PROSPECTUS

Shares

Class A Common Stock

Inland Western Retail Real Estate Trust, Inc. is a fully integrated, self administered and self-managed real estate company that owns and operates high quality, strategically located shopping centers across 35 states. We are one of the largest owners and operators of shopping centers in the United States.

We are offering _____ shares of our Class A Common Stock as described in this prospectus. All of the shares of Class A Common Stock offered by this prospectus are being sold by us. We currently expect the public offering price to be between \$ _____ and \$ _____ per share. We have applied to have our Class A Common Stock listed on the New York Stock Exchange, or the NYSE, under the symbol **IWST**. Currently, our Class A Common Stock is not traded on a national securities exchange, and this will be our first listed public offering.

We are a Maryland corporation, and we have elected to qualify as a real estate investment trust, or REIT, for U.S. federal income tax purposes. Shares of our Class A Common Stock are subject to ownership limitations that are primarily intended to assist us in maintaining our qualification as a REIT. Our charter contains certain restrictions relating to the ownership and transfer of our Class A Common Stock, including, subject to certain exceptions, a 9.8% ownership limit of common stock by value or number of shares, whichever is more restrictive. See **Description of Capital Stock Restrictions on Ownership and Transfer** beginning on page 147 of this prospectus.

Investing in our Class A Common Stock involves risk. See Risk Factors beginning on page 17 of this prospectus.

	Per Share	Total
Public offering price	\$ _____	\$ _____
Underwriting discount	\$ _____	\$ _____
Proceeds, before expenses, to us	\$ _____	\$ _____

We have granted the underwriters the option to purchase an additional _____ shares of our Class A Common Stock on the same terms and conditions set forth above within 30 days after the date of this prospectus solely to cover overallocments, if any.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of our Class A Common Stock on or about _____, 2011.

You should rely only upon the information contained in this prospectus, or in any free writing prospectus prepared by us or information to which we have referred you. No dealer, salesperson or other person is authorized to give any information or to represent anything not contained in this prospectus. You must not rely on any unauthorized information or representations. This prospectus is an offer to sell only the shares offered hereby, but only under circumstances and in jurisdictions where it is lawful to do so. The information contained in this prospectus is current only as of its date, regardless of the time of delivery of this prospectus or of any sale of our Class A Common Stock. Our business, financial condition, liquidity, results of operations and prospects may have changed since those dates. We will update this prospectus as required by law.

We use market data throughout this prospectus. We have obtained the information under Prospectus Summary Industry Overview and Industry Overview from the market study prepared for us by Rosen Consulting Group, or Rosen, a nationally recognized real estate consulting firm, and such information is included in this prospectus in reliance on Rosen's authority as an expert in such matters. See Experts. In addition, we have obtained certain market data from publicly available information and industry publications. These sources generally state that the information they provide has been obtained from sources believed to be reliable, but the accuracy and completeness of the information are not guaranteed. The forecasts and projections are based on industry surveys and the preparers' experience in the industry, and there is no assurance that any of the projections or forecasts will be achieved. We believe that the surveys and market research others have performed are reliable, but we have not independently verified this information.

Table of Contents

On February 24, 2011, our shareholders approved an amendment and restatement of our charter that is intended to facilitate the listing of our Class A Common Stock on the NYSE. The amendment and restatement of our charter will become effective upon the filing of the amendment and restatement of our charter with the Maryland State Department of Assessments and Taxation. We expect to file the proposed amendment and restatement of our charter prior to the completion of this offering. Unless otherwise indicated, the information contained in this prospectus assumes that the amendment and restatement of our charter has become effective.

Recapitalization

Prior to the completion of this offering, we intend to declare a stock dividend pursuant to which each then outstanding share of our common stock will receive:

one share of our Class B-1 Common Stock; plus

one share of our Class B-2 Common Stock; plus

one share of our Class B-3 Common Stock.

In connection with this stock dividend, we intend to redesignate our then outstanding common stock as Class A Common Stock. Prior to the declaration of the stock dividend, we intend to effectuate a _____ to one reverse stock split of our common stock outstanding.

In this prospectus, we refer to these transactions as the Recapitalization, we refer to Class B-1 Common Stock, Class B-2 Common Stock and Class B-3 Common Stock collectively as our Class B Common Stock, and we refer to Class A and Class B Common Stock collectively as our common stock. We are offering our Class A Common Stock in this offering, and we intend to list our Class A Common Stock on the NYSE. Our Class B Common Stock will be identical to our Class A Common Stock except that (i) we do not intend to list our Class B Common Stock on a national securities exchange and (ii) shares of our Class B Common Stock will convert automatically into shares of our Class A Common Stock at specified times. Subject to the provisions of our charter, shares of our Class B-1, Class B-2 and Class B-3 Common Stock will convert automatically into shares of our Class A Common Stock _____ months following the Listing, _____ months following the Listing and _____ months following the Listing, respectively. On the _____ month anniversary of the listing of our Class A Common Stock on the NYSE (the Listing), all shares of our Class B Common Stock will have converted into our Class A Common Stock. The terms of our Class A and Class B Common Stock are described more fully under Description of Capital Stock in this prospectus.

The Recapitalization also will have the effect of reducing the total number of outstanding shares of our common stock. As of October 3, 2011, without giving effect to the Recapitalization, we had approximately 482.2 million shares of common stock outstanding. As of October 3, 2011, after giving effect to the Recapitalization, we would have had an aggregate of approximately _____ shares of our Class A and Class B Common Stock outstanding, divided equally among our Class A, Class B-1, Class B-2 and Class B-3 Common Stock.

The Recapitalization will be effected prior to the completion of this offering. Unless otherwise indicated, all information in this prospectus gives effect to, and all share and per share amounts have been retroactively adjusted to give effect to, the Recapitalization. Unless otherwise indicated, share and per share amounts have not been adjusted to give effect to any exercise by the underwriters of their option to purchase up to _____ shares of our Class A Common Stock solely to cover overallotments, if any.

In this prospectus:

annualized base rent as of a specified date means monthly base rent as of the specified date, before abatements, under leases which have commenced as of the specified date multiplied by 12. Annualized base rent (i) does not include tenant reimbursements or

expenses borne by the tenants in triple net or modified gross leases, such as the expenses for real estate taxes and insurance and common area and

Table of Contents

other operating expenses, (ii) does not reflect amounts due per percentage rent lease terms, where applicable, and (iii) is calculated on a cash basis and differs from how we calculate rent in accordance with generally accepted accounting principles in the United States of America, or GAAP, for purposes of our financial statements;

community center means a shopping center that we believe meets the International Council of Shopping Centers' s, or ICSC' s, definition of community center. ICSC, generally, defines a community center as a shopping center similar to a neighborhood center, defined below, but which offers a wider range of apparel and other soft goods than a neighborhood center. Community centers are usually configured as a strip, or may be laid out in an L or U shape, and are commonly anchored by supermarkets, super drugstores and discount department stores;

lifestyle center means a shopping center that we believe meets ICSC' s definition of lifestyle center. ICSC, generally, defines a lifestyle center as a shopping center that is most often located near affluent residential neighborhoods and caters to the retail needs and lifestyle pursuits of consumers in its trading area. Lifestyle centers typically have open-air configurations, include at least 50,000 square feet of retail space occupied by upscale national chain specialty stores and include other elements serving its role as a multi-purpose leisure-time destination, such as restaurants and entertainment;

neighborhood center means a shopping center that we believe meets ICSC' s definition of neighborhood center. ICSC, generally, defines a neighborhood center as a shopping center designed to provide convenience shopping for the day-to-day needs of consumers in the immediate neighborhood, which is usually configured as a straight-line strip with parking in the front and no enclosed walkway or mall area. Neighborhood centers are frequently anchored by a grocer or drug store and supported by stores offering drugs, sundries, snacks and personal services;

power center means a shopping center that we believe meets ICSC' s definition of power center. ICSC, generally, defines a power center as a shopping center dominated by several large anchors, including discount department stores, off-price stores, warehouse clubs, or category killers, i.e., stores that offer tremendous selection in a particular merchandise category at low prices. Power centers typically consist of several anchors, some of which may be freestanding (unconnected) and only a minimum amount of small specialty tenants; and

shadow anchors means one or more retailers situated on parcels that are owned by unrelated third parties but, due to their location within or immediately adjacent to our shopping center, to the consumer appear as another retail tenant of the shopping center and, as a result, attract additional customer traffic to the center.

Unless otherwise indicated, references in this prospectus to our properties or portfolio include information with respect to properties held by us on a consolidated basis as of June 30, 2011. Information with respect to our operating properties excludes non-stabilized operating properties, which are properties that have not achieved 90% or greater occupancy since their development and have been operational for less than one year.

Table of Contents

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It does not contain all of the information that you should consider before investing in our Class A Common Stock. You should read carefully the more detailed information set forth under the heading Risk Factors and the other information included in this prospectus. Except where the context suggests otherwise, the terms our company, we, us and our refer to Inland Western Retail Real Estate Trust, Inc., a Maryland corporation, together with its consolidated subsidiaries. Unless otherwise indicated, the information contained in this prospectus assumes that the Class A Common Stock to be sold in the offering is sold at \$ per share, the midpoint of the pricing range set forth on the cover page of this prospectus, and that the underwriters do not exercise their option to purchase up to an additional shares solely to cover overallocments, if any. Unless otherwise indicated, all property information contained in this prospectus is for our retail operating properties as of June 30, 2011 excluding seasonal leases.

Company Overview

We are one of the largest owners and operators of shopping centers in the United States. As of June 30, 2011, our retail operating portfolio consisted of 265 properties with 35.5 million square feet of gross leasable area, or GLA. Our retail operating portfolio is geographically diversified across 35 states and includes power centers, community centers, neighborhood centers and lifestyle centers, as well as single-user retail properties. Our retail properties are primarily located in retail districts within densely populated areas in highly visible locations with convenient access to interstates and major thoroughfares. Our retail properties have a weighted average age, based on annualized base rent, of only approximately 10.1 years since the initial construction or most recent major renovation. As of June 30, 2011, our retail operating portfolio was 88.6% leased, including leases signed but not commenced. In addition to our retail operating portfolio, as of June 30, 2011, we also held interests in 16 office and industrial operating properties, including 12 office properties and four industrial properties, two non-stabilized operating properties, 20 retail operating properties held by three unconsolidated joint ventures and five retail properties under development.

Our shopping centers are primarily anchored or shadow anchored by strong national and regional grocers, discount retailers and other retailers that provide basic household goods or clothing, including Target, TJX Companies, PetSmart, Best Buy, Bed Bath & Beyond, Home Depot, Kohl's, Wal-Mart, Publix and Lowes. As of June 30, 2011, over 90% of our shopping centers, based on GLA, were anchored or shadow anchored by a grocer, discount department store, wholesale club or retailers that sell basic household goods or clothing. Overall, we have a broad and highly diversified retail tenant base that includes approximately 1,600 tenants with no one tenant representing more than 3.3% of the total annualized base rent generated from our retail operating properties, or our retail annualized base rent.

We are a client-focused organization, maintaining very active relationships with our key tenants. We have 19 property management offices strategically located across the country and over 180 employees primarily dedicated to our leasing, asset management and property management activities. Our senior management team applies a hands-on approach to leasing our portfolio and is supported by over 80 property managers and senior leasing agents who have an average of 15 years of experience in the industry. We believe that the size and scale of our property management and leasing organization, the breadth of our tenant relationships and the scale of our retail portfolio provides us with a competitive advantage in dealing with national and large regional grocers and retailers. Through the efforts of our leasing team since the beginning of 2009, we have renewed approximately 70% of our expiring leases based on GLA at aggregate base rental rates that reflected comparatively small decreases from the base rental rates of the expiring leases and have signed 446 new leases for 3.8 million square feet of GLA, representing 10.7% of the total GLA in our retail operating portfolio.

Table of Contents

Competitive Strengths

We believe that we distinguish ourselves from other owners and operators of shopping centers through the following competitive strengths:

Large, Diversified, High Quality Retail Portfolio

We own a national portfolio of high quality retail properties that is well diversified both geographically and by property type. We have retail operating properties in 35 states with no one metropolitan statistical area, or MSA, accounting for more than 5.3% of our retail annualized base rent, other than the Dallas-Fort Worth-Arlington area, which accounts for 14.2% of our retail annualized base rent. Our retail operating portfolio is also well diversified by type, including 65 power centers with 16.1 million square feet of GLA, 60 community centers with 9.1 million square feet of GLA, 44 neighborhood centers with 3.3 million square feet of GLA and seven lifestyle shopping centers with 3.3 million square feet of GLA, as well as 89 single-user retail properties with 3.7 million square feet of GLA and two non-stabilized operating properties. We believe the size and scale of our retail portfolio gives us an advantage in working with national and large regional grocers and retailers, as we offer many potential locations within a selected area from which to choose and can address multiple needs for space in different geographic areas for tenants with multiple locations.

Our shopping centers are well located within strong retail districts in densely populated areas. They have high quality anchors and shadow anchors that consistently drive traffic to our centers and make them more attractive to other potential tenants. Consistent with our entire retail operating portfolio, our shopping centers are also generally recently constructed, which makes them more appealing to shoppers and potential tenants and reduces redevelopment and renovation costs. As of June 30, 2011, 66.7% of our shopping centers, based on annualized base rent, were located in the 50 largest MSAs. These shopping centers are positioned in highly attractive markets with favorable demographics, including a weighted average population of 92,492, expected population growth of 7.2% per year and household income of approximately \$80,800 within a three-mile radius, based on information derived and interpreted by us as a result of our own analysis from data provided by The Nielsen Company. We believe our shopping centers located in markets outside of the 50 largest MSAs are among the most attractive shopping centers in each of the markets in which they are located based on location, age and overall quality. As of June 30, 2011, approximately 91.1% of these shopping centers, based on annualized base rent, are anchored or shadow anchored by either Best Buy (15 locations), Target (12 locations), Home Depot (ten locations), Kohl's (nine locations), Wal-Mart (seven locations), Lowe's (five locations), or a national or regional grocer, such as Publix (six locations), Stop & Shop (three locations), Kroger (three locations) and Giant Foods (two locations).

Diversified Base of Value-Oriented Retail Tenants

Our retail portfolio has a broad and highly diversified tenant base that primarily consists of grocers, drug stores, discount retailers and other retailers that provide basic household goods or services. As of June 30, 2011, our total retail tenant base included approximately 1,600 tenants with over 3,200 leases at our retail properties, and our largest shopping center tenants include Best Buy, TJX Companies, Stop & Shop, Bed Bath & Beyond, Home Depot, PetSmart, Ross Dress for Less, Kohl's, Wal-Mart and Publix. As of June 30, 2011, no single retail tenant represented more than 3.3% of our retail annualized base rent, and our top 20 retail tenants, with 404 locations across our portfolio, represented an aggregate of 36.0% of our retail annualized base rent. Additionally, the financial strength of our tenants enhances the quality of our retail portfolio, as seven of our top ten retail tenants have investment grade credit ratings. We believe that maintaining a diversified tenant base with a value-oriented focus limits the impact of economic cycles and our exposure to any single tenant.

We generally have long-term leases with our tenants. As of June 30, 2011, the weighted average lease term of our existing retail leases, based on annualized base rent, was 6.3 years, with leases constituting less than 22.2% of our retail annualized base rent expiring before 2014. We believe the limited near-term expirations of our existing retail leases will allow us to more aggressively pursue leasing of space that is currently vacant and provide for more stable cash flows from operations.

Table of Contents

Demonstrated Leasing and Property Management Platform

We believe that our national leasing platform overseen by our focused executive team dedicated to leasing provides us with a distinct competitive advantage. Our executive team applies a hands-on approach and capitalizes upon a network of relationships to aggressively lease-up vacant space, maintain high tenant retention rates and creatively address the needs of our retail properties. Since the beginning of 2009, we have demonstrated our leasing capabilities through our success in addressing 3.2 million square feet of vacant space in our portfolio created by the bankruptcies of Mervyn's, Linens 'n Things and Circuit City in 2008. Primarily as a result of these vacancies, the percentage of our retail operating portfolio that was leased decreased from 96.8% as of December 31, 2007. However, as a result of our strong leasing platform, as of June 30, 2011, we have been able to lease approximately 2.1 million square feet of this vacant space, primarily to existing tenants, and in total we have leased, sold or are in negotiations for 2.7 million square feet, or 83.9%, of the 3.2 million square feet of GLA that was vacated as a result of these bankruptcies.

As a large, national owner of retail properties, we believe that we offer national and large regional grocers and retailers a greater level of service and credibility with respect to property management than our smaller competitors. We believe that tenants value our commitment to consistently maintain the high standards of our retail properties through our in-house handling of property management and day-to-day operational functions, which has translated into tenant retention rates of approximately 70%, based on expiring GLA, since the beginning of 2009.

Capital Structure Positioned for Growth

Upon completion of this offering, our aggregate indebtedness will consist primarily of fixed rate debt, which will have staggered maturities and a weighted average maturity of approximately 5 years based on balances as of June 30, 2011, as adjusted for our recently amended and restated credit agreement and the completion of this offering and the application of proceeds from both. We also will have a conservative leverage structure with less than \$ 100 million of debt maturing in any one year, a weighted average interest rate of 6% per annum and \$ 100 million of availability under our \$435.0 million senior secured line of credit. Overall, we believe our capital structure will provide us with significant financial flexibility to fund future growth.

Experienced Management Team with a Proven Track Record

Our senior management team has on average over 23 years of real estate industry experience through several real estate, credit and retail cycles. They have worked together for the past five years and have proven themselves by successfully managing our large, geographically diverse portfolio through the severe economic recession that began in December 2007. Since the beginning of 2009, without accessing the public equity markets, we refinanced or repaid \$2.9 billion of indebtedness, greater than 60% of our total indebtedness at the beginning of 2009, in severely constrained credit markets and in the process reduced our total indebtedness by over \$980 million. Our senior management team also has significant transactional experience, having acquired, disposed of, contributed to joint ventures and developed billions of dollars of real estate throughout their careers. We believe that our senior management team's property management, leasing and operating expertise, combined with their acquisition and financing experience, provide us with a distinct competitive advantage.

Table of Contents

Business and Growth Strategies

Our primary objective is to provide attractive risk-adjusted returns for our shareholders by increasing our cash flow from operations and realizing long-term growth strategies. The strategies we intend to execute to achieve this objective include:

Maximize Cash Flow Through Internal Growth

We believe that we will be able to generate cash flow growth through the leasing of vacant space in our retail operating portfolio. As of June 30, 2011, our retail operating portfolio was 88.6% leased, including leases signed but not commenced, and had 4.0 million square feet of available space, including a significant amount of space that was previously occupied by big box anchor and junior anchor tenants. As of June 30, 2011, we had approximately 923,000 square feet of GLA of signed leases that had not commenced, representing a total of approximately \$8.3 million of annualized base rent that will increase our future cash flows. We believe the leasing of our vacant space provides a significant growth opportunity for our shareholders, particularly in light of the expansion plans that have been announced by a number of our largest retail tenants. In addition, as of June 30, 2011, 38.4% of the leases in our retail operating portfolio, based on annualized base rent, contained contractual rent increases, which will increase future cash flows.

Asset Preservation and Appreciation through Creative Transactions

We actively manage our portfolio focusing primarily on leasing opportunities, while also taking into account redevelopment, expansion and remerchandising opportunities. In pursuing these opportunities, we focus on increasing operating income and cash flows, active risk mitigation and tenant retention. Additional value enhancing strategies include cost reductions, long-term capital planning and asset sustainability initiatives. Examples of how we execute these strategies include Azalea Square, where we divided space that was vacated by Linens 'n Things and re-leased it to two new tenants for an 11.7% increase in total annualized base rent for the space, and Tollgate Marketplace, where we were able to anticipate that an existing grocery store tenant would not renew its lease due to the expected opening of a new Wal-Mart Supercenter in the area and re-lease the vacated space within nine months to Ashley Furniture for more than double the base rent per square foot that the grocer had been paying.

Recycle Capital Through Disposition of Non-Core Assets

We plan to pursue opportunistic dispositions of the non-retail properties and free-standing triple net retail properties in our operating portfolio in order to redeploy capital to continue to build our interest in well located, high quality shopping centers. In addition to our retail operating portfolio, as of June 30, 2011, we held interests in 16 other operating properties, including 12 office properties and four industrial properties, which had a total of 5.7 million square feet of GLA and represent 10.3% of our total operating portfolio based on annualized base rent. We believe that the disposition of these non-retail properties, along with select triple net retail properties, will serve as a source of capital for the growth of our retail portfolio.

As we have in the past, we intend to take advantage of opportunities that may arise to sell assets in our portfolio. Since the end of 2007 through June 30, 2011, we sold 24 properties for an aggregate sales price of \$772.3 million, including \$466.3 million of debt that was assumed, forgiven or repaid. During this time, we reduced the GLA of our non-retail properties and single-user retail properties by 35.5%. We plan to continue to pursue strategic dispositions to continue to focus our portfolio on well located, high quality shopping centers.

Table of Contents

Pursue Acquisitions of High Quality Retail Properties

We intend to pursue disciplined and targeted acquisitions of retail properties that meet our retail property and market selection criteria and will further our strategy of focusing on well located, high quality shopping centers. Utilizing our senior management team's expertise, we intend to opportunistically acquire retail properties based on identified market and property characteristics, including: property classification, anchor tenant type, lease terms, geographic markets and demographics. We believe that the high level of diversification of our tenant base limits our exposure to any single tenant and allows us to take advantage of growth opportunities through the expansion of our existing relationships without significantly increasing our exposure to any single tenant. We believe that over the next several years the continued impact of the recent disruption in the real estate market will create opportunities to acquire retail properties that meet our investment criteria from owners facing operational and financial stress. Based on our operational expertise and capital resources, we believe that we are well positioned to take advantage of opportunities to acquire retail properties. We plan to pursue acquisitions directly and through joint ventures.

Pursue Strategic Joint Ventures to Leverage Management Platform

We intend to leverage our leasing and property management platform through the strategic formation, capitalization and management of joint ventures. In the past, we have partnered with strong institutional capital providers to supplement our capital base in a manner accretive to our shareholders. For example, in September 2010, we formed a joint venture with a wholly-owned affiliate of RioCan Real Estate Investment Trust, Canada's largest REIT, or RioCan, and agreed to contribute eight shopping centers located in Texas to the joint venture. Based on our operational expertise in the retail real estate space, we believe that we are well positioned to continue to strategically pursue additional joint ventures with high quality capital partners. Additionally, from time to time, we may form partnerships with regional developers that allow us to maximize returns on completed developments and access strategic local markets.

Maintain Our Development Activity at Sustainable Levels

We entered into joint venture arrangements with certain developers prior to the recession. Since our inception, we have invested \$183.3 million of equity into nine development joint ventures. As of June 30, 2011, we had approximately 0.6 million square feet of GLA of retail space under development, including space developed for shadow anchors, through three consolidated development joint ventures and one unconsolidated development joint venture, of which 0.5 million square feet had already been constructed. Approximately 80.3% of the GLA of these retail development properties that has been constructed was leased as of June 30, 2011, representing \$1.0 million of annualized base rent. As of June 30, 2011, we did not have any significant active construction ongoing at our development properties, and, currently, we only intend to develop the remaining estimated total GLA to the extent that we have pre-leased the space to be developed. We expect to stabilize these properties between 2013 and 2014, which will provide further opportunities for growth. We currently do not have plans for any new developments. It remains our philosophy to only develop what we intend to own on a long term basis and we intend to resume development when such opportunities become attractive.

Table of Contents**Our Properties**

The following table sets forth summary information regarding our operating portfolio as of June 30, 2011. Dollars (other than per square foot information) and square feet of GLA are presented in thousands in the table.

Property Type/Region	Number of Properties	GLA	Percent of Total GLA ⁽¹⁾	Percent Leased ⁽²⁾	ABR ⁽³⁾	Percent of ABR ⁽¹⁾	ABR Per Leased Sq. Ft. ⁽⁴⁾
Consolidated:							
Retail:							
Northeast	72	8,739	24.6%	91.1%	\$ 116,985	27.2%	\$ 14.69
Texas	50	7,566	21.3%	85.1%	99,280	23.1%	15.41
West	49	7,294	20.6%	75.5%	80,672	18.7%	14.64
Southeast	57	6,593	18.5%	92.0%	71,755	16.7%	11.83
Midwest	37	5,306	15.0%	87.7%	61,516	14.3%	13.23
Total Retail ⁽⁵⁾	265	35,498	100.0%	86.3%	\$ 430,208	100.0%	\$ 14.04
Total Retail including leases signed but not commenced ⁽⁶⁾	265	35,498		88.6%	\$ 438,497		\$ 14.32
Office	12	3,335		96.5%	\$ 38,963		\$ 12.11
Industrial	4	2,323		100.0%	10,208		4.39
Total Office and Industrial	16	5,658		97.9%	\$ 49,171		\$ 8.87
Total Consolidated Operating Portfolio	281	41,156		87.9%	\$ 479,379		\$ 13.25
Total Unconsolidated Operating Portfolio ⁽⁷⁾	20	2,827		91.2%	\$ 39,407		\$ 15.29

(1) Percentages are only provided for our retail operating portfolio.

(2) Except as otherwise noted, based on leases commenced as of June 30, 2011, and calculated as leased GLA divided by total GLA.

(3) Excludes \$1.0 million of annualized base rent from our consolidated development properties. Rental abatements for leases commenced as of June 30, 2011, which are excluded, were \$0.4 million for our retail operating portfolio for the 12 months ending June 30, 2012.

Annualized base rent does not reflect scheduled lease expirations for the 12 months ending June 30, 2012. The portion of the annualized base rent of our consolidated operating portfolio attributable to leases scheduled to expire during the 12 months ending June 30, 2012, including month-to-month leases, is approximately \$30.1 million.

(4) Represents annualized base rent divided by leased GLA.

(5) Includes (i) 55 properties with 6.5 million square feet of GLA representing \$84.1 million of annualized base rent held in one joint venture in which we have a 77% interest and (ii) a portion of one property with 0.3 million square feet of GLA representing \$6.9 million of annualized base rent held in one joint venture in which we have a 95% interest. Regarding the 55 properties held in the joint venture in which we have a 77% interest, we currently anticipate using a portion of the net proceeds from this offering to exercise our option to repurchase the 23% interest held by others. As a result, following this offering we anticipate that we will own 100% of those properties. Excludes two non-stabilized operating properties.

(6) Includes leases signed but not commenced as of June 30, 2011 for approximately 923,000 square feet of GLA representing \$8.3 million of annualized base rent as of lease commencement.

(7) Includes 16 properties with 2.6 million square feet of GLA representing \$37.6 million of annualized base rent held in two separate joint ventures in which we have a 20% interest and four properties with 0.2 million square feet of GLA representing \$1.8 million of annualized base rent held in one joint venture in which we have a 95.8% interest.

Table of Contents

Industry Overview

Since bottoming in December 2009, the economy has evidenced consistent growth. Economic growth, measured by gross domestic product, or GDP, was steady through the first three quarters of 2010, driven by improvement in consumer spending as well as an increase in private investment. Looking forward, Rosen Consulting Group, or Rosen, believes that the pace of the economic recovery that began in 2010 will accelerate in 2011. Accordingly, Rosen expects GDP growth to improve, accelerating from an estimated annual growth rate of 2.2% in 2010 to 2.8% and 3.0% in 2011 and 2012, respectively.

Recent growth in employment and consumer confidence also suggests that the U.S. economy is progressing. Since December 2009, the economy has added more than 1.3 million jobs in the private sector. In addition, consumers at year-end 2010 were much more positive regarding future economic conditions than about their current situations, as evidenced by the consumer confidence index measured by The Conference Board. The expectations component of this index has dramatically increased from its recent low of 27.3 in February 2009 to 71.9 in December 2010. Further, real per capita disposable income growth, a key metric for the retail industry, increased 1.93% year-over-year in the third quarter, after a more modest 0.44% increase in 2009. Rosen expects this upward trend to continue, projecting real per capita disposable income growth to average 2.7% annually between 2011 and 2014, compared with an estimated 1.1% average annual increase between 2007 and 2010.

As employment and income growth accelerate, Rosen expects consumer confidence to increase accordingly, driving stronger retail sales growth. Retail sales continued to recover in 2010, increasing at an average annual rate of 6.6% each month. Although sales growth is unlikely to return to peak rates, Rosen believes that annual retail sales growth (including online sales made by brick and mortar retailers) will average 2.8% during the next four years, bringing total fourth-quarter sales to more than \$1 trillion in 2014, an increase of nearly \$70 billion from the fourth quarter of 2010. Rosen believes that the recession caused a lasting shift in consumer behavior, providing a boost to value-oriented grocers, discount retailers and other retailers that provide basic household goods or clothing. Therefore, Rosen expects sales at these grocers and retailers to remain strong going forward.

Even as the economy recovered, retail construction activity, as measured by the value of construction put-in-place, remained very low through the first three quarters of 2010 because of the high vacancy rate and a lack of available construction financing. In the third quarter of 2010, the value of put-in-place construction totaled a seasonally adjusted annual rate of \$18.2 billion, compared with fourth-quarter averages of \$43.7 billion between 2002 and 2008. Rosen forecasts the value of inflation-adjusted, put-in-place construction to fall from \$18.0 billion in 2010 to \$16.5 billion in 2011, approximately 65% less than the recent peak of \$46.8 billion in 2007.

As job growth and higher confidence levels boost consumer demand, Rosen expects retail market conditions to improve beginning in 2011. Rosen forecasts the national retail vacancy rate to fall slowly from 8.8% in 2011 to 8.0% in 2014. As demand rebounds, tenant competition for existing space is expected to increase because of the limited amount of new space becoming available.

Summary Risk Factors

An investment in shares of our Class A Common Stock involves various risks. You should consider carefully the risks discussed below and under the heading **Risk Factors** beginning on page 17 of this prospectus before purchasing our Class A Common Stock. If any of these risks occur, our business, prospects, financial condition, liquidity, results of operations and ability to make distributions to our shareholders could be materially and adversely affected. In that case, the trading price of our Class A Common Stock could decline and you could lose some or all of your investment.

Table of Contents

Real estate investments are subject to various risks and fluctuations and cycles in value and demand, many of which are beyond our control. Our economic performance and the value of our properties can be affected by many of these factors, including, among others, the following:

adverse changes in financial conditions of buyers, sellers and tenants of our properties, including bankruptcies, financial difficulties, or lease defaults by our tenants;

the national, regional and local economy, which may be negatively impacted by concerns about inflation, deflation and government deficits, high unemployment rates, decreased consumer confidence, industry slowdowns, reduced corporate profits, liquidity concerns in our markets and other adverse business concerns;

local real estate conditions, such as an oversupply of, or a reduction in demand for, retail space or retail goods, and the availability and creditworthiness of current and prospective tenants;

vacancies or ability to rent space on favorable terms, including possible market pressures to offer tenants rent abatements, tenant improvements, early termination rights or below-market renewal options;

changes in operating costs and expenses, including, without limitation, increasing labor and material costs, insurance costs, energy prices, environmental restrictions, real estate taxes, and costs of compliance with laws, regulations and government policies, which we may be restricted from passing on to our tenants;

fluctuations in interest rates, which could adversely affect our ability, or the ability of buyers and tenants of properties, to obtain financing on favorable terms or at all; and

competition from other real estate investors with significant capital, including other real estate operating companies, publicly traded REITs and institutional investment funds.

We may be unable to complete acquisitions and even if acquisitions are completed, we may fail to successfully operate acquired properties.

We may be unable to sell a property at the time we desire and on favorable terms or at all, which could inhibit our ability to utilize our capital to make strategic acquisitions and could adversely affect our results of operations, financial condition and ability to make distributions to our shareholders.

We have experienced aggregate net losses attributable to Company shareholders for the six months ended June 30, 2011 and the years ended December 31, 2010, 2009 and 2008, and we may experience future losses.

Our development and construction activities have inherent risks, which could adversely impact our results of operations and cash flow.

Edgar Filing: INLAND WESTERN RETAIL REAL ESTATE TRUST INC - Form S-11/A

We had approximately \$3.6 billion of consolidated indebtedness outstanding as of June 30, 2011, which could adversely affect our financial health and operating flexibility.

We have a high concentration of properties in the Dallas-Fort Worth-Arlington area, and adverse economic and other developments in that area could have a material adverse effect on us.

Our financial condition and ability to make distributions to our shareholders could be adversely affected by financial and other covenants and other provisions under the credit agreement governing our senior secured revolving line of credit and secured term loan or other debt agreements.

We depend on external sources of capital that are outside of our control, which may affect our ability to seize strategic opportunities, satisfy our debt obligations and make distributions to our shareholders.

Certain provisions of Maryland law could inhibit changes in control of us, which could lower the value of our Class A Common Stock.

Table of Contents

Failure to qualify as a REIT would cause us to be taxed as a regular corporation, which would substantially reduce funds available for distributions to our shareholders and materially and adversely affect our financial condition and results of operations.

Complying with REIT requirements may cause us to forego otherwise attractive opportunities or to liquidate otherwise attractive investments.

Because we have a large number of shareholders and our shares have not been listed on a national securities exchange prior to this offering, there may be significant pent-up demand to sell our shares. Significant sales of our Class A Common Stock, or the perception that significant sales of such shares could occur, may cause the price of our Class A Common Stock to decline significantly.

Recapitalization

Prior to the completion of this offering, we intend to declare a stock dividend pursuant to which each then outstanding share of our common stock will receive:

one share of our Class B-1 Common Stock; plus

one share of our Class B-2 Common Stock; plus

one share of our Class B-3 Common Stock.

In connection with this stock dividend, we intend to redesignate our then outstanding common stock as Class A Common Stock. Prior to the declaration of the stock dividend, we intend to effectuate a to one reverse stock split of our common stock.

Subject to the provisions of our charter, shares of our Class B-1, B-2 and B-3 Common Stock will convert automatically into shares of our Class A Common Stock months following the Listing, months following the Listing and months following the Listing, respectively. In addition, if they have not otherwise converted, all shares of our Class B Common Stock will convert automatically into shares of our Class A Common Stock on the date that is months following the Listing.

Our Class B Common Stock will be identical to our Class A Common Stock except that (i) we do not intend to list our Class B Common Stock on a national securities exchange and (ii) shares of our Class B Common Stock will convert automatically into shares of our Class A Common Stock at specified times. The aggregate number of shares of our common stock outstanding (including all shares of our Class A and Class B Common Stock) immediately following the Recapitalization will be approximately million, all of which (except for certain shares described in Shares Eligible for Future Sale) will be freely tradable upon the completion of this offering except as otherwise provided in the restrictions on ownership and transfer of stock set forth in our charter. Of this amount, approximately million shares of our Class A Common Stock will be outstanding and approximately million shares of our Class B Common Stock, representing 75% of our total outstanding common stock, will be outstanding.

Distribution Policy

The Internal Revenue Code of 1986, as amended, or the Code, generally requires that a REIT distribute annually at least 90% of its REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gains, and imposes tax on any taxable income retained by a REIT, including capital gains. To satisfy the requirements for qualification as a REIT and generally not be subject to U.S. federal income and excise tax, we intend to make regular quarterly distributions of all or substantially all of our REIT taxable income to holders of our common stock out of assets legally available for such purposes. Our future distributions will be at the sole discretion of our board of directors.

Table of Contents

Our senior secured revolving line of credit and secured term loan limit our distributions to the greater of 95% of FFO as defined in the credit agreement (which equals FFO, as set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations Funds from Operations, excluding gains or losses from extraordinary items, impairments and other non-cash charges) or the amount necessary for us to maintain our qualification as a REIT. To the extent these limits prevent us from distributing 100% of our REIT taxable income, we will be subject to income tax, and potentially excise tax, on the retained amounts. If our operations do not generate sufficient cash flow to allow us to satisfy the REIT distribution requirements, we may be required to fund distributions from working capital, borrow funds, sell assets or reduce such distributions. Our distribution policy enables us to review the alternative funding sources available to us from time to time.

Our REIT Status

We have elected to be taxed as a REIT under Sections 856 through 860 of the Code. We believe that we have been organized, owned and operated in conformity with the requirements for qualification and taxation as a REIT under the Code beginning with our taxable year ended December 31, 2003, and that our intended manner of ownership and operation will enable us to continue to meet the requirements for qualification and taxation as a REIT for federal income tax purposes. To maintain our qualification as a REIT, we must meet a number of organizational and operational requirements, including a requirement that we annually distribute at least 90% of our REIT taxable income to our shareholders, determined without regard to the deduction for dividends paid and excluding net capital gains. As a REIT, we generally are not subject to U.S. federal income tax on the taxable income we currently distribute to our shareholders. If we fail to qualify as a REIT in any taxable year, we will be subject to U.S. federal income tax at regular corporate rates. Even if we qualify for taxation as a REIT, we may be subject to some U.S. federal, state and local taxes on our income or property, and the taxable income of our taxable REIT subsidiaries, or TRSs, will be subject to taxation at regular corporate rates.

Restrictions on Ownership of Our Common Stock

To assist us in complying with the limitations on the concentration of ownership of a REIT imposed by the Code, among other purposes, our charter generally prohibits, with certain exceptions, any shareholder from beneficially or constructively owning, applying certain attribution rules under the Code, more than 9.8% by value or number of shares, whichever is more restrictive, of the outstanding shares of our common stock, or 9.8% by value of the outstanding shares of our capital stock. Our board of directors may, in its sole discretion, waive (prospectively or retroactively) the 9.8% ownership limits with respect to a particular shareholder if it receives certain representations and undertakings required by our charter and is presented with evidence satisfactory to it that such ownership will not then or in the future cause us to fail to qualify as a REIT. See Description of Capital Stock Restrictions on Ownership and Transfer.

Certain Relationships and Related Transactions

The Inland Group and its affiliates were our initial sponsor, and Daniel L. Goodwin, who has not been one of our directors but beneficially owns approximately 5.1% of our common stock prior to this offering, Brenda G. Gujral, one of our current directors, and Robert D. Parks, one of our former directors, are significant shareholders and/or principals of the Inland Group and/or hold directorships and are executive officers of affiliates of the Inland Group.

We have ongoing agreements with affiliates of the Inland Group, including an office sublease for our corporate headquarters and various service agreements. With the exception of the sublease, the majority of these service agreements are non-exclusive and cancellable by providing not less than 180 days prior written notice and specifying the effective date of said termination. These service agreements are generally for administrative services. We primarily use these service agreements in situations where it is more efficient for us to obtain services from an outside party than it would be for us to obtain the dedicated internal resources necessary to

Table of Contents

provide similar quality services. For the six months ended June 30, 2011 and the year ended December 31, 2010, we paid a total of \$2.4 million and \$4.6 million, respectively, to Inland Group affiliates under these arrangements, of which \$1.5 million and \$2.6 million, respectively, were generally for the reimbursement of our portion of shared administrative costs and \$0.5 million \$0.9 million, respectively, were for amounts payable pursuant to our office sublease.

In addition, in 2009, in connection with a \$625 million debt refinancing transaction, we raised additional capital of \$50 million from an affiliate of the Inland Group in exchange for a 23% noncontrolling interest in a newly formed joint venture to which we contributed 55 of our properties. We currently anticipate using a portion of the net proceeds from this offering to exercise our option to repurchase this noncontrolling interest for , as a result of which we would again own 100% of these properties. In 2009, we also sold three single-user office buildings to Inland American Real Estate Trust, Inc., or IARETI, with an aggregate sales price of \$161.6 million, which resulted in net sales proceeds of \$52.6 million and a gain on sale of \$9.3 million. IARETI is externally managed by an affiliate of the Inland Group.

All related person transactions must be approved or ratified by a majority of the disinterested directors on our board of directors, and we continue to monitor our ongoing agreements with affiliates of the Inland Group to ensure that it is in the best interests of our shareholders to maintain these agreements. See Certain Relationships and Related Transactions.

Background and Corporate Information

We are a Maryland corporation formed in March 2003, and we have been publicly held and subject to Securities and Exchange Commission, or SEC, reporting obligations since the completion of our first public offering in 2003. We were initially sponsored by The Inland Group, Inc. and its affiliates, but we have not been affiliated with The Inland Group, Inc. since the internalization of our management in November 2007. Our principal executive office is located at 2901 Butterfield Road, Oak Brook, Illinois 60523, and our telephone number is (630) 218-8000. We maintain an internet website at www.inland-western.com that contains information concerning us. The information included or referenced to on, or otherwise accessible through, our website is not intended to form a part of or be incorporated by reference into this prospectus.

Table of Contents

The Offering

Class A Common Stock offered by us _____ shares (plus up to _____ shares that we may issue if the underwriters exercise their overallotment option in full)
 Common stock to be outstanding after this offering:

Class A Common Stock	shares ⁽¹⁾
Class B-1 Common Stock	shares ⁽²⁾
Class B-2 Common Stock	shares ⁽²⁾
Class B-3 Common Stock	shares ⁽²⁾
Conversion rights	Subject to the provisions of our charter, shares of our Class B-1, B-2 and B-3 Common Stock will convert automatically into shares of our Class A Common Stock _____ months following the Listing, _____ months following the Listing and _____ months following the Listing, respectively.
Dividend rights	Our Class A Common Stock and our Class B Common Stock will share equally in any distributions authorized by our board of directors and declared by us.
Voting rights	Each share of our Class A Common Stock and each share of our Class B Common Stock will entitle its holder to one vote per share.
Use of proceeds	We intend to use approximately \$ _____ million of net proceeds received from this offering to repay amounts outstanding under our senior secured revolving line of credit, \$ _____ million of net proceeds to repurchase Inland Equity Investors, LLC _____ s, or Inland Equity _____ s, interest in IW JV 2009, LLC, or IW JV, and the remaining net proceeds for general corporate and working capital purposes.
Proposed NYSE symbol	We have applied to have our Class A Common Stock listed on the NYSE under the symbol IWST .

- (1) Excludes _____ shares of Class A Common Stock issuable upon exercise of the underwriters' overallotment option, _____ shares of Class A Common Stock available for future issuance under our incentive award plans and _____ shares of Class A Common Stock underlying options granted under our incentive award plans as of October 3, 2011.
- (2) Excludes _____ shares of Class B-1, B-2, and B-3 Common Stock available for future issuance under our incentive award plans and _____ shares of Class B-1, B-2 and B-3 Common Stock underlying options granted under our incentive awards plans as of October 3, 2011.

Summary Consolidated Financial and Operating Data

The summary consolidated financial data set forth below as of December 31, 2010 and 2009 and for the years ended December 31, 2010, 2009 and 2008 have been derived from our audited consolidated financial statements included elsewhere in this prospectus. The audited consolidated financial statements as of December 31, 2010 and 2009 and for the years ended December 31, 2010 and 2009 have been audited by Deloitte & Touche LLP, an independent registered public accounting firm. The audited consolidated financial statements for the year ended December 31, 2008 have been audited by KPMG LLP, an independent registered public accounting firm. The selected consolidated financial and operating data set forth below as of December 31, 2008 has been derived from our audited consolidated financial statements not included in this prospectus. The summary consolidated financial data set forth below as of June 30, 2011 and for the six months ended June 30, 2011 and 2010 has been derived from our unaudited consolidated financial statements included elsewhere in this prospectus. The unaudited consolidated financial statements have been prepared on the same basis as our audited consolidated financial statements and, in the opinion of our management, reflect all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of this data. The results of any interim period are not necessarily indicative of the results that may be expected for a full year. Certain amounts presented for the periods ended December 31, 2010, 2009 and 2008 have been reclassified to conform to our presentation of discontinued operations in our unaudited consolidated financial statements as of and for the six months ended June 30, 2011 and 2010.

Because the information presented below is only a summary and does not provide all of the information contained in our historical consolidated financial statements, including the related notes, you should read it in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our historical consolidated financial statements, including the related notes, included elsewhere in this prospectus. The amounts in the table are dollars in thousands except for share and per share information. The share and per share information set forth below gives effect to the Recapitalization.

RISK FACTORS

*An investment in our Class A Common Stock involves a high degree of risk. Before making an investment decision, you should carefully consider the following risk factors, which address the material risks concerning our business and an investment in our Class A Common Stock, together with the other information contained in this prospectus. If any of the risks discussed in this prospectus occur, our business, prospects, financial condition, results of operations and our ability to make distributions to our shareholders could be materially and adversely affected. In that case, the trading price of our Class A Common Stock could decline significantly and you could lose all or a part of your investment. Some statements in this prospectus, including statements in the following risk factors constitute forward-looking statements. Please refer to the section entitled *Forward-Looking Statements*.*

RISKS RELATING TO OUR BUSINESS AND OUR PROPERTIES

There are inherent risks associated with real estate investments and with the real estate industry, each of which could have an adverse impact on our economic performance and the value of our retail properties.

Real estate investments are subject to various risks and fluctuations and cycles in value and demand, many of which are beyond our control. Our economic performance and the value of our properties can be affected by many of these factors, including the following:

adverse changes in financial conditions of buyers, sellers and tenants of our properties, including bankruptcies, financial difficulties, or lease defaults by our tenants;

the national, regional and local economy, which may be negatively impacted by concerns about inflation, deflation and government deficits, high unemployment rates, decreased consumer confidence, industry slowdowns, reduced corporate profits, liquidity concerns in our markets and other adverse business concerns;

local real estate conditions, such as an oversupply of, or a reduction in demand for, retail space or retail goods, and the availability and creditworthiness of current and prospective tenants;

vacancies or ability to rent space on favorable terms, including possible market pressures to offer tenants rent abatements, tenant improvements, early termination rights or below-market renewal options;

changes in operating costs and expenses, including, without limitation, increasing labor and material costs, insurance costs, energy prices, environmental restrictions, real estate taxes, and costs of compliance with laws, regulations and government policies, which we may be restricted from passing on to our tenants;

fluctuations in interest rates, which could adversely affect our ability, or the ability of buyers and tenants of properties, to obtain financing on favorable terms or at all;

competition from other real estate investors with significant capital, including other real estate operating companies, publicly traded REITs and institutional investment funds;

the convenience and quality of competing retail properties and other retailing options such as the Internet;

perceptions by retailers or shoppers of the safety, convenience and attractiveness of the retail property;

inability to collect rent from tenants;

our ability to secure adequate insurance;

our ability to provide adequate management services and to maintain our properties;

Table of Contents

changes in, and changes in enforcement of, laws, regulations and governmental policies, including, without limitation, health, safety, environmental, zoning and tax laws, government fiscal policies and the Americans with Disabilities Act of 1990, or the ADA; and

civil unrest, acts of war, terrorist attacks and natural disasters, including earthquakes and floods, which may result in uninsured and underinsured losses.

In addition, because the yields available from equity investments in real estate depend in large part on the amount of rental income earned, as well as property operating expenses and other costs incurred, a period of economic slowdown or recession, declining demand for real estate, or the public perception that any of these events may occur, could result in a general decline in rents or an increased incidence of defaults among our existing leases, and, consequently, our properties, including those held by joint ventures, may fail to generate revenues sufficient to meet operating, debt service and other expenses. As a result, we may have to borrow amounts to cover fixed costs, and our financial condition, results of operations, cash flow, per share trading price of our Class A Common Stock and our ability to satisfy our principal and interest obligations and to make distributions to our shareholders may be adversely affected.

Continued economic weakness from the severe economic recession that the U.S. economy recently experienced may materially and adversely affect our financial condition and results of operations.

The U.S. economy is still experiencing weakness from the severe recession that it recently experienced, which resulted in increased unemployment, the bankruptcy or weakened financial condition of a number of large retailers, decreased consumer spending, a decline in residential and commercial property values and reduced demand and rental rates for retail space. Although the U.S. economy has emerged from the recent recession, high levels of unemployment have persisted, and rental rates and valuations for retail space have not fully recovered to pre-recession levels and may not for a number of years. If the economic recovery slows or stalls, we may continue to experience downward pressure on the rental rates we are able to charge as leases signed prior to the recession expire, and tenants may declare bankruptcy, announce store closings or fail to meet their lease obligations, any of which could adversely affect our cash flow, financial condition and results of operations.

Substantial international, national and local government spending and increasing deficits may adversely impact our business, financial condition and results of operations.

The values of, and the cash flows from, the properties we own are affected by developments in global, national and local economies. As a result of the recent severe recession and the significant government interventions, federal, state and local governments have incurred record deficits and assumed or guaranteed liabilities of private financial institutions or other private entities. These increased budget deficits and the weakened financial condition of federal, state and local governments may lead to reduced governmental spending, tax increases, public sector job losses, increased interest rates, currency devaluations or other adverse economic events, which may directly or indirectly adversely affect our business, financial condition and results of operations.

We face significant competition in the leasing market, which may decrease or prevent increases in the occupancy and rental rates of our properties.

We have acquired and intend to continue to acquire properties located in developed areas. Consequently, we compete with numerous developers, owners and operators of retail properties, many of which own properties similar to, and in the same market areas as, our properties. If our competitors offer space at rental rates below current market rates, or below the rental rates we currently charge our tenants, we may lose existing or potential tenants and we may be pressured to reduce our rental rates below those we currently charge in order to attract new tenants and retain existing tenants when their leases expire. Also, if our competitors develop additional retail properties in locations near our properties, there may be increased competition for customer traffic and creditworthy tenants, which may result in fewer tenants or decreased cash flow from tenants, or both, and may

Table of Contents

require us to make capital improvements to properties that we would not have otherwise made. As a result, our financial condition and our ability to make distributions to our shareholders may be adversely affected.

We may be required to make rent or other concessions and/or significant capital expenditures to improve our properties in order to retain and attract tenants, which could adversely affect our financial condition, results of operations and cash flow.

To the extent adverse economic conditions continue in the real estate market and demand for retail space remains low, we may be required to offer more substantial rent abatements, tenant improvements and early termination rights or accommodate requests for renovations, build-to-suit remodeling and other improvements or provide additional services to our tenants. As a result, we may have to make significant capital or other expenditures in order to retain tenants whose leases expire and to attract new tenants in sufficient numbers, which could adversely affect our results of operations and cash flow. Additionally, if we need to raise capital to make such expenditures and are unable to do so, or such capital is otherwise unavailable, we may be unable to make the required expenditures. This could result in non-renewals by tenants upon expiration of their leases, which could adversely affect to our financial condition, results of operations and cash flow.

The actual rents we receive for the properties in our portfolio may be less than our asking rents, and we may experience a lease roll-down from time to time, which may adversely affect our financial condition, results of operations and cash flow.

Our operating results depend upon our ability to maintain and increase rental rates at our properties while also maintaining or increasing occupancy. As a result of various factors, including competitive pricing pressure in our markets, the recent severe recession and the desirability of our properties compared to other properties in our markets, the rental rates that we charge tenants have generally declined and our ability to maintain our current rental rates or increase those rates in the future may be limited. Further, because current rental rates have declined as compared to expiring leases in our portfolio, the rental rates for expiring leases may be higher than starting rental rates for new leases and we may be required to offer greater rental concessions than we have historically. The degree of discrepancy between our previous asking rents and the actual rents we are able to obtain upon the expiration of our leases may vary both from property to property and among different leased spaces within a single property. If we are unable to obtain sufficient rental rates across our portfolio, our results of operations and cash flow and our ability to satisfy our debt obligations and make distributions to our shareholders will be adversely affected.

We have experienced aggregate net losses attributable to Company shareholders for the six months ended June 30, 2011 and for the years ended December 31, 2010, 2009 and 2008, and we may experience future losses.

We had net losses attributable to Company shareholders of approximately \$53.7 million, \$95.8 million, \$112.3 million and \$683.7 million for the six months ended June 30, 2011 and for the years ended December 31, 2010, 2009 and 2008, respectively. If we continue to incur net losses in the future or such losses increase, our financial condition, results of operations, cash flow and our ability to service our indebtedness and make distributions to our shareholders would be materially and adversely affected, any of which could adversely affect the market price of our Class A Common Stock.

We have a high concentration of properties in the Dallas-Fort Worth-Arlington area, and adverse economic and other developments in that area could have a material adverse effect on us.

As of June 30, 2011, approximately 11.1% of the GLA and approximately 14.2% of the annualized base rent from our retail operating portfolio were represented by properties located in the Dallas-Fort Worth-Arlington area. As a result, we are particularly susceptible to adverse economic and other developments in this area, including increased unemployment, industry slowdowns, business layoffs or downsizing, decreased consumer confidence, relocations of businesses, changes in demographics, increases in real estate and other taxes, increased regulation, and natural disasters, any of which could have a material adverse effect on us.

Table of Contents

Our inability to collect rents from tenants may negatively impact our financial condition and our ability to make distributions to our shareholders.

Substantially all of our income is derived from rentals of real property. Therefore, our financial condition, results of operations and cash flow materially depend on the financial stability of our tenants, any of which may experience a change in their business at any time, and our ability to continue to lease space in our properties on economically favorable terms. If the sales of stores operating in our centers decline sufficiently, tenants might be unable to pay their existing minimum rents or expense recovery charges, since these rents and charges would represent a higher percentage of their sales, and new tenants might be less willing to pay minimum rents as high as they would otherwise pay. Further, tenants may delay lease commencements, decline to extend or renew a lease upon its expiration or on favorable terms, or exercise early termination rights (to the extent available). If a number of our tenants are unable to make their rental payments to us and otherwise meet their lease obligations, our ability to meet debt and other financial obligations and to make distributions to our shareholders may be adversely affected.

We may be unable to renew leases, lease vacant space or re-let space as leases expire, which could adversely affect our financial condition and results of operations.

We cannot assure you that leases will be renewed or that our properties will be re-let at net effective rental rates equal to or above the current average net effective rental rates or that substantial rent abatements, tenant improvements, early termination rights or below-market renewal options will not be offered to attract new tenants or retain existing tenants. If the rental rates for our properties decrease, our existing tenants do not renew their leases or we do not re-let a significant portion of our available space and space for which leases will expire, our financial condition, results of operations, cash flow, cash available for distributions and per share trading price of our Class A Common Stock could be adversely affected.

If any of our anchor tenants experience a downturn in their business or terminate their leases, our financial condition and results of operations could be adversely affected.

Our financial condition and results of operations could be adversely affected in the event of a downturn in the business, or the bankruptcy or insolvency, of any anchor store or anchor tenant, particularly an anchor tenant with multiple store locations. Anchor tenants generally occupy large amounts of square footage, pay a significant portion of the total rents at a property and contribute to the success of other tenants by drawing significant numbers of customers to a property. The closing of one or more anchor stores at a property could adversely affect that property and result in lease terminations by, or reductions in rent from, other tenants whose leases permit termination or rent reduction in those circumstances or whose own operations may suffer as a result of the anchor store closing. For example, in 2008 and 2009, three of our anchor tenants, Mervyn's, Linens 'n Things and Circuit City, declared bankruptcy, resulting in approximately 3.2 million square feet of vacant retail space and a decrease in rental income of approximately \$34.8 million. Additional bankruptcies or insolvencies of, or store closings by, our anchor tenants could significantly increase vacancies and reduce our rental income. If we are unable to re-let such space on similar terms and in a timely manner, our financial condition, results of operations and ability to make distributions to our shareholders could be materially and adversely affected.

Many of the leases at our retail properties contain co-tenancy or go-dark provisions, which, if triggered, may allow tenants to pay reduced rent, cease operations or terminate their leases, any of which could adversely affect our financial condition and results of operations and/or the value of the applicable property.

Many of the leases at our retail properties contain co-tenancy provisions that condition a tenant's obligation to remain open, the amount of rent payable by the tenant or the tenant's obligation to continue occupancy on certain conditions, including: (i) the presence of a certain anchor tenant or tenants; (ii) the continued operation of an anchor tenant's store; and (iii) minimum occupancy levels at the applicable property. If a co-tenancy provision is triggered by a failure of any of these or other applicable conditions, a tenant could have the right to cease operations at the applicable property, terminate its lease early or have its rent reduced. In

Table of Contents

periods of prolonged economic decline such as the recent recession, there is a higher than normal risk that co-tenancy provisions will be triggered due to the higher risk of tenants closing stores or terminating leases during these periods. For example, the effects of recent tenant bankruptcies triggered some co-tenancy clauses in certain other tenant leases, which provided certain of these tenants with immediate reductions in their annual rents and permitted them to terminate their leases if an appropriate replacement was not found within the allotted time period. In addition to these co-tenancy provisions, certain of the leases at our retail properties contain go-dark provisions that allow the tenant to cease operations at the applicable property while continuing to pay rent. This could result in decreased customer traffic at the applicable property, thereby decreasing sales for our other tenants at that property, which may result in our other tenants being unable to pay their minimum rents or expense recovery charges. These provisions also may result in lower rental revenue generated under the applicable leases. To the extent co-tenancy or go-dark provisions in our retail leases result in lower revenue or tenant sales or in tenants' rights to terminate their leases early or to have their rent reduced, our financial condition and results of operations and the value of the applicable property could be adversely affected.

We may be unable to collect balances due on our leases from any tenants in bankruptcy, which could adversely affect our cash flow and the amount of cash available for distribution to our shareholders.

Our leases generally do not contain provisions designed to ensure the creditworthiness of the tenant, and a number of companies in the retail industry, including some of our tenants, have declared bankruptcy or voluntarily closed certain of their stores in recent years. We cannot assure you that any tenant that files for bankruptcy protection will continue to pay us rent. Any or all of the tenant's or a guarantor of a tenant's lease obligations could be subject to a bankruptcy proceeding pursuant to Chapter 11 or Chapter 7 of the bankruptcy laws of the United States. Such a bankruptcy filing would bar all efforts by us to collect pre-bankruptcy rents from these entities or their properties, unless we receive an order from the bankruptcy court permitting us to do so. A tenant or lease guarantor bankruptcy could delay our efforts to collect past due balances under the relevant leases, and could ultimately preclude collection of these sums. If a lease is rejected by a tenant in bankruptcy, we would only have a general unsecured claim for damages. This claim could be paid only in the event funds were available, and then only in the same percentage as that realized on other unsecured claims, and our claim would be capped at the rent reserved under the lease, without acceleration, for the greater of one year or 15% of the remaining term of the lease, but not greater than three years, plus rent already due but unpaid. Therefore, if a lease is rejected, it is unlikely we would receive any payments from the tenant, or we would receive substantially less than the full value of any unsecured claims we hold, which would result in a reduction in our rental income, cash flow and in the amount of cash available for distribution to our shareholders. In particular, on February 16, 2011, Borders Group, Inc., or Borders, a national retailer, filed for bankruptcy under Chapter 11 and, on July 18, 2011, Borders announced that it was seeking approval for the liquidation of its remaining store assets, which was approved on July 21, 2011. As of December 31, 2010, Borders leased approximately 220,000 square feet of space from us at ten locations, which leases represented \$2.6 million of annualized base rent. Subsequently, Borders has closed stores at all ten locations where it leased space from us.

Our expenses may remain constant or increase, even if income from our properties decreases, causing our financial condition and results of operations to be adversely affected.

Costs associated with our business, such as mortgage payments, real estate and personal taxes, insurance, utilities and corporate expenses, are relatively inflexible and generally do not decrease, and may increase, when a property is not fully occupied, rental rates decrease, a tenant fails to pay rent or other circumstances cause our revenues to decrease. If we are unable to decrease our operating costs when our revenue declines, our financial condition, results of operations and ability to make distributions to our shareholders may be adversely affected. In addition, inflationary price increases could result in increased operating costs for us and our tenants and, to the extent we are unable to pass along those price increases or are unable to recover operating expenses from tenants, our operating expenses may increase, which could adversely affect our financial condition, results of operations and ability to make distributions to our shareholders.

Table of Contents

Real estate related taxes may increase and if these increases are not passed on to tenants, our net income will be reduced.

Even if we qualify as a REIT for U.S. federal income tax purposes, we will be required to pay state and local taxes on our properties. The real property taxes may increase as property values or assessment rates change or as our properties are assessed or reassessed by taxing authorities. An increase in the assessed valuation of a property for real estate tax purposes will result in an increase in the related real estate taxes on that property. Although some leases may permit us to pass through such tax increases to our tenants, there is no assurance that renewal leases or future leases will be negotiated on the same basis. If our property taxes increase and we are unable to pass those increases through to our tenants, our net income and cash available for distribution to our shareholders could be adversely affected.

We may be unable to complete acquisitions and, even if acquisitions are completed, we may fail to successfully operate acquired properties.

We continue to evaluate the market of available properties and may acquire properties when we believe strategic opportunities exist. Our ability to acquire properties on favorable terms and successfully operate or develop them is subject to the following risks:

we may be unable to acquire a desired property because of competition from other real estate investors with substantial capital, including from publicly traded REITs and institutional investment funds;

even if we are able to acquire a desired property, competition from other potential acquirers may significantly increase the purchase price;

even if we enter into agreements for the acquisition of properties, these agreements are subject to customary conditions to closing, including completion of due diligence investigations to our satisfaction;

we may incur significant costs and divert management attention in connection with evaluation and negotiation of potential acquisitions, including ones that we are subsequently unable to complete;

we may acquire properties that are not initially accretive to our results upon acquisition, and we may not successfully manage and lease those properties to meet our expectations;

we may be unable to finance the acquisition on favorable terms in the time period we desire, or at all;

even if we are able to finance the acquisition, our cash flow may be insufficient to meet our required principal and interest payments;

we may spend more than budgeted to make necessary improvements or renovations to acquired properties;

we may be unable to quickly and efficiently integrate new acquisitions, particularly acquisition of portfolios of properties, into our existing operations, and as a result our results of operations and financial condition could be adversely affected;

market conditions may result in higher than expected vacancy rates and lower than expected rental rates; and

Edgar Filing: INLAND WESTERN RETAIL REAL ESTATE TRUST INC - Form S-11/A

we may acquire properties subject to liabilities and without any recourse, or with only limited recourse, with respect to unknown liabilities for clean-up of undisclosed environmental contamination, claims by tenants or other persons dealing with former owners of the properties and claims for indemnification by general partners, directors, officers and others indemnified by the former owners of the properties.

If we cannot finance property acquisitions in a timely manner and on favorable terms, or operate acquired properties to meet our financial expectations, our financial condition, results of operations, cash flow, per share trading price of our Class A Common Stock and ability to satisfy our principal and interest obligations and to make distributions to our shareholders could be adversely affected.

Table of Contents

We depend on external sources of capital that are outside of our control, which may affect our ability to seize strategic opportunities, satisfy our debt obligations and make distributions to our shareholders.

In order to maintain our qualification as a REIT, we are generally required under the Code to annually distribute at least 90% of our REIT taxable income, determined without regard to the dividends paid deduction and excluding any net capital gain. In addition, as a REIT, we will be subject to income tax at regular corporate rates to the extent that we distribute less than 100% of our REIT taxable income, including any net capital gains. Because of these distribution requirements, we may not be able to fund future capital needs, including any necessary acquisition financing, from operating cash flow. Consequently, we may rely on third-party sources to fund our capital needs. We may not be able to obtain the financing on favorable terms, in the time period we desire, or at all. Any additional debt we incur will increase our leverage, expose us to the risk of default and may impose operating restrictions on us, and any additional equity we raise could be dilutive to existing shareholders. Our access to third-party sources of capital depends, in part, on:

general market conditions;

the market's view of the quality of our assets;

the market's perception of our growth potential;

our current debt levels;

our current and expected future earnings;

our cash flow and cash distributions; and

the market price per share of our Class A Common Stock.

If we cannot obtain capital from third-party sources, we may not be able to acquire or develop properties when strategic opportunities exist, satisfy our principal and interest obligations or make the cash distributions to our shareholders necessary to maintain our qualification as a REIT.

We may be unable to sell a property at the time we desire and on favorable terms or at all, which could inhibit our ability to utilize our capital to make strategic acquisitions and could adversely affect our results of operations, financial condition and ability to make distributions to our shareholders.

Real estate investments generally cannot be sold quickly. Our ability to dispose of properties on advantageous terms depends on factors beyond our control, including competition from other sellers and the availability of attractive financing for potential buyers of our properties, and we cannot predict the various market conditions affecting real estate investments that will exist at any particular time in the future. In addition, the Code generally imposes a 100% tax on gain recognized by REITs upon the disposition of assets if the assets are held primarily for sale in the ordinary course of business, rather than for investment, which may cause us to forego or defer sales of properties that otherwise would be attractive from a pre-tax perspective. As a result of such tax laws and the uncertainty of market conditions, our ability to promptly make changes to our portfolio as necessary to respond to economic and other conditions may be limited, and we cannot provide any assurance that we will be able to sell such properties at a profit, or at all. Accordingly, our ability to access capital through dispositions may be limited which could limit our ability to acquire properties strategically and pay down indebtedness and would limit our ability to make distributions to our shareholders.

In addition, certain of our leases contain provisions giving the tenant a right to purchase the property, which can take the form of a fixed price purchase option, a fair market value purchase option, a put option, a right of first refusal or a right of first offer. When acquiring a property in the future, we may also agree to restrictions that prohibit the sale of that property for period of time or impose other restrictions, such as a limitation on the amount of debt that can be placed or repaid on that property. These provisions may restrict our ability to sell a property at opportune times

or on favorable terms and, as a result, may adversely impact our cash flows and results of operations.

Table of Contents

Furthermore, we may be required to expend funds to correct defects or to make improvements before a property can be sold. We cannot assure our shareholders that we will have funds available to correct such defects or to make such improvements and, therefore, we may be unable to sell the asset or may have to sell it at a reduced cost.

Joint venture investments could be adversely affected by our lack of sole decision-making authority, our reliance on co-venturers financial condition and disputes between us and our co-venturers.

We have made and may continue to make investments in joint ventures or other partnership arrangements between us and our joint venture partners. As of June 30, 2011, we held 55 operating properties (as well as a portion of one other property) with 6.8 million square feet of GLA in two consolidated joint ventures and 20 operating properties with 2.8 million square feet of GLA in three unconsolidated joint ventures. Investments in joint ventures or other partnership arrangements involve risks not present were a third party not involved, including the following:

we do not have exclusive control over the development, financing, leasing, management and other aspects of the property or joint venture, which may prevent us from taking actions that are in our best interest but opposed by our partners;

prior consent of our joint venture partners may be required for a sale or transfer to a third party of our interest in the joint venture, which would restrict our ability to dispose of our interest in the joint venture;

two of our unconsolidated operating joint venture agreements have, and future joint venture agreements may contain, buy-sell provisions pursuant to which one partner may initiate procedures requiring the other partner to choose between buying the other partner's interest or selling its interest to that partner;

our partners might become bankrupt or fail to fund their share of required capital contributions necessary to refinance debt or to fund tenant improvements or development or renovation projects for the joint venture properties, which may force us to contribute more capital than we anticipated to cover the joint venture's liabilities;

our partners may have competing interests in our markets that could create conflict of interest issues;

our partners may have economic or business interests or goals that are inconsistent with our interests or goals and may take actions contrary to our instructions, requests, policies or objectives;

two of our joint venture agreements have, and future joint venture agreements may contain, provisions limiting our ability to solicit or otherwise attempt to persuade any tenant to relocate to another property not owned by the joint venture;

our partners may take actions that could jeopardize our REIT status or require us to pay tax;

actions by partners might subject real properties owned by the joint venture to liabilities greater than those contemplated by the terms of the joint venture or other adverse consequences that may reduce our returns;

disputes between us and partners or co-venturers may result in litigation or arbitration that would increase our expenses and prevent our officers and/or directors from focusing their time and effort on our business and could result in subjecting properties owned by

the partnership or joint venture to additional risk; and

we may in certain circumstances be liable for the actions of our third-party partners or co-venturers.

If any of the foregoing were to occur, our financial condition, results of operations and cash available for distribution to our shareholders could be adversely affected.

Table of Contents

Our development and construction activities have inherent risks, which could adversely impact our results of operations and cash flow.

Our construction and development activities include risks that are different and, in most cases, greater than the risks associated with our acquisition of fully developed and operating properties. We may provide a completion of construction and principal guaranty to the construction lender. As a result of such a guaranty, we may subject a property to liabilities in excess of those contemplated and thus reduce our return to investors.

In addition to the risks associated with real estate investments in general as described elsewhere, the risks associated with our development activities include:

significant time lag between commencement and stabilization subjects us to greater risks due to fluctuations in the general economy, including national, regional and local economic downturns, and shifts in demographics;

expenditure of money and time on projects that may never be completed;

occupancy rates and rents at a newly completed property may not be sufficient to make the property profitable;

inability to achieve projected occupancy and/or rental rates per square foot within the projected time frame, if at all;

failure or inability to obtain construction or permanent financing on favorable terms or at all;

higher than estimated construction or operating costs, including labor and material costs;

inability to complete construction and lease-up on schedule, resulting in increased debt service expense and construction costs; and

possible delay in completion of a project because of a number of factors, including weather, labor disruptions, construction delays or delays in receipt of zoning or other regulatory approvals, acts of terror or other acts of violence, or acts of God (such as fires, earthquakes or floods).

Additionally, the time frame required for development and lease-up of these properties means that we may not realize a significant cash return for several years. If any of the above events occur, the development of the properties may hinder our growth and have an adverse effect on our results of operations and cash flow. In addition, new development activities, regardless of whether or not they are ultimately successful, typically require substantial time and attention from management.

Bankruptcy of our developers could impose delays and costs on us with respect to the development retail properties and may adversely affect our financial condition and results of operations.

The bankruptcy of one of the developers in any of our development joint ventures could materially and adversely affect the relevant property or properties. If the relevant joint venture through which we have invested in a property has incurred recourse obligations, the discharge in bankruptcy of the developer may require us to honor a completion guarantee and therefore might result in our ultimate liability for a greater portion of those obligations than we would otherwise bear.

A number of properties in our portfolio are subject to ground leases; if we are found to be in breach of a ground lease or are unable to renew a ground lease, we could be materially and adversely affected.

We have 17 properties in our portfolio that are either completely or partially on land subject to ground leases. Accordingly, we only own a long-term leasehold or similar interest in those properties. If we are found to be in breach of a ground lease, we could lose the right to use the property. In addition, unless we can purchase a fee interest in the underlying land and improvements or extend the terms of these leases before their expiration, as to which no assurance can be given, we will lose our right to operate these properties and our interest in the

Table of Contents

improvements upon expiration of the leases. Assuming that we exercise all available options to extend the terms of our ground leases, all of our ground leases will expire between 2018 and 2105. However, in certain cases, our ability to exercise such options is subject to the condition that we are not in default under the terms of the ground lease at the time that we exercise such options, and we can provide no assurances that we will be able to exercise our options at such time. Furthermore, we can provide no assurances that we will be able to renew our ground lease upon expiration. If we were to lose the right to use a property due to a breach or non-renewal of the ground lease, we would be unable to derive income from such property and would be required to purchase an interest in another property to attempt to replace that income, which could materially and adversely affect us.

Uninsured losses or losses in excess of insurance coverage could materially and adversely affect our financial condition and results of operations.

Each tenant is responsible for insuring its goods and premises and, in some circumstances, may be required to reimburse us for a share of the cost of acquiring comprehensive insurance for the property, including casualty, liability, fire and extended coverage customarily obtained for similar properties in amounts which we determine are sufficient to cover reasonably foreseeable losses. Tenants on a net lease typically are required to pay all insurance costs associated with their space. However, material losses may occur in excess of insurance proceeds with respect to any property and we may not have sufficient resources to fund such losses. In addition, we may be subject to certain types of losses, generally of a catastrophic nature, such as losses due to wars, acts of terrorism, earthquakes, floods, hurricanes, pollution or environmental matters, which are either uninsurable or not economically insurable, or may be insured subject to limitations, such as large deductibles or co-payments. If we experience a loss that is uninsured or that exceeds policy limits, we could lose all or a significant portion of the capital we have invested in the damaged property, as well as the anticipated future revenue of the property, which could materially and adversely affect our financial condition and results of operations. Inflation, changes in building codes and ordinances, environmental considerations and other factors also might make it impractical or undesirable to use insurance proceeds to replace a property after it has been damaged or destroyed. In addition, if the damaged properties are subject to recourse indebtedness, we would continue to be liable for the indebtedness, even if these properties were irreparably damaged. Furthermore, we may not be able to obtain adequate insurance coverage at reasonable costs in the future, as the costs associated with property and casualty renewals may be higher than anticipated.

In addition, insurance risks associated with potential terrorism acts could sharply increase the premium we pay for coverage against property and casualty claims. Further, mortgage lenders, in some cases, have begun to insist that specific coverage against terrorism be purchased by commercial property owners as a condition for providing mortgage loans. It is uncertain whether such insurance policies will be available, or available at reasonable costs, which could inhibit our ability to finance or refinance our properties. In such instances, we may be required to provide other financial support, either through financial assurances or self-insurance, to cover potential losses. We cannot assure our shareholders that we will have adequate coverage for such losses and, to the extent we must pay unexpectedly large amounts for insurance, our financial condition, results of operations and ability to make distributions to our shareholders could be materially and adversely affected.

Some of our properties are subject to potential natural or other disasters, which could cause significant damage to our properties and adversely affect our financial condition and results of operations.

A number of our properties are located in areas which are susceptible to, and could be significantly affected by, natural disasters that could cause significant damage to our properties. For example, many of our properties are located in coastal regions, and would therefore be affected by any future increases in sea levels or in the frequency or severity of hurricanes and tropical storms, whether such increases are caused by global climate changes or other factors. In addition, a number of our properties are located in California and other regions that are especially susceptible to earthquakes. If we experience a loss, due to such natural disasters or other relevant factors, that is uninsured or which exceeds our policy limits, we could incur significant costs and lose the capital invested in the damaged properties, as well as the anticipated future revenue from those properties, which could

Table of Contents

adversely affect our financial condition and results of operations. In addition, if the damaged properties are subject to recourse indebtedness, we would continue to be liable for the indebtedness, even if these properties were irreparably damaged.

We may incur liability with respect to contaminated property or incur costs to comply with environmental laws, which may negatively impact our financial condition and results of operations.

Under various federal, state or local laws, ordinances and regulations, as a current or former owner or operator of real property, we may be liable for costs and damages resulting from the presence or release of hazardous substances, waste, or petroleum products at, on, in, under or from such property, including costs for investigation, remediation, natural resource damages or third party liability for personal injury or property damage. These laws often impose liability without regard to whether the owner or operator knew of, or was responsible for, the presence or release of such materials, and the liability may be joint and several. In addition, the presence of contamination or the failure to remediate contamination at our properties may adversely affect our ability to sell, redevelop, or lease such property or to borrow using the property as collateral. Environmental laws also may create liens on contaminated sites in favor of the government for damages and costs it incurs to address such contamination. Moreover, if contamination is discovered on our properties, environmental laws may impose restrictions on the manner in which that property may be used or how businesses may be operated on that property. Some of our properties have been or may be impacted by contamination arising from current or prior uses of the property or adjacent properties for commercial or industrial purposes. Such contamination may arise from spills of petroleum or hazardous substances or releases from tanks used to store such materials. We also may be liable for the costs of remediating contamination at off-site disposal or treatment facilities when we arrange for disposal or treatment of hazardous substances at such facilities, without regard to whether we comply with environmental laws in doing so.

In addition, our properties are subject to various federal, state and local environmental, health and safety laws, including laws governing the management of wastes and underground and aboveground storage tanks. Noncompliance with these environmental, health and safety laws could subject us or our tenants to liability. These environmental liabilities could affect a tenant's ability to make rental payments to us. Moreover, changes in laws could increase the potential costs of compliance with environmental laws, health and safety laws or increase liability for noncompliance. This may result in significant unanticipated expenditures or may otherwise materially and adversely affect our operations, or those of our tenants, which could in turn have a material adverse effect on us.

As the owner or operator of real property, we may also incur liability based on various building conditions. For example, buildings and other structures on properties that we currently own or operate or those we acquire or operate in the future contain, may contain, or may have contained, asbestos-containing material, or ACM. Environmental, health and safety laws require that ACM be properly managed and maintained and may impose fines or penalties on owners, operators or employers for non-compliance with those requirements. These requirements include special precautions, such as removal, abatement or air monitoring, if ACM would be disturbed during maintenance, renovation or demolition of a building, potentially resulting in substantial costs. In addition, we may be subject to liability for personal injury or property damage sustained as a result of exposure to ACM or releases of ACM into the environment.

We cannot assure you that costs or liabilities incurred as a result of environmental issues will not affect our ability to make distributions to our shareholders or that such costs or liabilities will not have a material adverse effect on our financial condition and results of operations.

Table of Contents

Our properties may contain or develop harmful mold or suffer from other indoor air quality issues, which could lead to liability for adverse health effects or property damage or cost for remediation.

When excessive moisture accumulates in buildings or on building materials, mold growth may occur, particularly if the moisture problem remains undiscovered or is not addressed over a period of time. Some molds may produce airborne toxins or irritants. Indoor air quality issues can also stem from inadequate ventilation, chemical contamination from indoor or outdoor sources, and other biological contaminants such as pollen, viruses and bacteria. Indoor exposure to airborne toxins or irritants can be alleged to cause a variety of adverse health effects and symptoms, including allergic or other reactions. As a result, the presence of significant mold or other airborne contaminants at any of our properties could require us to undertake a costly remediation program to contain or remove the mold or other airborne contaminants or to increase ventilation. In addition, the presence of significant mold or other airborne contaminants could expose us to liability from our tenants, employees of our tenants, or others if property damage or personal injury occurs.

We may incur significant costs complying with the ADA and similar laws, which could adversely affect our financial condition, results of operations, cash flow and trading price of our Class A Common Stock.

Under the ADA, all public accommodations must meet federal requirements related to access and use by disabled persons. Although we believe the properties in our portfolio substantially comply with present requirements of the ADA, we have not conducted an audit or investigation of all of our properties to determine our compliance. If one or more of the properties in our portfolio is not in compliance with the ADA, we would be required to incur additional costs to bring the property into compliance. Additional federal, state and local laws also may require modifications to our properties, or restrict our ability to renovate our properties. We cannot predict the ultimate cost of compliance with the ADA or other legislation. If we incur substantial costs to comply with the ADA and any other legislation, our financial condition, results of operations, cash flow, per share trading price of our Class A Common Stock and our ability to satisfy our debt obligations and to make distributions to our shareholders could be adversely affected.

We may experience a decline in the fair value of our assets and be forced to recognize impairment charges, which could materially and adversely impact our financial condition, liquidity and results of operations and the price of our Class A Common Stock.

A decline in the fair value of our assets may require us to recognize an impairment against such assets under GAAP if we were to determine that, with respect to any assets in unrealized loss positions, we do not have the ability and intent to hold such assets to maturity or for a period of time sufficient to allow for recovery to the amortized cost of such assets. If such a determination were to be made, we would recognize unrealized losses through earnings and write down the amortized cost of such assets to a new cost basis, based on the fair value of such assets on the date they are considered to be unrecoverable. Such impairment charges reflect non-cash losses at the time of recognition; subsequent disposition or sale of such assets could further affect our future losses or gains, as they are based on the difference between the sale price received and adjusted amortized cost of such assets at the time of sale. In addition, there may be significant uncertainty in the valuation, or in the stability of the value, of our properties and those of our unconsolidated joint ventures, that could result in a substantial decrease in the value of our properties and those of our unconsolidated joint ventures. As a result, we may not be able to recover the carrying amount of our properties and/or our investments in our unconsolidated joint ventures and we may be required to recognize an impairment charge. For the six months ended June 30, 2011 and for the years ended December 31, 2010, 2009 and 2008, we recognized aggregate impairment losses of \$30.4 million million, \$23.1 million, \$82.0 million and \$463.4 million, respectively. We may be required to recognize additional asset impairment charges in the future, which could materially and adversely affect our financial condition, liquidity, results of operations and the per share trading price of our Class A Common Stock.

Table of Contents

Our investment in marketable securities has negatively impacted our results of operations and may do so in the future.

Currently, our investment in marketable securities consists of preferred and common stock that are classified as available-for-sale and recorded at fair value. We have recognized other-than-temporary impairments related to our investment in these securities primarily as a result of the severity of the decline in market value and the length of time over which these securities experienced such declines. For example, other-than-temporary impairments were \$24.8 million and \$160.3 million for the years ended December 31, 2009 and 2008, respectively. The Company did not recognize other-than-temporary impairments for the six months ended June 30, 2011 or the year ended December 31, 2010. As of June 30, 2011, our investment in marketable securities totaled \$36.3 million, which included \$24.2 million of accumulated unrealized gain. If our stock positions decline in value, we could take additional other-than-temporary impairments, which could materially and adversely affect our results of operations. In addition, we purchase a portion of our securities through a margin account. If the value of those securities declines and we face a margin call, we may be required to sell those securities at unfavorable times and record a loss or to post additional cash as collateral, which could adversely affect our financial condition, results and operations and our ability to satisfy our debt obligations and make distributions to our shareholders.

Further, we may continue to invest in marketable securities in the future. Investments in marketable securities are subject to specific risks relating to the particular issuer of the securities, including the financial condition and business outlook of the issuer, which may result in significant losses to us. Marketable securities are generally unsecured and may also be subordinated to other obligations of the issuer. As a result, investments in marketable securities are subject to risks of: (i) limited liquidity in the secondary trading market; (ii) substantial market price volatility resulting from changes in prevailing interest rates; (iii) subordination to the prior claims of banks and other senior lenders to the issuer; (iv) the possibility that earnings of the issuer may be insufficient to meet its debt service and distribution obligations; and (v) the declining creditworthiness and potential for insolvency of the issuer during periods of rising interest rates and economic downturn. These risks may adversely affect the value of outstanding marketable securities and the ability of the issuer to make distribution payments.

Our success depends on key personnel whose continued service is not guaranteed.

We depend on the efforts and expertise of our senior management team to manage our day-to-day operations and strategic business direction. We do not, however, have employment agreements with the members of our senior management team. Therefore, we cannot guarantee their continued service. Moreover, among other things, it would constitute an event of default under the credit agreement governing our senior secured revolving line of credit and secured term loan if certain members of management (or a reasonably satisfactory replacement) ceased to continue to be active on a daily basis in our management. The loss of their services, and our inability to find suitable replacements, could have an adverse effect on our operations.

RISKS RELATED TO OUR DEBT FINANCING

We had approximately \$3.6 billion of consolidated indebtedness outstanding as of June 30, 2011, which could adversely affect our financial health and operating flexibility.

We have a substantial amount of indebtedness. As of June 30, 2011, we had approximately \$3.6 billion of aggregate consolidated indebtedness outstanding, substantially all of which was secured by one or more of our properties or our equity interests in our joint ventures. As a result of this substantial indebtedness, we are required to use a material portion of our cash flow to service principal and interest on our debt, which will limit the cash flow available to pursue desirable business opportunities, pay operating expenses and make distributions to our shareholders.

Our substantial indebtedness could have important consequences to us and the trading price of our Class A Common Stock, including:

limiting our ability to borrow additional amounts for working capital, capital expenditures, debt service requirements, execution of our growth strategy or other purposes;

Table of Contents

limiting our ability to use operating cash flow in other areas of our business because we must dedicate a substantial portion of these funds to service the debt;

increasing our vulnerability to general adverse economic and industry conditions, including increases in interest rates;

limiting our ability to capitalize on business opportunities, including the acquisition of additional properties, and to react to competitive pressures and adverse changes in government regulation;

limiting our ability or increasing the costs to refinance indebtedness;

limiting our ability to enter into marketing and hedging transactions by reducing the number of counterparties with whom we can enter into such transactions as well as the volume of those transactions;

we may be forced to dispose of one or more properties, possibly on disadvantageous terms;

we may be forced to sell additional equity securities at prices that may be dilutive to existing shareholders;

we may default on our obligations or violate restrictive covenants, in which case the lenders or mortgagees may accelerate our debt obligations, foreclose on the properties that secure their loans and/or take control of our properties that secure their loans and collect rents and other property income;

in the event of a default under any of our recourse indebtedness or in certain circumstances under our mortgage indebtedness, we would be liable for any deficiency between the value of the property securing such loan and the principal and accrued interest on the loan; and

our default under certain of our indebtedness could trigger cross-default provisions, which would result in a default on other indebtedness.

If any one of these events were to occur, our financial condition, results of operations, cash flow, per share trading price of our Class A Common Stock and our ability to satisfy our principal and interest obligations and to make distributions to our shareholders could be materially and adversely affected.

Our financial condition and ability to make distributions to our shareholders could be adversely affected by financial and other covenants and other provisions under the credit agreement governing our senior secured revolving line of credit and secured term loan or other debt agreements.

On February 4, 2011, we amended and restated our existing credit agreement to provide for a senior secured credit facility in the aggregate amount of \$585.0 million, consisting of a \$435.0 million senior secured revolving line of credit and a \$150.0 million secured term loan with a number of financial institutions. The credit agreement governing this senior secured revolving line of credit and secured term loan requires compliance with certain financial and operating covenants, including, among other things, leverage ratios, certain coverage ratios and net worth covenants, a covenant regarding minimum occupancy, limitations on our ability to incur unhedged variable rate debt or recourse indebtedness, limitations on our investments in unimproved land, unconsolidated joint ventures, construction in progress and mortgage notes receivable. The credit agreement also requires us to obtain consent prior to selling assets above a certain value or increasing our total assets by more than a certain amount as a result of a merger. In addition, our senior secured revolving line of credit and secured term loan limit our distributions to the greater of 95% of FFO as defined in the credit agreement (which equals FFO, as set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations Funds from Operations, excluding gains or losses from extraordinary items, impairments and other non-cash

charges) or the amount necessary for us to maintain our qualification as a REIT. The senior secured revolving line of credit and secured term loan also contain customary events of default, including but not limited to, non-payment of principal, interest fees or other amounts, breaches of covenants, defaults on any recourse indebtedness of Inland Western Retail Real Estate Trust, Inc. in excess of \$20.0 million or any non-recourse indebtedness in excess of \$100.0 million in the aggregate subject to certain carveouts, failure of certain members of management (or a reasonably satisfactory replacement) to continue to be active on a daily basis in our management and bankruptcy

Table of Contents

or other insolvency events. These provisions could limit our ability to make distributions to our shareholders, obtain additional funds needed to address cash shortfalls or pursue growth opportunities or transactions that would provide substantial returns to our shareholders. In addition, a breach of these covenants or other event of default would allow the lenders to accelerate payment of advances under the credit agreement. If payment is accelerated, our assets may not be sufficient to repay such debt in full and, as a result, such an event may have a material adverse effect on our financial condition.

In addition, and in connection with the debt refinancing transaction of IW JV, we entered into a lockbox and cash management agreement pursuant to which substantially all the income generated by the IW JV properties will be deposited directly into a lockbox account established by the lender. In the event of a default or the debt service coverage ratio falling below a set amount, the cash management agreement provides that excess cash flow will be swept into a cash management account, for the benefit of the lender, to be held as additional security after the payment of interest and approved property operating expenses. Cash will not be distributed to us from these accounts until the earlier of a cash sweep event cure, or the repayment of the mortgage loan, senior mezzanine note and junior mezzanine note. As of June 30, 2011, we were in compliance with the terms of the cash management agreement, however, if an event of default were to occur, we may be forced to borrow funds in order to make distributions to our shareholders and maintain our qualification as a REIT.

Given the restrictions in our debt covenants on these and other activities, we may be significantly limited in our operating and financial flexibility and may be limited in our ability to respond to changes in our business or competitive activities in the future.

We incur mortgage indebtedness and other borrowings, which reduce the funds available for distributions required to maintain our status as a REIT and to avoid income and excise tax.

We historically have incurred mortgage indebtedness and other borrowings in order to finance acquisitions or ongoing operations and we intend to continue to do so in the future. Our debt service and repayment requirements will not be reduced regardless of our actual cash flows. In addition, in order to maintain our qualification as a REIT, we must distribute to our shareholders at least 90% of our annual REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gains, and we are generally subject to corporate tax on any retained income. As a result, if our future cash flow is not sufficient to meet our debt service and repayment requirements and the REIT distribution requirements, we may be required to use cash reserves, incur additional debt, sell equity securities or liquidate assets in order to meet those requirements. However, we cannot assure you that capital will be available from such sources on favorable terms or at all, which may negatively impact our financial condition, results of operations and ability to make distributions to our shareholders.

Substantially all of the mortgage indebtedness we incur is secured, which increases our risk of loss since defaults may result in foreclosure. In addition, mortgages sometimes include cross-collateralization or cross-default provisions that increase the risk that more than one property may be affected by a default.

As of June 30, 2011, we had a total of \$3.4 billion, net of premiums of \$11.6 million and discounts of \$2.2 million, of indebtedness secured by 270 of our 281 operating properties. Because substantially all of our properties are mortgaged to secure payments of indebtedness, we are subject to the risk of property loss since defaults on indebtedness secured by properties may result in foreclosure actions initiated by lenders and ultimately our loss of the property securing the loan for which we are in default.

For example, as of October 3, 2011, we were in default on \$125.6 million of mortgage loans secured by a total of four properties with 1,303,595 square feet of GLA representing \$15.7 million of annualized base rent as of June 30, 2011. However, we have a 30-day forbearance agreement on one of the matured mortgage loans with a principal balance of \$68.7 million, which is secured by a property with 485,564 square feet of GLA representing \$8.6 million of annualized base rent as of June 30, 2011. We can provide no assurance that we will be able to restructure our current obligations under the mortgage loans that were in default or that our negotiations with the lenders will result in favorable

Table of Contents

outcomes to us. Failure to restructure our mortgage obligations could result in default and foreclosure actions and loss of the underlying properties. In the event that we default on other mortgages in the future, either as result of ceasing to make debt service payments or the failure to meet applicable covenants, we may have additional properties that are subject to potential foreclosure. In addition, as a result of cross-collateralization or cross-default provisions contained in certain of our mortgage loans, a default under one mortgage loan could result in a default on other indebtedness and cause us to lose other better performing properties, which could materially and adversely affect our financial condition and results of operations.

Further, for tax purposes, a foreclosure of any nonrecourse mortgage on any of our properties would be treated as a sale of the property for a purchase price equal to the outstanding balance of the debt secured by the mortgage. If the outstanding balance of the debt secured by the mortgage exceeds our tax basis in the property, we would recognize taxable income on the foreclosure without accompanying cash proceeds, a circumstance which could hinder our ability to meet the REIT distribution requirements imposed by the Code. As a result, we may be required to identify and utilize other sources of cash for distributions to our shareholders of that income.

Dislocations in the credit markets, including the continuing effects of the severe dislocation experienced in 2008 and 2009, may adversely affect our ability to obtain debt financing at favorable rates or at all.

Dislocations in the credit markets, generally or relating to the real estate industry specifically, may adversely affect our ability to obtain debt financing at favorable rates or at all. The credit markets experienced a severe dislocation during 2008 and 2009, which, for certain periods of time, resulted in the near unavailability of debt financing for even the most creditworthy borrowers. Although the credit markets have recovered from this severe dislocation, there are a number of continuing effects, including a weakening of many traditional sources of debt financing, a reduction in the overall amount of debt financing available, lower loan to value ratios, a tightening of lender underwriting standards and terms and higher interest rate spreads. As a result, we may not be able to refinance our existing debt when it comes due or to obtain new debt financing for acquisitions or development projects, or we may be forced to accept less favorable terms, including increased collateral to secure our indebtedness, higher interest rates and/or more restrictive covenants. If we are not successful in refinancing our debt when it becomes due, we may default under our loan obligations, enter into foreclosure proceedings, or be forced to dispose of properties on disadvantageous terms, any of which might adversely affect our ability to service other debt and to meet our other obligations. In addition, if a dislocation similar to that which occurred in 2008 and 2009 occurs in the future, the values of our properties may decline further, which could limit our ability to obtain future debt financing, refinance existing debt or utilize existing debt commitments and thus materially and adversely affect on our financial condition, particularly if it occurs at a time when we have significant debt maturities coming due.

Future increases in interest rates may adversely affect any future refinancing of our debt, may require us to sell properties and could adversely affect our ability to make distributions to our shareholders.

If we incur debt in the future and do not have sufficient funds to repay such debt at maturity, it may be necessary to refinance the debt through additional debt or additional equity financings. If, at the time of any refinancing, prevailing interest rates or other factors result in higher interest rates on refinancings, our net income could be reduced and any increases in interest expense could adversely affect our cash flows. Consequently, our cash available for distribution to our shareholders would be reduced and we may be prevented from borrowing more money. Any such future increases in interest rates would result in higher interest rates on new debt and our existing variable rate debt and may adversely impact our financial condition.

Further, if we are unable to refinance our debt on acceptable terms, we may be forced to dispose of properties on disadvantageous terms, potentially resulting in losses. We may place mortgages on properties that we acquire to secure a revolving line of credit or other debt. To the extent we cannot meet future debt service obligations, we will risk losing some or all of our properties that may be pledged to secure our obligations. Also, covenants applicable to any future debt could impair our planned investment strategy, and, if violated, result in default.

Table of Contents

RISKS RELATED TO OUR ORGANIZATIONAL STRUCTURE

Our board of directors may change significant corporate policies without shareholder approval.

Our investment, financing, borrowing and distribution policies and our policies with respect to all other activities, including growth, debt, capitalization and operations, are determined by our board of directors. These policies may be amended or revised at any time and from time to time at the discretion of the board of directors without a vote of our shareholders. As a result, the ability of our shareholders to control our policies and practices is extremely limited. We could make investments and engage in business activities that are different from, and possibly riskier than, the investments and businesses described in this prospectus. In addition, our board of directors may change our policies with respect to conflicts of interest provided that such changes are consistent with applicable legal and regulatory requirements, including the listing standards of the NYSE. A change in these policies could have an adverse effect on our financial condition, results of operations, cash flows, per share trading price of our Class A Common Stock and ability to satisfy our debt service obligations and to make distributions to our shareholders.

We could increase the number of authorized shares of stock and issue stock without shareholder approval.

Subject to applicable legal and regulatory requirements, our charter authorizes our board of directors, without shareholder approval, to increase the aggregate number of authorized shares of stock or the number of authorized shares of stock of any class or series, to authorize us to issue authorized but unissued shares of our common stock or preferred stock and to classify or reclassify any unissued shares of our common stock or preferred stock and to set the preferences, rights and other terms of such classified or unclassified shares. As a result, we may issue series or classes of common stock or preferred stock with preferences, dividends, powers and rights, voting or otherwise, that are senior to, or otherwise conflict with, the rights of holders of our common stock. In addition, our board of directors could establish a series of preferred stock that could, depending on the terms of such series, delay, defer or prevent a transaction or a change of control that might involve a premium price for our common stock or that our shareholders may believe is in their best interests.

Provisions of our charter may limit the ability of a third party to acquire control of our company.

Our charter provides that no person may beneficially own more than 9.8% in value or number of shares, whichever is more restrictive, of our outstanding common stock or 9.8% in value of the aggregate outstanding shares of our capital stock. These ownership limitations may prevent an acquisition of control of our company by a third party without our board of directors' approval, even if our shareholders believe the change in control is in their best interests.

Certain provisions of Maryland law could inhibit changes in control of us, which could lower the value of our Class A Common Stock.

Certain provisions of the Maryland General Corporation Law, or MGCL, may have the effect of inhibiting or deterring a third party from making a proposal to acquire us or of impeding a change of control under circumstances that otherwise could provide the holders of shares of our common stock with the opportunity to realize a premium over the then-prevailing market price of such shares, including:

business combination provisions that, subject to limitations, prohibit certain business combinations between us and an interested shareholder (defined generally as any person who beneficially owns 10% or more of the voting power of our shares or an affiliate or associate of ours who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of our then outstanding voting shares) or an affiliate of an interested shareholder for five years after the most recent date on which the shareholder becomes an interested shareholder, and thereafter may impose special shareholder voting requirements unless certain minimum price conditions are satisfied; and

Table of Contents

control share provisions that provide that control shares of our company (defined as shares which, when aggregated with other shares controlled by the shareholder, entitle the shareholder to exercise one of three increasing ranges of voting power in electing directors) acquired in a control share acquisition (defined as the direct or indirect acquisition of ownership or control of outstanding control shares) have no voting rights except to the extent approved by our shareholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding all interested shares.

Prior to the completion of this offering, we intend to opt out of these provisions of the MGCL, in the case of the business combination provisions of the MGCL by resolution of our board of directors, and in the case of the control share provisions of the MGCL pursuant to a provision in our bylaws. However, following our opt out, in the future, only upon the approval of our shareholders, our board of directors may by resolution elect to opt in to the business combination provisions of the MGCL and we may, only upon the approval of our shareholders, by amendment to our bylaws, opt in to the control share provisions of the MGCL.

Title 3, Subtitle 8 of the MGCL permits our board of directors, without shareholder approval and regardless of what is currently provided in our charter or bylaws, to implement certain takeover defenses, including adopting a classified board. Such takeover defenses may have the effect of inhibiting a third party from making an acquisition proposal for us or of delaying, deferring or preventing a change in control of us under the circumstances that otherwise could provide our common shareholders with the opportunity to realize a premium over the then current market price.

In addition, the provisions of our charter on removal of directors and the advance notice provisions of our bylaws could delay, defer or prevent a transaction or a change of control of our company that might involve a premium price for holders of our common stock or that our shareholders may believe to be in their best interests. Likewise, if our company's board of directors were to opt in to the business combination provisions of the MGCL or the provisions of Title 3, Subtitle 8 of the MGCL, or if the provision in our bylaws opting out of the control share acquisition provisions of the MGCL were rescinded by our board of directors and our shareholders, these provisions of the MGCL could have similar anti-takeover effects. See Certain Provisions of Maryland Law and of Our Charter and Bylaws Business Combinations and Certain Provisions of Maryland Law and of Our Charter and Bylaws Control Share Acquisitions and Certain Provisions of Maryland Law and of Our Charter and Bylaws Certain Elective Provisions of Maryland Law .

Our rights and the rights of our shareholders to take action against our directors and officers are limited, which could limit your recourse in the event of actions that you do not believe are in your best interests.

Maryland law provides that a director or officer has no liability in that capacity if he or she satisfies his or her duties to us and our shareholders. Upon completion of this offering, as permitted by the MGCL, our charter will limit the liability of our directors and officers to us and our shareholders for money damages, except for liability resulting from:

actual receipt of an improper benefit or profit in money, property or services; or

a final judgment based upon a finding of active and deliberate dishonesty by the director or officer that was material to the cause of action adjudicated.

In addition, our charter will obligate us, and our bylaws will require us, to indemnify our directors for actions taken by them in those capacities to the maximum extent permitted by Maryland law. Our charter and bylaws will also obligate us, and indemnification agreements that we have entered into with certain of our officers will require us, to indemnify these officers for actions taken by them in those capacities to the maximum extent permitted by Maryland law. As a result, we and our shareholders may have more limited rights against our directors and officers than might otherwise exist. Accordingly, in the event that actions taken in good faith by any of our directors or officers impede the performance of our company, your ability to recover damages from such director or officer will be limited. In addition, we will be obligated to

Table of Contents

advance the defense costs incurred by our directors and our officers with indemnification agreements, and may, in the discretion of our board of directors, advance the defense costs incurred by our employees and other agents, in connection with legal proceedings.

Our charter contains provisions that make removal of our directors difficult, which could make it difficult for our shareholders to effect changes to our management.

Our charter provides that a director may only be removed for cause upon the affirmative vote of holders of a majority of the votes entitled to be cast in the election of directors. Vacancies may be filled only by a majority of the remaining directors in office, even if less than a quorum. These requirements make it more difficult to change our management by removing and replacing directors and may prevent a change in control of our company that is in the best interests of our shareholders.

RISKS RELATING TO OUR REIT STATUS

Failure to qualify as a REIT would cause us to be taxed as a regular corporation, which would substantially reduce funds available for distributions to our shareholders and materially and adversely affect our financial condition and results of operations.

We believe that we have been organized, owned and operated in conformity with the requirements for qualification and taxation as a REIT under the Code beginning with our taxable year ended December 31, 2003, and that our intended manner of ownership and operation will enable us to continue to meet the requirements for qualification and taxation as a REIT for federal income tax purposes. However, we cannot assure you that we have qualified or will qualify as such. Shareholders should be aware that qualification as a REIT involves the application of highly technical and complex provisions of the Code as to which there are only limited judicial and administrative interpretations and involves the determination of facts and circumstances not entirely within our control. Future legislation, new regulations, administrative interpretations or court decisions may significantly change the tax laws or the application of the tax laws with respect to qualification as a REIT or the federal income tax consequences of such qualification.

If we fail to qualify as a REIT in any taxable year, we will face serious tax consequences that will substantially reduce the funds available for distributions to our shareholders because:

we would not be allowed a deduction for dividends paid to shareholders in computing our taxable income and would be subject to U.S. federal income tax at regular corporate rates;

we could be subject to the U.S. federal alternative minimum tax;

we could be subject to increased state and local taxes; and

unless we are entitled to relief under certain U.S. federal income tax laws, we could not re-elect REIT status until the fifth calendar year after the year in which we failed to qualify as a REIT.

In addition, if we fail to qualify as a REIT, we will not be required to make distributions and it could result in default under certain of our indebtedness agreements. As a result of all these factors, our failure to qualify as a REIT could impair our ability to expand our business and raise capital, and it would adversely affect the value of our stock. See [Material U.S. Federal Income Tax Considerations](#) for a discussion of material U.S. federal income tax consequences relating to us and our Class A Common Stock.

Even if we qualify as a REIT, we may face other tax liabilities that reduce our cash flows.

Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income and assets, including taxes on any undistributed income, taxes on net income from certain prohibited transactions, tax on income from certain activities conducted as a result of a foreclosure, and state or local income, franchise, property and transfer taxes. In addition, we could, in certain circumstances, be required to pay

Table of Contents

an excise or penalty tax (which could be significant in amount) in order to utilize one or more relief provisions under the Code to maintain our qualification as a REIT. Also, our subsidiaries that are taxable REIT subsidiaries, or TRSs, will be subject to regular corporate U.S. federal, state and local taxes. To the extent that we conduct operations outside of the United States, our operations would subject us to applicable foreign taxes as well. Any of these taxes would decrease our earnings and our cash available for distributions to shareholders.

Failure to make required distributions would subject us to U.S. federal corporate income tax.

In order to qualify as a REIT, we generally are required to distribute at least 90% of our REIT taxable income, determined without regard to the dividends paid deduction and excluding net capital gains, each year to our shareholders. To the extent that we satisfy this distribution requirement, but distribute less than 100% of our REIT taxable income, we will be subject to U.S. federal corporate income tax on our undistributed taxable income. In addition, we will be subject to a 4% nondeductible excise tax if the actual amount that we pay out to our shareholders for a calendar year is less than a minimum amount specified under the Code. Moreover, our senior secured revolving line of credit and secured term loan may limit our distributions to the minimum amount required to maintain REIT status. Specifically, they limit our distributions to the greater of 95% of FFO as defined in the credit agreement (which equals FFO, as set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations Funds from Operations, excluding gains or losses from extraordinary items, impairments and other non-cash charges) or the amount necessary for us to maintain our qualification as a REIT. To the extent these limits prevent us from distributing 100% of our REIT taxable income, we will be subject to income tax, and potentially excise tax, on the retained amounts.

We may be required to borrow funds to satisfy our REIT distribution requirements.

In order to maintain our qualification as a REIT and to meet the REIT distribution requirements, we may need to borrow funds on a short-term basis or sell assets, even if the then-prevailing market conditions are not favorable for these borrowings or sales. Our cash flows from operations may be insufficient to fund required distributions as a result of differences in timing between the actual receipt of income and the recognition of income for U.S. federal income tax purposes, or the effect of non-deductible expenditures, such as capital expenditures, payments of compensation for which Section 162(m) of the Code denies a deduction, the creation of reserves or required debt service or amortization payments. The insufficiency of our cash flows to cover our distribution requirements could have an adverse impact on our ability to raise short- and long-term debt or to sell equity securities in order to fund distributions required to maintain our qualification as a REIT. Also, although the Internal Revenue Service, or IRS, has issued Revenue Procedure 2010-12 treating certain issuances of taxable stock dividends by REITs as distributions for purposes of the REIT requirements for taxable years ending on or before December 31, 2011, no assurance can be given that the IRS will extend this treatment or that we will otherwise be able to pay taxable stock dividends to meet our REIT distribution requirements.

We may in the future choose to pay dividends in the form of our stock instead of cash, in which case shareholders may be required to pay income taxes in excess of the cash dividends they receive.

We may, in the future, distribute taxable dividends that are payable in cash and stock at the election of each shareholder or distribute other forms of taxable stock dividends. Taxable shareholders receiving such dividends or other forms of taxable stock dividends will be required to include the full amount of the dividend as ordinary income to the extent of our current and accumulated earnings and profits for U.S. federal income tax purposes. As a result, shareholders may be required to pay income taxes with respect to such dividends in excess of the cash dividends received. If a shareholder sells the stock that it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, in the case of certain non-U.S. shareholders, we may be required to withhold U.S. federal income tax with respect to such dividends, including with respect to all or a portion of such dividend that is payable in stock. In addition, if a significant number of our shareholders decide to sell their shares in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our stock.

Table of Contents

Dividends payable by REITs generally do not qualify for reduced tax rates.

Certain dividends payable to individuals, trusts and estates that are U.S. shareholders, as defined in Material U.S. Federal Income Tax Considerations below, are currently subject to U.S. federal income tax at a maximum rate of 15% and are scheduled to be taxed at ordinary income rates for taxable years beginning after December 31, 2012. Dividends payable by REITs, however, are generally not eligible for the current reduced rates. The more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stock of non-REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our Class A Common Stock.

Complying with REIT requirements may cause us to forego otherwise attractive opportunities or to liquidate otherwise attractive investments.

To qualify as a REIT, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our shareholders and the ownership of our capital stock. In order to meet these tests, we may be required to forego investments we might otherwise make and refrain from engaging in certain activities as discussed under Material U.S. Federal Income Tax Considerations below. Thus, compliance with the REIT requirements may hinder our performance.

In addition, if we fail to comply with certain asset ownership tests described under Material U.S. Federal Income Tax Considerations, below, at the end of any calendar quarter, we must correct the failure within 30 days after the end of the calendar quarter or qualify for certain statutory relief provisions to avoid losing our REIT qualification. As a result, we may be required to liquidate otherwise attractive investments. These actions could have the effect of reducing our income and amounts available for distribution to our shareholders.

We may be subject to adverse legislative or regulatory tax changes that could reduce the market price of our stock.

At any time, the U.S. federal income tax laws governing REITs or the administrative interpretations of those laws may be amended. We cannot predict if or when any new U.S. federal income tax law, regulation, or administrative interpretation, or any amendment to any existing U.S. federal income tax law, regulation or administrative interpretation, will be adopted, promulgated or become effective and any such law, regulation, or interpretation may take effect retroactively. We and our shareholders could be adversely affected by any such change in, or any new, U.S. federal income tax law, regulation or administrative interpretation.

You may be restricted from acquiring or transferring certain amounts of our stock.

In order to maintain our REIT qualification, among other requirements, no more than 50% in value of our outstanding stock may be owned, directly or indirectly, by five or fewer individuals, as defined in the Code to include certain kinds of entities, during the last half of any taxable year, other than the first year for which we made a REIT election. To assist us in qualifying as a REIT, our charter contains an aggregate stock ownership limit of 9.8% and a common stock ownership limit of 9.8%. Generally, any shares of our stock owned by affiliated owners will be added together for purposes of the aggregate stock ownership limit, and any shares of common stock owned by affiliated owners will be added together for purposes of the common stock ownership limit.

If anyone attempts to transfer or own shares of stock in a way that would violate the aggregate stock ownership limit or the common stock ownership limit, unless such ownership limits have been waived by our board of directors, or in a way that would prevent us from continuing to qualify as a REIT, those shares instead will be transferred to a trust for the benefit of a charitable beneficiary and will be either redeemed by us or sold to a person whose ownership of the shares will not violate the aggregate stock ownership limit or the common stock ownership limit. If this transfer to a trust fails to prevent such a violation or our disqualification as a REIT, then the initial intended transfer or ownership will be null and void from the outset. Anyone who acquires or owns shares of stock in violation of the aggregate stock ownership limit or the common stock ownership limit, unless

Table of Contents

such ownership limit or limits have been waived by our board of directors, or in violation of the other restrictions on transfer or ownership in our charter bears the risk of a financial loss when the shares of stock are redeemed or sold if the market price of our stock falls between the date of purchase and the date of redemption or sale.

Complying with REIT requirements may limit our ability to hedge effectively and may cause us to incur tax liabilities.

The REIT provisions of the Code limit our ability to hedge our liabilities. Generally, income from a hedging transaction we enter into to manage risk of interest rate changes with respect to borrowings made or to be made to acquire or carry real estate assets does not constitute gross income for purposes of the 75% or 95% gross income tests. To the extent that we enter into other types of hedging transactions, the income from those transactions is likely to be treated as non-qualifying income for purposes of both gross income tests. As a result of these rules, we may need to limit our use of advantageous hedging techniques or implement those hedges through a TRS. This could increase the cost of our hedging activities because our TRS would be subject to tax on income or gains resulting from hedges entered into by it or expose us to greater risks associated with changes in interest rates than we would otherwise want to bear. In addition, losses in any of our TRSs will generally not provide any tax benefit, except for being carried forward for use against future taxable income in the TRSs.

The ability of our board of directors to revoke our REIT qualification without shareholder approval may cause adverse consequences to our shareholders.

Our charter provides that our board of directors may revoke or otherwise terminate our REIT election, without the approval of our shareholders, if it determines that it is no longer in our best interest to continue to qualify as a REIT. If we cease to be a REIT, we will not be allowed a deduction for dividends paid to shareholders in computing our taxable income and will be subject to U.S. federal income tax at regular corporate rates and state and local taxes, which may have adverse consequences on our total return to our shareholders.

The anticipated opinion of our tax counsel regarding our status as a REIT does not guarantee our qualification as a REIT.

Our tax counsel, Goodwin Procter LLP, is expected to render an opinion to us to the effect that, commencing with our taxable year ended December 31, 2003, we have been organized and operated in conformity with the requirements for qualification and taxation as a REIT under the Code and our current and proposed ownership and method of operations will allow us to satisfy the requirements for qualification and taxation as a REIT under the Code for subsequent taxable years. The opinion of Goodwin Procter LLP would be based upon various assumptions, our closing agreement with the IRS, and our representations as to our past and contemplated future ownership, investments, distributions and operations, among other things. The validity of the opinion of Goodwin Procter LLP and our qualification as a REIT will also depend on our satisfaction of certain asset, income, organizational, distribution, shareholder ownership and other requirements on a continuing basis, the results of which will not be monitored by Goodwin Procter LLP. Accordingly, no assurances can be given that we have satisfied or will satisfy the REIT requirements in any taxable year. Also, the opinion of Goodwin Procter LLP would represent counsel's legal judgment based on the law in effect as of the date of the initial closing of this offering (or, with respect to past years, the law in effect for such years), would not be binding on the IRS or any court and could be subject to modification or withdrawal based on future legislative, judicial or administrative changes to the U.S. federal income tax laws, any of which could be applied retroactively. Goodwin Procter LLP will have no obligation to advise us or the holders of our stock of any subsequent change in the matters stated, represented or assumed in its opinion or of any subsequent change in applicable law.

Your investment has various tax risks.

Although the provisions of the Code generally relevant to an investment in shares of our Class A Common Stock are described in Material U.S. Federal Income Tax Considerations, we urge you to consult your tax advisor concerning the U.S. federal, state, local and foreign tax consequences to you with regard to an investment in shares of our Class A Common Stock.

Table of Contents

RISKS RELATED TO THIS OFFERING

There is currently no public market for our Class A Common Stock, and we cannot assure you that a public market will develop.

Prior to this offering, there has been no public market for our shares of Class A Common Stock, and we cannot assure you that an active trading market will develop or be sustained. In the absence of a public trading market, a shareholder may be unable to liquidate an investment in our Class A Common Stock. The initial public offering price for our Class A Common Stock will be determined by agreement among us and the underwriters, and we cannot assure you that our Class A Common Stock will not trade below the initial public offering price following the completion of this offering. Whether a public market for our Class A Common Stock will develop will depend on a number of factors including the extent of institutional investor interest in us, the general reputation of REITs and the attractiveness of their equity securities in comparison to other equity securities (including securities issued by other real estate-based companies), our financial performance and general stock and bond market conditions. If a robust public market for our Class A Common Stock does not develop, you may have difficulty selling shares of our Class A Common Stock, which could adversely affect the price that you receive for such shares.

The market price and trading volume of our Class A Common Stock may be volatile.

The U.S. stock markets, including the NYSE, on which we have applied to have our Class A Common Stock listed under the symbol **IWST**, have experienced significant price and volume fluctuations. As a result, the market price of shares of our Class A Common Stock is likely to be similarly volatile, and investors in shares of our Class A Common Stock may experience a decrease in the value of their shares, including decreases unrelated to our operating performance or prospects. We cannot assure you that the market price of our Class A Common Stock will not fluctuate or decline significantly in the future.

In addition to the risks listed in this **Risk Factors** section, a number of factors could negatively affect our share price or result in fluctuations in the price or trading volume of our Class A Common Stock, including:

the annual yield from distributions on our Class A Common Stock as compared to yields on other financial instruments;

equity issuances by us, or future sales of substantial amounts of our Class A Common Stock by our existing or future shareholders, or the perception that such issuances or future sales may occur;

conversions of our Class B Common Stock into shares of our Class A Common Stock or sales of our Class B Common Stock;

changes in market valuations of companies in the retail or real estate industries;

increases in market interest rates or a decrease in our distributions to shareholders that lead purchasers of our shares to demand a higher yield;

changes in market valuations of similar companies;

fluctuations in stock market prices and volumes;

additions or departures of key management personnel;

our operating performance and the performance of other similar companies;

actual or anticipated differences in our quarterly operating results;

changes in expectations of future financial performance or changes in estimates of securities analysts;

publication of research reports about us or our industry by securities analysts;

failure to qualify as a REIT;

adverse market reaction to any indebtedness we incur in the future;

Table of Contents

strategic decisions by us or our competitors, such as acquisitions, divestments, spin-offs, joint ventures, strategic investments or changes in business strategy;

the passage of legislation or other regulatory developments that adversely affect us or our industry;

speculation in the press or investment community;

changes in our earnings;

failure to satisfy the listing requirements of the NYSE;

failure to comply with the requirements of the Sarbanes-Oxley Act;

actions by institutional shareholders;

changes in accounting principles; and

general market conditions, including factors unrelated to our performance.

In the past, securities class action litigation has often been instituted against companies following periods of volatility in the price of their common stock. This type of litigation could result in substantial costs and divert our management's attention and resources, which could have a material adverse effect on our cash flows, our ability to execute our business strategy and our ability to make distributions to our shareholders.

Because we have a large number of shareholders and our shares have not been listed on a national securities exchange prior to this offering, there may be significant pent-up demand to sell our shares. Significant sales of our Class A Common Stock, or the perception that significant sales of such shares could occur, may cause the price of our Class A Common Stock to decline significantly.

As of October 3, 2011, we had approximately million shares of common stock issued and outstanding after giving effect to the Recapitalization, consisting of approximately million shares of our Class A Common Stock and million shares of our Class B Common Stock. Prior to this offering, our common stock was not listed on any national securities exchange and the ability of shareholders to liquidate their investments was limited. Additionally, our share repurchase program, which, in any event, only allowed us to repurchase up to 5% of the weighted average number of shares of our common stock outstanding during the prior calendar year in any 12-month period, has been suspended as of November 19, 2008. As a result, there may be significant pent-up demand to sell shares of our common stock. A large volume of sales of shares of our Class A Common Stock (whether they are Class A shares that are issued in the offering, Class A shares that are held by our existing shareholders upon the closing of the offering, or Class A shares created by the automatic conversion of our Class B shares over time) could decrease the prevailing market price of our Class A Common Stock and could impair our ability to raise additional capital through the sale of equity securities in the future. Even if a substantial number of sales of our Class A shares are not effected, the mere perception of the possibility of these sales could depress the market price of our Class A Common Stock and have a negative effect on our ability to raise capital in the future.

Although our Class B Common Stock will not be listed on a national securities exchange following the closing of this offering, sales of such shares or the perception that such sales could occur could have a material adverse effect on the trading price of our Class A Common Stock.

After giving effect to this offering and the Recapitalization, approximately million shares (or million shares if the underwriters exercise their overallotment option in full) of our common stock will be issued and outstanding, of which approximately million, or % (% if the underwriters exercise their overallotment option in full), will be shares of our Class B Common Stock, which is divided equally among our Class B-1, Class B-2 and Class B-3 Common Stock. Although our Class B Common Stock will not be listed on a

national securities exchange, it is not subject to transfer restrictions (other than the restrictions on ownership and transfer of stock set forth in our charter), therefore, such stock will be freely tradable. As a result, it is possible that a market may develop for shares of our Class B Common Stock, and sales of such shares, or the perception that such sales could occur, could have a material adverse effect on the trading price of our Class A Common Stock.

Table of Contents

Additionally, all of our Class B Common Stock will be converted into Class A Common Stock over time. As a result, holders of shares of Class B Common Stock seeking to immediately liquidate their investment in our common stock could engage in immediate short sales of our Class A Common Stock prior to the date on which the Class B Common Stock converts into Class A Common Stock and use the shares of Class A Common Stock that they receive upon conversion of their Class B Common Stock to cover these short sales in the future. Such short sales could depress the market price of our Class A Common Stock and limit the effectiveness of the Recapitalization as a strategy for limiting the number of shares of our common stock held by our shareholder prior to this offering that may be sold shortly after this offering.

Future conversions of our Class B Common Stock could adversely affect the market price of our Class A Common Stock.

After giving effect to the Recapitalization, we will have _____ million shares of each of our Class B-1, Class B-2 and Class B-3 Common Stock outstanding immediately following this offering. Although our Class B Common Stock will not be listed on a national securities exchange, our Class B-1 Common Stock, Class B-2 Common Stock and Class B-3 Common Stock will convert automatically into Class A Common Stock _____ months, _____ months and _____ months, respectively, following the initial listing of our Class A Common Stock on the NYSE. We cannot predict the effect that the conversion of shares of our Class B Common Stock into our Class A Common Stock will have on the market price of our Class A Common Stock, but these ongoing conversions may place constant downward pressure on the price of our Class A Common Stock, particularly at the time of each conversion.

Future offerings of debt securities, which would be senior to our common stock, or equity securities, which would dilute our existing shareholders and may be senior to our common stock, may adversely affect the market price of our common stock.

In the future, we may attempt to increase our capital resources by offering debt or equity securities, including medium term notes, senior or subordinated notes and classes of preferred or common stock. Debt securities or shares of preferred stock will generally be entitled to receive interest payments or distributions, both current and in connection with any liquidation or sale, prior to the holders of our common stock. We are not required to offer any such additional debt or equity securities to existing common shareholders on a preemptive basis. Therefore, offerings of common stock or other equity securities may dilute the holdings of our existing shareholders. Future offerings of debt or equity securities, or the perception that such offerings may occur, may reduce the market price of our common stock and/or the distributions that we pay with respect to our common stock. Because we may generally issue any such debt or equity securities in the future without obtaining the consent of our shareholders, you will bear the risk of our future offerings reducing the market price of our common stock and diluting your proportionate ownership.

Our distributions to shareholders may change, which could adversely affect the market price of our Class A Common Stock.

All distributions will be at the sole discretion of our board of directors and will depend upon our actual and projected financial condition, results of operations, cash flows, liquidity and FFO, maintenance of our REIT qualification and such other matters as our board of directors may deem relevant from time to time. We may not be able to make distributions in the future or may need to fund such distributions from external sources, as to which no assurances can be given. In addition, we may choose to retain operating cash flow for investment purposes, working capital reserves or other purposes, and these retained funds, although increasing the value of our underlying assets, may not correspondingly increase the market price of our Class A Common Stock. Our failure to meet the market's expectations with regard to future cash distributions likely would adversely affect the market price of our Class A Common Stock.

Table of Contents

Increases in market interest rates may result in a decrease in the value of our Class A Common Stock.

One of the factors that may influence the price of our Class A Common Stock will be the dividend distribution rate on the Class A Common Stock (as a percentage of the price of our Class A Common Stock) relative to market interest rates. If market interest rates rise, prospective purchasers of shares of our Class A Common Stock may expect a higher distribution rate. Higher interest rates would not, however, result in more funds being available for distribution and, in fact, would likely increase our borrowing costs and might decrease our funds available for distribution. We therefore may not be able, or we may not choose, to provide a higher distribution rate. As a result, prospective purchasers may decide to purchase other securities rather than our Class A Common Stock, which would reduce the demand for, and result in a decline in the market price of, our Class A Common Stock.

FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements within the meaning of the safe harbor from civil liability provided for such statements by the Private Securities Litigation Reform Act of 1995 (set forth in Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act). In particular, statements pertaining to our capital resources, portfolio performance, dividend policy and results of operations contain forward-looking statements. Likewise, all our statements regarding anticipated growth in our portfolio from operations, acquisitions and anticipated market conditions, demographics and results of operations are forward-looking statements. Forward-looking statements involve numerous risks and uncertainties and you should not rely on them as predictions of future events. Forward-looking statements depend on assumptions, data or methods which may be incorrect or imprecise and we may not be able to realize them. We do not guarantee that the transactions and events described will happen as described (or that they will happen at all). You can identify forward-looking statements by the use of forward-looking terminology such as believes, expects, may, will, should, seeks, approximately, intends, plans, pro forma, estimates, contemplates, aims, continues, would or anticipates words and phrases or similar words or phrases. You can also identify forward-looking statements by discussions of strategies, plans or intentions. The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements:

the factors included in this prospectus, including those set forth under the headings Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations and Our Business and Properties;

general economic, business and financial conditions, and changes in our industry and changes in the real estate markets in particular;

adverse economic and other developments in the Dallas-Fort Worth-Arlington area, where we have a high concentration of properties;

use of proceeds of this offering;

general volatility of the capital and credit markets and the market price of our common stock;

changes in our business strategy;

defaults on, early terminations of or non-renewal of leases by tenants;

bankruptcy or insolvency of a major tenant or a significant number of smaller tenants;

increased interest rates and operating costs;

declining real estate valuations and impairment charges;

availability, terms and deployment of capital;

our failure to obtain necessary outside financing;

our expected leverage;

decreased rental rates or increased vacancy rates;

our failure to generate sufficient cash flows to service our outstanding indebtedness;

difficulties in identifying properties to acquire and completing acquisitions;

risks of real estate acquisitions, dispositions and redevelopment, including the cost of construction delays and cost overruns;

our failure to successfully operate acquired properties and operations;

Table of Contents

our projected operating results;

our ability to manage our growth effectively;

our failure to successfully redevelop properties;

estimates relating to our ability to make distributions to our shareholders in the future;

impact of changes in governmental regulations, tax law and rates and similar matters;

our failure to qualify as a REIT;

future terrorist attacks in the U.S.;

environmental uncertainties and risks related to natural disasters;

lack or insufficient amounts of insurance;

financial market fluctuations;

availability of and our ability to attract and retain qualified personnel;

retention of our senior management team;

our understanding of our competition;

changes in real estate and zoning laws and increases in real property tax rates; and

our ability to comply with the laws, rules and regulations applicable to companies and, in particular, public companies.

For a further discussion of these and other factors that could impact our future results, performance or transactions, see the section above entitled Risk Factors. You should not place undue reliance on any forward-looking statements, which are based only on information currently available to us (or to third parties making the forward-looking statements). We undertake no obligation to publicly release any revisions to such forward-looking statements to reflect events or circumstances after the date of this prospectus, except as required by applicable law.

Table of Contents

USE OF PROCEEDS

We estimate that the net proceeds we will receive from this offering, after deducting the underwriting discount and estimated expenses of the offering payable by us, will be approximately \$ million (or approximately \$ million if the underwriters exercise their overallotment option in full), assuming a public offering price of \$ per share, which is the midpoint of the range set forth on the cover of this prospectus.

We intend to use approximately \$ million of the net proceeds received from this offering to repay amounts outstanding under our senior secured revolving line of credit. Our senior secured revolving line of credit matures on February 3, 2013, with a one-year extension option that we may exercise in certain circumstances, and bears interest at a variable rate equal to LIBOR plus a margin of between 2.75% and 4.00% per annum based on our leverage ratio. The interest rate under the senior secured revolving line of credit and the secured term loan was 3.75% as of October 3, 2011. We used the amounts that we borrowed under our senior secured revolving line of credit to repay other indebtedness and for general corporate purposes. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Senior Secured Revolving Line of Credit and Secured Term Loan for a further discussion of the terms of our senior secured revolving line of credit.

Affiliates of J.P. Morgan Securities LLC, Citigroup Global Markets Inc., Deutsche Bank Securities Inc. and KeyBanc Capital Markets Inc. are lenders under our senior secured revolving line of credit, and will receive their pro rata portion of the \$ million of the net proceeds from this offering used to repay amounts outstanding under our senior secured revolving line of credit. Accordingly, more than 5% of the net proceeds of this offering are intended to be used to repay amounts owed to affiliates of these underwriters.

We intend to use \$ million of net proceeds received from this offering to repurchase Inland Equity's interest in IW JV. Pursuant to IW JV's organizational documents, we have the option to call Inland Equity's interest in IW JV for an amount which is the greater of either: (a) fair market value of Inland Equity's interest or (b) \$50 million, plus an additional distribution of \$5 million and any unpaid preferred return or promote, as defined therein. As a result, following this offering we anticipate that we will own 100% of IW JV. See Certain Relationships and Related Transactions Joint Ventures with Inland Equity for a further discussion of IW JV and our relationship with Inland Equity.

We intend to use the remainder of the net proceeds received from this offering for general corporate and working capital purposes.

Table of Contents

RECAPITALIZATION

Prior to the completion of this offering, we intend to declare a stock dividend pursuant to which each outstanding share of our common stock will receive:

one share of our Class B-1 Common Stock; plus

one share of our Class B-2 Common Stock; plus

one share of our Class B-3 Common Stock.

In connection with this stock dividend, we intend to redesignate our then outstanding common stock as Class A Common Stock. Prior to the declaration of the stock dividend, and as part of the Recapitalization, we intend to effectuate a one reverse stock split of our common stock.

Our Class B Common Stock will be identical to our Class A Common Stock except that (i) we do not intend to list our Class B Common Stock on a national securities exchange and (ii) shares of our Class B Common Stock will convert automatically into shares of our Class A Common Stock, pursuant to provisions of our charter, on the following schedule:

months following the Listing, in the case of our Class B-1 Common Stock;

months following the Listing, in the case of our Class B-2 Common Stock; and

months following the Listing, in the case of our Class B-3 Common Stock.

In addition, if they have not otherwise converted, all shares of our Class B Common Stock will convert automatically into shares of our Class A Common Stock on the date that is months following the Listing.

The Recapitalization also will have the effect of reducing the total number of outstanding shares of our common stock. As of October 3, 2011, without giving effect to the Recapitalization, we had approximately 482.2 million shares of common stock outstanding. As of October 3, 2011, after giving effect to the Recapitalization, we would have had an aggregate of approximately million shares of our Class A and Class B Common Stock outstanding, divided equally among Class A, Class B-1, Class B-2 and Class B-3. All of these shares (except for certain shares described in Shares Eligible for Future Sale) will be freely tradable upon the completion of this offering except as otherwise provided in the restrictions on ownership and transfer of stock set forth in our charter. Of this amount, approximately million shares of our Class A Common Stock will be outstanding and approximately million shares of our Class B Common Stock, representing 75% of our total outstanding common stock, will be outstanding.

The Recapitalization will be effected on a pro rata basis with respect to all of our shareholders. Accordingly, it will not affect any shareholder's proportionate ownership of our outstanding shares. We will not complete this offering unless we complete the Recapitalization.

Table of Contents**DISTRIBUTION POLICY**

We intend to continue to qualify as a REIT for U.S. federal income tax purposes. The Code generally requires that a REIT distribute annually at least 90% of its REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gain, and imposes tax on any taxable income retained by a REIT, including capital gains.

To satisfy the requirements for qualification as a REIT and generally not be subject to U.S. federal income and excise tax, we intend to make regular quarterly distributions of all or substantially all of our REIT taxable income to holders of our common stock out of assets legally available for such purposes. Our future distributions will be at the sole discretion of our board of directors. When determining the amount of future distributions, we expect that our board of directors will consider, among other factors, (i) the amount of cash generated from our operating activities, (ii) our expectations of future cash flows, (iii) our determination of near-term cash needs for debt repayments, existing or future share repurchases, and selective acquisitions of new properties, (iv) the timing of significant re-leasing activities and the establishment of additional cash reserves for anticipated tenant improvements and general property capital improvements, (v) our ability to continue to access additional sources of capital, (vi) the amount required to be distributed to maintain our status as a REIT and to reduce any income and excise taxes that we otherwise would be required to pay and (vii) any limitations on our distributions contained in our credit or other agreements, including, without limitation, in our senior secured revolving line of credit and secured term loan, which limit our distributions to the greater of 95% of FFO as defined in the credit agreement (which equals FFO, as set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations Funds from Operations, excluding gains or losses from extraordinary items, impairments and other non-cash charges) or the amount necessary for us to maintain our qualification as a REIT.

If our operations do not generate sufficient cash flow to allow us to satisfy the REIT distribution requirements, we may be required to fund distributions from working capital, borrow funds, sell assets or reduce such distributions. Our distribution policy enables us to review the alternative funding sources available to us from time to time. Our actual results of operations will be affected by a number of factors, including the revenues we receive from our properties, our operating expenses, interest expense, the ability of our tenants to meet their obligations and unanticipated expenditures. For more information regarding risk factors that could materially adversely affect our actual results of operations, please see Risk Factors beginning on page 17.

The table below sets forth the quarterly dividend distributions per common share for the six months ended June 30, 2011 and the years ended December 31, 2010, 2009 and 2008.

	Six Months Ended June 30, 2011	Year Ended December 31,		
		2010	2009	2008 ⁽¹⁾
First Quarter	\$ 0.05938	\$ 0.04375	\$ 0.0488	\$ 0.1605
Second Quarter	0.06250	0.04625	0.05	0.1605
Third Quarter		0.05	0.025	0.1605
Fourth Quarter		0.05625	0.0325	0.1605
Total	\$ 0.12188	\$ 0.19625	\$ 0.1563	\$ 0.6420

(1) During 2008, distributions were made on a monthly basis.

Table of Contents

The following table compares cash flows provided by operating activities to distributions declared for the six months ended June 30, 2011 and 2010 and for the years ended December 31, 2010, 2009 and 2008:

	Six Months Ended June 30,		Years Ended December 31,		
	2011	2010	2010	2009	2008
Cash flows provided by operating activities	\$ 85,011	\$ 94,011	\$ 184,072	\$ 249,837	\$ 309,351
Distributions declared	58,464	43,480	94,579	75,040	308,798
Excess	\$ 26,547	\$ 50,531	\$ 89,493	\$ 174,797	\$ 553

For each of these periods, our cash flows provided by operating activities exceeded the amount of our distributions declared.

Table of Contents**CAPITALIZATION**

The following table sets forth our capitalization as of June 30, 2011 (i) on a historical basis, (ii) on an as adjusted basis to reflect additional amounts drawn through September 12, 2011 under our senior secured revolving line of credit (no additional amounts were drawn through October 3, 2011) and (iii) on an as further adjusted basis to also reflect this offering and the use of the net proceeds from this offering as set forth in Use of Proceeds. All information in the following table has been adjusted to reflect the Recapitalization, which will be effected prior to the completion of this offering.

You should read this table together with Use of Proceeds, Selected Consolidated Financial and Operating Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and notes thereto included elsewhere in this prospectus.

	As of June 30, 2011		
	Historical	As Adjusted	As Further Adjusted
	(in thousands, except per share data)		
Mortgages and notes payable	\$ 3,210,496		
Secured credit facility	435,000		
Shareholders' equity:			
Preferred stock, \$0.001 par value, 10,000 shares authorized, none outstanding, historical, as adjusted and as further adjusted			
Common stock, \$0.001 par value per share, 640,000 shares authorized, 480,496 shares issued and outstanding, historical, and as adjusted and no shares issued and outstanding, as further adjusted	480		
Class A Common Stock, \$0.001 par value per share, shares authorized, no shares issued and outstanding, historical and as adjusted and as further adjusted			
Class B-1 Common Stock, \$0.001 par value per share, shares authorized, no shares issued and outstanding, historical and as adjusted further adjusted			
Class B-2 Common Stock, \$0.001 par value per share, shares issued and outstanding, historical and as adjusted outstanding, as further adjusted			
Class B-3 Common Stock, \$0.001 par value per share, shares authorized, no shares issued and outstanding, historical and as adjusted, and as adjusted

Total equity	2,200,136		
Total Capitalization	\$ 5,845,632		

Table of Contents

DILUTION

If you invest in our Class A Common Stock, your interest will be diluted immediately to the extent of the difference between the public offering price per share you will pay in this offering and the pro forma net tangible book value per share of our common stock immediately after this offering.

Our net tangible book value as of June 30, 2011 was approximately \$2.1 billion, or on a pro forma basis, \$ _____ per share. Pro forma net tangible book value per share represents the amount of our total tangible assets minus total liabilities, divided by the total number of shares of common stock outstanding as of _____, after giving effect to the Recapitalization.

After giving effect to the sale of the _____ shares of our Class A Common Stock we are offering at the public offering price of \$ _____ per share, and after deducting the underwriting discount and our estimated offering expenses, our pro forma as adjusted net tangible book value as of _____ would have been approximately \$ _____ million, or \$ _____ per share. This represents an immediate increase in pro forma net tangible book value of \$ _____ per share and an immediate dilution of \$ _____ per share to new investors. The following table illustrates this calculation on a per share basis:

Public offering price per share of Class A Common Stock	\$
Pro forma net tangible book value per share of common stock as of June 30, 2011	\$
Increase per share attributable to this offering	
Pro forma as adjusted net tangible book value per share of common stock after this offering	
Pro forma dilution per share to new investors	\$

If the underwriters exercise their over-allotment option in full, pro forma as adjusted net tangible book value will increase to \$ _____ per share, representing an increase to existing holders of \$ _____ per share, and an immediate dilution of \$ _____ per share to new investors.

The tables and calculations above are based on _____ shares of our common stock outstanding as of June 30, 2011, on an actual basis, and excludes:

_____ shares of our common stock issuable upon the exercise of outstanding stock options as of _____, at a weighted average exercise price per share of \$ _____; and

_____ shares of our common stock reserved for future issuance under our incentive award plans as of _____.

SELECTED CONSOLIDATED FINANCIAL AND OPERATING DATA

The selected consolidated financial and operating data set forth below as of December 31, 2010 and 2009 and for the years ended December 31, 2010, 2009 and 2008 have been derived from our audited consolidated financial statements included elsewhere in this prospectus. The audited consolidated financial statements as of December 31, 2010 and 2009 and for the years ended December 31, 2010 and 2009 have been audited by Deloitte & Touche LLP, an independent registered public accounting firm. The audited consolidated financial statements for the year ended December 31, 2008 have been audited by KPMG LLP, an independent registered public accounting firm. The selected consolidated financial and operating data set forth below as of December 31, 2008, 2007 and 2006 and for the years ended December 31, 2007 and 2006 have been derived from our audited consolidated financial statements not included in this prospectus. The selected consolidated financial operating data set forth below as of June 30, 2011 and for the six months ended June 30, 2011 and 2010 has been derived from our unaudited consolidated financial statements included elsewhere in this prospectus. The unaudited consolidated financial statements have been prepared on the same basis as our audited consolidated financial statements and, in the opinion of our management, reflect all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of this data. The results of any interim period are not necessarily indicative of the results that may be expected for a full year. Certain amounts presented for the periods ended December 31, 2010, 2009, 2008, 2007 and 2006 have been reclassified to conform to our presentation of discontinued operations in our unaudited consolidated financial statements as of and for the six months ended June 30, 2011 and 2010.

Because the information presented below is only a summary and does not provide all of the information contained in our historical consolidated financial statements, including the related notes, you should read it in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our historical consolidated financial statements, including the related notes, included elsewhere in this prospectus. The amounts in the table are dollars in thousands except for share and per share information. The share and per share information set forth below gives effect to the Recapitalization.

- (1) Presents historical information as of June 30, 2011 as adjusted to give effect to (i) additional amounts drawn through September 12, 2011 under our senior secured revolving line of credit (no additional amounts were drawn through October 3, 2011) and (ii) this offering and the use of the net proceeds from this offering as set forth in Use of Proceeds.

Table of Contents

- (2) Total net debt to Adjusted EBITDA represents (i) our total debt less cash and cash equivalents divided by (ii) Adjusted EBITDA for the prior 12 months. Combined net debt to combined Adjusted EBITDA represents (i) the sum of (A) our total debt less cash and cash equivalents plus (B) our pro rata share of our investment property unconsolidated joint ventures' total debt less our pro rata share of these joint ventures' cash and cash equivalents divided by (ii) combined Adjusted EBITDA for the prior 12 months. These ratios are not presented as of December 31, 2008, 2007 or 2006. Our management believes that the ratios total net debt to Adjusted EBITDA and combined net debt to combined Adjusted EBITDA are useful because they provide investors with information regarding total debt net of cash and cash equivalents, which could be used to repay debt, compared to our performance as measured using Adjusted EBITDA and combined Adjusted EBITDA, which are described in footnote 5 below. The following table shows the reconciliation for net debt and combined net debt:

Reconciliation of Total Debt to Net Debt and Combined Net Debt

	As of June 30, 2011		As of December 31, 2010		2009
	As Adjusted	Actual			
	(in thousands)				
Total debt		\$ 3,645,496	\$ 3,757,237		\$ 4,110,985

- (4) For a definition and reconciliation of funds from operations, or FFO, and a statement disclosing the reasons why our management believes that presentation of FFO provides useful information to investors and, to the extent material, any additional purposes for which our management uses FFO, see Management's Discussion and Analysis of Financial Condition and Results of Operations' Funds from Operations.

Table of Contents

- (5) Total net operating income, or NOI, represents operating revenues (rental income, tenant recovery income, other property income, excluding straight-line rental income and amortization of acquired above and below market lease intangibles) less property operating expenses (real estate tax expense and property operating expense, excluding straight-line ground rent expense and straight-line bad debt expense) from our consolidated investments. Total NOI is not presented for the years ended December 31, 2007 or 2006. Combined net operating income, or combined NOI, represents NOI plus our pro rata share of NOI from our investment property unconsolidated joint ventures. Combined NOI is not presented for the years ended December 31, 2007 or 2006. For a reconciliation of total net operating income, or NOI, and a statement disclosing the reasons why our management believes that presentation of NOI provides useful information to investors and, to the extent material, any additional purposes for which our management uses NOI, which is also applicable to combined NOI, see Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations. The following table shows the reconciliation between net loss from investment property unconsolidated joint ventures and combined NOI:

Reconciliation of Net Loss from Investment Property Unconsolidated Joint Ventures to Combined NOI

Table of Contents

(6) Adjusted EBITDA represents net income (loss) before interest, income taxes, depreciation and amortization, as further adjusted to eliminate the impact of certain items that we do not consider indicative of our ongoing performance. Combined Adjusted EBITDA represents Adjusted EBITDA plus our pro rata share of the EBITDA adjustments from our investment property unconsolidated joint ventures. The further adjustments that we make to Adjusted EBITDA and combined Adjusted EBITDA are itemized in the reconciliation below. In evaluating these measures, you should be aware that in the future we may incur expenses that are the same as or similar to some of the adjustments in this presentation. Our presentation of these measures should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items. Adjusted EBITDA and combined Adjusted EBITDA are not presented for the years ended December 31, 2008, 2007 or 2006. Our management believes that Adjusted EBITDA and combined Adjusted EBITDA are useful because they allow investors and management to evaluate and compare our performance from period to period in a meaningful and consistent manner in addition to standard financial measurements under GAAP. Adjusted EBITDA and combined Adjusted EBITDA are not measurements of financial performance under GAAP and should not be considered as alternatives to net income, as an indicator of operating performance or any measure of performance derived in accordance with GAAP. Our calculation of Adjusted EBITDA and combined Adjusted EBITDA may be different from the calculation used by other companies and, accordingly, comparability may be limited. The following table shows the reconciliation between net loss and Adjusted EBITDA and combined Adjusted EBITDA:

Table of Contents**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in forward-looking statements for many reasons, including the risks described in Risk Factors and elsewhere in this prospectus. Our results of operations and financial condition, as reflected in the accompanying financial statements and related notes, are subject to management's evaluation and interpretation of business conditions, changing capital market conditions and other factors that could affect the ongoing viability of our tenants. You should read the following discussion with Forward-Looking Statements, Our Business and Properties and the financial statements and related notes included elsewhere in this prospectus. Throughout this Management's Discussion and Analysis of Financial Condition and Result of Operations section, dollars, except per share and per square foot amounts, and share amounts are presented in thousands.

Executive Summary

We are one of the largest owners and operators of shopping centers in the United States. As of June 30, 2011, our retail operating portfolio consisted of 265 properties with approximately 35.5 million square feet of GLA, was geographically diversified across 35 states and includes power centers, community centers, neighborhood centers and lifestyle centers, as well as single-user retail properties. Our retail properties are primarily located in retail districts within densely populated areas in highly visible locations with convenient access to interstates and major thoroughfares. Our retail properties have a weighted average age, based on annualized base rent of only approximately 10.1 years since the initial construction or most recent major renovation. As of June 30, 2011, our retail operating portfolio was 88.6% leased, including leases signed but not commenced. In addition to our retail operating portfolio, as of June 30, 2011, we also held interests in 16 office and industrial operating properties, including 12 office properties and four industrial properties, two non-stabilized operating properties, 20 retail operating properties held by three unconsolidated joint ventures and five retail properties under development. The following summarizes our consolidated operating portfolio as of June 30, 2011:

Description	Number of Properties	GLA (in thousands)	Percent Leased	Percent Leased and Leases Signed ⁽¹⁾
Retail				
Wholly-owned	210	28,956	85.5%	88.3%
Joint venture ⁽²⁾	55	6,542	89.8%	90.7%
Total retail ⁽³⁾	265	35,498	86.3%	88.6%
Office/Industrial				
Wholly-owned	16	5,658	97.9%	97.9%
Total Consolidated Operating Portfolio	281	41,156	87.9%	90.0%

(1) Includes leases signed but not commenced.

(2) Represents 55 properties held in one joint venture in which we have a 77% interest. We currently anticipate using a portion of the net proceeds from this offering to exercise our option to repurchase the 23% interest held by others. As a result, following this offering we anticipate that we will own 100% of those properties.

(3) Excludes two non-stabilized operating properties, one of which is wholly-owned and one of which is a joint venture.

Our shopping centers are primarily anchored or shadow anchored by strong national and regional grocers, discount retailers and other retailers that provide basic household goods or clothing, including Target, TJX Companies, PetSmart, Best Buy, Bed Bath & Beyond, Home Depot, Kohl's, Wal-Mart, Publix and Lowe's. As of June 30, 2011, over 90% of our shopping centers, based on GLA, were anchored or shadow anchored by a grocer, discount department store, wholesale club or retailer that sells basic household goods or clothing. Overall,

Table of Contents

we have a broad and highly diversified retail tenant base that includes approximately 1,600 tenants with no one tenant representing more than 3.3% of the total annualized base rent generated from our retail operating properties, or our retail annualized base rent.

We are encouraged by the leasing activity we have achieved during 2010 and the first six months of 2011. Due in large part to the downturn in the economy, we previously had approximately 3.2 million square feet of retail space become available due to the bankruptcies of Mervyns, Linens n Things and Circuit City in 2008. As of June 30, 2011, we have been able to lease approximately 2.1 million square feet of this vacant space, primarily to existing tenants. We also sold two former Mervyns locations, aggregating approximately 154,000 square feet, to institutional buyers. In addition, as of June 30, 2011, we had under letter of intent or were in active negotiations for 43.2% of the remaining 1.0 million square feet of this GLA. In total, we have leased, sold or are in negotiations for 2.7 million square feet, or 83.9% of the 3.2 million square feet of GLA that was vacated as a result of these bankruptcies. During 2010 and during the six months ended June 30, 2011, based on our retail operating portfolio, we signed 509 and 238 new and renewal leases, respectively, for a total of approximately 3.1 and 2.0 million square feet, respectively. As we continue to sign new leases, rental rates have generally been below the previous rates and we have continued to see increased demands for rent abatement and capital investment, in the form of tenant improvements and leasing commissions, required from us. However, as retail sales and the overall economy continue to improve, such rental spreads are stabilizing.

Asset Dispositions and Debt Transactions

During 2010 and the six months ended June 30, 2011, we focused on strengthening our balance sheet by deleveraging through asset dispositions and debt refinancing transactions. Specifically, in 2010, we:

sold eight operating properties aggregating 894,500 square feet for \$104,635, resulting in net proceeds of \$21,024 and debt extinguishment of \$106,791;

closed on partial sales of eight operating properties to our RioCan joint venture aggregating 1,146,200 square feet for \$159,918, resulting in net proceeds of \$48,616 and debt extinguishment of \$97,888; and

obtained mortgages and notes payable proceeds of \$737,890, made mortgages and notes payable repayments of \$1,018,351 and received forgiveness of debt of \$50,831.

Additionally, for the six months ended June 30, 2011, we:

sold four operating properties aggregating 1,338,400 square feet for a combined sales price of \$58,814, resulting in net proceeds of \$57,112; and

borrowed \$150,000 on our secured term loan and an additional \$130,653 on our senior secured revolving line of credit, obtained mortgages payable proceeds of \$70,424, made mortgages payable repayments of \$415,190 and received forgiveness of debt of \$14,438.

We plan to continue to pursue opportunistic dispositions of non-retail properties and free standing, triple-net retail properties to maintain the focus of our portfolio on well located, high quality shopping centers.

Joint Ventures

We leverage our leasing and property management platform through the strategic formation, capitalization and management of joint ventures. We partner with institutional capital providers to supplement our capital base in a manner accretive to our shareholders. On May 20, 2010, we entered into definitive agreements to form a joint venture with a wholly-owned affiliate of RioCan and agreed to contribute eight shopping centers located in Texas to the joint venture. Under the terms of the agreements, RioCan contributed cash for an 80% interest in the venture and we contributed a 20% interest in the properties. The joint venture acquired an 80% interest in the properties from us in exchange for cash, each of which was accounted for as a partial sale of real estate. As of June 30, 2011, our RioCan joint venture had acquired eight properties from us, all of which were acquired in 2010, for a purchase price of \$159,442, and had assumed from us mortgages payable on these properties totaling

approximately \$97,888. In addition, we received additional earnout proceeds of \$476 during the year ended December 31, 2010.

Table of Contents

On May 20, 2011, the RioCan joint venture acquired a 124,941 square foot multi-tenant retail property in Temple, Texas for which we contributed \$4,313 as our share of the acquisition price net of closing costs.

During the three months ended June 30, 2011, we dissolved a partnership with a partner in three of our development joint ventures resulting in increases to our ownership interests to 100% in Parkway Towne Crossing, 100% in three fully occupied outlots at Wheatland Towne Crossing and 50% in Lake Mead Crossing. The remaining property of Wheatland Towne Crossing (excluding the three outlots) was conveyed to our partner and our partner simultaneously repaid the related \$5,730 construction loan. Concurrently with this transaction, we also acquired a 36.7% ownership interest in Lake Mead Crossing from another partner in that joint venture, increasing our total ownership interest in the property to 86.7%. We accounted for this transaction, including the conveyance of property, as a nonmonetary distribution of \$8,483, reflected in the condensed consolidated financial statements as an increase to Accumulated distributions in excess of earnings.

Leasing Activity

During the year ended December 31, 2010 and during the six months ended June 30, 2011, based on our retail operating portfolio, we signed 509 and 238 new and renewal leases, respectively, for a total of approximately 3.1 and 2.0 million square feet, respectively. On February 16, 2011, Borders, which, as of December 31, 2010, leased from us approximately 220,000 square feet of GLA at ten locations, which leases represented \$2,600 of annualized base rent, filed for bankruptcy under Chapter 11. On July 18, 2011, Borders announced that it was seeking approval for the liquidation of its remaining store assets, which was approved on July 21, 2011. Subsequent to December 31, 2010, Borders has closed stores at all ten locations where it leased space from us.

We are encouraged by the solid leasing activity we have achieved during 2010 and for the first six months of 2011 and believe that our occupancy will continue to increase over time.

Distributions

We declared distributions totaling \$0.20 and \$0.12 per share during 2010 and for the six months ended June 30, 2011, respectively. We have increased the quarterly distribution rate for seven consecutive quarters.

Economic Conditions and Outlook

For a discussion of economic conditions and the outlook regarding the retail industry, see Industry Overview.

Results of Operations

We believe that property net operating income, or NOI, is a useful measure of our operating performance. We define NOI as operating revenues (rental income, tenant recovery income, other property income, excluding straight-line rental income, amortization of lease inducements and amortization of acquired above and below market lease intangibles) less property operating expenses (real estate tax expense and property operating expense, excluding straight-line ground rent expense and straight-line bad debt expense). Other REITs may use different methodologies for calculating NOI, and accordingly, our NOI may not be comparable to other REITs.

We believe that this measure provides an operating perspective not immediately apparent from GAAP operating income or net (loss) income. We use NOI to evaluate our performance on a property-by-property basis because NOI allows us to evaluate the impact that factors such as lease structure, lease rates and tenant base, which vary by property, have on our operating results. However, NOI should only be used as an alternative measure of our financial performance. For reference and as an aid in understanding our computation of NOI, a reconciliation of NOI to net (loss) income as computed in accordance with GAAP has been presented.

Table of Contents*Comparison of the six months ended June 30, 2011 and 2010*

The table below presents operating information for our same store portfolio consisting of 280 operating properties acquired or placed in service prior to January 1, 2010, along with reconciliation to net operating income. The properties in the same store portfolios as described were owned for the three months ended June 30, 2011 and 2010. The properties in Other investment properties include our development properties, some of which became operational during the periods presented, and the properties that were partially sold to our RioCan joint venture during 2010, none of which qualified for discontinued operations accounting treatment.

	Six Months Ended June 30,

Table of Contents

Total net operating income decreased by \$5,610, or 2.6%. Total rental income, tenant recovery and other property income decreased by \$13,372, or 4.2%, and total property operating expenses decreased by \$7,762, or 8.0%, for the six months ended June 30, 2011, as compared to June 30, 2010.

Rental income. Rental income increased \$2,286, or 1.0%, on a same store basis from \$239,504 to \$241,790. The same store increase is primarily due to:

an increase of \$3,341 composed of \$12,716 as a result of new tenant leases replacing former tenants partially offset by \$9,375 from early terminations and natural expirations of certain tenant leases, partially offset by

a decrease of \$1,031 due to reduced rent as a result of co-tenancy provisions in certain leases, reduced percentage rent as a result of decreased tenant sales, and increased rent abatements as a result of efforts to increase occupancy.

Although same store rental income increased, overall rental income decreased \$4,156, or 1.7%, from \$248,741 to \$244,585 primarily due to a decrease of \$6,442 in other investment properties generally consisting of:

a decrease of \$6,263 due to the partial sale of eight investment properties to our RioCan joint venture during 2010, partially offset by

an increase of \$204 related to development properties placed into service.

Tenant recovery income. Tenant recovery income decreased \$5,005, or 8.6%, on a same store basis from \$58,285 to \$53,280, primarily due to:

a 7.6% decrease in common area maintenance recovery income, primarily due to reduced recoverable property operating expenses described below and a reduction in the 2010 tenant recovery income estimates as a result of the common area maintenance reconciliation process completed during the six months ended June 30, 2011, and

a 5.3% decrease in real estate tax recovery, primarily resulting from reduced real estate tax expense as described below.

Overall, tenant recovery income decreased \$7,247, or 12.0%, from \$60,364 to \$53,117, primarily due to the decrease in the same store portfolio described above and a decrease in recovery income of \$1,856 resulting from properties partially sold to our RioCan joint venture during the third and fourth quarters of 2010.

Other property income. Other property income decreased overall by \$1,969, or 26.0%, due to decreases in termination fee income, parking revenue and direct recovery income.

Property operating expenses. Property operating expenses decreased \$823, or 1.6%, on a same store basis from \$50,332 to \$49,509. The same store decrease is primarily due to:

a decrease in bad debt expense of \$1,194;

a decrease in certain recoverable property operating expenses of \$126 due to the continued efforts of management to contain costs, partially offset by

an increase in non-recoverable property operating expenses of \$497.

Overall, property operating expenses decreased \$2,134, or 4.1%, from \$52,456 to \$50,332, due to the decrease in the same store portfolio described above, in addition to decreases in certain non-recoverable and recoverable property operating expenses and bad debt expense of \$233, \$949 and \$129, respectively, in other investment properties.

Table of Contents

Real estate taxes. Real estate taxes decreased \$4,534, or 10.5%, on a same store basis from \$43,302 to \$38,768. This decrease is primarily due to:

a net decrease of \$2,400 over 2010 real estate tax expense primarily due to decreases in assessed values;

a decrease of \$1,991 in prior year estimates adjusted during the six months ended June 30, 2011, based on actual real estate taxes paid; and

an increase of \$133 in real estate tax refunds received during the six months ended June 30, 2011 for prior year tax assessment adjustments.

Overall, real estate taxes decreased \$5,628, or 12.5%, from \$44,995 to \$39,367, primarily due to the decrease in the same store portfolio described above and a decrease in real estate tax expense of \$1,384 resulting from properties partially sold to our RioCan joint venture during the third and fourth quarters of 2010.

Other income (expense). Other income (expense) changed from net expense of \$275,936 to net expense of \$277,235. The increase in net expense of \$1,299, or 0.5%, is primarily due to:

a \$22,516 increase in provision for impairment of investment properties. Based on the results of our evaluations for impairment (see Notes 12 and 13 to the condensed consolidated financial statements), we recognized impairment charges of \$30,373 and \$7,857 for the six months ended June 30, 2011 and 2010, respectively. Although 24 of our properties had impairment indicators at June 30, 2011, undiscounted cash flows for those properties exceeded their respective carrying values by a weighted average of 39%. Accordingly, no additional impairment provisions were warranted for these properties; and

a \$4,893 negative change in equity in (loss) income of unconsolidated joint ventures primarily due to additional impairment charges recorded at our Hampton joint venture, partially offset by

a \$14,438 increase in gain on extinguishment of debt due to debt forgiveness related to three properties which were added as collateral to the amended and restated senior secured credit facility (see Note 9 to the condensed consolidated financial statements); and

a \$13,290 decrease in interest expense primarily due to:

- a \$9,624 decrease in interest on mortgages payable due to the repayment of mortgage debt;
- the acceleration of mortgage premium in conjunction with the debt repayment on one property in the amount of \$4,750;
- a decrease in prepayment penalties and other costs associated with refinancings of \$1,914, partially offset by
- an increase in interest on our secured credit facility of \$3,799 due to increased borrowings used to repay 2011 debt maturities.

Discontinued operations. Discontinued operations consist of amounts related to four properties and eight properties that were sold during the six months ended June 30, 2011 and the year ended December 31, 2010, respectively. We closed on the sale of two single-user retail properties and two single-user industrial properties during the six months ended June 30, 2011 aggregating 1,338,400 square feet, for a combined sales price of \$58,814, net sales proceeds totaling \$57,112 and total gains of \$4,161. We closed on eight properties during the year ended December 31, 2010 aggregating 894,500 square feet, for a combined sales price of \$104,635. The aggregated sales resulted in the extinguishment or repayment of \$106,791 of debt, net sales proceeds totaling \$21,024 and total gains of \$23,806. The properties disposed of during 2010 included two office buildings, five single-user retail properties and one medical center. Included in this was an office building aggregating 382,600 square feet that was transferred through a deed in lieu of foreclosure to the property's lender resulting in a gain on sale of \$19,841. There were no properties that qualified as held for sale accounting treatment as of June 30, 2011 or December 31, 2010.

Table of Contents

Comparison of the years ended December 31, 2010 to December 31, 2009

The table below presents operating information for our same store portfolio consisting of 280 operating properties acquired or placed in service prior to January 1, 2009, along with a reconciliation to net operating income. The properties in the same store portfolios as described were owned for the years ended December 31, 2010 and 2009. The properties in Other investment properties include the properties that were partially sold to our RioCan joint venture during 2010, none of which qualified for discontinued operations accounting treatment.

Table of Contents

Total net operating income increased by \$2,698, or 0.6%. Total rental income, tenant recovery and other property income decreased by \$17,210, or 2.7%, and total property operating expenses decreased by \$19,908, or 9.6%, for the year ended December 31, 2010, as compared to December 31, 2009.

Rental income. Rental income decreased \$7,213 or 1.5%, on a same store basis from \$487,359 to \$480,146. The same store decrease is primarily due to:

an increase of \$10,827 composed of \$34,181 as a result of new tenant leases replacing former tenants partially offset by \$23,354 from early terminations and natural expirations of certain tenant leases;

a decrease of \$17,154 due to reduced rent as a result of co-tenancy provisions in certain leases, reduced percentage rent as a result of decreased tenant sales, and increased rent abatements as a result of efforts to increase occupancy.

Overall, rental income decreased \$8,189, or 1.6%, from \$506,170 to \$497,981, primarily due to the same store portfolio described above, in addition to a decrease of \$976 in other investment properties primarily due to:

a decrease of \$1,795 due to the partial sale of eight investment properties to our RioCan joint venture during 2010, partially offset by

an increase of \$660 related to development properties placed into service subsequent to December 31, 2008.

Tenant recovery income. Tenant recovery income decreased \$5,428, or 4.7%, on a same store basis from \$116,110 to \$110,682, primarily due to:

a 9.2% decrease in common area maintenance recovery income, primarily due to reduced recoverable property operating expenses described below, and

a 7.0% decrease in real estate tax recovery, primarily resulting from reduced real estate tax expense as described below.

Overall, tenant recovery income decreased \$6,807, or 5.6%, from \$121,149 to \$114,342, primarily due to the decrease in the same store portfolio described above and a decrease in recovery income from properties partially sold to our RioCan joint venture.

Other property income. Other property income decreased overall by \$2,214, or 11.8%, due to decreases in termination fee income, parking revenue and direct recovery income.

Property operating expenses. Property operating expenses decreased \$11,865, or 10.8%, on a same store basis from \$110,175 to \$98,310. The same store decrease is primarily due to:

a decrease in bad debt expense of \$3,832, and

a decrease in certain non-recoverable and recoverable property operating expenses of \$2,309 and \$5,006, respectively, due to the continued efforts of management to contain costs.

Overall, property operating expenses decreased \$12,545, or 10.9%, from \$114,835 to \$102,290, due to the decrease in the same store portfolio described above, in addition to a decrease in bad debt expense of \$443 and a decrease in certain non-recoverable and recoverable property operating expenses of \$194 and \$137, respectively, in other investment properties.

Real estate taxes. Real estate taxes decreased \$6,303, or 7.1%, on a same store basis from \$88,399 to \$82,096. This decrease is primarily due to:

a net decrease of \$4,614 over 2009 real estate tax expense primarily due to decreases in assessed values;

Table of Contents

an increase of \$2,089 in real estate tax refunds received during 2010 for prior year tax assessment adjustments; partially offset by

an increase in tax consulting fees of \$455 as a result of successful reductions to proposed increases to assessed valuations or tax rates at certain properties.

Overall, real estate taxes decreased \$7,363, or 8.0%, from \$92,523 to \$85,160 primarily due to the decrease in the same store portfolio described above and a net decrease of \$995 over 2009 real estate tax expense due to decreases in assessed values on certain properties partially sold to our RioCan joint venture.

Other income (expense). Other income (expense) changed from net expense of \$571,751 to net expense of \$546,447. The decrease in net expense of \$25,304, or 4.4%, is primarily due to:

a \$39,470 decrease in provision for impairment of investment properties. Based on the results of our evaluations for impairment (see Notes 14 and 15 to the consolidated financial statements), we recognized impairment charges of \$14,430 and \$53,900 for the year ended December 31, 2010 and 2009, respectively. Although 41 of our properties had impairment indicators at December 31, 2010, undiscounted cash flows for those properties exceeded their respective carrying values by a weighted average of 53%. Accordingly, no additional impairment provisions were warranted for these properties;

a \$17,322 decrease in impairment of notes receivable due to the impairment of two notes receivable in 2009;

a \$13,324 decrease in equity in loss of unconsolidated joint ventures due primarily to impairments recorded by one joint venture in 2009 that did not reoccur in 2010, partially offset by

a \$14,032 decrease in recognized gain on marketable securities primarily as a result of a significant liquidation of the marketable securities portfolio in 2009 and no other-than-temporary impairment recorded in 2010 as compared to other-than-temporary impairment of \$24,831 recorded in 2009; and

a \$27,128 increase in interest expense primarily due to:

- higher interest rates on refinanced debt resulting in an increase of \$16,163;
- an increase of \$16,214 related to the senior and junior mezzanine notes of IW JV that were entered into in December 2009, partially offset by
- a decrease in prepayment penalties and other costs associated with refinancings of \$2,685, and
- a decrease in other financing costs of \$1,632 due to a decrease in the amount of preferred returns paid to a joint venture partner.

Discontinued operations. Discontinued operations consist of amounts related to eight properties that were sold during each of the years ended December 31, 2010 and 2009 and four properties that were sold during the six months ended June 30, 2011, each of which qualifies as discontinued operations. We closed on eight properties during the year ended December 31, 2010 aggregating 894,500 square feet, for a combined sales price of \$104,635. The aggregated sales resulted in the extinguishment or repayment of \$106,791 of debt, net sales proceeds totaling \$21,024 and total gains of \$23,806. The properties disposed included two office buildings, five single-user retail properties and one medical center. Included in this was an office building aggregating 382,600 square feet that was transferred through a deed in lieu of foreclosure

to the property's lender resulting in a gain on sale of \$19,841. There were no properties that qualified for held for sale accounting treatment as of December 31, 2010. We closed on the sale of eight properties during the year ended December 31, 2009 aggregating 1,579,000 square feet, for a combined sales price of \$338,057. The aggregated sales resulted in the extinguishment or repayment of \$208,552 of debt, net sales proceeds totaling \$123,944 and total gains on sale of \$26,383. The properties sold included three office buildings, three single-user retail properties and two multi-tenant properties.

Table of Contents

Comparison of the years ended December 31, 2009 to December 31, 2008

The table below presents operating information for our same store portfolio consisting of 277 operating properties acquired or placed in service prior to January 1, 2008, along with a reconciliation to net operating income. The properties in the same store portfolios as described were owned for the years ended December 31, 2009 and 2008.

	2009	2008	Impact	Percentage

Table of Contents

Net operating income decreased by \$33,434, or 7.1%. Total rental income, tenant recovery and other property income decreased by \$38,772, or 5.7%, and total property operating expenses decreased by \$5,338, or 2.5%, for the year ended December 31, 2009, as compared to December 31, 2008.

Rental income. Rental income decreased \$35,814 or 6.8%, on a same store basis from \$526,649 to \$490,835. The same store decrease is primarily due to:

a decrease of \$28,548 in rental income due to tenant bankruptcies, primarily Linens 'n Things, Circuit City and Mervyns;

a decrease of \$3,657, composed of \$7,292 as a result of early termination and natural expirations of certain tenant leases, partially offset by \$3,635 from new tenant leases replacing former tenants; and

a decrease of \$4,409 due to reduced rent as a result of co-tenancy provisions in certain leases and reduced percentage rent as a result of decreased tenant sales; partially offset by

an increase of \$1,939 due to earnouts completed subsequent to December 31, 2007.

Overall, rental income decreased \$29,310, or 5.5%, from \$535,480 to \$506,170, primarily due to the same store portfolio described above, partially offset by an increase of \$6,504 in other investment properties primarily due to:

an increase of \$3,158 due to investment properties acquired subsequent to December 31, 2007; and

an increase of \$2,854 related to development properties placed into service subsequent to December 31, 2007.

Tenant recovery income. Tenant recovery income decreased \$10,229, or 8.0%, on a same store basis from \$127,542 to \$117,313, primarily due to:

a 14.1% decrease in common area maintenance recovery income primarily due to reduced recoverable property operating expenses described below and reduced occupancy due to tenant vacancies resulting from 2008 bankruptcies and early lease terminations; and

a 2.9% decrease in real estate tax recovery primarily resulting from reduced occupancy as described above.

Overall, tenant recovery income decreased \$8,526, or 6.6%, from \$129,675 to \$121,149, primarily due to the decrease in the same store portfolio described above, partially offset by recovery income from investment properties purchased after December 31, 2007 and phases of developments that have been placed into service subsequent to December 31, 2007.

Other property income. Other property income decreased overall by \$936, or 4.7%, due to decreases in termination fee income, parking revenue and direct recovery income.

Property operating expenses. Property operating expenses decreased \$12,764, or 10.4%, on a same store basis from \$123,255 to \$110,491. The same store decrease is primarily due to:

a decrease in bad debt expense of \$6,674; and

a decrease in certain non-recoverable and recoverable property operating expenses of \$6,429.

Overall, property operating expenses decreased \$11,457, or 9.1%, from \$126,292 to \$114,835, due to the decrease in the same store portfolio described above, partially offset by an increase of \$1,307 in other investment properties as follows:

an increase in bad debt expense of \$209; and

Table of Contents

an increase in certain non-recoverable and recoverable property operating expenses of \$536 and \$628, respectively.
Real estate taxes. Real estate taxes increased \$4,221, or 5.0%, on a same store basis from \$84,921 to \$89,142. The same store increase is primarily due to:

an increase of \$2,027 related to investment properties where vacated tenants with triple net leases had paid real estate taxes directly to the taxing authorities during 2008;

an increase of \$1,098 in prior year estimates adjusted during 2009, based on actual real estate taxes paid;

a net increase of \$203 over 2008 real estate tax expense due to normal increases and decreases in assessed values;

a decrease of \$447 in real estate tax refunds received during 2009 for prior year tax assessment adjustments; and

an increase in tax consulting fees of \$446 as a result of successful reductions to proposed increases to assessed valuations or tax rates at certain properties.

Overall, real estate taxes increased \$6,119, or 7.1%, from \$86,404 to \$92,523. The other investment properties representing properties acquired subsequent to December 31, 2007 and phases of developments that have been placed into service resulted in an increase in real estate taxes of \$1,898.

Other income (expense). Other income (expense) changed from net expense of \$1,131,500 to net expense of \$571,751. The decrease in net expense of \$559,749, or 49.5% is primarily due to:

a \$377,916 impairment of goodwill recognized in 2008;

a \$178,927 decrease in recognized loss on marketable securities primarily as a result of a significant liquidation of the marketable securities portfolio in 2009 and \$24,831 of other-than-temporary impairment recorded in 2009 as compared to other-than-temporary impairment of \$160,327 recorded in 2008;

a \$50,913 decrease in loss on lease terminations as a result of a decrease in tenants that vacated prior to lease expiration due to tenant bankruptcies and economic challenges facing tenants during 2009 as compared to 2008; and

a \$20,767 decrease in loss on interest rate locks due to impairment recorded during 2008; partially offset by

a \$13,878 decrease in dividend income due to sales of marketable securities, dividend reductions and suspensions;

a \$4,173 decrease in straight-line rental income primarily due to reduced occupancy from tenant vacancies and tenant bankruptcies in 2008 and tenants with co-tenancy rent reductions in 2009 as a result of such bankruptcies;

Edgar Filing: INLAND WESTERN RETAIL REAL ESTATE TRUST INC - Form S-11/A

a \$2,846 decrease in interest income as a result of full or partial payoffs of notes receivable subsequent to December 31, 2007, the impairment of a note receivable as of June 30, 2009 and \$1,623 as a result of short-term investments receiving lower interest rates in interest bearing accounts; and

an increase of \$23,878 in interest expense primarily due to:

- higher interest rates on refinanced debt resulting in an increase of \$6,571 and additional interest expense of \$4,068 incurred prior to the completion of certain long-term refinancings;

- prepayment penalties and other costs associated with refinancings of \$5,066;

Table of Contents

- decreases in capitalized interest of \$6,256 due to certain phases of our developments being placed into service;
- an increase in interest on our line of credit of \$3,389 due primarily to an increase in the interest rate; and
- an increase of \$2,650 related to the fixed variable spread related to our interest rate swaps, partially offset by decreases in margin payable interest of \$3,192 due to decreases in the margin payable balance.

Discontinued operations. Discontinued operations consist of amounts related to eight properties that were sold during each of the years ended December 31, 2010 and 2009 and four properties that were sold during the six months ended June 30, 2011, each of which qualifies as discontinued operations. Refer to discussion comparing 2010 and 2009 results for more detail on the transactions that resulted in discontinued operations.

Funds from Operations

Due to certain unique operating characteristics of real estate companies, the National Association of Real Estate Investment Trusts, or NAREIT, an industry trade group, has promulgated a standard known as funds from operations, or FFO. We believe that FFO, which is a non-GAAP performance measure, provides an additional and useful means to assess the operating performance of REITs. As defined by NAREIT, FFO means net (loss) income computed in accordance with GAAP, excluding gains (or losses) from sales of investment properties, plus depreciation and amortization on investment properties including adjustments for unconsolidated joint ventures in which the REIT holds an interest. We have adopted the NAREIT definition for computing FFO because management believes that, subject to the following limitations, FFO provides a basis for comparing our performance and operations to those of other REITs. FFO is not intended to be an alternative to Net Income as an indicator of our performance nor to Cash Flows from Operating Activities as determined by GAAP as a measure of our capacity to pay distributions.

Our FFO and cash flow from operating activities for the six months ended June 30, 2011 and 2010 and the years ended December 31, 2010, 2009, 2008, 2007 and 2006 is as follows:

	Six Months Ended June 30,		Year Ended December 31,				
	2011	2010	2010	2009	2008	2007	2006
Net (loss) income attributable to Company shareholders	\$ (53,749)	\$ (66,905)	\$ (95,843)	\$ (112,335)	\$ (683,727)	\$ 41,669	\$ 31,943
Add:							
Depreciation and amortization ⁽¹⁾	129,836	131,635	267,500	279,361	337,070	280,688	260,042
Less:							
Gain on sales of investment properties	(9,223)	(1,530)	(24,465)	(21,545)		(31,313)	
Noncontrolling interests share of depreciation related to consolidated joint ventures	(5,349)	(5,602)	(12,022)	(3,637)	(2,744)	(3,443)	(5,587)
Funds from operations	\$ 61,515	\$ 57,598	\$ 135,170	\$ 141,844	\$ (349,401)	\$ 287,601	\$ 286,398
Cash flow from operating activities	\$ 85,011	\$ 94,011	\$ 184,072	\$ 249,837	\$ 309,351	\$ 318,641	\$ 296,578

(1) Includes our share of depreciation and amortization from unconsolidated joint ventures and depreciation and amortization from discontinued operations.

Depreciation and amortization related to investment properties for purposes of calculating FFO includes loss on lease terminations, which encompasses the write-off of tenant related assets, including tenant improvements and in-place lease values, as a result of early lease terminations. Total loss on lease terminations for the six months ended June 30, 2011 and 2010 were \$6,695 and \$4,404, respectively. Total loss on lease terminations for the years ended December 31, 2010, 2009, 2008, 2007 and 2006 were \$13,826, \$13,735, \$67,092, \$11,788 and \$4,570, respectively.

Table of Contents

The increase in FFO for the six months ended June 30, 2011 compared to the same period in 2010, including amounts related to discontinued operations, is primarily due to an increase in gain on debt extinguishment of \$14,438, a decrease in interest expense of \$16,576, a decrease in other expense of \$6,045 and a decrease in property operating expenses of \$3,753, partially offset by a decrease in revenues of \$22,959 and an increase in impairment on investment properties of \$13,889.

Liquidity and Capital Resources

We anticipate that cash flows from operating activities will provide adequate capital for all scheduled monthly principal and interest payments on outstanding indebtedness, current and anticipated tenant improvement or other capital obligations, the shareholder distribution required to maintain REIT status and compliance with financial covenants of our credit agreement for the next twelve months and beyond.

Our primary expected uses and sources of our consolidated cash and cash equivalents are as follows:

USES	SOURCES
Short-Term:	Short-Term:
Tenant improvement allowances	Operating cash flow
Improvements made to individual properties that are not recoverable through common area maintenance charges to tenants	Available borrowings under revolving credit facility
Distribution payments	Distribution reinvestment plan
Debt repayment requirements, including principal, interest and costs to refinance	Secured loans collateralized by individual properties
Corporate and administrative expenses	Asset sales
	Cash and cash equivalents
Long-Term:	Long-Term:
Acquisitions	Secured loans collateralized by individual properties
New development	Long-term construction project financing
Major redevelopment, renovation or expansion programs at individual properties	Joint venture equity from institutional partners

Sales of marketable securities

Debt repayment requirements, including both principal and interest

Asset sales

One of our main areas of focus over the last several years has been on strengthening our balance sheet and addressing debt maturities. We have pursued this goal through a combination of the refinancing or repayment of maturing debt, a reduction in our distribution rate to shareholders as compared to distributions from a few years ago, the suspension of our share repurchase program and total or partial dispositions of assets through sales or contributions to joint ventures. In addition, we focused on controlling operating expenses and deferring certain discretionary capital expenditures to preserve cash. As of June 30, 2011, we had approximately \$766,862 of debt scheduled to mature through the end of 2012. As of October 3, 2011, we had repaid or received debt forgiveness for \$133,772 of that debt. For substantially all of the remaining \$633,090 of debt, we plan on satisfying our obligations by refinancing this debt using either our senior secured credit facility or other new long-term borrowings. In certain circumstances, for non-recourse mortgage indebtedness, we may seek to negotiate a discounted payoff amount or satisfy our obligation by delivering the property to the lender. We may not be able to refinance our existing debt when it becomes due or to obtain new debt financing for acquisitions or

Table of Contents

development projects, or we may be forced to accept less favorable terms, including increased collateral to secure development projects, higher interest rates and/or more restrictive covenants. If we are not successful in refinancing our debt when it becomes due, we may default under our loan obligations, enter into foreclosure proceedings, or be forced to dispose of properties on disadvantageous terms, any of which might adversely affect our ability to service other debt and meet our other obligations.

Liquidity

The table below summarizes our consolidated indebtedness, net of premium and discount, at June 30, 2011:

Debt	Aggregate Principal Amount at June 30, 2011	Interest Rate/ Weighted Average Interest Rate	Years to Maturity/Weighted Average Years to Maturity
Mortgages payable	\$ 2,488,428	5.82%	6.5 years
IW JV mortgages payable	493,665	7.50%	8.4 years
IW JV senior mezzanine note	85,000	12.24%	8.4 years
IW JV junior mezzanine note	40,000	14.00%	8.4 years
Construction loans	81,004	3.68%	0.8 years
Mezzanine note	13,900	11.00%	2.5 years
Margin payable	8,499	0.54%	0.5 year
 Mortgages and notes payable	 3,210,496		
 Secured credit facility	 435,000	 3.78%	 1.6 years
 Total consolidated indebtedness	 \$ 3,645,496		

Mortgages Payable and Construction Loans

Mortgages payable outstanding as of June 30, 2011, including construction loans and IW JV mortgages payable which are discussed further below, were \$3,063,097 and had a weighted average interest rate of 6.04% at June 30, 2011. Of this amount, \$2,974,917 had fixed rates ranging from 4.54% to 8.00% (10.00% for matured mortgages payable) and a weighted average fixed rate of 6.10% at June 30, 2011. The remaining \$88,180 of mortgages payable represented variable rate loans with a weighted average interest rate of 3.95% at June 30, 2011. Properties with a net carrying value of \$4,618,471 at June 30, 2011 and related tenant leases are pledged as collateral for the mortgage loans and wholly-owned and consolidated joint venture properties with a net carrying value of \$132,745 at June 30, 2011 and related tenant leases are pledged as collateral for the construction loans. Generally, other than IW JV mortgages payable, our mortgages payable are secured by individual properties or small groups of properties. As of June 30, 2011, scheduled maturities for our outstanding mortgage indebtedness had various due dates through June 1, 2041.

During the six months ended June 30, 2011, we obtained mortgages proceeds of \$70,424, made mortgages payable repayments of \$415,190 and received debt forgiveness of \$14,438. The new mortgages payable that we entered into during the six months ended June 30, 2011 have interest rates ranging from 4.54% to 5.50% and maturities up to 30 years. The stated interest rates of the loans repaid during the six months ended June 30, 2011 ranged from 4.44% to 8.00%. We also entered into modifications of two existing loan agreements which extended the maturities of \$16,239 of mortgages payable to May 1, 2014.

IW JV Mortgages Payable and Mezzanine Notes

On November 29, 2009, we transferred a portfolio of 55 investment properties and the entities which owned them into IW JV, which at the time was a newly formed wholly-owned subsidiary. Subsequently, in connection with a \$625,000 debt refinancing transaction, which consisted of \$500,000 of mortgages payable and \$125,000 of notes payable, on December 1, 2009, we raised additional capital of \$50,000 from a related party, Inland Equity,

Table of Contents

in exchange for a 23% noncontrolling interest in IW JV. We currently anticipate using a portion of net proceeds from this offering to repurchase Inland Equity's interest in IW JV. As a result, following this offering we will own 100% of IW JV. Inland Equity is owned by certain individuals, including Daniel L. Goodwin, who beneficially owns more than 5% of our common stock, and Robert D. Parks, who was the Chairman of our Board until October 12, 2010 and who is Chairman of the Board of certain affiliates of The Inland Group, Inc. The independent directors committee reviewed and recommended approval of this transaction to our board of directors.

Mezzanine Note and Margin Payable

During the year ended December 31, 2010, we borrowed \$13,900 from a third party in the form of a mezzanine note and used the proceeds as a partial paydown of the mortgage payable, as required by the lender. The mezzanine note bears interest at 11.00% and matures on December 16, 2013. Additionally, we purchase a portion of our securities through a margin account. As of June 30, 2011 and December 31, 2010, we had recorded a payable of \$8,499 and \$10,017, respectively, for securities purchased on margin. This debt bears a variable interest rate of LIBOR plus 35 basis points. At June 30, 2011, this rate was equal to 0.54%. This debt is due upon demand. The value of our marketable securities serves as collateral for this debt. During the six months ended June 30, 2011, we did not borrow on our margin account and paid down \$1,518.

Senior Secured Line of Credit and Secured Term Loan

As of December 31, 2010, we had a credit agreement with KeyBank National Association and other financial institutions for borrowings up to \$200,000, subject to a collateral pool requirement. The credit agreement had a maturity date of October 14, 2011. The outstanding balance on the line of credit at December 31, 2010 and December 31, 2009 was \$154,347 and \$107,000, respectively.

On February 4, 2011, we amended and restated our existing credit agreement to provide for a senior secured credit facility in the aggregate amount of \$585,000, consisting of a \$435,000 senior secured revolving line of credit and a \$150,000 secured term loan from a number of financial institutions. The senior secured revolving line of credit also contains an accordion feature that allows us to increase the availability thereunder to up to \$500,000 in certain circumstances.

Upon closing, we borrowed the full amount of the term loan and, as of June 30, 2011 and October 3, 2011, we had a total of \$285,000 and \$320,000 outstanding under the senior secured line of credit, respectively. The amount outstanding as of October 3, 2011 includes \$154,347 that had been outstanding under our line of credit prior to the amendment and restatement of our credit agreement and \$165,653 of additional borrowings. We used the secured term loan and the additional borrowings under our senior secured revolving line of credit to, among other things, repay \$527,602 of mortgage debt, including debt forgiveness of \$14,438, that was secured by 36 properties (including one partial property) and had a weighted average interest rate of 5.13% per annum. As of June 30, 2011, management believes we were not out of compliance with any financial covenants under the credit agreement.

Availability. The aggregate availability under the senior secured revolving line of credit shall at no time exceed the lesser of (x) 65% of the appraised value of the borrowing base properties through the date of the issuance of our financial statements for the quarter ending March 31, 2012 and 60% thereafter and (y) the amount that would result in a debt service coverage ratio for the borrowing base properties of not less than 1.50x through the date of the issuance of our financial statements for the quarter ending March 31, 2012 and 1.60x thereafter, in each case, less the outstanding balance under the secured term loan. As of October 3, 2011, the total availability under the senior secured revolving line of credit was \$417,000, of which we had borrowed \$320,000.

Maturity and Interest. The senior secured revolving line of credit and the secured term loan mature on February 3, 2013; with a one-year extension option that we may exercise as long as there is no existing default, we are in compliance with all covenants and we pay an extension fee. The senior secured revolving line of credit

Table of Contents

and the secured term loan bear interest at a rate per annum equal to the London Interbank Offered Rate, or LIBOR, plus a margin of between 2.75% and 4.00% based on our leverage ratio as calculated under the credit agreement. As of October 3, 2011, the interest rate under the senior secured revolving line of credit and the secured term loan was 3.75%.

Security. The senior secured revolving line of credit and secured term loan are secured by mortgages on the borrowing base properties and are our direct recourse obligation.

Financial Covenants. The senior secured revolving line of credit and secured term loan include the following financial covenants: (i) maximum leverage ratio not to exceed 67.5%, which ratio will be reduced to 65% beginning on the date of the issuance of our financial statements for the quarter ending December 31, 2011 and 60% beginning on the date of the issuance of our financial statements for the quarter ending June 30, 2012, (ii) minimum fixed charge coverage ratio of not less than 1.40x, which ratio will be increased to 1.45x beginning on the date of the issuance of our financial statements for the quarter ending December 31, 2011 and 1.50x beginning on the date of the issuance of our financial statements for the quarter ending December 31, 2012, (iii) consolidated net worth of not less than \$1,750,000 plus 75% of the net proceeds of any future equity contributions or sales of treasury stock received by us (iv) minimum average economic occupancy rate of greater than 80% excluding pre-stabilization properties under construction, (v) unhedged variable rate debt of not more than 20% of total asset value, (vi) maximum dividend payout ratio of 95% of FFO as defined in the credit agreement (which equals FFO, as set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations Funds from Operations, excluding gains or losses from extraordinary items, impairments and other non-cash charges) or an amount necessary to maintain REIT status and (vii) secured recourse indebtedness and guarantee obligations excluding the senior secured revolving line of credit and secured term loan may not exceed \$100,000.

As of June 30, 2011, our leverage ratio and fixed charge coverage ratio, calculated in accordance with the terms of the senior secured revolving line of credit and secured term loan, are 64.22% and 1.53x, respectively. These ratios are presented solely for the purpose of demonstrating contractual covenant compliance, and should not be viewed as measures of our historical or future financial performance, financial position or cash flow.

Other Covenants and Events of Default. The senior secured revolving line of credit and secured term loan limit the percentage of our total asset value that may be invested in unimproved land, unconsolidated joint ventures, construction in progress and mortgage notes receivable, require that we obtain consent for any sale of assets with a value greater than 10% of our total asset value or merger resulting in an increase to our total asset value by more than 25% and contain other customary covenants. The senior secured revolving line of credit and secured term loan also contain customary events of default, including but not limited to, non-payment of principal, interest, fees or other amounts, breaches of covenants, defaults on any recourse indebtedness in excess of \$20,000 or any non-recourse indebtedness in excess of \$100,000 in the aggregate (subject to certain carveouts, including \$26,865 of non-recourse indebtedness that is currently in default), failure of certain members of management (or a reasonably satisfactory replacement) to continue to be active on a daily basis in our management and bankruptcy or other insolvency events.

Table of Contents*Debt Maturities*

The following table shows the scheduled maturities of mortgages payable, notes payable, margin payable and the secured credit facility as of June 30, 2011 for the remainder of 2011, each of the next four years and thereafter and does not reflect the impact of any debt activity that occurred after June 30, 2011:

	2011	2012	2013	2014	2015	Thereafter	Total	Fair Value
Maturing debt⁽¹⁾:								
Fixed rate debt:								
Mortgages payable ⁽²⁾	\$ 270,563	\$ 399,620	\$ 310,810	\$ 240,057	\$ 468,684	\$ 1,275,806	\$ 2,965,540	\$ 3,142,618
Notes payable			13,900			125,000	138,900	159,788
Total fixed rate debt	\$ 270,563	\$ 399,620	\$ 324,710	\$ 240,057	\$ 468,684	\$ 1,400,806	\$ 3,104,440	\$ 3,302,406
Variable rate debt:								
Mortgages payable	\$ 62	\$ 88,118	\$	\$	\$	\$	\$ 88,180	\$ 88,180
Secured credit facility			435,000				435,000	435,000
Margin payable	8,499						8,499	8,499
Total variable rate debt	8,561	88,118	435,000				531,679	531,679
Total maturing debt	\$ 279,124	\$ 487,738	\$ 759,710	\$ 240,057	\$ 468,684	\$ 1,400,806	\$ 3,636,119	\$ 3,834,085
Weighted average interest rate on debt:								
Fixed rate debt	5.67%	5.39%	5.55%	7.12%	5.78%	7.09%		
Variable rate debt	0.58%	3.95%	3.78%					
Total	5.51%	5.13%	4.53%	7.12%	5.78%	7.09%		

(1) The debt maturity table does not include any premiums or discounts, of which \$11,625 and \$(2,248), net of accumulated amortization, respectively, is outstanding as of June 30, 2011.

(2) Includes \$67,504 of variable rate debt that was swapped to a fixed rate.

The maturity table excludes other financings and the co-venture obligation (see Note 1 to the condensed consolidated financial statements and Notes 1 and 10 to the consolidated financial statements). The maturity table also excludes accelerated principal payments that may be required as a result of covenants or conditions included in certain loan agreements due to the uncertainty in the timing and amount of these payments. In these cases, the total outstanding mortgage payable is included in the year corresponding to the loan maturity date or, if the mortgage payable is amortizing, the payments are presented in accordance with the loan's original amortization schedule. As of June 30, 2011, we were making accelerated principal payments on two mortgages payable with a combined outstanding principal balance of \$97,596, which are reflected in the year corresponding to the loan maturity date.

Table of Contents

As of June 30, 2011, we had \$63,869 of mortgages payable that had matured and had not been repaid or refinanced. During the second quarter of 2010, in order to prompt discussions with the lender, we ceased making the monthly debt service payment on a \$29,965 mortgage loan. That loan has matured and the \$26,865 that was outstanding at June 30, 2011 is included in the \$63,869 of total matured debt. The non-payment of this monthly debt service amounts to \$1,311 annualized and does not result in noncompliance under any of our other mortgages payable and secured credit agreements. We have attempted to negotiate and have made offers to the lender to determine an appropriate course of action under the non-recourse loan agreement; however no assurance can be provided that negotiations will result in a favorable outcome. The lender has asserted that certain events have occurred that trigger recourse to us. However, we believe that we have substantive defenses with respect to those claims. In addition, we ceased making the monthly debt service payment on a \$4,520 non-recourse loan during the three months ended June 30, 2011. Negotiations with the lender are ongoing; however, no assurance can be provided that these negotiations will result in a favorable outcome. As of June 30, 2011, in addition to the \$63,869 that had matured, we had \$193,587 of mortgages payable, excluding principal amortization, maturing in the remainder of 2011. The following table sets forth our progress through October 3, 2011 in addressing 2011 maturities:

	Matured as of June 30, 2011	Maturing in Remainder of 2011
Repaid or received debt forgiveness and added the underlying property as collateral to the senior secured credit facility	\$	\$ 120,937
Other repayments	1,584	3,950
Loan extended and expected to be repaid in 2011	5,336	
Total addressed subsequent to June 30, 2011	6,920	124,887
Expected to be repaid and the underlying property will be added as collateral to the senior secured credit facility in 2011		68,700 ⁽²⁾
Actively marketing to sell or refinance related properties, or otherwise negotiating with lender	56,949 ⁽¹⁾	
	\$ 63,869	\$ 193,587

- (1) We have attempted to negotiate and have made offers to the lender with respect to a \$26,865 mortgage loan outstanding at June 30, 2011 to determine an appropriate course of action under the non-recourse loan agreement. No assurance can be provided that these negotiations will result in favorable outcomes for us. The lender has asserted that certain events have occurred that trigger recourse to us; however, we believe that we have substantive defenses with respect to those claims.
- (2) On October 1, 2011, an additional mortgage payable with an outstanding principal balance of \$68,700 matured; however, we have executed a 30-day forbearance agreement at which time we expect the mortgage will be repaid and the property will be added as collateral to the senior secured credit facility.

We continue to pursue opportunities with the nation's largest banks, life insurance companies, regional and local banks, and believe we have demonstrated reasonable success in addressing our maturing debt.

Distributions and Equity Transactions

Our distributions of current and accumulated earnings and profits for federal income tax purposes are generally taxable to shareholders as ordinary income. Distributions in excess of these earnings and profits generally are treated as a non-taxable reduction of the shareholders' basis in their shares to the extent thereof (a return of capital) and thereafter as taxable gain. The distributions in excess of earnings and profits will have the effect of deferring taxation on the amount of the distribution until the sale of the shareholders' shares. The balance of the distribution constitutes ordinary income (or, in the case of capital gains dividends, long-term

Table of Contents

capital gains). We intend to continue to qualify as a REIT for U.S. federal income tax purposes. The Code generally requires that a REIT distribute annually at least 90% of its REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gain, in order to qualify as a REIT, and the Code generally taxes a REIT on any retained income.

To satisfy the requirements for qualification as a REIT and generally not be subject to U.S. federal income and excise tax, we intend to make regular quarterly distributions of all or substantially all of our REIT taxable income to holders of our common stock out of assets legally available for such purposes. Our future distributions will be at the sole discretion of our board of directors. When determining the amount of future distributions, we expect that our board of directors will consider, among other factors, (i) the amount of cash generated from our operating activities, (ii) our expectations of future cash flows, (iii) our determination of near-term cash needs for debt repayments, existing or future share repurchases, and selective acquisitions of new properties, (iv) the timing of significant re-leasing activities and the establishment of additional cash reserves for anticipated tenant improvements and general property capital improvements, (v) our ability to continue to access additional sources of capital, (vi) the amount required to be distributed to maintain our status as a REIT and to reduce any income and excise taxes that we otherwise would be required to pay and (vii) any limitations on our distributions contained in our credit or other agreements, including, without limitation, in our senior secured revolving line of credit and secured term loan, which limit our distributions to the greater of 95% of FFO as defined in the credit agreement (which equals FFO, as set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations Funds from Operations, excluding gains or losses from extraordinary items, impairments and other non-cash charges) or the amount necessary for us to maintain our qualification as a REIT. Under certain circumstances, we may be required to make distributions in excess of cash available for distribution in order to meet the REIT distribution requirements.

As part of the strengthening of our balance sheet over the past few years, we have reduced the rate of our distributions to shareholders as compared to distribution rates from a few years ago. However, we have steadily increased the quarterly distribution rate and the distribution declared for the second quarter of 2011 represents the seventh consecutive quarterly increase. The following table sets forth the amount of our distributions declared during the six months ended June 30, 2011 and 2010 and for the years ended December 31, 2010, 2009 and 2008 compared to cash flows provided by operating activities for each of these periods:

	Six Months Ended June 30,		Year Ended December 31,		
	2011	2010	2010	2009	2008
Cash flows provided by operating activities	\$ 85,011	\$ 94,011	\$ 184,072	\$ 249,837	\$ 309,351
Distributions declared	58,464	43,480	94,579	75,040	308,798
Excess	\$26,547	\$ 50,531	\$ 89,493	\$ 174,797	\$ 553

Effective November 19, 2008, the board of directors voted to suspend our share repurchase program. Upon completion of this offering our share repurchase program will be terminated as our shares of Class A Common Stock will be listed on the NYSE.

We maintain a distribution reinvestment program, or DRP, which allows our shareholders who have purchased shares in our offerings to automatically reinvest distributions by purchasing additional shares from us. Such purchases under our DRP are not subject to brokerage commission fees or service charges. As of June 30, 2011, we had issued approximately 73,800 shares pursuant to the DRP for an aggregate amount of \$696,850. During the six months ended June 30, 2011, we received \$21,347 in investor proceeds through our DRP.

Capital Expenditures and Development Joint Venture Activity

We anticipate that capital demands to meet obligations related to capital improvements with respect to properties will be minimal for the foreseeable future (as many of our properties have recently been constructed or renovated) and can be met with funds from operations and working capital.

Table of Contents

The following table provides summary information regarding our consolidated and unconsolidated properties under development as of June 30, 2011. As of June 30, 2011, we did not have significant active construction ongoing at our development properties, and, currently, we only intend to develop the remaining estimated total GLA to the extent that we have pre-leased the space to be developed. If we were to pre-lease all of the remaining estimated GLA, we estimate that the total remaining costs to complete the development of this space would be \$16,750, which we expect to fund through construction loans and proceeds of potential sales of our Bellevue Mall and South Billings Center development properties. As of June 30, 2011, the annualized base rent from the portion of our development properties with respect to which construction has been completed was \$994.

Development	Estimated Stabilization Date⁽¹⁾	Percent Owned	Current GLA⁽²⁾	Percent Leased⁽³⁾⁽⁴⁾	Estimated Total GLA⁽³⁾	Carrying Value⁽⁵⁾	Construction Loan Balance
Properties/Location							
Consolidated:							
Green Valley Crossing/ Henderson, NV	2014	50.0%	183,062	98.1%	272,445	25,860	11,350
Bellevue Mall/ Nashville, TN ⁽⁶⁾		100.0%				26,448	
South Billings Center/ Billings, MT ⁽⁶⁾		49.0%	215,000	100.0%	215,000	5,063	
Unconsolidated:							
Hampton Retail Colorado/ Denver, CO ⁽⁷⁾⁽⁸⁾	2013	95.8%	93,216		93,216	3,791	4,031
Total			491,278	80.3%	580,661	\$ 61,162	\$ 15,381

(1) Estimated stabilization date represents the date by which we currently estimate that leases with respect to 90% of the estimated total GLA will have commenced.

(2) Represents GLA with respect to which construction had been completed as of June 30, 2011.

(3) Includes space developed for shadow anchors.

(4) Represents the percentage of current GLA with respect to which leases had commenced as of June 30, 2011.

(5) Represents the carrying value of each property as of June 30, 2011, which was the total investment less accumulated depreciation through June 30, 2011.

(6) South Billings Center is entitled for an estimated total GLA of 404,800 square feet and Bellevue Mall is entitled for an estimated total GLA of 1,015,000 square feet. Currently, we are evaluating numerous options to maximize the development potential of each asset.

(7) Represents the carrying value of the two properties under development held by the joint venture, which was the total investment less accumulated depreciation through June 30, 2011. There is an additional \$18.0 million of carrying value related to four operational properties held by the joint venture.

(8) The construction loan balance is only the portion related to two properties under development held by the joint venture. There is an additional \$16.4 million construction loan related to four operational properties held by the joint venture.

Asset Disposition and Operating Joint Venture Activity

During the six months ended June 30, 2011 and for the years ended December 31, 2010 and 2009 our asset sales and partial sales of assets to operating joint ventures were an integral factor in our deleveraging and recapitalization efforts. The following table highlights the results of our asset dispositions, including partial sales; during the six months ended June 30, 2011, and for the years ended December 31, 2010 and 2009:

	Number of Assets Sold	Square Footage	Combined Sales Price	Total Debt Extinguished	Net Sales Proceeds
