N.M. Not Meaningful.

- (A) Rule 144a Security A security purchased pursuant to Rule 144a under the Securities Act of 1933 which may not be resold subject to that rule except to qualified institutional buyers. These securities, which the Fund s investment adviser has determined to be liquid, represent 28.23% of net assets.
- (B) Indexed Security The rates of interest earned on these securities are tied to the London Interbank Offered Rate (LIBOR), the Euro Interbank Offered Rate (EURIBOR) Index, the Consumer Price Index (CPI), the one-year Treasury Bill Rate or the ten-year Japanese Government Bond Rate. The coupon rates are the rates as of March 31, 2009.
- (C) Stepped Coupon Security A security with a predetermined schedule of interest or dividend rate changes at which time it begins to accrue interest or pay dividends according to the predetermined schedule.
- (D) Illiquid security valued at fair value under the procedures approved by the Board of Trustees.
- (E) Convertible Security Security may be converted into the issuer s common stock.
- (F) Bond is currently in default.
- (G) Pay-in-Kind (PIK) security A security in which interest or dividends during the initial few years is paid in additional PIK securities rather than in cash.
- (H) Non-income producing.
- (I) The coupon rates shown on variable rate securities are the rates at March 31, 2009. These rates vary with the weighted average coupon of the underlying loans.
- (J) Yankee Bond A dollar-denominated bond issued in the U.S. by foreign entities.

- (K) Stripped Security Security with interest-only or principal-only payment streams, denoted by a 1 or 2, respectively. For interest-only securities, the amount shown as principal is the notional balance used to calculate the amount of interest due.
- (L) Restricted Security. Security is valued at fair value as determined in good faith by, or under the direction of, the Board of Trustees under procedures established by the Board of Trustees.
- (M) On September 7, 2008, the Federal Housing Finance Agency placed Fannie Mae and Freddie Mac into conservatorship.
- (N) Credit Linked Security The rates of interest earned on these securities are tied to the credit rating assigned by Standard & Poor s Rating Service and/or Moody s Investors Services.

Western Asset Premier Bond Fund

March 31, 2009 (Unaudited) (continued)

(O) Aggregate cost for federal income tax purposes is substantially the same as book cost. At March 31, 2009, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 5,614,087
Gross unrealized depreciation	(59,841,690)
Net unrealized depreciation	\$ (54,227,603)

Net Asset Value Per Common Share:

8.45

\$

Investment Valuation

The Fund s securities are valued under policies approved by and under the general oversight of the Board of Trustees. Effective January 1, 2008, the Fund adopted Statement of Financial Accounting Standards No. 157 (FAS 157). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

Debt securities are valued at the last quoted bid prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Equity securities for which market quotations are available are valued at the last sale price or official closing price on the primary market or exchange on which they trade. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market and are valued at the bid price as of the close of business of that market. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund s Board of Trustees.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:

	March 31, 2009	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments in securities	\$ 160,461,564 \$	2,255,560 \$	157,090,173 \$	1,115,831
Other financial instruments*	(904,839)		(904,839)	
Total	\$ 159,556,725 \$	2,255,560 \$	156,185,334 \$	1,115,831

^{*} Other financial instruments include swaps.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

Investments in Securities

Balance as of December 31, 2008 \$ 461,086

Accrued Premiums/Discounts	7,650
Realized Gain/(Loss)	(1)
Change in unrealized appreciation/(depreciation)	70,365(2)
Net purchases/(sales)	576,730
Transfers in and/or (out), of Level 3	
Balance as of March 31, 2009	\$ 1,115,831
Net unrealized appreciation/(depreciation) for	
investments in securities still held at the reporting date	\$ (64,943)

⁽¹⁾ This amount is included in net realized gain/(loss) from investment

⁽²⁾ Change in unrealized appreciation/(depreciation) includes net unrealized appreciation/(depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation/(depreciation) when gains or losses are realized.

Swap Agreements

The Fund may invest in swaps for the purpose of managing their exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with ordinary portfolio transactions.

The Fund may enter into credit default swap (CDS) contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate or sovereign issuers, on a specified obligation, or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide protection against defaults of the issuers (i.e., to reduce risk where a Fund has exposure to a sovereign issuer) or to take an active long or short position with respect to the likelihood of a particular issuer s default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of values from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. As a buyer of protection, the Fund generally receives an amount up to the notional value of the swap if a credit event occurs.

Implied spreads are the theoretical prices a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity s credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of credit default swap agreements on corporate or sovereign issues are disclosed in the Notes to the Schedule of Investments and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for credit derivatives. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract as well as the annual payment rate, serve as an indication of the current status of the payment/performance risk.

The Fund s maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract (this risk is mitigated by the posting of collateral by the counterparty to the Fund to cover the Fund s exposure to the counterparty). Credit default swaps are considered to have credit risk-related contingent features since they require payment by the protection seller to the protection buyer upon the occurrence of a defined credit event. As disclosed in the Fair Values of Derivatives Balance Sheet table that follows each Fund s summary of open swap contracts, the aggregate fair value of credit default swaps in a net liability position as of March, 31, 2009 was \$1,867,940. If a defined credit event had occurred as of March 31, 2009, the swaps credit-risk-related contingent features would have been triggered and the Fund would have been required to pay \$21,943,990 less the value of the contracts related reference obligations.

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk in excess of the related amounts recognized in the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

As of March 31, 2009, the one month London Interbank Offered Rate (LIBOR) was 0.501%

The following is a summary of open credit default swap contracts outstanding as of March 31, 2009.

CREDIT DEFAULT SWAP ON CREDIT INDICES SELL PROTECTION(3)

Swap Counterparty (Reference		Periodic Payments Received by	Co	ontract Notional		Upfront Premium		Unrealized ppreciation/
Entity) Merrill Lynch & Co., Inc.	Termination Date	the Fund 0.86%		Amount (2)	Market V	Value (4Paid/(Receiv	/ed)[I	Depreciation)
(CDX HY 8)	June 20, 2012	Quarterly	\$	21,943,990	\$ (1,	867,940) \$	\$	(1,867,940)

Net unrealized depreciation on sales of credit default swaps on credit indices \$ (1,867,940)

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (4) The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement been closed/sold as of the period end. Decreasing market values when compared to the notional amount of the swap, represent a deterioration of the referenced entity s credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Percentage shown is an annual percentage rate.

Derivative Instruments and Hedging Activities

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities, requires enhanced disclosure about an entity s derivative and hedging activities.

The following is a summary of the Fund s derivative instruments categorized by risk exposure at March 31, 2009.

Primary Underlying Risk	Unrealized			Unrealized	
Disclosure	Ap	preciation		Depreciation	Total
Interest Rate Contracts					
Foreign Exchange Contracts					
Credit Contracts	\$	963,101	\$	(1,867,940) \$	(904,839)
Equity Contracts					
Other Contracts					
Total	\$	963,101	\$	(1,867,940) \$	(904,839)

Recent Accounting Pronouncement

In April 2009, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (FSP 157-4). FSP 157-4 provides additional guidance for estimating fair value in accordance with FASB Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157), when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate a transaction is not orderly. FSP 157-4 is effective for fiscal years and interim periods ending after June 15, 2009. Management is currently evaluating the impact the adoption of FSP 157-4 will have on the Funds financial statement disclosures.

Item 2 Controls and Procedures

- (a) The Registrant s principal executive and principal financial officers have concluded, based on their evaluation of the Registrant s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) as of a date within 90 days of the filing date of this report, that the Registrant s disclosure controls and procedures are effective, and that the disclosure controls and procedures are reasonably designed to ensure (1) that information required to be disclosed by the Registrant on Form N-Q is recorded, processed, summarized and reported within the required time periods and (2) that information required to be disclosed by the Registrant in the reports that it files or submits on Form N-Q is accumulated and communicated to the Registrant s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.
- (b) There were no changes in the Registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) during the Registrant s last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the internal control over financial reporting.

Item 3 Exhibits

Certifications as required by Rule 30a-2(a) under the Investment Company Act of 1940 are attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
