SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER

PURSUANT TO RULE 13a-16 OR 15d-16

UNDER THE SECURITIES EXCHANGE ACT OF 1934

FOR THE MONTH OF April 2003

COMMISSION FILE NUMBER: 1-07628

HONDA GIKEN KOGYO KABUSHIKI KAISHA

(Name of registrant)

HONDA MOTOR CO., LTD.

(Translation of registrant's name into English)

1-1, Minami-Aoyama 2-chome, Minato-ku, Tokyo 107-8556, Japan

(Address of principal executive officers)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:

Form 20-F * Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-_____

Honda Starts Operation of Motorcycle R&D Facility in China

Tokyo, April 1, 2003 Honda Motor Co., Ltd. today announced that Honda Motorcycle R&D China Co., Ltd. had started to conduct motorcycle research and development activities in China. This is the first R&D facility wholly owned by a Japanese motorcycle manufacturer to start operations in China.

Honda Motorcycle R&D China Co., Ltd. is located on a 115,000m² site in Songjiang, Shanghai, and includes a 400m straight test course, which, among other purposes, will be used to carry out measurements of road surface noise to comply with ISO standards. This facility will enable Honda to subject motorcycles to various conditions during the development phase enabling it to meet the various needs of customers in China.

In 2002, the Chinese motorcycle market exceeded the 10 million-unit level and is currently the largest in the world. Honda has three joint-venture companies in China: Wuyang-Honda Motors (Guangzhou) Co., Ltd., Jialing-Honda Motors Co., Ltd. and Sundiro Honda Motorcycle Co., Ltd. Their combined sales reached a total of 915,000 units in 2002, an increase of 113.0% compared with the previous year, mainly through the expansion of domestic sales of low-priced models.

Through the local establishment of a speedy and highly efficient system encompassing all functions from research and development to the production of motorcycles, Honda will be able to react more rapidly to market changes and provide products that meet the needs of customers.

<Outline of Honda Motorcycle R&D China Co., Ltd.>

President:	Mr. Tsuyoshi Iiga
Location:	Songjiang Industry Zone, Shanghai
Capital:	US \$17 million
Capitalization Ratio:	Honda R&D Co., Ltd.: 100%

Honda Begins European Sales of LEAD Scooter Made in India.

Tokyo, April 14, 2003 Honda Europe Motorcycle S.R.L. has begun imports of the India-manufactured low-price LEAD scooter, with sales in Europe to commence first in Germany, with later expansion to include Italy, France and other countries.

The LEAD, equipped with an air-cooled, 4-stroke, single-cylinder 100cc engine, features clean and quiet performance, with stylish design. The model is manufactured by Honda Motorcycle & Scooter India (Private) Ltd. and will be sold at a price of 1,640 euros (manufacturer's suggested retail price) equivalent to that of motorcycles in the 50cc class.

Annual unit sales are forecast at 12,500 units.

Last November, prior to marketing the LEAD in Europe, Honda began sales in Greece of the 125cc step-through scooter INNOVA, manufactured by Thai Honda Mfg. Co., Ltd., and later introduced the model in other countries. This year, Honda plans to increase the number of models exported from countries other than Japan from the existing about 20 models at the end of 2002 to over 30 models, including the LEAD, through the use of Honda's Global Supply Network.

Honda LEAD (European Version)

Specifications-LEAD

- L x W x H (m): 1.845 x 0.710 x 1.110
- Engine type: Air-cooled, 4-stroke, single-cylinder
- Displacement: 102.1cm³
- Manufacturing location: Honda Motorcycle & Scooter India (Private) Ltd.

Honda to Begin Construction of Additional Head Office;

New Environmentally Friendly Building Based on Site of Former Wako Plant

Tokyo, April 15, 2003 Honda Motor Co., Ltd. will begin construction of a new Wako head office building April 16, 2003 on the site of the former Wako Engine Plant. When completed in summer 2004, Honda will transfer a number of functions from the current head office in Aoyama to the new Wako building.

The first floor of the unique new six-story Wako head office will occupy 14,700m² and the environmentally friendly building will also incorporate the needs of physically challenged associates. When the new building opens in 2004, both the Aoyama and Wako centers will function as head offices the precise functions and responsibilities to be based at each location are still being finalized.

The new mid-rise building will have a simple appearance with the priority on offering high functionality while projecting an advanced image. Importantly, the new head office is designed to harmonize with the building's green surroundings, as well as the surrounding neighborhood.

A number of environmentally friendly attributes will be incorporated into the building, including a cooling system utilizing ambient air, extensive use of natural light, the use of rainwater and the reuse of wastewater, as well as positive application of natural energy including use of solar panels. These efforts will contribute to a reduction in energy consumption.

Further, a creative plan will be implemented for building construction. The Wako head office will have no basement, with the surplus soil from the construction work to be reused within the site. The cumulative effect of this construction plan and the unique environmentally friendly features of the building's design will serve to significantly reduce carbon dioxide emissions during the complete life cycle of the building from construction, use and ultimately, disposal.

By incorporating input from physically challenged associates, the facility will feature a practical design for a universal working environment where wheel chair-bound associates will be able to work efficiently and cooperatively with their able-bodied partners.

With the design of ample open space around the building, coupled with an emergency power supply and food supply, the new building also will function as an evacuation center both for Honda associates and neighboring residents in the event of a disaster.

The Wako Engine Plant operated from June 1953 to June 2002, ceasing auto engine production last year as part of Honda's strategy to achieve more synchronous production of vehicles and engines. Responsibility for production and assembly of engines on the Wako Plant's four lines was transferred to two lines at a new engine plant adjacent to the automobile vehicle assembly plant at the Saitama Factory in Sayama.

Honda Introduces the Element An SUV that Delivers New Value

April 16, 2003 Honda Motor Co., Ltd. has announced the release of a new SUV¹, the Element, featuring a strikingly original exterior look that delivers new value with its center-pillarless body construction, freestyle door arrangement on both sides, highly water-resistant interior, and cargo space to accommodate a ten-foot-long surf board. The Element will go on sale April 18th at Honda Verno dealers throughout Japan.

The Element greets users with an inviting sense of spaciousness as soon as they open the door, and wraps them in a comfortable interior environment once they are inside and the doors are closed. The Honda Element is an SUV designed according to a lifeguard station^{*2} motif, a familiar object among youthful Americans who seek a free and active lifestyle.

The use of large-section structural materials and reinforced joints yields high body rigidity, despite the elimination of center pillars in its construction. The Element also employs a hook-and-catch system to prevent doors from impinging on the cabin area in the event of a side collision. This safety feature is combined with Honda's original G-Con (G Force Control) Technology to assure exceptional collision safety performance.

The 2.4L DOHC i-VTEC engine and 4-speed automatic transmission generate smooth, powerful performance with excellent fuel economy. The Element also delivers outstanding environmental performance, meeting both Japanese Ministry of Land, Infrastructure and Transport requirements for Ultra-Low Emissions Vehicles (ULEV) and fuel efficiency standards for 2010.

The Honda Element was developed by Honda R&D Americas, Inc., and built at the East Liberty Auto Plant of Honda of America Mfg., Inc. (Ohio, USA) for import to Japan.

*1 SUV: Sport Utility Vehicle

*2 Lifeguard Station: A lookout station on a beach used by lifeguards employed to protect bathers and surfers.

Element

*About the Model Name: The Element is named after the four basic elements -earth, air, fire and water-that make up the physical world. For those who wish to lead a free and independent lifestyle, this vehicle is meant to be as essential for

existence as the elements from which it gets its name.

<u>Type</u>	<u>Engine</u>	<u>Transmission</u>	<u>Drive</u>	<u>Price</u>
Element	2.4l DOHC i-VTEC	4-speed automatic	4WD	2,590

1 Body Colors (five in all):

Sunset Orange Pearl (new color); Satin Silver Metallic; Nighthawk Black Pearl; Galapagos Green Metallic; Shoreline Beige Metallic

1 **Main Features of the Honda Element**

Distinctively designed around a concept of freedom

Element's original design gives an impression of toughness and simplicity. Taking its cue from a lifeguard station motif, it expresses a sense of the open space conveyed by sea and sky, as well as the feeling of freedom that goes with spending your leisure time as you please. Instead of paint, the floor is coated with a new, highly scratch-resistant plastic finish; which expresses both functionality and individuality.

The instrument panel, which is designed along horizontal lines, houses an independent three-meter cluster containing cone-shaped meters with a wristwatch look. The instruments, large air vents, and other components are arranged independently to create a distinctive layout.

Body colors are selected around a theme of colors found in the natural world. There are five variations to choose from, including the new Sunset Orange Pearl. There is also a selection of three interior / seat color patterns to go with the body colors.

Robust body construction with a wide-open design

The center-pillarless body construction and freestyle door arrangement on both sides yields a large door opening area 1,140mm high*³ and 1,550mm wide*³. The rear side access doors employ a goose-neck type hinge that allows a door opening angle of 90 degrees, for easy loading and unloading of especially large or long objects.

The clamshell tailgate facilitates effortless cargo loading. The lower gate also folds down to seat two adults, while the upper section provides shade and protection from the weather.

Despite the center-pillarless design, the use of large-section materials, joint reinforcements, and other measures results in exceptional body rigidity.

*³ Honda in-house measurements

Tough and flexible utility for the most demanding of users

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

A plastic tank combined with rear suspension layout and other structural measures are employed to achieve a low, flat floor design that opens up ample stowage space, while sliding rear seats equipped with a flip-up mechanism permit a variety of seating arrangements. The Element incorporates a wipeable floor that lets users stow dirty gear without having to worry about cleanup, along with waterproof seat coverings and a water-repellent roof lining that can be wiped dry. These features combine to facilitate an active lifestyle.

-2-

Table of Contents

Driving performance

The 2.4L DOHC i-VTEC engine and 4-speed automatic transmission achieve powerful torque, high fuel economy, and low exhaust emissions. The suspension is designed for an optimum balance of responsiveness and stability. Real-time 4WD distributes optimal drive power to all wheels in response to driving conditions, yielding powerful performance on any surface.

The Element also assures excellent maneuverability with a minimum turning radius of just 5.2 meters.

Safety performance

Honda's original G-CON (G-force Control) technology is incorporated to create a new body with a crash safety design that is among the best in the world. It can protect vehicle occupants in a 55km/h full-frontal collision, a 64km/h front offset collision, a 55km/h side collision, and a 50km/h rear collision.

To further improve safety in real-world collisions, Honda has implemented its own vehicle-to-vehicle collision testing program^{*4} with its own independently-established research standards.

The Element's side frame ends are fitted with compatibility brackets to ensure that the frontal impact absorbing area is the same height as that of the other vehicle in a frontal collision. Consideration is given to efficiently absorbing the crash energy of both vehicles during a collision.

The vehicle body employs an impact-absorbing design to reduce head and leg injuries to pedestrians during a vehicle-pedestrian accident. The interior is designed to protect occupants' heads in a collision, and front-row seats are also designed to alleviate shocks to the neck. These and other measures assure a high level of crash safety that reduces injuries in real-world accident situations for occupants and pedestrians alike.

*4 Testing involves a 50% front offset collision with a 2-ton class passenger car, both vehicles traveling at 50km/h.

Environmental Performance

Atmospheric pollutants (HC and NOx) in the exhaust gas are dramatically reduced. The Element clears government emissions regulations for the year 2000 by more than 75%, earning it Japanese Ministry of Land, Infrastructure and Transport certification as an Ultra-Low Emissions Vehicle (ULEV).

High-efficiency combustion technologies achieve a low fuel consumption of 10.6 km/L^{*5}, which complies with government regulations for fuel economy for 2010.

Most interior injection-molded parts are made of olefin resin for superior recyclability. This and other measures result in an overall vehicle recyclability of over 90%^{*6}.

Aluminised radiator and heater cores, ceramic glass brake pads, and other measures have resulted in a reduction in the amount of lead used to one third of 1996 levels.

*5 Fuel consumption when driven in 10-15 mode. (Japanese Ministry of Land, Infrastructure and Transport figures.)

*6 According to independent Honda measurement standards

Honda Launches the New XR250 Motard Sport Bike

April 18, 2003 Honda Motor Co., Ltd. has announced the introduction of the XR250 Motard, a new sport bike equipped with an easy-to-manage, powerful, air-cooled single-cylinder 250cc 4-stroke engine that delivers exceptional on-road driving performance. The XR250 Motard goes on sale Saturday, April 26th.

The XR250 Motard is based on the XR250 off-road sport bike that underwent a model change in February this year. This new on-road sport model has 17-inch aluminum wheels (front/rear) and road tires, giving the bike a Super Motard * image.

These modifications assure the XR250 Motard nimble handling and improved maneuverability when riding around town. The bike features a black body color scheme emphasizing a powerful look that will appeal to street bikers, who ride mainly in urban areas.

1 Bodycolor: Black

* Super Motard: A bike race that has recently become popular, mainly in Europe, featuring off-road bikes with small-diameter wheels and on-road tires that compete for speed over asphalt and dirt surfaces.

XR250 Motard

1 **Annual domestic sales target:** 1,000 units

1 **Manufacturer's suggested retail price** (consumption tax not included): ¥519,000

(Example of regionally adjusted manufacturer's suggested retail price: Okinawa +8,000 yen. The manufacturer's suggested retail price is for reference only. Similar adjustments may be made in other regions.)

Publicity photographs and materials for the XR250 Motard are available at the following URL:

[http:// www.honda.co.jp/PR/](http://www.honda.co.jp/PR/)

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

(The site is intended exclusively for the use of journalists.)

-1-

Table of Contents

=Main Features of the XR250 Motard=

1 Powerful and dynamic exterior design

The XR250 Motard is fitted with 3.00x17-inch and 3.50x17-inch (front/rear) wide-rim wheels equipped with 110/70-17 and 130/70-17 (front/rear) wide on-road tires. The combination of small wheels and long-stroke suspension achieves a striking, new exterior design. The sharp looking tank shroud and upswept design of the rear fender augment the bike's dynamic appearance. The exterior expresses an overall feeling of power by virtue of its black body color highlighted with silver stripes.

1 Combination of off-road bike design and small-diameter on-road tires generates a fresh handling feel

Combining a slim, lightweight off-road bike design with small diameter on-road tires provides comfortable handling distinguished by on-road agility and a tenacious road-holding feel.

1 Inverted front forks for exceptional handling stability and ride comfort

The front suspension employs a 43mm diameter inverted cartridge type fork tube, achieving both comfortable handling and outstanding shock absorption.

1 Seat designed for comfort

The two-tone black and gray seat features a slim design to facilitate rider body movements, together with a broad rider contact patch for assured comfort. Seat height is set 20mm lower than on the base XR250 model, enabling riders to assume an optimal position for on-road use.

1 Digital CDI unit ensures optimal ignition timing

A digital CDI unit is employed for high-precision ignition timing optimally matched to throttle opening. Digital CDI boosts power at low throttle openings, giving riders easier control of the engine.

1 Effective anti-theft equipment

Anti-theft protection includes a sturdy combination lock ignition key cylinder and pre-wiring for an alarm kit*, sold separately.

* The alarm kit consists of an anti-theft system that sounds an alarm if the bike is rocked or moved.

Honda to Establish New Corporate Governance System

Tokyo, April 21, 2003 Honda Motor Co., Ltd. has announced today that it is introducing a newly revamped corporate governance system in order to further enhance the trust, which Honda has developed with its customers, society, and shareholders with the objective of becoming a company that society wants to exist.

In order to promote future global business expansion, Honda will accelerate the delegation of authority and the self-reliance of its regional operations, restructure its business management organization, establish an action guide and renew its compliance and risk management systems.

• Restructuring of Business Management Organization

Strengthening of Board of Directors

- At today's board meeting, a resolution was passed in favor of a proposal to establish an Assets and Loan Management Committee which will enable agile decision-making in areas such as important capital investment.

Strengthening of Board of Auditors

- Two outside auditors will be appointed at the General Meeting of Shareholders to be held in June of this year. This will result in two of the four auditors being outside auditors, thereby enhancing the independence of the auditors' board.
- An Auditors Office, was established in April, to serve immediately under the Board of Auditors for the purpose of providing support.
- Supervision of the Board of Auditors will be bolstered in regards to the assignment, remuneration, non-auditing functions and other matters related to accounting auditors

• Establishment of Action Guide

- Honda Conduct Guideline, a guide providing direction concerning consistency in a wide range of corporate affairs and activities, to be utilized throughout the Honda organization, was established in April.

• Renewal of Compliance and Risk Management System (April 2003)

- A system has been established whereby each Honda organization, under the lead of the director in charge, will be able to deal with matters of legal compliance and risk management in a systematic manner while enabling verification of such situations on a regular basis.
- A Risk Management Officer has been appointed to serve as a director in charge of overseeing risk management.
- A Compliance Officer has been appointed to serve as a director responsible for legal compliance.
- A Business Ethics Committee, consisting of directors, has been established to serve as an organization to deliberate matters of corporate ethics and legal compliance.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

- An Ethics Proposal Line has been established, which will receive suggestions concerning corporate ethics and serve as a link to actual execution of improvements.

Honda Motor Co., Ltd. Announces New President and CEO

Tokyo, April 22, 2003 Honda Motor Co., Ltd. today announced that Takeo Fukui will become the company's sixth President and Chief Executive Officer effective in late June 2003. Fukui, 58, currently a Senior Managing and Representative Director, will succeed Hiroyuki Yoshino, 63, who will assume the post of Director and Advisor to Honda Motor Co. This management succession will occur following the final decision of the Honda Motor Board of Directors after the company's annual shareholders meeting in late June 2003.

Fukui brings a vast 34 years of experience with Honda to his new role, including expertise in research and development, engineering, environmental technology, racing activities and the manufacturing of automobiles, motorcycles and power products.

Fukui joined Honda in 1969, after graduating from Waseda University with a B.S. in Applied Chemistry. He started his career at Honda as a member of the Honda project team that developed the Honda CVCC (Compound Vortex Controlled Combustion) engine, which made the Honda Civic the first car to meet the strict emissions standards set by the U.S. Clean Air Act. In 1978, Fukui was transferred to the area of motorcycle racing, where he devoted almost a decade to Honda's racing success including in the World Grand Prix 500cc class where Honda won the championship for the first time in 1983.

After 19 years with Honda R&D Co., including serving as Managing Director as well as President of Honda Racing Corp., Fukui was appointed to the Board of Directors of Honda Motor Co. in 1988.

As Managing Director and later as Senior Managing Director of Honda R&D Co., Fukui assumed the entire responsibility for motorcycle development from 1987 to 1992. In 1992, he became General Manager of the Hamamatsu Factory a production facility with one of the most complex product mixes of any Honda factory in the world, including motorcycles, power products and auto transmissions.

Table of Contents

From 1994 to 1998, he served as Executive Vice President and later as President of Honda of America Mfg., Inc. in Ohio, where production volume significantly expanded under his tenure in order to meet increasing customer demand for Honda products in the North American market. In 1998, Fukui was named President of Honda R&D Co., his current post, and promoted to Senior Managing Director of Honda Motor Co. in 1999 with the additional responsibility for Honda's motorsports activities, including Formula One Grand Prix racing.

Yoshino has served as Honda's fifth CEO since assuming the position in June 1998. He has been with Honda more than 40 years, including the past five years as President and CEO. Under Yoshino's strong leadership, Honda has expanded its global business from 10 million customers in 1998 to more than 15 million customers in 2002 while creating two new autonomous regional operations in South America and China. The company also has continued to advance its technological leadership, including the introduction of two gas-electric hybrid vehicles, the FCX fuel cell vehicle and ASIMO, the world's first bi-pedal humanoid robot. Significantly, over the past four years, Honda has innovated its global manufacturing operations to the flexible New Manufacturing System that enables Honda to quickly and flexibly respond to changes in the marketplace on a global basis.

Yoshino joined Honda in 1963 as an engineer. In 1969, he became the first Honda R&D engineer assigned to the U.S. with the responsibility to work with the U.S. auto industry on the new Clean Air Act. As President of Honda R&D Co. and later Honda Motor Co., he guided the company to a leadership position in meeting both the environmental and safety challenges.

Honda is one of the world's leading producers of mobility products including its line-up of motorcycles, automobiles and power products. This diverse product line-up has made Honda the world's preeminent engine-maker, with production of more than 15 million engines globally in 2002.

Sales of Locally Produced Honda Fit to begin in Brazil

Brazil, April 22, 2003 Honda Automoveis do Brasil LTDA., the automobile production and sales operation of Honda Motor Co. Ltd., in Brazil, today announced the production and sale of the Fit in Brazil. The Fit is the second Honda model to be manufactured and sold locally following production of the Civic, which started in 1997. Local distribution of the Fit starts on April 22nd, with a first year sales target of 25,000 units.

After being chosen as the Japan Car of the Year in 2001, the Fit claimed the title of Best Selling Car in 2002, its first full year of sales in the Japanese market. The Fit has become widely popular overseas as well and is now sold in 60 countries around the world. After Japan, Brazil is the second production location for the Fit. Currently, the local parts procurement ratio in Brazil for the Fit exceeds 70%. The new project in Brazil represents a U.S. \$150 million investment including expansion of the production capacity from 30,000 to 50,000 units. The number of production staff has also been increased by 25% to approximately 1,000. Future plans call for exports to Argentina, Bolivia, Chili, Paraguay, Peru, Uruguay and other South American countries.

Honda's newly developed Global Small Platform is the key to the Fit's appeal. This platform allows for a center tank layout where the fuel tank is placed forward toward the center of the vehicle and a short front nose design and compact front and rear suspension provide extra cabin space along with an exceptionally low floor and a wide variety of seating arrangements. In addition to world-leading safety and environment-friendliness, the Fit exceeds customer expectations in performance, fuel efficiency, driving pleasure, and style.

Due to economic and political uncertainty, the Brazilian market has contracted from a peak of 1.57 million units in 1997 to 1.23 million last year. Despite this slowdown, however, opportunities for growth in the small car segment have led Honda to introduce the Fit as part of its plan to rapidly increase sales in the Brazilian market.

Table of Contents

Outline of the Fit

Engine : 80-horsepower 1.4-liter
i-DSI

Transmission : CVT / 5-speed manual

Equipment:

LX: Air conditioner, driver-side airbag, audio, alarm, power windows, power door locks, power door mirrors.

LXL: Same as LX plus aluminum alloy wheels, passenger-side airbag, ABS (Antilock Brake System), EBD (Electronic Brake Distribution)

Price: (1R\$ = approx. ¥40)

LX (MT)	R\$33,960
LX (CVT)	R\$37,500
LXL (MT)	R\$36,600
LXL (CVT)	R\$39,980

**Honda Updates its Vamos Small Utility Vehicle
and adds Vamos Hobio , and special Vamos
Hobio Travel Dog Version to the Line-up**

Tokyo, April 24, 2003 Honda Motor Co., Ltd. today introduced its updated Vamos small utility vehicle. Now boasting further improved equipment and quality, it will be available at Primo dealerships starting Friday, April 25.

The Vamos Hobio , featuring both a roomy interior and a hobby-oriented multi-purpose cargo area, has been added to the line-up for sale starting April 25. In addition, a special limited edition specifically designed for families with dogs, called the Travel Dog Version , will be available starting Friday, May 9.

Vamos L Type

Vamos Hobio L Type

1 **Monthly Domestic Sales Target:** Series Total 4,000 units

1 **Vamos**

Major Areas of Enhancement

New 12-inch aluminum wheel design (L Type)

AM/FM tuner and MD/CD player (with built-in clock) + 2 front tweeters and 2 speakers (standard on L Type, Turbo*¹)

AM/FM tuner and CD Player (with built-in clock) + 2 front tweeters and 2 speakers (standard on M Type*¹)

Radio wave-type keyless entry system with welcome lamp and new answering back headlight function (M Type)

Newly designed seat and door lining material

4 new exterior colors (Purplish Blue Metallic, Brilliant White Pearl, Grace Silver Metallic, Storm Silver Metallic) for a total of 10 colors to choose from

* 1 Less Audio (2 front tweeters and 2 speakers only) option available

Table of Contents

1 Vamos Hobio

Distinctive Features

- ‡ High roof (105mm higher than Vamos) for increased cargo space

- ‡ 4 different types of reusable nuts and hooks (described below) are distributed on the sides and floor of the cargo area to help owners arrange the space to best fit their lifestyles and hobbies.
 - 28 utility nuts (32 on the Pro Type) are distributed around the cargo area sidewalls, allowing the fitting of 6mm bolts without the necessity of perforating the body.
 - Attachment hooks are fitted in 4 locations for increased versatility. A wrench and a bag are also provided.
 - Utility hooks that can be used as convenience hooks or rope hooks are fitted in 8 locations on both L Type and Turbo models. These utility hooks are detachable and can also be exchanged for utility nuts.
 - 4 tie-down hooks are also fitted in the cargo area in order to hold in place heavier objects.
- ‡ Wipeable mats for easy removal of dirt and stains are available as a factory option to protect the cargo room floor and the back of the rear seat.
- ‡ Water-repellant seat and door lining material
- ‡ Presence-enhancing large-sized front grille and front/rear bumpers
- ‡ Also available in commercial vehicle Pro Type version featuring a one-piece rear seat and a flat floor cargo area

1 Vamos Hobio Travel Dog

Limited Edition

Based on the Vamos Hobio in both L Type and Turbo form, this model was developed from ideas suggested by members of Honda's Travel Dog^{*2} website community, featuring equipment specially designed for dog owners and their dogs. Orders will be accepted over a limited period of time extending to October 31, 2003.

*2 The Travel Dog website was created in November 2001 to help customers treat their dogs as full members of the family, including in regard to car use. This website provides information on cafés, restaurants and lodging facilities accepting pets as well as ideas from other registered members on traveling with their favorite pet. (<http://www.travel-dog.com/>, Japanese-language only)

Distinctive Features

- Wipeable door linings for easy removal of dog hair and saliva
- Wipeable mats for easy removal of dirt and stains
- Specially designed floor mats treated to fight bacteria, odors, and mites
- Rear heater to warm the rear seats efficiently in cold weather
- Tote bag for walking the dog
- Specially designed stickers
- Specially designed color-coded attachment hooks
- Specially designed color-coded utility hooks

HONDA GLOBAL PRODUCTION FOR FISCAL YEAR SETS NEWS RECORD

April 24, 2003 Honda Motor Co., Ltd., announced today that global production increased 2.9% in March over the same month in 2002 bringing total production for the fiscal year ending March 2003 to 2,961,760 units, a 9.9% increase over the last year fiscal year and a new all-time record.

Although Japan production was down 22%, overseas production grew 27.6% over March 2002. It was the 27th consecutive month of growth.

Domestic sales were down 6.5% in March. The Fit again was the best-seller for Honda, and the best-selling vehicle in Japan for the month, totaling 32,430 units. Honda's Life mini-vehicle (18,751 units) and Accord (6,529 units) were Honda's other best-sellers for the month.

Overall, mini vehicle sales were down 20.7% in March, while passenger car and light truck sales were off 0.4%.

Export shipments from Japan in March were up 2.2%, mainly because of increased shipments to Europe.

HONDA MOTOR CO., LTD. REPORTS

CONSOLIDATED FINANCIAL RESULTS

FOR THE FISCAL FOURTH QUARTER AND

THE FISCAL YEAR ENDED MARCH 31, 2003

Tokyo, April 25, 2003 Honda Motor Co., Ltd. today announced its consolidated financial results for the fiscal fourth quarter and the fiscal year ended March 31, 2003.

Fourth Quarter Results

Honda's consolidated net income for the fiscal fourth quarter ended March 31, 2003 totaled a record high, JPY 116.7 billion (USD 971 million), an increase of 9.4% from the same period in 2002. Basic net income per Common Share for the quarter amounted to JPY 120.86 (USD 1.01), compared to JPY 109.51 for the same period in 2002. Two of Honda's American Depositary Shares represent one Common Share.

Unit sales in all Honda's business categories, namely motorcycles, automobiles and power products, increased for the fiscal fourth quarter and consolidated net sales and other operating revenue (herein referred to as revenue) amounted to JPY 2,128.6 billion (USD 17,709 million), an increase of 1.3% over the corresponding period in 2002.

Revenue included currency translation effects, which had a negative impact on foreign currency denominated revenue from Honda's overseas subsidiaries translated into yen.

Honda estimates that had the exchange rate of the yen remained unchanged from the same period in 2002, revenue for the quarter would have increased by approximately 7.2%.

Consolidated operating income for the fiscal fourth quarter totaled JPY 206.6 billion (USD 1,719 million), an increase of 22.0% compared to the same period in 2002. This increase in operating income was due mainly to higher revenue from strong automobile sales in North America. In

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

In addition, Honda's ongoing cost cutting strategies also contributed to this increase. These positive impacts offset negative impacts, such as appreciation of the yen, increases in selling, general and administrative (SG&A) expenses as well as research and development (R&D) expenses.

Table of Contents

Consolidated income before income taxes for the quarter totaled JPY 177.3 billion (USD 1,475 million), an increase of 10.2% from the same period in 2002.

With respect to Honda's sales in the fiscal fourth quarter by business category, motorcycle unit sales increased 18.0% to 2,068,000 units and revenue decreased 12.7%, to JPY 263.0 billion (USD 2,188 million).

Honda's unit sales of automobiles increased by 7.4% to 780,000 units, due primarily to strong sales in North America. As a result, revenue increased 3.0%, to JPY 1,711.1 billion (USD 14,236 million) during the quarter.

Unit sales of power products totaled 1,716,000 units, an increase of 20.1% compared to the corresponding period in 2002. Favorable sales of Honda's general-purpose engines in Europe and North America contributed to this increase. Revenue from other businesses, including the power product business and financial services, increased by 12.0% to JPY 154.4 billion (USD 1,285 million) due mainly to higher revenue from financial services led by favorable automobile sales in North America.

Fiscal Year Results

Honda's consolidated net income for the year ended March 31, 2003 set a record high totaling JPY 426.6 billion (USD 3,550 million), an increase of 17.6% from the corresponding period of last year. Basic net income per Common Share for the year amounted to JPY 439.43 (USD 3.66), compared to JPY 372.23 for the corresponding period a year ago.

Unit sales of Honda's motorcycles, automobiles and power products increased and revenue for the year amounted to JPY 7,971.4 billion (USD 66,319 million), an increase of 8.3% from last year.

Revenue included negative effect of currency translation, and Honda estimates that had the exchange rate of the yen remained unchanged from the previous year, revenue for the year would have increased by approximately 9.1%.

Consolidated operating income for the year totaled JPY 689.4 billion (USD 5,736 million), an increase of 7.8% compared to the corresponding period last year. Higher revenue from the automobile business, Honda's continuing cost cutting strategies and weaker yen were the major contributing factors in this increase in operating income.

Table of Contents

Consolidated income before income taxes for the year totaled JPY 609.7 billion (USD 5,073 million), an increase of 10.6% compared to the previous year.

With respect to Honda's sales for the fiscal year by business category, motorcycle unit sales increased by 32.6% to 8,080,000 units, and revenue increased 3.2% to JPY 978.0 billion (USD 8,137 million). Higher sales in Asia outside Japan mainly contributed to this increase.

Honda's unit sales of automobiles increased by 8.3% to 2,888,000 units, and revenue increased 8.6% to JPY 6,440.0 billion (USD 53,578 million) from the previous fiscal year. Strong sales in North America and Asia outside Japan contributed to this increase in unit sales.

Unit sales of power products totaled 4,584,000 units, an increase of 16.8% compared to the corresponding period of the previous year. This is due mainly to increased unit sales of general-purpose engine in Europe and North America. Revenue from other businesses, including power products and financial services, showed a 14.1% increase, amounting to JPY 553.3 billion (USD 4,603 million).

Table of Contents**Forecasts for the fiscal year ending March 31, 2004**

Fears of a progressing slowdown in the U.S. economies, and its impact on the global business environment are anticipated to increase, and competition in the Japanese market is expected to intensify amid continuing weak consumer spending. Other global concerns, including Iraqi issues, are also expected to affect the overall global economies. In these circumstances, Honda expects competition in each of its markets to remain challenging. In regard to the forecasts of the financial results for the fiscal year ending March 31, 2004, Honda projects consolidated results as to be below:

First half ending September 30, 2003

	<u>In billions of yen</u>	<u>Changes from FY 2003</u>
Net sales and other operating revenue	4,050	+5.1%
Income before income taxes	270	-1.4%
Net income	195	+0.1%

Fiscal year ending March 31, 2004

	<u>In billions of Yen</u>	<u>Changes from FY 2003</u>
Net sales	8,300	+4.1%
Income before income taxes	620	+1.7%
Net income	440	+3.1%

These forecasts are based on the assumption that the exchange rates for the yen to the U.S. dollar and the euro for the current fiscal year will average JPY 116 and JPY 125, respectively.

This announcement contains forward-looking statements within the meaning of Section 21E of the U.S. Securities Exchange Act of 1934. Honda's actual results could materially differ from those contained in these forward-looking statements as a result of numerous factors outside of Honda's control. Such factors include general economic conditions in Honda's principal markets, and foreign exchange rates between the Japanese yen and other major currencies, as well as other factors detailed from time to time in Honda's reports filed with the U.S. Securities and Exchange Commission.

Table of Contents

Explanatory Notes:

1. The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States since the Company has issued American Depositary Receipts listed on the New York Stock Exchange and files reports with the U.S. Securities and Exchange Commission, except all segment information which is prepared in accordance with a Ministerial Ordinance under the Securities and Exchange Law of Japan.
2. The average exchange rates for the fiscal fourth quarter ended March 31, 2003 were ¥118.94=U.S.\$1 and ¥127.74=euro1. The average exchange rates for the corresponding period last year were ¥132.52=U.S.\$1 and ¥116.11=euro1. The average exchange rates for the fiscal year ended March 31, 2003 were ¥121.95=U.S.\$1 and ¥121.04=euro1, as compared with ¥125.14=U.S.\$1 and ¥110.58=euro1 for the corresponding period last year.
3. United States dollar amounts have been translated from yen solely for the convenience of the reader at the rate of ¥120.20=U.S.\$1, the mean of the telegraphic transfer selling exchange rate and the telegraphic transfer buying exchange rate prevailing on the Tokyo foreign exchange market on March 31, 2003.
4. The Company's Common Stock-to-ADR exchange rate has been changed from two shares of Common Stock to one ADR to one share of Common Stock to two ADRs, effective January 10, 2002.
5. The Company has adopted the provisions of Statement of Financial Accounting Standards (SFAS) No.130, "Reporting Comprehensive Income". The following table represents components of the Company's comprehensive income. Other comprehensive income (loss) consists of changes in adjustments from foreign currency translation, net unrealized gains on marketable equity securities and minimum pension liabilities adjustment.

Management Policy

Honda's business activities are based on fundamental corporate philosophies known as "Respect for the Individual" and "The Three Joys."

"Respect for the Individual" defines Honda's relationship with its associates, business partners and society. It is based on sharing a commitment to initiative, equality and mutual trust among people.

It is Honda's belief that everyone who comes into contact with Honda's activities will gain a sense of satisfaction through the experience of buying, selling or creating our Honda's products and services. This philosophy is expressed as "The Three Joys."

With these corporate philosophies as the foundation, Honda's business is guided by the following Company Principle:

Maintaining a global viewpoint,
we are dedicated to supplying products of the highest quality
at a reasonable price for worldwide customer satisfaction

Honda actively works to share a sense of satisfaction with all of its customers as well as its shareholders, and to continue improving its corporate value.

Profit Redistribution Policy

The Company considers redistribution of profits to our shareholders as one of the most important management issues. Accordingly, the Company attempts to increase its corporate value while carrying out its operations from a global standpoint.

The Company intends to redistribute profits to our shareholders, with regard to its projected comprehensive cash needs/requirements, and to make distribution payments, taking into consideration the Company's long-term consolidated earnings performance.

In consideration of shareholder expectations, retained earnings will be applied toward financing the R&D activities that are essential for the future growth of the Company and capital expenditures and investment programs that will expand its operations for the purpose of improving its business results and strengthening its financial condition.

Table of Contents

Acquisition of the Company's common stock will also be implemented at the optimal timing with the aim of improving efficiency in its capital structure.

Preparing for the Future

Fears of a progressing slowdown in the U.S. economies, and its impact on the global business environment are anticipated to increase, and competition in the Japanese market is expected to intensify amid continuing weak consumer spending. Other global concerns, including Iraqi issues, are also expected to affect the overall global economies. In these circumstances, as part of its objective of strengthening the corporate structure and improving product competitiveness to increase speed and flexibility in response to changing customer and social needs, Honda recognizes that further enhancing each of the following specific areas is essential to its success:

- R&D
- Production Efficiency
- Sales Efficiency
- Product Quality
- The Environment
- Safety Technologies
- European Business Strategy

R&D

Along with efforts to develop more effective safety and environmental technologies, Honda will create and swiftly introduce new value-added products that meet specific needs in various regional markets.

Honda will also continue efforts in the research of future technologies, which include the advancement of a bi-pedal humanoid robot.

Production Efficiency

Honda will establish efficient and flexible production systems and expand production capacity with aims to increase the capability of supplying high quality products that meet market needs. In addition to the ongoing expansion of these systems, the Company also intends to expand on a global scale the supply network of its competitive products and component parts.

Table of Contents

Sales Efficiency

Honda will expand its product lines and upgrade its sales structure. Through the innovative use of IT, Honda will also promote its efforts in customer communication.

Product Quality

Responding to increasing consumer demand, Honda will upgrade its quality control through enhanced coordination among the development purchasing, production, sales and service departments.

The Environment

Honda will step up the introduction of clean, fuel-efficient engine technologies and recyclability throughout its product lines. Honda will also advance alternative fuel technologies, including fuel cells. In addition, Honda will continue its efforts to minimize the environmental impact, as measured by the *Life Cycle Assessment, in all of its business fields including logistics and sales. In its production activities, Honda promotes environmental preservation issues under its Green Factory concept.

***Life Cycle Assessment**

A comprehensive system for quantifying the environmental impacts of Honda's products throughout their life cycles, from the material procurement and energy consumption to waste disposal.

Safety Technologies

Honda R&D will develop technologies for the prediction and the prevention of accidents as well as those for passenger and pedestrian injury reduction. Honda intends to enhance its contribution to traffic safety in motorized societies, including Asian countries. Honda also intends to remain active in a variety of traffic safety programs, including advanced driving and motorcycling training schemes provided by its local dealerships.

Table of Contents

European Business Strategy

Honda will continue efforts to reinforce its sales structure by strengthening product lineup and restructuring its sales and distribution organization. On the manufacturing side, Honda will improve its cost competitiveness by enhancing parts procurement through Honda's global supply network, including the network in Asian countries, and improving production efficiency at each of Honda's production facilities in Europe.

Honda will continue to evolve in each of these areas, focusing on activities aligned with the three directions Value Creation, Globalization, and Commitment for the future to reach its goal of becoming a company that society wants to exist.
