AGENDUM 5. APPROVAL OF PREVIOUSLY GRANTED STOCK OPTIONS

On October 29, 2004, the board of directors of Kookmin Bank approved and ratified the granting of stock options to Mr. Chung Won Kang, who was nominated as the President & CEO of Kookmin Bank by the board of directors, which nomination was approved at an extraordinary shareholders meeting held on October 29, 2004.

Pursuant to Article 13 of the Articles of Incorporation, a board of directors resolution granting stock options is subject to approval and ratification at the first shareholders meeting held after the grant date.

The purpose of this grant of stock options is to motivate the grantee to achieve certain business targets and achieve responsible management, as the number of options that will be exercisable will be performance-based. The class of stock to be granted is Kookmin Bank's registered common shares.

1. Grant Date: November 1, 2004

2. Number of Stock Options: 700,000 shares

500,000 stock options: Linked to ROE of 25% and BIS Ratio of 12%¹

Of the options granted, with respect to options to purchase 500,000 shares, the grantee's performance will be evaluated against business targets of a ROE of 25% and a BIS Capital Adequacy Ratio of 12%, weighted 60% and 40% respectively. More specifically, the number of options that will be exercisable will correspond to achievement of specific ROE (for the twelve months ended to the third quarter of 2007) and BIS Capital Adequacy Ratio (as of the end of the third quarter of 2007) targets. If both the ROE and BIS Ratio fall below 10%, the stock options granted shall not be exercisable. In the event of the grantee's early retirement, the ROE and BIS Ratio at the end of the quarter immediately preceding such early retirement shall be applied, for purposes of determining the number of options that will be exercisable.

¹ Applying Financial Supervisory Service Standard

Table of Contents**Exercisable number of options corresponding to ROE**

(Unit :%)

ROE(%)	Less than 10	10 or more but less than 13	13 or more but less than 16	16 or more but less than 19	19 or more but less than 22	22 or more but less than 25	25 or more
Percentage of options that are exercisable	Not exercisable	50%	60%	70%	80%	90%	100%

Exercisable number of options corresponding to BIS Ratio

(Unit:%)

BIS Ratio (%)	Less than 10.0	10.0 or more but less than 10.5	10.5 or more but less than 11.0	11.0 or more but less than 11.5	11.5 or more but less than 12.0	12.0 or more
Percentage of options that are exercisable	Not exercisable	60%	70%	80%	90%	100%

200,000 stock options: Linked to TRS (Total Return to Shareholders)

Of the options granted, with respect to options to purchase 200,000 shares, the number of options exercisable will be indexed to TRS. If TRS is 60% or more (rounded down to nearest whole integer) of the rate of increase in the KOSPI banking industry index, the entire number of granted options is exercisable. In the event that TRS is less than 60%, all granted stock options shall be cancelled.

Formula 1

TRS = { closing price as of the beginning date of exercise period + dividend per shares (from the grant date to the beginning date of exercise period²) } / closing price as of the date of grant } / closing price as of the date of grant × 100

Formula 2

Edgar Filing: KOOKMIN BANK - Form 6-K

Rate of increase in the KOSPI banking industry index = $\frac{\text{KOSPI banking industry index as of the beginning date of the exercise period} - \text{KOSPI banking industry index as of the date of grant}}{\text{KOSPI banking industry index as of the date of grant}} \times 100$

2. In the event the grantee resigns prior to the end of his originally designated term, the cut-off date for the TRS and the rate of increase in the KOSPI banking industry index shall be such early resignation date.

Table of Contents

Exercisable number of options corresponding to TRS

(Unit : %)

TRS	Rate of increase in the KOSPI banking industry index					
	Less than 60%	60% or more but less than 70%	70% or more but less than 80%	80% or more but less than 90%	90% or more but less than 100%	100% or more
Percentage of options that are exercisable	Not exercisable	60%	70%	80%	90%	100%

3. Exercise Price

Formula

Exercise price = 37,600 Won x (1 + rate of increase for the KOSPI banking industry index x 0.4)

Rate of increase for the KOSPI banking industry index = (KOSPI banking industry index as of the beginning date of the exercise period ³ KOSPI banking industry index as of the date of grant) / KOSPI banking industry index as of the date of grant.

Any negative rate of increase in the KOSPI banking industry index is not reflected in the calculation, and therefore, the exercise price will be 37,600 Won. Amounts of less than 100 Won shall be rounded up in the calculated price.

4. Method of Exercise

Kookmin Bank may choose one of the following methods of compensation in respect of any exercise of stock options: 1) granting newly issued shares; 2) granting treasury shares; or 3) granting cash or treasury shares for the difference between the exercise price and the market price in the event that the exercise price is lower than the market price.

5. Exercise Period: From November 2, 2007 to November 1, 2012

6. Adjustment to Exercise Price and Number of Options

Edgar Filing: KOOKMIN BANK - Form 6-K

In the event of any issue of new shares, stock dividend, transfer of reserves to capital, stock split, reverse of split, or merger, which require adjustments of the price or the numbers of stock after the option grant date, adjustment shall be made as needed in accordance with the resolutions reached by the board of directors.

3. KOSPI banking industry index as of the date of resignation will be applied in the event the grantee resigns during the course of three years.

Table of Contents

7. Adjustment Following the Early Retirement

If the grantee resigns or ceases employment with the Bank within three years from the grant date, and requisite conditions for the exercise of options have been met, the grantee will be entitled to exercise his exercisable number of options, provided such number shall be adjusted according to the following formula. Fractions of a share will be rounded down.

Formula

Exercisable number of shares= Number of shares adjusted according to performance evaluation scoring x Number of Calendar Days at Work / 3 Years
