CARNIVAL CORPORATION & PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 General

The consolidated financial statements include the accounts of Carnival Corporation and Carnival plc and their respective subsidiaries. Together with their consolidated subsidiaries, they are referred to collectively in these consolidated financial statements and elsewhere in this joint Quarterly Report on Form 10-Q as Carnival Corporation & plc, our, us and we.

The Consolidated Balance Sheet at August 31, 2013, the Consolidated Statements of Income and the Consolidated Statements of Comprehensive Income for the three and nine months ended August 31, 2013 and 2012 and the Consolidated Statements of Cash Flows for the nine months ended August 31, 2013 and 2012 are unaudited and, in the opinion of our management, contain all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation. Our interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the related notes included in the Carnival Corporation & plc 2012 joint Annual Report on Form 10-K (Form 10-K). Our operations are seasonal and results for interim periods are not necessarily indicative of the results for the entire year.

Cruise passenger ticket revenues include fees and taxes levied by governmental authorities and collected by us from our guests. The portion of these fees and taxes included in passenger ticket revenues and commissions, transportation and other costs were \$140 million and \$126 million and \$395 million and \$364 million for the three and nine months ended August 31, 2013 and 2012, respectively.

During the three and nine months ended August 31, 2013 and 2012, repairs and maintenance expenses, including minor improvement costs and dry-dock expenses, were \$216 million and \$170 million and \$680 million and \$602 million, respectively, and are substantially all included in other ship operating expenses.

NOTE 2 Unsecured Debt

At August 31, 2013, our short-term borrowings consisted of commercial paper of \$104 million and euro bank loans of \$92 million, with an aggregate weighted-average interest rate of 1.0%.

In December 2012, we issued \$500 million of publicly-traded notes, which bear interest at 1.9% and are due in December 2017. We used the net proceeds of these notes for general corporate purposes.

In February 2013, we issued \$500 million of publicly-traded notes, which bear interest at 1.2% and are due in February 2016. The proceeds were used to repay a like amount of floating rate export credit facilities prior to their maturity dates through 2022.

In March 2013, we borrowed \$311 million under a euro-denominated export credit facility, the proceeds of which were used to pay for a portion of *AIDAstella*'s purchase price. This floating rate facility is due in semi-annual installments through March 2025.

In May 2013, we borrowed \$526 million under an export credit facility, the proceeds of which were used to pay for a portion of *Royal Princess* purchase price. This floating rate facility is due in semi-annual installments through May 2025.

In July 2013, we entered into a five-year \$150 million floating rate bank loan, which is due in November 2018. We plan to borrow under this loan in November 2013 and to use the proceeds for general corporate purposes.

In August 2013, we entered into a \$265 million euro-denominated floating rate revolving bank loan facility. This facility has a perpetual term, although we can terminate it at any time and the bank can terminate the facility at any time upon nine months notice. The facility can be drawn beginning in May 2014.

In September 2013, we entered into a seven-year \$300 million floating rate revolver, which expires in September 2020 and provides us with additional liquidity.

NOTE 3 Contingencies

Litigation

As a result of the January 2012 *Costa Concordia* incident (2012 Ship Incident), litigation claims, enforcement actions, regulatory actions and investigations, including, but not limited to, those arising from personal injury, loss of life, loss of or damage to personal property, business interruption losses or environmental damage to any affected coastal waters and the surrounding areas, have been and may be asserted or brought against various parties, including us. The existing assertions are in their early stages and there are significant jurisdictional uncertainties. The ultimate outcome of these matters cannot be determined at this time. However, we do not expect these matters to have a significant impact on our results of operations because we have insurance coverage for these types of third-party claims.

Table of Contents

Additionally, in the normal course of our business, various claims and lawsuits have been filed or are pending against us. Most of these claims and lawsuits are covered by insurance and, accordingly, the maximum amount of our liability, net of any insurance recoverables, is typically limited to our self-insurance retention levels. Management believes the ultimate outcome of these claims and lawsuits will not have a material adverse impact on our consolidated financial statements.

Contingent Obligations Lease Out and Lease Back Type (LILO) Transactions

At August 31, 2013, Carnival Corporation had estimated contingent obligations totaling \$413 million, excluding termination payments as discussed below, to participants in LILO transactions for two of its ships. At the inception of these leases, the aggregate of the net present value of these obligations was paid by Carnival Corporation to a group of major financial institutions, who agreed to act as payment undertakers and directly pay these obligations. As a result, these contingent obligations are considered extinguished and neither the funds nor the contingent obligations have been included in our Consolidated Balance Sheets.

In the event that Carnival Corporation were to default on its contingent obligations and assuming performance by all other participants, we estimate that we would, as of August 31, 2013, be responsible for a termination payment of \$33 million. In 2017, we have the right to exercise options that would terminate these LILO transactions at no cost to us.

In certain cases, if the credit ratings of the financial institutions who are directly paying the contingent obligations fall below AA-, then Carnival Corporation will be required to replace these financial institutions with other financial institutions whose credit ratings are at least AA or meet other specified credit requirements. In such circumstances, we would incur additional costs, although we estimate that they would not be material to our consolidated financial statements. For the two financial institution payment undertakers subject to this AA- credit rating threshold, one has a credit rating of AA and the other has a credit rating of AA-. If Carnival Corporation's credit rating, which is BBB+, falls below BBB, it will be required to provide a standby letter of credit for \$39 million, or, alternatively, provide mortgages for this aggregate amount on these two ships.

Contingent Obligations Indemnifications

Some of the debt contracts that we enter into include indemnification provisions that obligate us to make payments to the counterparty if certain events occur. These contingencies generally relate to changes in taxes and changes in laws that increase lender capital costs and other similar costs. The indemnification clauses are often standard contractual terms and were entered into in the normal course of business. There are no stated or notional amounts included in the indemnification clauses, and we are not able to estimate the maximum potential amount of future payments, if any, under these indemnification clauses. We have not been required to make any material payments under such indemnification clauses in the past and, under current circumstances, we do not believe a request for material future indemnification payments is probable.

NOTE 4 Fair Value Measurements, Derivative Instruments and Hedging Activities

Fair Value Measurements

U.S. accounting standards establish a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 measurements are based on unadjusted quoted prices in active markets for identical assets or liabilities that we have the ability to access. Valuation of these items does not entail a significant amount of judgment.

Level 2 measurements are based on quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active or market data other than quoted prices that are observable for the assets or liabilities.

Level 3 measurements are based on unobservable data that are supported by little or no market activity and are significant to the fair value of the assets or liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between independent and knowledgeable market participants at the measurement date. Therefore, even when market assumptions are not readily available, our own assumptions are set to reflect those that we believe market participants would use in pricing the asset or liability at the measurement date.

Table of Contents

The fair value measurement of a financial asset or financial liability must reflect the nonperformance risk of the counterparty and us. Therefore, the impact of our counterparty's creditworthiness was considered when in an asset position, and our creditworthiness was considered when in a liability position in the fair value measurement of our financial instruments. Creditworthiness did not have a significant impact on the fair values of our financial instruments at August 31, 2013 and November 30, 2012. Both the counterparties and we are expected to continue to perform under the contractual terms of the instruments. Considerable judgment may be required in interpreting market data used to develop the estimates of fair value. Accordingly, certain estimates of fair values presented herein are not necessarily indicative of the amounts that could be realized in a current or future market exchange.

Financial Instruments that are not Measured at Fair Value on a Recurring Basis

The estimated carrying and fair values and basis of valuation of our financial instrument assets and liabilities that are not measured at fair value on a recurring basis were as follows (in millions):

	August 31, 2013				November 30, 2012			
	Carrying Value	Fair Value		Carrying Value	Fair Value			
		Level 1	Level 2		Level 1	Level 2		
Assets								
Cash and cash equivalents (a)	\$ 442	\$ 442	\$ -	\$ 269	\$ 269	\$ -		
Short-term investments (b)	66	66	-	-	-	-		
Long-term other assets (c)	66	1	62	39	1	36		
Total	\$ 574	\$ 509	\$ 62	\$ 308	\$ 270	\$ 36		
Liabilities								
Fixed rate debt (d)	\$ 5,968	\$ -	\$ 6,308	\$ 5,195	\$ -	\$ 5,825		
Floating rate debt (d)	4,050	-	4,034	3,707	-	3,706		
Total	\$ 10,018	\$ -	\$ 10,342	\$ 8,902	\$ -	\$ 9,531		

- (a) Cash and cash equivalents are comprised of cash on hand and time deposits and, due to their short maturities, the carrying values approximate their fair values.
- (b) Short-term investments are comprised of time deposits and, due to their short maturities, the carrying values approximate their fair values.
- (c) At August 31, 2013 and November 30, 2012, substantially all of our long-term other assets were comprised of notes and other receivables. The fair values of notes and other receivables were based on estimated future cash flows discounted at appropriate market interest rates.
- (d) The net difference between the fair value of our fixed rate debt and its carrying value was due to the market interest rates in existence at August 31, 2013 and November 30, 2012 being lower than the fixed interest rates on these debt obligations, including the impact of changes in our credit ratings, if any. At August 31, 2013, the net difference between the fair value of our floating rate debt and its carrying value was due to the market interest rates in existence at August 31, 2013 being slightly higher than the floating interest rates on these debt obligations, including the impact of changes in our credit ratings, if any. The fair values of our publicly-traded notes were based on their unadjusted quoted market prices in markets that are not sufficiently active to be Level 1. The fair values of our other debt were estimated based on appropriate market interest rates being applied to this debt.

Table of Contents**Financial Instruments that are Measured at Fair Value on a Recurring Basis**

The estimated fair value and basis of valuation of our financial instrument assets and liabilities that are measured at fair value on a recurring basis were as follows (in millions):

	August 31, 2013		November 30, 2012	
	Level 1	Level 2	Level 1	Level 2
Assets				
Cash equivalents (a)	\$ 539	\$ -	\$ 196	\$ -
Restricted cash (b)	30	-	28	-
Marketable securities held in rabbi trusts (c)	107	10	104	16
Derivative financial instruments (d)	-	51	-	48
Total	\$ 676	\$ 61	\$ 328	\$ 64
Liabilities				
Derivative financial instruments (d)	\$ -	\$ 33	\$ -	\$ 43
Total	\$ -	\$ 33	\$ -	\$ 43

(a) Cash equivalents are comprised of money market funds.

(b) Restricted cash is substantially all comprised of money market funds.

(c) Level 1 and 2 marketable securities are held in rabbi trusts and are principally comprised of frequently-priced mutual funds invested in common stocks and other investments, respectively. Their use is restricted to funding certain deferred compensation and non-qualified U.S. pension plans.

(d) See Derivative Instruments and Hedging Activities section below for detailed information regarding our derivative financial instruments. We measure our derivatives using valuations that are calibrated to the initial trade prices. Subsequent valuations are based on observable inputs and other variables included in the valuation models such as interest rate, yield and commodity price curves, forward currency exchange rates, credit spreads, maturity dates, volatilities and netting arrangements. We use the income approach to value derivatives for foreign currency options and forwards, interest rate swaps and fuel derivatives using observable market data for all significant inputs and standard valuation techniques to convert future amounts to a single present value amount, assuming that participants are motivated, but not compelled to transact. We also corroborate our fair value estimates using valuations provided by our counterparties.

Nonfinancial Instruments that are Measured at Fair Value on a Nonrecurring Basis**Ship Impairments**

Due to the ongoing challenging economic environment in Europe and certain ship-specific facts and circumstances, such as their size, age, condition, viable alternative itineraries and historical operating cash flows, we performed undiscounted future cash flow analyses on all of our Ibero Cruises (Ibero) ships and two of our smaller Costa Cruises (Costa) ships as of July 31, 2013 to determine if these ships were impaired. The principal assumptions used in our undiscounted cash flow analyses consisted of forecasted future operating results, including net revenue yields and net cruise costs including fuel prices, estimated residual values and the expected November 2013 rebranding of Ibero's *Grand Mistral* into the Costa fleet, which are all considered Level 3 inputs. Based on these undiscounted cash flow analyses, we determined that the net carrying value of the two Costa ships exceeded their estimated undiscounted future cash flows. Accordingly, we then estimated the July 31, 2013 fair value of these ships based on their discounted future cash flows and compared this estimated fair value to their net carrying value. As a result, we recognized \$176 million of ship impairment charges in other ship operating expenses during the three months ended August 31, 2013.

Table of Contents**Valuation of Goodwill and Other Intangibles**

The reconciliation of the changes in the carrying amounts of our goodwill, which goodwill has been allocated to our North America and Europe, Australia and Asia (EAA) cruise brands, was as follows (in millions):

	North America Cruise Brands	EAA Cruise Brands	Total
Balance at November 30, 2012	\$ 1,898	\$ 1,276	\$ 3,174
Foreign currency translation adjustment	-	(14)	(14)
Balance at August 31, 2013	\$ 1,898	\$ 1,262	\$ 3,160

At July 31, 2013, all of our cruise brands carried goodwill, except for Ibero and Seabourn. As of that date, we performed our annual goodwill impairment reviews, which included performing a qualitative assessment for all cruise brands that carried goodwill, except for Carnival Cruise Lines and Costa. Qualitative factors such as industry and market conditions, macroeconomic conditions, changes to the weighted-average cost of capital (WACC), overall financial performance, changes in fuel prices and capital expenditures were considered in the qualitative assessment to determine how changes in these factors would affect each of these cruise brands' estimated fair values. Based on our qualitative assessments, we determined it was more-likely-than-not that each of these cruise brands' estimated fair values exceeded their carrying values and, therefore, we did not proceed to the two-step quantitative goodwill impairment reviews.

As of July 31, 2013, we also performed our annual goodwill impairment reviews of Carnival Cruise Lines' and Costa's goodwill. We did not perform a qualitative assessment but instead proceeded directly to step one of the two-step goodwill impairment review and compared each of Carnival Cruise Lines' and Costa's estimated fair value to the carrying value of their allocated net assets. Both Carnival Cruise Lines' and Costa's estimated cruise brand fair value was based on a discounted future cash flow analysis. The principal assumptions used in our cash flow analyses consisted of forecasted future operating results, including net revenue yields and net cruise costs including fuel prices, capacity changes, including the expected deployment of vessels into, or out of, Carnival Cruise Lines and Costa, capital expenditures, WACC for comparable publicly-traded companies, adjusted for the risk attributable to the geographic regions in which Carnival Cruise Lines and Costa operate, and terminal values, which are all considered Level 3 inputs. The forecasted net revenue yields were assumed to recover over the next few years compared to current levels as we continue to rebuild both of these brands. Based on the discounted cash flow analyses, we determined that each of Carnival Cruise Lines' and Costa's estimated fair value significantly exceeded their carrying value and, therefore, we did not proceed to step two of the impairment reviews.

At August 31, 2013, accumulated goodwill impairment charges were \$153 million, which was for our 2012 Ibero goodwill impairment charge.

The reconciliation of the changes in the carrying amounts of our intangible assets not subject to amortization, which represent trademarks that have been allocated to our North America and EAA cruise brands, was as follows (in millions):

	North America Cruise Brands	EAA Cruise Brands	Total
Balance at November 30, 2012	\$ 927	\$ 372	\$ 1,299
Ibero trademarks impairment charge	-	(13)	(13)
Foreign currency translation adjustment	-	(13)	(13)
Balance at August 31, 2013	\$ 927	\$ 346	\$ 1,273

At July 31, 2013, our cruise brands that have significant trademarks recorded include AIDA Cruises (AIDA), P&O Cruises (Australia), P&O Cruises (UK) and Princess Cruises (Princess). We performed our annual trademark impairment reviews for these cruise brands as of July 31, 2013, which included performing a qualitative assessment. Qualitative factors such as industry and market conditions, macroeconomic conditions, changes to the WACC, changes in royalty rates and overall financial performance were considered in the qualitative assessment to

Edgar Filing: CARNIVAL CORP - Form 10-Q

determine how changes in these factors would affect the estimated fair values for each of our cruise brands' recorded trademarks. Based on our qualitative assessments, we determined it was more likely-than-not that the estimated fair value for each of these cruise brands' recorded trademarks exceeded their carrying value, and therefore, none of these trademarks were impaired.

During the three months ended August 31, 2013, we also recognized \$27 million of additional impairment charges, which was comprised of \$13 million related to Ibero's remaining trademarks' carrying value and \$14 million related to an investment.

At August 31, 2013 and November 30, 2012, our intangible assets subject to amortization are not significant to our consolidated financial statements.

The determination of our cruise brand, cruise ship and trademark fair values includes numerous assumptions that are subject to various risks and uncertainties. We believe that we have made reasonable estimates and judgments in determining whether our goodwill, cruise ships and trademarks have been impaired. However, if there is a change in assumptions used or if there is a change in the conditions or circumstances influencing fair values in the future, then we may need to recognize an impairment charge.

Table of Contents

Derivative Instruments and Hedging Activities

We utilize derivative and nonderivative financial instruments, such as foreign currency forwards, options and swaps, foreign currency debt obligations and foreign currency cash balances, to manage our exposure to fluctuations in certain foreign currency exchange rates, and interest rate swaps to manage our interest rate exposure in order to achieve a desired proportion of fixed and floating rate debt. In addition, we utilize our fuel derivatives program to mitigate a portion of the risk to our future cash flows attributable to potential fuel price increases, which we define as our economic risk. Our policy is to not use any financial instruments for trading or other speculative purposes.

All derivatives are recorded at fair value. The changes in fair value are recognized currently in earnings if the derivatives do not qualify as effective hedges, or if we do not seek to qualify for hedge accounting treatment, such as for our fuel derivatives. If a derivative is designated as a fair value hedge, then changes in the fair value of the derivative are offset against the changes in the fair value of the underlying hedged item. If a derivative is designated as a cash flow hedge, then the effective portion of the changes in the fair value of the derivative is recognized as a component of accumulated other comprehensive income (AOCI) until the underlying hedged item is recognized in earnings or the forecasted transaction is no longer probable. If a derivative or a nonderivative financial instrument is designated as a hedge of our net investment in a foreign operation, then changes in the fair value of the financial instrument are recognized as a component of AOCI to offset a portion of the change in the translated value of the net investment being hedged, until the investment is sold or liquidated. We formally document hedging relationships for all derivative and nonderivative hedges and the underlying hedged items, as well as our risk management objectives and strategies for undertaking the hedge transactions.

We classify the fair values of all our derivative contracts as either current or long-term, depending on whether the maturity date of the derivative contract is within or beyond one year from the balance sheet date. The cash flows from derivatives treated as hedges are classified in our Consolidated Statements of Cash Flows in the same category as the item being hedged. Our cash flows related to fuel derivatives are classified within investing activities.

Table of Contents

The estimated fair values of our derivative financial instruments and their location on the Consolidated Balance Sheets were as follows (in millions):

	Balance Sheet Location	August 31, 2013	November 30, 2012
Derivative assets			
Derivatives designated as hedging instruments			
Net investment hedges (a)	Prepaid expenses and other	\$ 1	\$ 1
	Other assets long-term	4	6
Foreign currency zero cost collars (b)	Prepaid expenses and other	-	11
	Other assets long-term	14	5
Interest rate swaps (c)	Prepaid expenses and other	1	-
	Other assets long-term	10	-
		30	23
Derivatives not designated as hedging instruments			
Fuel (d)	Prepaid expenses and other	13	-
	Other assets long-term	8	25
		21	25
Total derivative assets		\$ 51	\$ 48
Derivative liabilities			
Derivatives designated as hedging instruments			
Interest rate swaps (c)	Accrued liabilities and other	\$ 10	\$ 7
	Other long-term liabilities	13	17
		23	24
Derivatives not designated as hedging instruments			
Fuel (d)	Accrued liabilities and other	1	16
	Other long-term liabilities	9	3
		10	19
Total derivative liabilities		\$ 33	\$ 43

- (a) At August 31, 2013 and November 30, 2012, we had foreign currency forwards totaling \$115 million and \$235 million, respectively, that are designated as hedges of our net investments in foreign operations, which have a euro-denominated functional currency. At August 31, 2013, these outstanding foreign currency forwards mature through July 2017.
- (b) At August 31, 2013 and November 30, 2012, we had foreign currency derivatives consisting of foreign currency zero cost collars that are designated as foreign currency cash flow hedges for a portion of our euro-denominated shipbuilding payments. See Newbuild Currency Risks below for additional information regarding these derivatives.
- (c) We have euro interest rate swaps designated as cash flow hedges whereby we receive floating interest rate payments in exchange for making fixed interest rate payments. At August 31, 2013 and November 30, 2012, these interest rate swap agreements have or will effectively change \$885 million and \$269 million, respectively, of EURIBOR-based floating rate euro debt to fixed rate debt. These interest rate swaps settle through March 2025. In addition, at August 31, 2013 we had U.S. dollar interest rate swaps designated as fair value hedges whereby we receive fixed interest rate payments in exchange for making floating interest rate payments. These interest rate

Edgar Filing: CARNIVAL CORP - Form 10-Q

swap agreements effectively changed \$500 million of fixed rate debt to U.S. dollar LIBOR-based floating rate debt. These interest rate swaps settle through February 2016.

- (d) At August 31, 2013, we had fuel derivatives consisting of zero cost collars on Brent crude oil (Brent) to cover a portion of our estimated fuel consumption through 2017. See Fuel Price Risks below for additional information regarding these fuel derivatives. At November 30, 2012, we had fuel derivatives consisting of zero cost collars on Brent to cover a portion of our estimated fuel consumption through 2016.

Table of Contents

The effective portions of our derivatives qualifying and designated as hedging instruments recognized in other comprehensive income (loss) were as follows (in millions):

	Three Months Ended August 31,				Nine Months Ended August 31,			
	2013		2012		2013		2012	
Net investment hedges	\$	(2)	\$	(2)	\$	(4)	\$	53
Foreign currency zero cost collars	\$	(1)	\$	3	\$	6	\$	3
Interest rate swaps	\$	10	\$	(1)	\$	13	\$	(11)

There are no credit risk related contingent features in our derivative agreements, except for bilateral credit provisions within our fuel derivative counterparty agreements. These provisions require interest-bearing, non-restricted cash to be posted or received as collateral to the extent the fuel derivative fair value payable to or receivable from an individual counterparty, respectively, exceeds \$100 million. At August 31, 2013 and November 30, 2012, no collateral was required to be posted to or received from our fuel derivative counterparties.

The amount of estimated cash flow hedges unrealized gains and losses that are expected to be reclassified to earnings in the next twelve months is not significant. We have not provided additional disclosures of the impact that derivative instruments and hedging activities have on our consolidated financial statements as of August 31, 2013 and November 30, 2012 and for the three and nine months ended August 31, 2013 and 2012 where such impacts were not significant.

Foreign Currency Exchange Rate Risks**Overall Strategy**

We manage our exposure to fluctuations in foreign currency exchange rates through our normal operating and financing activities, including netting certain exposures to take advantage of any natural offsets and, when considered appropriate, through the use of derivative and nonderivative financial instruments. Our primary focus is to manage the economic foreign currency exchange risks faced by our operations, which are the ultimate foreign currency exchange risks that would be realized by us if we exchanged one currency for another, and not accounting risks. Accordingly, we do not currently hedge foreign currency exchange accounting risks with derivative financial instruments. The financial impacts of the hedging instruments we do employ generally offset the changes in the underlying exposures being hedged.

Operational and Investment Currency Risks

Our European and Australian cruise brands subject us to foreign currency translation risk related to the euro, sterling and Australian dollar because these brands generate significant revenues and incur significant expenses in euro, sterling or the Australian dollar. Accordingly, exchange rate fluctuations of the euro, sterling and Australian dollar against the U.S. dollar will affect our reported financial results since the reporting currency for our consolidated financial statements is the U.S. dollar. Any strengthening of the U.S. dollar against these foreign currencies has the financial statement effect of decreasing the U.S. dollar values reported for cruise revenues and expenses. Any weakening of the U.S. dollar has the opposite effect.

Most of our brands also have non-functional currency risk related to their international sales operations, which has become an increasingly larger part of most of their businesses over time, and primarily includes the euro, sterling and Australian, Canadian and U.S. dollars. In addition, all of our brands have non-functional currency expenses for a portion of their operating expenses. Accordingly, these brands' revenues and expenses in non-functional currencies create some degree of natural offset for recognized transactional currency gains and losses due to currency exchange movements.

We consider our investments in foreign operations to be denominated in relatively stable currencies and of a long-term nature. We partially mitigate our net investment currency exposures by denominating a portion of our foreign currency intercompany payables in our foreign operations' functional currencies, principally sterling. At August 31, 2013 and November 30, 2012, we have designated \$1.9 billion and \$1.8 billion, respectively, of our foreign currency intercompany payables as nonderivative hedges of our net investments in foreign operations. Accordingly, we have included \$327 million and \$243 million of cumulative foreign currency transaction nonderivative gains in the cumulative translation adjustment component of AOCI at August 31, 2013 and November 30, 2012, respectively, which offsets a portion of the losses recorded in AOCI upon translating our foreign operations' net assets into U.S. dollars. During the three and nine months ended August 31, 2013 and 2012, we recognized foreign currency nonderivative transaction (losses) and gains of \$(22) million (\$2 million in 2012) and \$83

Edgar Filing: CARNIVAL CORP - Form 10-Q

million (\$69 million in 2012), respectively, in the cumulative translation adjustment component of AOCI.

Table of Contents

Newbuild Currency Risks

Our shipbuilding contracts are typically denominated in euros. Our decisions regarding whether or not to hedge a non-functional currency ship commitment for our cruise brands are made on a case-by-case basis, taking into consideration the amount and duration of the exposure, market volatility, currency exchange rate correlation, economic trends, our overall expected net cash flows by currency and other offsetting risks. We use foreign currency derivative contracts and have used nonderivative financial instruments to manage foreign currency exchange rate risk for some of our ship construction payments.

In July 2012, we entered into foreign currency zero cost collars that are designated as cash flow hedges for a portion of P&O Cruises (UK)'s *Britannia*'s euro-denominated shipyard payments. These collars mature in February 2015 at a weighted-average ceiling rate of £0.83 to the euro, or \$284 million, and a weighted-average floor rate of £0.77 to the euro, or \$264 million. If the spot rate is between these two rates on the date of maturity, then we would not owe or receive any payments under these collars.

In May 2013, we settled our foreign currency zero cost collars that were designated as cash flow hedges for the final euro-denominated shipyard payments of *Royal Princess* prior to their maturity date, which resulted in an insignificant gain being recognized in other comprehensive income (loss) during the second quarter of 2013. Concurrently with the settlement of these foreign currency zero cost collars, we entered into foreign currency forwards for \$552 million that were also designated as cash flow hedges for the final euro-denominated shipyard payments of *Royal Princess* due in May 2013. These foreign currency forwards settled in May 2013, and we recognized a \$6 million gain in other comprehensive income (loss) during the second quarter of 2013.

At August 31, 2013, substantially all of our remaining newbuild currency exchange rate risk relates to euro-denominated newbuild construction payments for *Regal Princess* and a portion of *Britannia*, which represent a total commitment of \$1.0 billion.

The cost of shipbuilding orders that we may place in the future that is denominated in a different currency than our cruise brands' or the shipyards' functional currency is expected to be affected by foreign currency exchange rate fluctuations. These foreign currency exchange rate fluctuations may affect our desire to order new cruise ships.

Interest Rate Risks

We manage our exposure to fluctuations in interest rates through our investment and debt portfolio management strategies. These strategies include purchasing high quality short-term investments with floating interest rates, and evaluating our debt portfolio as to whether to make periodic adjustments to the mix of fixed and floating rate debt through the use of interest rate swaps and the issuance of new debt or the early retirement of existing debt. At August 31, 2013, 57% and 43% (61% and 39% at November 30, 2012) of our debt bore fixed and floating interest rates, respectively, including the effect of interest rate swaps.

Fuel Price Risks

Our exposure to market risk for changes in fuel prices substantially all relate to the consumption of fuel on our ships. We use our fuel derivatives program to mitigate a portion of our economic risk attributable to potential fuel price increases. We designed our fuel derivatives program to maximize operational flexibility by utilizing derivative markets with significant trading liquidity and our program currently consists of zero cost collars on Brent.

All of our derivatives are based on Brent prices whereas the actual fuel used on our ships is marine fuel. Changes in the Brent prices may not show a high degree of correlation with changes in our underlying marine fuel prices. We will not realize any economic gain or loss upon the monthly maturities of our zero cost collars unless the average monthly price of Brent is above the ceiling price or below the floor price. We believe that these derivatives will act as economic hedges, however hedge accounting is not applied. As part of our fuel derivatives program, we will continue to evaluate various derivative products and strategies. Accordingly, during the second quarter of 2013 we reduced the spread between the floor and ceiling prices for certain of our fuel derivatives that mature in 2014 and 2015.

Table of Contents

At August 31, 2013, our outstanding fuel derivatives consisted of zero cost collars on Brent to cover a portion of our estimated fuel consumption as follows:

Maturities (a)	Transaction Dates	Barrels (in thousands)	Weighted-Average Floor Prices	Weighted-Average Ceiling Prices	Percent of Estimated Fuel Consumption Covered
Fiscal 2013 - Q4					
	November 2011	528	\$ 74	\$ 132	
	February 2012	528	\$ 98	\$ 127	
	March 2012	1,056	\$ 100	\$ 130	
		2,112			42%
Fiscal 2014					
	November 2011	2,112	\$ 85	\$ 114	
	February 2012	2,112	\$ 88	\$ 125	
	June 2012	2,376	\$ 71	\$ 116	
	May 2013	1,728	\$ 85	\$ 108	
		8,328			42%
Fiscal 2015					
	November 2011	2,160	\$ 80	\$ 114	
	February 2012	2,160	\$ 80	\$ 125	
	June 2012	1,236	\$ 74	\$ 110	
	April 2013	1,044	\$ 80	\$ 111	
	May 2013	1,884	\$ 80	\$ 110	
		8,484			42%
Fiscal 2016					
	June 2012	3,564	\$ 75	\$ 108	
	February 2013	2,160	\$ 80	\$ 120	
	April 2013	3,000	\$ 75	\$ 115	
		8,724			43%
Fiscal 2017					
	February 2013	3,276	\$ 80	\$ 115	
	April 2013	2,028	\$ 75	\$ 110	
		5,304			26%

(a) Fuel derivatives mature evenly over each month within the above fiscal periods.

Concentrations of Credit Risk

As part of our ongoing control procedures, we monitor concentrations of credit risk associated with financial and other institutions with which we conduct significant business. Our maximum exposure under foreign currency and fuel derivative contracts and interest rate swap agreements that are in-the-money, which were not significant at August 31, 2013, is the replacement cost, net of any collateral received, in the event of nonperformance by the counterparties to the contracts, all of which are currently our lending banks. We seek to minimize credit risk exposure,

Edgar Filing: CARNIVAL CORP - Form 10-Q

including counterparty nonperformance primarily associated with our cash equivalents, investments, committed financing facilities, contingent obligations, derivative instruments, insurance contracts and new ship progress payment guarantees, by normally conducting business with large, well-established financial institutions, insurance companies and export credit agencies, and by diversifying our counterparties. In addition, we have guidelines regarding credit ratings and investment maturities that we follow to help safeguard liquidity and minimize risk. We normally do require collateral and/or guarantees to support notes receivable on significant asset sales, long-term ship charters and new ship progress payments to shipyards. We currently believe the risk of nonperformance by any of our significant counterparties is remote.

Table of Contents

We also monitor the creditworthiness of travel agencies and tour operators in Europe and credit card providers to which we extend credit in the normal course of our business. Our credit exposure includes contingent obligations related to cash payments received directly by travel agents and tour operators for cash collected by them on cruise sales in most of Europe where we are obligated to extend credit in a like amount to these guests even if we do not receive payment from the travel agents or tour operators. Concentrations of credit risk associated with these receivables and contingent obligations are not considered to be material, primarily due to the large number of unrelated accounts within our customer base, the amount of these contingent obligations and their short maturities. We have experienced only minimal credit losses on our trade receivables and related contingent obligations. We do not normally require collateral or other security to support normal credit sales.

NOTE 5 Segment Information

We have three reportable cruise segments that are comprised of our (1) North America cruise brands, (2) EAA cruise brands and (3) Cruise Support. In addition, we have a Tour and Other segment. Our segments are reported on the same basis as the internally reported information that is provided to our chief operating decision maker (CODM), who is the President and Chief Executive Officer of Carnival Corporation and Carnival plc. Decisions to allocate resources and assess performance for Carnival Corporation & plc are made by the CODM upon review of the segment results across all of our cruise brands and other segments.

Our North America cruise segment includes Carnival Cruise Lines, Holland America Line, Princess and Seabourn. Our EAA cruise segment includes AIDA, Costa, Cunard, Ibero, P&O Cruises (Australia) and P&O Cruises (UK). These individual cruise brand operating segments have been aggregated into two reportable segments based on the similarity of their economic and other characteristics, including types of customers, regulatory environment, maintenance requirements, supporting systems and processes and products and services they provide. Our Cruise Support segment represents certain of our port and related facilities and other corporate-wide services that are provided for the benefit of our cruise brands. Our Tour and Other segment represented the hotel and transportation operations of Holland America Princess Alaska Tours and two of our ships that we chartered to an unaffiliated entity. In April 2013, we sold one of these chartered ships to the unaffiliated entity and recognized a \$15 million gain as a reduction of Tour and Other operating expenses.

Table of Contents

Selected information for our Cruise and Tour and Other segments was as follows (in millions):

	Three Months Ended August 31,						
	Revenues	Operating expenses	Selling and administrative	Depreciation and amortization	Ibero impairment charges	Operating income (loss)	
2013							
North America Cruise Brands (a)	\$ 2,975	\$ 1,820	\$ 248	\$ 235	\$ -	\$ 672	
EAA Cruise Brands	1,704	1,133(b)	163	156	13	239	
Cruise Support	23	(2)	25	7	-	(7)	
Tour and Other (a)	141	83	3	8	-	47	
Intersegment elimination (a)	(117)	(117)	-	-	-	-	
	\$ 4,726	\$ 2,917	\$ 439	\$ 406	\$ 13	\$ 951	

2012							
North America Cruise Brands (a)	\$ 2,934	\$ 1,642	\$ 231	\$ 227	\$ -	\$ 834	
EAA Cruise Brands	1,657	956	153	140	-	408	
Cruise Support	22	(5)	23	6	-	(2)	
Tour and Other (a)	158	91	2	10	-	55	
Intersegment elimination (a)	(87)	(87)	-	-	-	-	
	\$ 4,684	\$ 2,597	\$ 409	\$ 383	\$ -	\$ 1,295	

	Nine Months Ended August 31,						
	Revenues	Operating expenses	Selling and administrative	Depreciation and amortization	Ibero impairment charges	Operating income (loss)	
2013							
North America Cruise Brands (a)	\$ 7,212	\$ 4,837	\$ 762	\$ 691	\$ -	\$ 922	
EAA Cruise Brands	4,464	3,147(b)	494	449	13	361	
Cruise Support	73	34	85	18	-	(64)	
Tour and Other (a)	177	113	6	28	-	30	
Intersegment elimination (a)	(128)	(128)	-	-	-	-	
	\$ 11,798	\$ 8,003	\$ 1,347	\$ 1,186	\$ 13	\$ 1,249	

2012							
North America Cruise Brands (a)	\$ 7,186	\$ 4,670	\$ 706	\$ 669	\$ -	\$ 1,141	
EAA Cruise Brands	4,462	3,063	467	417	173	342	
Cruise Support	64	4	82	19	-	(41)	
Tour and Other (a)	186	126	6	30	-	24	
Intersegment elimination (a)	(94)	(94)	-	-	-	-	
	\$ 11,804	\$ 7,769	\$ 1,261	\$ 1,135	\$ 173	\$ 1,466	

(a) A portion of the North America cruise brands segment revenues include revenues for the tour portion of a cruise when a land tour package is sold along with a cruise by Holland America Line and Princess. These intersegment tour revenues, which are included in our Tour and

Edgar Filing: CARNIVAL CORP - Form 10-Q

Other segment, are eliminated directly against the North America cruise brands' segment revenues and operating expenses in the line Intersegment elimination.

- (b) Includes \$176 million of ship impairment charges related to two smaller Costa ships.

Table of Contents

NOTE 6 Earnings Per Share

Our basic and diluted earnings per share were computed as follows (in millions, except per share data):

	Three Months Ended August 31,		Nine Months Ended August 31,	
	2013	2012	2013	2012
Net income for basic and diluted earnings per share	\$ 934	\$ 1,330	\$ 1,012	\$ 1,205
Weighted-average common and ordinary shares outstanding	775	778	775	778
Dilutive effect of equity plans	2	1	2	1
Diluted weighted-average shares outstanding	777	779	777	779
Basic earnings per share	\$ 1.20	\$ 1.71	\$ 1.31	\$ 1.55
Diluted earnings per share	\$ 1.20	\$ 1.71	\$ 1.30	\$ 1.55
Anti-dilutive equity awards excluded from diluted earnings per share computations	5	9	5	9

NOTE 7 Shareholders Equity

During the nine months ended August 31, 2013, we repurchased 2.8 million shares of Carnival Corporation common stock for \$103 million under our general repurchase authorization program (Repurchase Program). From September 1, 2013 through September 23, 2013, no shares of Carnival Corporation common stock or Carnival plc ordinary shares were repurchased under the Repurchase Program. At September 23, 2013, the remaining availability under the Repurchase Program was \$975 million.

During the nine months ended August 31, 2013, Carnival Investments Limited, a subsidiary of Carnival Corporation, sold 0.9 million of Carnival plc ordinary shares for net proceeds of \$35 million. Substantially all of the net proceeds from these sales were used to purchase 0.9 million shares of Carnival Corporation common stock. Pursuant to our Stock Swap (Stock Swap) program, Carnival Corporation sold these Carnival plc ordinary shares owned by Carnival Investments Limited only to the extent it was able to repurchase shares of Carnival Corporation common stock in the U.S. on at least an equivalent basis.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Note Concerning Factors That May Affect Future Results

Some of the statements, estimates or projections contained in this joint Quarterly Report on Form 10-Q are forward-looking statements that involve risks, uncertainties and assumptions with respect to us, including some statements concerning future results, outlooks, plans, goals and other events which have not yet occurred. These statements are intended to qualify for the safe harbors from liability provided by Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We have tried, whenever possible, to identify these statements by using words like will, may, could, should, would, believe, depends, expect, goal, anticipate, forecast, future, target, indicate and similar expressions of future intent or the negative of such terms.

Forward-looking statements include those statements that may impact, among other things, the forecasting of our non-GAAP earnings per share (EPS); net revenue yields; booking levels; pricing; occupancy; operating, financing and tax costs, including fuel expenses; costs per available lower berth day (ALBD); estimates of ship depreciable lives and residual values; liquidity; goodwill and trademark fair values and outlook. Because forward-looking statements involve risks and uncertainties, there are many factors that could cause our actual results, performance or achievements to differ materially from those expressed or implied in this joint Quarterly Report on Form 10-Q. These factors include, but are not limited to, the following:

- general economic and business conditions;
- increases in fuel prices;
- incidents, the spread of contagious diseases and threats thereof, adverse weather conditions or other natural disasters and other incidents affecting the health, safety, security and satisfaction of guests and crew;
- the international political climate, armed conflicts, terrorist and pirate attacks, vessel seizures, and threats thereof, and other world events affecting the safety and security of travel;
- negative publicity concerning the cruise business in general or us in particular, including any adverse environmental impacts of cruising;
- litigation, enforcement actions, fines or penalties;
- economic, market and political factors that are beyond our control, which could increase our operating, financing and other costs;
- changes in and compliance with laws and regulations relating to the protection of persons with disabilities, employment, environment, health, safety, security, tax and other regulations under which we operate;
- our ability to implement our shipbuilding programs and ship repairs, maintenance and refurbishments on terms that are favorable or consistent with our expectations;
- increases to our repairs and maintenance expenses and refurbishment costs as our fleet ages;
- lack of continuing availability of attractive, convenient and safe port destinations;
- continuing financial viability of our travel agent distribution system, air service providers and other key vendors in our supply chain and reductions in the availability of, and increases in the pricing for, the services and products provided by these vendors;
- disruptions and other damages to our information technology and other networks and operations, and breaches in data security;
- failure to keep pace with developments in technology;
- competition from and overcapacity in the cruise ship or land-based vacation industry;
- loss of key personnel or our ability to recruit or retain qualified personnel;
- union disputes and other employee relation issues;
- disruptions in the global financial markets or other events that may negatively affect the ability of our counterparties and others to perform their obligations to us;
- the continued strength of our cruise brands and our ability to implement our brand strategies;
- our international operations are subject to additional risks not generally applicable to our U.S. operations;
- geographic regions in which we try to expand our business may be slow to develop and ultimately not develop how we expect;
- our decisions to self-insure against various risks or our inability to obtain insurance for certain risks at reasonable rates;
- fluctuations in foreign currency exchange rates;
- whether our future operating cash flow will be sufficient to fund future obligations and whether we will be able to obtain financing, if necessary, in sufficient amounts and on terms that are favorable or consistent with our expectations;
- risks associated with the dual listed company arrangement; and
- uncertainties of foreign legal systems as Carnival Corporation and Carnival plc are not U.S. corporations.

Forward-looking statements should not be relied upon as a prediction of actual results. Subject to any continuing obligations under applicable law or any relevant stock exchange rules, we expressly disclaim any obligation to disseminate, after the date of this joint Quarterly Report on Form 10-Q, any updates or revisions to any such forward-looking statements to reflect any change in expectations or events, conditions or circumstances on which any such statements are based.

Table of Contents

Outlook

On September 24, 2013, we announced that we expected our non-GAAP diluted earnings (loss) per share for the 2013 fourth quarter and full year would be in the ranges of \$(0.03) to \$0.03 and \$1.51 to \$1.57, respectively (see Key Performance Non-GAAP Financial Indicators). Our 2013 fourth quarter guidance was based on fuel prices of \$687 per metric ton. In addition, this 2013 fourth quarter guidance was based on currency rates of \$1.33 to the euro, \$1.57 to sterling and \$0.93 to the Australian dollar. The fuel and currency assumptions used in our guidance change daily and, accordingly, our forecasts change daily based on the changes in these assumptions.

For the first half of 2014, we presently estimate net revenue yields will be down in a range similar to the second half of 2013. For the full year 2014, net cruise costs excluding fuel per ALBD are expected to be up in a range similar to 2013.

We believe it is more meaningful to evaluate our earnings performance by excluding, among other things, the impact of unrealized gains and losses on fuel derivatives from non-GAAP diluted EPS. Therefore, we do not include any year-to-date impact or future estimates of unrealized gains and losses on fuel derivatives in our non-GAAP EPS guidance. However, we do forecast realized gains and losses on fuel derivatives by applying current Brent prices to the derivatives that settle in the forecast period. Based on this approach and current prices, we are not forecasting any realized gains or losses for the 2013 fourth quarter under our current fuel derivatives portfolio.

The above forward-looking statements involve risks, uncertainties and assumptions with respect to us. There are many factors that could cause our actual results to differ materially from those expressed above including, but not limited to, general economic and business conditions, increases in fuel prices, incidents, spread of contagious diseases, adverse weather conditions, geo-political events, negative publicity and other factors that could adversely impact our revenues, costs and expenses. You should read the above forward-looking statement together with the discussion of these and other risks under Cautionary Note Concerning Factors That May Affect Future Results.

Critical Accounting Estimates

For a discussion of our critical accounting estimates, see Management's Discussion and Analysis of Financial Condition and Results of Operations that is included in the 2012 Form 10-K.

Given the ongoing continued weakness of the Spanish economy and its impact on Ibero's cruise ticket pricing, it is possible that a portion of the net carrying values of Ibero's cruise ships could become impaired. However, we believe that the Spanish economy will recover over the long-term and alternative guest source markets and ship deployments are available for Ibero's cruise ships to enable us to recover their carrying values. At August 31, 2013, the net carrying value of Ibero's cruise ships was \$111 million, excluding *Grand Mistral* that will be rebranded as a Costa ship in November 2013.

For a discussion of our impairment charges recognized during the 2013 third quarter for two smaller Costa ships as well as the results of our annual goodwill and trademark impairment reviews as of July 31, 2013, see Note 4 Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements.

The determination of our cruise brand, cruise ship and trademark fair values includes numerous assumptions that are subject to various risks and uncertainties. We believe that we have made reasonable estimates and judgments in determining whether our goodwill, cruise ships and trademarks have been impaired. However, if there is a change in assumptions used or if there is a change in the conditions or circumstances influencing fair values, then we may need to recognize an impairment charge.

Seasonality

Our revenues from the sale of passenger tickets are seasonal. Historically, demand for cruises has been greatest during our third quarter, which includes the Northern Hemisphere summer months. This higher demand during the third quarter results in higher ticket prices and occupancy levels and, accordingly, the largest share of our operating income is earned during this period. The seasonality of our results also increases due to ships being taken out-of-service for maintenance, which we schedule during non-peak demand periods. In addition, substantially all of Holland America Princess Alaska Tours' revenue and net income is generated from May through September in conjunction with the Alaska cruise season.

Table of Contents**Statistical Information**

	Three Months Ended August 31,		Nine Months Ended August 31,	
	2013	2012	2013	2012
ALBDs (in thousands) (a) (b)	19,248	18,613	55,220	53,706
Passengers carried (in thousands)	2,881	2,804	7,550	7,400
Occupancy percentage (c)	110.7%	110.8%	106.1%	106.3%
Fuel consumption in metric tons (in thousands)	807	823	2,447	2,512
Fuel consumption in metric tons per ALBD	0.042	0.044	0.044	0.047
Fuel cost per metric ton consumed	\$ 674	\$ 659	\$ 678	\$ 708
Currencies				
U.S. dollar to 1	\$ 1.32	\$ 1.24	\$ 1.32	\$ 1.28
U.S. dollar to £1	\$ 1.54	\$ 1.56	\$ 1.55	\$ 1.57
U.S. dollar to Australian dollar	\$ 0.92	\$ 1.02	\$ 1.00	\$ 1.03

- (a) ALBD is a standard measure of passenger capacity for the period, which we use to perform rate and capacity variance analyses to determine the main non-capacity driven factors that cause our cruise revenues and expenses to vary. ALBDs assume that each cabin we offer for sale accommodates two passengers and is computed by multiplying passenger capacity by revenue-producing ship operating days in the period.
- (b) For the three months ended August 31, 2013 compared to the three months ended August 31, 2012, we had a 3.4% capacity increase in ALBDs caused by a 4.0% and 2.5% capacity increase in our North America brands and EAA brands, respectively. Our North America brands capacity increase was primarily driven by the addition of one Princess 3,560-passenger capacity ship, partially offset by more ship dry-dock days in 2013 compared to 2012. Our EAA brands capacity increase was caused by the addition of one AIDA 2,194-passenger capacity ship, partially offset by the sale of one P&O Cruises (Australia) 1,462-passenger capacity ship.

For the nine months ended August 31, 2013 compared to the nine months ended August 31, 2012, we had a 2.8% capacity increase in ALBDs caused by a 4.0% and 2.1% capacity increase in our EAA brands and North America brands, respectively. Our EAA brands capacity increase was caused by the addition of two AIDA 2,194-passenger capacity ships and one Costa 2,984-passenger capacity ship, partially offset by the removal of two Costa ships and the sale of one P&O Cruises (Australia) 1,462-passenger capacity ship. Our North America brands capacity increase was caused by the addition of one Carnival Cruise Lines 3,690-passenger capacity ship and one Princess 3,560-passenger capacity ship, partially offset by more ship dry-dock days in 2013 compared to 2012.

- (c) In accordance with cruise business practice, occupancy is calculated using a denominator of two passengers per cabin even though some cabins can accommodate three or more passengers. Percentages in excess of 100% indicate that on average more than two passengers occupied some cabins.

Three Months Ended August 31, 2013 (2013) Compared to the Three Months Ended August 31, 2012 (2012)**Revenues****Consolidated**

Cruise passenger ticket revenues made up 76% of our 2013 total revenues. Cruise passenger ticket revenues increased by \$37 million, or 1.0%, and remained at \$3.6 billion in both 2013 and 2012. This increase was caused by:

\$121 million 3.4% capacity increase in ALBDs;

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$46 million weaker U.S. dollar against the euro, net of a stronger U.S. dollar against the sterling and Australian dollar (net currency impact) and

\$33 million increase in air transportation revenues from guests who purchased their tickets from us.

These increases were partially offset by:

\$159 million decrease in cruise ticket pricing.

Table of Contents

The remaining 24% of 2013 total revenues were principally comprised of onboard and other cruise revenues, which increased by \$22 million, or 2.3%, to \$987 million in 2013 from \$965 million in 2012. This increase was caused by our 3.4% capacity increase in ALBDs, which accounted for \$33 million. Onboard and other revenues included concession revenues of \$336 million in 2013 and \$334 million in 2012.

North America Brands

Cruise passenger ticket revenues made up 77% of our 2013 total revenues. Cruise passenger ticket revenues increased slightly by \$8 million and remained at \$2.2 billion in both 2013 and 2012. This increase was caused by:

\$88 million 4.0% capacity increase in ALBDs and
\$35 million increase in air transportation revenues from guests who purchased their tickets from us.
These increases were partially offset by:

\$89 million decrease in cruise ticket pricing and
\$25 million 1.3 percentage point decrease in occupancy.
Our cruise ticket pricing decline was driven by promotional discounting at Carnival Cruise Lines.

The remaining 23% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased slightly by \$3 million to \$660 million in 2013 from \$657 million in 2012. This increase was caused by our 4.0% capacity increase in ALBDs, which accounted for \$26 million, partially offset by lower other revenues, which accounted for \$12 million, and a 1.3 percentage point decrease in occupancy, which accounted for \$8 million. Onboard and other revenues included concession revenues of \$229 million in 2013 and \$230 million in 2012.

EAA Brands

Cruise passenger ticket revenues made up 82% of our 2013 total revenues. Cruise passenger ticket revenues increased by \$30 million, or 2.2%, and remained at \$1.4 billion in both 2013 and 2012. This increase was caused by:

\$46 million net currency impact;
\$34 million 2.5% capacity increase in ALBDs and
\$24 million 1.9 percentage point increase in occupancy.
These increases were partially offset by:

\$70 million decrease in cruise ticket pricing.
Our cruise ticket pricing decline, which was affected by the ongoing challenging economic environment in Europe, was driven by our Northern European brands, partially offset by increases at Costa and P&O Cruises (Australia).

The remaining 18% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased by \$17 million, or 5.9%, to \$303 million in 2013 from \$286 million in 2012. Onboard and other revenues included concession revenues of \$107 million in 2013 and \$104 million in 2012.

Costs and Expenses

Consolidated

Operating costs and expenses increased \$320 million, or 12.3%, to \$2.9 billion in 2013 from \$2.6 billion in 2012. This increase was caused by:

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$176 million impairment charges related to two smaller Costa ships;
\$85 million 3.4% capacity increase in ALBDs;
\$34 million increase in air transportation costs related to guests who purchased their tickets from us;
\$33 million additional ship repair and maintenance expenses;
\$32 million net currency impact and
\$15 million special expense assessment from the British Merchant Navy Officers' Pension Fund (MNOPF).

Table of Contents

These increases were partially offset by:

\$29 million lower fuel consumption per ALBD and

\$26 million various other operating expenses, net.

Selling and administrative expenses increased \$30 million, or 7.3%, to \$439 million in 2013 from \$409 million in 2012.

Depreciation and amortization expenses increased \$23 million, or 6.0%, to \$406 million in 2013 from \$383 million in 2012.

A \$13 million impairment charge for Ibero's trademarks was recorded in 2013. See Note 4 Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements for additional discussion of this impairment charge.

Our total costs and expenses as a percentage of revenues increased to 79.9% in 2013 from 72.4% in 2012. Our total costs and expenses as a percentage of revenues, excluding the 2013 ship, trademark and other impairment charges, increased to 75.6% in 2013 from 72.4% in 2012.

North America Brands

Operating costs and expenses increased \$148 million, or 9.5%, to \$1.7 billion in 2013 from \$1.6 billion in 2012. This increase was substantially due to our 4.0% capacity increase in ALBDs, which accounted for \$62 million, additional ship repair and maintenance expenses, which accounted for \$44 million, and an increase in air transportation costs related to guests who purchased their tickets from us, which accounted for \$39 million.

Our total costs and expenses as a percentage of revenues increased to 76.5% in 2013 from 70.7% in 2012.

EAA Brands

Operating costs and expenses increased by \$177 million, or 18.5%, to \$1.1 billion in 2013 from \$1.0 billion in 2012. This increase was caused by:

\$176 million impairment charges related to two smaller Costa ships;

\$32 million net currency impact;

\$24 million 2.5% capacity increase in ALBDs and

\$9 million MNOPF expense.

These increases were partially offset by:

\$18 million lower fuel consumption per ALBD and

\$46 million various other operating expenses, net.

A \$13 million impairment charge for Ibero's trademarks was recorded in 2013.

Our total costs and expenses as a percentage of revenues increased to 86.0% in 2013 from 75.4% in 2012. Our total costs and expenses as a percentage of revenues, excluding the 2013 ship impairment, trademark and other impairment charges, decreased to 74.1% in 2013 from 75.4% in 2012.

Operating Income

Our consolidated operating income decreased \$344 million to \$951 million in 2013 from \$1.3 billion in 2012. Our North America brands operating income decreased \$162 million to \$672 million in 2013 from \$834 million in 2012, and our EAA brands operating income decreased \$169 million to \$239 million in 2013 from \$408 million in 2012. These changes were primarily due to the reasons discussed above.

Nonoperating Expense

Net unrealized gains on fuel derivatives were \$64 million in 2013 compared to \$136 million in 2012. There were no realized gains or losses on fuel derivatives recognized in 2013 compared to \$12 million of realized losses in 2012.

Table of Contents

Key Performance Non-GAAP Financial Indicators

We use net cruise revenues per ALBD (net revenue yields), net cruise costs per ALBD and net cruise costs excluding fuel per ALBD as significant non-GAAP financial measures of our cruise segment financial performance. These measures enable us to separate the impact of predictable capacity changes from the more unpredictable rate changes that affect our business and gains and losses on ship sales including impairments, net that are not part of our core operating business. We believe these non-GAAP measures provide useful information to investors and expanded insight to measure our revenue and cost performance as a supplement to our U.S. generally accepted accounting principles (U.S. GAAP) consolidated financial statements.

Net revenue yields are commonly used in the cruise business to measure a company's cruise segment revenue performance and for revenue management purposes. We use net cruise revenues rather than gross cruise revenues to calculate net revenue yields. We believe that net cruise revenues is a more meaningful measure in determining revenue yield than gross cruise revenues because it reflects the cruise revenues earned net of our most significant variable costs, which are travel agent commissions, cost of air and other transportation, certain other costs that are directly associated with onboard and other revenues and credit card fees. Substantially all of our remaining cruise costs are largely fixed, except for the impact of changing prices and food expenses, once our ship capacity levels have been determined.

Net passenger ticket revenues reflect gross cruise revenues, net of (1) onboard and other revenues, (2) commissions, transportation and other costs and (3) onboard and other cruise costs. Net onboard and other revenues reflect gross cruise revenues, net of (1) passenger ticket revenues, (2) commissions, transportation and other costs and (3) onboard and other cruise costs. Net passenger ticket revenue yields and net onboard and other revenue yields are computed by dividing net passenger ticket revenues and net onboard and other revenues by ALBDs.

Net cruise costs per ALBD and net cruise costs excluding fuel per ALBD are the most significant measures we use to monitor our ability to control our cruise segment costs rather than gross cruise costs per ALBD. We exclude the same variable costs that are included in the calculation of net cruise revenues to calculate net cruise costs with and without fuel to avoid duplicating these variable costs in our non-GAAP financial measures. In addition, during the third quarter of 2013, we changed our definition of net cruise costs with and without fuel to exclude gains and losses on ship sales including impairments, net as they are not considered part of our core operating business and are not included in our non-GAAP net income and non-GAAP EPS. Accordingly, we have changed our previously reported net cruise costs per ALBD and net cruise costs excluding fuel per ALBD for the nine months ended August 31, 2012 from \$124.78 to \$124.11 and \$91.67 to \$91.00, respectively, to exclude losses on ship sales including impairments, net to be consistent with our treatment of these types of charges in our 2013 net cruise costs per ALBD.

In addition, because our EAA cruise brands utilize the euro, sterling and Australian dollar to measure their results and financial condition, the translation of those operations to our U.S. dollar reporting currency results in decreases in reported U.S. dollar revenues and expenses if the U.S. dollar strengthens against these foreign currencies and increases in reported U.S. dollar revenues and expenses if the U.S. dollar weakens against these foreign currencies. Accordingly, we also monitor and report these non-GAAP financial measures assuming the 2013 periods currency exchange rates have remained constant with the 2012 periods rates, or on a constant dollar basis, in order to remove the impact of changes in exchange rates on our non-U.S. dollar cruise operations. We believe that this is a useful measure since it facilitates a comparative view of the changes in our business in a fluctuating currency exchange rate environment.

We believe that the losses on ship sales including impairments, net recognized in the three and nine months ended August 31, 2013 and 2012 are not part of our core operating business and, therefore, are not an indication of our future earnings performance. As such, we believe it is more meaningful for gains and losses on ship sales including impairments, net to be excluded from our net income and EPS and, accordingly, we present non-GAAP net income and non-GAAP EPS excluding these items. In addition, we changed our previously reported non-GAAP EPS for the nine months ended August 31, 2012 from \$1.75 to \$1.80 to exclude losses on ship sales including impairments, net to be consistent with our treatment of these types of charges in our 2013 non-GAAP EPS.

We believe that the goodwill, trademark and other impairment charges recognized in the three and nine months ended August 31, 2013 and 2012 are special charges and, therefore, are also not an indication of our future earnings performance. As such, we also believe it is more meaningful for these impairment charges to be excluded from our net income and EPS and, accordingly, we present non-GAAP net income and non-GAAP EPS excluding these impairment charges.

Under U.S. GAAP, the realized and unrealized gains and losses on fuel derivatives not qualifying as fuel hedges are recognized currently in earnings. We believe that unrealized gains and losses on fuel derivatives are not an indication of our earnings performance since they relate to future periods and may not ultimately be realized in our future earnings. Therefore, we believe it is more meaningful for the unrealized gains and losses on fuel derivatives to be excluded from our net income and EPS and, accordingly, we present non-GAAP net income and non-GAAP EPS excluding these unrealized gains and losses.

Edgar Filing: CARNIVAL CORP - Form 10-Q

We have not included in our earnings guidance the impact of unrealized gains and losses on fuel derivatives because these unrealized amounts involve a significant amount of uncertainty, and we do not believe they are an indication of our future earnings performance. Accordingly, our earnings guidance is presented on a non-GAAP basis only. As a result, we did not present a reconciliation between forecasted non-GAAP diluted EPS guidance and forecasted U.S. GAAP diluted EPS guidance, since we do not believe that the reconciliation information would be meaningful.

Table of Contents

Our consolidated financial statements are prepared in accordance with U.S. GAAP. The presentation of our non-GAAP financial information is not intended to be considered in isolation or as substitute for, or superior to, the financial information prepared in accordance with U.S. GAAP. There are no specific rules for determining our non-GAAP current and constant dollar financial measures and, accordingly, they are susceptible to varying calculations, and it is possible that they may not be exactly comparable to the like-kind information presented by other companies, which is a potential risk associated with using these measures to compare us to other companies.

Consolidated gross and net revenue yields were computed by dividing the gross and net cruise revenues, without rounding, by ALBDs as follows (dollars in millions, except yields):

	Three Months Ended August 31,		
	2013	2013 Constant Dollar	2012
Passenger ticket revenues	\$ 3,598	\$ 3,551	\$ 3,561
Onboard and other revenues	987	980	965
Gross cruise revenues	4,585	4,531	4,526
Less cruise costs			
Commissions, transportation and other	(654)	(643)	(613)
Onboard and other	(144)	(143)	(150)
	(798)	(786)	(763)
Net passenger ticket revenues	2,944	2,908	2,948
Net onboard and other revenues	843	837	815
Net cruise revenues	\$ 3,787	\$ 3,745	\$ 3,763
ALBDs	19,248,129	19,248,129	18,613,416
Gross revenue yields	\$ 238.20	\$ 235.42	\$ 243.18
% decrease vs. 2012	(2.0)%	(3.2)%	
Net revenue yields	\$ 196.79	\$ 194.57	\$ 202.21
% decrease vs. 2012	(2.7)%	(3.8)%	
Net passenger ticket revenue yields	\$ 152.96	\$ 151.09	\$ 158.34
% decrease vs. 2012	(3.4)%	(4.6)%	
Net onboard and other revenue yields	\$ 43.83	\$ 43.48	\$ 43.87
% decrease vs. 2012	(0.1)%	(0.9)%	

Consolidated gross and net cruise costs and net cruise costs excluding fuel per ALBD were computed by dividing the gross and net cruise costs and net cruise costs excluding fuel, without rounding, by ALBDs as follows (dollars in millions, except costs per ALBD):

	Three Months Ended August 31,		
	2013	2013 Constant Dollar	2012
Cruise operating expenses	\$ 2,834	\$ 2,802	\$ 2,506
Cruise selling and administrative expenses	436	433	407

Edgar Filing: CARNIVAL CORP - Form 10-Q

Gross cruise costs	3,270	3,235	2,913
Less cruise costs included above			
Commissions, transportation and other	(654)	(643)	(613)

Table of Contents

Non-GAAP fully diluted earnings per share was computed as follows (in millions, except per share data):

	Three Months Ended August 31,	
	2013	2012
Net income diluted		
U.S. GAAP net income	\$ 934	\$ 1,330
Ship impairments	176	-
Trademark and other impairment charges	27(a)	-
Unrealized gains on fuel derivatives, net	(64)	(136)
Non-GAAP net income	\$ 1,073	\$ 1,194
Weighted-average shares outstanding diluted	777	779
Earnings per share diluted		
U.S. GAAP earnings per share	\$ 1.20	\$ 1.71
Ship impairments	0.23	-
Trademark and other impairment charges	0.03	-
Unrealized gains on fuel derivatives, net	(0.08)	(0.18)
Non-GAAP earnings per share	\$ 1.38	\$ 1.53

(a) Includes impairments of \$13 million for Ibero's remaining trademarks and \$14 million related to an investment.

Net cruise revenues increased slightly by \$24 million and remained at \$3.8 billion in both 2013 and 2012. This increase was caused by a 3.4% capacity increase in ALBDs, which accounted for \$128 million, and net currency impact, which accounted for \$43 million, partially offset by our 3.8% decrease in constant dollar net revenue yields, which accounted for \$145 million. The 3.8% decrease in net revenue yields on a constant dollar basis was comprised of a 4.6% decrease in net passenger ticket revenue yields and a slight decrease in net onboard and other revenue yields. The 4.6% decrease in net passenger ticket revenue yields was driven by our North America brands' 5.4% net yield decrease, which was primarily due to promotional discounting at Carnival Cruise Lines. In addition, our EAA brands' net passenger ticket revenue yields decreased 3.0%, which was affected by the ongoing challenging economic environment in Europe. Our EAA brands' decline in net passenger ticket revenue yields was driven by our Northern European brands, partially offset by increases at Costa and P&O Cruises (Australia). Gross cruise revenues increased \$59 million, or 1.3%, to \$4.6 billion in 2013 from \$4.5 billion in 2012 for largely the same reasons as discussed above.

Net cruise costs excluding fuel increased \$143 million, or 8.9%, to \$1.8 billion in 2013 from \$1.6 billion in 2012. The increase was caused by a 4.6% increase in constant dollar net cruise costs excluding fuel per ALBD, which accounted for \$76 million, our 3.4% capacity increase in ALBDs, which accounted for \$55 million, and net currency impact, which accounted for \$13 million. The 4.6% increase in constant dollar net cruise costs excluding fuel per ALBD was caused by additional ship repair and maintenance expenses, which accounted for \$33 million, the MNOPF expense, which accounted for \$15 million, and various other operating expenses, net, which accounted for \$28 million.

Fuel costs increased slightly by \$3 million to \$544 million in 2013 from \$541 million in 2012. This increase was caused by our 3.4% capacity increase in ALBDs, which accounted for \$19 million, and higher fuel prices, which accounted for \$12 million, partially offset by lower fuel consumption per ALBD, which accounted for \$29 million.

Gross cruise costs increased \$357 million, or 12.3%, to \$3.3 billion in 2013 from \$2.9 billion in 2012 for principally the same reasons as discussed above.

Nine Months Ended August 31, 2013 (2013) Compared to the Nine Months Ended August 31, 2012 (2012)

Revenues

Consolidated

Cruise passenger ticket revenues made up 76% of our 2013 total revenues. Cruise passenger ticket revenues decreased slightly by \$49 million and remained at \$9.0 billion in both 2013 and 2012. This decrease was caused by:

\$313 million decrease in cruise ticket pricing;

\$14 million decrease in air transportation revenues from guests who purchased their tickets from us and

\$13 million slight decrease in occupancy.

Table of Contents

These decreases were partially offset by:

\$254 million 2.8% capacity increase in ALBDs and
\$41 million net currency impact.

The remaining 24% of 2013 total revenues were substantially all comprised of onboard and other cruise revenues, which increased by \$52 million, or 2.0%, to \$2.7 billion in 2013 from \$2.6 billion in 2012. This increase was caused by our 2.8% capacity increase in ALBDs, which accounted for \$74 million, partially offset by lower other revenues, which accounted for \$22 million. Onboard and other revenues included concession revenues of \$842 million in 2013 and \$825 million in 2012.

North America Brands

Cruise passenger ticket revenues made up 75% of our 2013 total revenues. Cruise passenger ticket revenues decreased slightly by \$13 million and remained at \$5.3 billion in both 2013 and 2012. This decrease was caused by:

\$107 million decrease in cruise ticket pricing and
\$48 million slight decrease in occupancy.

These decreases were partially offset by:

\$110 million 2.1% capacity increase in ALBDs and
\$29 million increase in air transportation revenues from guests who purchased their tickets from us.

Our cruise ticket pricing decline was driven by promotional discounting at Carnival Cruise Lines.

The remaining 25% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased slightly by \$6 million and remained at \$1.8 billion in both 2013 and 2012. This increase was caused by our 2.1% capacity increase in ALBDs, which accounted for \$37 million, partially offset by a slight decrease in occupancy, which accounted for \$16 million, and lower onboard and other revenues, which accounted for \$15 million. Onboard and other revenues included concession revenues of \$560 million in 2013 and \$555 million in 2012.

EAA Brands

Cruise passenger ticket revenues made up 82% of our 2013 total revenues. Cruise passenger ticket revenues decreased slightly by \$34 million to \$3.6 billion in 2013 from \$3.7 billion in 2012. This decrease was caused by:

\$209 million decrease in cruise ticket pricing and
\$52 million decrease in air transportation revenues from guests who purchased their tickets from us.

These decreases were partially offset by:

\$148 million 4.0% capacity increase in ALBDs;
\$45 million 1.2 percentage point increase in occupancy and
\$41 million net currency impact.

Our cruise ticket pricing decline, which was affected by the ongoing challenging economic environment in Europe, was driven by our Northern European brands, partially offset by increases at P&O Cruises (Australia).

The remaining 18% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased by \$36 million, or 4.6%, to \$818 million in 2013 from \$782 million in 2012. This increase was principally due to our 4.0% capacity increase in ALBDs, which accounted

Edgar Filing: CARNIVAL CORP - Form 10-Q

for \$31 million. Onboard and other revenues included concession revenues of \$282 million in 2013 and \$270 million in 2012.

Costs and Expenses

Consolidated

Operating costs and expenses increased \$234 million, or 3.0%, to \$8.0 billion in 2013 from \$7.8 billion in 2012. This increase was caused by:

\$216 million 2.8% capacity increase in ALBDs;

\$176 million impairment charges related to two smaller Costa ships;

Table of Contents

\$53 million additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;
 \$28 million net currency impact;
 \$20 million additional ship repair and maintenance expenses;
 \$17 million nonrecurrence in 2013 of hull and machinery insurance proceeds for the total loss of a ship in excess of its net book value resulting from the 2012 Ship Incident (Costa's excess insurance proceeds);
 \$17 million nonrecurrence in 2013 of a gain from a litigation settlement related to a Cunard ship's propulsion pods (Cunard's litigation settlement);
 \$17 million higher insurance premiums and
 \$15 million MNOPF expense.

These increases were partially offset by:

\$96 million lower fuel consumption per ALBD;
 \$75 million decreases in commissions, transportation and other related expenses caused by lower cruise ticket pricing and a decrease in air transportation costs related to guests who purchased their tickets from us;
 \$74 million lower fuel prices;
 \$34 million nonrecurrence in 2013 of the 2012 *Costa Allegra* ship impairment charge and
 \$29 million nonrecurrence in 2013 of the 2012 Ship Incident related expenses.

Selling and administrative expenses increased \$86 million, or 6.8%, and remained at \$1.3 billion in both 2013 and 2012.

Depreciation and amortization expenses increased \$51 million, or 4.5%, to \$1.2 billion in 2013 from \$1.1 billion in 2012.

In 2013, a \$13 million impairment charge was recorded for Ibero's trademarks. In 2012, \$173 million of impairment charges were recorded for Ibero's goodwill and trademarks.

Our total costs and expenses as a percentage of revenues increased to 89.4% in 2013 from 87.6% in 2012.

North America Brands

Operating costs and expenses increased \$133 million, or 2.9%, to \$4.7 billion in 2013 from \$4.6 billion in 2012. This increase was caused by:

\$95 million 2.1% capacity increase in ALBDs;
 \$53 million additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;
 \$43 million additional ship repair and maintenance expenses and
 \$43 million increase in air transportation costs related to guests who purchased their tickets from us.

These increases were partially offset by:

\$42 million lower fuel consumption per ALBD;
 \$39 million intersegment transaction related to intersegment insurance reimbursements, which was fully offset in our Cruise Support segment and
 \$28 million lower fuel prices.

Our total costs and expenses as a percentage of revenues increased to 87.0% in 2013 from 83.9% in 2012.

EAA Brands

Operating costs and expenses increased \$84 million, or 2.7%, and remained at \$3.1 billion in both 2013 and 2012. This increase was caused by:

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$176 million impairment charges related to two smaller Costa ships;
\$123 million 4.0% capacity increase in ALBDs;
\$28 million net currency impact;
\$17 million nonrecurrence in 2013 of Costa's excess insurance proceeds;
\$17 million nonrecurrence in 2013 of a gain from Cunard's litigation settlement and
\$9 million MNOPF expense.

Table of Contents

These increases were partially offset by:

\$110 million decreases in commissions, transportation and other related expenses caused by lower cruise ticket pricing and a decrease in air transportation costs related to guests who purchased their tickets from us;
 \$54 million lower fuel consumption per ALBD;
 \$45 million lower fuel prices;
 \$34 million nonrecurrence in 2013 of the 2012 *Costa Allegra* impairment charge and
 \$29 million nonrecurrence in 2013 of the 2012 Ship Incident related expenses.

In 2013, a \$13 million impairment charge was recorded for Ibero's trademarks. In 2012, \$173 million of impairment charges were recorded for Ibero's goodwill and trademarks.

Our total costs and expenses as a percentage of revenues decreased to 91.9% in 2013 from 92.3% in 2012.

Operating Income

Our consolidated operating income decreased \$217 million to \$1.2 billion in 2013 from \$1.5 billion in 2012. Our North America brands operating income decreased \$219 million to \$922 million in 2013 from \$1.1 billion in 2012, and our EAA brands operating income increased \$19 million to \$361 million in 2013 from \$342 million in 2012. These changes were primarily due to the reasons discussed above.

Key Performance Non-GAAP Financial Indicators

Consolidated gross and net revenue yields were computed by dividing the gross and net cruise revenues, without rounding, by ALBDs as follows (dollars in millions, except yields):

	Nine Months Ended August 31,		
	2013	2013 Constant Dollar	2012
Passenger ticket revenues	\$ 8,951	\$ 8,909	\$ 9,000
Onboard and other revenues	2,670	2,664	2,618
Gross cruise revenues	11,621	11,573	11,618
Less cruise costs			
Commissions, transportation and other	(1,777)	(1,766)	(1,793)
Onboard and other	(385)	(385)	(404)
	(2,162)	(2,151)	(2,197)
Net passenger ticket revenues	7,174	7,143	7,207
Net onboard and other revenues	2,285	2,279	2,214
Net cruise revenues	\$ 9,459	\$ 9,422	\$ 9,421
ALBDs	55,220,366	55,220,366	53,705,889
Gross revenue yields	\$ 210.44	\$ 209.60	\$ 216.33
% decrease vs. 2012	(2.7)%	(3.1)%	
Net revenue yields	\$ 171.28	\$ 170.63	\$ 175.42

Edgar Filing: CARNIVAL CORP - Form 10-Q

% decrease vs. 2012		(2.4)%		(2.7)%	
Net passenger ticket revenue yields	\$	129.91	\$	129.36	\$ 134.19
% decrease vs. 2012		(3.2)%		(3.6)%	
Net onboard and other revenue yields	\$	41.37	\$	41.27	\$ 41.24
% increase vs. 2012		0.3%		0.1%	

Table of Contents

Consolidated gross and net cruise costs and net cruise costs excluding fuel per ALBD were computed by dividing the gross and net cruise costs and net cruise costs excluding fuel, without rounding, by ALBDs as follows (dollars in millions, except costs per ALBD):

	Nine Months Ended August 31,		
	2013	2013 Constant Dollar	2012
Cruise operating expenses	\$ 7,890	\$ 7,862	\$ 7,643
Cruise selling and administrative expenses	1,341	1,338	1,255
Gross cruise costs	9,231	9,200	8,898
Less cruise costs included above			
Commissions, transportation and other	(1,777)	(1,766)	(1,793)
Onboard and other	(385)	(385)	(404)
Losses on ship sales including impairments, net	(178)	(167)	(36)
Net cruise costs	6,891	6,882	6,665
Less fuel	(1,659)	(1,659)	(1,778)
Net cruise costs excluding fuel	\$ 5,232	\$ 5,223	\$ 4,887
ALBDs	55,220,366	55,220,366	53,705,889
Gross cruise costs per ALBD	\$ 167.17	\$ 166.61	\$ 165.68
% increase vs. 2012	0.9%	0.6%	
Net cruise costs per ALBD	\$ 124.79	\$ 124.62	\$ 124.11
% increase vs. 2012	0.6%	0.4%	
Net cruise costs excluding fuel per ALBD	\$ 94.76	\$ 94.59	\$ 91.00
% increase vs. 2012	4.1%	3.9%	

Table of Contents

Non-GAAP fully diluted earnings per share was computed as follows (in millions, except per share data):

	Nine Months Ended August 31,	
	2013	2012
Net income diluted		
U.S. GAAP net income	\$ 1,012	\$ 1,205
Losses on ship sales including impairments, net	163(a)	36(b)
Goodwill, trademark and other impairment charges	27	173
Unrealized gains on fuel derivatives, net	(5)	(12)
Non-GAAP net income	\$ 1,197	\$ 1,402
Weighted-average shares outstanding diluted	777	779
Earnings per share diluted		
U.S. GAAP earnings per share	\$ 1.30	\$ 1.55
Losses on ship sales including impairments, net	0.21(a)	0.05(b)
Goodwill, trademark and other impairment charges	0.03	0.22
Unrealized gains on fuel derivatives, net	-	(0.02)
Non-GAAP earnings per share	\$ 1.54	\$ 1.80

(a) Substantially due to \$176 million of impairment charges related to two smaller Costa ships, partially offset by a \$15 million gain in our Tour and Other segment from the sale of a former Holland America Line ship, which was on charter to an unaffiliated entity.

(b) Substantially all due to a \$34 million *Costa Allegra* impairment charge.

Net cruise revenues increased slightly by \$38 million to \$9.5 billion in 2013 from \$9.4 billion in 2012. This was caused by our 2.8% capacity increase in ALBDs, which accounted for \$266 million, and net currency impact, which accounted for \$36 million, partially offset by a 2.7% decrease in constant dollar net revenue yields, which accounted for \$265 million. The 2.7% decrease in net revenue yields on a constant dollar basis was caused by a 3.6% decrease in net passenger ticket revenue yields, partially offset by a slight increase in net onboard and other revenue yields. The 3.6% decrease in net passenger ticket revenue yields was driven by our North America brands' 3.0% net yield decrease, which was primarily due to promotional discounting at Carnival Cruise Lines. In addition, our EAA brands' net passenger ticket revenue yields decreased 4.2%, which was affected by the ongoing challenging economic environment in Europe. Our EAA brands' decline in net passenger ticket revenue yields was driven by our Northern European brands, partially offset by increases at P&O Cruises (Australia). Gross cruise revenues increased slightly by \$3 million and remained at \$11.6 billion in both 2013 and 2012 for largely the same reasons as discussed above.

Net cruise costs excluding fuel increased \$345 million, or 7.1%, to \$5.2 billion in 2013 from \$4.9 billion in 2012. The increase was caused by a 3.9% increase in constant dollar net cruise costs excluding fuel per ALBD, which accounted for \$198 million, our 2.8% capacity increase in ALBDs, which accounted for \$138 million, and net currency impact, which accounted for \$9 million. The 3.9% increase in constant dollar net cruise costs excluding fuel per ALBD was caused by:

- \$53 million additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;
- \$20 million additional ship repair and maintenance expenses;
- \$17 million nonrecurrence in 2013 of Costa's excess insurance proceeds;
- \$17 million nonrecurrence in 2013 of a gain from Cunard's litigation settlement;
- \$17 million higher insurance premiums;

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$15 million MNOPF expense and
\$88 million various other operating expenses, net.
These increases were partially offset by:

\$29 million nonrecurrence in 2013 of the 2012 Ship Incident related expenses.
Fuel costs decreased \$119 million, or 6.7%, to \$1.7 billion in 2013 from \$1.8 billion in 2012. This was caused by lower fuel consumption per ALBD, which accounted for \$96 million, lower fuel prices, which accounted for \$74 million, partially offset by our 2.8% capacity increase in ALBDs, which accounted for \$50 million.

Gross cruise costs increased \$333 million, or 3.7%, to \$9.2 billion in 2013 from \$8.9 billion in 2012 for principally the same reasons as discussed above.

Table of Contents

Liquidity, Financial Condition and Capital Resources

Our primary financial goals are to profitably grow our cruise business, while maintaining a strong balance sheet. Our ability to generate significant operating cash flows allows us to internally fund all of our capital investment program and still have free cash flow, which we intend to return to shareholders. Other objectives of our capital structure policy are to maintain an acceptable level of liquidity with our available cash and cash equivalents and committed financings for immediate and future liquidity needs, and a reasonable debt maturity profile that is spread out over a number of years.

Based on our historical results, projections and financial condition, we believe that our future operating cash flows and liquidity will be sufficient to fund all of our expected capital projects including shipbuilding commitments, ship improvements, debt service requirements, working capital needs and other firm commitments over the next several years. However, as we intend to continue to return all of our free cash flow to shareholders, we expect to issue debt in the future to supplement our committed ship financings in order to repay certain of our debt as it matures. We believe that our ability to generate significant operating cash flows and our strong balance sheet as evidenced by our investment grade credit ratings provide us with the ability in most financial credit market environments to obtain such debt financing. However, our future operating cash flows and our ability to issue debt can be adversely impacted by numerous factors outside our control including, but not limited to, those noted under **Cautionary Note Concerning Factors That May Affect Future Results**. In June 2013, Moody's downgraded our senior unsecured credit ratings to Baa1. This downgrade will not have a significant impact on our operating results. However, if our long-term senior unsecured credit ratings were to be further downgraded, our access to, and cost of, debt financing may be negatively impacted.

At August 31, 2013, we had a working capital deficit of \$4.9 billion. This deficit included \$3.0 billion of current customer deposits, which represent the passenger revenues we collected within a year in advance of sailing dates and, accordingly, are substantially more like deferred revenue balances rather than actual current cash liabilities. Our August 31, 2013 working capital deficit also included \$2.2 billion of current debt obligations, which are substantially related to our publicly-traded notes, export credit facilities, bank loans and other debt. We continue to generate substantial cash from operations and have a strong balance sheet. This strong balance sheet provides us with the ability to refinance our current debt obligations before, or as they become due, in most financial credit market environments. We also have our revolving credit and other facilities available to provide long-term rollover financing should the need arise, or if we choose to do so. After excluding current customer deposits and current debt obligations from our August 31, 2013 working capital deficit balance, our non-GAAP adjusted working capital was \$352 million. Our business model, along with our unsecured revolving credit facilities, allows us to operate with a working capital deficit and still meet our operating, investing and financing needs. We believe we will continue to have working capital deficits for the foreseeable future.

Sources and Uses of Cash

Our business provided \$2.4 billion of net cash from operations during the nine months ended August 31, 2013, a decrease of \$117 million, or 4.7%, compared to \$2.5 billion for the same period in 2012. This decrease was caused by less cash being provided from our operating results, partially offset by less cash being used for our working capital needs.

During the nine months ended August 31, 2013, our expenditures for capital projects were \$1.8 billion, of which \$1.2 billion was spent on our ongoing new shipbuilding program, including \$836 million for the final delivery payments for *AIDAstella* and *Royal Princess*. In addition to our new shipbuilding program, we had capital expenditures of \$490 million for ship improvements and replacements and \$143 million for information technology and other assets. Furthermore, during the nine months ended August 31, 2013, we sold three of our Seabourn ships and received \$70 million in cash proceeds, which represented substantially all of the sales price.

During the nine months ended August 31, 2013, we borrowed a net \$142 million of short-term borrowings in connection with our availability of, and needs for, cash at various times throughout the period. In addition, during the nine months ended August 31, 2013, we issued \$1.0 billion of unsecured publicly-traded notes, of which \$500 million was used to repay a like amount of unsecured floating rate export credit facilities, and also borrowed \$837 million of new long-term debt under two unsecured floating rate export credit facilities. Furthermore, during the nine months ended August 31, 2013 we repaid \$942 million of long-term debt. Finally, during the nine months ended August 31, 2013 we paid cash dividends of \$970 million and purchased \$103 million of shares of Carnival Corporation common stock in open market transactions, net of \$35 million of treasury stock sales under our Stock Swap program.

Future Commitments and Funding Sources

Our contractual cash obligations as of August 31, 2013 have changed compared to November 30, 2012 primarily as a result of our debt borrowings and repayments and ship progress payments as noted above under **Sources and Uses of Cash**.

Edgar Filing: CARNIVAL CORP - Form 10-Q

Due to the 2013 voyage disruptions, we previously announced a corporate-wide operational review of all our ships, which will include lessons learned from the recent incidents to significantly enhance the level of onboard operating redundancies and our fire prevention, detection and suppression systems that can be applied across our fleet. Based on the results of the ongoing review, the latest versions of these technologies and enhancements will be implemented on our fleet where they are not already present. The overall program of enhancements across the fleet is expected to cost between \$600 and \$700 million over the next several years.

Table of Contents

The year-over-year percentage increase in our capacity for the fourth quarter of 2013 is expected to be 3.3%. The year-over-year percentage increase in our annual capacity for 2013, 2014, 2015 and 2016 is currently expected to be 2.9%, 2.1%, 4.3% and 3.8%, respectively. These percentage increases result primarily from contracted new ships entering service and include *Costa Voyager*, *Seabourn Pride*, *Seabourn Spirit* and *Seabourn Legend* leaving the fleet in November 2013, April 2014, April 2015 and May 2015, respectively, and exclude any unannounced future ship orders, acquisitions, retirements, charters or sales.

At August 31, 2013, we had liquidity of \$6.7 billion. Our liquidity consisted of \$738 million of cash and cash equivalents, which excludes \$243 million of cash used for current operations, \$2.4 billion available for borrowing under our revolving credit facilities, net of commercial paper borrowings, and \$3.6 billion under our committed export credit ship financings and one other facility. Of this \$3.6 billion, \$0.2 billion, \$1.1 billion, \$1.0 billion and \$1.4 billion are scheduled to be funded in 2013, 2014, 2015 and 2016, respectively. Substantially all of our revolving credit facilities are scheduled to mature in 2016. These commitments are from numerous large and well-established banks and export credit agencies, which we believe will honor their contractual agreements with us.

Substantially all of our debt agreements contain financial covenants as described in Note 5 Debt in the annual consolidated financial statements, which is included within our 2012 Form 10-K. At August 31, 2013, we believe we were in compliance with our debt covenants. In addition, based on, among other things, our forecasted operating results, financial condition and cash flows, we expect to be in compliance with our debt covenants for the foreseeable future. Generally, if an event of default under any debt agreement occurs, then pursuant to cross default acceleration clauses, substantially all of our outstanding debt and derivative contract payables could become due, and all debt and derivative contracts could be terminated.

Off-Balance Sheet Arrangements

We are not a party to any off-balance sheet arrangements, including guarantee contracts, retained or contingent interests, certain derivative instruments and variable interest entities that either have, or are reasonably likely to have, a current or future material effect on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

At August 31, 2013, 60% and 40% (58% and 42% at November 30, 2012) of our debt was U.S. dollar and euro-denominated, respectively, including the effect of foreign currency swaps.

During the nine months ended August 31, 2013, we entered into zero cost collar fuel derivatives for 15.1 million barrels of Brent to cover a portion of our estimated fuel consumption for 2014 through 2017. See Note 4 Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements for additional discussion of these fuel derivatives. At August 31, 2013, the estimated fair value of our outstanding fuel derivative contracts was an asset of \$11 million.

During January 2013, we entered into interest rate swaps designated as fair value hedges whereby we receive fixed interest rate payments in exchange for making floating interest rate payments. At August 31, 2013, these fair value hedges effectively changed \$500 million of fixed rate debt to U.S. dollar LIBOR-based floating rate debt.

During July 2013, we entered into interest rate swaps designated as cash flow hedges whereby we will receive floating interest rate payments in exchange for making fixed interest rate payments on our *AIDAstella* and *AIDamar* export credit facilities, which will become effective in September 2013 and February 2014, respectively. These cash flow hedges will effectively change \$639 million of EURIBOR-based floating rate debt to fixed rate debt.

For a further discussion of our hedging strategies and market risks, see Note 4 Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements, and Management's Discussion and Analysis of Financial Condition and Results of Operations within our 2012 Form 10-K.

Item 4. Controls and Procedures.

A. Evaluation of Disclosure Controls and Procedures

Edgar Filing: CARNIVAL CORP - Form 10-Q

Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, is recorded, processed, summarized and reported, within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in our reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

Our President and Chief Executive Officer, Chief Operating Officer and Chief Financial Officer have evaluated our disclosure controls and procedures and have concluded, as of August 31, 2013, that they are effective as described above.

B. Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended August 31, 2013 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

On June 25, 2012, an action was filed in the United States District Court for the Central District of California naming as defendants Carnival Corporation, Costa Crociere S.p.A., Micky Arison, Howard Frank, Arnold W. Donald, Joseph Farcus, and Joseph Farcus, Architect, P.A. (Sandoval v. Carnival Corporation). The defendants have been served with the action, although the plaintiffs voluntarily dismissed claims against Costa Crociere S.p.A. The action was filed by two plaintiffs in connection with the 2012 Ship Incident. The plaintiffs allege claims for design defect, negligent training and operations, and gross negligence. On March 21, 2013, the defendants filed a motion to dismiss the plaintiffs claims to Italy based on the *forum non conveniens* doctrine. The defendants also filed a motion for summary judgment on May 23, 2013. Both motions are pending at this time. The plaintiffs have voluntarily dismissed all defendants other than Carnival Corporation. The matter is not currently set for trial pending the court ruling on the outstanding motions.

On July 5, 2012, two actions were filed in the Circuit Court serving Miami-Dade County, Florida naming as defendants Carnival Corporation, Carnival Corporation & plc, Costa Cruise Lines, Inc., Costa Crociere S.p.A. and Joseph Farcus Architect, P.A. (Scimone v. Carnival Corp. and Abeid-Saba v. Carnival Corp.). The defendants have been served with the action. The plaintiffs filed the actions in connection with the 2012 Ship Incident. The plaintiffs allege claims for negligence, product liability, professional negligence and intentional tort. The complaints seek economic and compensatory damages, attorneys' fees, costs and interest. The plaintiffs state they will amend their complaints to state a claim for punitive damages. The defendants removed the cases to the United States District Court for the Southern District of Florida and moved to dismiss the plaintiffs' claims to Italy based on the *forum non conveniens* doctrine and the forum selection clauses in certain of the plaintiffs' Passage Ticket Contracts. The plaintiffs filed motions to remand the cases back to state court. On February 15, 2013, the federal court granted the motions to remand, which were affirmed by the U.S. Court of Appeals for the Eleventh Circuit on July 1, 2013. On July 19, 2013, the state court assigned to hear Abeid-Saba granted the defendants' motion to dismiss all the plaintiffs' claims to Italy based on the *forum non conveniens* doctrine. The same day, the state court assigned to hear Scimone granted the defendants' motion to dismiss all of the foreign plaintiffs' claims to Italy based on the *forum non conveniens* doctrine; however, the motion was denied as to the 17 plaintiffs who are U.S. citizens. The plaintiffs have filed notices of appeal of the dismissal orders in both cases. In Scimone, the defendants have filed a notice of appeal from the denial of its motion to dismiss the claims of the U.S. plaintiffs. On October 28, 2013, a hearing is scheduled on the defendants' motion to dismiss the claims of the U.S. plaintiffs in Scimone based on forum selection clauses in the Passage Ticket Contracts.

On January 9, 2013, an action was filed in the Circuit Court serving Miami-Dade County naming as defendants Carnival Corporation, Carnival plc, Costa Crociere S.p.A. and Costa Cruise Lines, Inc. (Gual v. Carnival Corp.). The defendants were served on June 20, 2013. The plaintiffs, consisting of ten Spanish citizens, filed the action in connection with the 2012 Ship Incident. The plaintiffs allege claims for maritime negligence, negligent hiring, supervision and retention, negligent training, gross negligence, intentional tortious conduct, intentional infliction of emotional distress, wrongful death under Florida law and breach of contract.

On August 28, 2013, the UK Maritime & Coastguard Agency began an investigation into allegations that *Caribbean Princess* breached international pollution laws, and we have begun our own internal investigation. Any potential monetary sanctions are not currently ascertainable.

Item 1A. Risk Factors.

The risk factors that affect our business and financial results are discussed in Item 1A. Risk Factors, included in the 2012 Form 10-K, and there has been no material change to these risk factors since the 2012 Form 10-K filing. We wish to caution the reader that the risk factors discussed in Item 1A. Risk Factors, included in the 2012 Form 10-K, and those described elsewhere in this report or other Securities and Exchange Commission filings, could cause future results to differ materially from those stated in any forward-looking statements. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

A. Repurchase Authorizations

In September 2007, the Boards of Directors authorized, subject to certain restrictions, the repurchase of up to an aggregate of \$1 billion of Carnival Corporation common stock and/or Carnival plc ordinary shares under the Repurchase Program. In January 2013, the Boards of Directors increased the remaining \$165 million under the Repurchase Program back to \$1 billion. The Repurchase Program does not have an expiration date and may be discontinued by our Boards of Directors at any time. During the three months ended August 31, 2013, there were no repurchases of Carnival Corporation common stock or Carnival plc ordinary shares under the Repurchase Program. At September 23, 2013, the remaining availability under the Repurchase Program was \$975 million.

In addition to the Repurchase Program, the Boards of Directors have authorized the repurchase of up to 19.2 million Carnival plc ordinary shares and up to 32.8 million shares of Carnival Corporation common stock under the Stock Swap programs described below. At September 23, 2013, the remaining availability under the Stock Swap programs was 18.1 million Carnival plc ordinary shares and 31.1 million shares of Carnival Corporation common stock.

Carnival plc ordinary share repurchases under both the Repurchase Program and the Stock Swap programs require annual shareholder approval. The existing shareholder approval is limited to repurchasing a maximum of 21.5 million ordinary shares and is valid until the earlier of the conclusion of the Carnival plc 2014 annual general meeting, or October 16, 2014. Depending on market conditions and other factors, we may purchase shares of Carnival Corporation common stock and Carnival plc ordinary shares under the Repurchase Program and the Stock Swap programs concurrently.

B. Stock Swap Programs

We use the Stock Swap programs in situations where we can obtain an economic benefit because either Carnival Corporation common stock or Carnival plc ordinary shares are trading at a price that is at a premium or discount to the price of Carnival plc ordinary shares or Carnival Corporation common stock, as the case may be. This economic benefit is used for general corporate purposes, which could include repurchasing additional stock under the Repurchase Program.

In the event Carnival Corporation common stock trades at a premium to Carnival plc ordinary shares, we may elect to issue and sell shares of Carnival Corporation common stock through a sales agent, from time to time at prevailing market prices in ordinary brokers' transactions, and use the sale proceeds to repurchase Carnival plc ordinary shares in the UK market on at least an equivalent basis. Based on an authorization provided by the Board of Directors in October 2008, Carnival Corporation was authorized to issue and sell up to 19.2 million shares of its common stock in the U.S. market and has 18.1 million shares remaining at September 23, 2013. Any sales of Carnival Corporation shares have been or will be registered under the Securities Act.

In the event Carnival Corporation common stock trades at a discount to Carnival plc ordinary shares, we may elect to sell existing Carnival plc ordinary shares, with such sales made by Carnival Corporation or Carnival Investments Limited through a sales agent, from time to time at prevailing market prices in ordinary brokers' transactions, and use the sale proceeds to repurchase shares of Carnival Corporation common stock in the U.S. market on at least an equivalent basis. Based on an authorization provided by the Board of Directors in January 2013, Carnival Corporation or Carnival Investments Limited was authorized to sell up to 32.8 million Carnival plc ordinary shares in the UK market and has 31.1 million shares remaining at September 23, 2013. Any sales of Carnival plc ordinary shares have been or will be registered under the Securities Act.

During the three months ended February 28, 2013, Carnival Investments Limited sold 865 thousand of Carnival plc ordinary shares through its sales agent, Goldman Sachs International (Goldman), for gross proceeds of \$35 million and paid commission fees to Goldman of \$246 thousand and other governmental and regulatory transaction fees resulting in total net proceeds of \$35 million. Substantially all of the net proceeds from these sales were used to purchase 865 thousand shares of Carnival Corporation common stock. During the three months ended February 28, 2013, no Carnival Corporation common stock was sold and no Carnival plc ordinary shares were repurchased under the Stock Swap program.

During the three months ended May 31, 2013 and August 31, 2013, no Carnival Corporation common stock or Carnival plc ordinary shares were sold or repurchased under the Stock Swap programs.
