Cautionary Statement Regarding Forward-Looking Statements

The Company makes forward-looking statements in this Form 10-K that are subject to risks and uncertainties. These forward-looking statements include statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy and financial and other goals. The words believes, expects, may, will, should, projects, contemplates, anticipates, forecasts, intends, or other similar terms are intended to identify forward-looking statements. These forward-looking statements are subject to significant uncertainties because they are based upon or are affected by factors including:

the Company may be adversely affected by economic conditions in the market area;

successful management of credit risk including certain concentrations in loans secured by real estate;

risks inherent in the loan portfolio such as repayment risks, fluctuating collateral values and concentrations;

the adequacy of the allowance for loan losses related to changes in general economic and business conditions in the market area;

the reliance on secondary sources, such as Federal Home Loan Bank advances, sales of securities and loans, federal funds lines of credit from correspondent banks and out-of-market time deposits, to meet liquidity needs;

effects of soundness of other financial institutions;

the ability to raise capital as needed;

difficult market conditions in the Company's industry;

uncertain outcome of recently enacted legislation to stabilize the U.S. financial system;

potential impact on the Company of recently enacted legislation;

competition with other banks and financial institutions, and companies outside of the banking industry, including those companies that have substantially greater access to capital, liquidity and other resources;

the successful management of interest rate risk;

reliance on the management team, including the ability to attract and retain key personnel;

the limited trading market in the Company's common stock;

unprecedented levels of market volatility; and

other factors identified in Item 1A, "Risk Factors", below.

Because of these uncertainties, actual future results may be materially different from the results indicated by these forward-looking statements. In addition, past results of operations do not necessarily indicate future results.

Item 1. Business
General

First National Corporation (the Company) is a financial holding company incorporated under the laws of the Commonwealth of Virginia on September 7, 1983. The Company owns all of the stock of its primary operating subsidiary, First Bank (the Bank), which is an independent commercial bank chartered under the laws of the Commonwealth of Virginia. The Company is also the parent company of First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities.

The Bank first opened for business on July 1, 1907 under the name The Peoples National Bank of Strasburg. On January 10, 1928, the Bank changed its name to The First National Bank of Strasburg. On April 12, 1994, the Bank received approval from the Federal Reserve Bank of Richmond (the Federal Reserve) and the Virginia State Corporation Commission's Bureau of Financial Institutions to convert to a state chartered bank with membership in the Federal Reserve System. On June 1, 1994, the Bank consummated such conversion and changed its name to First Bank.

The Bank has one wholly owned subsidiary, First Bank Financial Services, Inc., incorporated under the laws of the Commonwealth of Virginia, which invests in partnerships that provide title insurance and investment services.

Table of Contents

Access to Filings

The Company's internet address is www.therespowerinone.com. The Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and amendments to those reports, as filed with or furnished to the Securities and Exchange Commission (the SEC), are available free of charge at www.therespowerinone.com as soon as reasonably practicable after being filed with or furnished to the SEC. A copy of any of the Company's filings will be sent, without charge, to any shareholder upon written request to: M. Shane Bell, Chief Financial Officer, at 112 West King Street, Strasburg, Virginia 22657.

Products and Services

The Bank provides loan, deposit, investment, trust and asset management and other products and services in the northern Shenandoah Valley region of Virginia. Loan products and services include personal loans (including automobile and property improvement loans), residential mortgages, home equity loans and commercial loans. Deposit products and services include checking, savings, NOW accounts, money market accounts, IRA accounts, certificates of deposit, cash management and direct deposit services. The Bank offers other services, including safe deposit rentals, travelers and gift cards, internet banking, wire transfer services, remote deposit capture and other traditional banking services.

The Bank's Trust and Asset Management Department offers a variety of trust and asset management services including estate planning, investment management of assets, trustee under an agreement, trustee under a will, individual retirement accounts, estate settlement and benefit plans. The Bank offers financial planning and brokerage services for its customers through its investment division, First Financial Advisors.

The Bank's primary market area is located within the northern Shenandoah Valley region of Virginia, including Shenandoah County, Warren County, Frederick County and the City of Winchester. Within the market area there are various types of industry including medical and professional services, manufacturing, retail and higher education. Customers include individuals, small and medium-sized businesses, local governmental entities and non-profit organizations.

The Bank's products and services are provided through 11 branch offices, 30 ATMs and its website, www.therespowerinone.com. The Bank operates six of its offices under the "Financial Center" concept. A Financial Center offers all of the Bank's financial services at one location. This concept allows loan, deposit, trust and investment advisory personnel to be readily available to serve customers throughout the Bank's market area. For the location of each of these Financial Centers, see Item 2 of this Form 10-K below.

Competition

The Company competes with other community banks, large financial institutions, savings banks, consumer finance companies, insurance companies, credit unions, internet-based banks and money market mutual funds. Competition has been increasing from out-of-state banks through their acquisition of Virginia-based banks and branches and from other financial institutions through use of internet banking.

The financial service business in Virginia, and specifically in the Company's market area, is highly competitive. Advantages larger financial institutions have over the Company include the ability to support wide-ranging advertising campaigns, raise larger amounts of capital and have substantially higher lending limits. Credit unions have a competitive advantage because they have more favorable tax treatment than the Company and can pass those savings on to their customers through lower loan rates and higher deposit rates.

Factors affecting the competition for loans and deposits are interest rates and terms offered, the number and location of branches and types of products offered, as well as the reputation of the institution. Advantages the Company has over the competition include long-term customer relationships, a commitment to excellent customer service, dedicated and loyal employees, local management and directors, and the support and involvement in the communities that the Company serves. The Company focuses on providing products and services to individuals, small to medium-sized businesses and local governmental entities within its communities. According to Federal Deposit Insurance Corporation (FDIC) deposit data as of June 30, 2008, the Bank was ranked first in Shenandoah County with \$202.9 million in deposits, representing 28% of the total deposit market; third in Warren County with \$76.9 million or 16% of the market; fourth in Frederick County with \$51.5 million or 10% of the market; and sixth in the City of Winchester with \$132.5 million or 8% of the market.

No material part of the business of the Company is dependent upon a single or a few customers, and the loss of any single customer would not have a materially adverse effect upon the business of the Company.

Table of Contents

Employees

At December 31, 2008, the Company and the Bank employed a total of 160 full-time equivalent employees. The Company considers relations with its employees to be excellent.

SUPERVISION AND REGULATION

General

As a financial holding company, the Company is subject to regulation under the Bank Holding Company Act of 1956, as amended, and the supervision, examination and reporting requirements of the Board of Governors of the Federal Reserve System. As a state-chartered commercial bank, the Bank is subject to regulation, supervision and examination by the Virginia State Corporation Commission's Bureau of Financial Institutions. Other federal and state laws, including various consumer and compliance laws, govern the activities of the Bank, the investments that it makes and the aggregate amount of loans that it may grant to one borrower. Laws and regulations administered by the regulatory agencies also affect corporate practices, including business practices related to payment and charging of interest, documentation and disclosures, and affect the ability to open and close offices or purchase other entities.

The following description summarizes the significant federal and state laws applicable to the Company's industry. To the extent that statutory or regulatory provisions are described, the description is qualified in its entirety by reference to that particular statutory or regulatory provision.

The Bank Holding Company Act

Under the Bank Holding Company Act, the Company is subject to periodic examination by the Federal Reserve and required to file periodic reports regarding its operations and any additional information that the Federal Reserve may require. Activities at the bank holding company are limited to:

banking, managing or controlling banks;

furnishing services to or performing services for its subsidiaries; and

engaging in other activities that the Federal Reserve has determined by regulation or order to be so closely related to banking as to be a proper incident to these activities.

Some of the activities that the Federal Reserve Board has determined by regulation to be closely related to the business of a bank holding company include making or servicing loans and specific types of leases, performing specific data processing services and acting in some circumstances as a fiduciary or investment or financial adviser.

With some limited exceptions, the Bank Holding Company Act requires every bank holding company to obtain the prior approval of the Federal Reserve before:

acquiring substantially all the assets of any bank;

acquiring direct or indirect ownership or control of any voting shares of any bank if after such acquisition it would own or control more than 5% of the voting shares of such bank (unless it already owns or controls the majority of such shares); or

merging or consolidating with another bank holding company.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

In addition, and subject to some exceptions, the Bank Holding Company Act and the Change in Bank Control Act, together with their regulations, require Federal Reserve approval prior to any person or company acquiring control of a bank holding company. Control is conclusively presumed to exist if an individual or company acquires 25% or more of any class of voting securities of the bank holding company. Control is rebuttably presumed to exist if a person acquires 10% or more, but less than 25%, of any class of voting securities and either the company has registered securities under Section 12 of the Securities Exchange Act of 1934 or no other person owns a greater percentage of that class of voting securities immediately after the transaction. The regulations provide a procedure for challenging this rebuttable control presumption.

In November 1999, Congress enacted the Gramm-Leach-Bliley Act (the GLBA), which made substantial revisions to the statutory restrictions separating banking activities from other financial activities. Under the GLBA, bank holding companies that are well-capitalized and well-managed and meet other conditions can elect to become financial holding companies. As financial holding companies, they and their subsidiaries are permitted to acquire or engage in previously impermissible activities such as insurance underwriting, securities underwriting and distribution, travel agency activities, insurance agency activities, merchant banking and other activities that the Federal Reserve determines to be financial in nature or complementary to these activities. Financial holding companies continue to be subject to the overall oversight and supervision of the Federal Reserve, but the GLBA applies the concept of functional regulation to the activities conducted by subsidiaries. For example, insurance activities would be subject to supervision and regulation by state insurance authorities.

Table of Contents

Capital Requirements

The Federal Reserve Board has issued risk-based and leverage capital guidelines applicable to banking organizations that it supervises. Under the risk-based capital requirements, the Company and the Bank are each generally required to maintain a minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) of 8%. At least half of the total capital must be composed of Tier 1 Capital, which is defined as common equity, retained earnings and qualifying perpetual preferred stock, less certain intangibles. The remainder may consist of Tier 2 Capital, which is defined as specific subordinated debt, some hybrid capital instruments and other qualifying preferred stock and a limited amount of the loan loss allowance. Trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. In addition, each of the federal banking regulatory agencies has established minimum leverage capital requirements for banking organizations. Under these requirements, banking organizations must maintain a minimum ratio of Tier 1 capital to adjusted average quarterly assets equal to 3% to 5%, subject to federal bank regulatory evaluation of an organization's overall safety and soundness.

The risk-based capital standards of the Federal Reserve Board explicitly identify concentrations of credit risk and the risk arising from non-traditional activities, as well as an institution's ability to manage these risks, as important factors to be taken into account by the agency in assessing an institution's overall capital adequacy. The capital guidelines also provide that an institution's exposure to a decline in the economic value of its capital due to changes in interest rates be considered by the agency as a factor in evaluating a banking organization's capital adequacy.

The FDIC may take various corrective actions against any undercapitalized bank and any bank that fails to submit an acceptable capital restoration plan or fails to implement a plan accepted by the FDIC. These powers include, but are not limited to, requiring the institution to be recapitalized, prohibiting asset growth, restricting interest rates paid, requiring prior approval of capital distributions by any bank holding company that controls the institution, requiring divestiture by the institution of its subsidiaries or by the holding company of the institution itself, requiring new election of directors, and requiring the dismissal of directors and officers. The Company and the Bank presently maintain sufficient capital to remain in compliance with these capital requirements.

On March 13, 2009, the Company received an investment in the Company's preferred stock totaling \$13.9 million from the Company's participation in the Troubled Asset Relief Program (TARP) Capital Purchase Program (Capital Purchase Program) under the Emergency Economic Stabilization Act of 2008 (EESA). As a result of this investment, the Company expects capital ratios to increase at the end of the first quarter of 2009.

Dividends

The Company is a legal entity separate and distinct from its banking and other subsidiaries. The majority of the Company's revenues are from dividends paid to the Company by the Bank. The Bank is subject to laws and regulations that limit the amount of dividends it can pay. In addition, both the Company and the Bank are subject to various regulatory restrictions relating to the payment of dividends, including requirements to maintain capital at or above regulatory minimums. Banking regulators have indicated that banking organizations should generally pay dividends only if the organization's net income available to common shareholders over the past year has been sufficient to fully fund the dividends and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition. The Company does not expect that any of these laws, regulations or policies will materially affect the ability of the Bank to pay dividends. During the year ended December 31, 2008, the Bank transferred \$5.1 million in dividends to the Company. As of December 31, 2008, the aggregate amount of unrestricted funds which could be transferred from the Bank to the Company, without prior regulatory approval, totaled \$8.3 million.

The FDIC has the general authority to limit the dividends paid by insured banks if the payment is deemed an unsafe and unsound practice. The FDIC has indicated that paying dividends that deplete a bank's capital base to an inadequate level would be an unsound and unsafe banking practice.

In connection with the Company's participation in the Capital Purchase Program established by the U.S. Department of the Treasury (the Treasury) under the EESA, the Company issued preferred stock to the Treasury on March 13, 2009. The Preferred Stock is in a superior ownership position compared to common stock. Dividends must be paid to the preferred stock holder before they can be paid to the common stock holder. In addition, prior to March 13, 2012, unless the Company has redeemed the Preferred Stock or the Treasury has transferred the Preferred Stock to a third party, the consent of the Treasury will be required for the Company to increase its common stock dividend or repurchase its common stock or other equity or capital securities, other than in

Table of Contents

certain circumstances specified in the Purchase Agreement. If the dividends on the Preferred Stock have not been paid for an aggregate of six (6) quarterly dividend periods or more, whether or not consecutive, the Company's authorized number of directors will be automatically increased by two (2) and the holders of the Preferred Stock will have the right to elect those directors at the Company's next annual meeting or at a special meeting called for that purpose; these two directors will be elected annually and will serve until all accrued and unpaid dividends for all past dividend periods have been declared and paid in full.

Deposit Insurance and Assessments

The deposits of the Bank are insured by the FDIC up to the limits set forth under applicable law. The deposits of the Bank are subject to the deposit insurance assessments of the Deposit Insurance Fund (DIF) of the FDIC. The FDIC has implemented a risk-based deposit insurance assessment system for well-capitalized and well-managed banks under which the assessment rate for an insured institution may vary according to regulatory capital levels of the institution and other factors, including supervisory evaluations. In addition, the FDIC has authority to impose special assessments from time to time.

The FDIC is authorized to prohibit any DIF-insured institution from engaging in any activity that the FDIC determines by regulation or order to pose a serious threat to the respective insurance fund. Also, the FDIC may initiate enforcement actions against banks, after first giving the institution's primary regulatory authority an opportunity to take such action. The FDIC may terminate the deposit insurance of any depository institution if it determines, after a hearing, that the institution has engaged or is engaging in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, order or any condition imposed in writing by the FDIC. It also may suspend deposit insurance temporarily during the hearing process for the permanent termination of insurance, if the institution has no tangible capital. If deposit insurance is terminated, the deposits at the institution at the time of termination, less subsequent withdrawals, shall continue to be insured for a period from six months to two years, as determined by the FDIC. The Company is not aware of any existing circumstances that could result in termination of any of the Bank's deposit insurance.

In an effort to restore capitalization levels and to ensure the DIF will adequately cover projected losses from future bank failures, the FDIC, in October 2008, proposed a rule to alter the way in which it differentiates for risk in the risk-based assessment system and to revise deposit insurance assessment rates, including base assessment rates. For Risk Category 1 institutions that have long-term debt issuer ratings, the FDIC proposes (i) to determine the initial base assessment rate using a combination of weighted-average CAMELS component ratings, long-term debt issuer ratings (converted to numbers and averaged) and the financial ratios method assessment rate (as defined), each equally weighted and (ii) to revise the uniform amount and the pricing multipliers. The FDIC also proposed to introduce three adjustments that could be made to an institution's initial base assessment rate, including (i) a potential decrease of up to 2 basis points for long-term unsecured debt, including senior and subordinated debt, (ii) a potential increase for secured liabilities in excess of 15% of domestic deposits and (iii) for non-Risk Category 1 institutions, a potential increase for brokered deposits in excess of 10% of domestic deposits. The Company is considered a Risk Category 1 institution based on the FDIC's assessment system. In addition, the FDIC proposed raising the current rates uniformly by 7 basis points for the assessment for the first quarter of 2009 resulting in annualized assessment rates for Risk Category 1 institutions ranging from 12 to 14 basis points. The proposal for first quarter 2009 assessment rates was adopted as a final rule in December 2008.

In February 2009, the FDIC adopted a final rule that sets assessment rates and makes adjustments that improve how the assessment system differentiates for risk. Under the final rule, banks in the best risk category will pay initial base rates ranging from 12 to 16 basis points, beginning on April 1, 2009. The assessment rate for the Company was 7 basis points for the fourth quarter of 2008. The FDIC also adopted an interim rule imposing a 20 basis point emergency special assessment on the financial institution industry on June 30, 2009. The assessment is to be collected on September 30, 2009. The interim rule would also permit the FDIC to impose an emergency special assessment after June 30, 2009, of up to 10 basis points if necessary to maintain public confidence in federal deposit insurance.

All FDIC-insured depository institutions must pay an annual assessment to provide funds for the payment of interest on bonds issued by the Financing Corporation, a federal corporation chartered under the authority of the Federal Housing Finance Board. The bonds, commonly referred to as Financing Corporation (FICO) bonds, were issued to capitalize the Federal Savings and Loan Insurance Corporation. The FICO assessments rates are adjusted quarterly to reflect changes in the assessment bases of the FDIC's insurance funds and do not vary depending on a depository institution's capitalization or supervisory evaluations.

The Company cannot provide any assurance as to the amount of any proposed increase in its deposit insurance premium rate, should such an increase occur, as such changes are dependent upon a variety of factors, some of which are beyond the Company's control.

Temporary Liquidity Guarantee Program

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

On November 21, 2008, the Board of Directors of the FDIC adopted a final rule relating to the Temporary Liquidity Guarantee Program (TLG Program). The TLG Program was announced by the FDIC on October 14, 2008, preceded by the determination of systemic risk by the Secretary of the Department of Treasury (after consultation with the President), as an initiative to counter the

Table of Contents

system-wide crisis in the nation's financial sector. Under the TLG Program the FDIC will (i) guarantee, through the earlier of maturity or June 30, 2012, certain newly issued senior unsecured debt issued by participating institutions on or after October 14, 2008, and before June 30, 2009 and (ii) provide full FDIC deposit insurance coverage for non-interest bearing transaction deposit accounts, Negotiable Order of Withdrawal (NOW) accounts paying less than 0.5% interest per annum and Interest on Lawyers Trust Accounts held at participating FDIC-insured institutions through December 31, 2009. Coverage under the TLG Program was available for the first 30 days without charge. The fee assessment for coverage of senior unsecured debt ranges from 50 basis points to 100 basis points per annum, depending on the initial maturity of the debt. The fee assessment for deposit insurance coverage is 10 basis points per quarter on amounts in covered accounts exceeding \$250,000. On December 5, 2008, the Corporation elected to participate in both guarantee programs.

USA Patriot Act

The USA Patriot Act became effective on October 26, 2001 and provides for the facilitation of information sharing among governmental entities and financial institutions for the purpose of combating terrorism and money laundering. Among other provisions, the USA Patriot Act permits financial institutions, upon providing notice to the United States Treasury, to share information with one another in order to better identify and report to the federal government concerning activities that may involve money laundering or terrorism. The USA Patriot Act is considered a significant banking law in terms of information disclosure regarding certain customer transactions. Although it does create a reporting obligation, the USA Patriot Act has not materially affected the Bank's products, services or other business activities.

Safety and Soundness Standards

The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA), as amended by the Riegle Community Development and Regulatory Improvement Act of 1994, requires the federal bank regulatory agencies to prescribe standards, by regulations or guidelines, relating to internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, asset quality, earnings, stock valuation and compensation, fees and benefits, and such other operational and managerial standards as the agencies deem appropriate. Guidelines adopted by the federal bank regulatory agencies establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risk and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal stockholder. In addition, the agencies adopted regulations that authorize, but do not require, an agency to order an institution that has been given notice by an agency that it is not satisfying any of such safety and soundness standards to submit a compliance plan. If, after being so notified, an institution fails to submit an acceptable compliance plan or fails in any material respect to implement an acceptable compliance plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions of the types to which an undercapitalized institution is subject under the prompt corrective action provisions of FDIA. If an institution fails to comply with such an order, the agency may seek to enforce such order in judicial proceedings and to impose civil money penalties.

Community Reinvestment Act

Under the Community Reinvestment Act and related regulations, depository institutions have an affirmative obligation to assist in meeting the credit needs of their market areas, including low and moderate-income areas, consistent with safe and sound banking practice. The Community Reinvestment Act requires the adoption by each institution of a Community Reinvestment Act statement for each of its market areas describing the depository institution's efforts to assist in its community's credit needs. Depository institutions are periodically examined for compliance with the Community Reinvestment Act and are periodically assigned ratings in this regard. Banking regulators consider a depository institution's Community Reinvestment Act rating when reviewing applications to establish new branches, undertake new lines of business, and/or acquire part or all of another depository institution. An unsatisfactory rating can significantly delay or even prohibit regulatory approval of a proposed transaction by a bank holding company or its depository institution subsidiaries.

Privacy Legislation

Several regulations issued by federal banking agencies also provide protections against the transfer and use of customer information by financial institutions. A financial institution must provide to its customers information regarding its policies and procedures with respect to the handling of customers' personal information. Each institution must conduct an internal risk assessment of its ability to protect customer information. These privacy provisions generally prohibit a financial institution from providing a customer's personal financial information to unaffiliated parties without prior notice and approval from the customer.

Table of Contents

Emergency Economic Stabilization Act of 2008

In response to the financial crises affecting the banking system and financial markets and going concern threats to investment banks and other financial institutions, the EESA was signed into law on October 3, 2008. Pursuant to the EESA, the U.S. Treasury was given the authority to, among other things, purchase up to \$700 billion of mortgages, mortgage-backed securities and certain other financial instruments from financial institutions for the purpose of stabilizing and providing liquidity to the U.S. financial markets.

On October 14, 2008, Treasury Secretary Paulson, after consulting with the Federal Reserve and the FDIC, announced that the Department of the Treasury will purchase equity stakes in certain banks and thrifts. Under this program, known as the Capital Purchase Program, the Treasury will make \$250 billion of capital available to U.S. financial institutions in the form of preferred stock (from the \$700 billion authorized by the EESA). Participating financial institutions will be required to adopt the Treasury's standards for executive compensation and corporate governance for the period during which the Treasury holds equity issued under the Capital Purchase Program. Secretary Paulson also announced that nine large financial institutions agreed to participate in the Capital Purchase Program. The standards include a prohibition against incentives to take unnecessary and excessive risks, recovery of bonuses paid to senior executives based on materially inaccurate earnings or other statements and a prohibition against agreements for the payment of golden parachutes. Institutions that sell more than \$300 million in assets under TARP auctions or participate in the Capital Purchase Program will not be entitled to a tax deduction for compensation in excess of \$500,000 paid to its chief executive or chief financial official or any of its other three most highly compensated officers. In addition, any severance paid to such officers for involuntary termination or termination in connection with a bankruptcy or receivership will be subject to the golden parachute rules under the Internal Revenue Code. As a result of its participation in the Capital Purchase Program, the Company is subject to EESA, including the additional standards with respect to executive compensation and corporate governance for institutions enacted as part of ARRA, described below.

American Recovery and Reinvestment Act of 2009

The ARRA was enacted on February 17, 2009. The ARRA includes a wide variety of programs intended to stimulate the economy and provide for extensive infrastructure, energy, health, and education needs. In addition, the ARRA imposes certain new executive compensation and corporate governance obligations on all current and future TARP Capital Purchase Program recipients, including the Company, until the institution has redeemed the preferred stock, which TARP Capital Purchase Program recipients are now permitted to do under the ARRA without regard to the three year holding period and without the need to raise new capital, subject to approval of its primary federal regulator. The executive compensation restrictions under the ARRA (described below) are more stringent than those currently in effect under the TARP Capital Purchase Program, but it is yet unclear how these executive compensation standards will relate to the similar standards recently announced by the Treasury, or whether the standards will be considered effective immediately or only after implementing regulations are issued by the Treasury.

The ARRA amends Section 111 of the EESA to require the Secretary of the Treasury (the Secretary) to adopt additional standards with respect to executive compensation and corporate governance for TARP Capital Purchase Program recipients. The standards required to be established by the Secretary include, in part, (1) prohibitions on making golden parachute payments to senior executive officers and the next five most highly-compensated employees during such time as any obligation arising from financial assistance provided under the TARP Capital Purchase Program remains outstanding (the Restricted Period), (2) prohibitions on paying or accruing bonuses or other incentive awards for certain senior executive officers and employees, except for awards of long-term restricted stock with a value equal to no greater than 1/3 of the subject employee's annual compensation that do not fully vest during the Restricted Period or unless such compensation is pursuant to a valid written employment contract prior to February 11, 2009, (3) requirements that TARP Capital Purchase Program participants provide for the recovery of any bonus or incentive compensation paid to senior executive officers and the next 20 most highly-compensated employees based on statements of earnings, revenues, gains or other criteria later found to be materially inaccurate, and (4) a review by the Secretary of all bonuses and other compensation paid by TARP Capital Purchase Program participants to senior executive employees and the next 20 most highly-compensated employees before the date of enactment of the ARRA to determine whether such payments were inconsistent with the purposes of the Act with the Secretary having authority to negotiate for reimbursement.

The ARRA also sets forth additional corporate governance obligations for TARP Capital Purchase Program recipients, including requirements for the Secretary to establish standards that provide for semi-annual meetings of compensation committees of the board of directors to discuss and evaluate employee compensation plans in light of an assessment of any risk posed from such compensation plans. TARP Capital Purchase Program recipients are further required by the ARRA to have in place company-wide policies regarding excessive or luxury expenditures, permit non-binding shareholder say-on-pay proposals to be included in proxy materials, as well as require written certifications by the chief executive officer and chief financial officer with respect to compliance. The Secretary is required to promulgate regulations to implement the executive compensation and certain corporate governance provisions detailed in the ARRA.

Table of Contents

Item 1A. Risk Factors

An investment in the Company's common stock involves significant risks. The following risks and uncertainties should be read carefully and considered before deciding to invest in the Company's common stock. These risk factors may adversely affect the Company's financial condition and future earnings. In that event, the trading price of the Company's common stock could decline and you could lose all or a part of your investment. This section should be read together with the other information, including the consolidated financial statements and related notes to the consolidated financial statements included in Item 8 of this Form 10-K.

Recent Market, Legislative and Regulatory Events

Difficult market conditions have adversely affected the Company's industry.

Dramatic declines in the housing market over the past two years, with falling home prices and increasing foreclosures, unemployment and under-employment, have negatively impacted the credit performance of real estate related loans and resulted in significant write-downs of asset values by financial institutions. These write-downs, initially of mortgage-backed securities (MBS) but spreading to other securities and loans have caused many financial institutions to seek additional capital, to reduce or eliminate dividends, to merge with larger and stronger institutions and, in some cases, to fail. Reflecting concern about the stability of the financial markets generally and the strength of counterparties, many lenders and institutional investors have reduced or ceased providing funding to borrowers, including to other financial institutions. This market turmoil and tightening of credit have led to an increased level of commercial and consumer delinquencies, lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. The resulting economic pressure on consumers and lack of confidence in the financial markets has adversely affected the Company's business, financial condition and results of operations. Market developments may affect consumer confidence levels and may cause adverse changes in payment patterns, causing increases in delinquencies and default rates, which may impact charge-offs and the provision for loan losses. A worsening of these conditions would likely have an adverse effect on the Company and others in the financial services industry.

The soundness of other financial institutions could adversely affect the Company.

The Company's ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by the Company or by other institutions. Many of these transactions expose the Company to credit risk in the event of default of its counterparty or client. There is no assurance that any such losses would not materially and adversely affect the Company's results of operations.

There can be no assurance that enacted legislation or any proposed federal programs will stabilize the U.S. financial system, and such legislation and programs may adversely affect us.

There has been much legislative and regulatory action in response to the financial crises affecting the banking system and financial markets and threats to investment banks and other financial institutions. There can be no assurance, however, as to the actual impact that the legislation and its implementing regulations or any other governmental program will have on the financial markets. The failure of the actions by the legislators, the regulatory bodies or the U.S. government to stabilize the financial markets and a continuation or worsening of current financial market conditions could materially and adversely affect our business, financial condition, results of operations, and access to credit or the trading price of the Company's common shares.

Contemplated and proposed legislation, state and federal programs, and increased government control or influence may adversely affect the Company by increasing the uncertainty in the Company's lending operations and expose it to increased losses, including legislation that would allow bankruptcy courts to permit modifications to mortgage loans on a debtor's primary residence, moratoriums on a mortgagor's right to foreclose on property, and requirements that fees be paid to register other real estate owned property. Statutes and regulations may be altered that may potentially increase costs to service and underwrite mortgage loans. Additionally, federal intervention and operation of formerly private institutions may adversely affect the Company's rights under contracts with such institutions and the way in which the Company conducts business in certain markets.

Table of Contents

Business Risks

Company Risks

The Company may be adversely affected by economic conditions in its market area.

The Company is headquartered in the northern Shenandoah Valley region of Virginia. Because lending is concentrated in this market, the Company will be affected by the general economic conditions in the region. Changes in the economy may influence the growth rate of loans and deposits, the quality of the loan portfolio and loan and deposit pricing. A significant decline in general economic conditions caused by inflation, recession, unemployment or other factors beyond the Company's control would impact these local economic conditions and the demand for banking products and services generally, which could negatively affect the Company's performance and financial condition.

Deteriorating credit quality, particularly in real estate loans, has adversely impacted the Company and may continue to adversely impact the Company.

Early in 2008 the Company began to experience a downturn in the overall credit performance of the loan portfolio, as well as acceleration in the deterioration of general economic conditions. This deterioration, including a significant increase in national and regional unemployment levels, is the primary driver of the increased stress being placed on some borrowers and is negatively impacting their ability to repay. These conditions resulted in a \$15.4 million increase in non-performing assets and loans over 90 days past due during 2008. The Company's allowance for loan losses increased \$1.5 million to \$5.7 million at December 31, 2008, compared to \$4.2 million at December 31, 2007. Additional increases in loan loss reserves may be necessary in the future. Continued deterioration in the quality of the loan portfolio can have a material adverse effect on capital, financial condition, and results of operations.

The Bank's concentrations of loans could result in higher than normal risk of loan defaults and losses.

The Bank offers a variety of secured loans, including commercial lines of credit, commercial term loans, real estate, construction, home equity, consumer and other loans. The majority of the loans are secured by real estate (both residential and commercial) in the market area. At December 31, 2008, these loans totaled \$378.4 million, or 84%, of total loans. A major change in the real estate market, such as further deterioration in the value of this collateral, or in the local or national economy, could adversely affect customers' ability to pay these loans, which in turn could impact the Bank. Risk of loan defaults and foreclosures are unavoidable in the banking industry, and the Bank tries to limit exposure to this risk by monitoring extensions of credit carefully. The Bank cannot fully eliminate credit risk, and as a result credit losses may occur in the future.

If the Bank's allowance for loan losses becomes inadequate, results of operations may be adversely affected.

The Bank maintains an allowance for loan losses that it believes is a reasonable estimate of known and inherent losses in the loan portfolio. Through a periodic review and consideration of the loan portfolio, management determines the amount of the allowance for loan losses by considering economic conditions, credit quality of the loan portfolio, collateral supporting the loans, performance of customers relative to their financial obligations and the quality of the Bank's loan administration. The amount of future losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates that may be beyond the Bank's control, and these losses may exceed current estimates. Although the Company believes the allowance for loan losses is a reasonable estimate of known and inherent losses in the loan portfolio, such losses and the adequacy of the allowance for loan losses cannot be fully predicted. Excessive loan losses could have a material impact on financial performance. Earnings may also be negatively impacted by loan growth, which requires additions to the allowance for loan losses.

Federal and state regulators periodically review the allowance for loan losses and may require an increase to the provision for loan losses or recognition of further loan charge-offs, based on judgments different than those of management. Any increase in the amount of provision or loans charged-off as required by these regulatory agencies could have a negative effect on operating results.

The Company relies on secondary sources, such as Federal Home Loan Bank advances, sales of securities and loans, federal funds lines of credit from correspondent banks and out-of-market time deposits, to meet liquidity needs.

In managing the Company's consolidated balance sheet, the Company depends on secondary sources to provide sufficient liquidity to meet our commitments and business needs, and to accommodate the transaction and cash management needs of our clients. Other sources of funding available to us, and upon which we rely as regular components of our liquidity risk management strategy, include federal funds lines of credit, sales of securities and loans, brokered deposits and borrowings from the Federal Home Loan Bank system. Any occurrence that may limit our

access to these sources, such as a decline in the confidence of debt purchasers, or our depositors or counterparties, may adversely affect the Company's liquidity.

If the Company needs additional capital in the future, it may not be able to obtain it on terms that are favorable. This could negatively affect the Company's performance and the value of its common stock.

The Company anticipates that it will have sufficient capital to support asset growth and potential loan charge-offs. However, additional capital may be needed in the future to maintain capital levels. The ability to raise capital through the sale of additional securities will depend primarily upon the Company's financial condition and the condition of financial markets at that time. The Company may not be able to obtain additional capital in the amounts or on terms that are satisfactory. The Company's ability to grow its balance sheet may be constrained if it is unable to raise additional capital as needed.

Table of Contents

The Company may incur losses if unable to successfully manage interest rate risk.

The Company's profitability will depend substantially upon the spread between the interest rates earned on investments and loans and interest rates paid on deposits and other interest-bearing liabilities. Changes in interest rates, including the shape of the treasury yield curve, will affect the Company's financial performance and condition through the pricing of securities, loans, deposits and borrowings. The Company attempts to minimize exposure to interest rate risk, but will be unable to eliminate it. Our net interest spread will depend on many factors that are partly or entirely outside of the Company's control, including competition, federal economic, monetary and fiscal policies and general economic conditions.

The Company's long-term business strategy calls for continued growth. The Company may not be able to successfully manage growth or implement growth strategies, which may adversely affect results of operations and financial condition.

A key aspect of the business strategy is continued growth and expansion. The ability to continue to grow depends, in part, upon the ability to:

open new branch offices or acquire existing branches or other financial institutions;

attract deposits to those locations; and

identify attractive loan and investment opportunities.

The Company may not be able to successfully implement the growth strategy if it is unable to identify attractive markets, locations or opportunities to expand in the future. The ability to manage growth successfully will also depend on whether the Company can maintain capital levels adequate to support the growth, maintain cost controls and asset quality, and successfully integrate any businesses that may be acquired into the organization.

When the Company continues to implement its growth strategies by opening new branch offices or acquiring branches or other banks, increased personnel, occupancy and other operating expenses are expected. In the case of new branch offices, the Company must absorb higher expenses while attempting to generate new deposits. Further, there is a time lag involved in redeploying new deposits into attractively priced loans and other earning assets. Thus, plans to branch could depress earnings in the short term, even if the branching strategy is executed efficiently.

The Company relies heavily on its management team and the unexpected loss of any of those personnel could adversely affect operations; the Company depends on the ability to attract and retain key personnel.

The Company's future operating results depend substantially upon the continued service of its executive officers and key personnel. The Company's future operating results also depend in significant part upon its ability to attract and retain qualified management, financial, technical, marketing, sales and support personnel. Competition for qualified personnel is intense, and the Company cannot ensure success in attracting or retaining qualified personnel. There may be only a limited number of persons with the requisite skills to serve in these positions, and it may be increasingly difficult for the Company to hire personnel over time.

Our ability to retain key officers and employees may be further impacted by legislation and regulation affecting the financial services industry. For example, Section 7001 of the ARRA amended Section 111 of the EESA in its entirety, significantly expanding the executive compensation restrictions. While the U.S. Treasury must promulgate regulations to implement the restrictions and standards set forth in Section 7001, such restrictions apply to the Company as a participant in the Capital Purchase Program and shall generally continue to apply for as long as any Senior Preferred shares are outstanding. Such restrictions and standards may further impact management's ability to compete with financial institutions that are not subject to the same limitations as the Company under Section 7001 of the ARRA.

Changes in the Company's accounting policies or in accounting standards could materially affect how it reports financial results and condition.

From time to time, the Financial Accounting Standards Board (FASB) and SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be hard to predict and can materially impact how the Company records and reports its financial condition and results of operations. In some cases, the Company could be required to apply a new or revised standard

retroactively, resulting in restating prior period financial statements.

Table of Contents

There is a limited trading market for the Company's common stock; it may be difficult to sell shares after they have been purchased.

Shares of the Company's common stock are traded on the over-the-counter (OTC) market and quoted in the OTC Bulletin Board under the symbol FXNC. The volume of trading activity in the stock is relatively limited. Even if a more active market develops, there can be no assurance that such market will continue, or that shares will be able to be sold at or above the investment price. The lack of liquidity of the investment in the common shares should be carefully considered when making an investment decision.

Negative public opinion could damage our reputation and adversely impact business and revenues.

As a financial institution, the Company's earnings and capital are subject to risks associated with negative public opinion. Negative public opinion could result from our actual or alleged conduct in any number of activities, including lending practices, the failure of any product or service sold by us to meet our clients' expectations or applicable regulatory requirements, corporate governance and acquisitions, or from actions taken by government regulators and community organizations in response to those activities. Negative public opinion can adversely affect our ability to keep and attract and/or retain clients and can expose us to litigation and regulatory action. Actual or alleged conduct by one of our businesses can result in negative public opinion about our other businesses. Negative public opinion could also affect our ability to borrow funds in the unsecured wholesale debt markets.

Industry risks

Regulation by federal and state agencies could adversely affect the profitability of the business.

The Company is heavily regulated by federal and state agencies. This regulation is to protect depositors, the federal deposit insurance fund and the banking system as a whole. Congress and state legislatures and federal and state regulatory agencies continually review banking laws, regulations, and policies for possible changes. Changes to statutes, regulations, or regulatory policies, including interpretation or implementation of statutes, regulations, or policies, could affect the Company adversely, including limiting the types of financial services and products it may offer and/or increasing the ability of non-banks to offer competing financial services and products. Also, if the Company does not comply with laws, regulations, or policies, it could receive regulatory sanctions and damage to its reputation.

Under the EESA, Congress has the ability to impose after-the-fact terms and conditions on participants in the Capital Purchase Program administered under the Troubled Asset Relief Program. As a participant in the Capital Purchase Program, the Company is subject to any such retroactive legislation.

Future success is dependent on the ability to compete effectively in the highly competitive banking industry.

The Company faces vigorous competition from other financial institutions, including other commercial banks, savings and loan associations, savings banks, finance companies and credit unions for deposits, loans and other financial services in its market area. A number of these other financial institutions are significantly larger than the Company and have substantially greater access to capital and other resources, as well as larger lending limits and branch systems, and offer a wider array of banking services. To a limited extent the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, insurance companies and governmental organizations which may offer more favorable products and services than the Company. Many of the non-bank competitors are not subject to the same extensive regulations that govern the Company. As a result, the non-bank competitors have advantages over the Company in providing certain services. This competition may reduce or limit profit margins and market share and may adversely affect the results of operations and financial condition.

The Company may not pay dividends on common shares.

Holders of the Company's common shares are only entitled to receive such dividends as the Board of Directors may declare out of funds legally available for such payments. Although the Company has historically declared cash dividends on common shares, it is not required to do so and may reduce or eliminate common shares dividends in the future. This could adversely affect the market price of the Company's common shares. Also, the Company's ability to increase its dividend or to make other distributions is restricted due to participation in the Capital Purchase Program, which limits (without the consent of the Treasury) its ability to increase its dividend or to repurchase common shares for so long as any securities issued under such program remain outstanding.

The Company's ability to receive dividends from its subsidiaries accounts for most of its revenue and could affect liquidity and the ability to pay dividends.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The Company is a separate and distinct legal entity from its subsidiaries, including First Bank. The Company receives substantially all of its revenue from dividends from First Bank. These dividends are the principal source of funds to pay dividends on common and preferred stock and interest and principal on debt. Various federal and/or state laws and regulations limit the amount of

Table of Contents

dividends that the Bank may pay the Company. Limitations on the Company's ability to receive dividends from its subsidiary could have a material adverse effect on liquidity and on the ability to pay dividends on common shares. Additionally, if the Bank's earnings are not sufficient to make dividend payments to the Company while maintaining adequate capital levels, the Company may not be able to make dividend payments to its common shareholders.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

The following describes the location and general character of the principal offices of the Company.

The Company owns the headquarters building located at 112 West King Street, in Strasburg, Virginia. This location also serves as the Bank's Strasburg Financial Center, which primarily serves the banking needs of northern Shenandoah County customers. This three story building also houses administrative employees, including human resources and marketing. Loan and deposit operations, data processing and information technology employees are housed in the Operations Center. Financial accounting is housed in the Winchester Financial Center. Financial centers provide full service banking, including loan, deposit, trust and investment advisory services, while the bank branches primarily focus on depository and consumer lending functions. The following table provides the name, location, year opened and type of the Company's locations:

Name	Location	Year Opened	Type	Owned/Leased
Strasburg Financial Center	112 West King Street Strasburg, Virginia	1927	Financial Center	Owned
Front Royal Express	508 North Commerce Avenue Front Royal, Virginia	1985	Branch	Leased
Kernstown	3143 Valley Pike Winchester, Virginia	1994	Branch	Owned
South Woodstock	860 South Main Street Woodstock, Virginia	1995	Branch	Owned

Table of Contents

Rental expense for the leased locations totaled \$36 thousand for the year ended December 31, 2008. The lease for the Front Royal Express property expires on April 30, 2009 with a renewal option through April 30, 2013. The lease for the North Woodstock property expires on May 31, 2016, without a renewal option.

All of the Company's properties are in good operating condition and are adequate for the Company's present and future needs.

Item 3. Legal Proceedings

There are no material pending legal proceedings to which the Company is a party or to which the property of the Company is subject.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders of the Company during the fourth quarter of the fiscal year covered by this report through a solicitation of proxies or otherwise.

Part II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**
Market Prices and Dividends

Shares of the common stock of the Company are traded on the over-the-counter (OTC) market and quoted in the OTC Bulletin Board under the symbol FXNC. As of March 20, 2009 the Company had approximately 682 shareholders of record and at least 523 additional beneficial owners of shares of common stock.

Following are the high and low prices of sales of common stock known to the Company, along with the dividends that were paid quarterly in 2008 and 2007.

	Market Prices and Dividends (<i>per share</i>)		
	Sales Price (\$)		Dividends (\$) ⁽¹⁾
	High	Low	
2008:			
1 st quarter	23.89	21.00	0.14
2 nd quarter	23.45	19.45	0.14
3 rd quarter	21.50	19.10	0.14
4 th quarter	20.00	14.75	0.14
2007:			
1 st quarter	28.00	25.87	0.13
2 nd quarter	28.50	24.00	0.13
3 rd quarter	24.25	21.50	0.13
4 th quarter	25.00	21.50	0.14

⁽¹⁾ The Company increased its annual dividend to \$0.56 per share in 2008, which represented a dividend payout ratio of 38.61%. The dividend per share and dividend payout ratio in 2007 was \$0.53 and 26.79%, respectively. The dividend payout ratio is computed by dividing aggregate cash dividends by net income.

Table of Contents

Dividend Policy

The Company's future dividend policy is subject to the discretion of its Board of Directors and will depend upon a number of factors, including future earnings, financial condition, liquidity and capital requirements of both the Company and the Bank, applicable governmental regulations and policies and other factors deemed relevant by its Board of Directors.

The Company is organized under the Virginia Stock Corporation Act, which prohibits the payment of a dividend if, after giving it effect, the corporation would not be able to pay its debts as they become due in the usual course of business. The payment of a dividend is also prohibited if the corporation's total assets would be less than the sum of its total liabilities plus the amount that would be needed, if the corporation were to be dissolved, to satisfy the preferential rights upon dissolution of any preferred shareholders.

The Company is a legal entity separate and distinct from its subsidiaries. Its ability to distribute cash dividends will depend primarily on the ability of the Bank to pay dividends to it, and the Bank is subject to laws and regulations that limit the amount of dividends that it can pay. As a state member bank, the Bank is subject to certain restrictions imposed by the reserve and capital requirements of federal and Virginia banking statutes and regulations. Under Virginia law, a bank may not declare a dividend in excess of its undivided profits. Additionally, under Federal Reserve regulations, the Bank may not declare a dividend if the total amount of all dividends, including the proposed dividend, declared by it in any calendar year exceeds the total of its retained net income of that year to date, combined with its retained net income of the two preceding years, unless the dividend is approved by the Federal Reserve. The Federal Reserve and the Commonwealth of Virginia have the general authority to limit the dividends paid by insured banks if the payment is deemed an unsafe and unsound practice. Both the Commonwealth of Virginia and the Federal Reserve have indicated that paying dividends that deplete a bank's capital base to an inadequate level would be an unsound and unsafe banking practice. Under the Federal Reserve's regulations, the Bank may not declare or pay any dividend in excess of its net income for the current year plus any retained net income from the prior two calendar years.

The Company is subject to certain regulatory requirements to maintain capital at or above regulatory minimums. These regulatory requirements regarding capital affect its dividend policies. The Federal Reserve has indicated that a bank holding company should generally pay dividends only if its net income available to common shareholders over the past year has been sufficient to fully fund the dividends, and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition.

In connection with our participation in the Capital Purchase Program established by the Treasury under the EESA, the Company issued preferred stock to the Treasury on March 13, 2009. The Preferred Stock is in a superior ownership position compared to common stock. Dividends must be paid to the preferred stock holder before they can be paid to the common stock holder. In addition, prior to March 13, 2012, unless the Company has redeemed the Preferred Stock or the Treasury has transferred the Preferred Stock to a third party, the consent of the Treasury will be required for the Company to increase its common stock dividend or repurchase its common stock or other equity or capital securities, other than in certain circumstances specified in the Purchase Agreement. If the dividends on the Preferred Stock have not been paid for an aggregate of six (6) quarterly dividend periods or more, whether or not consecutive, the Company's authorized number of directors will be automatically increased by two (2) and the holders of the Preferred Stock will have the right to elect those directors at the Company's next annual meeting or at a special meeting called for that purpose; these two directors will be elected annually and will serve until all accrued and unpaid dividends for all past dividend periods have been declared and paid in full.

Stock Repurchases

The Company did not repurchase any shares of its common stock during the fourth quarter of 2008.

Table of Contents**Stock Performance Graph**

The following graph compares the cumulative total return to the shareholders of the Company for the last five fiscal years with the total return on the S&P 500, NASDAQ-Total U.S. and the SNL Bank Index \$500M-\$1B, assuming an investment of \$100 in shares of Common Stock on December 31, 2003, and the reinvestment of dividends.

⁽¹⁾ The efficiency ratio is computed by dividing non-interest expense by the sum of net interest income on a tax equivalent basis and non-interest income excluding securities gains and losses. This is a non-GAAP financial measure that the Company believes provides investors with important information regarding operational efficiency. Such information is not prepared in accordance with U.S. generally accepted accounting principles (GAAP) and should not be construed as such. Net interest income on a tax equivalent basis was \$18,442, \$18,391, \$17,824, \$16,529 and \$13,572 for 2008, 2007, 2006, 2005 and 2004, respectively. Non-interest income excluding securities gains and losses was \$5,949, \$6,175, \$5,167, \$4,511 and \$4,431 for 2008, 2007, 2006, 2005 and 2004, respectively. Management believes such financial information is meaningful to the reader in understanding operating performance, but cautions that such information not be viewed as a substitute for GAAP. The Company, in referring to its net income, is referring to income under generally accepted accounting principles, or GAAP. See Non-GAAP Financial Measures included in Item 7 of this Form 10-K.

⁽²⁾ Amounts have been restated to reflect a two-for-one stock split that was declared on March 16, 2005 and payable on April 29, 2005 to shareholders of record as of March 30, 2005.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

The following discussion and analysis of the financial condition and results of operations of the Company for the years ended December 31, 2008, 2007 and 2006 should be read in conjunction with the consolidated financial statements and related notes to the consolidated financial statements included in Item 8 of this Form 10-K.

Executive Overview

Recent Market Developments

In response to the financial crises affecting the banking system and financial markets and going concern threats to investment banks and other financial institutions, on October 3, 2008, the Emergency Economic Stabilization Act of 2008 (the EESA) was signed into law. Pursuant to the EESA, the U.S. Treasury was given the authority to, among other things, purchase up to \$700 billion of mortgages, mortgage-backed securities and certain other financial instruments from financial institutions for the purpose of stabilizing and providing liquidity to the U.S. financial markets.

On October 14, 2008, the Secretary of the Department of the Treasury announced that the Department of the Treasury will purchase equity stakes in a wide variety of banks and thrifts. Under the program, known as the Troubled Asset Relief Program Capital Purchase Program (Capital Purchase Program), from the \$700 billion authorized by the EESA, the Treasury made \$250 billion of capital available to U.S. financial institutions in the form of senior preferred stock. In conjunction with the purchase of senior preferred stock, the Treasury will receive, from participating financial institutions, warrants to purchase, upon net settlement, additional stock of such institutions. Participating financial institutions were required to adopt the Treasury's standards for executive compensation and corporate governance for the period during which the Treasury holds equity issued under the Capital Purchase Program.

On March 13, 2009, the Company entered into a Letter Agreement and Securities Purchase Agreement Standard Terms (collectively, the Purchase Agreement) with the Treasury Department, pursuant to which the Company sold (i) 13,900 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$1.25 per share and liquidation preference \$1,000 per share (the Preferred Stock) and (ii) a warrant (the Warrant) to purchase 695 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series B (the Warrant Preferred Stock), at an exercise price of \$1.25 per share, for an aggregate purchase price of \$13.9 million in cash. The Treasury immediately exercised the Warrant and, after net settlement, received 695 shares of the Company's Warrant Preferred Stock, which has a liquidation preference amount of \$1,000 per share. Closing of the sale occurred on March 13, 2009 and increased total capital by \$13.9 million.

On November 21, 2008, the Board of Directors of the Federal Deposit Insurance Corporation (FDIC) adopted a final rule relating to the Temporary Liquidity Guarantee Program (TLG Program). The TLG Program was announced by the FDIC on October 14, 2008, preceded by the determination of systemic risk by the Secretary of the Department of Treasury (after consultation with the President), as an initiative to counter the system-wide crisis in the nation's financial sector. Under the TLG Program the FDIC will (i) guarantee, through the earlier of maturity or June 30, 2012, certain newly issued senior unsecured debt issued by participating institutions on or after October 14, 2008, and before June 30, 2009 and (ii) provide full FDIC deposit insurance coverage for non-interest bearing transaction deposit accounts, Negotiable Order of Withdrawal (NOW) accounts paying less than 0.5% interest per annum and Interest on Lawyers Trust Accounts (IOLTA) held at participating FDIC-insured institutions through December 31, 2009. Coverage under the TLG Program was available for the first 30 days without charge. The fee assessment for coverage of senior unsecured debt ranges from 50 basis points to 100 basis points per annum, depending on the initial maturity of the debt. The fee assessment for deposit insurance coverage is 10 basis points per quarter on amounts in covered accounts exceeding \$250,000. On December 5, 2008, the Corporation elected to participate in both guarantee programs.

The Company

First National Corporation (the Company) is the financial holding company of First Bank (the Bank), First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. The Bank owns First Bank Financial Services, Inc., which invests in partnerships that provide title insurance and investment services.

Products, Services, Customers and Locations

The Bank offers loan, deposit, trust and investment products and services through 11 offices, 30 ATMs and its website, www.therespowerinone.com, for both individuals and businesses. Customers include individuals, small and medium-sized businesses, governmental entities and non-profit organizations in the northern Shenandoah Valley region of Virginia.

Table of Contents

Revenue Sources and Expense Factors

The Company's primary source of revenue is from net interest income earned by the Bank. Net interest income is the difference between interest income and interest expense and represents approximately 75% of the Company's total revenue. Interest income is determined by the amount of interest-earning assets, principally loans and securities, outstanding during the period and the interest rates earned on those assets. The Bank's interest expense is a function of the amount of interest-bearing liabilities outstanding, principally deposits, during the period and the interest rates paid. In addition to net interest income, noninterest income is another important source of revenue for the Company. Noninterest income is derived primarily from service charges on loans and deposits and fees earned from other services. The Bank generates fee income from other services that include trust services and investment advisory services and through the origination and sale of residential mortgages.

The provision for loan losses and noninterest expense are the two expense categories. The factors management considers when determining the provision for loan losses are loan growth, net charge-offs and other factors. Other factors include, but are not limited to, loss experience over the previous twelve months, specific allocations on impaired loans, economic conditions, asset quality and collateral values. Changes in inflation, economic growth, unemployment and other economic factors beyond the Company's control have a direct correlation with asset quality, net charge-offs and ultimately the required provision for loan losses. The material components of noninterest expense are salaries and employee benefits, which comprise 53% of noninterest expense, and occupancy and equipment expense, comprising 16% of noninterest expense.

Financial Performance

For the year ended December 31, 2008, net income was \$4.2 million, or \$1.45 per basic and diluted share, a decrease of \$1.5 million or 27% compared to \$5.7 million, or \$1.98 per basic and diluted share, in 2007. The decrease in earnings was primarily a result of a \$1.6 million increase in the provision for loan losses. Net interest income was unchanged, noninterest income decreased 2% and noninterest expense increased 5% when comparing 2008 to 2007. Return on average assets was 0.78% for 2008, compared to 1.09% for 2007, and the return on average equity was 10.65% for 2008 compared to 16.52% for 2007.

Net interest income totaled \$18.1 million for the year ended December 31, 2008 and for the same period in 2007. The net interest margin decreased 8 basis points and average interest-earning assets increased \$11.9 million when comparing the two periods. The net interest margin was 3.63% for the year ended December 31, 2008, compared to 3.71% for the same period in 2007. The decline in the net interest margin during 2008 resulted from higher average balances of non-accrual loans, lower average balances of non-interest bearing deposits and the lower interest rate environment compared to the previous year.

Noninterest income decreased slightly to \$6.0 million for the year ended December 31, 2008 from \$6.1 million for the same period in 2007. ATM and check card fees increased 15% to \$1.1 million for the year ended December 31, 2008, compared to \$992 thousand for the same period in 2007. Fee income from trust and investment advisory services increased 12% to \$1.3 million for the year ended December 31, 2008, compared to \$1.2 million for the same period in 2007. The increase in fee income was a result of higher fees and average assets under management for the year ended December 31, 2008 compared to the same period in 2007. Gains on sales of loans decreased substantially to \$119 thousand for the year ended December 31, 2008 from \$284 thousand for the same period in 2007. This was related to the decline in residential mortgage activity during the year. Net losses on the sale of premises and equipment totaled \$106 thousand for the year ended December 31, 2008, compared to net gains of \$363 thousand for the same period in 2007.

For the year ended December 31 2008, noninterest expense increased 5% to \$16.0 million, compared to \$15.3 million for the same period in 2007. The increase in noninterest expense was driven primarily from higher occupancy and other operating costs.

Worsening asset quality and economic conditions resulted in a loan loss provision of \$2.0 million for the year ended December 31, 2008 compared to \$398 thousand for the same period in 2007. Net charge-offs were \$551 thousand for the year ended December 31, 2008, compared to \$169 thousand for the same period in 2007. Non-performing assets and loans 90 days past due and still accruing totaled \$17.7million compared to \$2.3 million one year ago. The higher levels of these assets were primarily attributable to the contraction of the local housing market and the impact to local builders and real estate developers. At December 31, 2008, non-performing assets consisted of \$8.5 million in commercial real estate loans, \$4.3 million in other real estate owned, \$2.9 million in residential development loans and \$1.1 million in residential real estate loans. Management continues to evaluate and monitor loans with higher levels of risk, and as a result, believes the allowance for loan losses was sufficient at December 31, 2008. The Company allocated additional resources to enhance credit administration during 2008 and to improve risk management of the loan portfolio.

Table of Contents

Total assets were \$548.2 million at December 31, 2008 compared to \$541.6 million at December 31, 2007. Lower levels of deposits in the Company's market area have impacted asset growth. The Company's trust and investment advisory group had assets under management of \$174.0 million at December 31, 2008 compared to \$200.1 million at December 31, 2007. This decrease was a result of the decline in the financial markets and the related impact to the fair value of assets under management during 2008. Assets managed by the trust and investment advisory group are not held on the Company's balance sheet.

Management Outlook

The Company does not expect significant balance sheet growth during 2009 based on current and anticipated economic conditions. The contraction of the housing market, rising unemployment rates and other factors have directly impacted customer deposit balances and loan demand. Based on Company forecasts, the net interest margin is anticipated to be lower during 2009 compared to 2008, but is expected to stabilize during the first quarter of 2009 after experiencing compression during the fourth quarter of 2008 from Federal Reserve rate cuts and the reversal of interest income on non-accrual loans. The yield on earning assets is expected to decrease greater than the decrease in the yield on interest-bearing liabilities. Competitive pressure on deposit rates in the local market could have a negative impact on net interest income.

Changing economic conditions, which are caused by factors beyond the Company's control, may have a direct correlation with the required provision for loan losses. The Company believes that it has identified the loans with the highest risk and has increased the allowance for loan losses accordingly during 2008. Worsening asset quality and economic conditions, in addition to potential higher charge-offs, could impact the provision for loan losses in 2009.

Noninterest income is not expected to change significantly in future periods. Based on recent trends and the outlook for deposit growth, the Company expects service charges on deposit accounts, which primarily consists of overdraft fees, to decrease slightly in 2009. The Company expects noninterest expense to increase in future periods from higher FDIC assessments, occupancy costs and legal and professional fees. The Company remains focused on leveraging existing branches and does not plan to add branch offices in 2009. In addition, the Company has taken action to control expenses, including eliminating pay increases and new employee positions for 2009.

Non-GAAP Financial Measures

This report refers to the efficiency ratio, which is computed by dividing noninterest expense by the sum of net interest income on a tax-equivalent basis and noninterest income excluding securities gains and losses. This is a non-GAAP financial measure that the Company believes provides investors with important information regarding operational efficiency. Such information is not prepared in accordance with U.S. generally accepted accounting principles (GAAP) and should not be construed as such. Management believes, however, such financial information is meaningful to the reader in understanding operating performance, but cautions that such information not be viewed as a substitute for GAAP. The Company, in referring to its net income, is referring to income under GAAP. The components of the efficiency ratio calculation are summarized in the table below.

	Efficiency Ratio <i>(in thousands)</i>	
	2008	2007
Noninterest expense	\$ 16,014	\$ 15,286
Tax-equivalent net interest income	\$ 18,442	\$ 18,391
Noninterest income	5,951	6,072
Less: securities gains (losses)	2	(103)
	\$ 24,391	\$ 24,566
Efficiency ratio	65.66%	62.22%

Table of Contents

This report also refers to net interest margin, which is calculated by dividing tax equivalent net interest income by total average earning assets. Because a portion of interest income earned by the Company is nontaxable, the tax equivalent net interest income is considered in the calculation of this ratio. Tax equivalent net interest income is calculated by adding the tax benefit realized from interest income that is nontaxable to total interest income then subtracting total interest expense. The tax rate utilized in calculating the tax benefit for each of 2008 and 2007 is 34%. The reconciliation of tax equivalent net interest income, which is not a measurement under GAAP, to net interest income, is reflected in the table below.

	Reconciliation of Net Interest Income to Tax-Equivalent Net Interest Income	
	<i>(in thousands)</i>	
	2008	2007
GAAP measures:		
Interest income - loans	\$ 28,136	\$ 32,538
Interest income - investments and other	2,777	2,963
Interest expense - deposits	10,299	14,049
Interest expense - other borrowings	1,740	2,226
Interest expense - other	754	1,126
Total net interest income	\$ 18,120	\$ 18,100
Non-GAAP measures:		
Tax benefit realized on non-taxable interest income - loans	\$ 43	\$ 48
Tax benefit realized on non-taxable interest income - municipal securities	279	243
Total tax benefit realized on non-taxable interest income	\$ 322	\$ 291
Total tax-equivalent net interest income	\$ 18,442	\$ 18,391

Critical Accounting Policies**General**

The Company's consolidated financial statements and related notes are prepared in accordance with GAAP. The financial information contained within the statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset or relieving a liability. The Bank uses historical loss factors as one factor in determining the inherent loss that may be present in the loan portfolio. Actual losses could differ significantly from the historical factors used. In addition, GAAP itself may change from one previously acceptable method to another. Although the economics of transactions would be the same, the timing of events that would impact transactions could change. For further information about the Bank's loans and the allowance for loan losses, see Notes 3 and 4 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Presented below is a discussion of those accounting policies that management believes are the most important (Critical Accounting Policies) to the portrayal and understanding of the Bank's financial condition and results of operations. The Critical Accounting Policies require management's most difficult, subjective and complex judgments about matters that are inherently uncertain. In the event that different assumptions or conditions were to prevail, and depending upon the severity of such changes, the possibility of materially different financial condition or results of operations is a reasonable likelihood.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

Table of Contents

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as either doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value (net of selling costs), and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral, net of selling costs, if the loan repayment is collateral dependent. The Company does not separately identify individual consumer and residential loans for impairment disclosures.

Lending Policies

General

The principal risk associated with each of the categories of loans in the Bank's portfolio is the creditworthiness of its borrowers. Within each category, such risk is increased or decreased, depending on prevailing economic conditions. The risk associated with real estate mortgage loans, commercial and consumer loans varies, based on economic conditions, fluctuations in the value of real estate and other conditions that affect the ability of borrowers to repay indebtedness. The risk associated with real estate construction loans varies, based on the supply and demand for the type of real estate under construction.

In an effort to manage the risk, the Bank's loan policy gives loan amount approval limits to individual loan officers based on their position within the Bank and level of experience. The Bank's Board of Directors and its Loan Committee approves all loan relationships greater than \$1.5 million. The President and CEO and the Executive Vice President - Loan Administration can combine their lending limits to approve loan relationships up to \$1.5 million. All loan relationships greater than \$750 thousand are reported to the Board or its Loan Committee. The Loan Committee consists of five non-management directors and the President and CEO. The Committee approves the Bank's Loan Policy and reviews loans that have been charged-off. It also reviews the allowance for loan loss adequacy calculation as well as the loan watch list and other management reports. The Committee meets on a monthly basis and the Chairman of the Committee then reports to the Board of Directors.

Residential loan originations are primarily generated by Bank loan officer solicitations, referrals by real estate professionals and customers. Commercial real estate loan originations are obtained through broker referrals, direct solicitation of developers and continued business from customers. All completed loan applications are reviewed by the Bank's loan officers. As part of the application process, information is obtained concerning the income, financial condition, employment and credit history of the applicant. If commercial real estate is involved, information is also obtained concerning cash flow available for debt service. Loan quality is analyzed based on the Bank's experience and credit underwriting guidelines as well as the guidelines issued by the purchasers of loans, depending on the type of loan involved. Real estate collateral is appraised by independent fee appraisers who have been pre-approved by the Executive Vice President - Loan Administration.

In the normal course of business, the Bank makes various commitments and incurs certain contingent liabilities which are disclosed but not reflected in its financial statements, including commitments to extend credit. At December 31, 2008, commitments to extend credit, stand-by letters of credit and rate lock commitments totaled \$57.6 million.

Table of Contents

Commercial Business Lending

Commercial business loans generally have a higher degree of risk than loans secured by real estate, but typically have higher yields. Commercial business loans typically are made on the basis of the borrower's ability to make repayment from cash flow from its business and are secured by business assets, such as accounts receivable, equipment and inventory. As a result, the availability of funds for the repayment of commercial business loans is substantially dependent on the success of the business itself. Furthermore, the collateral for commercial business loans may depreciate over time and generally cannot be appraised with as much precision as residential real estate. To manage these risks, the Bank generally obtains appropriate collateral and personal guarantees from the borrower's principal owners and monitors the financial condition of its business borrowers. At December 31, 2008, commercial loans not secured by real estate totaled \$53.2 million, or 12% of the total loan portfolio, as compared to \$53.0 million, or 12% at December 31, 2007.

Commercial Real Estate Lending

Commercial real estate loans are secured by various types of commercial real estate typically in the Bank's market area, including multi-family residential buildings, commercial buildings and offices, hotels, small shopping centers, farms and churches. At December 31, 2008, commercial real estate loans aggregated \$197.9 million, or 44% of the Bank's gross loans, as compared to \$194.4 million, or 43% at December 31, 2007. In its underwriting of commercial real estate, the Bank may lend, under federal regulation, up to 85% of the secured property's appraised value, although the Bank's loan to original appraised value ratio on such properties is typically 80% or less. The valuation of commercial collateral is provided by independent fee appraisers who have been approved by the Bank's Executive Vice President - Loan Administration. Commercial real estate lending entails significant additional risk, compared with residential mortgage lending. Commercial real estate loans typically involve larger loan balances concentrated with single borrowers or groups of related borrowers. Additionally, the payment experience on loans secured by income producing properties is typically dependent on the successful operation of a business or a real estate project and thus may be subject, to a greater extent, to adverse conditions in the real estate market or in the economy, in general. The Bank's commercial real estate loan underwriting criteria require an examination of debt service coverage ratios, the borrower's creditworthiness, prior credit history and reputation. The Bank typically requires personal guarantees of the borrower's principal owners and carefully evaluates the location and environmental condition of the real estate collateral.

Construction Lending

The Bank makes local construction loans, including residential and land acquisition and development loans. These loans are secured by the property under construction and the underlying land for which the loan was obtained. Construction and land development loans outstanding at December 31, 2008 and 2007 were \$63.7 million, or 14% of gross loans, and \$73.5 million, or 16% of gross loans, respectively. The majority of these loans have an average life of approximately one year and reprice monthly as key rates change. Construction lending entails significant additional risks, compared with residential mortgage lending. Construction loans often involve larger loan balances concentrated with single borrowers or groups of related borrowers. Another risk involved in construction lending is attributable to the fact that loan funds are advanced upon the security of the land or property under construction, which value is estimated prior to the completion of construction. Thus, it is more difficult to evaluate accurately the total loan funds required to complete a project and related loan-to-value ratios. To mitigate the risks associated with construction lending, the Bank generally limits loan amounts to 80% of appraised value, in addition to analyzing the creditworthiness of its borrowers. The Bank typically obtains a first lien on the property as security for its construction loans, typically requires personal guarantees from the borrower's principal owners, and monitors the progress of the construction project during the draw period.

Residential Real Estate Lending

Residential lending activity may be generated by Bank loan officer solicitations, referrals by real estate professionals and existing or new bank customers. Loan applications are taken by a Bank loan officer. As part of the application process, information is gathered concerning income, employment and credit history of the applicant. Residential mortgage loans generally are made on the basis of the borrower's ability to make repayment from employment and other income and are secured by real estate whose value tends to be readily ascertainable. In addition to the Bank's underwriting standards, loan quality may be analyzed based on guidelines issued by a secondary market investor. The valuation of residential collateral is provided by independent fee appraisers who have been approved by the Bank's Executive Vice President - Loan Administration. Typically, the Bank originates fixed rate mortgage loans with the intent to sell to correspondent lenders. Depending on the financial goals of the Company, the Bank occasionally originates and retains these loans. At December 31, 2008, \$116.8 million, or 26% of the Bank's loan portfolio consisted of one-to-four family loans secured by residential real estate, as compared to \$106.4 million, or 24%, at December 31, 2007.

Table of Contents

In connection with residential real estate loans, the Bank requires title insurance, hazard insurance and, if required, flood insurance. Flood determination letters with life of loan tracking are obtained on all federally related transactions with improvements serving as security for the transaction. The Bank does not require escrows for real estate taxes and insurance for secondary market loans.

The Company does not participate in sub-prime lending practices so issues recently arising in the residential mortgage market from sub-prime lending are not expected to have a direct impact on earnings. Nevertheless, the Company is subject to risks associated with general economic and business conditions in its market area, as well as the condition of the regional residential mortgage market, each of which has been impacted by sub-prime lending and related issues.

Consumer Lending

The Bank offers various secured and unsecured consumer loans, including unsecured personal loans and lines of credit, automobile loans, deposit account loans and installment and demand loans. At December 31, 2008, consumer loans, including deposit overdraft balances, were \$16.2 million, or 4% of gross loans, as compared to \$18.8 million, or 4%, at December 31, 2007. Consumer loans may entail greater risk than residential mortgage loans, particularly in the case of consumer loans which are unsecured, such as lines of credit, or secured by rapidly depreciable assets such as automobiles. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. Consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

The underwriting standards employed by the Bank for consumer loans include a determination of the applicant's payment history on other debts and an assessment of ability to meet existing obligations and payments on a proposed loan. The stability of the applicant's monthly income may be determined by verification of gross monthly income from primary employment, and additionally from any verifiable secondary income. Although creditworthiness of the applicant is of primary consideration, the underwriting process also includes an analysis of the value of the collateral in relation to the proposed loan amount.

Results of Operations

General

Net interest income represents the primary source of earnings for the Company. Net interest income equals the amount by which interest income on interest-earning assets, predominately loans and securities, exceeds interest expense on interest-bearing liabilities, including deposits, other borrowings and trust preferred capital notes. Changes in the volume and mix of interest-earning assets and interest-bearing liabilities, as well as their respective yields and rates, are the components that impact the level of net interest income. The net interest margin is calculated by dividing tax-equivalent net interest income by average earning assets. The provision for loan losses, noninterest income and noninterest expense are the other components that determine net income. Noninterest income and expense primarily consists of income from service charges on deposit accounts; fees charged for other customer services, including trust and investment advisory services; gains and losses from the sale of assets, including loans held for sale, securities and premises and equipment; general and administrative expenses; and income tax expense.

For the year ended December 31, 2008, net income was \$4.2 million or \$1.45 per basic and diluted share. This is a 27% decrease compared to net income of \$5.7 million or \$1.98 per basic and diluted shares for 2007. The decrease in earnings was primarily a result of a \$1.6 million increase in the provision for loan losses. Net interest income was unchanged, noninterest income decreased 2% and noninterest expense increased 5% when comparing 2008 to 2007. For the year ended December 31, 2007, net income decreased 1% from \$5.8 million in 2006. This decrease in earnings was a result of expense growth of 11% that outpaced revenue growth of 6%. The increase in noninterest expense in 2007 was almost entirely offset by a 17% increase in noninterest income and a 3% increase in net interest income.

Net Interest Income

Net interest income was unchanged at \$18.1 million for the year ended December 31, 2008, compared to the same period in 2007. The net interest margin decreased 8 basis points and average interest-earning assets increased 2%, or \$11.9 million, when comparing the periods. The net interest margin for 2008 was 3.63% compared to 3.71% for 2007. The decline in the net interest margin during 2008 resulted from higher average balances of non-accrual loans, lower average balances of non-interest bearing deposits and the lower interest rate environment compared to the previous year. In 2007, net interest income increased \$545 thousand, or 3%, from \$17.6 million in 2006.

Table of Contents

The net interest margin was 3.63% in 2008, 3.71% in 2007 and 3.74% in 2006. Interest income as a percent of average earning assets was 6.15% in 2008, 7.21% in 2007 and 6.96% in 2006. Interest expense as a percent of average interest-bearing liabilities was 2.52% in 2008, 4.25% in 2007 and 3.94% in 2006. The interest rate spread was 3.12% in 2008, 2.96% in 2007 and 3.02% in 2006. Based on Company forecasts, the net interest margin is expected to be lower during 2009 compared to 2008, but the Company expects the net interest margin to stabilize during the first quarter of 2009 after experiencing compression during the fourth quarter of 2008 from Federal Reserve rate cuts and the reversal of interest income on non-accrual loans. The yield on earning assets is expected to decrease greater than the decrease in the yield on interest-bearing liabilities. Competitive pressure on deposit rates in the local market could also have a negative impact on net interest income.

The following table provides information on average interest-earning assets and interest-bearing liabilities for the years ended December 31, 2008, 2007 and 2006, as well as amounts and rates of tax equivalent interest earned and interest paid. The volume and rate analysis table analyzes the changes in net interest income for the periods broken down by their rate and volume components.

Noninterest Income

Noninterest income decreased \$121 thousand, or 2%, in 2008 compared to an increase of \$902 thousand, or 17%, in 2007. ATM and check card fees increased \$144 thousand, or 15%, in 2008, compared to an increase of \$184 thousand, or 23%, in 2007. Fee income from trust and investment advisory services increased \$141 thousand, or 12%, in 2008, compared to an increase of \$270 thousand, or 29%, in 2007. These increases in fee income were a result of higher fees and average assets under management during 2008 when compared to 2007 and during 2007 when compared to 2006. Gains on sales of loans decreased 58% from \$284 thousand to \$119 thousand for the year ended December 31, 2008. This was related to the decline in residential mortgage activity during the year. Gains on sales of loans increased 37% in 2007 compared to the same period in 2006. Net losses on the sale of premises and equipment totaled \$106 thousand for the year ended December 31, 2008, compared to net gains of \$363 thousand for the same period in 2007 and no net gains or losses in 2006. Net losses in 2008 were a result of the disposal of obsolete signage in conjunction with the Company's re-branding. Net gains in 2007 resulted primarily from the sale of a potential branch site.

Noninterest income is not expected to change significantly in future periods. Based on recent trends and the outlook for deposit growth, the Company expects service charges on deposit accounts, which primarily consist of overdraft fees, to decrease slightly in 2009.

Noninterest Expense

In 2008, noninterest expense increased \$728 thousand, or 5%, over 2007. The increase in noninterest expense was driven primarily from occupancy and other operating costs. In 2007, noninterest expense increased \$1.5 million, or 11%, over 2006. The increase in expenses in 2007 was primarily attributable to the full year impact of two new office locations during the second and third quarters of 2006.

Table of Contents

The Company expects noninterest expense to increase in 2009 compared to 2008 from higher FDIC assessments, occupancy costs and legal and professional fees. However, the Company remains focused on leveraging existing offices and does not plan to add physical locations or new employee positions during 2009. In addition, the Company has taken actions to control expenses, including eliminating pay increases during 2009.

Income Taxes

The Company has adopted FASB Statement No. 109, Accounting for Income Taxes. For a more detailed discussion of the Company's tax calculation, see Note 9 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Financial Condition**General**

Total assets were \$548.2 million at December 31, 2008 compared to \$541.6 million at December 31, 2007. Minimal balance sheet growth resulted from contracting deposits in the Bank's market. The Bank's trust and investment advisory group had assets under management of \$174.0 million at December 31, 2008 compared to \$200.1 million at December 31, 2007. This decrease was a result of the decline in the financial markets and the related impact to the fair value of assets under management during 2008. Assets managed by the trust and investment advisory group are not held on the Company's balance sheet.

The Company does not expect significant balance sheet growth during 2009 based on current and anticipated economic conditions. The contraction of the housing market, rising unemployment rates and other factors have directly impacted customer deposit balances and loan demand.

Loans

The Bank is an active lender with a loan portfolio that includes commercial and residential real estate loans, commercial loans, consumer loans, construction loans and home equity loans. The Bank's lending activity is concentrated on individuals, small and medium-sized businesses and local governmental entities in its market area. As a provider of community-oriented financial services, the Bank does not attempt to geographically diversify its loan portfolio by undertaking significant lending activity outside its market area. The Bank's loan portfolio is summarized in the table below for the periods indicated.

	Loan Portfolio				
	<i>(in thousands)</i>				
	At December 31,				
	2008	2007	2006	2005	2004
Commercial, financial, and agricultural	\$ 56,354	\$ 55,172	\$ 53,004	\$ 42,942	\$ 37,508
Real estate - construction	63,744	73,478	60,913	49,748	42,538
Real estate - mortgage:					
Residential (1-4 family)	116,821	106,378	112,323	99,442	94,960
Secured by farmland	1,702	1,789	2,507	2,195	2,298
Other real estate loans	196,163	192,616	168,754	148,805	111,506
Consumer	16,202	18,778	24,655	29,640	31,413
All other loans	991	1,376	4,973	5,078	2,851
Total loans	\$ 451,977	\$ 449,587	\$ 427,129	\$ 377,850	\$ 323,074
Less: allowance for loan losses	5,650	4,207	3,978	3,528	2,877
Loans, net of unearned income and allowance for loan losses	\$ 446,327	\$ 445,380	\$ 423,151	\$ 374,322	\$ 320,197

As shown in the table above, residential real estate loans represented the largest growth in the loan portfolio of \$10.4 million, followed by other real estate loans with growth of \$3.5 million, which include commercial real estate. Construction loans decreased by \$9.7 million and consumer loans decreased by \$2.6 million. These changes are reflective of the Bank's lending strategies and loan demand in the market during the year.

Table of Contents

The Company has a credit concentration in mortgage loans on real estate. These loans totaled \$378.4 million, or 84% of total loans and \$374.3 million, or 83% of total loans at December 31, 2008 and 2007, respectively. Although the Company believes that its underwriting standards are generally conservative, the ability of its borrowers to meet their mortgage obligations is influenced by certain factors including local economic conditions. Construction loans totaled \$63.7 million and \$73.5 million, or 14% and 16% of total loans, at December 31, 2008 and 2007, respectively.

The Company has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$44.8 million at December 31, 2008, representing 114% of total shareholders' equity and 10% of total loans. At December 31, 2007, this concentration totaled \$43.4 million representing 115% of total shareholders' equity and 10% of total loans. These loans are included in other real estate loans in the above table. The Company experienced no loan losses related to this identified risk during the years ended December 31, 2008, 2007 and 2006. The Company monitors risk in this concentration by performing interest rate and vacancy rate stress tests on a quarterly basis.

There was no category of loans that exceeded 10% of outstanding loans at December 31, 2008 that were not disclosed in the above table. The following table sets forth the maturities of the loan portfolio at December 31, 2008:

	Remaining Maturities of Selected Loans			
	<i>(in thousands)</i>			
	At December 31, 2008			
	Less than One Year	One to Five Years	Greater than Five Years	Total
Commercial, financial, and agricultural	\$ 35,211	\$ 19,189	\$ 1,954	\$ 56,354

For maturities over one year:				
Fixed rates	\$ 234,216			
Variable rates	59,688			
	\$ 293,904			

Asset Quality

Management classifies as non-performing assets non-accrual loans, restructured loans and other real estate owned (OREO). OREO represents real property taken by the Bank either through foreclosure or through a deed in lieu thereof from the borrower. OREO is recorded at the lower of cost or market, less estimated selling costs, and is actively marketed by the Bank through brokerage channels. The Bank had \$4.3 million in foreclosed real estate at December 31, 2008 and \$377 thousand at December 31, 2007.

Non-performing assets were \$15.9 million and \$759 thousand at December 31, 2008 and 2007, representing 3.51% and 0.17% of total loans, respectively. At December 31, 2008, non-performing assets consisted of \$8.1 million in commercial real estate loans, \$4.3 million in other real estate owned, \$2.5 million in residential development loans and \$396 thousand in residential real estate loans. The increase in non-performing assets was one of the factors that determined the provision for loan losses during 2008. The provision for loan losses was \$2.0 million and \$398 thousand for the years ended December 31, 2008 and 2007, respectively. Non-performing assets could increase due to other potential problem loans identified by management totaling \$35.3 million at December 31, 2008. Potential problem loans at December 31, 2007 totaled \$10.6 million. Certain risks, including the borrower's ability to pay and the collateral value securing the loan, have been identified that may result in the potential problem loans not being repaid in accordance with their terms. However, the loans are currently performing and \$30.7 million of the

potential problem loans are generally considered well-secured.

The provision for loan losses represents management's analysis of the existing loan portfolio and related credit risks. The provision

Table of Contents

for loan losses is based upon management's estimate of the amount required to maintain an adequate allowance for loan losses reflective of the risks in the loan portfolio. The allowance for loan losses totaled \$5.7 million and \$4.2 million at December 31, 2008 and 2007, representing 1.25% and 0.94% of total loans, respectively.

Impaired loans of \$12.0 million and \$3.3 million at December 31, 2008 and 2007 have been recognized in conformity with SFAS No. 114. The related allowance for loan losses provided for these loans totaled \$571 thousand and \$12 thousand at December 31, 2008 and 2007. The average recorded investment in impaired loans during 2008 and 2007 was \$5.9 million and \$952 thousand, respectively.

Non-accrual loans excluded from impaired loan disclosure under SFAS No. 114 amounted to \$36 thousand, \$78 thousand and \$161 thousand at December 31, 2008, 2007 and 2006, respectively. If interest on these loans had been accrued, such income would have approximated \$2 thousand, \$6 thousand and \$22 thousand for 2008, 2007 and 2006, respectively. Loan payments received on non-accrual loans are applied to principal. When a loan is placed on non-accrual status there are several negative implications. First, all interest accrued but unpaid at the time of the classification is deducted from the interest income totals for the Bank. Second, accruals of interest are discontinued until it becomes certain that both principal and interest can be repaid. Third, there may be actual losses that necessitate additional provisions for credit losses charged against earnings. These loans were included in the non-performing loan totals listed below.

Management believes, based upon its review and analysis, that the Bank has sufficient reserves to cover losses inherent within the loan portfolio. For each period presented, the provision for loan losses charged to expense was based on management's judgment after taking into consideration all factors connected with the collectibility of the existing portfolio. Management considers loss experience over a one-year period, economic conditions, asset quality, collateral values and other relevant factors when evaluating the loan portfolio. There can be no assurance, however, that additional provisions for loan losses will not be required in the future, including as a result of changes in the economic assumptions underlying management's estimates and judgments, adverse developments in the economy, on a national basis or in the Company's market area, or changes in the circumstances of particular borrowers. For further discussion regarding the allowance for loan losses, see "Critical Accounting Policies" above. The following table shows a detail of loans charged-off, recovered and the changes in the allowance for loan losses.

Securities

Securities at December 31, 2008 were \$58.2 million, an increase of \$735 thousand, or 1%, from \$57.5 million at the end of 2007. The Company expects to increase its current level of securities in relation to total assets. The Company received proceeds from a \$13.9 million investment in its preferred stock on March 13, 2009 and plans to initially invest the proceeds in securities. Investment securities are comprised of U.S. agency and mortgage-backed securities, obligations of state and political subdivisions, corporate equity securities and certain restricted securities. As of

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

December 31, 2008, neither the Company nor the Bank held any derivative financial instruments in their respective investment security portfolios.

The following table summarizes the fair value of the Company's securities portfolio on the dates indicated.

Table of Contents

	Securities Portfolio (in thousands)		
	At December 31,		
	2008	2007	2006
Securities, available for sale			
U.S. agency and mortgage-backed securities	\$ 40,199	\$ 40,457	\$ 46,429
Obligations of state and political subdivisions	14,311	13,423	10,366
Other securities	3,728	3,623	3,545
Total securities	\$ 58,238	\$ 57,503	\$ 60,340

The following table shows the maturities of available for sale debt and equity securities at amortized cost and market value at December 31, 2008 and approximate weighted average yields of such securities. Yields on state and political subdivision securities are shown on a tax equivalent basis, assuming a 34% federal income tax rate. The Company attempts to maintain diversity in its portfolio and maintain credit quality and re-pricing terms that are consistent with its asset/liability management and investment practices and policies. For further information on securities available for sale, see Note 2 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Weighted average yield ⁽¹⁾	0.00%	5.69%	5.04%	5.59%	

⁽¹⁾ Yields on tax-exempt securities have been calculated on a tax-equivalent basis.

The above table was prepared using the contractual maturities for all securities with the exception of mortgage-backed securities (MBS) and collateralized mortgage obligations (CMO). Both MBS and CMO securities were recorded using the Espiel prepayment model that considers many factors including rate and spread projections, housing turnover and borrower characteristics to create anticipated speeds.

Deposits

Deposits at December 31, 2008 were \$447.5 million, an increase of \$2.4 million, from \$445.1 million at December 31, 2007. Time

Table of Contents

deposits, which included brokered deposits, increased \$44.4 million or 23% during 2008 to \$233.4 million compared to \$189.0 million at December 31, 2007. Brokered deposits increased \$34.0 million or 227% to \$49.0 million compared to \$15.0 million at December 31, 2007. Non-interest bearing demand deposits decreased \$5.0 million or 6% during 2008. Savings and interest-bearing demand deposits decreased \$37.0 million or 21% when comparing the same periods. Although the Company plans to fund future asset growth with local deposits, deposits in the Company's market have decreased. Funding assets with local deposits will continue to be challenging, and may have a negative impact on the net interest margin. The following tables include a summary of average deposits and average rates paid and maturities of CDs greater than \$100,000.

	Average Deposits and Rates Paid

	Less than Three Months	Three to Six Months	Six to Twelve Months	Greater than One Year	Total
At December 31, 2008	\$ 21,039	\$ 14,454	\$ 7,558	\$ 36,846	\$ 79,897

Liquidity

Liquidity represents the ability to meet present and future financial obligations through either the sale or maturity of existing assets or with borrowings from correspondent banks or other deposit markets. The Company classifies cash, interest-bearing and noninterest-bearing deposits with banks, federal funds sold, investment securities and loans maturing within one year as liquid assets. As a result of the Bank's management of liquid assets and the ability to generate liquidity through liability funding, management believes that the Bank maintains overall liquidity sufficient to satisfy its depositors' requirements and to meet its customers' borrowing needs.

At December 31, 2008, cash, interest-bearing and noninterest-bearing deposits with banks, federal funds sold, securities and loans maturing within one year were \$163.9 million. At the end of 2008, approximately 47% or \$213.5 million of the loan portfolio would mature or re-price within a one-year period. At December 31, 2008, non-deposit sources of available funds totaled \$96.6 million, which included \$34.6 million available from the Federal Home Loan Bank. During 2008, other borrowing activity included repayment of a fixed rate credit advance in the amount of \$10.0 million, repayment of a convertible advance in the amount of \$10.0 million and one new adjustable rate credit advance in the amount of \$10.0 million. The Bank also borrowed and repaid daily rate credit advances during 2008 as an alternative to purchasing federal funds.

The Bank also maintains federal funds lines with correspondents for short-term liquidity needs totaling \$40.0 million at December 31, 2008.

Table of Contents**Company Obligated Mandatorily Redeemable Capital Securities**

See Note 8 to the consolidated financial statements, included in Item 8 of this Form 10-K, for discussion of company obligated mandatorily redeemable capital securities.

Contractual Obligations

The impact that contractual obligations as of December 31, 2008 are expected to have on liquidity and cash flow in future periods is as follows:

	Total	Contractual Obligations (in thousands)			
		Less than one year	1-3 years	3-5 years	More than 5 years
Other borrowings	\$ 45,397	\$ 25,136	\$ 20,162	\$ 47	\$ 52
Operating leases	1,090	180	334	315	261
Total	\$ 46,487	\$ 25,316	\$ 20,496	\$ 362	\$ 313

The Company does not have any capital lease obligations, as classified under applicable FASB statements, or other purchase or long-term obligations.

Off-Balance Sheet Arrangements

The Company, through the Bank, is a party to credit related financial instruments with risk not reflected in the consolidated financial statements in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The Bank's exposure to credit loss is represented by the contractual amount of these commitments. The Bank follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2008 and 2007, the following financial instruments were outstanding whose contract amounts represent credit risk:

	(in thousands)	
	2008	2007
Commitments to extend credit and unfunded commitments under lines of credit	\$ 48,617	\$ 56,158
Stand-by letters of credit	7,068	7,150
Rate lock commitments	1,911	673

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized as deemed necessary and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Bank is committed.

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting those commitments if deemed necessary.

Table of Contents

At December 31, 2008, the Bank had entered into locked-rate commitments to originate mortgage loans amounting to \$1.9 million and had no loans held for sale. Risks arise from the possible inability of counterparties to meet the terms of their contracts. The Bank does not expect any counterparty to fail to meet its obligations.

Capital Resources

The adequacy of the Company's capital is reviewed by management on an ongoing basis with reference to the size, composition, and quality of the Company's asset and liability levels and consistent with regulatory requirements and industry standards. Management seeks to maintain a capital structure that will assure an adequate level of capital to support asset growth and absorb potential losses.

The Board of Governors of the Federal Reserve System has adopted capital guidelines to supplement the existing definitions of capital for regulatory purposes and to establish minimum capital standards. Specifically, the guidelines categorize assets and off-balance sheet items into four risk-weighted categories. The minimum ratio of qualifying total capital to risk-weighted assets is 8.00%, of which at least 4.00% must be Tier 1 capital, composed of common equity, retained earnings and a limited amount of perpetual preferred stock, less certain intangible items. Under present regulations, trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including total trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. The Company had a ratio of risk-weighted assets to total capital of 11.72% at December 31, 2008 and a ratio of risk-weighted assets to Tier 1 capital of 10.52%. Both of these exceed both the minimum capital requirement and the minimum to be well capitalized under prompt corrective action provisions adopted by the federal regulatory agencies.

The following table summarizes the Company's Tier 1 capital, Tier 2 capital, risk-weighted assets and capital ratios at December 31, 2008, 2007 and 2006.

	Analysis of Capital		
	<i>(dollars in thousands)</i>		
	At December 31,		
	2008	2007	2006
Tier 1 capital:			
Common stock	\$ 3,653	\$ 3,653	\$ 3,653
Surplus	1,409	1,453	1,465
Retained earnings	35,196	33,311	29,104
Trust preferred securities	9,279	12,372	11,628
Intangible assets	(68)	(74)	(81)
Total Tier 1 Capital	\$ 49,469	\$ 50,715	\$ 45,769
Tier 2 capital:			
Allowance for loan losses	5,650	4,207	3,978
Total Risk-Based Capital	\$ 55,119	\$ 54,922	\$ 49,747
Risk-weighted assets	\$ 470,110	\$ 465,629	\$ 438,763
Capital ratios:			
Tier 1 Risk-Based Capital Ratio	10.52%	10.89%	10.43%
Total Risk-Based Capital Ratio	11.72%	11.80%	11.34%
Tier 1 Capital to Average Assets	9.10%	9.53%	8.76%

On March 13, 2009, the Company received an investment in the Company's preferred stock totaling \$13.9 million from the Company's participation in the TARP Capital Purchase Program. As a result of this investment, the Company expects capital ratios to increase at the end of the first quarter of 2009. The Preferred Stock will pay a dividend of 5% per annum for the first five years and 9% thereafter. The Warrant Preferred Stock will pay a dividend of 9% per annum.

Recent Accounting Pronouncements

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

See Note 1 to the consolidated financial statements, included in Item 8 of this Form 10-K, for discussion of recent accounting pronouncements.

MANAGEMENT'S REPORT REGARDING THE EFFECTIVENESS OF INTERNAL CONTROLS

OVER FINANCIAL REPORTING

The management of First National Corporation (the Corporation) is responsible for the preparation, integrity and fair presentation of the financial statements included in the annual report as of December 31, 2008. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and reflect management's judgments and estimates concerning the effects of events and transactions that are accounted for or disclosed.

Management is also responsible for establishing and maintaining an effective internal control structure over financial reporting. The Corporation's internal control over financial reporting includes those policies and procedures that pertain to the Corporation's ability to record, process, summarize and report reliable financial data. The internal control system contains monitoring mechanisms, and appropriate actions are taken to correct identified deficiencies. Management believes that internal controls over financial reporting, which are subject to scrutiny by management and the Corporation's internal auditors, support the integrity and reliability of the financial statements. Management recognizes that there are inherent limitations in the effectiveness of any internal control system, including the possibility of human error and the circumvention or overriding of internal controls. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation. In addition, because of changes in conditions and circumstances, the effectiveness of internal control over financial reporting may vary over time.

In order to insure that the Corporation's internal control structure over financial reporting is effective, management assessed these controls as they conformed to accounting principles generally accepted in the United States of America and related call report instructions as of December 31, 2008. This assessment was based on criteria for effective internal control over financial reporting as described in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Based on this assessment, management believes that the Corporation maintained effective internal controls over financial reporting as of December 31, 2008. Management's assessment did not determine any material weakness within the Corporation's internal control structure. The Corporation's annual report does not include an attestation report of the Corporation's registered public accounting firm, Yount, Hyde & Barbour, P.C. (YHB), regarding internal control over financial reporting. Management's report was not subject to attestation by YHB pursuant to temporary rules of the Securities and Exchange Commission that permit the Corporation to provide only management's report in its annual report.

The 2008 end of year financial statements have been audited by YHB, the Corporation's independent accounting firm. Personnel from YHB were given unrestricted access to all financial records and related data, including minutes of all meetings of the Board of Directors and Committees thereof.

Management believes that all representations made to the independent auditors were valid and appropriate. The resulting report from YHB accompanies the financial statements.

The Board of Directors of the Corporation, acting through its Audit and Compliance Committee (the Committee), is responsible for the oversight of the Corporation's accounting policies, financial reporting and internal control. The Audit and Compliance Committee of the Board of Directors is comprised entirely of outside directors who are independent of management. The Audit and Compliance Committee is responsible for the appointment and compensation of the independent auditors and approves decisions regarding the appointment or removal of members of the internal audit function. The Committee meets periodically with management, the independent auditors, and the internal auditor to insure that they are carrying out their responsibilities. The Committee is also responsible for performing an oversight role by reviewing and monitoring the financial, accounting, and auditing procedures of the Corporation in addition to reviewing the Corporation's financial reports. The independent auditors and the internal auditor have full and unlimited access to the Audit and Compliance Committee, with or without the presence of the management of the Corporation, to discuss the adequacy of internal control over financial reporting, and any other matters which they believe should be brought to the attention of the Audit and Compliance Committee.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors

First National Corporation

Strasburg, Virginia

We have audited the accompanying consolidated balance sheets of First National Corporation and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the years ended December 31, 2008, 2007 and 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of First National Corporation and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for the years ended December 31, 2008, 2007 and 2006, in conformity with U.S. generally accepted accounting principles.

We were not engaged to examine management's assessment of the effectiveness of First National Corporation and subsidiaries' internal control over financial reporting as of December 31, 2008, included in the accompanying *Management's Annual Report on Internal Control Over Financial Reporting* and, accordingly, we do not express an opinion thereon.

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements

Note 1. Nature of Banking Activities and Significant Accounting Policies

First National Corporation (the Company) is the financial holding company of First Bank (the Bank), First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. The Bank owns First Bank Financial Services, Inc., which invests in partnerships that provide title insurance and investment services. The Bank provides commercial and personal loans, residential mortgages, credit cards, a variety of deposit products and personal trust and investment services to its customers in the northern Shenandoah Valley region of Virginia.

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America and to accepted practices within the banking industry.

Principles of Consolidation

The consolidated financial statements of First National Corporation include the accounts of all five companies. All material intercompany balances and transactions have been eliminated in consolidation, except for balances and transactions related to the Trusts. FASB Interpretation No. 46(R) requires that the Company no longer consolidate the Trusts. The subordinated debt of these Trusts is reflected as a liability of the Company.

Use of Estimates

In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and other real estate owned.

Significant Group Concentrations of Credit Risk

Most of the Company's activities are with customers located within the northern Shenandoah Valley region of Virginia. Note 3 discusses the types of lending that the Company engages in. The Company has identified a concentration of credit risk in the hotel industry and mortgage loans on real estate. See Note 3 for further information on this concentration of credit risk. The Company does not have a significant concentration to any one customer.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, the Company has defined cash equivalents as those amounts included in the balance sheet captions "Cash and due from banks" and "interest-bearing deposits in banks."

Securities

Securities not classified as held to maturity, including equity securities with readily determinable fair values, are classified as available for sale and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income. At December 31, 2008 and 2007, all of the Company's securities were classified as available for sale.

Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Declines in the fair value of securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. At December 31, 2008, there were no other than temporary declines in fair value. Gains and losses on the sale of securities are recorded on the settlement date and are determined using the

specific identification method.

Table of Contents

Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or estimated fair value. The Company, through its banking subsidiary, requires a firm purchase commitment from a permanent investor before a loan can be closed, thus limiting interest rate risk. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income.

The Bank enters into commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on mortgage loans that are intended to be sold are considered to be derivatives. The period of time between issuance of a loan commitment and closing and sale of the loan generally ranges from 30 to 60 days. The Bank protects itself from changes in interest rates through the use of best efforts forward delivery commitments, whereby the Bank commits to sell a loan at the time the borrower commits to an interest rate with the intent that the buyer has assumed interest rate risk on the loan. As a result, the Bank is not exposed to losses nor will it realize significant gains related to its rate lock commitments due to changes in interest rates. The correlation between the rate lock commitments and the best efforts contracts is very high due to their similarity.

The market value of rate lock commitments and best efforts contracts is not readily ascertainable with precision because rate lock commitments and best efforts contracts are not actively traded in stand-alone markets. The Bank determines the fair value of rate lock commitments and best efforts contracts by measuring the change in the value of the underlying asset while taking into consideration the probability that the rate lock commitments will close. Because of the high correlation between rate lock commitments and best efforts contracts, no gain or loss occurs on the rate lock commitments.

Loans

The Company, through its banking subsidiary, grants mortgage, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by residential and commercial loans secured by real estate throughout the northern Shenandoah Valley region of Virginia. The ability of the Bank's debtors to honor their contracts is subject to the real estate and general economic conditions in this area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off generally are reported at their outstanding unpaid principal balances less the allowance for loan losses and any deferred fees or costs on originated loans. Interest income is accrued and credited to income based on the unpaid principal balance. Loan origination fees, net of certain origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

The accrual of interest on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. Personal loans are typically charged off no later than 180 days past due. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on non-accrual or charged off is reversed against interest income. The interest on these loans is accounted for on the cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. For further information about the Company's loans and the allowance for loan losses, see Notes 3 and 4.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as either doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative

Table of Contents

factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value (net of selling costs), and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair market value of the collateral, net of selling costs, if the loan is collateral dependent. The Company does not separately identify individual consumer and residential loans for impairment disclosures.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost, less accumulated depreciation and amortization. Premises and equipment are depreciated over their estimated useful lives ranging from three years to forty years; leasehold improvements are amortized over the lives of the respective leases or the estimated useful life of the leasehold improvement, whichever is less. Software is amortized over its estimated useful life ranging from three to seven years. Depreciation and amortization are recorded on the straight-line method.

Costs of maintenance and repairs are charged to expense as incurred. Costs of replacing structural parts of major units are considered individually and are expensed or capitalized as the facts dictate. Gains and losses on routine dispositions are reflected in current operations.

Foreclosed Assets

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at lower of cost or fair value less cost to sell at the date of foreclosure. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in net expenses from foreclosed assets. The Company had \$4.3 million in foreclosed real estate at December 31, 2008 and \$377 thousand at December 31, 2007.

Transfers of Financial Assets

Transfers of financial assets, including loan participations, are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before maturity.

Income Taxes

Deferred income tax assets and liabilities are determined using the liability method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Table of Contents

Interest and penalties associated with unrecognized tax benefits are classified as additional income taxes in the statement of income.

Trust and Asset Management Department

Securities and other property held by the Trust and Asset Management Department in a fiduciary or agency capacity are not assets of the Company and are not included in the accompanying consolidated financial statements.

Earnings Per Share

Basic earnings per share represents income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. There are no potential common shares that would have a dilutive effect. Shares not committed to be released under the Company's leveraged Employee Stock Ownership Plan (ESOP) are not considered to be outstanding. See Note 11 for further information on the Company's ESOP. The average number of common shares outstanding used to calculate basic and diluted earnings per share were 2,913,011, 2,906,431 and 2,916,958 at December 31, 2008, 2007 and 2006, respectively.

Advertising Costs

The Company follows the policy of charging the production costs of advertising to expense as incurred. Total advertising expense incurred for 2008, 2007 and 2006 was \$371 thousand, \$344 thousand and \$339 thousand, respectively.

Reclassifications

Certain reclassifications have been made to prior period balances to conform to the current year presentation.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) reached a consensus on Emerging Issues Task Force (EITF) Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements, (EITF Issue 06-4). In March 2007, the FASB reached a consensus on EITF Issue 06-10, Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements, (EITF Issue 06-10). Both of these standards require a company to recognize an obligation over an employee's service period based upon the substantive agreement with the employee such as the promise to maintain a life insurance policy or provide a death benefit postretirement. The Company adopted EITF 06-4 on January 1, 2008 as a change in accounting principle through a cumulative-effect adjustment to retained earnings totaling \$651 thousand.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but rather, provides enhanced guidance to other pronouncements that require or permit assets or liabilities to be measured at fair value. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those years. The FASB has approved a one-year deferral for the implementation of the Statement for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The Company adopted SFAS 157 effective January 1, 2008. The adoption of SFAS 157 was not material to the consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of this Statement is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The fair value option established by this Statement permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The fair value option may be applied instrument by instrument and is irrevocable. SFAS 159 is effective as of the beginning of an entity's first fiscal year that begins

Table of Contents

after November 15, 2007, with early adoption available in certain circumstances. The Company adopted SFAS 159 effective January 1, 2008. The Company decided not to report any existing financial assets or liabilities at fair value that are not already reported, thus the adoption of this statement did not have a material impact on the consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141(R), *Business Combinations* (SFAS 141(R)). The Standard will significantly change the financial accounting and reporting of business combination transactions. SFAS 141(R) establishes principles for how an acquirer recognizes and measures the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for acquisition dates on or after the beginning of an entity's first year that begins after December 15, 2008. The Company does not expect the implementation of SFAS 141(R) to have a material impact on its consolidated financial statements, at this time.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements an Amendment of ARB No. 51* (SFAS 160). The Standard will significantly change the financial accounting and reporting of noncontrolling (or minority) interests in consolidated financial statements. SFAS 160 is effective as of the beginning of an entity's first fiscal year that begins after December 15, 2008, with early adoption prohibited. The Company does not expect the implementation of SFAS 160 to have a material impact on its consolidated financial statements, at this time.

In November 2007, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 109, *Written Loan Commitments Recorded at Fair Value Through Earnings* (SAB 109). SAB 109 expresses the current view of the staff that the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SEC registrants are expected to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. Implementation of SAB 109 did not have a material impact on its consolidated financial statements.

In April 2008, the FASB issued FASB Staff Position (FSP) No. 142-3, *Determination of the Useful Life of Intangible Assets* (FSP 142-3). FSP 142-3 amends the factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS 142, *Goodwill and Other Intangible Assets* (SFAS 142). The intent of FSP 142-3 is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the assets under SFAS 141(R). FSP 142-3 is effective for the Company on January 1, 2009, and applies prospectively to intangible assets that are acquired individually or with a group of other assets in business combinations and asset acquisitions. The adoption of FSP 142-3 is not expected to have a material impact on the Company's consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, (SFAS 162). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles. SFAS 162 is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. Management does not expect the adoption of the provision of SFAS 162 to have any impact on the consolidated financial statements.

In October 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157 in determining the fair value of a financial asset during periods of inactive markets. FSP 157-3 was effective as of September 30, 2008 and did not have material impact on the Company's consolidated financial statements.

In December 2008, the FASB issued FSP FAS 140-4 and FIN 46(R)-8, *Disclosures by Public Entities (Enterprises) about Transfers of Financial Assets and Interests in Variable Interest Entities*. FSP FAS 140-4 and FIN 46(R)-8 requires enhanced disclosures about transfers of financial assets and interests in variable interest entities. The FSP is effective for interim and annual periods ending after December 15, 2008. Since the FSP requires only additional disclosures concerning transfers of financial assets and interest in variable interest entities, adoption of the FSP will not affect the Company's financial condition, results of operations or cash flows.

In January 2009, the FASB reached a consensus on EITF Issue 99-20-1. This FSP amends the impairment guidance in EITF Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets*, to achieve more consistent determination of whether an other-than-temporary impairment has occurred. The FSP also retains and emphasizes the objective of another-than-temporary impairment assessment and the related disclosure requirements in SFAS 115, *Accounting for Certain Investments in Debt and*

Table of Contents

Equity Securities, and other related guidance. The FSP is effective for interim and annual reporting periods ending after December 15, 2008 and shall be applied prospectively. The FSP was effective as of December 31, 2008 and did not have a material impact on the consolidated financial statements.

Note 2. Securities

The Company invests in U.S. agency and mortgage-backed securities, obligations of states and political subdivisions, corporate equity securities and restricted securities. Restricted securities include required equity investments in certain correspondent banks which have no readily determinable market value. Amortized costs and fair values of securities available for sale at December 31, 2008 and 2007, were as follows:

	2008 <i>(in thousands)</i>			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. agency and mortgage-backed securities	\$ 39,296	\$ 945	\$ (42)	\$ 40,199
Obligations of states and political subdivisions	14,755	91	(535)	14,311
Corporate equity securities	16	265		281
Restricted securities	3,447			3,447
	\$ 57,514	\$ 1,301	\$ (577)	\$ 58,238

	2007 <i>(in thousands)</i>			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. agency and mortgage-backed securities	\$ 40,348	\$ 277	\$ (168)	\$ 40,457
Obligations of states and political subdivisions	13,334	125	(36)	13,423
Corporate equity securities	13	224		237
Restricted securities	3,386			3,386
	\$ 57,081	\$ 626	\$ (204)	\$ 57,503

At December 31, 2008 and 2007, investments in an unrealized loss position that are temporarily impaired were as follows:

	2008 <i>(in thousands)</i>					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)
U.S. agency and mortgage-backed securities	\$ 2,303	\$ (42)	\$ \$		\$ 2,303	\$ (42)
Obligations of states and political subdivisions	8,243	(535)			8,243	(535)
	\$ 10,546	\$ (577)	\$ \$		\$ 10,546	\$ (577)

Table of Contents

	2007 (in thousands)					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)
U.S. agency and mortgage-backed securities	\$	\$	\$ 12,206	\$ (168)	\$ 12,206	\$ (168)
Obligations of states and political subdivisions	1,575	(21)	1,544	(15)	3,119	(36)
	\$ 1,575	\$ (21)	\$ 13,750	\$ (183)	\$ 15,325	\$ (204)

The tables above provide information about securities that have been in an unrealized loss position for less than twelve consecutive months and securities that have been in an unrealized loss position for twelve consecutive months or more. Securities with unrealized losses are considered temporarily impaired and are primarily a result of interest rate factors. During 2008, thirty-four obligations of states and political subdivisions experienced rating downgrades and two obligations of state and political subdivisions were no longer receiving ratings by Moody's or S&P. This was the direct result of downgrades of the insurers of these bonds. Although ratings were lowered for the thirty-four securities, they are still considered investment grade. For the two obligations of state and political subdivisions that are no longer rated, the Company evaluates the financial condition of the state and political subdivision on a quarterly basis. The Company has the ability and intent to hold these issues until maturity. At December 31, 2008, there were three agency and mortgage-backed securities and twenty-four obligations of state and political subdivisions in an unrealized loss position. One hundred percent of the Company's investment portfolio that is rated is considered investment grade. The weighted-average re-pricing term of the portfolio was 3.1 years at December 31, 2008.

The amortized cost and fair value of securities available for sale at December 31, 2008 by contractual maturity are shown below. Expected maturities of mortgage-backed securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without call or prepayment penalties. Corporate equity securities and restricted securities are not included in the maturity categories in the following maturity summary because they do not have a stated maturity date.

	(in thousands)	
	Amortized Cost	Fair Value
Due within one year	\$	\$
Due after one year through five years	4,217	4,270
Due after five years through ten years	17,022	17,356
Due after ten years	32,812	32,884
Corporate equity securities	16	281
Restricted securities	3,447	3,447
	\$ 57,514	\$ 58,238

Proceeds from sales of securities available for sale during 2008, 2007 and 2006 were \$4.8 million, \$11.7 million and \$4.4 million, respectively. Gross gains of \$2 thousand, \$4 thousand and \$3 thousand were realized on those sales during 2008, 2007 and 2006, respectively. Gross losses of \$107 thousand were realized on those sales during 2007.

Securities having a book value of \$46.6 million and \$47.3 million at December 31, 2008 and 2007 were pledged to secure other borrowings, public deposits and for other purposes required by law.

Table of Contents**Note 3. Loans**

Loans at December 31, 2008 and 2007 are summarized as follows:

	<i>(in thousands)</i>	
	2008	2007
Mortgage loans on real estate:		
Construction	\$ 63,744	\$ 73,478
Secured by farm land	1,702	1,789
Secured by 1-4 family residential	116,821	106,378
Other real estate loans	196,163	192,616
Loans to farmers (except those secured by real estate)	3,158	2,144
Commercial and industrial loans (except those secured by real estate)	53,196	53,028
Consumer loans	14,572	18,363
Deposit overdrafts	1,630	415
All other loans	991	1,376
Total loans	\$ 451,977	\$ 449,587
Allowance for loan losses	5,650	4,207
Loans, net	\$ 446,327	\$ 445,380

The Company has a credit concentration in mortgage loans on real estate. These loans totaled \$378.4 million, or 83.7% of total loans and \$374.3 million, or 83.2% of total loans, at December 31, 2008 and 2007, respectively. Although the Company believes that its underwriting standards are generally conservative, the ability of its borrowers to meet their mortgage obligations is dependent upon local economic conditions. Construction loans totaled \$63.7 million and \$73.5 million, or 14.1% and 16.3% of total loans at December 31, 2008 and 2007, respectively.

The Company has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$44.8 million at December 31, 2008, representing 114.2% of total equity and 9.9% of total loans. At December 31, 2007, this concentration totaled \$43.4 million representing 114.7% of total equity and 9.6% of total loans. These loans are included in other real estate loans in the above table. The Company experienced no loan losses related to this identified risk during the years ended December 31, 2008, 2007 and 2006.

Note 4. Allowance for Loan Losses

Transactions in the allowance for loan losses for the years ended December 31, 2008, 2007 and 2006 were as follows:

	<i>(in thousands)</i>		
	2008	2007	2006
Balance at beginning of year	\$ 4,207	\$ 3,978	\$ 3,528
Provision charged to operating expense	1,994	398	378
Loan recoveries	253	213	320
Loan charge-offs	(804)	(382)	(248)
Balance at end of year	\$ 5,650	\$ 4,207	\$ 3,978

Information about impaired loans as of and for the years ended December 31, 2008 and 2007 is as follows:

(in thousands)
2008 2007

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Impaired loans for which an allowance has been provided	\$ 1,336	\$ 120
Impaired loans for which no allowance has been provided	10,710	3,229
Total impaired loans	\$ 12,046	\$ 3,349
Allowance provided for impaired loans included in the allowance for loan losses	\$ 571	\$ 12
Average balance in impaired loans	\$ 5,866	\$ 952

Table of Contents

Non-accrual loans excluded from impaired loan disclosure under SFAS 114 amounted to \$36 thousand, \$78 thousand and \$161 thousand at December 31, 2008, 2007 and 2006, respectively. If interest on these loans had been accrued, such income would have approximated \$2 thousand, \$6 thousand and \$22 thousand for 2008, 2007 and 2006, respectively. Loans past due greater than ninety days and still accruing interest at December 31, 2008, 2007 and 2006 totaled \$3.4 million, \$1.5 million and \$511 thousand, respectively.

Note 5. Premises and Equipment

Premises and equipment are summarized as follows at December 31, 2008 and 2007:

	<i>(in thousands)</i>	
	2008	2007
Land	\$ 5,003	\$ 4,329
Buildings and leasehold improvements	15,457	11,730
Furniture and equipment	9,028	8,121
Construction in process	267	2,398
	\$ 29,755	\$ 26,578
Less accumulated depreciation	8,236	7,173
	\$ 21,519	\$ 19,405

Depreciation expense included in operating expenses for 2008, 2007 and 2006 was \$1.2 million, \$1.1 million and \$1.0 million, respectively.

Note 6. Deposits

The aggregate amount of time deposits, in denominations of \$100 thousand or more, was \$79.9 million and \$77.6 million at December 31, 2008 and 2007, respectively.

The Bank obtains certain deposits through the efforts of third-party brokers. At December 31, 2008 and 2007, brokered deposits totaled \$49.0 million and \$15.0 million, respectively, and were included in time deposits on the Company's financial statements.

At December 31, 2008, the scheduled maturities of time deposits were as follows:

	<i>(in thousands)</i>
2009	\$ 134,859
2010	57,697
2011	19,901
2012	5,774
2013	15,148
	\$ 233,379

Note 7. Other Borrowings

The Bank had unused lines of credit totaling \$96.6 million and \$80.8 million available with non-affiliated banks at December 31, 2008 and 2007, respectively. These amounts primarily consist of a blanket floating lien agreement with the Federal Home Loan Bank of Atlanta in which the Bank can borrow up to 19% of its assets.

At December 31, 2008 and 2007, the Bank had borrowings from the Federal Home Loan Bank system totaling \$45.0 million and \$40.0 million, respectively, which mature through March 17, 2011. The interest rate on these borrowings ranged from 0.48% to 5.22% and the weighted average rate was 2.98% at December 31, 2008. The Bank had collateral pledged on these borrowings at December 31, 2008 including residential

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

and commercial real estate loans totaling \$52.9 million, securities available for sale with a book value of \$26.7 million and Federal Home Loan Bank stock with a book value of \$3.0 million.

At December 31, 2008, the Bank had a \$165 thousand note payable, secured by a deed of trust, for land purchased to construct a banking office, which requires monthly payments of \$2 thousand, and matures January 3, 2016. The fixed interest rate on this loan is 4.00%.

At December 31, 2008, the Company had a \$232 thousand unsecured note payable, which requires monthly payments of \$11 thousand and matures September 12, 2011. The fixed interest rate on this loan is 7.35%.

Table of Contents

The contractual maturities of other borrowings at December 31, 2008 were as follows:

	<i>(in thousands)</i>
2009	\$ 25,136
2010	10,139
2011	10,023
2012	23
2013	24
Later years	52
	\$ 45,397

Note 8. Company Obligated Mandatorily Redeemable Capital Securities

On June 8, 2004, First National (VA) Statutory Trust II (Trust II), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. On June 17, 2004, \$5.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest. The interest rate at December 31, 2008 was 4.47%. The securities have a mandatory redemption date of June 17, 2034, and are subject to varying call provisions beginning June 17, 2009. The principal asset of Trust II is \$5.2 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company.

On July 24, 2006, First National (VA) Statutory Trust III (Trust III), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities. On July 31, 2006, \$4.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a fixed rate of interest of 7.26% until July 31, 2011. The securities then have a LIBOR-indexed floating rate of interest. The securities have a mandatory redemption date of October 1, 2036, and are subject to varying call provisions beginning October 1, 2011. The principal asset of Trust III is \$4.1 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company.

While these securities are debt obligations of the Company, they are included in capital for regulatory capital ratio calculations. Under present regulations, the trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including total trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. At December 31, 2008, the total amount of trust preferred securities issued by the Trusts was included in the Company's Tier 1 capital.

On March 11, 2003, First National (VA) Statutory Trust I (Trust I), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities. On March 26, 2003, \$3.0 million of trust preferred securities were issued through a pooled underwriting. The securities had a LIBOR-indexed floating rate of interest. The securities had a mandatory redemption date of March 26, 2033, and were subject to varying call provisions beginning March 26, 2008. The principal asset of Trust I was \$3.1 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities were fully and unconditionally guaranteed by the Company. The Company redeemed the securities in whole on March 26, 2008.

Note 9. Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction and the state of Virginia. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years prior to 2005.

The Company adopted the provisions of FIN 48, *Accounting for Uncertainty in Income Taxes*, on January 1, 2007 with no impact on the financial statements.

Table of Contents

Net deferred tax assets consisted of the following components at December 31, 2008 and 2007:

	<i>(in thousands)</i>	
	2008	2007
Deferred Tax Assets		
Allowance for loan losses	\$ 1,862	\$ 1,326
Interest on non-accrual loans	73	11
Unfunded pension liability	680	235
Split dollar liability	335	
Accrued bonus		111
Other	26	6
	\$ 2,976	\$ 1,689
Deferred Tax Liabilities		
Depreciation	748	585
Prepaid pension	189	208
Securities available for sale	246	144
Discount accretion	9	9
Loan origination costs, net	101	56
Other	44	50
	\$ 1,337	\$ 1,052
Net deferred tax assets	\$ 1,639	\$ 637

The provision for income taxes for the years ended December 31, 2008, 2007 and 2006 consisted of the following:

	<i>(in thousands)</i>		
	2008	2007	2006
Current tax expense	\$ 2,499	\$ 3,002	\$ 2,725
Deferred tax expense (benefit)	(659)	(261)	41
	\$ 1,840	\$ 2,741	\$ 2,766

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income for the years ended December 31, 2008, 2007 and 2006, due to the following:

	<i>(in thousands)</i>		
	2008	2007	2006
Computed tax expense at statutory federal rate	\$ 2,061	\$ 2,886	\$ 2,912
Increase (decrease) in income taxes resulting from:			
Tax-exempt interest and dividend income	(188)	(161)	(153)
Other	(33)	16	7
	\$ 1,840	\$ 2,741	\$ 2,766

Note 10. Funds Restrictions and Reserve Balance

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Transfers of funds from the banking subsidiary to the parent company in the form of loans, advances and cash dividends are restricted by federal and state regulatory authorities. At December 31, 2008, the aggregate amount of unrestricted funds which could be transferred from the banking subsidiary to the parent Company, without prior regulatory approval, totaled \$8.3 million.

The Bank must maintain a reserve against its deposits in accordance with Regulation D of the Federal Reserve Act. For the final weekly reporting period in the years ended December 31, 2008 and 2007, the aggregate amounts of daily average required balances were approximately \$555 thousand and \$2.1 million, respectively.

Table of Contents**Note 11. Benefit Plans***Pension Plan*

The Bank has a noncontributory, defined benefit pension plan for all full-time employees over 21 years of age with at least one year of credited service. Benefits are generally based upon years of service and average compensation for the five highest-paid consecutive years of service. The Bank's funding practice has been to make at least the minimum required annual contribution permitted by the Employee Retirement Income Security Act of 1974, as amended, and the Internal Revenue Code of 1986, as amended. Prior to 2008, the Company used October 1 as a measurement date to determine postretirement benefit obligations. The requirement under SFAS 158 to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. The following table provides a reconciliation of the changes in the plan benefit obligation and the fair value of assets for the periods ended December 31, 2008, 2007 and 2006.

	<i>(in thousands)</i>		
	2008	2007	2006
Change in Benefit Obligation

Weighted Average Assumptions Used to Determine Net Periodic Benefit Cost

Discount rate	6.25%	6.00%	5.75%
Expected return on plan assets	8.50%	8.50%	8.50%
Rate of compensation increase	4.00%	5.00%	5.00%

The plan sponsor selects the expected long-term rate of return on assets assumption in consultation with their investment advisors and actuary. This rate is intended to reflect the average rate of earnings expected to be earned on the funds invested or to be invested to provide plan benefits. Historical performance is reviewed, especially with respect to real rates of return (net of inflation), for the major asset classes held or anticipated to be held by the trust, and for the trust itself. Undue weight is not given to recent experience, which may not continue over the measurement period, with higher significance placed on current forecasts of future long-term economic conditions.

Because assets are held in a qualified trust, anticipated returns are not reduced for taxes. Further, solely for this purpose, the plan is assumed to continue in force and not terminate during the period during which assets are invested. However, consideration is given to the potential impact of current and future investment policy, cash flow into and out of the trust, and expenses (both investment and non-investment) typically paid from plan assets (to the extent such expenses are not explicitly estimated within periodic cost).

The process used to select the discount rate assumption under SFAS 87 takes into account the benefit cash flow and the segmented yields on high-quality corporate bonds that would be available to provide for the payment of the benefit cash flow. A single effective discount rate, rounded to the nearest .25%, is then established that produces an equivalent discounted present value.

The pension plan's weighted-average asset allocations at the end of the plan year for 2008 and 2007, by asset category were as follows:

Asset Category	2008	2007
Mutual funds - fixed income	32%	34%
Mutual funds - equity	63%	61%
Other	5%	5%
Total	100%	100%

Table of Contents

The trust fund is sufficiently diversified to maintain a reasonable level of risk without imprudently sacrificing return, with a targeted asset allocation of 40% fixed income and 60% equities. The Investment Manager selects investment fund managers with demonstrated experience and expertise, and funds with demonstrated historical performance for the implementation of the plan's investment strategy. The investment manager will consider both actively and passively managed investment strategies and will allocate funds across the asset classes to develop an efficient investment structure.

It is the responsibility of the trustee to administer the investments of the trust within reasonable costs, being careful to avoid sacrificing quality. These costs include, but are not limited to, management and custodial fees, consulting fees, transaction costs and other administrative costs chargeable to the trust.

The Company made cash contributions of \$170 thousand and \$195 thousand for the 2008 and 2007 plan years, respectively, and expects to contribute \$426 thousand for the 2009 plan year. The accumulated benefit obligation for the defined benefit pension plan was \$2.8 million and \$2.3 million at December 31, 2008 and 2007, respectively.

Estimated future benefit payments, which reflect expected future service, as appropriate, were as follows at December 31, 2008:

	<i>(in thousands)</i>
2009	\$ 21
2010	28
2011	28
2012	54
2013	60
Years 2014-2018	844

401(k) Plan

The Company maintains a 401(k) plan for all eligible employees. Participating employees may elect to contribute up to the maximum percentage allowed by the Internal Revenue Service, as defined in the plan. The Company makes matching contributions up to the first three percent of an employee's compensation contributed to the Plan. The amount that the Company matches is contributed for the benefit of the respective employee to the employee stock ownership plan (ESOP). All employees who are age nineteen or older are eligible. Employee contributions vest immediately. Employer matching contributions vest after three plan service years with the Company. The Company has the discretion to make a profit sharing contribution to the plan each year based on overall performance, profitability, and other economic factors. For the years ended December 31, 2008, 2007 and 2006, expense attributable to the Plan amounted to \$150 thousand, \$164 thousand and \$162 thousand, respectively.

Employee Stock Ownership Plan

On January 1, 2000, the Company established an employee stock ownership plan. The ESOP provides an opportunity for the Company to award shares of First National Corporation stock to employees at its discretion. Employees are eligible to participate in the ESOP effective immediately upon beginning service with the Company. Participants become 100% vested after three years of credited service. In addition to the 401(k) matching contributions made by the Company to the ESOP, the Board of Directors may make discretionary contributions, within certain limitations prescribed by federal tax regulations.

The ESOP operates as a leveraged ESOP. The ESOP's debt was incurred when the Company loaned the ESOP \$570 thousand from the proceeds the Company received from its bank note payable. The ESOP shares initially were pledged as collateral for its debt. As the debt is repaid, shares are released from collateral and allocated to employees, based on the proportion of debt service paid in the year. The shares are deducted from shareholders' equity as unearned ESOP shares in the accompanying balance sheets. As shares are released from collateral, the Company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for EPS computations. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings; dividends on unallocated ESOP shares are recorded as a reduction of debt and accrued interest.

There was no compensation expense for the ESOP for the years ended December 31, 2008 and 2007. Compensation expense for the ESOP was \$3 thousand for the year ended December 31, 2006.

Table of Contents

Shares of the Company held by the ESOP at December 31, 2008, 2007 and 2006, are as follows:

	2008	2007	2006
Allocated shares	36,980	31,536	25,730
Unreleased shares	8,618	14,093	20,309
Total ESOP shares	45,598	45,629	46,039
Fair value of unreleased shares (in thousands)	\$ 140	\$ 317	\$ 548

Split Dollar Life Insurance Plan

On January 6, 1999, the Bank adopted a Director Split Dollar Life Insurance Plan. This Plan provides life insurance coverage to insurable directors of the Bank. The Bank owns the policies and is entitled to all values and proceeds. The Plan provides retirement benefits and the payment of benefits at the death of the insured director. The amount of benefits will be determined by the performance of the policies over the director's life.

In September 2006, the FASB reached a consensus on Emerging Issues Task Force (EITF) Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements, (EITF Issue 06-4). This standard requires a company to recognize an obligation over an employee's service period based upon the substantive agreement with the employee such as the promise to maintain a life insurance policy or provide a death benefit postretirement. The Company adopted EITF 06-4 on January 1, 2008 as a change in accounting principle through a cumulative-effect adjustment to retained earnings totaling \$651 thousand. The related expense recognized during the year ended December 31, 2008 was \$59 thousand.

Note 12. Commitments and Unfunded Credits

The Company, through its banking subsidiary is a party to credit related financial instruments with risk not reflected in the consolidated financial statements in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Bank's exposure to credit loss is represented by the contractual amount of these commitments. The Bank follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2008 and 2007, the following financial instruments were outstanding whose contract amounts represent credit risk:

	<i>(in thousands)</i>	
	2008	2007
Commitments to extend credit and unfunded commitments under lines of credit	\$ 48,617	\$ 56,158
Stand-by letters of credit	7,068	7,150
Rate lock commitments	1,911	673

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized as deemed necessary and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Bank is committed.

Table of Contents

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting those commitments if deemed necessary.

At December 31, 2008, the Bank had entered into locked-rate commitments to originate mortgage loans amounting to \$1.9 million and had no loans held for sale. Risks arise from the possible inability of counterparties to meet the terms of their contracts. The Bank does not expect any counterparty to fail to meet its obligations.

The Bank has cash accounts in other commercial banks. The amount on deposit at these banks at December 31, 2008 exceeded the insurance limits of the Federal Deposit Insurance Corporation by \$76 thousand.

Note 13. Transactions with Related Parties

During the year, executive officers and directors (and companies controlled by them) were customers of and had transactions with the Company in the normal course of business. These transactions were made on substantially the same terms as those prevailing for other customers.

At December 31, 2008 and 2007, these loans totaled \$9.9 million and \$8.6 million, respectively. During 2008, total principal additions were \$2.9 million and total principal payments were \$1.6 million.

Deposits from related parties held by the Bank at December 31, 2008 and 2007 amounted to \$3.5 million and \$3.1 million, respectively.

Note 14. Lease Commitments

The Company was obligated under noncancelable leases for banking premises. Total rental expense for operating leases for 2008, 2007 and 2006 was \$162 thousand, \$74 thousand and \$71 thousand, respectively. Minimum rental commitments under noncancelable leases with terms in excess of one year as of December 31, 2008 were as follows:

	<i>(in thousands)</i>
	Operating Leases
2009	\$ 180
2010	167
2011	167
2012	167
2013	148
2014 and thereafter	261
Total minimum payments	\$ 1,090

Note 15. Dividend Reinvestment Plan

The Company has in effect a Dividend Reinvestment Plan (DRIP) which provides an automatic conversion of dividends into common stock for enrolled shareholders. Stock is purchased on the open market on each dividend payable date.

Shares of common stock can be issued by the Company or purchased in the open market for the additional shares required for the DRIP. The Company purchased 10,193, 7,885 and 6,471 shares on the open market for the years ended December 31, 2008, 2007 and 2006, respectively.

Note 16. Fair Value Measurements

The Company adopted SFAS No. 157, Fair Value Measurements (SFAS 157), on January 1, 2008 to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. SFAS 157 clarifies that fair value of certain assets and liabilities is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market

participants.

In February 2008, the FASB issued Staff Position No. 157-2 (FSP 157-2) which delayed the effective date of SFAS 157 for certain nonfinancial assets and nonfinancial liabilities except for those items that are recognized or disclosed at fair value in the financial

Table of Contents

statements on a recurring basis. FSP 157-2 defers the effective date of SFAS 157 for such nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. Thus, the Company has only partially applied SFAS 157. Those items affected by FSP 157-2 include other real estate owned (OREO), goodwill and core deposit intangibles.

In October 2008, the FASB issued Staff Position No. 157-3 (FSP 157-3) to clarify the application of SFAS 157 in a market that is not active and to provide key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP 157-3 was effective upon issuance, including prior periods for which financials statements were not issued.

SFAS 157 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. The three levels of the fair value hierarchy under SFAS 157 based on these two types of inputs are as follows:

- Level 1 Valuation is based on quoted prices in active markets for identical assets and liabilities.
- Level 2 Valuation is based on observable inputs including quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar assets and liabilities in less active markets, and model-based valuation techniques for which significant assumptions can be derived primarily from or corroborated by observable data in the market.
- Level 3 Valuation is based on model-based techniques that use one or more significant inputs or assumptions that are unobservable in the market.

The following describes the valuation techniques used by the Company to measure certain financial assets and liabilities recorded at fair value on a recurring basis in the financial statements:

Securities available for sale: Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable market data. Third party vendors compile prices from various sources and may determine the fair value of identical or similar securities by using pricing models that considers observable market data (Level 2).

The following table presents the balances of financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2008. Securities identified in Note 2 as restricted securities including stock in the Federal Home Loan Bank of Atlanta (FHLB), Federal Reserve Bank (FRB) and the Community Bankers Bank (CBB) are excluded from the table below since there is no ability to sell these securities except when the FHLB, FRB or CBB require redemption based on either the Company's borrowings at the FHLB or in the case of the FRB changes in certain portions of the Company's capital.

Description	Fair Value Measurements at December 31, 2008 Using (in thousands)			
	Balance as of December 31, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Securities available for sale	\$ 54,791	\$ 281	\$ 54,510	\$

Certain financial assets are measured at fair value on a nonrecurring basis in accordance with GAAP. Adjustments to the fair value of these assets usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets.

Table of Contents

The following describes the valuation techniques used by the Company to measure certain financial assets recorded at fair value on a nonrecurring basis in the financial statements:

Loans held for sale: Loans held for sale are carried at the lower of cost or market value. These loans currently consist of one-to-four family residential loans originated for sale in the secondary market. Fair value is based on the price secondary markets are currently offering for similar loans using observable market data which is not materially different than cost due to the short duration between origination and sale (Level 2). As such, the Company records any fair value adjustments on a nonrecurring basis. No nonrecurring fair value adjustments were recorded on loans held for sale during the year ended December 31, 2008.

Impaired Loans: Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. The measurement of loss associated with impaired loans can be based on either the observable market price of the loan or the fair value of the collateral. Fair value is measured based on the value of the collateral securing the loans. Collateral may be in the form of real estate or business assets including equipment, inventory, and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the Company using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the real estate property is over two years old, then the fair value is considered Level 3. The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable business financial statements if not considered significant using observable market data. Likewise, values for inventory and accounts receivables collateral are based on financial statement balances or aging reports (Level 3). Impaired loans allocated to the Allowance for Loan Losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan losses on the Consolidated Statements of Income.

The following table summarizes the Company's financial assets that were measured at fair value on a nonrecurring basis during the period.

Description	Carrying Value at December 31, 2008 (in thousands)			
	Balance as of December 31, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Impaired loans	\$ 765		\$ 591	\$ 174

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. SFAS 107 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

SFAS 107, Disclosures about Fair Value of Financial Instruments, requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below:

Cash and Cash Equivalents

The carrying amounts of cash and short-term instruments approximate fair values.

Table of Contents**Loans**

For variable-rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for all other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values for non-performing loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit Liabilities

The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities.

Accrued Interest

The carrying amounts of accrued interest approximate fair value.

Borrowings

The carrying amounts of federal funds purchased and other short-term borrowings maturing within ninety days approximate their fair values. Fair values of all other borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Commitments and Unfunded Credits

The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

The fair value of stand-by letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. At December 31, 2008 and 2007, fair value of loan commitments and standby letters of credit was immaterial.

The estimated fair values of the Company's financial instruments at December 31, 2008 and 2007 were as follows:

	<i>(in thousands)</i>			
	2008		2007	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets				
Cash and short-term investments	\$ 10,490	\$ 10,490	\$ 12,909	\$ 12,909
Securities	58,238	58,238	57,503	57,503
Loans, net	446,327	438,754	445,380	437,738
Loans held for sale			270	265
Accrued interest receivable	1,763	1,763	2,227	2,227
Financial Liabilities				
Deposits	\$ 447,493	\$ 450,505	\$ 445,142	\$ 445,232
Federal funds purchased	2,456	2,456	3,409	3,409
Other borrowings	45,397	45,998	40,564	40,634
Company obligated mandatorily redeemable capital securities	9,279	11,532	12,372	12,378
Accrued interest payable	1,121	1,121	1,212	1,212

The Company assumes interest rate risk (the risk that general interest rate levels will change) as a result of its normal operations. As a result, the fair values of the Company's financial instruments will change when interest rate levels change and that change may be either favorable or unfavorable to the Company. Management attempts to match maturities of assets and liabilities to the extent believed necessary to minimize

interest rate risk. However, borrowers with fixed rate obligations are less likely to prepay in a rising rate environment and more likely to prepay in a falling rate environment. Conversely, depositors who are receiving fixed rates are more likely to withdraw funds before maturity in a rising rate environment and less likely to do so in a falling rate environment. Management monitors rates and maturities of assets and liabilities and attempts to minimize interest rate risk by adjusting terms of new loans and deposits and by investing in securities with terms that mitigate the Company's overall interest rate risk.

Table of Contents**Note 17. Regulatory Matters**

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total (as defined in the regulations) and Tier 1 capital (as defined) to risk-weighted assets (as defined), and of Tier 1 capital to average assets. Management believes, as of December 31, 2008 and 2007, that the Company and the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2008, the most recent notification from the Federal Reserve Bank categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since that notification that management believes have changed the Bank's category.

The Company's and the Bank's actual capital amounts and ratios are also presented in the following table.

	<i>(amounts in thousands)</i>					
	Actual		Minimum Capital Requirement		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2008:

Company	\$ 50,715	9.53%	\$ 21,288	4.00%	N/A	N/A
Bank	\$ 49,929	9.40%	\$ 21,257	4.00%	\$ 26,571	5.00%

Table of Contents

Note 18. Subsequent Events

On February 24, 2009, at a special meeting, the Company's shareholders approved the amendment and restatement of the Company's Articles of Incorporation to authorize the issuance of one million shares of preferred stock. The primary purpose of authorizing preferred stock was to allow the Company to participate in the Capital Purchase Program established by the United States Treasury pursuant to the Emergency Economic Stabilization Act of 2008.

On March 13, 2009, the Company entered into a Letter Agreement and Securities Purchase Standard Terms (collectively, the Purchase Agreement) with the Treasury Department, pursuant to which the Company sold (i) 13,900 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$1.25 per share, having a liquidation preference of \$1,000 per share (the Preferred Stock) and (ii) a warrant (the Warrant) to purchase 695 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series B (the Warrant Preferred Stock), at an exercise price of \$1.25 per share, for an aggregate purchase price of \$13.9 million in cash. The Treasury immediately exercised the Warrant and, after net settlement, received 695 shares of the Company's Warrant Preferred Stock, which has a liquidation preference amount of \$1,000 per share. The Preferred Stock will qualify as Tier 1 capital and will pay cumulative dividends at a rate of 5% per annum for the first five years, and thereafter at a rate of 9% per annum. The Warrant Preferred Stock entitles its holder(s) to cumulative dividends at a rate of 9% per annum from the date of issuance.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

The Company's management has evaluated, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of disclosure controls and procedures as of December 31, 2008 pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2008, the disclosure controls and procedures are effective in ensuring that the information required to be disclosed in Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner and (2) accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Refer to Item 8 of this report for the Management's Report on the Effectiveness of Internal Controls over Financial Reporting.

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation of it that occurred during the Company's last fiscal quarter that materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information required by this Item is set forth under the headings Election of Directors Nominees, Executive Officers Who Are Not Directors, Section 16(a) Beneficial Ownership Reporting Compliance, Code of Conduct and Ethics, Committees and Director Selection Process in the Company's Proxy Statement for the 2009 Annual Meeting of Shareholders (the Proxy Statement), which information is incorporated herein by reference.

Item 11. Executive Compensation

Information required by this Item is set forth under the headings Executive Compensation and Director Compensation in the Proxy Statement, which information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item is set forth under the heading Stock Ownership of Directors and Executive Officers and Stock Ownership of Certain Beneficial Owners in the Proxy Statement, which information is incorporated herein by reference.

The Company does not have any compensation plans or other arrangements under which equity securities are authorized for issuance.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information required by this Item is set forth under the headings Certain Relationships and Related Party Transactions and Director Independence in the Proxy Statement, which information is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

Information required by this Item is set forth under the headings Auditor Fees and Services and Policy for Approval of Audit and Permitted Non-Audit Services in the Proxy Statement, which information is incorporated herein by reference.
