#### FORWARD LOOKING STATEMENTS

This presentation contains forward-looking statements based on the beliefs of the company, as well as assumptions made by, and information currently available to our management team.

When used in this presentation, words such as anticipate, project, expect, plan, seek,

goal, estimate, forecast, intend, could, should, will, believe, may, potential and similar expressions and statements regarding our plans and objectives for future operations, are intended to identify forward-looking statements.

Although management believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to be correct. You should not put undue reliance on any forward-looking statements, which speak only as of their dates. Forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those expected, including insufficient cash from operations, adverse market conditions, governmental regulations, the possibility that tax or other costs or difficulties related thereto will be greater than expected, the impact of competition and other risk factors discussed in our latest filings with the Securities and Exchange Commission.

All forward-looking statements attributable to Enterprise or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained herein, in such filings and in our future periodic reports filed with the Securities and Exchange Commission. Except as required by law, we do not intend to update or revise our forward-looking statements, whether as a result of new information, future events or otherwise.

ACQUISITION OF OILTANKING (OILT)

OVERVIEW AND RATIONALE

On October 1, 2014, EPD acquired OILT's GP and related IDRs, 15.9 million OILT common units and 38.9 million OILT subordinated units (which converted one-to-

one to common units on November 17, 2014) for \$4.41 billion of consideration consisting of \$2.21 billion of cash and 54.8 million newly issued EPD common units

On November 11, 2014, EPD and OILT executed merger agreement in which EPD would issue 1.3 EPD common units for each OILT common unit ( \$1.4 billion)

Merger requires approval of holders of simple majority of OILT common units; EPD has agreed to vote its then 54.8 million common units (66% of total OILT common units) in favor of the merger

Total consideration of \$6.0 billion plus \$228 million of OILT debt

Merger expected to be completed in first quarter of 2015

Combines EPD's integrated system of midstream energy infrastructure and access to supplies of NGL, crude oil and refined products with OILT's access to waterborne markets and storage

Expected to be accretive to EPD's distributable cash flow per unit in 2016

22

ACQUISITION OF OILT

PRINCIPLE DRIVERS OF VALUE CREATION

At least \$30 million of synergies and cost savings from the complete integration of  
OILT's business into Enterprise's system as well as public company cost savings

Opportunities

for

new

business

and

repurposing

existing

assets

for

best

use

to

meet the growing demand for export and logistical services for petroleum products related to increase in North American crude oil and NGL production from the shale and non-conventional plays

Secures ownership and control of OILT's assets that are essential to EPD's midstream

EPD is OILT's largest customer, representing 31% of total 2013 revenues;

EPD accounted for 40% of OILT's 2013 earnings before interest, taxes, interest depreciation and amortization (per EPD estimates)

OILT provides essential dock and storage services to EPD LPG export and octane enhancement businesses, which accounted for 10% of EPD's 2013 gross operating margin

Upon completion of EPD's LPG export facility in 2016, EPD assets with a value of \$1.5 billion would be located on land owned by OILT

#### GROSS OPERATING MARGIN

We evaluate segment performance based on the non-GAAP financial measure of gross operating margin. Gross operating margin (either in total or by individual segment) is an important performance measure of the core profitability of our operations. This measure forms the basis of our internal financial reporting and is used by our management in deciding how to allocate capital

resources among business segments. The following table reconciles non-GAAP gross operating margin to operating income, which is the most directly comparable GAAP financial measure to gross operating margin (dollars in millions):

# ADJUSTED EBITDA

Adjusted EBITDA is commonly used as a supplemental financial measure by our management and external users of our financial statements, such as investors, commercial banks, research analysts and ratings agencies to assess: (1) the financial performance of our assets without regard to financing methods, capital structures or historical cost basis; (2) the ability of our assets to generate cash sufficient to pay interest and support our indebtedness; and (3) the viability of projects and the overall rates of return on alternative investment opportunities. Since adjusted EBITDA excludes some, but not all, items that affect net income or loss and because these measures may vary among other companies, the adjusted EBITDA data included in this presentation may not be comparable to similarly titled measures of other companies. The following table reconciles non-GAAP adjusted EBITDA to net cash flows provided by operating activities, which is the most directly comparable GAAP financial measure to adjusted EBITDA (dollars in millions):

Note: Adjusted EBITDA has been presented as if EPD were Enterprise GP Holdings for all periods prior to the Holdings Merger.

**DISTRIBUTABLE CASH FLOW**

Distributable cash flow is an important non-GAAP financial measure for our limited partners since it serves as an indicator of our success

in providing

a cash return

on investment.

Specifically, this

financial measure indicates

to investors whether

or not

we are

generating cash flows at a level that can sustain or support an increase in our quarterly cash distributions. Distributable cash flow is

also

a quantitative

standard used

by the

investment community

with respect to

publicly traded

partnerships because

the

value

of a partnership unit is, in part, measured by its yield, which is based on the amount of cash distributions a partnership can pay a unitholder. The following table reconciles non-GAAP Distributable Cash Flow to net cash flows provided by operating activities, which is the most directly comparable GAAP financial measure to distributable cash flow (dollars in millions):

Note:

Distributable Cash Flow for the period prior to the fourth quarter of 2010 is presented based on the historical results of EPD prior to its acquisition.
