**Table of Contents****NORTHWEST PIPE COMPANY****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

(Unaudited)

**1. Basis of Presentation**

The Condensed Consolidated Financial Statements include the accounts of Northwest Pipe Company (the Company) and its subsidiaries in which the Company exercises control as of the financial statement date. Intercompany accounts and transactions have been eliminated.

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. The financial information as of December 31, 2011 is derived from the audited consolidated financial statements presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2011 (the 2011 Form 10-K). Certain information or footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). In the opinion of management, the accompanying condensed consolidated financial statements include all adjustments necessary (which are of a normal and recurring nature) for the fair statement of the results of the interim periods presented. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto together with management's discussion and analysis of financial condition and results of operations contained in the Company's 2011 Form 10-K.

Operating results for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for the entire fiscal year ending December 31, 2012.

**2. Inventories**

Inventories are stated at the lower of cost or market and consist of the following (in thousands):

	March 31, 2012	December 31, 2011
Short-term inventories:		
Raw materials	\$ 54,833	\$ 65,511
Work-in-process	3,576	3,543
Finished goods	37,087	35,000
Supplies	3,116	3,115
	98,612	107,169
Long-term inventories:		
Finished goods	2,684	2,401
Total inventories	\$ 101,296	\$ 109,570

Long-term inventories are recorded in other assets. The lower of cost or market adjustment was \$3.0 million at March 31, 2012 and \$3.4 million at December 31, 2011.

**3. Fair Value Measurements**

## Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

The Company records its financial assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability, in the principal or most advantageous market for the asset or liability, in an orderly transaction between market participants at the measurement date.

The authoritative guidance establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. These levels are: Level 1 (inputs are quoted prices in active markets for identical assets or liabilities); Level 2 (inputs are other than quoted prices that are observable, either directly or indirectly through corroboration with observable market data); and Level 3 (inputs are unobservable, with little or no market data that exists, such as internal financial forecasts). The Company is required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

**Table of Contents**

The following table summarizes information regarding the Company's financial assets and financial liabilities that are measured at fair value (in thousands):

<b>Description</b>	<b>Balance at March 31, 2012</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
<b>Financial Assets</b>				
Escrow account	\$ 897	\$ 897	\$	\$
Deferred compensation plan assets	4,616	4,616		
Derivatives	4		4	
<b>Total Assets</b>	<b>\$ 5,517</b>	<b>\$ 5,513</b>	<b>\$ 4</b>	<b>\$</b>
<b>Financial Liabilities</b>				
Derivatives	\$ (213)	\$	\$ (213)	\$

<b>Description</b>	<b>Balance at December 31, 2011</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
<b>Financial Assets</b>				
Escrow account	\$ 897	\$ 897	\$	\$
Deferred compensation plan assets	4,575	4,575		
Derivatives	153		153	
<b>Total Assets</b>	<b>\$ 5,625</b>	<b>\$ 5,472</b>	<b>\$ 153</b>	<b>\$</b>
<b>Financial Liabilities</b>				
Derivatives	\$ (108)	\$	\$ (108)	\$

The escrow account, consisting of a money market mutual fund, is valued using quoted market prices in active markets classified as Level 1 within the fair value hierarchy. The deferred compensation plan assets consists of cash and several publicly traded stock and bond mutual funds, valued using quoted market prices in active markets classified as Level 1 within the fair value hierarchy. The Company's derivatives consist of foreign currency cash flow hedges and are valued using various pricing models or discounted cash flow analyses that incorporate observable market parameters, such as interest rate yield curves and currency rates, and are classified as Level 2 within the valuation hierarchy. Derivative valuations incorporate credit risk adjustments that are necessary to reflect the probability of default by the counterparty or the Company.

The net carrying amounts of cash and cash equivalents, trade and other receivables, accounts payable, accrued liabilities and note payable to financial institution approximate fair value due to the short-term nature of these instruments. The fair value of our debt is calculated using a coupon rate on borrowings with similar maturities, current remaining average life to maturity, borrower credit quality, and current market conditions, all of which are classified as Level 2 within the valuation hierarchy. The fair value of the Company's long-term debt, including the current portion, was \$13.6 million and the carrying value was \$15.0 million at March 31, 2012, and \$16.1 million with a carrying value of \$17.8 million at December 31, 2011.

**Financial Assets Measured and Recorded at Fair Value on a Non-Recurring Basis**

We measure our financial assets, including loans receivable and non-marketable equity method investments, at fair value on a non-recurring basis when they are determined to be other-than-temporarily impaired. The fair value of these assets is determined using Level 3 unobservable inputs due to the absence of observable market inputs and the valuations requiring management judgment. There were no impairment charges taken during the three months ended March 31, 2012 or March 31, 2011. All loans receivable are categorized as Level 3 in the fair value hierarchy.

**4. Derivative Instruments and Hedging Activities**

The Company conducts business in various foreign countries, and, from time to time, settles transactions in foreign currencies. The Company has established a program that utilizes foreign currency forward contracts to offset the risk associated with the effects of certain foreign currency exposures, typically arising from sales contracts denominated in Canadian currency. These derivative contracts are consistent with the Company's strategy for financial risk management. The Company uses cash flow hedge accounting treatment for qualifying foreign currency forward contracts. The Company initially reports any gain or loss on the effective portion of a cash flow hedge as a component of other comprehensive income and subsequently reclassifies any gain or loss to net sales when the hedged revenues are recorded. Instruments that do not qualify for cash flow hedge accounting treatment are re-measured at fair value on each balance sheet date and resulting gains and losses are recognized in net income. As of March 31, 2012 and December 31, 2011, the total notional amount of the derivative contracts not designated as hedges was \$1.1 million (CAD\$1.1 million) and \$1.5 million (CAD\$1.5 million), respectively. As of March 31, 2012 and December 31, 2011, the total notional amount of the derivative contracts designated as hedges was \$9.6 million (CAD\$9.5 million) and \$8.5 million (CAD\$8.6 million), respectively.

**Table of Contents**

For each derivative contract entered into in which the Company seeks to obtain cash flow hedge accounting treatment, the Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking the hedge transaction, the nature of the risk being hedged, how the hedging instrument's effectiveness in offsetting the hedged risk will be assessed prospectively and retrospectively, and a description of the method of measuring ineffectiveness. This process includes linking all derivatives to specific firm commitments or forecasted transactions and designating the derivatives as cash flow hedges. The Company also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative contracts that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. The effective portion of these hedged items is reflected in other comprehensive income. If it is determined that a derivative contract is not highly effective, or that it has ceased to be a highly effective hedge, the Company will be required to discontinue hedge accounting with respect to that derivative contract prospectively.

All of the Company's Canadian forward contracts have maturities not longer than 12 months at March 31, 2012, except one contract with a notional value of \$2.1 million (CAD\$2.1 million) which has a remaining maturity of 13 months.

The balance sheet location and the fair values of derivative instruments are (in thousands):

	<b>December 31, March 31, 2012</b>	<b>December 31, December 31, 2011</b>
<b>Foreign Currency Forward Contracts</b>		
<b>Assets</b>		
Derivatives designated as hedging instruments		
Prepaid expenses and other	\$	\$ 66
Derivatives not designated as hedging instruments		
Prepaid expenses and other	4	87
Total assets	\$ 4	\$ 153
<b>Liabilities</b>		
Derivatives designated as hedging instruments		
Accrued liabilities	\$ 59	\$ 23
Derivatives not designated as hedging instruments		
Accrued liabilities	154	85
Total liabilities	\$ 213	\$ 108

**Table of Contents**

The amounts of the gains and losses related to the Company's derivative contracts designated as hedging instruments for the three months ended March 31, 2012 and March 31, 2011 are (in thousands):

	March 31, 2012				
	Pretax Loss Recognized in Comprehensive Income on Effective Portion of Derivative	Location	Pretax Loss Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income	Location	Loss on Ineffective Portion of Derivative and Amount Excluded from Effectiveness Testing Recognized in Income
Derivatives in Cash Flow Hedging Relationships	Amount	Location	Amount	Location	Amount
Foreign currency forward contracts	\$ (101)	Net sales	\$ (15)	Net sales	\$ (1)

	March 31, 2011				
	Pretax Loss Recognized in Comprehensive Income on Effective Portion of Derivative	Location	Pretax Loss Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income	Location	Loss on Ineffective Portion of Derivative and Amount Excluded from Effectiveness Testing Recognized in Income
Derivatives in Cash Flow Hedging Relationships	Amount	Location	Amount	Location	Amount
Foreign currency forward contracts	\$ (253)	Net sales	\$ (248)	Net sales	\$ (25)

At March 31, 2012, there is \$28,000 of unrealized pretax loss on outstanding derivatives accumulated in other comprehensive loss, a majority of which is expected to be reclassified to net sales within the next 12 months as a result of underlying hedged transactions also being recorded in net sales.

For the three months ended March 31, 2012, losses from our derivative contracts not designated as hedging instruments recognized in net sales were \$0.1 million. For the three months ended March 31, 2011, losses from our derivative contracts not designated as hedging instruments recognized in net sales were \$0.2 million.

**5. Note Payable to Financial Institution**

At March 31, 2012, the Company had a \$115.0 million line of credit agreement, under which \$53.8 million was outstanding bearing interest at a weighted average rate of 2.89%. The Company had additional net borrowing capacity under the line of credit of \$58.0 million at March 31, 2012. The line of credit bears interest at rates related to LIBOR plus 2.50% to 4.50%, or the lending institution's prime rate plus 1.50% to 3.50%. We were able to borrow at LIBOR plus 2.5% under the credit agreement at March 31, 2012. During the first quarter of 2012, we entered into the Ninth Amendment to our Amended and Restated Credit Agreement ( "Credit Agreement" ). The Amendment extended the expiration date to April 30, 2013, set the aggregate commitment of the lenders at \$115 million, and made certain changes in the definition, method of calculation and amounts of certain covenants. The Company was in compliance with its financial covenants as of March 31, 2012.

**6. Commitments and Contingencies**  
**Class Action and Derivative Lawsuits**

On November 20, 2009, a complaint against the Company, captioned *Richard v. Northwest Pipe Co. et al.*, No. C09-5724 RBL ( Richard ), was filed in the United States District Court for the Western District of Washington. The plaintiff is allegedly a purchaser of the Company's stock. In addition to the Company, Brian W. Dunham, the Company's former President and Chief Executive Officer, and Stephanie J. Welty, the Company's former Chief Financial Officer, are named as defendants. The complaint alleges that defendants violated Section 10(b) of the Securities Exchange Act of 1934 by making false or misleading statements between April 23, 2008 and November 11, 2009. Plaintiff seeks to represent a class of persons who purchased the Company's stock during the same period, and seeks damages for losses caused by the alleged wrongdoing.

---

## **Table of Contents**

A similar complaint, captioned *Plumbers and Pipefitters Local Union No. 630 Pension-Annuity Trust Fund v. Northwest Pipe Co. et al.*, No. C09-5791 RBL ( Plumbers ), was filed against the Company in the same court on December 22, 2009. In addition to the Company, Brian W. Dunham, Stephanie J. Welty and William R. Tagmyer, the Company's current Chairman of the Board, are named as defendants in the Plumbers complaint. In the Plumbers complaint, as in the Richard complaint, the plaintiff is allegedly a purchaser of the Company's stock and asserts that defendants violated Section 10(b) of the Securities Exchange Act of 1934 by making false or misleading statements between April 23, 2008 and November 11, 2009. Plaintiff seeks to represent a class of persons who purchased the Company's stock during that period, and seeks damages for losses caused by the alleged wrongdoing.

The Richard action and the Plumbers action were consolidated on February 25, 2010. Plumbers and Pipefitters Local No. 630 Pension-Annuity Trust Fund was appointed lead plaintiff in the consolidated action. Defendants and lead plaintiff subsequently agreed that defendants did not need to respond immediately to either of the two outstanding complaints, and that a consolidated amended complaint would be filed within 45 days of the Company having completed the filing of the Quarterly Report on Form 10-Q for the quarter ended September 30, 2009 and the Annual Report on Form 10-K for the year ended December 31, 2009 with the SEC. A consolidated amended complaint was filed by the plaintiff on December 21, 2010, and our motion to dismiss was filed on February 25, 2011, as were similar motions filed by the individual defendants. Briefing on those motions concluded on May 24, 2011. On August 26, 2011, the Court denied all defendants' motions to dismiss, and the Company filed its answer to the consolidated amended complaint on October 24, 2011. The parties have conducted limited discovery and participated in an initial settlement mediation on January 30, 2012, with additional sessions anticipated in the future. By agreement of the parties, no further discovery will take place until after the mediation process is exhausted. The Company intends to vigorously defend itself against these claims. This securities litigation is at an early stage and, at this time, it is not possible to predict its outcome. Therefore, the Company has not accrued any charges related to this litigation.

On March 3, 2010, the Company was served with a derivative complaint, captioned *Ruggles v. Dunham et al.*, No. C10-5129 RBL ( Ruggles ), and filed in the United States District Court for the Western District of Washington. The plaintiff in this action is allegedly a current shareholder of the Company. The Company is a nominal defendant in this litigation. Plaintiff seeks to assert, on the Company's behalf, claims against Brian W. Dunham, Stephanie J. Welty, William R. Tagmyer, Keith R. Larson, Wayne B. Kingsley, Richard A. Roman, Michael C. Franson and Neil R. Thornton. The asserted basis of the claims is that defendants breached fiduciary duties to the Company by causing the Company to make improper statements between April 23, 2008 and August 7, 2009. Plaintiff seeks to recover, on the Company's behalf, damages for losses caused by the alleged wrongdoing.

On September 23, 2011, the Company was served with a derivative complaint, captioned *Grivich v. Dunham, et al.*, No. 11-2-03678-6 ( Grivich ), and filed in the Superior Court of Washington for Clark County. The plaintiff in this action is allegedly a current shareholder of the Company. The Company is a nominal defendant in this litigation. Plaintiff seeks to assert, on the Company's behalf, claims against Brian W. Dunham, Stephanie J. Welty, William R. Tagmyer, Keith R. Larson, Wayne B. Kingsley, Richard A. Roman, Michael C. Franson and Neil R. Thornton. The asserted basis of the claims is that defendants breached fiduciary duties to the Company between April 2, 2007 and the date of the Complaint. Plaintiff seeks to recover, on the Company's behalf, damages for losses caused by the alleged wrongdoing.

On October 14, 2011, another derivative complaint, captioned *Richard v. Dunham, et al.*, No. 11-2-04080-5 ( Richard Deriv. ), was filed in the Superior Court of Washington for Clark County. The plaintiff in this action is allegedly a current shareholder of the Company. The Company is a nominal defendant in this litigation. Plaintiff seeks to assert, on the Company's behalf, claims against Brian W. Dunham, Stephanie J. Welty, William R. Tagmyer, Keith R. Larson, Wayne B. Kingsley, Richard A. Roman, Michael C. Franson and Neil R. Thornton. The asserted basis of the claims is that defendants breached fiduciary duties to the Company between April 2, 2007 and the date of the Complaint. Plaintiff seeks to recover, on the Company's behalf, damages for losses caused by the alleged wrongdoing.

An amended complaint in the Ruggles action was filed on November 10, 2011, and the defendant responded to the complaint by filing a motion to dismiss, which motion is still pending. The derivative parties participated in the initial settlement mediation described above and will participate in any follow up sessions. It should also be noted that derivative claims by their nature do not seek to recover damages from the Company, but purport instead to seek to recover damages for the benefit of the Company. These cases are at a very early stage and, at this time, it is not possible to predict their outcome. Therefore, the Company has not accrued any charges related to them.

## **SEC Investigation**

On March 8, 2010, the staff of the Enforcement Division of the SEC advised our counsel that they had obtained a formal order of investigation with respect to matters related to the Audit Committee investigation. We are cooperating fully with the SEC in connection with these matters. We cannot predict if, when or how they will be resolved or what, if any, actions we may be required to take as part of any resolution of these matters. Any action by the SEC or other governmental agency could result in civil or criminal sanctions against us and/or certain of our current and former officers, directors and employees. It is not possible to predict the outcome of the investigation at this time. Therefore, we have not accrued any charges related to this investigation.

---

**Table of Contents****Other Matters**

On December 1, 2000, a section of the lower Willamette River known as the Portland Harbor was included on the National Priorities List at the request of the U.S. Environmental Protection Agency (the EPA). While the Company's Portland, Oregon manufacturing facility does not border the Willamette River, an outfall from the facility's stormwater system drains into a neighboring property's privately owned stormwater system and slip. Since the listing of the site, the Company was notified by the EPA and the Oregon Department of Environmental Quality (the ODEQ) of potential liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). In 2008, the Company was asked to file information disclosure reports with the EPA (CERCLA 104 (e) information request). By agreement with the EPA, the ODEQ is responsible for overseeing remedial investigation and source control activities for all upland sites to investigate sources and prevent future contamination to the river. A remedial investigation and feasibility study (RI/FS) of the Portland Harbor is currently being directed by a group of potentially responsible parties known as the Lower Willamette Group (the LWG). The Company made a payment of \$175,000 to the LWG in June 2007 as part of an interim settlement, and is under no obligation to make any further payment. A draft remedial investigation report was submitted to the EPA by the LWG in the fall of 2009; the final draft remedial investigation was submitted to the EPA in fall of 2011. The draft feasibility study was submitted in March 2012.

In 2001, groundwater containing elevated volatile organic compounds (VOCs) was identified in one localized area of leased property adjacent to the Portland facility furthest from the river. Assessment work in 2002 and 2003 to further characterize the groundwater was consistent with the initial conclusion that the source of the VOCs is located off of Company-owned property. In February 2005, the Company entered into a Voluntary Agreement for Remedial Investigation and Source Control Measures (Agreement) with the ODEQ. The Company is one of many Upland Source Control Sites working with the ODEQ on Source Control and is considered a medium priority site by ODEQ. The Company performed Remedial Investigation work required under the Agreement and submitted a draft Remedial Investigation/Source Control Evaluation Report in December 2005. The conclusions of the report indicated that the VOCs found in the groundwater do not present an unacceptable risk to human or ecological receptors in the Willamette River. The report also indicated there is no evidence at this time showing a connection between detected VOCs in groundwater and Willamette River sediments. In 2009, the ODEQ requested that the Company revise its Remedial Investigation/Source Control Evaluation Report from 2005 to include recent information from focused supplemental sampling at the Portland facility and more recent information that has become available related to nearby properties. The Company expects to submit an Expanded Risk Assessment for the VOCs in Groundwater following the completion of a paving project at the Portland facility.

Also, based on sampling associated with the Portland facility's remedial investigation and on sampling and reporting required under the Portland, Oregon manufacturing facility's National Pollutant Discharge Elimination System permit for storm water, the Company and the ODEQ have periodically detected low concentrations of polynuclear aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and trace amounts of zinc in storm water. Storm water from the Portland, Oregon manufacturing facility site is discharged into a communal storm water system that ultimately discharges into the neighboring property's privately owned slip. The slip was historically used for shipbuilding and subsequently for ship breaking and metal recycling. Studies of the river sediments have revealed concentrations of PAHs, PCBs and zinc, along with other constituents which are common constituents in urban storm water discharges. To minimize the zinc traces in its storm water, the Company painted a substantial part of the Portland facility's roofs. In June 2009, under the ODEQ Agreement, the Company submitted a Final Supplemental Work Plan to evaluate and assess soil and storm water, and further assess groundwater risk. In May 2010, the Company submitted a remediation plan related to soil contamination, which ODEQ approved in August 2010. Since August 2010, the Company has been engaged in performing the approved remediation plan which has included an upgrade to the fuel and waste storage systems (completed in the fourth quarter of 2011) and a storm water filtration system (completed in the first quarter of 2012). The remediation plan also required the excavation of a localized soil area to remove soil containing PAHs (completed in the third quarter of 2011). During the localized soil excavation in the third quarter of 2011, additional stained soil was discovered, and at the request of ODEQ, the Company developed an additional Work Plan to characterize the nature and extent of soil and/or groundwater impacts from the staining. The Company plans to implement this Work Plan in the second and third quarter of 2012. The Company expects to spend approximately \$1.7 million in 2012 to complete the work specified in the Work Plans.

Concurrent with the activities of the EPA and the ODEQ, the Portland Harbor Natural Resources Trustee Council (Trustees) sent some or all of the same parties, including the Company, a notice of intent to perform a Natural Resource Damage Assessment (NRDA) for the Portland Harbor Site to determine the nature and extent of natural resource damages under CERCLA section 107. The Trustees for the Portland Harbor Site consist of representatives from several Northwest Indian Tribes, three federal agencies and one state agency. The Trustees act independently of the EPA and the ODEQ. In 2009, the Trustees completed phase one of their three-phase NRDA. Phase one of the NRDA consisted of environmental studies to fill gaps in the information available from the EPA, and development of a framework for evaluating, quantifying and determining the extent of injuries to the natural resource. Phase two of the NRDA began in 2010 and consists largely of implementing the framework developed in phase one.

## **Table of Contents**

The Trustees have encouraged potentially responsible parties to voluntarily participate in the funding of their injury assessments and several of those parties have agreed to do so. In 2009, one of the Tribal Trustees (the Yakima Nation) resigned and has requested funding from the same parties to support its own assessment. The Company has not assumed any payment obligation or liability related to either request. The extent of the Company's obligation with respect to Portland Harbor matters is not known, and no further adjustment to the consolidated financial statements has been recorded as of March 31, 2012.

We operate our facilities under numerous governmental permits and licenses relating to air emissions, storm water run-off, and other environmental matters. Our operations are also governed by many other laws and regulations, including those relating to workplace safety and worker health, principally the Occupational Safety and Health Act and regulations there under which, among other requirements, establish noise and dust standards. We believe we are in material compliance with our permits and licenses and these laws and regulations, and we do not believe that future compliance with such laws and regulations will have a material adverse effect on our financial position, results of operations or cash flows.

From time to time, the Company is involved in litigation relating to claims arising out of its operations in the normal course of its business. The Company maintains insurance coverage against potential claims in amounts that are believed to be adequate. The Company believes that it is not presently a party to any other litigation, the outcome of which would have a material adverse effect on its business, financial condition, results of operations or cash flows.

## **Guarantees**

The Company has entered into certain stand-by letters of credit that total \$3.2 million at March 31, 2012. The stand-by letters of credit relate to workers' compensation insurance and equipment financing.

## **7. Segment Information**

The Company's operations are organized in two reportable segments, the Water Transmission Group and the Tubular Products Group, which are based on the nature of the products and the manufacturing process. The Water Transmission Group manufactures large-diameter, high-pressure steel pipeline systems for use in water infrastructure applications, primarily related to drinking water systems. These products are also used for hydroelectric power systems, wastewater systems and other applications. In addition, the Water Transmission Group makes products for industrial plant piping systems and certain structural applications. The Tubular Products Group manufactures and markets smaller diameter, electric resistance welded steel pipe used in a wide range of applications, including energy, construction, agriculture and industrial systems. The Tubular Products Group also manufactured and marketed welded steel pipe used in traffic signpost applications through June 1, 2011. These two segments represent distinct business activities, which management evaluates based on segment gross profit and operating income. Transfers between segments in the periods presented were not material.

**Table of Contents**

	<b>Three months ended March 31,</b>	
	<b>2012</b>	<b>2011</b>
	<b>(in thousands)</b>	
<b>Net sales:</b>		
Water Transmission	\$ 58,431	\$ 58,645
Tubular Products	83,744	52,813
<b>Total</b>	<b>\$ 142,175</b>	<b>\$ 111,458</b>
<b>Gross profit:</b>		
Water Transmission	\$ 9,699	\$ 9,894
Tubular Products	6,801	4,874
<b>Total</b>	<b>\$ 16,500</b>	<b>\$ 14,768</b>
<b>Operating income (loss):</b>		
Water Transmission	\$ 8,024	\$ 8,261
Tubular Products	6,196	3,849
Corporate	(5,041)	(4,631)
<b>Total</b>	<b>\$ 9,179</b>	<b>\$ 7,479</b>

**8. Share-based Compensation**

The Company has one active stock incentive plan for employees and directors, the 2007 Stock Incentive Plan, which provides for awards of stock options to purchase shares of common stock, stock appreciation rights, restricted and unrestricted shares of common stock, restricted stock units and performance awards. In addition, the Company has two inactive stock option plans, the 1995 Stock Option Plan for Nonemployee Directors and the Amended 1995 Stock Incentive Plan, under which previously granted options remain outstanding.

The Company recognizes compensation cost as service is rendered based on the fair value of the awards. The following summarizes share-based compensation expense recorded (in thousands):

	<b>Three months ended March 31,</b>	
	<b>2012</b>	<b>2011</b>
Cost of sales	\$ 85	\$ 5
Selling, general and administrative expenses	494	213
<b>Total</b>	<b>\$ 579</b>	<b>\$ 218</b>

As of March 31, 2012, unrecognized compensation expense related to the unvested portion of the Company's restricted stock units and performance awards was \$2.3 million which is expected to be recognized over a weighted average period of 1.3 years.

**Table of Contents****Stock Option Awards**

A summary of the status of the Company's stock options as of March 31, 2012 and changes during the three months then ended is presented below:

	Options Outstanding	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value (In thousands)
Balance, January 1, 2012	71,597	\$ 21.26		
Options granted				
Options exercised or exchanged	(12,798)	17.90		
Options canceled				
Balance, March 31, 2012	58,799	22.00	4.58	\$ 138
Exercisable, March 31, 2012	58,799	22.00	4.58	\$ 138

The total intrinsic value, defined as the difference between the current market value and the grant price, of options exercised or exchanged during the three months ended March 31, 2012 was \$67,000.

**Restricted Stock Units and Performance Awards**

A summary of the status of the Company's restricted stock units and performance awards as of March 31, 2012 and changes during the three months then ended is presented below:

	Number of Restricted Stock Units and Performance Awards	Weighted Average Grant Date Fair Value
Unvested restricted stock units and performance awards at January 1, 2012	193,981	\$ 24.41
Restricted stock units and performance awards granted		
Restricted stock units and performance awards vested	(20,840)	22.95
Restricted stock units and performance awards canceled	(29,827)	30.02
Unvested restricted stock units and performance awards at March 31, 2012	143,314	23.45

Restricted stock units (RSU's) and performance stock awards (PSA's) are measured at the estimated fair value on the date of grant. RSU's are service-based awards and vest according to vesting schedules, which range from immediate to ratably over a three-year period. PSAs are service-based awards with a market-based vesting condition. Vesting of the market-based PSAs is dependent upon the performance of the market price of the Company's stock relative to a peer group of companies and ranges from two to three years. The unvested balance of restricted stock units and performance awards at March 31, 2012 includes approximately 92,000 PSAs included at a target level. The vesting of these awards is subject to the achievement of specified market-based conditions, and the actual number of common shares that will ultimately be issued will be determined by multiplying this number of PSAs by a payout percentage ranging from 0% to 200%.

**9. Income Taxes**

The Company files income tax returns in the United States Federal jurisdiction, in a limited number of foreign jurisdictions, and in many state jurisdictions. The Company is currently under examination by the Internal Revenue Service for years 2009 and 2010. With few exceptions, the Company is no longer subject to U.S. Federal, state or foreign income tax examinations for years before 2008.

The Company had \$534,000 and \$309,000 of unrecognized tax benefits at March 31, 2012 and December 31, 2011, respectively. The Company believes it is reasonably possible that the total amounts of unrecognized tax benefits will change by approximately \$400,000 in the following twelve months, related to the anticipated settlement of certain matters arising from the Company's former investment in Northwest Pipe Asia Pte. Ltd. ( NWPAA ) and the Company's defined benefit pension plans; however, actual results could differ from those currently expected.

**Table of Contents**

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. The Company provided for income taxes at estimated effective tax rates of 37.2% and 38.3% for the three month periods ended March 31, 2012 and March 31, 2011, respectively.

**10. Earnings per Share**

Earnings per basic and diluted weighted average common share outstanding was calculated as follows for the three months ended March 31, 2012 and 2011:

	<b>Three Months Ended March 31,</b>	
	<b>2012</b>	<b>2011</b>
Net income (in thousands)	\$ 4,734	\$ 2,932
Basic weighted-average common shares outstanding	9,369,088	9,304,481
Effect of potentially dilutive common shares <sup>(1)</sup>	43,078	39,339
Diluted weighted-average common shares outstanding	9,412,166	9,343,820
<b>Earnings per common share:</b>		
Earnings per basic common share	\$ 0.51	\$ 0.32
Earnings per diluted common share	\$ 0.50	\$ 0.31
Antidilutive shares not included in diluted common share calculation	34,000	45,600

- (1) Represents the effect of the assumed exercise of stock options and the vesting of restricted stock units and performance stock awards, based on the treasury stock method.

**11. Recent Accounting and Reporting Developments**

In May 2011, the FASB issued ASU 2011-04, which amends the wording used to describe the requirements for measuring fair value and expands fair value disclosure requirements. This guidance is effective for interim and annual periods beginning after December 15, 2011. The Company adopted this guidance on January 1, 2012 as required. As this guidance only amends disclosure requirements, the adoption did not impact the Company's consolidated financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU 2011-05, which eliminates the option to present components of other comprehensive income as part of the Statement of Stockholders' Equity. All changes in components of comprehensive income must be presented in (1) a single continuous statement of comprehensive income, which presents the total of comprehensive income, the components of net income, and the components of comprehensive income, or (2) two separate but consecutive statements. Under either presentation method, reclassification adjustments between other comprehensive income and net income are required to be presented on the face of the financial statements. In October 2011, the FASB decided to delay the effective date of the requirement to present reclassifications of other comprehensive income on the face of the income statement. All other guidance in ASU 2011-05 is effective for interim and annual periods beginning after December 15, 2011 and will be applied retrospectively. The Company adopted the effective portions of this guidance on January 1, 2012 as required. The adoption of this guidance did not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income and thus had an impact on the presentation of comprehensive income in the consolidated financial statements only.

---

## **Table of Contents**

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### **Forward Looking Statements**

This Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Report contain forward-looking statements within the meaning of the Securities Litigation Reform Act of 1995 and Section 21E of the Exchange Act that are based on current expectations, estimates and projections about our business, management's beliefs, and assumptions made by management. Words such as expects, anticipates, intends, plans, believes, seeks, estimates, forecasts, should, could, and variations of such expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements as a result of a variety of important factors. While it is impossible to identify all such factors, those that could cause actual results to differ materially from those estimated by us include changes in demand and market prices for our products, product mix, bidding activity, the timing of customer orders and deliveries, production schedules, the price and availability of raw materials, excess or shortage of production capacity, international trade policy and regulations and other risks discussed in our 2011 Form 10-K and from time to time in our other SEC filings and reports. Such forward-looking statements speak only as of the date on which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this Report. If we do update or correct one or more forward-looking statements, investors and others should not conclude that we will make additional updates or corrections with respect thereto or with respect to other forward-looking statements.

#### **Overview**

We are a leading North American manufacturer of large-diameter, high-pressure steel pipeline systems for use in water infrastructure applications, primarily related to drinking water systems, and we also manufacture other welded steel pipe products for use in a wide range of applications, including energy, construction, agriculture, and industrial systems. Our pipeline systems are also used for hydroelectric power systems, wastewater systems and other applications, and we also make products for industrial plant piping systems and certain structural applications. These pipeline systems are produced by our Water Transmission Group from seven manufacturing facilities located in Portland, Oregon; Denver, Colorado; Adelanto, California; Parkersburg, West Virginia; Saginaw, Texas; Pleasant Grove, Utah; and Monterrey, Mexico. During the first half of 2012, we will be shutting down our Pleasant Grove facility and transferring its property and equipment to other manufacturing locations. Our Water Transmission Group accounted for approximately 41.1% of net sales in the first three months of 2012.

Our water infrastructure products are generally sold to installation contractors, who include our products in their bids to municipal agencies or privately-owned water companies for specific projects. Within the total pipeline, our products best fit the larger-diameter, higher-pressure applications. We believe our sales are substantially driven by spending on new water infrastructure with additional spending on water infrastructure upgrades, replacements, and repairs. Pricing of our water infrastructure products is largely determined by the competitive environment in each regional market, and the regional markets generally operate independently of each other. We operate our Water Transmission business with a long-term time horizon. Projects are often planned for many years in advance and are sometimes part of fifty-year build out plans. However, in the near-term, we expect strained municipal budgets will impact the Water Transmission Group.

Our Tubular Products Group manufactures other welded steel products in three facilities: Atchison, Kansas; Houston, Texas; and Bossier City, Louisiana. We produce a range of products used in several different markets. We currently make pipe for a wide variety of uses, including energy, industrial, construction, agriculture, and industrial systems, which are sold to distributors and used in many different applications. Our Tubular Products Group's sales volume is typically driven by energy spending, non-residential construction spending, and general economic conditions. We believe the greatest potential for significant sales growth in our Tubular Products Group is through our energy products. Our Tubular Products Group generated approximately 58.9% of net sales in the first three months of 2012.

Purchased steel represents a substantial portion of our cost of sales, and changes in our selling prices often correlate directly to changes in steel costs. This correlation is the greatest in our Tubular Products Group. Tubular Products' margins are highly sensitive to changes in steel costs, although the amounts of margins are also influenced by the current level of demand in the marketplace.

#### **Critical Accounting Policies and Estimates**

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under

## Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

different assumptions or conditions. A description of our critical accounting policies and related judgments and estimates that affect the preparation of our consolidated financial statements is set forth in our 2011 Form 10-K.

**Table of Contents****Recent Accounting Pronouncements**

See Note 11 of the Condensed Consolidated Financial Statements in Part I Item I, Financial Statements for a description of recent accounting pronouncements, including the dates of adoption and estimated effects on financial position, results of operations and cash flows.

**Results of Operations**

The following table sets forth, for the period indicated, certain financial information regarding costs and expenses expressed as a percentage of total net sales and net sales of our business segments.

	<b>Three months ended March 31,</b>	
	<b>2012</b>	<b>2011</b>
Net sales		
Water Transmission	41.1%	52.6%
Tubular Products	58.9	47.4
Total net sales	100.0	100.0
Cost of sales	88.4	86.8
Gross profit	11.6	13.2
Selling, general and administrative expense	5.1	6.5
Operating income	6.5	6.7
Other expense	0.0	0.1
Interest income	(0.0)	
Interest expense	1.2	2.3
Income before income taxes	5.3	4.3
Provision for income taxes	2.0	1.7
Net income	3.3%	2.6%
Gross profit as a percentage of segment net sales:		
Water Transmission	16.6%	16.9%
Tubular Products	8.1	9.2

**Three Months Ended March 31, 2012 Compared to Three Months Ended March 31, 2011**

**Net sales.** Net sales increased 27.6% to \$142.2 million for the first quarter of 2012 compared to \$111.5 million for the first quarter of 2011. No single customer accounted for more than 10% of total net sales in the first quarter of 2012. One customer in the Tubular Products segment accounted for 10.9% of net sales in the first quarter of 2011.

Water Transmission sales decreased by 0.4% to \$58.4 million in the first quarter of 2012 from \$58.6 million in the first quarter of 2011. The decrease in sales in the first quarter of 2012 compared to the first quarter of 2011 was due to an 11% decrease in tons produced, partially offset by a 12% increase in selling price per ton. The increase in selling prices per ton in the first three months of 2012 was due to an increase in steel costs per ton, which increased 19% over the same period in 2011. Higher steel costs generally lead to higher contract values. The decrease in volume resulted from continued weakness of municipal markets. Bidding activity, backlog and production levels may vary significantly from period to period affecting sales volumes.

Tubular Products sales increased 58.6% to \$83.7 million in the first quarter of 2012 from \$52.8 million in the first quarter of 2011. The sales increase in the first quarter of 2012 as compared to the first quarter of 2011 was due to a 40% increase in tons sold and a 17% increase in selling price per ton. We sold 66,600 tons in the first quarter of 2012 as compared to 47,500 tons in the first quarter of 2011. The most significant increase in demand was the result of increases in natural gas and oil drilling operations, with energy pipe representing 97% of the total Tubular Product volume increase in the first quarter of 2012 compared to the first quarter of 2011. Energy pipe represented 76% of tons sold in the first

## Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

quarter of 2012 as compared to 68% of tons sold in the first quarter of 2011, and energy pipe selling prices per ton increased 27% in the first quarter of 2012 compared to the first quarter of 2011. We were able to capitalize on the increase in demand for energy pipe through upgrades made at our Houston, Texas facility to facilitate production of tubing with physical properties suitable for heat treating, and ongoing expansion projects at our Atchison, Kansas facility.

**Gross profit.** Gross profit increased 11.7% to \$16.5 million (11.6% of total net sales) in the first quarter of 2012 from \$14.8 million (13.2% of total net sales) in the first quarter of 2011.

---

**Table of Contents**

Water Transmission gross profit decreased \$0.2 million, or 2.0%, to \$9.7 million (16.6% of segment net sales) in the first quarter of 2012 from \$9.9 million (16.9% of segment net sales) in the first quarter of 2011. Our gross margin was negatively impacted by higher materials cost per ton, including steel as noted above. In addition, the lower volume had a negative impact on the fixed portion of our cost of goods sold as a percent of sales. This was partially offset by higher selling price per ton, as discussed above.

Gross profit from Tubular Products increased \$1.9 million, or 39.5%, to \$6.8 million (8.1% of segment net sales) in the first quarter of 2012 from \$4.9 million (9.2% of segment net sales) in the first quarter of 2011. As noted above, demand for our Tubular Products increased significantly, particularly for our energy products, which had sales revenue of \$34.5 million in the first quarter of 2011 and increased 98% to \$68.5 million in the first quarter of 2012. The significant increase in volume contributed to the increase in total gross profit in 2012, but the gross profit as a percentage of segment sales was negatively impacted by higher inventory costs flowing through from the fourth quarter of 2011. These higher inventory costs resulted from planned downtime, particularly at our Atchison, Kansas facility in December, 2011 to install equipment related to our capacity expansion projects. In addition, margins were negatively impacted by higher material costs per ton of 15% in the first quarter of 2012 compared to the first quarter of 2011. We will have some additional downtime in our Atchison facility in May, 2012 to complete our previously announced expansion project which will have some negative impact on margins in the second quarter of 2012.

**Selling, general and administrative expenses.** Selling, general and administrative expenses were \$7.3 million (5.1% of total net sales) in the first quarter of 2012 and \$7.3 million (6.5% of total net sales) in the first quarter of 2011. In the first quarter of 2012 as compared to the first quarter of 2011, Tubular Product sales commission expense decreased \$0.5 million following the termination of an external sales group for energy pipe sales, and professional fees related to our previous accounting investigation decreased by \$0.7 million. These were offset by an increase in accounting and professional fees of \$0.5 million for accounting restatement related work performed during the first quarter of 2012, an increase stock-based compensation expense of \$0.3 million, and an increase in bonus expense of \$0.1 million due to improved operating results.

**Interest expense.** Interest expense was \$1.6 million in the first quarter of 2012 and \$2.6 million in the first quarter of 2011. Lower average borrowings and lower average interest rates decreased interest expense in the first quarter of 2012 compared to the first quarter of 2011.

**Income Taxes.** The tax provision was \$2.8 million in the first quarter of 2012 (an effective tax rate of 37.2%) compared to \$1.8 million in the first quarter of 2011 (an effective tax rate of 38.3%). Our effective rate for each period exceeds our federal statutory rate of 35% due primarily to state taxes and the relationship of permanent income tax deductions and tax credits to estimated pre-tax income for the respective years.

**Liquidity and Capital Resources****Sources and Uses of Cash**

Our principal sources of liquidity generally include operating cash flow and our bank credit agreement. Our principal uses of liquidity generally include capital expenditures, working capital and debt service. Information regarding our cash flows for the three months ended March 31, 2012 is presented in our condensed consolidated statements of cash flows contained in this Form 10-Q, and is further discussed below.

As of March 31, 2012, our working capital (current assets minus current liabilities) was \$163.5 million as compared to \$170.6 million as of December 31, 2011.

Net cash provided by operating activities in the first three months of 2012 was \$17.7 million. This was primarily the result of fluctuations in our working capital accounts including decreases in our receivables and inventory accounts, partially offset by an increase in our costs and estimated earnings in excess of billings on uncompleted contracts account, which result from timing differences between production, shipment and invoicing of our products, as well as changes in levels of production and costs of materials. We typically have a relatively large investment in working capital, as we are generally obligated to pay for goods and services early in the life cycle of a Water Transmission segment project while cash is not received until much later in the project. Our revenues in the Water Transmission segment are recognized on a percentage-of-completion method; therefore, there is little correlation between revenue and cash receipts and the elapsed time can be significant. As such, our payment cycle is a significantly shorter interval than our collection cycle, although the effect of this difference in the cycles may vary from period to period.

Net cash used in investing activities in the first three months of 2012 was \$5.4 million, primarily for capital expenditures for storm water upgrades at our Portland, Oregon facility and planned capacity expansion in our Tubular Products plants. Capital expenditures in 2012 are expected to be approximately \$30 million to \$35 million for standard capital replacement and recently announced strategic investment projects. These include expansion at our Saginaw plant to increase size capability from 96 to 126 diameter pipe as well as to increase overall capacity, and an additional horizontal accumulator at our Atchison plant.

**Table of Contents**

Net cash used in financing activities in the first three months of 2012 was \$12.4 million, which resulted primarily from repayments under our Credit Agreement and Note Purchase Agreement totaling \$36.1 million, partially offset by net borrowings of \$25.2 million.

We anticipate that our existing cash and cash equivalents, cash flows expected to be generated by operations, and amounts available under our credit agreements will be adequate to fund our working capital and capital requirements for at least the next twelve months. We also expect to continue to rely on cash generated from operations or funds available from our line of credit to make required principal payments on our long-term debt during 2012. To the extent necessary, we may also satisfy capital requirements through additional bank borrowings, senior notes, term notes, subordinated debt, and capital and operating leases, if such resources are available on satisfactory terms. See the discussion below under *Line of Credit and Long-Term Debt* for a discussion of recent developments regarding compliance with the terms of our credit agreements. We have from time to time evaluated and continue to evaluate opportunities for acquisitions and expansion. Any such transactions, if consummated, may use a portion of our working capital or necessitate additional bank borrowings or other sources of funding.

***Line of Credit and Long-Term Debt***

We had the following significant components of debt at March 31, 2012: a \$115.0 million Credit Agreement, under which \$53.8 million was outstanding; \$4.3 million of Series A Term Note, \$4.5 million of Series B Term Notes, \$4.3 million of Series C Term Notes and \$1.9 million of Series D Term Notes.

The Credit Agreement bears interest at rates related to LIBOR plus 2.50% to 4.50%, or the lending institution's prime rate, plus 1.50% to 3.50%. Borrowings under the Credit Agreement are collateralized by substantially all of our personal property. During the first quarter of 2012, the Company entered into an amendment to the Company's Credit Agreement which extended the expiration date to April 30, 2013, set aggregate commitments of the lenders at \$115 million, waived compliance with certain covenants as of December 31, 2011, and made certain changes in the definition, method of calculation and amounts of certain covenants. The credit facility bears interest at a weighted average rate of 2.89%. We had an additional net borrowing capacity under the credit facility of \$58.0 million at March 31, 2012.

The Series A Term Note in the principal amount of \$4.3 million matures on February 25, 2014 and requires annual payments in the amount of \$2.1 million plus interest of 10.50% paid quarterly on February 25, May 25, August 25 and November 25. The Series B Term Notes in the principal amount of \$4.5 million mature on June 21, 2014 and require annual payments in the amount of \$1.5 million plus interest of 10.22% paid quarterly on March 21, June 21, September 21 and December 21. The Series C Term Notes in the principal amount of \$4.3 million mature on October 26, 2014 and require annual payments of \$1.4 million plus interest of 9.11% paid quarterly on January 26, April 26, July 26 and October 26. The Series D Term Notes in the principal amount of \$1.9 million mature on January 24, 2015 and require annual payments in the amount of \$643,000 plus interest of 9.07% paid quarterly on January 24, April 24, July 24 and October 24. The Series A Term Note, the Series B Term Notes, the Series C Term Notes, and the Series D Term Notes (together, the *Term Notes*) are collateralized by accounts receivable, inventory and certain equipment.

We had a total of \$14.8 million in capital lease obligations outstanding at March 31, 2012. The weighted average interest rate on all of our capital leases is 7.77%. Our capital leases are for certain equipment used in the manufacturing process, with \$7.5 million of our capital leases outstanding as of March 31, 2012 representing an agreement entered into as of September 2009 to finance our Bossier City, Louisiana facility (the *Financing Arrangement*) under which certain equipment used in the manufacturing process at the facility is leased. As part of the Financing Arrangement, a \$10 million escrow account was provided for the Company by a local government entity through a financial institution and funds are released upon qualifying purchase requisitions. As we purchase equipment for the facility, we enter into a sale-leaseback transaction with the governmental entity as part of the Financing Arrangement. As of March 31, 2012, \$0.9 million was held in the escrow account, which is included in other assets, as a result of proceeds from the Financing Arrangement. The Financing Arrangement requires us to meet certain loan covenants, measured at the end of each fiscal quarter. These loan covenants follow the covenants required by our Credit Agreement.

The Credit Agreement, the Note Purchase Agreement and certain of our leases place various restrictions on our ability to, among other things, incur certain additional indebtedness, create liens or other encumbrances on assets, and incur additional capital expenditures. The Credit Agreement, Note Purchase Agreement, and certain of our leases require us to be in compliance with certain financial covenants. The results of our financial covenants as of March 31, 2012 are below.

The Consolidated Senior Leverage Ratio must not be greater than 3.5:1.0. Our ratio as of March 31, 2012 is 1.69:1.0.

The Consolidated Total Leverage Ratio must not be greater than 4.0:1.0. Our ratio as of March 31, 2012 is 1.69:1.0.

## Edgar Filing: NORTHWEST PIPE CO - Form 10-Q

The Consolidated Tangible Net Worth must be greater than \$202.3 million. Our tangible net worth as of March 31, 2012 is \$225.1 million.

The Asset Coverage Ratio cannot be less than 1.0:1.0. Our ratio as of March 31, 2012 is 1.78:1.0.

The Consolidated Rental and Operating Lease Expense to Consolidated Revenue Ratio must not be greater than 6.0%. Our ratio as of March 31, 2012 is 0.6%.

## **Table of Contents**

The Consolidated Fixed Charge Coverage Ratio must not be less than 1.25:1.0. Our ratio at March 31, 2012 is 2.06:1.0

The Minimum Consolidated EBITDA must not be less than \$42 million. Our consolidated EBITDA as of March 31, 2012 is \$52.5 million.

As of March 31, 2012, we are in compliance with all financial covenants.

Based on our business plan and forecasts of operations, we believe we will remain in compliance with our covenants for the next 12 months.

## **Off Balance Sheet Arrangements**

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future material effect on our financial position, results of operations or cash flows.

## **Item 3. Quantitative and Qualitative Disclosure About Market Risk**

For a discussion of the Company's market risk associated with foreign currencies and interest rates, see Item 7A, "Quantitative and Qualitative Disclosures about Market Risk" in Part II of the Company's 2011 Form 10-K.

## **Item 4. Controls and Procedures**

### **Evaluation of Disclosure Controls and Procedures**

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are designed to provide reasonable assurance that information required to be disclosed in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to our management, including the Chief Executive Officer ( "CEO" ) and Chief Financial Officer ( "CFO" ), as appropriate to allow timely decisions regarding required disclosures.

In connection with the preparation of this Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, our management, under the supervision and with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2012. As described below, management has identified material weaknesses in our internal controls over financial reporting, which is an integral component of our disclosure controls and procedures. As a result of those material weaknesses, our CEO and CFO have concluded that, as of March 31, 2012, our disclosure controls and procedures were not effective.

### **Changes in Internal Control over Financial Reporting**

There were no changes in our internal control over financial reporting during the quarter ended March 31, 2012 that materially affected or are reasonably likely to materially affect our internal control over financial reporting. However, as described below under "Plans for Remediation of Material Weaknesses," we are dedicating significant resources to support our efforts to improve the effectiveness of our control activities and to remedy the control weaknesses described herein.

### **Management's Report on Internal Control over Financial Reporting**

In connection with management's assessment of our internal control over financial reporting described in our 2011 Form 10-K, management has identified the following deficiencies that constituted individually, or in the aggregate, material weaknesses in our internal control over financial reporting as of December 31, 2011:

Several of our review controls were not designed to operate at a sufficiently precise level, and our monitoring process did not identify these deficiencies. The Company's review controls for its computation of revenue recognized on the percentage-of-completion method did not evaluate the accuracy of certain key inputs to the revenue recognition model. Our review controls for existence and completeness of inventory did not operate effectively which could result in a misstatement of inventories

or cost of sales.

Control activities related to the reviews which were recently established to periodically assess useful lives, units of production and the existence of our property and equipment did not operate for a sufficient period of time to be able to conclude whether they were operating effectively.

Our control activities related to the accounting for complex or non-routine transactions did not operate effectively.

---

## **Table of Contents**

The material weaknesses described above could result in a misstatement in our annual or interim consolidated financial statements that would not be prevented or detected in a timely manner. Although we did not identify a material misstatement in 2012 which resulted from these deficiencies, management does not believe that the controls in place as of March 31, 2012 are sufficiently designed and effectively operating to prevent or detect such misstatement. Accordingly, management has determined that each of the control deficiencies above constitutes a material weakness and concluded that we did not maintain effective internal control over financial reporting as of March 31, 2012.

### **Plans for Remediation of Material Weaknesses**

Our Board, the Audit Committee and management are adding resources and developing and implementing new processes and procedures to remediate, among other things, the material weaknesses that existed in our internal control over financial reporting, and our disclosure controls and procedures, as of March 31, 2012.

We have developed a remediation plan (the Remediation Plan ) to address the material weaknesses for each of the affected areas presented above. The Remediation Plan ensures that each area affected by a material control weakness is put through a comprehensive remediation process. The Remediation Plan entails a thorough analysis which includes the following phases:

Define and assess each control deficiency: ensure a thorough understanding of the as is state, process owners, and procedural or technological gaps causing the deficiency. This work is underway for all identified areas;

Design and evaluate a remediation action for each control deficiency for each affected area: validate or improve the related policy and procedures; evaluate skills of the process owners with regard to the policy and adjust as required. The Remediation Plan will require an assessment of all control failures; we expect that many of the recent improvements will provide an appropriate starting point for the specific action plans;

Implement specific remediation actions: train process owners, allow time for process adoption and adequate transaction volume for next steps;

Test and measure the design and effectiveness of the remediation actions; test and provide feedback on the design and operating effectiveness of the controls, and;

Review and acceptance of completion of the remediation effort by management.

The Remediation Plan is being administered by our Director of Compliance and Controls and involves key leaders from across the organization, including the CEO and CFO. Each specific area of action within the Remediation Plan has been assigned an owner who will coordinate the resources required for timely completion of the remediation activities. The Director of Compliance and Controls will report quarterly and as needed to the Audit Committee of our Board of Directors on the progress made toward completion of the Remediation Plan.

We believe the steps taken to date have improved the effectiveness of our internal control over financial reporting; however, we have not completed the corrective processes and procedures identified herein. Accordingly, as we continue to monitor the effectiveness of our internal control over financial reporting in the areas affected by the material weaknesses described above, we will perform additional procedures prescribed by management including the use of manual mitigating control procedures and employ any additional tools and resources deemed necessary to ensure that our financial statements continue to be fairly stated in all material respects.

## **Part II Other Information**

### **Item 1. Legal Proceedings**

Information required by this Item 1 is contained in Note 5 to the Condensed Consolidated Financial Statements, Part I Item 1, Financial Statements of this report, under the caption Commitments and Contingencies. The text under such caption is incorporated by reference into this

Item 1.

**Item 1A. Risk Factors**

In addition to the other information set forth in this report, the factors discussed in Part I Item 1A Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011 could materially affect our business, financial condition or operating results. The risks described in our Annual Report on Form 10-K are not the only risks facing us. There are additional risks and uncertainties not currently known to us or that we currently deem to be immaterial, that may also materially adversely affect our business, financial condition, or operating results.
