Gross unrealized appreciation	\$	1,034,808
Gross unrealized depreciation		(45,715,481)
Net unrealized depreciation	\$	(44,680,673)

- M Futures are described in more detail in the notes to financial statements.

Net Asset Value Per Common Share: \$ 10.02

Investment Valuation

The Fund's securities are valued under policies approved by and under the general oversight of the Board of Directors. Effective January 1, 2008, the Fund adopted Statement of Financial Accounting Standards No. 157 (FAS 157). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Debt securities are valued at the last quoted bid prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Equity securities for which market quotations are available are valued at the last sale price or official closing price on the primary market or exchange on which they trade. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets carried at fair value:

	March 31, 2009		Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Investments in Securities	\$	91,897,899	\$	52,847	\$	48,050
Other Financial Instruments*		(27,370)		(27,370)		
Total	\$	91,870,529	\$	25,477	\$	48,050

* Other financial instruments include futures.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

Edgar Filing: Western Asset Income Fund - Form N-Q

		Investments in Securities
Balance as of December 31, 2008	\$	37,200
Accrued Premiums/Discounts		2,639
Realized Gain (Loss)		
Change in unrealized appreciation (depreciation)		8,211
Net purchases (sales)		
Transfers in and/or out of Level 3		
Balance as of March 31, 2009	\$	48,050
Net unrealized appreciation (depreciation) for investments in securities still held at the reporting date	\$	(482,336) ¹

¹ Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized.

Futures Contracts

The Fund may use futures contracts to gain exposure to, or hedge against, changes in the value of equities, interest rates or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

Upon entering into a futures contract, the Fund is required to deposit with a broker cash or cash equivalents in an amount equal to a certain percentage of the contract amount. This is known as the initial margin. Subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. For non-U.S. and foreign denominated futures held in the Fund, payment is not sent daily, but is recorded as a net payable or receivable by the Fund to or from the futures broker, which holds cash collateral from the Fund. The daily changes in contract value are recorded as unrealized gains or losses and the Fund recognizes a realized gain or loss when the contract is closed. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. With futures, there is minimal counterparty risk to the Fund since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

The Fund may enter into futures contracts for various reasons, including in connection with their interest rate management strategy. Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. The change in the value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in interest rates, if applicable. In addition, there is the risk that a Fund may not be able to enter into a closing transaction because of an illiquid secondary market. The nature and risks of these financial instruments and other reasons for using them are set forth more fully in the Fund's prospectus and statement of additional information.

Derivative Instruments and Hedging Activities

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities, requires enhanced disclosure about an entity's derivative and hedging activities.

The following is a summary of the Fund's derivative instruments categorized by risk exposure at March 31, 2009.

Recent Accounting Pronouncement

In April 2009, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (FSP 157-4). FSP 157-4 provides additional guidance for estimating fair value in accordance with FASB, when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate a transaction is not orderly. FSP 157-4 is effective for fiscal years and interim periods ending after June 15, 2009. Management is currently evaluating the impact the adoption of FSP 157-4 will have on the Funds' financial statement disclosures.

Other information regarding the Fund is available in the Fund's most recent Report to Shareholders. This information is available on the Securities and Exchange Commission's website (www.sec.gov).
