Note 1. Organization and Significant Accounting Policies

Salomon Brothers Emerging Markets Income Fund II Inc. (Fund) was incorporated in Maryland and is registered as a non-diversified, closed-end, management investment company under the Investment Company Act of 1940, as amended.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment Valuation. In valuing the Fund's assets, all securities and derivatives for which market quotations are readily available are valued (i) at the last sale price prior to the time of determination if there was a sale on the date of determination, (ii) at the mean between the last current bid and asked price if there was no sales price on such date and bid and asked quotations are available, and (iii) at the bid price if there was no sales price on such date and only bid quotations are available. Publicly traded sovereign bonds are typically traded internationally in the over-the-counter market, and are valued at the mean between the last current bid and asked price as of the close of business of that market. However, where the spread between bid and asked price exceeds five percent of the par value of the security, the security is valued at the bid price. Securities may also be valued by independent pricing services which use prices provided by market makers or estimates of market values obtained from yield data relating to instruments or securities with similar characteristics. Securities for which reliable quotations are not readily available and all other securities and assets are valued at fair value as determined in good faith by, or under procedures established by, the Board of Directors. When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the Fund calculates its net asset value, the Fund may value these investments at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors. Short-term investments having a maturity of 60 days or less are valued at amortized cost, unless the Board of Directors determines that such valuation does not constitute fair value.

(b) Repurchase Agreements. When entering into repurchase agreements, it is the Fund's policy that the custodian take possession of the underlying collateral securities, the value of which at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market to ensure the adequacy of the collateral. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements in which the Fund sells portfolio securities and agrees to repurchase them from the buyer at a particular date and price. Whenever the Fund enters into a reverse repurchase agreement, the custodian delivers liquid assets in an amount at least equal to the repurchase price marked-to-market daily (including accrued interest), and subsequently monitors the account to ensure that equivalent value is maintained. The Fund pays interest on amounts obtained pursuant to reverse repurchase agreements. Reverse repurchase agreements are considered to be borrowings by a Fund. Reverse repurchase agreements involve leverage risk and the risk that the market value of securities retained by the Fund may decline below the repurchase price of the securities sold by the Fund, which it is obligated to repurchase.

Notes to Schedule of Investments (unaudited) (continued)

(d) Futures Contracts. The Fund may from time to time enter into futures contracts. Securities or cash equal to the initial margin amount are either deposited with the broker or segregated by the custodian upon entering the futures contract. Additional securities are also segregated up to the current market value of the futures contracts. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by marking-to-market on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are received or made and recognized as assets due from or liabilities due to broker, depending upon whether unrealized gains or losses are incurred. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transactions and the Fund's basis in the contract. The Fund enters into such contracts typically to hedge a portion of their portfolios. The Fund bears the market risk that arises from changes in the value of the financial instruments and securities indices.

(e) Loan Participations/Assignments. The Fund invests in fixed and floating rate loans arranged through private negotiations between a foreign sovereign entity and one or more financial institutions (lenders). The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing loan participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund will assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. When the Fund purchases assignments from lenders, the Fund will acquire direct rights against the borrower on the loan, except that under certain circumstances such rights may be more limited than those held by the assigning lender.

The Fund may have difficulty disposing of participations/assignments because the market for certain instruments may not be highly liquid.

(f) Foreign Currency Translation. The accounting records of the Fund are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars on the date of valuation. Purchases and sales of securities, and income and expenses are translated at the rate of exchange quoted on the respective date that such transactions are recorded. Net unrealized appreciation or depreciation on investments and foreign currency translation arise from changes in the value of assets and liabilities, including investments in securities at the date of the financial statements, resulting from changes in the exchange rates and changes in market prices of securities held.

Notes to Schedule of Investments (unaudited) (continued)**Note 2. Investments**

At August 31, 2004, the aggregate gross unrealized appreciation and depreciation of investments for Federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 13,515,527
Gross unrealized depreciation	(5,071,335)
Net unrealized appreciation	<u>\$ 8,444,192</u>

During the three months ended August 31, 2004, transactions in reverse repurchase agreements for the Fund were as follows:

Average Daily Balance	Weighted Average Interest Rate	Maximum Amount Outstanding
\$73,951,498	1.261%	\$ 84,847,333

Interest rates on reverse repurchase agreements ranged from 0.800% to 1.450% for the three months ended August 31, 2004.

In addition, at August 31, 2004, the Fund had the following reverse repurchase agreements outstanding:

Face Amount	Security	Value
\$50,375,000	Reverse Repurchase Agreement with J.P. Morgan Chase & Co., dated 2/19/04 bearing 1.400% to be repurchased at \$51,090,045 on 2/18/05, collateralized by: \$57,230,000 Russian Federation, 5.000% due 3/31/30; Market value - \$54,869,263	\$ 50,375,000

Total Reverse Repurchase Agreements (Cost - \$84,847,334)		<u>\$ 84,847,334</u>

Notes to Schedule of Investments (unaudited) (continued)

At August 31, 2004, the Fund had the following open futures contracts:

	<u>Number of Contracts</u>	<u>Expiration Date</u>	<u>Basis Value</u>	<u>Market Value</u>	<u>Unrealized Loss</u>
Contract to Sell:					
U.S. Treasury 10 Year Note	1,750	12/04	\$ 194,394,043	\$ 196,546,875	\$ (2,152,832)

At August 31, 2004, the Fund held loan participations with a total cost of \$15,608,805 and a total market value of \$16,027,203.

Note 3. Loan

At August 31, 2004, the Fund had a \$110,000,000 loan available pursuant to a revolving credit and security agreement of which the Fund had \$75,000,000 outstanding with CXC LLC, an affiliate of Citigroup, a commercial paper conduit issuer for which Citicorp North America, Inc., an affiliate of SBAM, acts as administrative agent. The loans generally bear interest at a variable rate based on the weighted average interest rate of the underlying commercial paper or LIBOR, plus any applicable margin. Securities held by the Fund are subject to a lien, granted to the lenders, to the extent of the borrowing outstanding and any additional expenses.

Note 4. Credit and Market Risk

The yields of emerging market debt obligations reflect, among other things, perceived credit risk. The Fund's investment in securities rated below investment grade typically involves risks not associated with higher rated securities including, among others, overall greater risk of timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund's investment in non-dollar-denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations. At August 31, 2004, the Fund had a concentration of risk in sovereign debt of emerging market countries.

ITEM 2. CONTROLS AND PROCEDURES.

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")) are effective as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the disclosure controls and procedures required by Rule 30a-3(b) under the 1940 Act and 15d-15(b) under the Securities Exchange Act of 1934.
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant's last fiscal quarter that have materially affected, or are likely to materially affect the registrant's internal control over financial reporting.
