UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

(Mark One)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 2013

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number: 0-24786

Aspen Technology, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

04-2739697
(I.R.S. Employer
Identification No.)

200 Wheeler Road
Burlington, Massachusetts
(Address of principal executive offices)

01803
(Zip Code)

Registrant's telephone number, including area code: **781-221-6400**

Securities registered pursuant to Section 12(b) of the Act:

None

Edgar Filing: ASPEN TECHNOLOGY INC /DE/ - Form 10-K

Securities registered pursuant to Section 12(g) of the Act:
Common stock, \$0.10 par value per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>	Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input type="checkbox"/>
(Do not check if a smaller reporting company)			

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

As of December 31, 2012, the aggregate market value of common stock (the only outstanding class of common equity of the registrant) held by non-affiliates of the registrant was \$2,247,399,610 based on a total of 81,309,682 shares of common stock held by non-affiliates and on a closing price of \$27.64 on December 31, 2012 for the common stock as reported on The NASDAQ Global Select Market.

There were 93,387,150 shares of common stock outstanding as of August 8, 2013.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement related to its 2013 Annual Meeting of Stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this Form 10-K are incorporated by reference in Part III, Items 10-14 of this Form 10-K.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS AND INDUSTRY DATA

This Form 10-K contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements relate to future events or our future financial performance. We generally identify forward-looking statements by terminology such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "potential," "should," "target," or the negative of these terms or other similar words. These statements are only predictions. The outcome of the events described in these forward-looking statements is subject to known and unknown risks, uncertainties and other factors that may cause our, our customers' or our industry's actual results, levels of activity, performance or achievements expressed or implied by these forward-looking statements, to differ. "Item 1. Business," "Item 1A. Risk Factors" and "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" as well as other sections in this Form 10-K, discuss some of the factors that could contribute to these differences. The forward-looking statements made in this Form 10-K relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make.

This Form 10-K also contains estimates and other information concerning our industry, including market size and growth rates that are based on industry publications, surveys and forecasts, including those generated by ARC Advisory Group. This information involves a number of assumptions and limitations, and you are cautioned not to give undue weight to these estimates. Although we believe the information in these industry publications, surveys and forecasts is reliable, we have not independently verified the accuracy or completeness of the information. The industry in which we operate is subject to a high degree of uncertainty and risk due to variety of factors, including those described in "Item 1A. Risk Factors."

PART I

Item 1. Business.

Overview

We are a leading global provider of mission-critical process optimization software solutions which are designed to manage and optimize plant and process design, operational performance, and supply chain planning. Our aspenONE software and related services have been developed specifically for companies in the process industries, including the energy, chemicals, and engineering and construction industries. Customers use our solutions to improve their competitiveness and profitability by increasing throughput and productivity, reducing operating costs, enhancing capital efficiency, and decreasing working capital requirements.

Our software incorporates our proprietary empirical models of manufacturing and planning processes and reflects the deep domain expertise we have amassed from focusing on solutions for the process industries for over 30 years. We have developed our applications to design and optimize processes across three principal business areas: engineering, manufacturing and supply chain. We are a recognized market and technology leader in providing process optimization software for each of these business areas.

We have established sustainable competitive advantages within our industry based on the following strengths:

Innovative products that can enhance our customers' profitability;

Long-term customer relationships;

Table of Contents

Large installed base of users of our software; and

Long-term license contracts with historically high renewal rates

We have more than 1,750 customers globally. Our customers in the process industries include energy, chemicals, engineering and construction, as well as consumer packaged goods, power, metals and mining, pulp and paper, pharmaceuticals and biofuels.

Industry Background

The process industries consist of companies that typically manufacture finished products by applying a controlled chemical process either to a raw material that is fed continuously through the plant or to a specific batch of raw material. The process industries include energy, chemicals, engineering and construction, as well as consumer packaged goods, power, metals and mining, pulp and paper, pharmaceuticals and biofuels.

Process manufacturing is often complex because small changes in the feedstocks used, or to the chemical process applied, can have a significant impact on the efficiency and cost-effectiveness of manufacturing operations. As a result, process manufacturers, as well as the engineering and construction firms that partner with these manufacturers, have extensive technical requirements and need sophisticated, integrated software to help design, operate and manage their complex manufacturing environments. The unique characteristics associated with process manufacturing create special demands for business applications that frequently exceed the capabilities of generic software applications or non-process manufacturing software packages.

Industry Specific Challenges Facing the Process Industries

Companies in different process industries face specific challenges that are driving the need for software solutions that design, operate and manage manufacturing environments more effectively:

Energy. Our energy markets are comprised of three primary sectors: Refining and Marketing, also called "downstream," Exploration and Production, also called "upstream," and Gas Processing, also called "midstream":

Companies engaged in Refining and Marketing convert crude oil through a chemical manufacturing process into end products such as gasoline, jet and diesel fuels and into intermediate products for downstream chemical manufacturing companies. These companies are characterized by high volumes and low operating margins. In order to deliver better margins, they focus on optimizing feedstock selection and product mix, reducing energy and capital costs, maximizing throughput, and minimizing inventory, all while operating safely and in accordance with regulations.

Companies engaged in Exploration and Production explore for and produce hydrocarbons. They target reserves in increasingly diverse geographies involving greater geological, logistical and political challenges. They need to design and develop ever larger, more complex and more remote production, gathering and processing facilities as quickly as possible with the objective of optimizing production and ensuring regulatory compliance.

Companies engaged in Gas Processing gather natural gas from well heads, clean it, process it and separate it into dry natural gas and natural gas liquids in preparation for transport to downstream markets. The number of gas processing plants in North America has increased significantly in recent years to process gas extracted from shale deposits.

Table of Contents

Chemicals. The chemicals industry includes both bulk and specialty chemical companies:

Bulk chemical producers, which manufacture commodity chemicals, compete primarily on price, are seeking to achieve economies of scale and manage operating margin pressure by building larger, more complex plants located near feedstock sources.

Specialty chemical manufacturers, which primarily manufacture highly differentiated customer-specific products, face challenges in managing diverse product lines, multiple plants, complex supply chains and product quality.

Engineering and construction. Engineering and construction firms must compete on a global basis in bidding on and executing complex, large-scale projects. They need a digital environment in which optimal plant designs can be produced quickly and efficiently, incorporating highly accurate cost estimation technology. In addition, these projects require software that enables significant collaboration internally, with the manufacturer, and in many cases, with other engineering and construction firms.

Similarly, companies in the consumer packaged goods, power, metals and mining, pulp and paper, pharmaceuticals and biofuels industries are seeking process optimization solutions that help them deliver improved financial and operating results in the face of varied process manufacturing challenges.

Increasing Complexity of the Process Industries

Companies in the process industries constantly face pressure on margins causing them to continually seek ways to operate more efficiently. At the same time, these manufacturers battle growing complexity as a result of the following industry trends:

Globalization of markets. Process manufacturers are expanding their operations beyond mature geographic markets in order to take advantage of growing demand and available feedstocks in emerging markets such as China, India, Russia, Latin America and the Middle East. Process manufacturers must be able to design, build and operate plants in emerging markets efficiently and economically. They also need to improve efficiency and reduce costs at their existing plants in mature markets in order to compete with new plants in emerging markets; and they need to economically manage and optimize ever broadening supply chains.

Volatile markets. Process manufacturers must react quickly to frequent changes in feedstock prices, temporary or longer-term feedstock shortages, and rapid changes in finished product prices. Unpredictable commodity markets strain the manufacturing and supply chain operations of process manufacturers, which must consider, and when appropriate implement, changes in inventory levels, feedstock inputs, equipment usage and operational processes in order to remain competitive.

Environmental and safety regulations. Process companies must comply with an expanding array of data maintenance and reporting requirements under governmental and regulatory mandates, and the global nature of their operations can subject them to numerous regulatory regimes. These companies often face heightened scrutiny and oversight because of the environmental, safety and other implications of their products and manufacturing processes. These companies increasingly are relying upon software applications to model potential outcomes, store operating data and develop reporting capabilities.

Market Opportunity

Technology solutions historically have played a major role in helping companies in the process industries improve their manufacturing productivity. In the 1980s, process manufacturers implemented distributed control systems, or DCS, to automate the management of plant hardware. DCS use

Table of Contents

computer hardware, communication networks and industrial instruments to measure, record and automatically control process variables. In the 1990s, these manufacturers adopted enterprise resource planning, or ERP, systems to streamline back office functions and interact with DCS. This allowed process manufacturers to track, monitor and report the performance of each plant, rather than relying on traditional paper and generic desktop spreadsheets.

Many process manufacturers have implemented both DCS and ERP systems but have realized that their investments in hardware and back-office systems are inadequate. A DCS is only able to control and monitor processes based on fixed sets of parameters and cannot dynamically react to changes in the manufacturing process unless instructed by end users. ERP systems can only record what is produced in operations. Although DCS and ERP systems help manage manufacturing performance, neither of these systems can optimize what is produced, how it is produced or where it is produced. Moreover, neither can help a process manufacturer understand how to improve its processes or how to identify opportunities to decrease operating expenses.

Process optimization software addresses the gap between DCS and ERP systems. This software focuses on the design and optimization of the manufacturing process itself: how the process is run and the economics of that process. By connecting DCS and ERP systems with intelligent, dynamic applications, process optimization software allows a manufacturer to make better, faster economic decisions. This software can optimize a manufacturing environment by, for example, incorporating process manufacturing domain knowledge, supporting real-time decision making, and providing the ability to forecast and simulate potential actions. Furthermore, these solutions can optimize the supply chain by helping a manufacturer to understand the operating conditions in each plant, which enables a manufacturer to decide where best to manufacture products.

Based on information and reports from ARC Advisory Group, we estimate that the market for engineering, manufacturing and supply chain process optimization software and services for the major industries that we serve was approximately \$2.8 billion in 2011. More specifically, based on this information, we estimate that:

the total engineering market was approximately \$600 million in 2011 and is expected to grow at approximately 10% annually through 2015;

the manufacturing market addressing the energy, chemicals and pharmaceuticals verticals was approximately \$1.9 billion in 2011 and is expected to grow at approximately 12% annually through 2015; and

the supply chain market addressing the energy, chemicals and pharmaceuticals verticals was approximately \$300 million in 2011 and is expected to grow at 8% annually through 2015.

aspenONE Solutions

We provide integrated process optimization software solutions designed and developed specifically for the process industries. Customers use our solutions to improve their competitiveness and profitability by increasing throughput and productivity, reducing operating costs, enhancing capital efficiency, and decreasing working capital requirements. Our aspenONE software applications are organized into two suites, which are centered on our principal business areas of engineering, manufacturing and supply chain:

aspenONE Engineering. Our engineering software is used on an engineer's desktop to design new plants, re-design existing plants, and simulate and optimize plant processes.

aspenONE Manufacturing and Supply Chain. Our manufacturing software is designed to optimize day-to-day processing activities, enabling process manufacturers to make better, more profitable decisions and to improve plant performance. Our supply chain management software is designed

Table of Contents

to enable process manufacturers to reduce inventory levels, increase asset efficiency and optimize supply chain operations.

In July 2009, we introduced our aspenONE licensing model, which is a subscription offering under which customers receive access to all of the products within the aspenONE suite(s) they license, including the right to any new unspecified future software products and updates that may be introduced into a licensed aspenONE software suite. This affords customers the ability to use our software whenever required and to experiment with different applications to best solve whatever critical business challenges they face.

We offer customer support, professional services and training services to our customers. Under our aspenONE licensing model, and for point product arrangements entered into since July 2009, software maintenance and support is included for the term of the arrangement. Professional services are offered to customers as a means to further implement and extend our technology across their corporations.

The key benefits of our aspenONE solutions include:

Broad and comprehensive software suites. We believe we are the only software provider that has developed comprehensive suites of software applications addressing the engineering, manufacturing and supply chain requirements of process manufacturers. While some competitors offer solutions in one or two principal business areas, no other vendor can match the breadth of our aspenONE offerings. In addition, we have developed an extensive array of software applications that address extremely specific and complex industry and end user challenges, such as feedstock selection and production scheduling for petroleum companies.

Mission-critical, integrated software solutions. aspenONE provides a standards-based framework that integrates applications, data and models within each of our software suites. Process manufacturers seeking to improve their mission-critical business operations can use the integrated software applications in the aspenONE Manufacturing and Supply Chain suite to support real-time decision making both for individual production facilities and across multiple sites. In addition, the common data models underlying an aspenONE suite improve collaboration and productivity by enabling data to be entered once and then maintained in a centralized repository accessible across a customer's enterprise.

Flexible commercial model. Our aspenONE licensing model provides a customer with access to all of the applications within the aspenONE suite(s) the customer licenses, including the right to any new unspecified future software products and updates that may be introduced into the licensed aspenONE software suite. The customer can change or alternate the use of multiple applications in a licensed suite through the use of exchangeable units of measurement, or tokens, licensed in quantities determined by the customer. This enables the customer to use those applications whenever required and to experiment with different applications to best solve whatever critical business challenges the customer faces. The customer can easily increase its usage of our software as their business requirements evolve.

Our Competitive Strengths

In addition to the breadth and depth of our integrated aspenONE software and the flexibility of our aspenONE licensing model, we believe our key competitive advantages include the following:

Industry-leading innovation based on substantial process expertise. Over the past 30 years, our significant investment in research and development has led to a number of major process engineering advances considered to be industry-standard applications. Since our founding, we have built a highly specialized development organization comprised of not only traditional software engineers but also chemical engineers. This approach provides us with substantial process industry

Table of Contents

expertise, as our developers have critical know-how that allows us to address the specific challenges of our customers.

Rapid, high return on investment. Many customers purchase our software because they believe it will provide rapid, demonstrable and significant returns on their investment and increase their profitability. For some customers, cost reductions in the first year following installation have exceeded the total cost of our software. For many customers, even a relatively small improvement in productivity can generate substantial recurring benefits due to the large production volumes and limited profit margins typical in process industries. In addition, our solutions can generate organizational efficiencies and operational improvements that can further increase a process company's profitability.

Growth Strategy

Our objective is to further establish and extend our position as a leading global provider of process optimization software and related services to the process industries. We intend to build upon our market and technology leadership position by pursuing the following:

Continue to provide innovative, market-leading solutions. We have pioneered a number of industry standard and award-winning software applications. For example, Aspen Plus, our process modeling tool for the chemicals industry, has won the *Chemical Processing* magazine Readers' Choice Award for "Process Simulation Software" for the last nine years. We have been recognized by *R&D Magazine* for innovation in out of the box modeling capabilities that we developed with the National Institute of Standards and Technology. Our recent innovations include search and collaboration, modeling of solids processes, rundown blending optimization, Crude Assays characterization using molecular science, electrolyte and biofuel characterizations, and methodologies for carbon management. We intend to continue to invest in research and development in order to develop and offer new and enhanced solutions for our aspenONE suites.

Further penetrate existing customer base. We have an installed base of over 1,750 customers, but many customers do not use all of our products. As we transition these customers to our aspenONE licensing model, we will seek to identify ways in which they can improve their business processes by using the entire licensed suite of aspenONE applications, both at an individual user level and across all of their plant locations.

Expand presence in emerging markets. Companies in the process industries are expanding their operations to take advantage of growing demand and available feedstocks in markets such as China, India, Russia, Latin America and the Middle East. Additionally, process manufacturers with existing plants in these markets are beginning to recognize the value of upgrading their operations to take advantage of process optimization solutions. We historically have derived a significant portion of our total revenue from outside of North America, and we believe we can further extend our international presence by penetrating emerging markets.

Extend vertical reach and indirect sales channel. We have historically focused on the energy, chemicals, and engineering and construction industries. We intend to expand beyond our core vertical industries, in part by further developing our indirect channel. We are expanding our relationships with third-party resellers that have a presence in certain non-core verticals such as power, consumer packaged goods, pulp and paper, pharmaceuticals, metals and mining, and biofuels. We believe these relationships will enable us to reach companies in additional process industries cost effectively and to leverage our indirect channel partners' market experience and domain expertise in those industries.

Table of Contents

Products

Our integrated process optimization software solutions are designed and developed specifically for the process industries. Customers use our solutions to improve their competitiveness and profitability by increasing throughput and productivity, reducing operating costs, enhancing capital efficiency, and decreasing working capital requirements. We have designed and developed our software applications across three principal business areas:

Engineering. Our engineering software applications are used during both the design and the ongoing operation of plant facilities to model and improve the way engineers develop and deploy manufacturing assets. Process manufacturers must address a variety of challenges including design, operational improvement, collaborative engineering and economic evaluation. They must, for example, determine where they should locate facilities, how they can lower capital and manufacturing costs, what they should produce and how they can maximize plant efficiency.

Manufacturing. Our manufacturing software products focus on optimizing day-to-day processing activities, enabling customers to make better, faster decisions that lead to improved plant performance and operating results. These solutions include desktop and server applications that help customers make real-time decisions, which can reduce fixed and variable costs and improve product yields. Process manufacturers must address a wide range of manufacturing challenges such as optimizing execution efficiency, reducing costs, selecting the right raw materials, scheduling and coordinating production processes, and identifying an appropriate balance between turnaround times, delivery schedules, product quality, cost and inventory.

Supply chain management. Our supply chain management solutions include desktop and server applications that help customers optimize critical supply chain decisions in order to reduce inventory, increase asset efficiency, and respond more quickly to changing market conditions. Process manufacturers must address numerous challenges as they strive to effectively and efficiently manage raw materials inventory, production schedules and feedstock purchasing decisions. Supply chain managers face these challenges in an environment of ever-changing market prices, supply constraints and customer demands.

Our software applications are organized into two suites: aspenONE Engineering and aspenONE Manufacturing and Supply Chain. These suites are integrated applications that allow end users to design process manufacturing environments, forecast and simulate potential actions, monitor operational performance, and manage planning and scheduling activities. The two suites are designed

Table of Contents

around core modules and applications that allow customers to design, manage and operate their process manufacturing environments, as shown below:

aspenONE Engineering

Business Area	aspenOne Module	Major Products	Product Description
Engineering	Engineering	Aspen Plus	Process modeling software for conceptual design, optimization and performance monitoring for the chemicals industry
		Aspen HYSYS	Process modeling software for conceptual design, optimization and performance monitoring for the energy industry
		Aspen Exchanger Design and Rating	Software used to design, simulate and optimize the performance of heat exchangers
		Aspen Economic Evaluation	Economic evaluation software for estimating costs of conceptual process designs
		Aspen Basic Engineering	Workflow product that allows engineers to build, re-use and share process models and data

Table of Contents**aspenONE Manufacturing and Supply Chain**

Business Area	aspenOne Module	Major Products	Product Description
Manufacturing	Manufacturing Execution Systems	Aspen Info Plus.21	Data historian software that collects and stores large volumes of data for analysis and reporting
	Advanced Process Control	Aspen DMCplus	Multi-variable controller software capable of processing multiple constraints simultaneously
Supply Chain	Planning & Scheduling	Aspen Collaborative Demand Manager	Enterprise solution for forecasting market demand
		Aspen Petroleum Scheduler	Integrated system that supports comprehensive scheduling and optimization of refinery activities
		Aspen PIMS Platinum	Enterprise planning software that optimizes feedstock evaluation, product slate and operational execution
		Aspen Plant Scheduler	Plant scheduling software that optimizes production scheduling
	Supply & Distribution	Aspen Supply Chain Planner	Software for determining what to produce given product demands, inventory, and manufacturing and distribution constraints
		Aspen Inventory Management & Operations Scheduling	Enterprise solution that allows users to manage their supply and demand balancing, inventory and scheduling
		Aspen Petroleum Supply Chain Planner	Economic planning product that solves multi-commodity, multi-period transportation optimization problems
		Aspen Fleet Optimizer	Enterprise solution for inventory management and truck transportation optimization

Our product development activities are currently focused on strengthening the integration of our applications and adding new capabilities that address specific mission-critical operational business processes in each industry. As of June 30, 2013, we had a total of 454 employees in our products group, which is comprised of product management, software development and quality assurance. Research and development expenses were \$62.5 million in fiscal 2013, \$56.2 million in fiscal 2012 and \$50.8 million in fiscal 2011.

Maintenance and Training

Software maintenance and support consists primarily of providing customer technical support and access to software fixes and upgrades. For term arrangements entered into subsequent to our transition to a subscription-based licensing model, the license and software maintenance and support, or SMS, components cannot be separated, and SMS is included for the term of the arrangement. Customer technical support services are provided throughout the world by our three global call centers as well as via email and through our support website.

Table of Contents

We offer a variety of training solutions ranging from standardized training, which can be delivered in a public forum, on-site at a customer's location or over the Internet, to customized training sessions, which can be tailored to fit customer needs. As of June 30, 2013, we had a total of 135 employees in our customer support and training group.

Professional Services

We offer professional services focused on implementation of our solution. Our professional services team primarily consists of project engineers with degrees in chemical engineering or a similar discipline, or who have significant relevant industry experience. Our employees include experts in fields, such as thermophysical properties, distillation, adsorption processes, polymer processes, industrial reactor modeling, the identification of empirical models for process control or analysis, large-scale optimization, supply distribution systems modeling and scheduling methods. Our primary focus is the successful implementation and usage of our software, and in many instances, this work can be professionally performed by qualified third parties. As a result, we often compete with third-party consulting firms when bidding for professional services contracts, particularly in developed markets. We offer our services on either a time-and-material or fixed-price basis. As of June 30, 2013, we had a total of 141 employees in our professional services group.

Business Segments

We have three operating segments: license; SMS, training, and other; and professional services. Our chief operating decision maker, the President and Chief Executive Officer, assesses financial performance and allocates resources based upon the three lines of business. For further information of our operating segments, see Note 12, "Segment and Geographic Information," to our Consolidated Financial Statements included under "Item 8, Financial Statements and Supplementary Data" of this Form 10-K.

Sales and Marketing

We employ a value-based sales approach, offering our customers a comprehensive suite of software and services that enhance the efficiency and productivity of their engineering, manufacturing and supply chain operations. We have increasingly focused on selling our products as a strategic investment for our customers and therefore devote an increasing portion of our sales efforts at senior management levels, including senior decision makers in manufacturing, operations and technology. Our aspenONE solution strategy supports this value-based approach by broadening the scope of optimization across the entire enterprise and expanding the use of process models in the operations environment. In particular, we offer a variety of training programs focused on illustrating the capabilities of our applications as well as online training built into our applications. We have implemented incentive compensation programs for our sales force that reward efforts that increase customer usage of our products.

In July 2009, we introduced our aspenONE licensing model under which customers receive access to all of the applications within the aspenONE suite(s) they license, including the right to any new unspecified future software products and updates that may be introduced into the licensed aspenONE software suite. This affords customers the ability to use our software whenever required and to experiment with different applications to best solve whatever critical business challenges they face. Customers can easily increase their usage of our software as their business requirements evolve. We believe our aspenONE licensing model will further enable our sales force to develop consultative sales relationships with our customers.

Historically, most of our license sales have been generated through our direct sales force. In order to market the specific functionality and other technical features of our software, our account managers work with specialized teams of technical sales personnel and product specialists organized for each

Table of Contents

sales and marketing effort. Our technical sales personnel typically have degrees in chemical engineering or related disciplines and actively consult with a customer's plant engineers. Product specialists share their detailed knowledge of the specific features of our software solutions as they apply to the unique business processes of different vertical industries. In addition, we have a limited number of global account managers, each of whom is focused on a specific global account. Our overall sales force, which consists of sales account managers, technical sales personnel, indirect channel personnel, inside sales personnel, and marketing personnel, consisted of 388 employees as of June 30, 2013.

We supplement our direct sales efforts with a variety of marketing initiatives, including industry analyst and public relations activities, campaigns to promote awareness, user group meetings and customer relationship programs. We have established reseller relationships with select companies that we believe can help us increase sales in specific regions and non-core target markets.

We also license our software products to universities that agree to use our products in teaching and research. We believe that students' familiarity with our products will stimulate future demand once the students enter the workplace.

Competition

Our markets in general are competitive, and we expect the intensity of competition in our markets to increase as existing competitors enhance and expand their product and service offerings and as new participants enter the market. Increased competition may result in price reductions, reduced profitability and loss of market share. We cannot ensure that we will be able to compete successfully against existing or future competitors. Some of our customers and companies with which we have strategic relationships also are, or may become, competitors.

Many of our current and potential competitors have greater financial, technical, marketing, service and other resources than we have. As a result, these companies may be able to offer lower prices, additional products or services, or other incentives that we cannot match or offer. These competitors may be in a stronger position to respond more quickly to new technologies and may be able to undertake more extensive marketing campaigns. We believe they also have adopted and may continue to pursue more aggressive pricing policies and make more attractive offers to potential customers, employees and strategic partners. For example, some competitors may be able to initiate relationships through sales and installations of hardware and then seek to expand their customer relationships by offering process optimization software at a discount.

In addition, competitors with greater financial resources may make strategic acquisitions to increase their ability to gain market share or improve the quality or marketability of their products.

Our primary competitors differ among our principal product areas:

Our engineering software competes with products of businesses such as ABB Ltd., Honeywell International, Inc., Invensys plc and KBC Advanced Technologies plc.

Our manufacturing software competes with products of companies such as ABB Ltd., Honeywell International, Inc., Invensys plc, OSIsoft, Inc., Rockwell Automation, Inc., Siemens AG and Yokogawa Electric Corporation.

Our supply chain management software competes with products of companies such as JDA Software Group, Inc., Oracle Corporation and SAP AG.

In addition, we face challenges in selling our solutions to large companies in the process industries that have internally developed their own proprietary software solutions.

We believe our key competitive differentiator is the profitability improvement that our software and services provide for our customers. We seek to develop and offer integrated suites of targeted,

Table of Contents

high-value vertical industry solutions that can be implemented with relatively limited service requirements. We believe this approach provides us with an advantage over many of our competitors that offer software products that are point solutions or are more service-based. Our key competitive differentiators include:

breadth, depth and integration of our aspenONE software offering;

rapid return on investment and increase in profitability;

domain and expertise of chemical engineering personnel;

focus solely on software for the process industries;

flexibility of our usage-based aspenONE licensing model;

consistent global support.

Key License Agreements

Honeywell

We acquired Hyprotech Ltd. and related subsidiaries of AEA Technology plc in May 2002. The Federal Trade Commission alleged in an administrative complaint filed in August 2003 that this acquisition was improperly anticompetitive. In December 2004, we entered into a consent decree with the FTC to resolve the matter. In connection with the consent decree, we and certain of our subsidiaries entered into a purchase and sale agreement with Honeywell International Inc. and certain of its subsidiaries, pursuant to which we sold intellectual property and other assets to Honeywell relating to our operator training business and our Hyprotech engineering software products.

Under the terms of the transactions, we retained a perpetual, irrevocable, worldwide, royalty-free non-exclusive license (with the limited rights to sublicense) to the Hyprotech engineering software and have the right to continue to develop and sell the Hyprotech engineering products. We retained certain agreements with third parties other than customers or distributors for HYSYS and related products.

We are subject to ongoing compliance obligations under the FTC consent decree. Under a modification order that became final in August 2009, we are required to continue to provide the ability for users to save input variable case data for Aspen HYSYS and Aspen HYSYS Dynamics software in a standard "portable" format, which will make it easier for users to transfer case data from later versions of the products to earlier versions. We also must provide documentation to Honeywell of the Aspen HYSYS and Aspen HYSYS Dynamics input variables, as well as documentation of the covered heat exchanger products. These requirements will apply to all existing and future versions of the covered products released prior to December 31, 2014 or December 31, 2016, at the option of Honeywell. In addition, we provided to Honeywell a license to modify and distribute (in object code form) certain versions of our flare system analyzer software.

There is no assurance that the actions required by the FTC's modified order and related settlement with Honeywell will not provide Honeywell with additional competitive advantages that could materially adversely affect our results of operations.

Massachusetts Institute of Technology

In March 1982, we entered into a System License Agreement with the Massachusetts Institute of Technology, or MIT, granting us a worldwide, perpetual non-exclusive license (with the right to sublicense) to use, reproduce, distribute and create derivative works of the computer programs known as "ASPEN". The ASPEN program licensed from MIT provides a framework for simulating the steady-state behavior of chemical processes that we utilize in the simulation engine for our Aspen Plus product. MIT agreed that we would own any derivative works and enhancements. A one-time license

Table of Contents

fee of \$30,000 was paid in full. MIT has the right to terminate the agreement if we breach the agreement and do not cure the breach within 90 days after receiving a written notice from MIT; if we cease to carry on our business; or if certain bankruptcy or insolvency proceedings are commenced and not dismissed. In the event of such termination, sublicenses granted to our customers prior to termination will remain in effect.

Intellectual Property

Our software is proprietary. Our strategy is to rely on a combination of copyright, patent, trademark and trade secret laws in the United States and other jurisdictions, and to rely on license and confidentiality agreements and software security measures to further protect our proprietary technology and brand. The laws of many countries in which our products are licensed may not protect our intellectual property rights to the same extent as the laws of the United States.

We have obtained or applied for patent protection with respect to some of our intellectual property, but generally do not rely on patents as a principal means of protecting intellectual property.

We conduct business under our trademarks and use trademarks on some of our products. We believe that having distinctive marks may be an important factor in marketing our products. We have registered or applied to register some of our significant trademarks in the United States and in selected other countries. Although we have a foreign trademark registration program for selected marks, the laws of many countries protect trademarks solely on the basis of registration and we may not be able to register or use such marks in each foreign country in which we seek registration. We actively monitor use of our trademarks and have enforced, and will continue to enforce, our rights to our trademarks.

We rely on trade secrets to protect certain of our technology. We generally seek to protect these trade secrets by entering into non-disclosure agreements with our employees and customers, and historically have restricted access to our software and source code, which we regard as proprietary information. In certain cases, we have provided copies of code to customers for the purpose of special product customization or have deposited the source code with a third-party escrow agent as security for ongoing service and license obligations. In these cases, we rely on non-disclosure and other contractual provisions to protect our proprietary rights. Trade secrets may be difficult to protect, and it is possible that parties may breach their confidentiality agreements with us.

The steps we have taken to protect our proprietary rights may not be adequate to deter misappropriation of our technology or independent development by others of technologies that are substantially equivalent or superior to our technology. Any misappropriation of our technology or development of competitive technologies could harm our business. We could incur substantial costs in protecting and enforcing our intellectual property rights.

We believe that the success of our business depends more on the quality of our proprietary software products, technology, processes and know-how than on trademarks, copyrights or patents. While we consider our intellectual property rights to be valuable, we do not believe that our competitive position in the industry is dependent simply on obtaining legal protection for our software products and technology. Instead, we believe that the success of our business depends primarily on our ability to maintain a leadership position by developing proprietary software products, technology, information, processes and know-how. Nevertheless, we attempt to protect our intellectual property rights with respect to our products and development processes through trademark, copyright and patent registrations, both foreign and domestic, whenever appropriate as part of our ongoing research and development activities.

Table of Contents

Employees

As of June 30, 2013, we had a total of 1,328 full-time employees, of whom 754 were located in the United States. None of our employees are represented by a labor union, except for one employee of our subsidiary Hyprotech UK Limited who belongs to the Prospect union for professionals. We have experienced no work stoppages and believe that our employee relations are satisfactory.

Corporate Information

Aspen Technology, Inc. was formed in Massachusetts in 1981 and reincorporated in Delaware in 1998. Our principal executive offices are at 200 Wheeler Road, Burlington, MA 01803, and our telephone number at that address is (781) 221-6400. Our website address is <http://www.aspentech.com>. The information on our website is not part of this Form 10-K, unless expressly noted.

Available Information

Our website address is <http://www.aspentech.com>. Information contained on our website is not incorporated by reference into this Form 10-K unless expressly noted. We file reports with the Securities and Exchange Commission, or the SEC, which we make available on our website free of charge. These reports include annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to such reports, each of which is provided on our website as soon as reasonably practicable after we electronically file such materials with or furnish them to the SEC. You can also read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC 20549. You can obtain additional information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains a website (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, including us.

Table of Contents

Item 1A. Risk Factors.

Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below before purchasing our common stock. The risks and uncertainties described below are not the only ones facing our company. Additional risks and uncertainties may also impair our business operations. If any of the following risks actually occurs, our business, financial condition, results of operations or cash flows would likely suffer. In that case, the trading price of our common stock could fall, and you may lose all or part of your investment in our common stock.

Risks Related to Our Business

If we fail to develop new software products, enhance existing products and services, or penetrate new vertical markets, we will be unable to implement our growth strategy successfully and our business could be seriously harmed.

The maintenance and extension of our market leadership and our future growth is largely dependent upon our ability to develop new software products that achieve market acceptance with acceptable operating margins. Enterprises are requiring their application software vendors to provide greater levels of functionality and broader product offerings. We must continue to enhance our current product line and develop and introduce new products and services that keep pace with increasingly sophisticated customer requirements and the technological developments of our competitors. Our business and operating results could suffer if we cannot successfully respond to the technological advances of competitors, or if our new products or product enhancements and services do not achieve market acceptance.

We have implemented a product strategy that unifies our software solutions under the aspenONE brand with differentiated aspenONE vertical solutions targeted at specific process industry segments. We cannot ensure that our product strategy will result in products that will continue to meet market needs and achieve significant market acceptance. If we fail to introduce new products that meet the demands of our customers or our target markets, or if we fail to penetrate new vertical markets in the process industries, our operating results and cash flows from operations will grow at a slower rate than we anticipate and our financial condition could suffer.

Our business could suffer if the demand for, or usage of, our aspenONE software declines for any reason, including declines due to adverse changes in the process industries.

Our aspenONE suites account for a significant majority of our revenue and will continue to do so for the foreseeable future. If demand for, or usage of, our software declines for any reason, our operating results, cash flows from operations and financial position would suffer. Our business could be adversely affected by:

any decline in demand for or usage of our aspenONE suites;

the introduction of products and technologies that serve as a replacement or substitute for, or represent an improvement over, our aspenONE suites;

technological innovations that our aspenONE suites do not address; and

our inability to release enhanced versions of our aspenONE suites on a timely basis.

adverse changes in the process industries that lead to reductions, postponements or cancellations of customer purchases of our products and services.

Because of the nature of their products and manufacturing processes and their global operations, companies in the process industries are subject to risk of adverse or even catastrophic environmental,

Table of Contents

safety and health accidents or incidents and are often subject to changing standards and regulations worldwide.

In addition, in the past, worldwide economic downturns and pricing pressures experienced by energy, chemical, engineering and construction, and other process industries have led to consolidations and reorganizations.

Any such adverse environmental, safety or health incident, change in regulatory standards, or economic downturn that affects the process industries, as well as general domestic and foreign economic conditions and other factors that reduce spending by companies in these industries, could harm our operating results in the future.

Unfavorable economic and market conditions or a lessening demand in the market for process optimization software could adversely affect our operating results.

Our business is influenced by a range of factors that are beyond our control and difficult or impossible to predict. If the market for process optimization software grows more slowly than we anticipate, demand for our products and services could decline and our operating results could be impaired. Further, the state of the global economy may deteriorate in the future. Our operating results may be adversely affected by unfavorable global economic and market conditions as well as a lessening demand for process optimization software generally.

Customer demand for our products is linked to the strength of the global economy. If weakness in the global economy persists, many customers may delay or reduce technology purchases. This could result in reductions in sales of our products, longer sales cycles, slower adoption of new technologies, increased price competition or reduced use of our products by our customers. We will lose revenue if demand for our products is reduced because potential customers experience weak or deteriorating economic conditions, catastrophic environmental or other events, and our business, results of operations, financial condition and cash flow from operations would likely be adversely affected.

The majority of our revenue is attributable to operations outside the United States, and our operating results therefore may be materially affected by the economic, political, regulatory and other risks of foreign operations.

As of June 30, 2013, we operated in 30 countries. We sell our products primarily through a direct sales force located throughout the world. In the event that we are unable to adequately staff and maintain our foreign operations, we could face difficulties managing our international operations.

Customers outside the United States accounted for the majority of our total revenue during the fiscal years ended June 30, 2013, 2012 and 2011. We anticipate that revenue from customers outside the United States will continue to account for a significant portion of our total revenue for the foreseeable future. Our operating results attributable to operations outside the United States are subject to additional risks, including:

unexpected changes in regulatory requirements, tariffs and other barriers;

less effective protection of intellectual property;

requirements of foreign laws and other governmental controls;

delays in the execution of license agreement renewals in the same quarter in which the original agreements expire;

difficulties in collecting trade accounts receivable in other countries;

adverse tax consequences; and

the challenges of managing legal disputes in foreign jurisdictions.

Table of Contents

Fluctuations in foreign currency exchange rates could result in declines in our reported revenue and operating results.

During the fiscal years ended June 30, 2013, 2012 and 2011, 19.1%, 21.6% and 21.7% of our total revenue was denominated in a currency other than the U.S. dollar. In addition, certain of our operating expenses incurred outside the United States are denominated in currencies other than the U.S. dollar. Our reported revenue and operating results are subject to fluctuations in foreign exchange rates. Foreign currency risk arises primarily from the net difference between non-U.S. dollar receipts from customers outside the United States and non-U.S. dollar operating expenses for subsidiaries in foreign countries. Currently, our largest exposures to foreign exchange rates exist primarily with the Euro, Pound Sterling, Canadian dollar and Japanese Yen against the U.S. dollar. During the fiscal years ended June 30, 2013, 2012 and 2011, we did not enter into, and were not a party to any, derivative financial instruments, such as forward currency exchange contracts, intended to manage the volatility of these market risks. We cannot predict the impact of foreign currency fluctuations, and foreign currency fluctuations in the future may adversely affect our revenue and operating results. Any hedging policies we may implement in the future may not be successful, and the cost of those hedging techniques may have a significant negative impact on our operating results.

Competition from software offered by current competitors and new market entrants, as well as from internally developed solutions by our customers, could adversely affect our ability to sell our software products and related services and could result in pressure to price our products in a manner that reduces our margins.

Our markets in general are competitive and differ among our principal product areas: engineering, manufacturing, and supply chain management. Our engineering software competes with products of businesses such as ABB Ltd., Honeywell International, Inc., Invensys plc and KBC Advanced Technologies plc. Our manufacturing software competes with products of companies such as ABB Ltd., Honeywell International, Inc., Invensys plc, OSIsoft, Inc., Rockwell Automation, Inc., Siemens AG and Yokogawa Electric Corporation. Our supply chain management software competes with products of companies such as JDA Software Group, Inc., Oracle Corporation and SAP AG. In addition, we face challenges in selling our solutions to large companies in the process industries that have internally developed their own proprietary software solutions.

Many of our current and potential competitors have greater financial, technical, marketing, service and other resources than we have. As a result, these companies may be able to offer lower prices, additional products or services, or other incentives that we cannot match or offer. These competitors may be in a stronger position to respond more quickly to new technologies and may be able to undertake more extensive marketing campaigns. We believe they also have adopted and may continue to pursue more aggressive pricing policies and make more attractive offers to potential customers, employees and strategic partners. For example, some competitors may be able to initiate relationships through sales and installations of hardware and then seek to expand their customer relationships by offering process optimization software at a discount. In addition, many of our competitors have established, and may in the future continue to establish, cooperative relationships with third parties to improve their product offerings and to increase the availability of their products in the marketplace. Competitors with greater financial resources may make strategic acquisitions to increase their ability to gain market share or improve the quality or marketability of their products.

Competition could seriously impede our ability to sell additional software products and related services on terms favorable to us. Businesses may continue to enhance their internally developed solutions, rather than investing in commercial software such as ours. Our current and potential commercial competitors may develop and market new technologies that render our existing or future products obsolete, unmarketable or less competitive. In addition, if these competitors develop products with similar or superior functionality to our products, we may need to decrease the prices for our products in order to remain competitive. If we are unable to maintain our current pricing due to

Table of Contents

competitive pressures, our margins will be reduced and our operating results will be negatively affected. We cannot ensure that we will be able to compete successfully against current or future competitors or that competitive pressures will not materially adversely affect our business, financial condition and operating results.

Defects or errors in our software products could harm our reputation, impair our ability to sell our products and result in significant costs to us.

Our software products are complex and may contain undetected defects or errors. We have not suffered significant harm from any defects or errors to date, but we have from time to time found defects in our products and we may discover additional defects in the future. We may not be able to detect and correct defects or errors before releasing products. Consequently, we or our customers may discover defects or errors after our products have been implemented. We have in the past issued, and may in the future need to issue, corrective releases of our products to remedy defects or errors. The occurrence of any defects or errors could result in:

lost or delayed market acceptance and sales of our products;

delays in payment to us by customers;

product returns;

injury to our reputation;

diversion of our resources;

increased service and warranty expenses or financial concessions;

increased insurance costs; and

legal claims, including product liability claims.

Defects and errors in our software products could result in claims for substantial damages against us.

We may be subject to significant expenses and damages because of pending liability claims and other claims related to our products and services.

The sale and implementation of certain of our software products and services, particularly in the areas of advanced process control and supply chain management, entail the risk of product liability claims and associated damages. Our software products and services are often integrated with our customers' networks and software applications and are used in the design, operation and management of manufacturing and supply chain processes at large facilities, often for mission critical applications.

Any errors, defects, performance problems or other failures of our software could result in significant liability to us for damages or for violations of environmental, safety and other laws and regulations. Our software products and implementation services could give rise to warranty and other claims. In the ordinary course of business, we are from time to time involved in lawsuits or claims relating to our products or services. These matters include an April 2004 claim by a customer for approximately \$5.0 million that certain of our software products and implementation services failed to meet the customer's expectations. We are unable to determine whether resolution of any of these matters will have a material adverse impact on our financial position, cash flows or results of operations, or, in many cases, reasonably estimate the amount of the loss, if any, that may result from the resolution of these matters.

Our agreements with customers generally contain provisions designed to limit our exposure to potential product liability claims. It is possible, however, that the limitation of liability provisions in our agreements may not be effective as a result of federal, foreign, state or local laws or ordinances or

Table of Contents

unfavorable judicial decisions. A substantial product liability judgment against us could materially and adversely harm our operating results and financial condition. Even if our software is not at fault, a product liability claim brought against us could be time-consuming, costly to defend and harmful to our operations and reputation.

If we fail to comply or are deemed to have failed to comply with our ongoing Federal Trade Commission, or FTC, consent decree, our business may suffer.

In December 2004, we entered into a consent decree with the FTC with respect to a civil administrative complaint filed by the FTC in August 2003 alleging that our acquisition of Hyprotech Ltd. and related subsidiaries of AEA Technology plc in May 2002 was anticompetitive in violation of Section 5 of the Federal Trade Commission Act and Section 7 of the Clayton Act. In July 2009, we announced that the FTC closed an investigation relating to the alleged violations of the decree, and issued an order modifying the consent decree, which became final in August 2009. We are subject to ongoing compliance obligations under the FTC consent decree. There is no assurance that the actions required by the FTC's modified order and related settlement with Honeywell International, Inc. will not require significant attention and resources of management, which could have a material adverse effect on our business. Further, if we fail to comply, or are deemed to have failed to comply, with such consent decree, our business may suffer.

Claims that we infringe the intellectual property rights of others may be costly to defend or settle and could damage our business.

We cannot be certain that our software and services do not infringe issued patents, copyrights, trademarks or other intellectual property rights, so infringement claims might be asserted against us. In addition, we have agreed, and may agree in the future, to indemnify certain of our customers against infringement claims that third parties may assert against our customers based on use of our software or services. Such claims may have a material adverse effect on our business, may be time-consuming and may result in substantial costs and diversion of resources, including our management's attention to our business. Furthermore, a party making an infringement claim could secure a judgment that requires us to pay substantial damages and could also include an injunction or other court order that could prevent us from selling our software or require that we re-engineer some or all of our products. Claims of intellectual property infringement also might require us to enter costly royalty or license agreements. We may be unable to obtain royalty or license agreements on terms acceptable to us or at all. Our business, operating results and financial condition could be harmed significantly if any of these events were to occur, and the price of our common stock could be adversely affected.

We may not be able to protect our intellectual property rights, which could make us less competitive and cause us to lose market share.

Our software is proprietary. Our strategy is to rely on a combination of copyright, patent, trademark and trade secret laws in the United States and other jurisdictions, and to rely on license and confidentiality agreements and software security measures to further protect our proprietary technology and brand. We have obtained or applied for patent protection with respect to some of our intellectual property, but generally do not rely on patents as a principal means of protecting our intellectual property. We have registered or applied to register some of our trademarks in the United States and in selected other countries. We generally enter into non-disclosure agreements with our employees and customers, and historically have restricted third-party access to our software and source code, which we regard as proprietary information. In certain cases, we have provided copies of source code to customers for the purpose of special product customization or have deposited copies of the source code with a third-party escrow agent as security for ongoing service and license obligations. In these cases, we rely on non-disclosure and other contractual provisions to protect our proprietary rights.

Table of Contents

The steps we have taken to protect our proprietary rights may not be adequate to deter misappropriation of our technology or independent development by others of technologies that are substantially equivalent or superior to our technology. Our intellectual property rights may expire or be challenged, invalidated or infringed upon by third parties or we may be unable to maintain, renew or enter into new licenses on commercially reasonable terms. Any misappropriation of our technology or development of competitive technologies could harm our business and could diminish or cause us to lose the competitive advantages associated with our proprietary technology, and could subject us to substantial costs in protecting and enforcing our intellectual property rights, including costs of proceedings we have instituted to enforce our intellectual property rights, such as those described in "Item 3. Other Proceedings," and/or temporarily or permanently disrupt our sales and marketing of the affected products or services. The laws of some countries in which our products are licensed do not protect our intellectual property rights to the same extent as the laws of the United States. Moreover, in some non-U.S. countries, laws affecting intellectual property rights are uncertain in their application, which can affect the scope of enforceability of our intellectual property rights.

Our software research and development initiatives and our customer relationships could be compromised if the security of our information technology is breached as a result of a cyber-attack. This could have a material adverse effect on our business, operating results and financial condition, and could harm our competitive position.

We devote significant resources to continually updating our software and developing new products, and the financial performance of our company is dependent in part upon our ability to bring new products and services to market. Our customers use our software to optimize their manufacturing processes, and they rely on us to provide updates and releases as part of our software maintenance and support services, and to provide remote on-line troubleshooting support. The security of our information technology environment is therefore important to our research and development initiatives, and an important consideration in our customers' purchasing decisions. If the security of our systems is impaired, our development initiatives might be disrupted, and we might be unable to provide service. Our customer relationships might deteriorate, our reputation in the industry could be harmed, and we could be subject to liability claims. This could reduce our revenues, and expose us to significant costs to detect, correct and avoid recurrences of any breach of security and to defend any claims against us.

Risks Related to Our Common Stock

Our common stock may experience substantial price and volume fluctuations.

The equity markets have from time to time experienced extreme price and volume fluctuations, particularly in the high technology sector, and those fluctuations often have been unrelated to the operating performance of particular companies. In addition, factors such as our aspenONE licensing model, our financial performance, announcements of technological innovations or new products by us or our competitors, and market conditions in the computer software or hardware industries, may have a significant impact on the market price of our common stock.

In the past, following periods of volatility in the market price of a public company's securities, securities class action litigation has often been instituted against that company. This type of litigation against us could result in substantial liability and costs and divert management's attention and resources.

Table of Contents

Our corporate documents and provisions of Delaware law may prevent a change in control or management that stockholders may consider desirable.

Section 203 of the Delaware General Corporation Law, our charter and our by-laws contain provisions that might enable our management to resist a takeover of our company. These provisions include:

limitations on the removal of directors;

a classified board of directors, so that not all members of the board are elected at one time;

advance notice requirements for stockholder proposals and nominations;

the inability of stockholders to act by written consent or to call special meetings;

the ability of the board to make, alter or repeal our by-laws; and

the ability of the board to designate the terms of and issue new series of preferred stock without stockholder approval.

These provisions could:

have the effect of delaying, deferring or preventing a change in control of our company or a change in our management that stockholders may consider favorable or beneficial;

discourage proxy contests and make it more difficult for stockholders to elect directors and take other corporate actions; and

limit the price that investors might be willing to pay in the future for shares of our common stock.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our principal executive offices are located in leased facilities in Burlington, Massachusetts, consisting of approximately 75,000 square feet of office space to accommodate our product development, sales, marketing, operations and finance and administrative functions. Prior to September 1, 2007, our principal offices occupied approximately 111,000 square feet of office space in Cambridge, Massachusetts. The lease for this office space and the related sublease agreements expired on September 30, 2012.

We also lease approximately 76,000 square feet in Houston, Texas, which includes approximately 8,000 square feet of subleased space. In addition to our Burlington and Houston locations, we lease office space in Shanghai, Reading (UK), Singapore, Tokyo and Nashua, New Hampshire, to accommodate sales, services and product development functions.

In the remainder of our other locations, the majority of our leases have lease terms of one year or less that are generally based on the number of workstations required. We believe this facilities strategy provides us with significant flexibility to adjust to changes in our business environment. We do not own any real property. We believe that our leased facilities are adequate for our anticipated future needs.

Item 3. Legal Proceedings.

In July 2010 we filed an action against M3 Technology, Inc. (M3) for misappropriation of our trade secrets, infringement of our copyrights, and tortious interference in an action that we commenced in the U.S. District Court for the Southern District of Texas. The jury returned a verdict in our favor on

Table of Contents

May 18, 2012, and a final judgment and permanent injunction was entered on June 6, 2012. The permanent injunction prohibits M3 from using, marketing, selling, distributing, licensing, modifying, servicing, copying, or offering for sale or license versions of the following products: SIMTO Scheduling/M-Blend/Global; SIMTO Scheduling/M-Blend; SIMTO Scheduling; and SIMTO Distribution. In addition, M3 was ordered to pay us the sum of \$11,346,329 in damages. M3 filed a Notice of Appeal on June 7, 2012. Oral argument was heard on the appeal on July 10, 2013 before the United States Court of Appeals for the Fifth Circuit, and the court has taken the matter under submission. M3 has also petitioned for bankruptcy relief in proceedings pending in the U.S. Bankruptcy Court for the Southern District of Texas (Case 12-3444).

Item 4. Mine Safety Disclosures

None

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.****Market Information**

Our common stock currently trades on The NASDAQ Global Select Market under the symbol "AZPN." The closing price of our common stock on June 30, 2013 was \$28.79. The following table sets forth, for the periods indicated, the high and low sales prices per share of our common stock as reported by The NASDAQ Global Select Market:

Period	2013		2012	
	Low	High	Low	High
Quarter ended June 30	\$ 27.55	\$ 31.72	\$ 19.01	\$ 23.15
Quarter ended March 31	27.55	32.48	16.41	21.61
Quarter ended December 31	24.05	27.64	14.67	18.66
Quarter ended September 30	22.22	26.22	12.75	17.78

Holders

On August 8, 2013, there were 541 holders of record of our common stock. The number of record holders does not include persons who held our common stock in nominee or "street name" accounts through brokers.

Dividends

We have never declared or paid cash dividends on our common stock. We do not anticipate paying cash dividends on our common stock in the foreseeable future. Any future determination relating to our dividend policy will be made at the discretion of the Board of Directors and will depend on a number of factors, including our future earnings, capital requirements, financial condition and future prospects and such other factors as the Board of Directors may deem relevant.

Purchases of Equity Securities by the Issuer

As of June 30, 2013, we had repurchased an aggregate of 6,261,776 shares of our common stock pursuant a series of repurchases beginning on November 1, 2010.

On April 23, 2013, our Board of Directors approved a share repurchase program for up to \$150 million worth of our common stock. This share repurchase program replaced the prior share repurchase program approved by the Board of Directors on October 24, 2012 for up to \$100 million. The program approved on October 24, 2012 had replaced a repurchase program with a value of up to \$100 million which had been approved by the Board of Directors on November 1, 2011.

Table of Contents

The following table sets forth, for the month indicated, our purchases of common stock during the fourth quarter of fiscal 2013:

Period	Total Number of Shares Purchased	Issuer Purchases of Equity Securities			Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
		Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program		
April 1 to 30, 2013	297,500	\$ 30.20	297,500		
May 1 to 31, 2013	296,647	\$ 30.29	296,647		
June 1 to 30, 2013	251,655	\$ 29.60	251,655

Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information about the securities authorized for issuance under our equity compensation plans as of June 30, 2013:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	2,882,957	\$ 15.76	4,781,242
Equity compensation plans not approved by security holders		\$	
Total	2,882,957	\$ 15.76	4,781,242

Equity compensation plans approved by security holders consist of our 2005 stock incentive plan and our 2010 equity incentive plan.

The securities remaining available for future issuance under equity compensation plans approved by our security holders as of June 30, 2013 consisted of:

214,712 shares of common stock issuable under our 2005 stock incentive plan; and

4,566,530 shares of common stock issuable under our 2010 equity incentive plan.

Options issuable under the 2005 stock incentive plan have a maximum term of seven years. Options issuable under the 2010 equity incentive plan have a maximum term of ten years.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

You should read the following discussion in conjunction with our consolidated financial statements and related notes beginning on page F-1. In addition to historical information, this discussion contains forward-looking statements that involve risks and uncertainties. You should read "Item 1A. Risk Factors" for a discussion of important factors that could cause our actual results to differ materially from our expectations.

Our fiscal year ends on June 30, and references to a specific fiscal year are the twelve months ended June 30 of such year (for example, "fiscal 2013" refers to the year ended June 30, 2013).

Business Overview

We are a leading global provider of mission-critical process optimization software solutions which are designed to manage and optimize plant and process design, operational performance, and supply chain planning. Our aspenONE software and related services have been developed specifically for companies in the process industries, including the energy, chemicals, and engineering and construction industries. Customers use our solutions to improve their competitiveness and profitability by increasing throughput and productivity, reducing operating costs, enhancing capital efficiency, and decreasing working capital requirements.

Our software incorporates our proprietary empirical models of manufacturing and planning processes and reflects the deep domain expertise we have amassed from focusing on solutions for the process industries for over 30 years. We have developed our applications to design and optimize processes across three principal business areas: engineering, manufacturing and supply chain. We are a recognized market and technology leader in providing process optimization software for each of these business areas.

We have established sustainable competitive advantages within our industry based on the following strengths:

Innovative products that can enhance our customers' profitability;

Long-term customer relationships;

Large installed base of users of our software; and

Long-term license contracts with historically high renewal rates.

We have more than 1,750 customers globally. Our customers in the process industries include energy, chemicals, engineering and construction, as well as consumer packaged goods, power, metals and mining, pulp and paper, pharmaceuticals and biofuels.

We primarily license our software products through a subscription offering which we refer to as our aspenONE licensing model. Our aspenONE products are organized into two suites: 1) engineering and 2) manufacturing and supply chain, or MSC. The aspenONE licensing model provides customers with access to all of the products within the aspenONE suite(s) they license. Customers can change or alternate the use of multiple products in a licensed suite through the use of exchangeable units of measurement, called tokens, licensed in quantities determined by the customer. This licensing system enables customers to use products as needed and to experiment with different products to best solve whatever critical business challenges they face. Customers can increase their usage of our software by purchasing additional tokens as business needs evolve. We believe easier access to all of the aspenONE products will lead to increased software usage and higher revenue over time.

Table of Contents

Transition to the aspenONE Licensing Model

Prior to fiscal 2010, we offered term or perpetual licenses to specific products, or specifically defined sets of products, which we refer to as point products. The majority of our license revenue was recognized under an "upfront revenue model," in which the net present value of the aggregate license fees was recognized as revenue upon shipment of the point products, provided all revenue recognition criteria were met. Customers typically received one year of post-contract software maintenance and support, or SMS, with their license agreements and then could elect to renew SMS annually. Revenue from SMS was recognized ratably over the period in which the SMS was delivered.

In fiscal 2010, we introduced the following changes to our licensing model:

- (i) We began offering our software on a subscription basis allowing our customers access to all products within a licensed suite (aspenONE Engineering or aspenONE Manufacturing and Supply Chain). SMS is included for the entire term of the arrangement and customers are entitled to any software products or updates introduced into the licensed suite. We refer to this license arrangement as our aspenONE licensing model.
- (ii) We began to include SMS for the entire term on our point product term arrangements.

Revenue related to our aspenONE licensing model is recognized over the term of the arrangement on a ratable basis. During fiscal 2010 and 2011, license revenue related to our point product arrangements with SMS included for the entire term of the arrangement was generally recognized on the due date of each annual installment, provided all revenue recognition criteria were met. Beginning in fiscal 2012, with the introduction of our Premier Plus SMS offering, we were unable to establish evidence of the fair value for the SMS component and revenue from these arrangements is now recognized on a ratable basis.

The changes to our licensing model introduced in fiscal 2010 did not change the method or timing of customer billings or cash collections. Since the introduction of these changes, our net cash provided by operating activities has increased in each annual period from \$33.0 million in fiscal 2009 to \$146.6 million in fiscal 2013. During these periods we have realized steadily improving cash flow due to growth of our portfolio of term license contracts, as well as from the renewal of customer contracts, on an installment basis, that were previously paid upfront.

As of June 30, 2013, a significant percentage of our active license agreements has been transitioned to our aspenONE licensing model. In the foreseeable future, we anticipate that a significant portion of our remaining legacy term license arrangements will transition to the aspenONE licensing model as existing license agreements reach the end of their respective original terms. During this transition period, we may continue to have arrangements where the software element will be recognized upfront, including perpetual licenses, amendments to existing legacy term arrangements, and in limited cases, renewals of existing legacy term arrangements. However, we do not expect revenue related to these sources to be significant in relation to our total revenue.

Impact of Licensing Model Changes

The principal accounting implications of the changes to our licensing model in fiscal 2010 are as follows:

Prior to fiscal 2010, the majority of our license revenue was recognized on an upfront basis. Since the upfront model resulted in the net present value of multiple years of future installments being recognized at the time of shipment, the changes to our licensing model resulted in a significant reduction in our software license revenue for fiscal 2010, 2011 and 2012 as compared to the fiscal years preceding our licensing model changes. These changes did not impact the

Table of Contents

incurrence or timing of our expenses, and there was no corresponding expense reduction to offset the lower revenue, resulting in operating losses for fiscal 2010, 2011 and 2012.

The transition will not be complete until the remaining term license agreements executed under our upfront revenue model reach the end of their original term. Many of our license arrangements were five or six years in duration when the aspenONE licensing model was introduced at the start of fiscal 2010, and consequently, a number of agreements executed under the upfront revenue model will not reach the end of their original term until fiscal 2016.

The SMS component of our services and other revenue has decreased, and been offset by a corresponding increase in subscription and software revenue as customers have transitioned to our aspenONE licensing model. Under our aspenONE licensing model and for point product arrangements with Premier Plus SMS included for the full contract term, the entire arrangement fee, including the SMS component, is included within subscription and software revenue. The SMS component of our services and other revenue is expected to continue to decrease until the total portfolio of active license arrangements have been converted to arrangements which include SMS for the full contract term.

Installment payments from aspenONE agreements and from point product arrangements with SMS included for the contract term are not considered fixed or determinable, and as a result, are not included in installments receivable. Accordingly, our installments receivable balance has, and is expected to continue to, decrease as licenses previously executed under our upfront revenue model reach the end of their terms.

The amount of our deferred revenue has increased, and is expected to continue to increase, as more revenue from our term license portfolio is recognized on a ratable basis.

Introduction of our Premier Plus SMS Offering

Beginning in fiscal 2012, we introduced our Premier Plus SMS offering to provide more value to our customers. As part of this offering, customers receive 24x7 support, faster response times, dedicated technical advocates and access to web-based training modules. The Premier Plus SMS offering is only provided to customers that commit to SMS for the entire term of the arrangement. Our annually renewable legacy SMS offering continues to be available to customers with legacy term and perpetual license agreements.

The introduction of our Premier Plus SMS offering in fiscal 2012 resulted in a change to the revenue recognition of point product arrangements that include Premier Plus SMS for the term of the arrangement. Since we do not have vendor-specific objective evidence of fair value, or VSOE, for our Premier Plus SMS offering, the SMS element of our point product arrangements is not separable, resulting in revenue being recognized ratably over the term of the arrangement, once the other revenue recognition criteria have been met. Prior to fiscal 2012, license revenue was recognized on the due date of each annual installment, provided all revenue recognition criteria were met. The introduction of our Premier Plus SMS offering did not change the revenue recognition for our aspenONE licensing arrangements.

Revenue

We generate revenue primarily from the following sources:

Software licenses. We provide integrated process optimization software solutions designed specifically for the process industries. We license our software products, together with SMS, primarily on a term basis, and we offer extended payment options for our term license agreements that generally require annual payments, which we also refer to as installments.

Table of Contents

SMS and training. Our SMS business consists primarily of providing customer technical support and access to software fixes and updates. We provide customer technical support services throughout the world from our customer support centers as well as via email and through our support website. Our training business provides customers with a variety of training solutions, including on-site, Internet-based and customized training.

Professional services. We offer professional services that are focused on implementing our technology in order to improve customers' plant performance and gain better operational data. Customers who use our professional services typically engage us to provide those services over periods of up to 24 months. We charge customers for professional services on a time-and-materials or fixed-price basis.

Four basic criteria must be satisfied before software license revenue can be recognized: persuasive evidence of an arrangement between us and an end user; delivery of our product has occurred; the fee for the product is fixed or determinable; and collection of the fee is probable.

Persuasive evidence of an arrangement We use a signed contract as evidence of an arrangement for software licenses and SMS. For professional services we use a signed contract and a work proposal to evidence an arrangement. In cases where both a signed contract and a purchase order are required by the customer, we consider both taken together as evidence of the arrangement.

Delivery of our product Software and the corresponding access keys are generally delivered to customers via disk media with standard shipping terms of Free Carrier, our warehouse (i.e., FCA, named place). Our software license agreements do not contain conditions for acceptance.

Fee is fixed or determinable We assess whether a fee is fixed or determinable at the outset of the arrangement. Significant judgment is involved in making this assessment.

Under our upfront revenue model, we are able to demonstrate that the fees are fixed or determinable for all arrangements, including those for our term licenses that contain extended payment terms. We have an established history of collecting under the terms of these contracts without providing concessions to customers. In addition, we also assess whether a contract modification to an existing term arrangement constitutes a concession. In making this assessment, significant analysis is performed to ensure that no concessions are given. Our software license agreements do not include a right of return or exchange. For license arrangements executed under the upfront revenue model, we recognize license revenue upon delivery of the software product, provided all other revenue recognition requirements are met.

We cannot assert that the fees under our aspenONE licensing model and point product arrangements with Premier Plus SMS are fixed or determinable because the rights provided to customers, and the economics of the arrangements, are not comparable to our transactions with other customers under the upfront revenue model. As a result, the amount of revenue recognized for these arrangements is limited by the amount of customer payments that become due.

Collection of fee is probable We assess the probability of collecting from each customer at the outset of the arrangement based on a number of factors, including the customer's payment history, its current creditworthiness, economic conditions in the customer's industry and geographic location, and general economic conditions. If in our judgment collection of a fee is not probable, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met.

Vendor-Specific Objective Evidence of Fair Value

We have established VSOE for certain SMS offerings, professional services, and training, but not for our software products or our Premier Plus SMS offering. We assess VSOE for SMS, professional services, and training based on an analysis of standalone sales of these offerings using the bell-shaped

Table of Contents

curve approach. We do not have a history of selling our Premier Plus SMS offering to customers on a standalone basis, and as a result are unable to establish VSOE for this new deliverable.

We allocate the arrangement consideration among the elements included in our multi-element arrangements using the residual method. Under the residual method, the VSOE of the undelivered elements is deferred and the remaining portion of the arrangement fee for perpetual and term licenses is recognized as revenue upon delivery of the software, assuming all other revenue recognition criteria are met. If VSOE does not exist for an undelivered element in an arrangement, revenue is deferred until such evidence does exist for the undelivered elements, or until all elements are delivered, whichever is earlier. Under the upfront revenue model, the residual license fee is recognized upon delivery of the software provided all other revenue recognition criteria were met. Arrangements that qualify for upfront recognition include sales of perpetual licenses, amendments to existing legacy term arrangements and renewals of legacy term arrangements.

Subscription and Software Revenue

Subscription and software revenue consists of product and related revenue from our (i) aspenONE licensing model, including SMS; (ii) point product arrangements with our Premier Plus SMS offering included for the contract term; (iii) legacy arrangements including (a) amendments to existing legacy term arrangements, (b) renewals of legacy term arrangements and (c) legacy arrangements that are being recognized over time as a result of not previously meeting one or more of the requirements for recognition under the upfront revenue model; and (iv) perpetual arrangements.

When a customer elects to license our products under our aspenONE licensing model, our Premier Plus SMS offering is included for the entire term of the arrangement and the customer receives, for the term of the arrangement, the right to any new unspecified future software products and updates that may be introduced into the licensed aspenONE software suite. Due to our obligation to provide unspecified future software products and updates, we are required to recognize revenue ratably over the term of the arrangement, once the other revenue recognition criteria noted above have been met.

Our point product arrangements with Premier Plus SMS include SMS for the term of the arrangement. Since we do not have VSOE for our Premier Plus SMS offering, the SMS element of our point product arrangements is not separable. As a result, revenue associated with point product arrangements with Premier Plus SMS included for the contract term is recognized ratably over the term of the arrangement, once the other revenue recognition criteria have been met.

Perpetual license and legacy arrangements do not include the same rights as those provided to customers under the aspenONE licensing model and point product arrangements with Premier Plus SMS. We continue to have VSOE for the legacy SMS offering provided in support of these license arrangements and can therefore separate the undelivered elements. Accordingly, the license fees for perpetual licenses and legacy arrangements continue to be recognized upon delivery of the software products using the residual method, provided all other revenue recognition requirements have been met.

Services and Other

SMS Revenue

SMS revenue includes the maintenance revenue recognized from arrangements for which we continue to have VSOE for the undelivered SMS offering (legacy SMS offering). For arrangements sold with our legacy SMS offering, SMS renewals are at the option of the customer, and the fair value of SMS is deferred and subsequently amortized over the contractual term of the SMS arrangement.

For arrangements executed under the aspenONE licensing model and beginning in fiscal 2012 for point product arrangements with Premier Plus SMS, we have not established VSOE for the SMS

Table of Contents

deliverable. As a result, the revenue related to the SMS element of these transactions is reported in subscription and software revenue in the consolidated statements of operations. Prior to fiscal 2012, the revenue related to the SMS deliverable of our point product arrangements, for which we had VSOE, was reported in services and other revenue in the consolidated statements of operations.

We expect legacy SMS revenue to continue to decrease as additional customers transition to our aspenONE licensing model. Beginning in fiscal 2014, we expect that SMS revenue will represent less than 10% of our total revenue, at which time we will include legacy SMS revenue in the subscription and software line in our consolidated statements of operations.

Professional Services Revenue

Professional services are provided to customers on a time-and-materials, or T&M, or fixed-price basis. We recognize professional services fees for our T&M contracts based upon hours worked and contractually agreed-upon hourly rates. Revenue from fixed-price engagements is recognized using the proportional performance method based on the ratio of costs incurred to the total estimated project costs. Project costs are typically expensed as incurred. The use of the proportional performance method is dependent upon our ability to reliably estimate the costs to complete a project. We use historical experience as a basis for future estimates to complete current projects. Additionally, we believe that costs are the best available measure of performance. Out-of-pocket expenses which are reimbursed by customers are recorded as revenue.

In certain circumstances, professional services revenue may be recognized over a longer time period than that which the services are performed. If the costs to complete a project are not estimable or the completion is uncertain, the revenue is recognized upon completion of the services. In circumstances in which professional services are sold as a single arrangement with, or in contemplation of, a new aspenONE license or point product arrangement with Premier Plus SMS, revenue is deferred and recognized on a ratable basis over the longer of (i) the period the services are performed, or (ii) the license term. When we provide professional services considered essential to the functionality of the software, we recognize the combined revenue from the sale of the software and related services using the completed contract or percentage-of-completion method.

We have occasionally been required to commit unanticipated additional resources to complete projects, which resulted in losses on those contracts. Provisions for estimated losses on contracts are made during the period in which such losses become probable and can be reasonably estimated.

Key Components of Operations

Revenue

Subscription and software revenue consists of product and related revenue from the following sources:

- (i) aspenONE licensing model, including SMS;
- (ii) Point product arrangements with our Premier Plus SMS offering included for the contract term (referred to as point product arrangements with Premier Plus SMS);
- (iii) legacy arrangements including (a) amendments to existing legacy term arrangements, (b) renewals of legacy term arrangements and (c) legacy arrangements that are being recognized over time as a result of not previously meeting one or more of the requirements for recognition under the upfront revenue model; and
- (iv) perpetual arrangements.

Table of Contents**Results of Operations Classification Subscription and Software Revenue**

Prior to fiscal 2012, subscription and software revenue were each classified separately on our consolidated statements of operations, because each type of revenue had different revenue recognition characteristics, and the amount of revenue attributable to each was material in relation to our total revenue. Additionally, we were able to separate the residual amount of software revenue related to the software component of our point product arrangements which included SMS for the contract term, based on the VSOE for the SMS element.

As a result of the introduction of our Premier Plus SMS offering in the first quarter of fiscal 2012, the majority of our product-related revenue is now recognized on a ratable basis, over the term of the arrangement. Since the distinction between subscription and point product ratable revenue does not represent a meaningful difference from either a line of business or revenue recognition perspective, we have combined our subscription and software revenue into a single line item on consolidated statements of operations beginning in the first quarter of fiscal 2012.

The following table summarizes the changes to our revenue classifications and the timing of revenue recognition of subscription and software revenue for fiscal 2013 and 2012 compared to fiscal 2011. Ratable revenue refers to product revenue that is recognized evenly over the term of the related agreement, beginning when the first payment becomes due. The residual method refers to the recognition of the difference between the total arrangement fee and the undiscounted VSOE for the undelivered element, assuming all other revenue recognition requirements have been met.

	Revenue Classification in Income Statement		Revenue Recognition Methodology	
	Fiscal 2013 and 2012	Fiscal 2011	Fiscal 2013 and 2012	Fiscal 2011
Type of Revenue:				
aspenONE subscription	Subscription and software	Subscription	Ratable	Ratable
Point products				
Software	Subscription and software	Software	Ratable	Residual method
Bundled SMS	Subscription and software	Services and other	Ratable	Ratable
Other				
Legacy arrangements	Subscription and software	Software	Residual method	Residual method
Perpetual arrangements	Subscription and software	Software	Residual method	Residual method

Services and Other Revenue. Our services and other revenue consists primarily of revenue related to professional services, standalone renewals of our legacy SMS offering and training. The amount and timing of this revenue depend on a number of factors, including:

whether the professional services arrangement was sold as a single arrangement with, or in contemplation of, a new aspenONE licensing arrangement;

the number, value and rate per hour of service transactions booked during the current and preceding periods;

the number and availability of service resources actively engaged on billable projects;

the timing of milestone acceptance for engagements contractually requiring customer sign-off;

the timing of negotiating and signing maintenance renewals;

the timing of collection of cash payments when collectability is uncertain; and

the size of the installed base of license contracts.

Table of Contents

We expect legacy SMS revenue to continue to decrease as additional customers transition to our aspenONE licensing model. Beginning in fiscal 2014, we expect that SMS revenue will represent less than 10% of our total revenue, at which time we will include legacy SMS revenue in the subscription and software line in our consolidated statements of operations.

Cost of Revenue

Cost of Subscription and Software. Our cost of subscription and software revenue consists of royalties, amortization of capitalized software and purchased technology intangibles, distribution fees, the costs of providing SMS on arrangements where the related revenue is recorded as subscription and software revenue, and costs related to delivery of software.

Cost of Services and Other. Our cost of services and other revenue consists primarily of personnel-related and external consultant costs associated with providing customers professional services, SMS on arrangements for which we have VSOE for the SMS element, and training.

As additional customers transition to our aspenONE licensing model, the cost of SMS revenue continues to migrate from cost of services and other revenue to cost of subscription and software revenue. Beginning with fiscal 2014, we expect the majority of the costs of our SMS business to be presented in cost of subscription and software revenue in our consolidated statements of operations.

Operating Expenses

Selling and Marketing Expenses. Selling expenses consist primarily of the personnel and travel expenses related to the effort expended to license our products and services to current and potential customers, as well as for overall management of customer relationships. Marketing expenses include expenses needed to promote our company and our products and to acquire market research to help us better understand our customers and their business needs.

Research and Development Expenses. Research and development expenses consist primarily of personnel expenses related to the creation of new products and to enhancements and engineering changes to existing products.

General and Administrative Expenses. General and administrative expenses include the costs of corporate and support functions, such as executive leadership and administration groups, finance, legal, human resources and corporate communications, and other costs such as outside professional and consultant fees and provision for bad debts.

Restructuring Charges. Restructuring charges result from the closure or consolidation of our facilities, or from qualifying reductions in headcount.

Other Income and Expenses

Interest Income. Interest income is recorded for the accretion of interest on the installment payments of our term software license contracts when revenue is recognized upfront at net present value, and from the investment in marketable securities and short-term money market instruments.

Interest Expense. Interest expense consists of charges primarily related to our secured borrowings. Secured borrowings are derived from our borrowing arrangements with unrelated financial institutions.

Other (Expense) Income, Net. Other (expense) income, net is comprised primarily of foreign currency exchange (losses) gains generated from the settlement and remeasurement of transactions denominated in currencies other than the functional currency of our operating units.

Table of Contents

Provision for (Benefit from) Income Taxes. The provision for income taxes is comprised of domestic and foreign taxes. The benefit from income taxes is comprised of the deferred benefit for tax deductions and credits that we expect to utilize in the future. We record interest and penalties related to income tax matters as a component of income tax expense. We expect the amount of income tax expense to vary each reporting period depending upon fluctuations in our taxable income by jurisdiction.

Key Business Metrics

Background

The changes to our licensing model in fiscal 2010 resulted in a significant reduction in our product-related revenue for fiscal 2010, 2011 and 2012 as compared to the fiscal years preceding our licensing model changes. Since the upfront model resulted in the net present value of multiple years of future installments being recognized at the time of shipment, we do not expect to recognize levels of revenue reflective of the value of our active license agreements until the remaining term license agreements executed under our upfront revenue model (i) reach the end of their original terms and (ii) are renewed. As a result, we believe that, a number of our performance indicators based on U.S. generally accepted accounting principles, or GAAP, including revenue, gross profit, operating income (loss) and net income (loss), are of limited value in assessing our performance, growth and financial condition. Accordingly, in addition to these GAAP-based performance indicators, we also focus on certain non-GAAP and other business metrics, including the key metrics set forth below, to track our business performance as we continue our transition to the aspenONE licensing model. None of these metrics should be considered as an alternative to any measure of financial performance calculated in accordance with GAAP.

We use a non-GAAP measure of free cash flow to analyze cash flows generated from our operations. Management believes that this financial measure is useful to investors because it permits investors to view our performance using the same tools that management uses to gauge progress in achieving our goals. We believe this measure is also useful to investors because it is an indication of cash flow that may be available to fund investments in future growth initiatives and it is also useful as a basis for comparing our performance with that of our competitors. To supplement our presentation of total cost of revenue and total operating costs presented on a GAAP basis, we use a non-GAAP measure of adjusted total costs, which excludes certain non-cash and non-recurring expenses. Management believes that this financial measure is useful to investors because it approximates the cash operating costs of the business. The presentation of these non-GAAP measures is not meant to be considered in isolation or as an alternative to cash flows from operating activities as a measure of liquidity or as an alternative to total cost of revenue and total operating costs as a measure of our total costs.

Total Term Contract Value

Total term contract value, or TCV, is an estimate of the renewal value, as of a specific date, of our active portfolio of term license agreements. TCV is calculated by multiplying the terminal annual payment for each active term license agreement by the original length of the existing license term, and then aggregating this amount for all active term license agreements. Accordingly, TCV represents the full renewal value of all of our current term license agreements under the hypothetical assumption that all of those agreements are simultaneously renewed for the identical license terms and at the same terminal annual payment amounts. TCV includes the value of SMS for any multi-year license agreements for which SMS is committed for the entire license term. TCV does not include any amounts for perpetual licenses, professional services, training or standalone renewal SMS. TCV is calculated using constant currency assumptions for agreements denominated in currencies other than U.S. dollars in order to remove the impact of currency fluctuations between comparison dates.

Table of Contents

We also estimate a *license-only TCV*, which we refer to as *TLCV*, by removing the SMS portion of TCV using our historic estimated selling price for SMS. Our portfolio of active license agreements currently reflects a mix of (a) license agreements that include SMS for the entire license term and (b) legacy license agreements that do not include SMS. *TLCV* provides a consistent basis for assessing growth, particularly while customers are continuing to transition to arrangements that include SMS for the term of the arrangement.

We believe TCV and *TLCV* are useful metrics for analyzing our business performance, particularly while we are transitioning to our aspenONE licensing model or to point product arrangements with Premier Plus SMS included for the full term, and revenue comparisons between fiscal periods do not reflect the actual growth rate of our business. Comparing TCV and *TLCV* for different dates provides insight into the growth and retention rate of our business during the period between those dates.

TCV and *TLCV* increase as the result of:

new term license agreements with new or existing customers;

renewals or modifications of existing license agreements that result in higher license fees due to price escalation or an increase in the number of tokens (units of software usage) or products licensed; and

renewals of existing license agreements that increase the length of the license term.

The renewal of an existing license agreement will not increase TCV and *TLCV* unless the renewal results in higher license fees or a longer license term. TCV and *TLCV* are adversely affected by customer non-renewals and by renewals that result in lower license fees or a shorter license term. Our standard license term historically has been between five and six years, and we do not expect this standard term to change in the future. Many of our contracts have escalating annual payments throughout the term of the arrangement. By calculating TCV and *TLCV* based on the terminal year annual payment, we are typically using the highest annual fee from the existing arrangement to calculate the hypothetical renewal value of our portfolio of term arrangements.

We estimate that *TLCV* grew by approximately 13.0% during fiscal 2013, from \$1.46 billion at June 30, 2012 to \$1.65 billion at June 30, 2013. We estimate that TCV grew by approximately 15.1% during fiscal 2013, from \$1.68 billion at June 30, 2012 to \$1.93 billion at June 30, 2013. The growth was attributable primarily to an increase in the number of tokens sold.

Annual Spend

Annual spend is a derivative metric that is closely related to TCV. TCV is an estimate of the full renewal value of our active portfolio of term license agreements, as of a specific date. Annual spend is an estimate of the annualized value of our active portfolio of term agreements, as of a specific date. Annual spend is calculated by taking the most recent annual invoice value of each of our active term contracts and then aggregating this amount for all active term licenses. Annual spend also includes the annualized value of standalone SMS agreements purchased in conjunction with term license agreements. We believe that the annual spend metric may be helpful to investors attempting to analyze and model subscription and software revenue while we transition to our aspenONE licensing model. Comparing annual spend for different dates provides insight into the growth and retention rates of our business, and since annual spend represents the estimated annualized billings associated with our active term license agreements, it provides insight into a normalized value for subscription and software revenue.

Annual spend increases as a result of:

New term license agreements with new or existing customers;

Table of Contents

Renewals or modifications of existing license agreements that result in higher license fees due to price escalation or an increase in the number of tokens (units of software usage) or products licensed;

Escalation of annual payments in our active term contracts.

Annual spend is adversely affected by term license and standalone SMS agreements that are not renewed. Unlike TCV and TLCV, the value of annual spend is not impacted by changes to contract duration.

We estimate that annual spend grew by approximately 11.1% during fiscal 2013, from \$304.2 million at June 30, 2012 to \$337.9 million at June 30, 2013. The growth was attributable primarily to an increase in the number of tokens sold.

Adjusted Total Costs

The following table presents our total cost of revenue and total operating expenses, as adjusted for stock-based compensation expense, restructuring charges, and amortization of purchased intangibles, for the indicated periods:

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
(Dollars in Thousands)							
Total cost of revenue	\$ 50,348	\$ 52,277	\$ 52,345	\$ (1,929)	(3.7)%	\$ (68)	(0.1)%
Total operating expenses	205,439	205,864	200,385	(425)	(0.2)	5,479	2.7
Total expenses	255,787	258,141	252,730	(2,354)	(0.9)%	5,411	2.1%
Less:							
Stock-based compensation	(14,637)	(12,406)	(9,699)	(2,231)	18.0	(2,707)	27.9

Amortization of purchased technology intangibles	(702)	(142)		(560)	*	(142)	*
Adjusted total costs (non-GAAP)	\$ 240,453	\$ 245,894	\$ 243,278	\$ (5,441)	(2.2)%	\$ 2,616	1.1%

*

Not meaningful

Fiscal 2013 Compared to Fiscal 2012

Total expenses decreased by \$2.4 million during fiscal 2013 compared to the prior fiscal year. Adjusted total costs, which consist of total cost of revenue and total operating expenses, adjusted to exclude stock-based compensation, restructuring charges and amortization of purchased technology intangibles, decreased by \$5.4 million for fiscal 2013 compared to the prior fiscal year. The period-over-period decrease in adjusted total costs was primarily attributable to a reduction in legal costs of \$6.0 million, lower compensation and related costs of \$1.6 million and lower third-party commissions of \$0.4 million. These decreases were partially offset by increases in marketing costs of \$0.6 million and other less significant items that totaled \$0.3 million, net. In addition, fiscal 2012 benefited from the recognition of a \$1.7 million gain associated with an insurance recovery, which resulted in a reduction in expense during the period. No similar events occurred in fiscal 2013.

Stock-based compensation expense increased \$2.2 million primarily due to the incremental expense associated with the August 2012 annual program grant, which had a higher valuation than awards granted in previous periods. Amortization of purchased technology intangibles increased \$0.6 million

Table of Contents

associated with the assets acquired during fiscal 2013 and the second half of fiscal 2012. Please refer to the "Results of Operations" section below for additional information on year-over-year expense fluctuations.

Fiscal 2012 Compared to Fiscal 2011

Total expenses increased by \$5.4 million during fiscal 2012 compared to fiscal 2011. Adjusted total costs, which consist of total cost of revenue and total operating expenses, adjusted to exclude stock-based compensation, restructuring charges and amortization of purchased technology intangibles, increased by \$2.6 million for fiscal 2012 compared to fiscal 2011. The period-over-period increase in adjusted total costs was primarily attributable to higher compensation and related costs of \$3.8 million, an increase in business taxes of \$0.8 million, and other less significant increases which in the aggregate totaled \$2.7 million. These increases were offset by a reduction in legal costs of \$4.4 million, lower spending on outside consultants of \$2.6 million, the recognition of a \$1.7 million gain associated with an insurance recovery, lower audit fees of \$0.7 million, lower recruiting and related costs of \$0.7 million, and other less significant reductions which in the aggregate totaled \$1.4 million. In addition, the fiscal 2011 period benefited from the reversal of a previously accrued liability of \$4.0 million resulting from the expiration of a technology vendor relationship, as well as from the collection of previously reserved receivables resulting in a net reduction in bad debt expense of \$2.8 million. These two events resulted in a reduction in expense during the period. No similar events occurred in fiscal 2012.

Stock-based compensation expense increased \$2.7 million primarily due to the incremental expense associated with the August 2011 annual program grant, which had a higher valuation than the prior year annual grant, partially offset by a decrease attributable to certain awards becoming fully vested. Please refer to the "Results of Operations" section below for additional information on year-over-year expense fluctuations.

Free Cash Flow

Free cash flow is calculated as net cash provided by operating activities adjusted for the net impact of (a) purchases of property, equipment and leasehold improvements (b) insurance proceeds and (c) capitalized computer software development costs.

Customer collections and, consequently, cash flows from operating activities and free cash flow are primarily driven by license and services billings, rather than recognized revenue. As a result, the introduction of our aspenONE licensing model has not had an adverse impact on cash receipts. Until existing term license contracts are renewed and license-related revenue returns to prior year levels, we believe free cash flow is a more relevant measure of our financial performance than income statement profitability measures such as total revenue, gross profit, operating income (loss) and net income (loss). Additionally, we also believe that free cash flow is often used by securities analysts, investors and other interested parties in the evaluation of software companies.

Table of Contents

The following table provides a reconciliation of net cash flows provided by operating activities to free cash flow for the periods presented:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Net cash provided by operating activities	\$ 146,562	\$ 104,637	\$ 63,330
Purchase of property, equipment, and leasehold improvements	(4,507)	(4,241)	(2,839)
Insurance proceeds	2,222		
Capitalized computer software development costs	(1,156)	(511)	(1,990)
Free cash flow (non-GAAP)	\$ 143,121	\$ 99,885	\$ 58,501

Total free cash flow increased \$43.2 million during fiscal 2013 as compared to the prior fiscal year.

We have realized steadily improving free cash flow due to growth of our portfolio of term license contracts as well as from the renewal of customer contracts on an installment basis that were previously paid upfront. Over the past few years we have reduced the incentive for customers to pay upfront by reducing the discount rate used to calculate the upfront payment. We expect our free cash flow to continue to improve as our portfolio of term license contracts continues to grow.

Table of Contents**Results of Operations**

The following table sets forth the results of operations, percentage of total revenue and the year-over-year percentage change in certain financial data for fiscal 2013, 2012 and 2011:

	Year Ended June 30,						2013 Compared to 2012 %	2012 Compared to 2011 %
	2013		2012		2011			
	(Dollars in Thousands, Except Percentages)

*

Not meaningful

(1)

Our provision for (benefit from) income taxes provided a net \$54.0 million benefit in fiscal 2011, due to the reversal of a significant portion of our U.S. valuation allowance in the fourth quarter. See Note 8 to our Consolidated Financial Statements, "Income Taxes," for further information.

Revenue

Fiscal 2013 Compared to Fiscal 2012

Total revenue increased by \$68.3 million compared to the prior fiscal year. The increase was due to higher subscription and software revenue of \$73.0 million, partially offset by lower services and other revenue of \$4.7 million.

Table of Contents***Fiscal 2012 Compared to Fiscal 2011***

Total revenue increased by \$45.0 million compared to the prior fiscal year. The increase was due to higher subscription and software revenue of \$63.0 million, partially offset by lower services and other revenue of \$18.0 million.

Subscription and Software Revenue

As discussed in "Results of Operations Classification Subscription and Software Revenue," we have combined subscription and software revenues on our consolidated statements of operations in the first quarter of fiscal 2012. Subscription and software revenue includes revenue recognized under both ratable and residual methods. The following tables provide subscription and software revenue for fiscal 2013, 2012 and 2011, based on the respective revenue recognition methodology.

	Year Ended, June 30			Year Ended, June 30		
	2013	2012	2011	2013	2012	2011
	(Dollars in Thousands)			% of Total		
Subscription and software revenue:						
Ratable(1)	\$ 225,064	\$ 144,144	\$ 58,459	93.9%	86.5%	56.4%
Residual method(2)	14,590	22,544	45,240	6.1	13.5	43.6
 Subscription and software revenue	 \$ 239,654	 \$ 166,688	 \$ 103,699	 100.0%	 100.0%	 100.0%

(1)

During fiscal 2011, the fair value of the SMS element of point product arrangements totaled \$2.1 million and was presented in the consolidated statements of operations as services and other revenue. Effective July 1, 2011, the fee attributable to SMS included in point product arrangements is no longer separable since we are unable to establish VSOE, and as a result, is included within ratable revenue.

(2)

Residual method revenue detail

	Year Ended, June 30		
	2013	2012	2011
	(Dollars in Thousands)		
Residual method revenue:			
Point products Software	*	*	\$ 20,190
Legacy arrangements	13,008	20,586	22,761
Perpetual arrangements	1,582	1,958	2,289
 Total residual method revenue	 \$ 14,590	 \$ 22,544	 \$ 45,240

*

Effective July 1, 2011, the total combined arrangement fee (which includes the fee attributable to SMS) for point product arrangements with Premier Plus SMS is recognized on a ratable basis.

Fiscal 2013 Compared to Fiscal 2012

The increase in subscription and software revenue was primarily the result of a larger base of arrangements being recognized on a ratable basis during the fiscal year. We expect subscription and software revenue to continue to increase as customers renew expiring contracts formerly

on the upfront revenue model.

As noted in the table above, we recognized approximately \$13.0 million and \$20.6 million of revenue related to legacy arrangements during fiscal 2013 and 2012, respectively. Going forward, we

Table of Contents

expect residual method revenue from legacy arrangements to decrease and be replaced with term-based licensing agreements that are recognized on a ratable basis. We do not expect revenue related to point products licensed on a perpetual basis to be a significant source of revenue in the future periods.

Fiscal 2012 Compared to Fiscal 2011

The increase in subscription and software revenue was primarily the result of a larger base of arrangements being recognized on a ratable basis during the fiscal year.

As noted in the table above, we recognized approximately \$20.6 million and \$22.8 million of revenue related to legacy arrangements during fiscal 2012 and 2011, respectively.

Services and Other Revenue

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
	(Dollars in Thousands, Except Percentages)						
Professional services revenue	\$ 26,856	\$ 22,421	\$ 29,334	\$ 4,435	19.8%	\$ (6,913)	(23.6)%
SMS and other revenue	44,877	54,025	65,121	(9,148)	(16.9)	(11,096)	(17.0)
Services and other revenue	\$ 71,733	\$ 76,446	\$ 94,455	\$ (4,713)	(6.2)%	\$ (18,009)	(19.1)%
As a percent of revenue	23.0%	31.4%	47.7%				

Professional Services Revenue***Fiscal 2013 Compared to Fiscal 2012***

The year-over-year increase in professional services revenue was primarily attributable to increased professional services activity and a reduction in the net revenue deferrals on professional service arrangements sold as a single arrangement with, or in contemplation of, a new aspenONE license or a point product arrangement with Premier Plus SMS. Also, during fiscal 2013, we deferred \$1.3 million of professional services revenue accounted for under the completed contract method compared to \$1.9 million of revenue on such arrangements during the prior fiscal year.

Under the aspenONE licensing model, revenue from committed professional service arrangements that are sold as a single arrangement with, or in contemplation of, a new aspenONE licensing transaction is deferred and recognized on a ratable basis over the longer of (a) the period the services are performed or (b) the term of the related software arrangement. As our typical contract term approximates five years, professional services revenue on these types of arrangements will usually be recognized over a longer period than the period over which the services are performed. During fiscal 2013, we had net revenue deferrals of \$2.5 million for professional services bundled with aspenONE transactions. By comparison, we had net revenue deferrals of \$4.1 million on similar arrangements during the prior fiscal year.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year decrease in professional services revenue was primarily due to decreased customer demand for professional services and to the timing of revenue recognition on certain large arrangements. Our primary focus is the successful implementation and usage of our software, and in many instances, this work can be professionally performed by qualified third parties. We often compete with third-party consulting firms when bidding for professional services contracts, particularly in developed markets. The competitive market for services, in conjunction with increasing customer familiarity with many of our well-established software products, had an unfavorable impact on our professional services revenue during fiscal 2012.

Table of Contents

For fiscal 2012, we had net deferrals of \$4.1 million for professional services bundled with aspenONE transactions. By comparison, we had net deferrals of \$2.8 million on similar arrangements during the prior fiscal year.

The timing of revenue recognition on certain large arrangements can also impact the comparability of professional services revenue from period to period. In fiscal 2012, we deferred the recognition of \$2.0 million of professional services revenue on certain large arrangements that did not meet the requirements for revenue recognition. By comparison, in fiscal 2011, we deferred the recognition of approximately \$3.2 million of professional services revenue on similar arrangements.

SMS and Other Revenue

SMS and other revenue includes revenue from annually renewed legacy SMS, offered in support of our perpetual and legacy term arrangements.

Fiscal 2013 Compared to Fiscal 2012

The year-over-year decrease in SMS and other revenue was primarily due to customers transitioning from legacy term and perpetual arrangements to term license arrangements that include Premier Plus SMS for the contract term. Under our subscription-based licensing model and for point product arrangements with Premier Plus SMS, the entire arrangement fee is included within subscription and software revenue. We expect legacy SMS revenue to continue to decrease as additional customers transition to our aspenONE licensing model. Beginning in fiscal 2014, we expect that SMS revenue will represent less than 10% of our total revenue, at which time we will include SMS revenue in the subscription and software line in our consolidated statements of operations.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year decrease in SMS and other revenue was primarily due to customers transitioning from legacy term and perpetual arrangements to term license arrangements that include Premier Plus SMS for the contract term.

Expenses

Cost of Subscription and Software Revenue

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
	(Dollars in Thousands, Except Percentages)						
Cost of subscription and software revenue	\$ 12,788	\$ 10,617	\$ 5,213	\$ 2,171	20.4%	\$ 5,404	103.7%
Gross margin	94.7%	93.6%	95.0%				

Fiscal 2013 Compared to Fiscal 2012

The increase in cost of subscription and software revenue was primarily due to a larger percentage of SMS services being provided to customers under our aspenONE licensing model and point product arrangements with Premier Plus SMS. We allocate the portion of SMS cost associated with providing support services on these arrangements to match the expense with the related revenue. As the subscription business grows, the cost of SMS revenue migrates from cost of services and other revenue to cost of subscription and software revenue. In addition, cost of subscription and software revenue increased \$0.6 million due to higher amortization of purchased technology intangibles.

Table of Contents

Beginning with fiscal 2014, we expect the costs of our SMS business to be presented in cost of subscription and software revenue in our consolidated statements of operations.

Fiscal 2012 Compared to Fiscal 2011

The increase in cost of subscription and software revenue was primarily due to a larger percentage of SMS services being provided to customers under our aspenONE licensing model and point product arrangements with Premier Plus SMS.

In addition, the fiscal 2011 period benefited from the reversal of a previously accrued liability of \$4.0 million resulting from the expiration of a technology vendor relationship. No similar event occurred in fiscal 2012. Our subscription and software gross margins during fiscal 2012 were slightly higher than the prior fiscal year after excluding the impact of the reversal of the previously accrued liability for fiscal 2011.

Cost of Services and Other Revenue

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
	(Dollars in Thousands, Except Percentages)						
Cost of services and other revenue	\$ 37,560	\$ 41,660	\$ 47,132	\$ (4,100)	(9.8)%	\$ (5,472)	(11.6)%
Gross margin	47.6%	45.5%	50.1%				

Cost of services and other revenue includes the cost of providing professional services, training, annually renewed legacy SMS, and other revenue.

Fiscal 2013 Compared to Fiscal 2012**Cost of Professional Services Revenue**

The cost of professional services revenue decreased \$1.3 million during fiscal 2013 compared to the prior fiscal year. The decrease was primarily attributable to lower compensation and related costs, partially offset by reduced cost deferrals on projects accounted for under the completed contract method.

The timing of expense recognition on professional service arrangements can impact the comparability of cost of professional services revenue from period to period. In fiscal 2013, we deferred net costs of \$0.6 million on certain large arrangements. By comparison, we deferred costs of \$2.5 million on similar arrangements during fiscal 2012.

Cost of SMS and Other Revenue

Cost of SMS and other revenue decreased \$2.8 million during fiscal 2013 compared to the prior fiscal year. The year-over-year decrease in cost of SMS and other revenue was primarily due to the growth of our subscription-based revenue and the associated higher allocation of SMS support costs being reported in cost of subscription and software revenue. As the subscription business grows, the cost of SMS revenue continues to migrate from cost of services and other revenue to cost of subscription and software revenue.

Beginning with fiscal 2014, we expect the costs of our SMS business to be presented in cost of subscription and software revenue in our consolidated statements of operations.

Gross margin on cost of services and other revenue increased from 45.5% in fiscal 2012 to 47.6% in fiscal 2013 primarily due to the increased professional services revenues and the reduction in

Table of Contents

compensation and related costs on professional services, as noted above. As the gross margin on SMS has historically been higher than on professional services, and SMS revenue continues to migrate to subscription and software revenue, we expect the gross margin on services and other revenue to trend downward, however, it may be variable on a period to period basis.

Fiscal 2012 Compared to Fiscal 2011Cost of Professional Services Revenue

The cost of professional services revenue decreased \$1.2 million during fiscal 2012 compared to the prior fiscal year. The decrease was primarily attributable to lower compensation and related costs.

Cost of SMS and Other Revenue

Cost of SMS and other revenue decreased \$4.3 million during fiscal 2012 compared to the prior fiscal year. The year-over-year decrease in cost of SMS and other revenue was primarily due to the growth of our subscription-based revenue and the associated higher allocation of SMS support costs being reported in cost of subscription and software revenue.

Gross margin on cost of services and other revenue declined from 50.1% in fiscal 2011 to 45.5% in fiscal 2012 primarily due to continuous migration of SMS revenue to subscription and software revenue.

Selling and Marketing Expense

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
	(Dollars in Thousands, Except Percentages)						
Selling and marketing expense	\$ 93,655	\$ 96,400	\$ 90,771	\$ (2,745)	2.8%	\$ 5,629	6.2%
As a percent of revenue	30.1%	39.6%	45.8%				

Fiscal 2013 Compared to Fiscal 2012

The year-over-year decrease in selling and marketing expense for fiscal 2013 was primarily the result of lower compensation and related costs of \$4.0 million, which includes lower commissions, and lower third-party commissions of \$0.4 million, partially offset by higher marketing costs of \$0.6 million, higher travel expenses of \$0.5 million and other less significant items that totaled \$0.6 million, net.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year increase in selling and marketing expense for fiscal 2012 was primarily the result of higher compensation and related costs of \$4.7 million, which includes higher stock-based compensation expense of \$1.0 million. The remaining year-over-year increase was primarily the result of higher third-party commissions of \$0.5 million and higher travel expenses of \$0.5 million.

Research and Development Expense

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
	(Dollars in Thousands, Except Percentages)						
Research and development expense	\$ 62,516	\$ 56,218	\$ 50,820	\$ 6,298	11.2%	\$ 5,398	10.6%
As a percent of revenue	20.1%	23.2%	25.6%				

Table of Contents

Fiscal 2013 Compared to Fiscal 2012

The year-over-year increase in research and development expense for fiscal 2013 was primarily the result of higher compensation and related costs of \$6.6 million.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year increase in research and development expense for fiscal 2012 was primarily the result of higher compensation and related costs of \$4.1 million and lower capitalized software development costs of \$1.0 million.

General and Administrative Expense

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011	
	2013	2012	2011	\$	%	\$	%
	(Dollars in Thousands, Except Percentages)						
General and administrative expense	\$ 49,273	\$ 53,547	\$ 59,041	\$ (4,274)	(8.0)%	\$ (5,494)	(9.3)%
As a percent of revenue	15.8%	22.0%	29.8%				

Fiscal 2013 Compared to Fiscal 2012

The year-over-year decrease in general and administrative expense for fiscal 2013 was primarily attributable to a reduction in legal costs of \$6.0 million and other less significant items that totaled \$0.6 million, net, partially offset by higher compensation and related costs of \$0.6 million. Additionally, the 2012 period benefited from the recognition of a \$1.7 million gain associated with an insurance recovery. No similar event occurred in 2013.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year decrease in general and administrative expense for fiscal 2012 was primarily attributable to a reduction in legal costs of \$4.4 million, the recognition of a \$1.7 million gain associated with an insurance recovery, lower spending on outside consultants of \$1.6 million, decreases in recruiting and related expenses of \$1.2 million and lower audit fees of \$0.8 million. These decreases were partially offset by higher compensation and related costs of \$0.7 million. Additionally, the 2011 period benefited from the collection of previously reserved receivables resulting in a net reduction in bad debt expense for the period of \$2.8 million. No similar event occurred in 2012.

Restructuring Charges

	Year Ended June 30,			2013 Compared to 2012		2012 Compared to 2011

As a percent of revenue		%	(0.1)%				

*

Not meaningful

Table of Contents*Fiscal 2013 Compared to Fiscal 2012*

There were no new restructuring events during fiscal 2013 or 2012. The activity in restructuring charges during these fiscal years was the result of accretion and adjustments relating to changes in estimates on existing facilities-related restructuring plans.

Fiscal 2012 Compared to Fiscal 2011

There were no new restructuring events during fiscal 2012 or 2011. The activity in restructuring charges during these fiscal years was the result of accretion and adjustments relating to changes in estimates on existing facilities-related restructuring plans.

Interest Income

	Year Ended June 30,			2013 Compared to		2012 Compared to	
	2013	2012	2011	2012		2011	
	(Dollars in Thousands, Except Percentages)			\$	%	\$	%
Interest income	\$ 3,379	\$ 7,578	\$ 13,075	\$ (4,199)	(55.4)%	\$ (5,497)	(42.0)%
As a percent of revenue	1.1%	3.1%	6.6%				

Fiscal 2013 Compared to Fiscal 2012

The year-over-year decrease in interest income during fiscal 2013 was primarily attributable to the decrease of our installments receivable portfolio, partially offset by the income generated from investments in marketable securities. We expect interest income to continue to decrease going forward as our installments receivable balance continues to decrease.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year decrease in interest income during fiscal 2012 was primarily attributable to the continued decrease of our collateralized and installment receivables portfolios.

Interest Expense

	Year Ended June 30,			2013 Compared to		2012 Compared to	
	2013	2012	2011	2012		to 2011	
	(Dollars in Thousands, Except Percentages)			\$	%	\$	%
Interest expense	\$ (424)	\$ (4,204)	\$ (5,138)	\$ 3,780	(89.9)%	\$ 934	(18.2)%
As a percent of revenue	(0.1)%	(1.7)%	(2.6)%				

Fiscal 2013 Compared to Fiscal 2012

The year-over-year decrease in interest expense during fiscal 2013 was attributable to the pay-down of our secured borrowings which were repaid in full during the second quarter of fiscal 2013.

Fiscal 2012 Compared to Fiscal 2011

The year-over-year decrease in interest expense during fiscal 2012 was primarily attributable to lower average secured borrowing balances, resulting from the continued pay-down of our existing secured borrowing arrangements.

Table of Contents**Other (Expense) Income, Net**

Effective tax rate	21.2%	(8.9)%	*				

*

Not meaningful

Fiscal 2013 Compared to Fiscal 2012

The effective tax rate for the periods presented is primarily the result of income earned in the U.S. taxed at U.S. federal and state statutory income tax rates, income earned in foreign tax jurisdictions taxed at the applicable rates, as well as the impact of permanent differences between book and tax income and the impact of the reversal of a certain deferred tax liability.

Our effective tax rate was 21.2% during fiscal 2013 compared to a benefit rate of 8.9% during fiscal 2012.

We recognized an income tax expense of \$12.2 million during fiscal 2013 compared to a benefit of \$1.3 million during fiscal 2012. Income tax expense during fiscal 2013 was driven primarily by pre-tax profitability in our domestic and foreign operations and the impact of non-deductible stock-based

Table of Contents

compensation. Additionally, income tax expense during fiscal 2013 included a benefit of \$9.3 million due to the reversal of a deferred tax liability related to restructuring of a foreign affiliate.

The tax benefit during fiscal 2012 was derived primarily from taxable losses incurred, and our assessment that it is more likely than not that we will recognize these benefits in the future. In addition, our benefit from income taxes included the impact of the reversal of certain tax contingencies determined under the provisions of ASC Topic 740, *Income Taxes* (ASC 740).

As of June 30, 2013, we maintain a valuation allowance in the U.S. primarily for certain deferred tax assets related to capital losses that are anticipated to expire unused. We also maintain a valuation allowance on certain foreign subsidiary NOL carryforwards because it is more likely than not that a benefit will not be realized. As of June 30, 2013 and 2012, our total valuation allowance was \$9.9 million and \$5.6 million, respectively.

We made cash tax payments totaling \$5.1 million during fiscal 2013. The majority of these tax payments were related to foreign liabilities. These payments were partially offset by cash tax refunds of \$0.5 million.

Fiscal 2012 Compared to Fiscal 2011

We recognized a benefit from income taxes of \$1.3 million during fiscal 2012 compared to a benefit of \$54.0 million during fiscal 2011. The tax benefit during fiscal 2012 was derived primarily from taxable losses incurred, and our assessment that it is more likely than not that we will recognize these benefits in the future. In addition, our benefit from income taxes included the impact of the reversal of certain tax contingencies determined under the provisions of ASC 740.

In fiscal 2011, based on our evaluation of the realizability of our U.S. federal net operating loss carryforwards (NOLs), foreign tax credits, and R&D credits, we recognized a benefit from income taxes due to a significant reduction of our valuation allowance of \$48.8 million. Also during fiscal 2011 we established tax contingencies of \$7.2 million determined under the provisions of ASC 740. These contingencies included penalties and interest, which were recorded as a component of our income tax expense.

We made cash tax payments totaling \$3.6 million during fiscal 2012. The majority of these tax payments were related to foreign liabilities. These payments were offset by cash tax refunds of \$0.9 million.

Liquidity and Capital Resources

Resources

In recent years, we have financed our operations principally with cash generated from operating activities. As of June 30, 2013, our principal sources of liquidity consisted of \$132.4 million in cash and cash equivalents and \$92.4 million of marketable securities. As of June 30, 2012, our principal sources of liquidity consisted of \$165.2 million in cash and cash equivalents.

We believe our existing cash and cash equivalents and marketable securities, together with our cash flows from operating activities, will be sufficient to meet our anticipated cash needs for at least the next twelve months. To the extent our cash and cash equivalents, marketable securities and cash flows from operating activities are insufficient to fund future activities, we may need to raise additional funds through the financing of receivables or from public or private equity or debt financings. We also may need to raise additional funds in the event we decide to make one or more acquisitions of businesses, technologies or products. If additional funding is required, we may not be able to effect a receivable, equity or debt financing on terms acceptable to us or at all.

Table of Contents

Our cash equivalents of \$117.0 million and \$144.0 million consist primarily of money market funds as of June 30, 2013 and 2012, respectively. Our investments in marketable securities of \$92.4 million as of June 30, 2013 consist primarily of investment grade fixed income corporate debt securities with maturities ranging from less than one month to 19 months. We had no investments in marketable securities as of June 30, 2012. The fair value of our portfolio is affected by interest rate movements, credit and liquidity risks. The objective of our investment policy is to manage our cash and investments to preserve principal and maintain liquidity, while earning a return on our investment portfolio by investing available funds. We diversify our investment portfolio by investing in multiple types of investment-grade securities and using a third-party investment manager.

The following table summarizes our cash flow activities for the periods indicated:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Cash flow provided by (used in):			
Operating activities	\$ 146,562	\$ 104,637	\$ 63,330
Investing activities	(97,391)	(7,369)	(4,829)
Financing activities	(81,771)	(81,699)	(34,264)
Effect of exchange rates on cash balances	(210)	(312)	803
(Decrease) increase in cash and cash equivalents	\$ (32,810)	\$ 15,257	\$ 25,040

Operating Activities

Our primary source of cash is from the annual installments associated with our software license arrangements and related software support services, and to a lesser extent from professional services and training. We believe that cash inflows from our term license business will grow as we benefit from the continued growth of our portfolio of term license contracts.

Fiscal 2013 Compared to Fiscal 2012

Cash from operating activities provided \$146.6 million during fiscal 2013. This amount resulted from net income of \$45.3 million, adjusted for non-cash items of \$24.9 million, and a net source of cash of \$76.4 million due to net decreases in operating assets of \$36.8 million and net increases in operating liabilities of \$39.6 million.

Non-cash expenses within net income consisted primarily of \$14.6 million for stock-based compensation expense, deferred income tax expense of \$5.1 million, and \$5.2 million of depreciation and amortization.

A net decrease in operating assets of \$36.8 million and a net increase in operating liabilities of \$39.6 million contributed \$76.4 million to net cash from operating activities. Sources of cash consisted of decreases in installment and collateralized receivables totaling \$39.4 million, decreases in prepaid expenses, prepaid income taxes, and other assets totaling \$3.8 million and increases in deferred revenue of \$44.6 million. Partially offsetting these sources of cash were increases in accounts receivable of \$6.1 million, unbilled services of \$0.4 million and reductions in accounts payable, accrued expenses and other current liabilities of \$4.9 million.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

Cash from operating activities provided \$104.6 million during fiscal 2012. This amount resulted from a net loss of \$13.8 million, adjusted for non-cash items of \$12.1 million and a net \$106.3 million source of cash due to decreases in operating assets and increases in operating liabilities.

Non-cash expenses within net loss consisted primarily of \$12.4 million for stock-based compensation expense, \$5.3 million of depreciation and amortization, and \$0.9 million of net unrealized foreign currency losses, partially offset by a deferred income tax benefit of \$4.8 million and other non-cash operating activities of \$1.7 million.

A decrease in operating assets and an increase in operating liabilities contributed \$106.3 million to net cash from operating activities. The cash generated from this change consisted of an increase in deferred revenue of \$58.4 million and decreases in installments and collateralized receivables totaling \$57.0 million. Partially offsetting these sources of cash was an increase in prepaid expenses, prepaid income taxes, and other assets of \$3.9 million, an increase in accounts receivable and unbilled services of \$3.6 million and reductions in accounts payable, accrued expenses, income taxes payable and other liabilities of \$1.6 million.

Investing Activities

Fiscal 2013 Compared to Fiscal 2012

During fiscal 2013, we used \$97.4 million of cash for investing activities. The cash used consisted primarily of \$97.6 million for purchases of marketable securities related to a program which we initiated during fiscal 2013 to make direct investments in these assets. Partially offsetting this use of cash was the receipt of \$4.5 million from maturities of marketable securities.

Additional uses of cash during fiscal 2013 included \$4.5 million related to capital expenditures, primarily for computer hardware and software, \$0.9 million used for the purchase of technology intangibles, and \$1.2 million related to capitalized computer software development costs. Partially offsetting these uses of cash was the receipt of \$2.2 million for insurance proceeds. We do not expect our future investment in capital expenditures to be materially different from recent levels. We are not currently a party to any material purchase contracts related to future capital expenditures.

Fiscal 2012 Compared to Fiscal 2011

During fiscal 2012, we used \$7.4 million of cash for investing activities. The cash used consisted of \$4.2 million related to computer hardware and software expenditures, and \$2.6 million for payments for acquisitions, net of cash acquired. During fiscal 2012, we capitalized software development costs of \$0.5 million related to projects where we established technological feasibility.

Financing Activities

Fiscal 2013 Compared to Fiscal 2012

During fiscal 2013, we used \$81.8 million of cash for financing activities. We paid \$84.7 million for the repurchase of our common stock, made net payments on secured borrowings of \$11.0 million, and paid withholding taxes of \$7.7 million on vested and settled restricted stock units. Sources of cash in the period included proceeds of \$21.1 million from the exercise of employee stock options. Cash used for financing activities during fiscal 2013 includes \$0.5 million related to stock-based compensation tax deductions in excess of book compensation expense that will be credited to additional paid in capital when such deductions reduce taxes payable.

Table of Contents***Fiscal 2012 Compared to Fiscal 2011***

During fiscal 2012, we used \$81.7 million of cash for financing activities. We paid \$46.1 million for the repurchase of our common stock, made net payments on secured borrowings of \$39.9 million (\$44.9 million of repayments offset by \$5.0 million of proceeds), received proceeds of \$8.9 million from the exercise of employee stock options, and paid withholding taxes of \$4.6 million on vested and settled restricted stock units during fiscal 2012.

We did not finance any receivables to fund operations during fiscal 2012. However, we did exchange \$5.0 million of previously-financed receivables due to superseding existing contracts during fiscal 2012. This exchange is shown as both a use and source of funds related to secured borrowings on our consolidated statements of cash flows.

Borrowings Collateralized by Receivable Contracts

We had no outstanding secured borrowings as of June 30, 2013 since the balance due to the financial institutions was repaid in full during fiscal 2013. Secured borrowings amounted to \$10.8 million as of June 30, 2012. Prior to the repayment of secured borrowings, we maintained arrangements with financial institutions for borrowings secured by our installments receivable contracts for which limited recourse existed against us. Under these programs, we and the financial institution negotiated the amount borrowed and interest rate secured by each receivable for each transaction. The customers' payments of the underlying receivables funded the repayment of the related amounts borrowed. We were never required to repurchase the receivables for events of default in accordance with program terms. The collateralized receivables earned interest income, and the secured borrowings accrued borrowing costs at approximately the same interest rate.

Contractual Obligations and Requirements

As of June 30, 2013, our contractual obligations consisted primarily of operating leases for our headquarters and other facilities, and royalties. There were no additional commitments for capital purchases or other expenditures at June 30, 2013.

Our contractual obligations were as follows at June 30, 2013:

	Total	Payments due by Period			
		Less than 1 Year	1 to 3 Years	3 to 5 Years	More than 5 Years
(Dollars in Thousands)					
Contractual Cash Obligations:					
Operating leases	\$ 15,042	\$ 6,857	\$ 7,724	\$ 461	\$
Fixed fee royalty obligations	4,216	1,704	1,982	169	361
Contractual royalty obligations	2,257	2,257			
Other obligations	4,127	1,646	2,437	44	
Total contractual cash obligations	\$ 25,642	\$ 12,464	\$ 12,143	\$ 674	\$ 361
Other Commercial Commitments:					
Standby letters of credit	\$ 1,323	\$ 779	\$ 30	\$ 500	\$ 14
Total commercial commitments	\$ 26,965	\$ 13,243	\$ 12,173	\$ 1,174	\$ 375

The standby letters of credit were issued by Silicon Valley Bank in the United States and secure performance on professional services contracts and rental agreements.

Table of Contents

The above table does not reflect a net liability for uncertain tax positions of \$10.4 million as of June 30, 2013. We estimate that none of this amount will be paid within the next year and we are currently unable to reasonably estimate the timing of payments for the remainder of the liability.

Off-Balance Sheet Arrangements

As of June 30, 2013, we did not have any significant off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Critical Accounting Estimates and Judgments

Our consolidated financial statements are prepared in accordance with GAAP. The preparation of our financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue, expenses and related disclosures. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe that the assumptions and estimates associated with the following critical accounting policies have the greatest potential impact on our consolidated financial statements:

revenue recognition;

accounting for income taxes; and

loss contingencies.

For further information on our significant accounting policies, refer to Note 2 to the Consolidated Financial Statements.

Revenue Recognition

Four basic criteria must be satisfied before software license revenue can be recognized: persuasive evidence of an arrangement between us and an end user; delivery of our product has occurred; the fee for the product is fixed or determinable; and collection of the fee is probable.

Persuasive evidence of an arrangement We use a signed contract as evidence of an arrangement for software licenses and SMS. For professional services we use a signed contract and a work proposal to evidence an arrangement. In cases where both a signed contract and a purchase order are required by the customer, we consider both taken together as evidence of the arrangement.

Delivery of our product Software and the corresponding access keys are generally delivered to customers via disk media with standard shipping terms of Free Carrier, our warehouse (i.e., FCA, named place). Our software license agreements do not contain conditions for acceptance.

Fee is fixed or determinable We assess whether a fee is fixed or determinable at the outset of the arrangement. Significant judgment is involved in making this assessment.

Under our upfront revenue model, we are able to demonstrate that the fees are fixed or determinable for all arrangements, including those for our term licenses that contain extended payment terms. We have an established history of collecting under the terms of these contracts without providing concessions to customers. In addition, we also assess whether a contract modification to an existing term arrangement constitutes a concession. In making this assessment, significant analysis is performed to ensure that no concessions are given. Our software license agreements do not include a right of return or exchange. For license arrangements executed under the upfront revenue model, we recognize

Table of Contents

license revenue upon delivery of the software product, provided all other revenue recognition requirements are met.

We cannot assert that the fees under our aspenONE licensing model and point product arrangements with Premier Plus SMS are fixed or determinable because the rights provided to customers, and the economics of the arrangements, are not comparable to our transactions with other customers under the upfront revenue model. As a result, the amount of revenue recognized for these arrangements is limited by the amount of customer payments that become due.

Collection of fee is probable We assess the probability of collecting from each customer at the outset of the arrangement based on a number of factors, including the customer's payment history, its current creditworthiness, economic conditions in the customer's industry and geographic location, and general economic conditions. If in our judgment collection of a fee is not probable, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met.

Vendor-Specific Objective Evidence of Fair Value

We have established VSOE for certain SMS offerings, professional services, and training, but not for our software products or our Premier Plus SMS offering. We assess VSOE for SMS, professional services, and training, based on an analysis of standalone sales of the offerings using the bell-shaped curve approach. We do not have a history of selling our Premier Plus SMS offering to customers on a standalone basis, and as a result are unable to establish VSOE for this new deliverable.

We allocate the arrangement consideration among the elements included in our multi-element arrangements using the residual method. Under the residual method, the VSOE of the undelivered elements is deferred and the remaining portion of the arrangement fee for perpetual and term licenses is recognized as revenue upon delivery of the software, assuming all other revenue recognition criteria are met. If VSOE does not exist for an undelivered element in an arrangement, revenue is deferred until such evidence does exist for the undelivered elements, or until all elements are delivered, whichever is earlier. Under the upfront revenue model, the residual license fee is recognized upon delivery of the software provided all other revenue recognition criteria were met. Arrangements that qualify for upfront recognition include sales of perpetual licenses, amendments to existing legacy term arrangements and renewals of legacy term arrangements.

Subscription and Software Revenue

Subscription and software revenue consists of product and related revenue from our (i) aspenONE licensing model, including SMS; (ii) point product arrangements with our Premier Plus SMS offering included for the contract term; (iii) legacy arrangements including (a) amendments to existing legacy term arrangements, (b) renewals of legacy term arrangements and (c) legacy arrangements that are being recognized over time as a result of not previously meeting one or more of the requirements for recognition under the upfront revenue model; and (iv) perpetual arrangements.

When a customer elects to license our products under our aspenONE licensing model, our Premier Plus SMS offering is included for the entire term of the arrangement and the customer receives, for the term of the arrangement, the right to any new unspecified future software products and updates that may be introduced into the licensed aspenONE software suite. Due to our obligation to provide unspecified future software products and updates, we are required to recognize revenue ratably over the term of the arrangement, once the other revenue recognition criteria noted above have been met.

Our point product arrangements with Premier Plus SMS include SMS for the term of the arrangement. Since we do not have VSOE for our Premier Plus SMS offering, the SMS element of our point product arrangements is not separable. As a result, revenue associated with point product

Table of Contents

arrangements with Premier Plus SMS included for the contract term is recognized ratably over the term of the arrangement, once the other revenue recognition criteria have been met.

Perpetual license and legacy arrangements do not include the same rights as those provided to customers under the aspenONE licensing model and point product arrangements with Premier Plus SMS. We continue to have VSOE for the legacy SMS offering provided in support of these license arrangements and can therefore separate the undelivered elements. Accordingly, the license fees for perpetual licenses and legacy arrangements continue to be recognized upon delivery of the software products using the residual method, provided all other revenue recognition requirements have been met.

Services and Other

SMS Revenue

SMS revenue includes the maintenance revenue recognized from arrangements for which we continue to have VSOE for the undelivered SMS offering (legacy SMS offering). For arrangements sold with our legacy SMS offering, SMS renewals are at the option of the customer, and the fair value of SMS is deferred and subsequently amortized over the contractual term of the SMS arrangement.

For arrangements executed under the aspenONE licensing model and beginning in fiscal 2012 for point product arrangements with Premier Plus SMS, we have not established VSOE for the SMS deliverable. As a result, the revenue related to the SMS element of these transactions is reported in subscription and software revenue in the consolidated statements of operations. Prior to fiscal 2012, the revenue related to the SMS deliverable of our point product arrangements, for which we had VSOE, was reported in services and other revenue in the consolidated statements of operations.

We expect legacy SMS revenue to continue to decrease as additional customers transition to our aspenONE licensing model. Beginning in fiscal 2014, we expect that SMS revenue will represent less than 10% of our total revenue, at which time we will include legacy SMS revenue in the subscription and software line in our consolidated statements of operations.

Professional Services Revenue

Professional services are provided to customers on a time-and-materials (T&M) or fixed-price basis. We recognize professional services fees for our T&M contracts based upon hours worked and contractually agreed-upon hourly rates. Revenue from fixed-price engagements is recognized using the proportional performance method based on the ratio of costs incurred to the total estimated project costs. Project costs are typically expensed as incurred. The use of the proportional performance method is dependent upon our ability to reliably estimate the costs to complete a project. We use historical experience as a basis for future estimates to complete current projects. Additionally, we believe that costs are the best available measure of performance. Out-of-pocket expenses which are reimbursed by customers are recorded as revenue.

In certain circumstances, professional services revenue may be recognized over a longer time period than that which the services are performed. If the costs to complete a project are not estimable or the completion is uncertain, the revenue is recognized upon completion of the services. In circumstances in which professional services are sold as a single arrangement with, or in contemplation of, a new aspenONE license or point product arrangement with Premier Plus SMS, revenue is deferred and recognized on a ratably basis over the longer of (i) the period the services are performed, or (ii) the license term. When we provide professional services considered essential to the functionality of the software, we recognize the combined revenue from the sale of the software and related services using the completed contract or percentage-of-completion method.

Table of Contents

We have occasionally been required to commit unanticipated additional resources to complete projects, which resulted in losses on those contracts. Provisions for estimated losses on contracts are made during the period in which such losses become probable and can be reasonably estimated.

Accounting for Income Taxes

We utilize the asset and liability method of accounting for income taxes in accordance with ASC 740. Under this method, deferred tax assets and liabilities are determined based on temporary differences between the financial reporting and tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using the enacted tax rates and statutes that will be in effect when the differences are expected to reverse. Deferred tax assets can result from unused operating losses, research and development (R&D) and foreign tax credit carryforwards and deductions recorded for financial statement purposes prior to them being deductible on a tax return.

The realization of deferred tax assets is dependent upon the generation of future taxable income and the reversal of taxable temporary differences. Valuation allowances are provided against net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Significant management judgment is required in determining any valuation allowance recorded against deferred tax assets. We consider, among other available information, projected future taxable income, limitations on the availability of net operating loss (NOLs) and tax credit carryforwards, scheduled reversals of deferred tax liabilities and other evidence assessing the potential realization of deferred tax assets. Adjustments to the valuation allowance are included in the provision for (benefit from) income taxes in our consolidated statements of operations in the period they become known or can be estimated.

A significant portion of our U.S. valuation allowance was released in the fourth quarter of fiscal year 2011. Based on the current forecast, we expect that we will utilize all of our U.S. Federal NOLs, foreign tax credits, and R&D credits by fiscal 2016, based on a "with and without" approach. We have retained a full valuation allowance in the U.S. for the deferred tax asset related to capital losses. We also have a valuation allowance on certain foreign subsidiary's NOL carryforwards.

Our provision for (benefit from) income taxes includes amounts determined under the provisions of FIN 48, *Uncertainty in Income Taxes—an Interpretation of FASB Statement No 109*, (currently included as provisions of ASC 740), and is intended to satisfy additional income tax assessments, including interest and penalties, that could result from any tax return positions for which the likelihood of sustaining the position on an audit does not meet a threshold of "more likely than not." Penalties and interest are recorded as a component of our provision for (benefit from) income taxes. Tax liabilities under FIN 48 were recorded as a component of our income taxes payable and other non-current liabilities. The ultimate amount of taxes due will not be known until examinations are completed and settled or the audit periods are closed by statutes.

Our U.S. and foreign tax returns are subject to periodic compliance examinations by various local and national tax authorities through periods defined by the tax code in applicable jurisdictions. The years prior to 2007 are closed in the United States, although the utilization of net operating loss carryforwards and tax credits generated in earlier periods will keep these periods open for examination. Similarly, the years prior to 2010 are closed in the United Kingdom, although the utilization of net operating loss carryforwards generated in earlier periods will keep the periods open for examination. Our Canadian subsidiaries are subject to audit from 2007 forward, and certain other of our international subsidiaries are subject to audit from 2003 forward. In connection with examinations of tax filings, tax contingencies can arise from differing interpretations of applicable tax laws and regulations relative to the amount, timing or proper inclusion or exclusion of revenue and expenses in taxable income or loss. For periods that remain subject to audit, we have asserted and unasserted potential assessments that are subject to final tax settlements.

Table of Contents

Loss Contingencies

The outcomes of legal proceedings and claims brought against us are subject to significant uncertainty. We accrue estimated liabilities for loss contingencies arising from claims, assessments, litigation and other sources when it is probable that a liability has been incurred and the amount of the claim, assessment or damages can be reasonably estimated. Disclosure of a contingency is required if there is at least a reasonable possibility that a loss has been incurred. In determining whether a loss should be accrued we evaluate, among other factors, the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the loss amount. Change in these factors could materially impact our consolidated financial statements.

Under the terms of substantially all of our license agreements, we have agreed to indemnify customers for costs and damages arising from claims against such customers based on, among other things, allegations that our software products infringe the intellectual property rights of a third party. In most cases, in the event of an infringement claim, we retain the right to procure for the customer the right to continue using the software product or to replace or modify the software product to eliminate the infringement while providing substantially equivalent functionality. These indemnification provisions are accounted for in accordance with ASC Topic 460, *Guarantees*. In most cases, and where legally enforceable, the indemnification refund is limited to the amount of the license fees paid by the customer.

Recently Adopted Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. ASU No. 2013-02 requires entities to present by component significant amounts reclassified out of accumulated other comprehensive income either on the face of the statement where net income is presented or in the notes to the financial statements. ASU No. 2013-02 is effective for annual and interim periods beginning after December 31, 2012 and should be applied prospectively. We adopted ASU No. 2013-02 during fiscal 2013. The adoption of ASU No. 2013-02 did not have a material effect on our financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. ASU No. 2011-05 eliminates the option of presenting components of other comprehensive income as a part of the statement of changes in stockholders' equity. ASU No. 2011-05 requires entities to present all non-owner changes in stockholders' equity either on the face of the financial statements or in the notes. The non-owner changes in stockholders' equity are required to be presented on the face of the financial statements either as a single statement of comprehensive income or as two separate consecutive statements. ASU No. 2011-05 is effective for public entities for annual periods, and interim periods within those years, beginning after December 15, 2011 and should be applied retrospectively. We adopted ASU No. 2011-05 during fiscal 2013. The adoption of ASU No. 2011-05 did not have a material effect on our financial position, results of operations or cash flows.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

In the ordinary course of conducting business, we are exposed to certain risks associated with potential changes in market conditions. These market risks include changes in currency exchange rates and interest rates which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, if considered appropriate, we may enter into derivative financial instruments such as forward currency exchange contracts.

Table of Contents

Foreign Currency Risk

During fiscal 2013 and 2012, 19.1% and 21.6% of our total revenue was denominated in a currency other than the U.S. dollar. In addition, certain of our operating costs incurred outside the United States are denominated in currencies other than the U.S. dollar. We conduct business on a worldwide basis and as a result, a portion of our revenue, earnings, net assets, and net investments in foreign affiliates is exposed to changes in foreign currency exchange rates. We measure our net exposure for cash balance positions and for cash inflows and outflows in order to evaluate the need to mitigate our foreign exchange risk. We may enter into foreign currency forward contracts to minimize the impact related to unfavorable exchange rate movements, although we have not done so during fiscal 2013 and fiscal 2012. Our largest exposures to foreign currency exchange rates exist primarily with the Euro, Pound Sterling, Canadian Dollar, and Japanese Yen.

During fiscal 2013 and fiscal 2012, we recorded \$1.2 million and \$3.7 million of net foreign currency exchange losses related to the settlement and remeasurement of transactions denominated in currencies other than the functional currency of our operating units. Our analysis of operating results transacted in various foreign currencies indicated that a hypothetical 10% change in the foreign currency exchange rates could have increased or decreased the consolidated results of operations by approximately \$5.1 million for fiscal 2013 and by approximately \$4.5 million for fiscal 2012, respectively.

Interest Rate Risk

We do not use derivative financial instruments in our investment portfolio. We place our investments in money market instruments and high quality, investment grade, fixed-income corporate debt securities that meet high credit quality standards, as specified in our investment guidelines.

We mitigate the risks by diversifying our investment portfolio and limiting the amount of investments in debt securities of any single issuer. As of June 30, 2013, our debt securities are short- to intermediate-term investments with maturities ranging from less than 1 month to 19 months.

Our analysis of our investment portfolio and interest rates at June 30, 2013 indicated that a 100 basis point increase or decrease in interest rates would result in a decrease or increase of approximately \$0.8 million in the fair value of our investment portfolio determined in accordance with income-based approach utilizing portfolio future cash flows discounted at the appropriate rates. At June 30, 2012, our investment portfolio consisted of money market instruments which were included in cash and cash equivalents on our Consolidated Balance Sheets.

Item 8. Financial Statements and Supplementary Data.

The following consolidated financial statements specified by this Item, together with the reports thereon of KPMG LLP, are presented following Item 15 of this Form 10-K:

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Table of Contents

Item 9A. Controls and Procedures

a) Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2013. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Securities Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Securities Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of June 30, 2013, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective.

b) Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for our company. Internal control over financial reporting is defined in Rule 13a-15(f) and 15d-15(f) promulgated under the Exchange Act, as a process designed by, or under the supervision of, a company's principal executive and principal financial officers and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made in accordance with authorizations of management and directors of the company; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, including our chief executive officer and chief financial officer, assessed the effectiveness of our internal control over financial reporting as of June 30, 2013 and concluded that, as of June 30, 2013, our internal control over financial reporting was effective.

Table of Contents

KPMG LLP, our independent registered public accounting firm, has audited our consolidated financial statements and the effectiveness of our internal control over financial reporting as of June 30, 2013. This report appears below.

c) *Changes in Internal Control over Financial Reporting*

As previously reported in Item 9A of our Annual Report on Form 10-K for the year ended June 30, 2012, we reported the following material weakness in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act):

Inadequate and ineffective controls over income tax accounting and disclosure.

As a result of that material weakness in our internal control over financial reporting, our principal financial officer concluded that our internal control over financial reporting was not effective as of June 30, 2012.

During the quarter ended June 30, 2013, no changes (other than those in conjunction with certain remediation efforts described below) were identified in our internal control over financial reporting that materially affected, or were reasonably likely to materially affect, our internal control over financial reporting.

d) *Remediation Efforts*

We determined that the following material weakness (reported in our Annual Report on Form 10-K for the year ended June 30, 2012) was remediated as of June 30, 2013:

Inadequate and ineffective controls over income tax accounting and disclosure

The remediation efforts taken during fiscal 2013, which were evidenced in the fourth quarter, included the following:

Enhanced tax accounting processes and related controls;

Increased capabilities of tax professionals to ensure that our accounting for income taxes and related disclosures can be completed accurately and in a timely manner;

Utilized third-party professionals to review and validate work performed by management in the preparation of our provision for income taxes; and

Utilized third-party subject matter experts to assist us in determining the appropriate accounting for material and complex tax transactions.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Aspen Technology, Inc.:

We have audited Aspen Technology, Inc.'s and subsidiaries (the "Company") internal control over financial reporting as of June 30, 2013, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained in all material respects, effective internal control over financial reporting as of June 30, 2013, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of June 30, 2013 and 2012, and the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three-year period ended June 30, 2013, and our report dated August 15, 2013 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Aspen Technology, Inc.:

We have audited the accompanying consolidated balance sheets of Aspen Technology, Inc. and subsidiaries (the "Company") as of June 30, 2013 and 2012, and the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three-year period ended June 30, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of June 30, 2013 and 2012, and the results of its operations and its cash flows for each of the years in the three-year period ended June 30, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of June 30, 2013, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated August 15, 2013 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Operations

Aspen Technology, Inc., together with its subsidiaries, is a leading global provider of mission-critical process optimization software solutions, which are designed to manage and optimize plant and process design, operational performance, and supply chain planning. Our aspenONE software and related services have been developed for companies in the process industries, which consist of energy, chemicals, engineering and construction, as well as consumer packaged goods, power, metals and mining, pulp and paper, pharmaceuticals and biofuels. Customers use our solutions to improve their competitiveness and profitability by increasing throughput and productivity, reducing operating costs, enhancing capital efficiency, and decreasing working capital requirements. We operate globally in 30 countries as of June 30, 2013.

(2) Significant Accounting Policies

(a) Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Aspen Technology, Inc. and our wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Certain line items in prior period financial statements have been reclassified to conform to currently reported presentations.

(b) Management Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

(c) Cash and Cash Equivalents

Cash and cash equivalents consist of short-term, highly liquid investments with remaining maturities of three months or less when purchased.

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

(d) Marketable Securities

The following table summarizes the fair value, the amortized cost and unrealized holding gains (losses) on our marketable securities as of June 30, 2013:

	Fair Value	Cost	Unrealized Gains	Unrealized Losses
	(Dollars in Thousands)			
U.S. corporate bonds	\$ 57,015	\$ 57,046	\$ 8	\$ (39)
Total short-term marketable securities	\$ 57,015	\$ 57,046	\$ 8	\$ (39)
U.S. corporate bonds	\$ 35,353	\$ 35,402	\$	\$ (49)
Total long-term marketable securities	\$ 35,353	\$ 35,402	\$	\$ (49)

Our marketable securities are classified as available-for-sale and reported at fair value on the consolidated balance sheets. Net unrealized losses are reported as a separate component of accumulated other comprehensive income, net of tax. Realized gains and losses on investments are recognized in earnings as incurred. Our investments consist primarily of investment grade fixed income corporate debt securities with maturity dates ranging from July 2013 through February 2015.

We review our marketable securities for impairment at each reporting period to determine if any of our securities have experienced an other-than-temporary decline in fair value in accordance with the provisions of ASC Topic 320, *Investments Debt and Equity Securities*. We consider factors, such as the length of time and extent to which the market value has been less than the cost, the financial condition and near-term prospects of the issuer and our intent to sell, or whether it is more likely than not we will be required to sell, the investment before recovery of its amortized cost basis. If we believe that other-than-temporary decline in fair value has occurred, we write down investments to fair value and recognize credit losses in earnings and other impairment losses in accumulated other comprehensive income. During fiscal 2013, our marketable securities were not considered other-than-temporarily impaired and, as such, we did not recognize impairment losses during the period then ended. Unrealized losses are attributable to changes in interest rates.

(e) Property and Equipment

Property and equipment are stated at cost. We provide for depreciation and amortization, primarily computed using the straight-line method, by charges to operations in amounts estimated to allocate the cost of the assets over their estimated useful lives, as follows:

Asset Classification	Estimated Useful Life
Computer equipment	3 years
Purchased software	3 - 5 years
Furniture and fixtures	3 - 10 years
Leasehold improvements	Life of lease or asset, whichever is shorter

Depreciation expense was \$3.4 million, \$3.5 million and \$3.8 million for fiscal 2013, 2012 and 2011, respectively.

(f) Revenue Recognition

Overview of Licensing Model Changes

Transition to the aspenONE Licensing Model

Prior to fiscal 2010, we offered term or perpetual licenses to specific products, or specifically defined sets of products, which we refer to as point products. The majority of our license revenue was recognized under an "upfront revenue model," in which the net present value of the aggregate license fees was recognized as revenue upon shipment of the point products. Customers typically received one year of post-contract software maintenance and support, or SMS, with their license agreements and then could elect to renew SMS annually. Revenue from SMS was recognized ratably over the period in which the SMS was delivered.

In fiscal 2010, we introduced the following changes to our licensing model:

- (i) We began offering our aspenONE software on a subscription basis, allowing our customers access to all products within a licensed suite (aspenONE Engineering or aspenONE Manufacturing and Supply Chain). SMS is included for the entire term of the arrangement and customers are entitled to any software products or updates introduced into the licensed suite. We refer to this license arrangement as our aspenONE licensing model.
- (ii) We began to include SMS for the entire term on our point product term arrangements.

Revenue related to our aspenONE licensing model is recognized over the term of the arrangement on a ratable basis. During fiscal 2010 and 2011, license revenue related to our point product arrangements with SMS included for the entire term of the arrangement was generally recognized on the due date of each annual installment, provided all revenue recognition criteria were met. Beginning in fiscal 2012, with the introduction of our Premier Plus SMS offering, we were unable to establish evidence of the fair value for the SMS component, and revenue from these arrangements is now recognized on a ratable basis.

The changes to our licensing model introduced in fiscal 2010 did not change the method or timing of customer billings or cash collections. Since the introduction of these changes, our net cash provided by operating activities has increased in each annual period from \$33.0 million in fiscal 2009 to \$146.6 million in fiscal 2013. During these periods we have realized steadily improving cash flow due to growth of our portfolio of term license contracts, as well as from the renewal of customer contracts, on an installment basis, that were previously paid upfront.

Impact of Licensing Model Changes

The principal accounting implications of the changes to our licensing model in fiscal 2010 are as follows:

Prior to fiscal 2010, the majority of our license revenue was recognized on an upfront basis. Since the upfront model resulted in the net present value of multiple years of future installments being recognized at the time of shipment, the changes to our licensing model resulted in a significant reduction in our software license revenue for fiscal 2010, 2011 and 2012 as compared to the fiscal years preceding our licensing model changes. These changes did not impact the

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

incurrence or timing of our expenses, and there was no corresponding expense reduction to offset the lower revenue, resulting in operating losses for fiscal 2010, 2011 and 2012.

The SMS component of our services and other revenue has decreased, and been offset by a corresponding increase in subscription and software revenue as customers have transitioned to our aspenONE licensing model. Under our aspenONE licensing model and for point product arrangements with Premier Plus SMS included for the full contract term, the entire arrangement fee, including the SMS component, is included within subscription and software revenue.

Installment payments from aspenONE agreements and from point product arrangements with SMS included for the contract term are not considered fixed or determinable, and as a result, are not included in installments receivable. Accordingly, our installments receivable balance has decreased as licenses previously executed under our upfront revenue model reached the end of their terms.

The amount of our deferred revenue has increased as more revenue from our term license portfolio has been recognized on a ratable basis.

Introduction of our Premier Plus SMS Offering

Beginning in fiscal 2012, we introduced our Premier Plus SMS offering to provide more value to our customers. As part of this offering, customers receive 24x7 support, faster response times, dedicated technical advocates and access to web-based training modules. The Premier Plus SMS offering is only provided to customers that commit to SMS for the entire term of the arrangement. Our annually renewable legacy SMS offering continues to be available to customers with legacy term and perpetual license agreements.

The introduction of our Premier Plus SMS offering in fiscal 2012 resulted in a change to the revenue recognition of point product arrangements that include Premier Plus SMS for the term of the arrangement. Since we do not have vendor-specific objective evidence of fair value, or VSOE, for our Premier Plus SMS offering, the SMS element of our point product arrangements is not separable, resulting in revenue being recognized ratably over the term of the arrangement, once the other revenue recognition criteria have been met. Prior to fiscal 2012, license revenue was recognized on the due date of each annual installment, provided all revenue recognition criteria were met. The introduction of our Premier Plus SMS offering did not change the revenue recognition for our aspenONE licensing arrangements.

Revenue Recognition

We generate revenue from the following sources: (1) licensing software products; (2) providing SMS and training; and (3) providing professional services. We sell our software products to end users under fixed-term and perpetual licenses. As a standard business practice, we offer extended payment term options for our fixed-term license arrangements, which are generally payable on an annual basis. Certain of our fixed-term license agreements include product mixing rights that allow customers the flexibility to change or alternate the use of multiple products included in the license arrangement after those products are delivered to the customer. We refer to these arrangements as token arrangements. Tokens are fixed units of measure. The amount of software usage is limited by the number of tokens purchased by the customer.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

Four basic criteria must be satisfied before software license revenue can be recognized: persuasive evidence of an arrangement between us and an end user; delivery of our product has occurred; the fee for the product is fixed or determinable; and collection of the fee is probable.

Persuasive evidence of an arrangement We use a signed contract as evidence of an arrangement for software licenses and SMS. For professional services we use a signed contract and a work proposal to evidence an arrangement. In cases where both a signed contract and a purchase order are required by the customer, we consider both taken together as evidence of the arrangement.

Delivery of our product Software and the corresponding access keys are generally delivered to customers via disk media with standard shipping terms of Free Carrier, our warehouse (i.e., FCA, named place). Our software license agreements do not contain conditions for acceptance.

Fee is fixed or determinable We assess whether a fee is fixed or determinable at the outset of the arrangement. Significant judgment is involved in making this assessment.

Under our upfront revenue model, we are able to demonstrate that the fees are fixed or determinable for all arrangements, including those for our term licenses that contain extended payment terms. We have an established history of collecting under the terms of these contracts without providing concessions to customers. In addition, we also assess whether a contract modification to an existing term arrangement constitutes a concession. In making this assessment, significant analysis is performed to ensure that no concessions are given. Our software license agreements do not include a right of return or exchange. For license arrangements executed under the upfront revenue model, we recognize license revenue upon delivery of the software product, provided all other revenue recognition requirements are met.

We cannot assert that the fees under our aspenONE licensing model and point product arrangements with Premier Plus SMS are fixed or determinable because the rights provided to customers, and the economics of the arrangements, are not comparable to our transactions with other customers under the upfront revenue model. As a result, the amount of revenue recognized for these arrangements is limited by the amount of customer payments that become due.

Collection of fee is probable We assess the probability of collecting from each customer at the outset of the arrangement based on a number of factors, including the customer's payment history, its current creditworthiness, economic conditions in the customer's industry and geographic location, and general economic conditions. If in our judgment collection of a fee is not probable, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met.

Vendor-Specific Objective Evidence of Fair Value

We have established VSOE for certain SMS offerings, professional services, and training, but not for our software products or our Premier Plus SMS offering. We assess VSOE for SMS, professional services, and training, based on an analysis of standalone sales of the offerings using the bell-shaped curve approach. During fiscal 2011, we used optional renewals of SMS on our legacy term license arrangements to support VSOE for SMS included in our fixed term point product arrangements which include SMS for the term of the arrangement. We do not have a history of selling our Premier Plus SMS offering to customers on a standalone basis, and as a result are unable to establish VSOE for this new deliverable.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

We allocate the arrangement consideration among the elements included in our multi-element arrangements using the residual method. Under the residual method, the VSOE of the undelivered elements is deferred and the remaining portion of the arrangement fee for perpetual and term licenses is recognized as revenue upon delivery of the software, assuming all other revenue recognition criteria are met. If VSOE does not exist for an undelivered element in an arrangement, revenue is deferred until such evidence does exist for the undelivered elements, or until all elements are delivered, whichever is earlier. Under the upfront revenue model, the residual license fee is recognized upon delivery of the software provided all other revenue recognition criteria were met. Arrangements that qualify for upfront recognition include sales of perpetual licenses, amendments to existing legacy term arrangements and renewals of legacy term arrangements.

Subscription and Software Revenue

Subscription and software revenue consists of product and related revenue from our (i) aspenONE licensing model, including SMS; (ii) point product arrangements with our Premier Plus SMS offering included for the contract term; (iii) legacy arrangements including (a) amendments to existing legacy term arrangements, (b) renewals of legacy term arrangements and (c) legacy arrangements that are being recognized over time as a result of not previously meeting one or more of the requirements for recognition under the upfront revenue model; and (iv) perpetual arrangements.

When a customer elects to license our products under our aspenONE licensing model, our Premier Plus SMS offering is included for the entire term of the arrangement and the customer receives, for the term of the arrangement, the right to any new unspecified future software products and updates that may be introduced into the licensed aspenONE software suite. Due to our obligation to provide unspecified future software products and updates, we are required to recognize revenue ratably over the term of the arrangement, once the other revenue recognition criteria noted above have been met.

Our point product arrangements with Premier Plus SMS include SMS for the term of the arrangement. Since we do not have VSOE for our Premier Plus SMS offering, the SMS element of our point product arrangements is not separable. As a result, revenue associated with point product arrangements with Premier Plus SMS included for the contract term is recognized ratably over the term of the arrangement, once the other revenue recognition criteria have been met.

Perpetual license and legacy arrangements do not include the same rights as those provided to customers under the aspenONE licensing model and point product arrangements with Premier Plus SMS. We continue to have VSOE for the legacy SMS offering provided in support of these license arrangements and can therefore separate the undelivered elements. Accordingly, the license fees for perpetual licenses and legacy arrangements continue to be recognized upon delivery of the software products using the residual method, provided all other revenue recognition requirements have been met.

Results of Operations Classification Subscription and Software Revenue

Prior to fiscal 2012, subscription and software revenue were each classified separately on our consolidated statements of operations, because each type of revenue had different revenue recognition characteristics, and the amount of revenue attributable to each was material in relation to our total revenue. Additionally, we were able to separate the residual amount of software revenue related to the

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

software component of our point product arrangements which included SMS for the contract term, based on the VSOE for the SMS element.

As a result of the introduction of our Premier Plus SMS offering in the first quarter of fiscal 2012, the substantial majority of our product-related revenue is now recognized on a ratable basis, over the term of the arrangement. Since the distinction between subscription and point product ratable revenue does not represent a meaningful difference from either a line of business or revenue recognition perspective, we have combined our subscription and software revenue into a single line item on our consolidated statements of operations beginning in the first quarter of fiscal 2012.

The following table summarizes the changes to our revenue classifications and the timing of revenue recognition of subscription and software revenue for fiscal 2013 and 2012 compared to fiscal 2011. Ratable revenue refers to product revenue that is recognized evenly over the term of the related agreement, beginning when the first payment becomes due. The residual method refers to the recognition of the difference between the total arrangement fee and the undiscounted VSOE for the undelivered element, assuming all other revenue recognition requirements have been met.

	Revenue Classification in Income Statement		Revenue Recognition Methodology	
	Fiscal 2013 and 2012	Fiscal 2011	Fiscal 2013 and 2012	Fiscal 2011
Type of Revenue:				
aspenONE subscription	Subscription and software	Subscription	Ratable	Ratable
Point products				
Software	Subscription and software	Software	Ratable	Residual method
Bundled SMS	Subscription and software	Services and other	Ratable	Ratable
Other				
Legacy arrangements	Subscription and software	Software	Residual method	Residual method
Perpetual arrangements	Subscription and software	Software	Residual method	Residual method

The following tables reconcile the amount of revenue recognized during fiscal 2013, 2012 and 2011, based on the revenue recognition methodology. As illustrated below, the introduction of our Premier Plus SMS offering in the first quarter of fiscal 2012 has resulted in a substantial majority of our subscription and software revenue being recognized on a ratable basis in fiscal 2013 and 2012.

	Year Ended, June 30			Year Ended, June 30		
	2013	2012	2011	2013	2012	2011
	(Dollars in Thousands)			% of Total		
Subscription and software revenue:						
Ratable(1)	\$ 225,064	\$ 144,144	\$ 58,459	93.9%	86.5%	56.4%
Residual method(2)	14,590	22,544	45,240	6.1	13.5	43.6
Subscription and software revenue	\$ 239,654	\$ 166,688	\$ 103,699	100.0%	100.0%	100.0%

(1)

During fiscal 2011, the fair value of the SMS element of point product arrangements totaled \$2.1 million and was presented in the consolidated statements of operations as services and other revenue. Effective July 1, 2011, the fee attributable to the SMS in point product arrangements is no longer separable since we are unable to establish VSOE, and as a result, is included within ratable revenue.

Effective July 1, 2011, the total combined arrangement fee (which includes the fee attributable to SMS) for point product arrangements with Premier Plus SMS is recognized on a ratable basis.

Services and Other**SMS Revenue**

SMS revenue includes the maintenance revenue recognized from arrangements for which we continue to have VSOE for the undelivered SMS offering (legacy SMS offering). For arrangements sold with our legacy SMS offering, SMS renewals are at the option of the customer, and the fair value of SMS is deferred and subsequently amortized over the contractual term of the SMS arrangement.

For arrangements executed under the aspenONE licensing model or where point product licenses are sold with Premier Plus SMS for the contract term, the customer commits to SMS for the entire term of the arrangement. The revenue related to the SMS component of the aspenONE licensing model is reported in subscription and software revenue in the consolidated statements of operations.

During fiscal 2011, the revenue related to the SMS deliverable of our point product licenses, for which we had VSOE, was reported in services and other revenue in the consolidated statements of operations. Beginning in fiscal 2012, we introduced a Premier Plus SMS offering to provide more value to our customers. We have not established VSOE for the Premier Plus SMS deliverable. As a result, the revenue related to the SMS element of these transactions is reported in subscription and software revenue in the consolidated statements of operations.

Professional Services Revenue

Professional services are provided to customers on a time-and-materials (T&M) or fixed-price basis. We recognize professional services fees for our T&M contracts based upon hours worked and contractually agreed-upon hourly rates. Revenue from fixed-price engagements is recognized using the proportional performance method based on the ratio of costs incurred to the total estimated project costs. Project costs are typically expensed as incurred. The use of the proportional performance method is dependent upon our ability to reliably estimate the costs to complete a project. We use historical experience as a basis for future estimates to complete current projects. Additionally, we believe that costs are the best available measure of performance. Out-of-pocket expenses which are reimbursed by customers are recorded as revenue.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

In certain circumstances, professional services revenue may be recognized over a longer time period than that which the services are performed. If the costs to complete a project are not estimable or the completion is uncertain, the revenue is recognized upon completion of the services. In circumstances in which professional services are sold as a single arrangement with, or in contemplation of, a new aspenONE license or point product arrangement with Premier Plus SMS, revenue is deferred and recognized on a ratable basis over the longer of (i) the period the services are performed, or (ii) the license term. When we provide professional services considered essential to the functionality of the software, we recognize the combined revenue from the sale of the software and related services using the completed contract or percentage-of-completion method.

We have occasionally been required to commit unanticipated additional resources to complete projects, which resulted in losses on those contracts. Provisions for estimated losses on contracts are made during the period in which such losses become probable and can be reasonably estimated.

Deferred Revenue

Deferred revenue includes amounts billed or collected in advance of revenue recognition, including arrangements under the aspenONE licensing model, point product arrangements with Premier Plus SMS, legacy SMS offering, professional services, and training. Under the aspenONE licensing model and for point product arrangements with Premier Plus SMS, VSOE does not exist for the undelivered elements, and as a result the arrangement fees are recognized ratably (i.e., on a subscription basis) over the term of the license, and deferred revenue is recorded as each invoice becomes due.

For arrangements under the upfront revenue model, a portion of the arrangement fee is generally recorded as deferred revenue due to the inclusion of an undelivered element, typically our legacy SMS offering or professional services. The amount of revenue allocated to undelivered elements is based on the VSOE for those elements using the residual method, and is earned and recognized as revenue as each element is delivered.

Other Licensing Matters

Our standard licensing agreements include a product warranty provision. We have not experienced significant claims related to software warranties beyond the scope of SMS support, which we are already obligated to provide, and consequently, we have not established reserves for warranty obligations.

Our agreements with our customers generally require us to indemnify the customer against claims that our software infringes third-party patent, copyright, trademark or other proprietary rights. Such indemnification obligations are generally limited in a variety of industry-standard respects, including our right to replace an infringing product. As of June 30, 2013, we had not experienced any material losses related to these indemnification obligations and no claims with respect thereto were outstanding. We do not expect significant claims related to these indemnification obligations, and consequently, have not established any related reserves.

(g) Installments Receivable

Installments receivable resulting from product sales under the upfront revenue model are discounted to present value at prevailing market rates at the date the contract is signed, taking into

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

consideration the customer's credit rating. The finance element is recognized using the effective interest method over the relevant license term and is classified as interest income. Installments receivable are classified as current and non-current in our consolidated balance sheets based on the maturity date of the related installment. Non-current installments receivable consist of receivables with a due date greater than one year from the period-end date. Current installments receivable consist of invoices with a due date of less than one year but greater than 45 days from the period-end date. Once an installments receivable invoice becomes due within 45 days, it is reclassified as a trade accounts receivable in our consolidated balance sheets. As a result, we did not have any past due installments receivable as of June 30, 2013.

Our non-current installments receivable are within the scope of Accounting Standards Update (ASU) No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*. As our portfolio of financing receivables arises from the sale of our software licenses, the methodology for determining our allowance for doubtful accounts is based on the collective population of receivables and is not stratified by class or portfolio segment. We consider factors such as existing economic conditions, country risk, and customers' credit rating and past payment history in determining our allowance for doubtful accounts. We reserve against our installments receivable when the related trade accounts receivable have been past due for over a year, or when there is a specific risk of uncollectability. Our specific reserve reflects the full value of the related installments receivable for which collection has been deemed uncertain. Our specific reserve represented 96% and 89% of our total installments receivable allowance for doubtful accounts at June 30, 2013 and June 30, 2012, respectively. In instances when an installment receivable that is reserved ages into a trade account receivable, the related reserve is transferred to our trade accounts receivable allowance.

We write-off receivables when they are considered uncollectable based on our judgment. In instances when we write-off specific customers' trade accounts receivable, we also write off any related current and non-current installments receivable balances.

As of June 30, 2013, our gross current and non-current installments receivable of \$14.4 million and \$1.1 million are presented net of unamortized discounts of \$0.6 million and \$0.1 million and net of allowance for doubtful accounts of less than \$0.1 million, respectively.

As of June 30, 2012, our gross current and non-current installments receivable of \$35.0 million and \$15.9 million are presented net of unamortized discounts of \$1.6 million and \$1.8 million, and net of allowance for doubtful accounts of \$0.2 million and less than \$0.1 million, respectively.

Provisions for bad debts, receivables write offs and recoveries of receivables previously written off were not significant during fiscal 2013 and fiscal 2012, respectively. Transfers to allowance for doubtful accounts related to trade accounts receivable were not significant during fiscal 2013 and amounted to \$0.8 million during fiscal 2012. Our allowance for doubtful accounts for current and non-current installments receivable was \$0.8 million and \$0.1 million as of June 30, 2011.

Under the aspenONE licensing model and for point product arrangements with Premier Plus SMS included for the contract term, the installment payments are not considered fixed or determinable and, as a result, are not included as installments receivable on our consolidated balance sheet.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

(h) Allowance for Doubtful Accounts and Discounts

We make judgments as to our ability to collect outstanding receivables and provide allowances for the portion of receivables when a loss is reasonably expected to occur. The allowance for doubtful accounts is established to represent the best estimate of the net realizable value of the outstanding accounts receivable. The development of the allowance for doubtful accounts is based on a review of past due amounts, historical write-off and recovery experience, as well as aging trends affecting specific accounts and general operational factors affecting all accounts. In addition, factors are developed utilizing historical trends in bad debts, returns and allowances.

We consider current economic trends when evaluating the adequacy of the allowance for doubtful accounts. If circumstances relating to specific customers change or unanticipated changes occur in the general business environment, our estimates of the recoverability of receivables could be further adjusted.

The following table presents our allowance for doubtful accounts activity for accounts receivable in fiscal 2013 and 2012, respectively:

	Year Ended June 30,	
	2013	2012
	(Dollars in Thousands)	
Balance, beginning of year	\$ 1,982	\$ 1,884
Provision for bad debts	521	567
Write-offs	(888)	(468)
Balance, end of year	\$ 1,615	\$ 1,982

The following table summarizes our accounts receivable, net of the related allowance for doubtful accounts, as of June 30, 2013 and 2012. Collateralized receivables are presented in the consolidated balance sheets and in the table below as of June 30, 2012, net of discounts for future interest established at inception of the installment arrangement.

	Gross	Unamortized Discounts	Allowance	Net
	(Dollars in Thousands)			
June 30, 2013:				
Accounts Receivable	\$ 38,603	\$	\$ 1,615	\$ 36,988
	\$ 38,603	\$	\$ 1,615	\$ 36,988
June 30, 2012:				
Accounts Receivable	\$ 33,432	\$	\$ 1,982	\$ 31,450
Collateralized Receivables- current	6,500	203		6,297
	\$ 39,932	\$ 203	\$ 1,982	\$ 37,747

Collateralized receivables were collected in full or repurchased during the second quarter of fiscal 2013. Repurchased receivables, net of discounts for future interest, were reclassified into accounts receivable or installments receivable during the period then ended.

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

(i) *Fair Value of Financial Instruments*

We determine fair value of financial and non-financial assets and liabilities in accordance with provisions of ASC Topic 820, *Fair Value Measurements and Disclosures* (ASC 820). ASC 820 defines fair value as the price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants. ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities, and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for an asset or a liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for an asset or a liability (such as interest rates, yield curves, volatilities, prepayment speeds, credit risks, etc.), or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs Unobservable inputs for determining fair values of assets or liabilities that reflect an entity's own assumptions in pricing assets or liabilities.

Cash Equivalents. Cash equivalents are reported at fair value utilizing quoted market prices in identical markets, or "Level 1 Inputs." Our cash equivalents consist of short-term, highly liquid investments with remaining maturities of three months or less when purchased.

Marketable Securities. Marketable securities are reported at fair value calculated in accordance with the market approach, utilizing market consensus pricing models with quoted prices that are directly or indirectly observable, or "Level 2" inputs.

Financial instruments not measured or recorded at fair value in the accompanying consolidated balance sheets consist of accounts receivable, installments receivable, collateralized receivables, accounts payable and secured borrowings. The estimated fair value of accounts receivable, installments receivable, collateralized receivables and accounts payable approximates their carrying value. The estimated fair value of secured borrowings exceeded the carrying value by \$0.2 million as of June 30, 2012. Secured borrowings were repaid in full or repurchased during fiscal 2013. The fair value of secured borrowings was calculated using the market approach, utilizing interest rates that were indirectly observable in markets for similar liabilities, or "Level 2 Inputs."

The following table summarizes financial assets and financial liabilities measured and recorded at fair value on a recurring basis in the accompanying consolidated balance sheets as of June 30, 2013 and

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

Fair Value Measurements at Reporting Date Using,		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
(Dollars in Thousands)		
June 30, 2013:		
Assets:		
Cash equivalents	\$ 117,010	\$
Marketable securities		92,368
June 30, 2012:		
Assets:		
Cash equivalents	\$ 144,009	\$
Liabilities:		
Secured borrowings		10,939

At June 30, 2013 and 2012, we did not have any assets or liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3).

Certain non-financial assets, including goodwill, finite-lived intangible assets and other non-financial long-lived assets, are measured at fair value using market and income approaches on a non-recurring basis when there is an indication of impairment.

(j) Computer Software Development Costs

Certain computer software development costs are capitalized in the accompanying consolidated balance sheets. Capitalization of computer software development costs begins upon the establishment of technological feasibility. We define the establishment of technological feasibility as the completion of a detailed program design. Amortization of capitalized computer software development costs is provided on a product-by-product basis using the greater of (a) the amount computed using the ratio that current gross revenue for a product bears to total of current and anticipated future gross revenue for that product or (b) the straight-line method, beginning upon commercial release of the product, and continuing over the remaining estimated economic life of the product, not to exceed three years.

Software for internal use is capitalized in accordance with ASC Topic 350-40, *Intangibles Goodwill and Other Internal Use Software*. At each balance sheet date, we evaluate the unamortized capitalized software costs for potential impairment by comparing the balance to the net realizable value of the products. Total computer software costs capitalized were \$1.2 million, \$0.5 million and \$2.0 million during the years ended June 30, 2013, 2012 and 2011, respectively. Total amortization expense charged to operations was approximately \$1.1 million, \$1.6 million and \$1.5 million for the years ended June 30, 2013, 2012 and 2011, respectively. Computer software development accumulated amortization totaled \$71.5 million, \$70.5 million and \$68.9 million as of June 30, 2013 and 2012, respectively.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

(k) Foreign Currency Translation

The determination of the functional currency of subsidiaries is based on the subsidiaries' financial and operational environment and is the local currency of the subsidiary. Gains and losses from foreign currency translation related to entities whose functional currency is their local currency are credited or charged to accumulated other comprehensive income included in stockholders' equity in the consolidated balance sheets. In all instances, foreign currency transaction gains or losses are credited or charged to the consolidated statements of operations as incurred as a component of other (expense) income, net. Foreign currency transaction (losses) gains were \$(1.2) million, \$(3.7) million and \$3.3 million in fiscal 2013, 2012 and 2011, respectively.

(l) Net Income (Loss) Per Share

Basic income (loss) per share is determined by dividing net income (loss) by the weighted average common shares outstanding during the period. Diluted income (loss) per share is determined by dividing net income (loss) by diluted weighted average shares outstanding during the period. Diluted weighted average shares reflect the dilutive effect, if any, of potential common shares. To the extent their effect is dilutive, employee equity awards, warrants and other commitments to be settled in common stock are included in the calculation of diluted income (loss) per share based on the treasury stock method.

For the years ended June 30, 2013 and 2011, certain employee equity awards were anti-dilutive based on the treasury stock method. For year ended June 30, 2012, all potential common shares were anti-dilutive due to the net loss. The calculations of basic and diluted net income (loss) per share and basic and diluted weighted average shares outstanding are as follows:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars and Shares in Thousands,		
	Except per Share Data)		
Net income (loss)	\$ 45,262	\$ (13,808)	\$ 10,257
Weighted average shares outstanding	93,586	93,780	93,488
Dilutive impact from:			
Share-based payment awards	1,824		2,313
Warrants			52
Dilutive weighted average shares outstanding	95,410	93,780	95,853
Income (loss) per share			
Basic	\$ 0.48	\$ (0.15)	\$ 0.11
Dilutive	\$ 0.47	\$ (0.15)	\$ 0.11

The following potential common shares were excluded from the calculation of diluted weighted average shares outstanding because their effect would be anti-dilutive at the balance sheet date:

	Year Ended June 30,		
	2013	2012	2011
	(Shares in Thousands)		
Employee equity awards	443	6,554	1,728

[Table of Contents](#)

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

(m) Concentration of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk are principally cash and cash equivalents, marketable securities, accounts receivable and installments receivable. Our cash is held in financial institutions, and our cash equivalents are invested in money market mutual funds that we believe to be of high credit quality. Our investments in marketable securities consist primarily of investment grade fixed income corporate debt securities with maturities ranging from less than one month to 19 months. We reduce the risk by diversifying our investment portfolio and limiting the amount of investments in debt securities of any single issuer.

Concentration of credit risk with respect to receivables is limited to certain customers to which we make substantial sales. To reduce risk, we assess the financial strength of our customers. We do not require collateral or other security in support of our receivables. As of June 30, 2013, one customer receivable balance represented approximately 11% of our total receivables.

*(n) Intangible Assets, Goodwill and Long-Lived Assets**Intangible Assets:*

We include in our amortizable intangible assets those intangible assets acquired in our business and asset acquisitions. We amortize acquired intangible assets with finite lives over their estimated economic lives, generally using the straight-line method. Each period, we evaluate the estimated remaining useful lives of acquired intangible assets to determine whether events or changes in circumstances warrant a revision to the remaining period of amortization. Acquired intangibles are removed from the accounts when fully amortized and no longer in use.

Intangible assets consist of the following as of June 30, 2013 and 2012:

	Gross Carrying Amount	Accumulated Amortization	Effect of currency translation	Net Carrying Amount	Weighted Average Remaining Life (in Years)
(Dollars in Thousands)					
June 30, 2013:					
Technology and patents	\$ 2,596	\$ (977)	\$ 172	\$ 1,791	2.0
Total	\$ 2,596	\$ (977)	\$ 172	\$ 1,791	2.0
June 30, 2012:					
Technology and patents	\$ 1,330	\$ (139)	\$ (84)	\$ 1,107	2.7
Total	\$ 1,330	\$ (139)	\$ (84)	\$ 1,107	2.7

Amortization expense for technology and patents is included in operating expenses and amounted to \$0.7 million and \$0.1 million in fiscal 2013 and 2012, respectively. We did not have any acquired intangible assets as of June 30, 2011 and therefore there was no acquired intangible asset amortization expense in fiscal 2011. Amortization expense is expected to approximate \$0.9 million, \$0.7 million and \$0.1 million for fiscal 2014, 2015 and 2016, respectively.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

Goodwill:

The changes in the carrying amount of the goodwill by reporting unit for the fiscal years 2013 and 2012 were as follows:

Asset Class	License	Reporting Unit		Total
		SMS, Training, and Other	Professional Services	
(Dollars in Thousands)				
Balance as of June 30, 2011				
Goodwill	\$ 68,049	\$ 16,144	\$ 5,102	\$ 89,295
Accumulated impairment losses	(65,569)		(5,102)	(70,671)
	\$ 2,480	\$ 16,144	\$	\$ 18,624
Acquisitions	\$ 1,641	\$	\$	\$ 1,641
Effect of currency translation	(120)	(746)		(866)
Balance as of June 30, 2012				
Goodwill	\$ 69,570	\$ 15,398	\$ 5,102	\$ 90,070
Accumulated impairment losses	(65,569)		(5,102)	(70,671)
	\$ 4,001	\$ 15,398	\$	\$ 19,399
Effect of currency translation	56	(324)		(267)
Balance as of June 30, 2013				
Goodwill	\$ 69,626	\$ 15,074	\$ 5,102	\$ 89,803
Accumulated impairment losses	(65,569)		(5,102)	(70,671)
	\$ 4,057	\$ 15,074	\$	\$ 19,132

We test goodwill for impairment annually (or more often if impairment indicators arise), at the reporting unit level. We first assess qualitative factors to determine whether the existence of events or circumstances indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If we determine based on this assessment that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, we perform the two-step goodwill impairment test. The first step requires us to determine the fair value of each reporting unit and compare it to the carrying amount, including goodwill, of such reporting unit. If the fair value exceeds the carrying amount, no impairment loss is recognized. However, if the carrying amount of the reporting unit exceeds its fair value, the goodwill of the unit may be impaired. The amount of impairment, if any, is measured based upon the implied fair value of goodwill at the valuation date.

Fair value of a reporting unit is determined using a combined weighted average of a market-based approach (utilizing fair value multiples of comparable publicly traded companies) and an income-based approach (utilizing discounted projected cash flows). In applying the income-based approach, we would be required to make assumptions about the amount and timing of future expected cash flows, growth rates and appropriate discount rates. The amount and timing of future cash flows would be based on our most recent long-term financial projections. The discount rate we would utilize would be determined using estimates of market participant risk-adjusted weighted-average costs of capital and reflect the risks associated with achieving future cash flows.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

We have elected December 31st as the annual impairment assessment date and perform additional impairment tests if triggering events occur. We performed our annual impairment test for each reporting unit as of December 31, 2012 and, based upon the results of our qualitative assessment, determined that it was not likely that their respective fair values were less than their carrying amounts. As such, we did not perform the two-step goodwill impairment test and did not recognize impairment losses as a result of our analysis. If an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value, goodwill will be evaluated for impairment between annual tests. No triggering events indicating goodwill impairment occurred during fiscal 2013 and 2012.

Impairment of Long-Lived Assets:

We evaluate our long-lived assets, which include finite-lived intangible assets, property and leasehold improvements for impairment as events and circumstances indicate that the carrying amount of an asset or a group of assets may not be recoverable. We assess the recoverability of the asset or a group of assets based on the undiscounted future cash flows the asset is expected to generate, and recognize an impairment loss when estimated undiscounted future cash flows expected to result from the use of the asset are less than its carrying value. If an asset or a group of assets are deemed to be impaired, the amount of the impairment loss, if any, represents the excess of the asset's or a group of assets' carrying value compared to their estimated fair values.

(o) Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. Comprehensive income (loss) and its components for fiscal 2013, 2012 and 2011 are disclosed in the accompanying consolidated statements of comprehensive income (loss).

As of June 30, 2013, foreign translation adjustments of \$7.3 million and net unrealized losses on available for sale securities of (\$0.1) million are reported as separate components of accumulated other comprehensive income.

As of June 30, 2012, 2011 and 2010, accumulated other comprehensive income is comprised entirely of foreign translation adjustments of \$8.1 million, \$9.1 million and \$7.5 million, respectively.

(p) Accounting for Stock-Based Compensation

Stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the vesting period.

(q) Accounting for Transfers of Financial Assets

We derecognize financial assets, specifically accounts receivable and installments receivable, when control has been surrendered in compliance with ASC Topic 860, *Transfers and Servicing*. Transfers of accounts receivable and installments receivable that meet the requirements of ASC 860 for sale accounting treatment are removed from the balance sheet and gains or losses on the sale are recognized. If the conditions for sale accounting treatment are not met, or are no longer met, accounts receivable and installments receivable transferred are classified as collateralized receivables in the

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

consolidated balance sheets and cash received from these transactions is classified as secured borrowings. Transaction costs associated with secured borrowings, if any, are treated as borrowing costs and recognized in interest expense. Once payment is received from a customer, the collateralized receivables and related secured borrowing balances are reduced. We had no outstanding secured borrowings and collateralized receivables as of June 30, 2013 since the balance due to the financial institutions was repaid in full during the second quarter of fiscal 2013.

(r) Income Taxes

Deferred income taxes are recognized based on temporary differences between the financial statement and tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using the statutory tax rates and laws expected to apply to taxable income in the years in which the temporary differences are expected to reverse. Valuation allowances are provided against net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income and the timing of the temporary differences becoming deductible. Management considers, among other available information, scheduled reversals of deferred tax liabilities, projected future taxable income, limitations of availability of net operating loss carryforwards, and other matters in making this assessment.

We do not provide deferred taxes on unremitted earnings of foreign subsidiaries since we intend to indefinitely reinvest either currently or sometime in the foreseeable future. Unrecognized provisions for taxes on undistributed earnings of foreign subsidiaries, which are considered indefinitely reinvested, are not material to our consolidated financial position or results of operations. We are continuously subject to examination by the IRS, as well as various state and foreign jurisdictions. The IRS and other taxing authorities may challenge certain deductions and credits reported by us on our income tax returns. In accordance with provisions of ASC Topic 740, *Income Taxes* (ASC 740), an entity should recognize a tax benefit when it is more-likely-than-not, based on the technical merits, that the position would be sustained upon examination by a taxing authority. The amount to be recognized, if the more-likely-than-not threshold was passed, should be measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Furthermore, any change in the recognition, de-recognition or measurement of a tax position should be recorded in the period in which the change occurs. We account for interest and penalties related to uncertain tax positions as part of the provision for (benefit from) income taxes.

(s) Loss Contingencies

We accrue estimated liabilities for loss contingencies arising from claims, assessments, litigation and other sources when it is probable that a liability has been incurred and the amount of the claim assessment or damages can be reasonably estimated. We believe that we have sufficient accruals to cover any obligations resulting from claims, assessments or litigation that have met these criteria. Refer to Note 9 for discussion of these matters and related liability accruals.

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Significant Accounting Policies (Continued)

(t) Advertising Costs

Advertising costs are expensed as incurred and are classified as sales and marketing expenses. We incurred advertising expenses of \$2.9 million, \$2.2 million and \$3.0 million during fiscal 2013, 2012 and 2011, respectively. We had no prepaid advertising costs included in the accompanying consolidated balance sheets.

(u) Research and Development Expense

We charge research and development expenditures to expense as the costs are incurred. Research and development expenses consist primarily of personnel expenses related to the creation of new products and to enhancements and engineering changes to existing products.

(v) Recently Adopted Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. ASU No. 2013-02 requires entities to present by component significant amounts reclassified out of accumulated other comprehensive income either on the face of the statement where net income is presented or in the notes to the financial statements. ASU No. 2013-02 is effective for annual and interim periods beginning after December 31, 2012 and should be applied prospectively. We adopted ASU No. 2013-02 during fiscal 2013. The adoption of ASU No. 2013-02 did not have a material effect on our financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. ASU No. 2011-05 eliminates the option of presenting components of other comprehensive income as a part of the statement of changes in stockholders' equity. ASU No. 2011-05 requires entities to present all non-owner changes in stockholders' equity either on the face of the financial statements or in the notes. The non-owner changes in stockholders' equity are required to be presented on the face of the financial statements either as a single statement of comprehensive income or as two separate consecutive statements. ASU No. 2011-05 is effective for public entities for annual periods, and interim periods within those years, beginning after December 15, 2011 and should be applied retrospectively. We adopted ASU No. 2011-05 during fiscal 2013. The adoption of ASU No. 2011-05 did not have a material effect on our financial position, results of operations or cash flows.

(3) Restructuring Charges

We have undertaken no restructuring actions during fiscal 2013, 2012, or 2011.

During fiscal 2013, we recorded net restructuring credits of less than \$0.1 million.

During fiscal 2012, we recorded net restructuring credits of \$0.3 million comprised of a credit of \$0.5 million related to changes in the estimates of future operating costs and sublease assumptions, partially offset by \$0.2 million of accretion charges.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(3) Restructuring Charges (Continued)

During fiscal 2011, we recorded net restructuring credits of \$0.2 million comprised of a credit of \$0.6 million related to changes in the estimates of future operating costs and sublease assumptions, partially offset by \$0.4 million of accretion charges.

The following activity was recorded for the indicated years:

	Closure/ Consolidation of Facilities and Contract Termination Costs
	(Dollars in Thousands)
Accrued expenses, June 30, 2010	\$ 8,514
Fiscal 2011 payments	(4,066)
Restructuring charge accretion	354
Change in estimate revised assumption	(601)
Accrued expenses, June 30, 2011	\$ 4,201
Fiscal 2012 payments	(2,998)
Restructuring charge accretion	202
Change in estimate revised assumption	(503)
Accrued expenses, June 30, 2012	\$ 902
Fiscal 2013 payments	(803)
Restructuring charge accretion	17
Change in estimate revised assumption	(22)
Accrued expenses, June 30, 2013	\$ 94

The accrued facility exit costs of \$0.1 million are included in accrued expenses and other current liabilities on the accompanying consolidated balance sheets and are stated at estimated fair value, net of estimated sub-lease income of \$0.5 million. We expect to pay the remaining obligations in connection with vacated facilities over the remaining lease terms, which will expire on various dates through 2017. Anticipated net cash payments to settle these liabilities amount to \$0.1 million at June 30, 2013 and are expected to be made through fiscal 2017.

(4) Secured Borrowings and Collateralized Receivables

We had no outstanding secured borrowings as of June 30, 2013 since the balance due to the financial institutions was repaid in full during fiscal 2013. Prior to the repayment of secured borrowings, we maintained arrangements with financial institutions for borrowings secured by our installments receivable contracts for which limited recourse existed against us. Under these programs, we and the financial institution negotiated the amount borrowed and interest rate secured by each receivable for each transaction. The customers' payments of the underlying receivables funded the repayment of the related amounts borrowed. We were never required to repurchase the receivables for events of default in accordance with program terms. The collateralized receivables earned interest income, and the secured borrowings accrued borrowing costs at approximately the same interest rate. These arrangements were accounted for as secured borrowings.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(4) Secured Borrowings and Collateralized Receivables (Continued)

At June 30, 2012, receivables totaling \$6.3 million were pledged as collateral for the secured borrowings which amounted to \$10.8 million. The collateralized receivables had an implicit interest rate of 8% as of June 30, 2012 and were presented at net present value in the accompanying consolidated balance sheets. We recorded \$0.2 million, \$1.2 million and \$3.2 million of interest income associated with the collateralized receivables during fiscal 2013, 2012 and 2011, respectively, and recognized \$0.3 million, \$3.0 million and \$5.3 million of interest expense associated with the secured borrowings during the periods then ended. Proceeds from and payments on the secured borrowings are presented as components of cash flows from financing activities in the accompanying consolidated statements of cash flows. Reductions of secured borrowings were recognized as financing cash flows upon payment to the financial institutions, and operating cash flows from collateralized receivables were recognized upon customer payments of amounts due.

(5) Supplemental Balance Sheet Information

Property, equipment and leasehold improvements in the accompanying consolidated balance sheets consist of the following:

	Year Ended June 30,	
	2013	2012
	(Dollars in Thousands)	
Property, equipment and leasehold improvements at cost:		
Computer equipment	\$ 11,106	\$ 10,528
Purchased software	21,642	19,905
Furniture & fixtures	4,475	3,615
Leasehold improvements	3,379	3,044
Accumulated depreciation	(32,773)	(30,055)
Property, equipment and leasehold improvements net	\$ 7,829	\$ 7,037

We account for asset retirement obligations in accordance with ASC Topic 410, *Asset Retirement and Environmental Obligations*. Our asset retirement obligations relate to leasehold improvements for leased properties. As of June 30, 2013 and 2012, the balance of our asset retirement obligations was \$0.6 million and \$0.7 million, respectively.

Accrued expenses and other current liabilities in the accompanying consolidated balance sheets consist of the following:

	Year Ended June 30,	
	2013	2012
	(Dollars in Thousands)	
Royalties and outside commissions	\$ 4,312	\$ 4,875
Payroll and payroll-related	18,702	21,558
Other	11,407	11,556
Total accrued expenses and other current liabilities	\$ 34,421	\$ 37,989

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(5) Supplemental Balance Sheet Information (Continued)

Other non-current liabilities in the accompanying consolidated balance sheets consist of the following:

	Year Ended June 30,	
	2013	2012
	(Dollars in Thousands)	
Deferred rent	\$ 862	\$ 1,532
Other*	11,515	13,897
Total other non-current liabilities	\$ 12,377	\$ 15,429

*

Other is comprised primarily of our net reserve for uncertain tax liabilities. See Note 8, "Income Taxes" for additional information.

(6) Common Stock

On April 23, 2013, our Board of Directors approved a share repurchase program for up to \$150 million worth of our common stock. This share repurchase program replaced the prior share repurchase program approved by the Board of Directors on October 24, 2012 for up to \$100 million, which had approximately \$58.4 million of remaining capacity on April 23, 2013. The program approved on October 24, 2012 had replaced a repurchase program with a value of up to \$100 million which had been approved by the Board of Directors on November 1, 2011. The program approved on November 1, 2011 had replaced a repurchase program with a value of up to \$40 million which had been approved by the Board of Directors on October 29, 2010. The timing and amount of any shares repurchased are based on market conditions and other factors. All share repurchases of our common stock have been recorded as treasury stock under the cost method.

We repurchased 3,064,151 shares and 2,496,595 shares of our common stock for \$84.7 million and \$46.1 million during fiscal 2013 and 2012, respectively. As of June 30, 2013, the remaining dollar value under the stock repurchase program approved on April 23, 2013 was \$134.4 million.

(7) Stock-Based Compensation*Stock Compensation Plans*

In April 2010, the shareholders approved the establishment of the 2010 Equity Incentive Plan (the 2010 Plan), which provides for the issuance of a maximum of 7,000,000 shares of common stock. The 2010 Plan provides for the grant of incentive and nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units, other stock-related awards, and performance awards that may be settled in cash, stock, or other property. As of June 30, 2013, there were 4,566,530 shares of common stock available for issuance subject to awards under the 2010 Plan.

In May 2005, the shareholders approved the establishment of the 2005 Stock Incentive Plan (the 2005 Plan), which provides for the issuance of a maximum of 4,000,000 shares of common stock. The 2005 Plan provides for the grant of incentive and nonqualified stock options and other stock-based awards, including the grant of shares based upon certain conditions, the grant of securities convertible into common stock and the grant of stock appreciation rights. Restricted stock and other stock-based awards granted under the 2005 Plan may not exceed, in the aggregate, 4,000,000 shares of common

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(7) Stock-Based Compensation (Continued)

stock. As of June 30, 2013, there were 214,712 shares of common stock available for issuance subject to awards under the 2005 Plan.

General Award Terms

We issue stock options and restricted stock units (RSUs) to our employees and outside directors, pursuant to stockholder-approved equity compensation plans. Option awards are granted with an exercise price equal to the market closing price of our stock on the trading day prior to the date of grant; those options generally vest over four years and expire within 7 or 10 years of grant. RSUs generally vest over four years. Historically, our practice has been to settle stock option exercises and RSU vesting through newly-issued shares.

Stock Compensation Accounting

Our stock-based compensation is principally accounted for as awards of equity instruments. Our policy is to issue new shares upon the exercise of stock awards. We adopted the simplified method related to accounting for the tax effects of share-based payment awards to employees under ASC Topic 718, *Compensation - Stock Compensation* (ASC 718). We use the "with-and-without" approach for determining if excess tax benefits are realized under ASC 718.

We utilize the Black-Scholes option valuation model for estimating the fair value of options granted. The Black-Scholes option valuation model incorporates assumptions regarding expected stock price volatility, the expected life of the option, the risk-free interest rate, dividend yield and the market value of our common stock. The expected stock price volatility is determined based on our stock's historic prices over a period commensurate with the expected life of the award. The expected life of an option represents the period for which options are expected to be outstanding as determined by historic option exercises and cancellations. The risk-free interest rate is based on the U.S. Treasury yield curve for notes with terms approximating the expected life of the options granted. The expected dividend yield is zero, based on our history and expectation of not paying dividends on common shares. We recognize compensation costs on a straight-line basis, net of estimated forfeitures, over the requisite service period for time-vested awards.

The weighted average estimated fair value of awards granted during fiscal 2013, 2012 and 2011 was \$9.76, \$6.49 and \$4.99 respectively.

We utilized the Black-Scholes option valuation model with the following weighted average assumptions:

	Year Ended June 30,		
	2013	2012	2011
Risk-free interest rate	0.6%	1.1%	1.3%
Expected dividend yield	None	None	None
Expected life (in years)	4.8	4.6	4.6
Expected volatility factor	49%	50%	53%
			F-30

(7) Stock-Based Compensation (Continued)

The stock-based compensation expense and its classification in the accompanying consolidated statements of operations for fiscal 2013, 2012 and 2011 was as follows:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Recorded as expenses:			
Cost of service and other	\$ 1,281	\$ 1,168	\$ 945
Selling and marketing	3,890	4,601	3,603
Research and development	2,969	1,334	1,152
General and administrative	6,497	5,303	3,999
Total stock-based compensation	\$ 14,637	\$ 12,406	\$ 9,699

A summary of stock option and RSU activity under all equity plans in fiscal 2013, 2012 and 2011 is as follows:

	Stock Options			Restricted Stock Units	
	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in 000's)	Weighted Average Grant Date Fair Value
Outstanding at June 30, 2012	4,180,265	\$ 9.03		1,327,071	\$ 12.73
Granted	498,264	23.40		592,842	23.46
Settled (RSUs)				(815,440)	13.99
Exercised	(2,743,772)	7.71			
Cancelled / Forfeited	(82,639)	12.99		(73,634)	15.59
Outstanding at June 30, 2013	1,852,118	\$ 14.68	6.80	\$ 26,140	1,030,839 \$ 17.69
Vested and exercisable at June 30, 2013	972,407	\$ 12.05	5.64	\$ 16,278	
Vested and expected to vest at June 30, 2013	1,563,655	\$ 14.09	6.53	\$ 22,984	751,521 \$ 17.39

During fiscal 2013, 2012 and 2011, the weighted average grant-date fair value of RSUs granted was \$23.46, \$15.52 and \$11.02, respectively. During fiscal 2013, 2012 and 2011 the total fair value of vested shares from RSU grants amounted to \$22.5 million, \$14.0 million and \$11.7 million, respectively.

As of June 30, 2013, the total future unrecognized compensation cost related to stock options and RSUs was \$4.9 million and \$13.4 million, respectively, and is expected to be recorded over a weighted average period of 2.3 years and 2.4 years, respectively.

The total intrinsic value of options exercised during fiscal 2013, 2012 and 2011 was \$55.7 million, \$14.6 million and \$12.2 million, respectively. We received \$21.1 million, \$8.9 million and \$9.7 million in cash proceeds from option exercises during fiscal 2013, 2012 and 2011, respectively. We paid \$7.7 million, \$4.6 million and \$3.9 million for withholding taxes on vested RSUs during fiscal 2013, 2012 and 2011, respectively.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(7) Stock-Based Compensation (Continued)

At June 30, 2013, common stock reserved for future issuance or settlement under equity compensation plans was 7.7 million shares.

The compensation committee and Board of Directors completed its annual program grant for fiscal 2014 and authorized and approved the grant of 392,440 RSUs and 333,214 stock options with a grant date of August 1, 2013.

(8) Income Taxes

Income (loss) before provision for (benefit from) income taxes consists of the following:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Domestic	\$ 54,587	\$ (14,086)	\$ (50,395)
Foreign	2,851	(1,066)	6,675
Income (loss) before provision for (benefit from) income taxes	\$ 57,438	\$ (15,152)	\$ (43,720)

The provision for (benefit from) income taxes shown in the accompanying consolidated statements of operations is composed of the following:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Federal			
Current	\$	\$	\$
Deferred	7,867	(3,409)	(60,004)
State			
Current	136	191	132
Deferred	693	33	(1,702)
Foreign			
Current	7,068	3,292	5,446

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(8) Income Taxes (Continued)

The provision for (benefit from) income taxes differs from that based on the federal statutory rate due to the following:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Federal tax provision (benefit) at statutory rate	\$ 20,103	\$ (5,303)	\$ (15,302)
State income taxes	88	124	86
Subpart F and dividend income	4,456	4,189	1,235
Foreign taxes and rate differences	2,298	1,001	2,218
Stock-based compensation	900	2,968	3,338
Tax credits	(4,816)	(3,913)	(4,524)
Tax contingencies	(168)	(2,385)	7,158
Return to provision adjustments	(149)	442	1,182
Valuation allowance	(1,813)	1,431	(48,830)
Benefit from foreign restructuring	(9,266)		
Other	543	102	(538)
Provision for (benefit from) income taxes	\$ 12,176	\$ (1,344)	\$ (53,977)

Deferred tax assets (liabilities) consist of the following at June 30, 2013 and 2012:

	Year Ended June 30,	
	2013	2012
	(Dollars in Thousands)	
Deferred tax assets:		
Federal and state credits	\$ 4,918	\$ 4,000
Foreign tax credits	33,310	38,870
Federal and state loss carryforwards	6,221	18,458
Capital loss carryforwards	8,076	
Foreign loss carryforwards	1,653	2,658
Deferred revenue	4,198	3,682
Restructuring accruals	34	326
Other reserves and accruals	4,834	5,119
Intangible assets	719	1,037
Property, leasehold improvements, and other basis differences	2,829	3,523
Other temporary differences	3,504	5,596
	70,296	83,269
Deferred tax liabilities:		
Deferred revenue	(151)	(714)
Intangible assets	(1,444)	(1,558)
Property, leasehold improvements, and other basis differences	(16)	(9,583)
Other temporary differences	(677)	(683)
	(2,288)	(12,538)
Valuation allowance	(9,943)	(5,626)
Net deferred tax assets	\$ 58,065	\$ 65,105

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(8) Income Taxes (Continued)

In fiscal 2013, we restructured our Canadian affiliate, AspenTech Canada Ltd ("ATC"). The restructuring was considered a deemed liquidation for tax purposes resulting in (i) the elimination of a deferred tax liability of \$9.3 million associated with a basis difference and (ii) recognition of a capital loss for tax purposes of \$22.2 million.

Our valuation allowance for deferred tax assets was \$9.9 million and \$5.6 million as of June 30, 2013 and 2012 respectively. The increase in the valuation allowance of \$8.1 million over the prior year was due to the recognition of the capital loss on the deemed liquidation of ATC and the assessment that it is "more likely than not" that we will not recognize a benefit from the capital loss. We also decreased the valuation allowance by \$1.9 million during the year related net operating losses and other net deferred tax assets related to our entities in the United Kingdom. A valuation allowance has also been retained on certain foreign subsidiary net operating loss carryforwards because it is more likely than not that a benefit will not be realized.

As of June 30, 2013, we have available U.S. federal net operating loss carryforwards of \$119.3 million. Of that amount, \$104.7 million relate to stock-based compensation tax deductions in excess of book compensation expense (APIC NOLs) that will be credited to additional paid in capital when such deductions reduce taxes payable as determined based on a "with-and-without" approach. APIC NOLs will reduce federal taxes payable if realized in future periods, but NOLs relating to such benefits are not included in the table above. The deferred tax asset related to the net carryforward value of \$14.6 million is included in the table above.

In fiscal 2013, we recorded a reduction in the foreign income taxes payable of \$0.5 million, with an increase to additional paid in capital, for the benefits of excess stock-based compensation deductions recognized during the period in the United Kingdom.

We have foreign net operating loss carryforwards of \$6.6 million which will expire beginning in 2020 and others with no expiration date. The \$6.6 million of foreign net operating loss carryforwards includes \$0.3 million related to stock-based compensation tax deductions in excess of book compensation expense. We also have federal and state research and development tax credits, and alternative minimum tax (AMT) credit carryforwards. The research and development tax credits expire at various dates from 2019 through 2033, while the AMT credit carryforwards have an unlimited carryforward period.

We have determined that we underwent an ownership change (as defined under section 382 of the Internal Revenue Code of 1986, as amended) during fiscal 2011. As such, the utilization of certain NOLs and tax credits are subject to an annual limitation. The annual limitation is not expected to impact the realizability of the deferred tax assets.

For fiscal 2013, our income tax provision included amounts determined under the provisions of FIN 48, *Uncertainty in Income Taxes- an Interpretation of FASB Statement No 109*, (currently included as provisions of ASC 740), intended to satisfy additional income tax assessments, including interest and penalties, that could result from any tax return positions for which the likelihood of sustaining the position on audit does not meet a threshold of "more likely than not." Tax liabilities were recorded as a component of our income taxes payable and other non-current liabilities. The ultimate amount of taxes due will not be known until examinations are completed and settled or the audit periods are closed by statutes.

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(8) Income Taxes (Continued)

A reconciliation of the reserve for uncertain tax positions is as follows:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Uncertain tax positions, beginning of year	\$ 21,906	\$ 24,835	\$ 17,730
Gross increases tax positions in prior period	1,150	2,072	4,599
Gross decreases tax positions in prior period		(1,468)	(1,025)
Gross increases tax positions in current period			3,333
Gross decreases lapse of statutes	(1,172)	(2,954)	(517)
Currency translation adjustment	147	(579)	715
Uncertain tax positions, end of year	\$ 22,031	\$ 21,906	\$ 24,835

At June 30, 2013, the total amount of unrecognized tax benefits is \$22.0 million, and of that amount, \$18.6 million, if recognized, would reduce the effective tax rate. Our policy is to recognize interest and penalties related to income tax matters as provision for (benefit from) income taxes. At June 30, 2013, we had approximately \$1.9 million of accrued interest and \$1.1 million of penalties related to uncertain tax positions. We recorded a benefit for interest and penalties of approximately \$0.1 million during fiscal 2013. We do not anticipate the total amount of unrecognized tax benefits to significantly change within the next twelve months.

Fiscal years 2007-2012 are subject to audit in the United States and Canada.

Subsidiaries of Aspen Technology in a number of countries outside of the U.S. and Canada are also subject to tax audits. The Company estimates that the effects of such tax audits are not material to these consolidated financial statements.

(9) Commitments and Contingencies***Operating Leases***

We lease certain facilities and various office equipment under non-cancellable operating leases with terms in excess of one year. Rental expense, including short term leases, maintenance charges and taxes on leased facilities, was approximately \$6.7 million, \$6.3 million and \$6.7 million for fiscal years 2013, 2012 and 2011, respectively.

Future minimum lease payments under these leases and scheduled sublease payments as of June 30, 2013 are as follows:

Year Ended June 30,	Gross Payments	Scheduled Sublease Payments	Net Payments
	(Dollars in Thousands)		
2014	\$ 6,857	\$ 163	\$ 6,694
2015	5,038	163	4,875
2016	2,686	163	2,523
2017	461	14	447
Total	\$ 15,042	\$ 503	\$ 14,539

Table of Contents

ASPEN TECHNOLOGY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(9) Commitments and Contingencies (Continued)

Due to various restructuring activities (refer to Note 3) in past years we have vacated certain of our leased space and are subleasing a portion of this space. The scheduled sublease payments are included in the table above. We have issued a standby letter of credit for \$0.5 million in connection with a certain facility lease that expires in fiscal 2017.

Legal Matters

In the ordinary course of business, we from time to time pursue lawsuits and claims to enforce our intellectual property rights and to address other intellectual property, commercial and miscellaneous matters. In addition, we are also from time to time involved in other lawsuits, claims, investigations, proceedings and threats of litigation. These include an April 2004 claim by a customer for approximately \$5.0 million that certain of our software products and implementation services failed to meet the customer's expectations.

The results of litigation and claims cannot be predicted with certainty, and unfavorable resolutions are possible and could materially affect our results of operations, cash flows or financial position. In addition, regardless of the outcome, litigation could have an adverse impact on us because of litigation fees and costs, diversion of management resources and other factors.

While the outcome of the proceedings and claims referenced above cannot be predicted with certainty, there are no such matters, as of June 30, 2013, that, in the opinion of management, might have a material adverse effect on our financial position, results of operations or cash flows. Liabilities, if applicable, related to the aforementioned matters discussed in this Note have been included in our accrued liabilities at June 30, 2013, and are not material to our financial position for the period then ended.

As of June 30, 2013 we do not believe that there is a reasonable possibility of a loss exceeding the amounts already accrued for the proceedings or matters discussed above.

(10) Retirement and Profit Sharing Plans

We maintain a defined contribution retirement plan under Section 401(k) of the IRC covering all eligible employees, as defined. Under the plan, a participant may elect to defer receipt of a stated percentage of his or her compensation, subject to limitation under the IRC, which would otherwise be payable to the participant for any plan year. We may make discretionary contributions to this plan, including making matching contributions of 50%, up to a maximum of 6% of an employee's pretax contribution. We made matching contributions of approximately \$1.9 million in fiscal 2013 and approximately \$1.8 million in each of fiscal 2012 and 2011. Additionally, we participate in certain government mandated and defined contribution plans throughout the world for which we comply with all funding requirements.

(11) Other Investments

In November 2000, we invested \$0.6 million in a global chemical business-to-business e-commerce company supporting major chemical companies in Asia. We recorded a non-operating loss for the full value of this investment in fiscal 2011 due to the determination of an other-than-temporary impairment of its fair value.

(12) Segment and Geographic Information

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. Our chief operating decision maker is our President and Chief Executive Officer.

We have three operating segments: license; SMS, training, and other; and professional services. The chief operating decision maker assesses financial performance and allocates resources based upon the three lines of business.

The license line of business is engaged in the development and licensing of software. The SMS, training, and other line of business provides customers with a wide range of support services that include on-site support, telephone support, software updates and various forms of training on how to use our products. The professional services line of business offers implementation, advanced process control, real-time optimization and other professional services.

The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies (refer to Note 2). We do not track assets or capital expenditures by operating segments. Consequently, it is not practical to show assets, capital expenditures, depreciation or amortization by operating segments.

The following table presents a summary of operating segments:

	License	SMS, Training, and Other	Professional Services	Total
(Dollars in Thousands)				
Year Ended June 30, 2013				
Segment revenue	\$ 239,654	\$ 44,877	\$ 26,856	\$ 311,387
Segment expenses	68,448	6,753	23,540	98,741
Segment operating profit(1)	\$ 171,206	\$ 38,124	\$ 3,316	\$ 212,646
Year Ended June 30, 2012				
Segment revenue	\$ 166,688	\$ 54,025	\$ 22,421	\$ 243,134
Segment expenses	71,050	9,631	24,505	105,186
Segment operating profit (loss)(1)	\$ 95,638	\$ 44,394	\$ (2,084)	\$ 137,948
Year Ended June 30, 2011				
Segment revenue	\$ 103,699	\$ 65,121	\$ 29,334	\$ 198,154
Segment expenses	66,821	13,495	25,404	105,720
Segment operating profit(1)	\$ 36,878	\$ 51,626	\$ 3,930	\$ 92,434

(1)

The segment operating profits (losses) reported reflect the direct expenses of the operating segment and contain certain allocations of selling and marketing, general and administrative, research and development, and do not contain restructuring and other corporate expenses incurred in support of the segments.

(12) Segment and Geographic Information (Continued)

Reconciliation to Income (Loss) Before Provision for (Benefit from) Income Taxes

The following table presents a reconciliation of total segment operating profit to income (loss) before provision for (benefit from) income taxes:

	Year Ended June 30,		
	2013	2012	2011
	(Dollars in Thousands)		
Total segment operating profit for reportable segments	\$ 212,646	\$ 137,948	\$ 92,434
Cost of subscription and software	(12,788)	(10,617)	(5,213)
Marketing	(13,119)	(13,231)	(12,690)
Research and development	(51,735)	(47,391)	(41,932)
General and administrative	(39,340)	(44,780)	(51,363)
Information technology and overhead	(25,432)	(24,831)	(26,360)
Stock-based compensation	(14,637)	(12,406)	(9,699)
Restructuring charges	5	301	247
Other (expense) income, net	(1,117)	(3,519)	2,919
Interest income, net	2,955	3,374	7,937
Income (loss) before provision for (benefit from) income taxes	\$ 57,438	\$ (15,152)	\$ (43,720)

Geographic Information:

Revenue to external customers is attributed to individual countries based on the location the product or services are sold. Domestic and international sales as a percentage of total revenue are as follows:

	Year Ended June 30,		
	2013	2012	2011
United States	38.5%	29.5%	35.8%
Europe	29.3	33.7	26.6
Other(1)	32.2	36.8	37.6
	100.0%	100.0%	100.0%

(1)

Other consists primarily of Asia Pacific, Canada, Latin America and the Middle East.

During fiscal 2013, 2012 and 2011, there were no customers that individually represented greater than 10% of our total revenue.

We have long-lived assets of approximately \$17.4 million that are located domestically and \$18.4 million that reside in other geographic locations as of June 30, 2013.

(13) Quarterly Financial Data (Unaudited)

The following tables present quarterly consolidated statement of operations data for fiscal 2013 and 2012. The below data is unaudited but, in our opinion, reflects all adjustments necessary for a fair presentation of this data in accordance with GAAP:

	Three Months Ended			
	June 30, 2013	March 31, 2013	December 31, 2012	September 30, 2012
	(Dollars and Shares in Thousands, Except per Share Data)			
Total revenue	\$ 83,264	\$ 79,357	\$ 77,309	\$ 71,457
Gross profit	70,276	66,708	64,936	59,119
Income from operations	15,383	16,334	14,929	8,954
Net income	20,399	10,513	9,937	4,413
Net income per common share:				
Basic	\$ 0.22	\$ 0.11	\$ 0.11	\$ 0.05
Diluted	\$ 0.21	\$ 0.11	\$ 0.10	\$ 0.05
Weighted average shares outstanding:				
Basic	93,680	93,730	93,512	93,428
Diluted	95,257	95,400	95,463	95,670

	Three Months Ended			
	June 30, 2012	March 31, 2012	December 31, 2011	September 30, 2011
	(Dollars and Shares in Thousands, Except per Share Data)			
Total revenue	\$ 64,017	\$ 61,337	\$ 66,555	\$ 51,225
Gross profit	50,916	48,907	53,630	37,404
(Loss) income from operations	(3,609)	(2,814)	7,041	(15,625)
Net (loss) income	(5,388)	(520)	3,836	(11,736)
Net (loss) income per common share:				
Basic	\$ (0.06)	\$ (0.01)	\$ 0.04	\$ (0.12)
Diluted	\$ (0.06)	\$ (0.01)	\$ 0.04	\$ (0.12)
Weighted average shares outstanding:				
Basic	93,563	93,583	93,902	94,065
