanges of securities with existing security holders by virtue of Section 3(a)(9) of the Securities Act of 1933, as amended. The Company offered and sold the Common Stock upon the cash exercise of warrants in reliance on the exemption from registration for offers and sales of securities that do not involve a public offering by virtue of Section 4(2) of the Securities Act of 1933, as amended.

Table of Contents

On January 10, 2005, we issued 12,755 shares of our common stock and 12,370 shares of our Series D Preferred Stock to a warrant holder pursuant to the exercise of the warrant held by such warrant holder. On February 28, 2005, we issued 7,389 shares of our common stock to a warrant holder pursuant to the exercise of the warrant held by such warrant holder. The Company offered and sold the Common Stock upon the exercises of these warrants in reliance on the exemption from registration for offers and sales of securities that do not involve a public offering by virtue of Section 4(2) of the Securities Act of 1933, as amended.

Since January 1, 2005, we have granted stock options to purchase 182,757 shares of common stock with exercise prices ranging from \$7.17 to \$14.90 per share, to employees and directors pursuant to our stock option plans. During the same period, we issued an aggregate of 200 shares of our common stock pursuant to the exercise of a stock option issued pursuant to our stock option plans. We claimed exemption from registration under the Securities Act for the sales and issuances of all such securities other than the stock options granted to our directors under Rule 701 promulgated under the Securities Act in that such sales and issuances were made either pursuant to written compensatory plans or pursuant to a written contract relating to compensation, as provided by Rule 701. The stock options granted to our directors were exempt from registration pursuant to Section 4(2) of the Securities Act of 1933, as amended, as they were issued in a transaction not involving public offering.

Use of Proceeds from Initial Public Offering

Our initial public offering of common stock was effected through a Registration Statement on Form S-1 (File No. 333-120621) that was declared effective by the Securities and Exchange Commission on February 8, 2005, pursuant to which we sold all 5,750,000 shares of our common stock registered. We received net proceeds of approximately \$67.2 million from the offering. We used \$4.0 million of the net proceeds to repay borrowings outstanding under our subordinated notes on February 18, 2005. We invested the remaining net proceeds, after payment of the subordinated notes referred to in the preceding paragraph, in short-term, investment-grade, interest bearing instruments.

In addition, during the first quarter of 2005, we spent approximately \$2.7 million on capital purchases, substantially all of which was spent on purchases of equipment.

ITEM 4: SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

In connection with our preparations for our initial public offering, stockholder consents were sought for a number of actions pursuant to Section 228 of the Delaware General Corporation Law. We solicited consent for the following matters:

Action 1. Approval of an amendment to Emageon's Amended and Restated Certificate of Incorporation to effect a reverse stock split, at a ratio of one-for-eight and one-quarter, of all of the issued and outstanding shares of the Company's Common Stock;

Action 2. Adoption of an Amended and Restated Certificate of Incorporation;

Action 3. Adoption of Amended and Restated Bylaws;

Action 4. Election of Chris H. Horgen as the director nominated by the holders of the Series B and B-1 Preferred Stock, Fred C. Goad, Jr. and Hugh H. Williamson, III as the directors nominated by the holders of the Series C Preferred Stock, John W. Thompson as the director nominated by the holders of Series D Preferred Stock, and Charles A. Jett, Jr., Arthur P. Beattie, Roddy J.H. Clark and Mylle H. Mangum as the

remaining at-large directors to our Board of Directors;

Action 5. Classification of the above elected directors into classes with one, two and three year terms upon the effectiveness of our Amended and Restated Certificate of Incorporation referred to in Action 2;

Action 6. Approval of the Emageon Inc. 2005 Equity Incentive Plan;

Action 7. Approval of the Emageon Inc. 2005 Non-Employee Director Stock Incentive Plan;

Action 8. Approval of the indemnification agreements to be entered into between Emageon and its directors and officers; and

Table of Contents

Action 9. Approval of the use of the initial public offering price as the fair market value for shares of our common stock immediately prior to our initial public offering for purposes of calculating fractional shares issuable in respect of the reverse stock split.

On February 4, 2005, the company had received a sufficient number of stockholder consents as set forth in the table below to approve and make effective all such actions for which consent was solicited.

Action Number	All Stockholders- Number of Outstanding Shares Granting Consent	All Stockholders- Percentage of Outstanding Shares Granting Consent	Preferred Stockholders- Number of Outstanding Shares Granting Consent	Preferred Stockholders- Percentage of Outstanding Shares Granting Consent
Action 1	96,699,388	85.64%	81,592,017 ⁽¹⁾	91.34%
Action 2	96,699,388	85.64%	81,592,017 ⁽¹⁾	91.34%
Action 3	96,699,388	85.64%	N/A	N/A
Action 4 (Series B and B-1 Director) ⁽²⁾	N/A	N/A	28,167,252	100%
Action 4 (Series C Directors) ⁽²⁾	N/A	N/A	23,190,681	84.5%
Action 4 (Series D Director) ⁽²⁾	N/A	N/A	10,608,031	77.28%
Action 4 (At-large Directors)	96,699,388	85.64%	N/A	N/A
Action 5	96,699,388	85.64%	N/A	N/A
Action 6	96,658,318	85.60%	N/A	N/A
Action 7	96,658,318	85.60%	N/A	N/A
Action 8	96,696,424	85.60%	81,592,017 ⁽¹⁾	91.34%
Action 9	N/A	N/A	75,686,667 ⁽³⁾	90.79%

⁽¹⁾ Includes Series A Preferred Stock, Includes Series B Preferred Stock, Series B-1 Preferred Stock, Series C Preferred Stock, Series D Preferred Stock and Series E Preferred Stock, voting together as a single class on an as-converted basis

⁽²⁾ Under the terms of the Stockholders Agreement (which terminated following our initial public offering), certain directors were elected by a majority of the class of Preferred Stock for which such director was elected

⁽³⁾ Includes Series B Preferred Stock, Series B-1 Preferred Stock, Series C Preferred Stock, Series D Preferred Stock and Series E Preferred Stock, voting together as a single class on an as-converted basis

NOTE: Because the above consents were solicited prior to the completion of our public offering and thus prior to the reverse stock split and the conversion of preferred stock into common stock, the tally as set forth above is reported in pre-split and pre-conversion figures.

ITEM 6: EXHIBITS

(a) Exhibit Index.

Exhibit No.	Description
31.1	Certification of Chief Executive Officer pursuant to Rule13a-14(a) or Rule 15d-14(a) under the Securities Exchange Act of 1934
