

UBIQUITECH SOFTWARE CORP
Form 10-Q
July 01, 2010

U.S. SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

Form 10-Q

Quarterly Report Under
the Securities Exchange Act of 1934

For Quarter Ended: May 31, 2010

Commission File Number: 000-52395

UBIQUITECH SOFTWARE CORPORATION
(Exact name of small business issuer as specified in its charter)

Colorado
(State or other jurisdiction
of incorporation)

20-8224855
(IRS Employer ID No.)

7435 S. Eastern Avenue
Suite 5
Las Vegas, Nevada 89123
(Address of principal executive offices)

(702) 421-9004
(Issuer's Telephone Number)

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer
Non-accelerated filer (Do not check if a
smaller reporting company)

Accelerated filer
Smaller reporting
company

Edgar Filing: UBIQUITECH SOFTWARE CORP - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes No

The number of shares of the registrant's only class of common stock issued and outstanding as of June 30, 2010, was 14,558,000 shares.

Notes to the Unaudited Financial Statements
For The Three and Nine Month Periods Ended May 31, 2010

Note 1 - Unaudited Financial Information

The unaudited financial information included for the three month and nine month interim period ended May 31, 2010, was taken from the books and records without audit. However, such information reflects all adjustments (consisting only of normal recurring adjustments, which are of the opinion of management, necessary to reflect properly the results of interim period presented). The results of operations for the nine month period ended May 31, 2010, are not necessarily indicative of the results expected for the fiscal year ended August 31, 2010.

Note 2 - Financial Statements

For a complete set of footnotes, reference is made to the Company's Report on Form 10K for the year ended August 31, 2009, as filed with the Securities and Exchange Commission and the audited financial statements included therein.

Note 3 – Notes Payable to Related Parties

On September 28, 2009, the related party note holders agreed to exchange their notes and applicable accrued interest amounting to \$12,636 for 5,400,000 shares of the Company's \$0.001 par value Common Stock.

Note 4 – Subsequent Events

There are no subsequent events upon which to report. Subsequent events have been evaluated through the date of this financial report as being the latest practicable and most reasonable date for which to evaluate and include subsequent events for the purposes of this quarterly report.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our consolidated financial statements and notes thereto included herein. In connection with, and because we desire to take advantage of, the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, we caution readers regarding certain forward looking statements in the following discussion and elsewhere in this report and in any other statement made by, or on our behalf, whether or not in future filings with the Securities and Exchange Commission. Forward looking statements are statements not based on historical information and which relate to future operations, strategies, financial results or other developments. Forward looking statements are necessarily based upon estimates and assumptions that are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control and many of which, with respect to future business decisions, are subject to change. These uncertainties and contingencies can affect actual results and could cause actual results to differ materially from those expressed in any forward looking statements made by, or on our behalf. We disclaim any obligation to update forward looking statements.

Overview and History

Until June 2009 our business was to develop and market proprietary specialized computer software to help manage electronically stored data through our wholly owned subsidiary companies, Datamatrix Software Corporation and Enterpriseware Software Corporation. Effective June 23, 2009, we engaged in a change in control. As a result of this change in control we placed these wholly owned subsidiaries into trust on behalf of our shareholders of record as of June 23, 2009, the date immediately prior to the date upon which control of our Company took place. We intend to engage in a "spin-off" of these companies by filing a registration statement with the Securities and Exchange Commission pursuant to the provisions of the Securities Act of 1933, as amended.

As a result of this change in control, our current business plan has been changed. See "Plan of Operation" below for a discussion of this new business opportunity.

We have not been subject to any bankruptcy, receivership or similar proceeding.

Our address is 7435 S. Eastern Ave., Suite 5, Las Vegas, NV 89123. Our telephone number is (702) 421-9004.

Results of Operations

Comparison of Results of Operations for the Nine months ended May 31, 2010 and 2009

We did not generate any revenues during the nine month periods ended May 31, 2010 or 2009.

General and administrative expenses for the nine months ended May 31, 2010, were \$30,868, compared to \$10,134 for the nine months ended May 31, 2009, an increase of \$20,734. This increase included an increase in professional fees of \$19,289, as well as a minor increase of \$1,634 in stock transfer fees. While our general and administrative expenses will continue to be our largest expense item in the near term, we believe that upon initiation of a new enterprise development, this expense will comprise a smaller percentage of overall corporate operating costs. Based on the financial models associated with the new business direction, we anticipate that more significant cost items will be comprised of operational expenditures inclusive of field assessment work, engineering, log and run check reviews, seismic data reviews, expenditures involving the movement, repair and installation of equipment and other expenditures typical of oil and gas field operations.

As a result, we incurred a net loss of \$30,924 for the nine month period ended May 31, 2010, (less than \$0.01 per share), compared to a net loss of \$16,162 for the nine month period ended May 31, 2009 (less than \$0.01 per share).

Comparison of Results of Operations for the Three Months ended May 31, 2010 and 2009

For the three months ended May 31, 2010, and 2009 we had no revenues.

General and administrative expenses for the three months ended May 31, 2010, were \$9,437, compared to \$2,000 for the three months ended May 31, 2009. This increase included an increase in legal fees of \$7,724. While our general and administrative expenses will continue to be our largest expense item in the near term, we believe that upon initiation of a new enterprise development, this expense will comprise a smaller percentage of overall corporate operating costs. Based on the financial models associated with the new business direction, we anticipate that more significant cost items will be comprised of operational expenditures as noted above.

As a result, we incurred a net loss of \$9,437 for the three month period ended May 31, 2010, (less than \$0.01 per share), compared to a net loss of \$2,178 for the three month period ended May 31, 2009, (less than \$0.01 per share).

Because we did not generate any revenues during the last nine months, following is our Plan of Operation.

Plan of Operation

Our principal strategy is to focus on the acquisition of oil and natural gas mineral leases that are at a minimum “drill ready” and ideally have existing production and cash flow. Such an acquisition strategy, if successful, will allow us to establish an operational base from which we can expand. There are no assurances that we will be successful in completing such an acquisition. If we are able to negotiate satisfactory terms of acquisition and are successful in raising the necessary capital, we will implement an accelerated development program of high-probability drilling targets to attempt to establish or increase production and create a positive cash flow base.

On December 23, 2009, as amended January 6, 2010, January 25, 2010, February 22, 2010, and March 26, 2010, we entered into a letter of intent (“LOI”) with Navitas Land and Mineral Corp., Central City, KY (“Navitas”), to acquire certain assets including three oil and gas leases and related oil and gas drilling equipment located in Hopkins County, Western Kentucky. The LOI was a non-binding document, but provided that a definitive agreement would be entered into on or before April 23, 2010, which failed to occur. As a result, we are currently exploring and evaluating other oil and gas opportunities in the United States as well as seeking opportunities that may be available to us in Canada or offshore. We have not entered into any formal agreements as of the date of this report.

Our Business Strategy

Our goal is to increase shareholder value by finding and developing oil and natural gas reserves at costs that provide a better-than-market rate of return on cash outlays and expenditures. The principal elements of our business strategy are:

• **Develop Our Existing Properties.** We intend to identify further drilling locations on properties we acquire by revitalizing older wells, and utilizing digital spectral satellite maps among other accepted technologies to locate highest probability locations for new wells. However, as of the date of this report we have not identified any acquisition properties and there can be no assurances that even if such properties are so identified we will be able to acquire the same on favorable terms, or at all.

• **Maximize Operational Control.** We seek to operate properties we acquire and maintain a substantial working interest. We believe the ability to control our potential drilling inventory will provide us with the opportunity to more efficiently allocate capital, manage resources, control operating and development costs, and utilize our experience and knowledge of oilfield technologies.

We do not intend to refine our natural gas or oil production. We expect to sell all or most of our production to a small number of purchasers in a manner consistent with industry practices at prevailing rates by means of long-term and

short-term sales contracts, some of which may have fixed price components. We do not anticipate having any difficulty finding suitable purchasers when, and if, production is commenced.

There are no assurances that any of the above described factors will occur or be effectuated with the described results. In addition, our ability to implement our business plan is contingent upon our ability to fund our proposed operations, as described above under "Liquidity and Capital Resources." Failure to obtain the funds necessary to implement our business plan will have a negative impact on our anticipated results of operations.

Liquidity and Capital Resources

As of May 31, 2010, we had no cash or cash equivalents.

Net cash used in operating activities was (\$636) for the nine month period ended May 31, 2010, compared to net cash used of (\$994) for the similar period ended May 31, 2009. We anticipate that overhead costs in current operations will increase in the future once we begin implementing our new business plan discussed below herein. Once formal documentation has been executed we anticipate that we will incur a noticeable increase in professional fees, including legal and accounting, as we initiate fundraising activities in connection with the development of the new business enterprise. Further, we anticipate additional professional expenses including geologic and engineering reports.

In advance of confirmation of funding sources and commitments, we are unable at this time to accurately estimate our general and administrative costs as these will be subject to significant change once development efforts are initiated.

Cash flows provided or used in investing activities were \$-0- for the fiscal quarters ended May 31, 2010 and 2009. Cash flows provided or used by financing activities were \$636 for the nine months ended May 31, 2010 and \$-0- for the nine months ended May 31, 2009.

To date we have received expressions of interest to finance our acquisition of oil and gas properties, but we have not yet identified any specific properties for acquisition and as such, have not secured a firm commitment for this capital. In the event we are successful in negotiating the terms of acquisition of oil and gas properties acceptable to management, but are not successful in raising all the financing needed from third party or outside sources, we will look to management and current shareholders to make up any shortfall, however, there are no existing requirements or contractual obligations which will compel any or all of them to contribute additional capital to us.

Depending on the measure of success we are able to achieve in our fund-raising efforts, we anticipate that the fiscal year following the initiation of the new business enterprise will result in significant negative cash flow which will be serviced by new capital that we intend to raise. Subject to a number of factors, including, but not limited to, prevailing market conditions, interest rates, and the time it takes to secure the necessary development capital, we anticipate that we can become cash-flow positive by the fourth quarter of its first year of funded operations. However, no assurances can be provided that we will become cash flow positive within the time parameters referenced herein, or at all.

We currently have very limited capital. We are not generating revenue from our operations and our ability to implement our new business plan for the future will depend on the future availability of financing. Such financing will be required to enable us to acquire oil and gas leases and commence operations. We intend to raise funds through private placements of our common stock and through short-term borrowing. We estimate that we will require a minimum of \$1 million in debt and/or equity capital to fully implement our business plan in the future; there are no assurances that we will be able to raise this capital. While we have engaged in discussions with various investment banking firms, venture capitalists and other groups to provide us these funds, as of the date of this report we have not reached any agreement with any party that has agreed to provide us with the capital necessary to effectuate our new business plan or otherwise enter into a strategic alliance to provide such funding. Our inability to obtain sufficient funds from external sources when needed will have a material adverse affect on our plan of operation, results of operations and financial condition.

Our cost to continue operations as they are now conducted is nominal, but these are expected to increase once additional personnel are hired. We do not have sufficient funds to cover existing operations or the anticipated increase in these expenses. Current operating costs are expected to be provided by loans from our current management and shareholders until such time as we are able to secure additional financing, of which there is no assurance. These funds are expected to be utilized for general and administrative expenses, to initiate research and development activities, and to finance our plans to expand our operations for the next year. At this time we have no other resources on which to get cash if needed without his assistance. As of the date of this report no decision has been made regarding the terms of these prospective loans.

Critical Accounting Policies and Estimates

Critical accounting estimates – The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The following represents a summary of our critical accounting policies, defined as those policies that we believe are the most important to the portrayal of our financial condition and results of operations and that require management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.

Leases – We follow the guidance in SFAS No. 13 “Accounting for Leases,” as amended, which requires us to evaluate the lease agreements we enter into to determine whether they represent operating or capital leases at the inception of the lease.

Stock-based compensation – Effective January 1, 2006, we adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standard (SFAS) No. 123R, “Share Based Payment.” SFAS 123R requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost is recognized on a straight-line basis over the employee service period (usually the vesting period). That cost is measured based on the fair value of the equity or liability instruments issued using the Black-Scholes option pricing model.

Inflation

Although our operations are influenced by general economic conditions, we do not believe that inflation had a material effect on our results of operations during the nine month period ended May 31, 2010.

Off-Balance Sheet Arrangements

We have not entered into any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources and would be considered material to investors.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are a smaller reporting company and are not required to provide the information under this item pursuant to Regulation S-K.

ITEM 4T. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures - Our management, which presently consists of one person who holds both positions of Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report.

These controls are designed to ensure that information required to be disclosed in the reports we file or submit pursuant to the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our CEO/CFO, to allow timely decisions regarding required disclosure.

Based on this evaluation, our CEO/CFO concluded that our disclosure controls and procedures were effective as of May 31, 2010, at the reasonable assurance level. We believe that our consolidated financial statements presented in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial position, results of operations, and cash flows for all periods presented herein.

Inherent Limitations - Our management, including our Chief Executive Officer/Chief Financial Officer, does not expect that our disclosure controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdown can occur because of simple error or mistake. In particular, many of our current processes rely upon manual reviews and processes to ensure that neither human error nor system weakness has resulted in erroneous reporting of financial data.

Changes in Internal Control over Financial Reporting - There were no changes in our internal control over financial reporting during the nine month period ended May 31, 2010 which were identified in conjunction with management's evaluation required by paragraph (d) of Rules 13a-15 and 15d-15 under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
