Fair Value Measurements

Fair value is defined as the price that would be received upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

Level 1 – Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.

Level 2 – Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risks associated with investing in those securities. The following is a summary of the Fund's fair value measurements as of the end of the reporting

period:

Incom	ne Tax Information	
The fo	ollowing information is presented on an income tax basis. Differences between amounts for financial statement	
and fe	deral income tax purposes are primarily due to timing differences in recognizing taxable market discount,	
timing	g differences in recognizing certain gains and losses on investment transactions and the treatment of investments	
in inv	erse floating rate securities reflected as financing transactions, if any. To the extent that differences arise that are	
perma	ment in nature, such amounts are reclassified within the capital accounts on the Statement of Assets and	
Liabil	ities presented in the annual report, based on their federal tax basis treatment; temporary differences do not	
requir	e reclassification. Temporary and permanent differences do not impact the net asset value of the Fund.	
The ta	able below presents the cost and unrealized appreciation (depreciation) of the Fund's investment portfolio, as	
deterr	nined on a federal income tax basis, as of July 31, 2018.

(1)	All percentages shown in the Portfolio of Investments are based on net assets.	
	Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There	
(2)	may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be	
	subject to periodic principal paydowns.	
	For financial reporting purposes, the ratings disclosed are the highest of Standard & Poor's Group ("Standard &	
	Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. This treatment of split-rate	
(3)	securities may differ from that used for other purposes, such as for Fund investment policies. Ratings below	
	BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade.	
	Holdings designated N/R are not rated by any of these national rating agencies.	
(4)	Investment, or portion of investment, has been pledged to collateralize the net payment obligations for	
	investments in inverse floating rate transactions.	
(5) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency s		
	which ensure the timely payment of principal and interest.	
(6)	Step-up coupon bond, a bond with a coupon that increases ("steps up"), usually at regular intervals, while the	
( <b>7</b> )	bond is outstanding. The rate shown is the coupon as of the end of the reporting period.	
(7)	Variable rate security. The rate shown is the coupon as of the end of the reporting period.	
(8)	Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board. For fair value measurement disclosure purposes, investment classified as Level 3.	
	As of, or subsequent to, the end of the reporting period, this security is non-income producing. Non-income	
	producing, in the case of a fixed-income security, generally denotes that the issuer has (1) defaulted on the	
(9)	payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's	
(9)	Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has	
	ceased accruing additional income on the Fund's records.	
	Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These
