KONA GRILL, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. Basis of Presentation

Kona Grill, Inc., including its wholly-owned subsidiaries, (referred to herein as the “Company” or “we,” “us,” and “our”) develops, owns and operates upscale casual dining restaurants under the name “Kona Grill.” Our restaurants feature a diverse selection of American favorites and award-winning sushi that are prepared fresh daily. As of September 30, 2015, we owned and operated 33 restaurants in 19 states and Puerto Rico. Subsequent to September 30, 2015, we opened the Miami, Florida and Cincinnati, Ohio locations during October 2015.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”). Accordingly, they do not include all of the information and notes required by U.S. generally accepted accounting principles for complete financial statements. In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine months ended September 30, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015.

The consolidated balance sheet at December 31, 2014 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and notes required by U.S. generally accepted accounting principles for complete financial statements. Accordingly, these financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2014.

The Company has evaluated subsequent events and transactions for potential recognition or disclosure in the financial statements through the day the financial statements are issued.

In April 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2015-03, Interest – Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. This guidance requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying value of that debt liability. The recognition and measurement guidance for debt issuance costs are not affected by this new guidance. We do not expect the adoption of this guidance, effective for us in the first quarter of 2016, to have a material impact on our consolidated financial statements, although it will require retrospective application reducing the amount of debt reflected on our historical consolidated balance sheets.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). The pronouncement was issued to clarify the principles for recognizing revenue and is effective for reporting periods beginning after December 15, 2017. The expected adoption method of ASU 2014-09 is being evaluated by the Company and the adoption is not expected to have a significant impact on the Company's consolidated financial position or results of operations.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330). The pronouncement was issued to simplify the measurement of inventory and changes the measurement from lower of cost or market to lower of cost and net realizable value. This pronouncement is effective for reporting periods beginning after December 15, 2016. The adoption of ASU 2015-11 is not expected to have a significant impact on the Company's consolidated financial position or results of operations.

2. Fair Value Measurements

The carrying value for certain of our financial instruments, including cash and cash equivalents, accounts receivable and accounts payable approximates fair value because of their short-term nature. Our investments represent certificates of deposit and are considered available-for-sale securities that are valued using market observable inputs (Level 2).

3. Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share includes the dilutive effect of potential stock option exercises, calculated using the treasury stock method.

The following table sets forth the computation of basic and diluted net income (loss) per share:

	Three Months Ended September 30, 2015 2014		Nine Months Ended September 30, 2015 2014	
	(In thousands, except per share data)			
Numerator:				
Net income (loss)	\$(1,468)	\$349	\$(2,486)	\$1,619
Denominator:				
Weighted average shares — Basic	11,277	10,984	11,261	9,454
Effect of dilutive stock options	—	289	—	291
Weighted average shares — Diluted	11,277	11,273	11,261	9,745
Net income (loss) per share:				
Basic	\$(0.13)	\$0.03	\$(0.22)	\$0.17
Diluted	\$(0.13)	\$0.03	\$(0.22)	\$0.17

Stock options outstanding that were not included in the dilutive earnings per share calculation because the effect would have been anti-dilutive were 356,000 and 231,000, respectively, for the three months ended September 30, 2015 and 2014, and 291,000 and 194,000, respectively, for the nine months ended September 30, 2015 and 2014.

4. Property and Equipment

Property and equipment consisted of the following (in thousands):

	September 30, 2015	December 31, 2014
Leasehold improvements	\$ 82,035	\$ 69,643
Equipment	22,465	19,378

Furniture and fixtures	9,057	6,950
	113,557	95,971
Less accumulated depreciation and amortization	(52,478)	(46,860)
	61,079	49,111
Construction in progress	19,583	4,823
Total property and equipment, net	\$ 80,662	\$ 53,934

5. Accrued Expenses

Accrued expenses consisted of the following (in thousands):

	September 30, 2015	December 31, 2014
Accrued payroll and benefits	\$ 3,647	\$ 3,280
Accrued construction and remodel costs ⁽¹⁾	5,055	1,067
Gift card liability	1,407	1,961
Sales taxes	1,389	1,354
Accrued occupancy	386	399
Other	1,131	981
Total accrued expenses	\$ 13,015	\$ 9,042

(1) Balance is attributable to property additions for our new restaurants and remodels.

6. Debt and Credit Agreements

On April 19, 2013, we entered into a Credit Agreement for a \$20 million revolving line of credit maturing on April 19, 2017 with KeyBank National Association (“KeyBank”) and Stearns Bank National Association (“Stearns Bank”). On November 7, 2014, we entered into an Amended and Restated Credit Agreement (the “Amended Credit Agreement”) with KeyBank to (i) increase the credit facility from \$20 million to \$35 million, and (ii) extend the maturity date of the credit facility to November 7, 2019. The credit facility is secured by our personal property and assets. Certain of our wholly owned subsidiaries have also guaranteed the credit facility. The entire \$35 million under the credit facility was available at September 30, 2015.

The interest rate under the Amended Credit Agreement is KeyBank’s prime rate or LIBOR, at our option, plus an applicable margin depending on our leverage ratio. The LIBOR margins range from 1.5% to 2.5% and the base rate margins range from 0.5% to 1.5%. Payments on the credit facility are interest only, payable quarterly with respect to each base rate loan and at varying times with respect to LIBOR rate loans, with outstanding principal and interest due at maturity. Prepayment is permitted at any time without penalty, subject to certain restrictions on the order of repayment or prepayment. We are obligated to pay a commitment fee at an annual rate of 0.175% to 0.350%, depending on our leverage ratio, times the unused total revolving commitment of the credit facility based on the average daily amount outstanding under the credit facility for the previous quarter. The commitment fee is payable quarterly in arrears.

During the three months ended September 30, 2015 and 2014, we incurred gross interest expense of \$43,000 and \$65,000, consisting primarily of loan fee amortization of \$21,000 and \$26,000, respectively, and commitment fees of \$22,000 and \$26,000, respectively. During the nine months ended September 30, 2015 and 2014, we incurred gross interest expense of \$137,000 and \$191,000, consisting primarily of loan fee amortization of \$61,000 and \$79,000, respectively, and commitment fees of \$66,000 and \$67,000, respectively.

Unamortized loan fees of \$342,000 at September 30, 2015 are being amortized over the life of the credit facility and are included in other assets in the consolidated balance sheet.

The credit facility also requires us to comply with certain covenants, including (a) a fixed charge coverage ratio of not less than 1.50 and (b) a maximum leverage ratio of 5.0 to 1.0 through March 31, 2016 and 4.75 to 1.0 from April 1, 2016 through the maturity date. We were in compliance with all covenants at September 30, 2015.

7. Income Taxes

Income tax expense of \$25,000 and \$32,000 for the three and nine months ended September 30, 2015 primarily related to state income tax expense for which no state net operating loss carryforwards or other credits existed partially offset by refunds primarily associated with prior year federal income tax. We recognized an income tax benefit of \$25,000 during the three months ended September 30, 2014 and no income tax expense for the nine months ended September 30, 2014 due to projected net operating loss position resulting from our tax planning strategies conducted in 2014 and available credits to offset taxable income.

At September 30, 2015, we had approximately \$17 million in deferred tax assets primarily related to state net operating loss carryforwards and federal business tax credit carryforwards. We have a full valuation allowance for these carryforwards due to the uncertainty surrounding their future utilization. The realization of our deferred tax assets ultimately depends on the existence of sufficient taxable income in the appropriate taxing jurisdictions in future periods. We have analyzed, and will continue to analyze, the positive and negative evidence to support our conclusion regarding the appropriate amount of our valuation allowance. The valuation allowance could be reduced in a subsequent period if there is sufficient evidence to support a conclusion that it is more likely than not that the state net operating loss carryforwards and/or the federal business tax credit carryforwards will be realized. Future changes in our valuation allowance could have a material effect on our results of operations in the period recorded.

8. Stock-Based Compensation

The fair value of stock options granted during the nine months ended September 30, 2015 and 2014 was estimated at the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	Nine Months Ended September 30, 2015 2014	
Expected volatility	40.7%	36.8%
Risk-free interest rate	0.9 %	0.7 %
Expected option life (in years)	3.0	2.9
Dividend yield	0.0 %	0.0 %
Weighted average fair value per option granted	\$6.67	\$4.15

The following table summarizes our stock option activity for the nine months ended September 30, 2015:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Outstanding options at December 31, 2014	740,250	\$ 10.66		
Granted	380,268	23.28		
Forfeited	(52,825)	20.24		
Exercised	(67,200)	7.65		
Outstanding options at September 30, 2015	1,000,493	\$ 15.15	3.1	\$3,330,000
Exercisable at September 30, 2015	370,988	\$ 11.28	2.3	\$2,002,000

We recognized stock-based compensation expense of \$356,000 and \$219,000 during the three months ended September 30, 2015 and 2014, respectively, and \$1,019,000 and \$637,000 during the nine months ended September 30, 2015 and 2014, respectively. As of September 30, 2015, there was \$2.3 million of unrecognized stock-based compensation expense related to unvested stock-based compensation awards, which is expected to be recognized over a weighted average period of 2.7 years.

In April 2015, our shareholders approved an increase of 1.5 million common shares reserved for issuance under our 2012 Stock Award Plan. The total shares of common stock reserved for issuance were 3.7 million, of which 1.5 million shares were available for grant as of September 30, 2015.

9. Common Stock

On April 30, 2015, our shareholders approved an amendment to our certificate of incorporation to increase the number of authorized shares of common stock from 15 million to 30 million.

Stock Purchase and Retirement Program

In May 2012, our Board of Directors authorized a stock repurchase and retirement program of up to \$5,000,000 of our outstanding common stock. The authorization of the program does not have an expiration date and it does not require us to purchase a specific dollar amount of shares. This authorization may be modified, suspended or terminated at any time. The timing and number of shares purchased pursuant to the share purchase authorization are subject to a number of factors, including current market conditions, legal constraints and available cash.

As of September 30, 2015, we repurchased and retired \$3.2 million, or 387,109 shares under the 2012 authorization. We did not repurchase any shares during 2014 or 2015.

Common Stock Offering

On June 25, 2014, we completed a public offering of 2,645,000 shares of our common stock at an offering price of \$18.50 per share. We sold an aggregate of 2,345,000 shares, of which 345,000 shares were sold pursuant to the underwriters' exercise of their option to purchase additional shares. The remaining 300,000 shares were sold by certain selling stockholders. The aggregate net proceeds received for the offering totaled \$40.9 million, reflecting gross proceeds of \$43.4 million, less underwriting expenses of \$2.2 million and other offering costs of \$0.3 million. Net proceeds from the offering are being used for new unit expansion, capital expenditures and general corporate purposes.

10. Commitments and Contingencies

We are engaged in various legal actions, which arise in the ordinary course of our business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of our management, based upon the information available at this time, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the results of operations or financial condition of our company.

On February 10, 2014, Kona Grill Macadamia, Inc., a wholly-owned subsidiary of the Company ("Macadamia"), filed a Motion to Set Aside Default Judgment in the Circuit Court of Jackson County, Kansas City Missouri relating to a default judgment of approximately \$3.5 million entered on December 18, 2013 against Macadamia. The underlying personal injury claim, Frank Neal Goss v. Kona Macadamia, Inc. and Anthony DeAngelo, revolves around a fight that two alleged restaurant patrons had outside of the Company's Kansas City restaurant on March 1, 2011, which is claimed to have resulted in physical injury to the plaintiff. Following the hearing held on April 3, 2014, the Circuit Court issued a written order on April 7, 2014 granting Macadamia's Motion to Set Aside Default Judgment. The underlying personal injury case is proceeding in the Circuit Court. On August 17, 2015, Macadamia filed a Motion for Summary Judgment requesting judgment in its favor on all claims asserted by the plaintiff. On August 18, 2015, the plaintiff filed for a voluntary dismissal of the claim without prejudice. Under Missouri law, the plaintiff has up to one year to re-file the claim. We believe that we have a strong defense to the claim asserted by the plaintiff and insurance coverage should the plaintiff decide to re-file the claim.

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto included in Item 1 of Part I of this Form 10-Q and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2014 contained in our 2014 Annual Report on Form 10-K.

Certain information included in this discussion contains forward-looking statements that involve known and unknown risks and uncertainties, such as statements relating to our future economic performance, plans and objectives for future operations, expectations, intentions and other financial items that are based on our beliefs as well as assumptions made by and information currently available to us. Factors that could cause actual events or results to differ materially from those indicated by these forward-looking statements may include the matters under Item 1A, "Risk Factors" in this report, our Annual Report on Form 10-K for the year ended December 31, 2014 and other reports filed from time to time with the SEC.

Overview

We currently own and operate 35 restaurants located in 19 states and Puerto Rico. We offer freshly prepared food, attentive service, and a contemporary ambiance that create a satisfying yet affordable dining experience that we believe exceeds the experience at many traditional casual dining restaurants with which we compete. Our high-volume polished casual restaurants feature a diverse selection of flavorful American favorites with an international influence and award-winning sushi items. Our menu items are freshly prepared and incorporate over 40 signature sauces and dressings that we make from scratch at each restaurant location, creating broad-based appeal for the lifestyle and taste trends of a diverse group of customers. We believe that our diverse menu and generous portions, combined with an average check of approximately \$25 per person, offer our customers an attractive price-value proposition.

We plan to grow organically through unit expansion, with a goal of 20% unit growth annually over the next several years. We achieved a unit growth rate of 20% for 2014, with five openings during the year. We expect a 23% unit growth for 2015, with seven restaurants scheduled to open during the year, including our San Juan, Puerto Rico restaurant that opened in the first quarter of 2015, our Plano, Texas and Arlington, Virginia restaurants that opened during the second quarter of 2015 and our Miami, Florida and Cincinnati, Ohio restaurants which opened in October 2015. We currently have nine signed leases for new restaurant openings in 2016 and beyond and continue working diligently to build our pipeline for future growth.

In addition, we are exploring expansion into international markets. Given the strength our concept has enjoyed thus far in the U.S. and the increased demand for polished casual dining concepts overseas, we believe there is a significant

opportunity to expand our concept in Latin America, the Middle East and beyond. Similar to other brands with international expansion, we plan to utilize a franchise model for development outside the U.S. Under this model, we will provide training and operational support to our partners without committing or putting our capital at risk in these international markets. We are developing marketing materials, obtaining trademarks in the requisite markets and incurring incremental travel and networking expenses in order to build the right foundation for our growth. We have started to identify potential franchise partners and negotiate franchise agreements. Once a franchise agreement is signed, our partners will need to find quality real estate and construct the restaurants. We will then need to train the local team on our food and hospitality standards to ensure a successful execution of our strategy. We have signed a non-binding letter of intent for the development of Kona Grill restaurants in the Middle East and expect the first international location to open by the end of 2016.

Our same-store sales increased 1.6% year over year, with a 2.8% growth in average check partially offset by a 1.3% decrease in customer traffic. The growth in average guest check reflects the benefit of a menu price increase implemented in April 2015 and shift in menu mix. The 1.6% same-store sales growth in the third quarter of 2015 compares to a 2.7% increase in same-store sales in the third quarter of 2014. We have generated positive same-store sales in each of the last ten quarters and in 20 out of the last 21 quarters.

We continue to focus on growing sales and successfully opening new restaurants. The average unit volume of our comparable base restaurants was \$1.1 million in both the third quarter of 2015 and 2014. We generated a loss from operations of \$1.4 million in the third quarter of 2015 compared to income from operations of \$0.4 million in the third quarter of 2014. Our net loss was \$1.5 million in the third quarter of 2015 compared to net income of \$0.3 million in the third quarter of 2014. In each case, as described in more detail under “Three Months Ended September 30, 2015 Compared with Three Months Ended September 30, 2014,” a significant part of the year over year change was driven by preopening expense related to our growth strategy, incremental operating costs for new restaurant locations, higher depreciation and amortization resulting from new restaurants and remodeling activities and higher general and administrative expenses in support of our accelerated unit growth and international business development.

Our restaurant operating profit, defined as restaurant sales minus cost of sales, labor, occupancy, and restaurant operating expenses, increased to \$5.6 million or 4% from \$5.4 million in the third quarter of 2014. Restaurant operating profit as a percentage of restaurant sales of 15.4% in the third quarter of 2015 included new restaurant operating inefficiencies for the eight locations that opened since the beginning of 2014 and training costs associated with the re-opening of our Denver restaurant compared to the 17.8% in the third quarter of 2014 which included new restaurant operating inefficiencies for the four locations opened since the fourth quarter of 2013. Our Adjusted EBITDA, defined as income from operations plus depreciation and amortization, preopening expense and stock-based compensation, was \$2.8 million and \$3.0 million, respectively, in the third quarter of 2015 and 2014. Adjusted EBITDA as a percentage of restaurant sales was 7.8% in the third quarter of 2015 compared to 9.9% in the same prior year period, reflecting the operating inefficiencies in our new restaurants, our investment in human capital to accelerate our unit growth and start-up costs for international business development. See “Key Measures” and “Financial Performance Overview” below for further information on restaurant operating profit and Adjusted EBITDA, including a reconciliation to our income (loss) from operations.

Our cost of sales, labor, and other operating expenses for our restaurants open at least 12 months generally trend consistently with restaurant sales, and we analyze those costs as a percentage of restaurant sales. Our typical new restaurants experience gradually increasing unit volumes as customers discover our concept and we generate market awareness. We anticipate that our new restaurants will take approximately six to twelve months to achieve the majority of operating efficiencies as a result of challenges typically associated with opening and operating new restaurants, including lack of market recognition and the need to hire and sufficiently train employees, as well as other factors. We expect cost of sales and labor expenses as a percentage of restaurant sales to be higher when we open a new restaurant, but to decrease as a percentage of restaurant sales as the restaurant matures and as the restaurant management and employees become more efficient in operating that unit. Occupancy and a portion of restaurant operating expenses are fixed. As a result, the volume and timing of newly opened restaurants had, and is expected to continue to have, an impact on cost of sales, labor, occupancy, and restaurant operating expenses measured as a percentage of restaurant sales which we expect will continue until these restaurants mature.

Our general and administrative costs are expected to continue to increase for the next several quarters compared to the prior year level as we make investments in development and operations personnel and infrastructure to accelerate new unit growth and incur start-up costs for our international business franchising development. The 2015 year to date increase as compared to the same period in the prior year also reflected higher stock-based compensation expenses. Over the longer term, we expect our general and administrative spending to generally decrease as a percentage of

restaurant sales as we leverage these investments and realize the benefits of higher sales volumes.

We incurred preopening expense of \$1.4 million in the third quarter of 2015 primarily attributable to our Miami, Florida and Cincinnati, Ohio locations that opened in October 2015 and in preparation for the two remaining restaurants scheduled to open in the remainder of 2015. We expect to open seven new restaurants in 2015, including the San Juan, Plano and Arlington locations opened in the first half of 2015 and the aforementioned Miami and Cincinnati locations. Although the actual preopening expenses for a particular location depend upon numerous factors, we expect cash preopening expenses of approximately \$450,000 per location, and non-cash preopening rent expense ranging from \$50,000 to \$100,000 per location. Accordingly, we expect the opening of new units to continue to result in losses or reduce our profitability as significant preopening expenses are incurred while operating profit from the new restaurants will likely not be significant in the first few months of each new restaurant's operation as a result of challenges typically associated with opening new restaurants.

Key Measures We Use to Evaluate Our Company

Key measures we use to evaluate and assess our business include the following:

Number of Restaurant Openings. Number of restaurant openings reflects the number of restaurants opened during a particular reporting period.

Same-Store Sales Percentage Change. Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage change in same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months. We adjust the sales included in the same-store sales calculation for restaurant closures, primarily as a result of remodels, so that the periods will be comparable. Same-store sales growth can be generated by an increase in customer traffic counts or by increases in the per person average check amount. Menu price changes and the mix of menu items sold can affect the per person average check amount.

Average Weekly Sales. Average weekly sales represent the average of restaurant sales for the comparable restaurant base measured over consecutive Monday through Sunday time periods.

Average Unit Volume. Average unit volume represents the average restaurant sales for the comparable restaurant base.

Restaurant Operating Profit. Restaurant operating profit is defined as restaurant sales minus cost of sales, labor, occupancy, and restaurant operating expenses. Restaurant operating profit does not include general and administrative expenses, depreciation and amortization, or preopening expenses. We believe restaurant operating profit is an important component of financial results because it is a widely used metric within the restaurant industry to evaluate restaurant-level productivity, efficiency, and performance prior to application of corporate overhead. We use restaurant operating profit as a percentage of restaurant sales as a key metric to evaluate our restaurants' financial performance compared with our competitors. This measure provides useful information regarding our financial condition and results of operations and allows investors to better determine future financial results driven by growth and to compare restaurant level profitability.

Adjusted EBITDA. Adjusted EBITDA is defined as income from operations plus depreciation and amortization, preopening expense, stock-based compensation and unusual or non-recurring items. Adjusted EBITDA is presented because: (i) we believe it is a useful measure for investors to assess the operating performance of our business without the effect of non-cash items such as depreciation and amortization expenses and stock-based compensation as well as

the costs of opening new restaurants; (ii) we believe that investors will find these measures useful in assessing our ability to service or incur indebtedness; and (iii) we use Adjusted EBITDA internally as a benchmark to evaluate our operating performance and compare our performance to that of our competitors.

Key Financial Definitions

Restaurant Sales. Restaurant sales include gross food and beverage sales, net of promotions and discounts.

Cost of Sales. Cost of sales consists of food and beverage costs and related delivery fees.

Labor. Labor includes all direct and indirect labor costs incurred in operations.

Occupancy. Occupancy includes all rent payments associated with the leasing of real estate, including base, percentage and straight-line rent, property taxes, and common area maintenance expense. We record tenant improvement allowances as a reduction of occupancy expense over the term of the lease.

Restaurant Operating Expenses. Restaurant operating expenses consist of all other restaurant-level operating costs, the major components of which are utilities, credit card fees, advertising, supplies, marketing, repair and maintenance, and other expenses. Other operating expenses contain both variable and fixed components.

General and Administrative. General and administrative includes all corporate and administrative functions that support operations and provide infrastructure to facilitate our future growth. Components of this category include management and staff salaries, bonuses, stock-based compensation and related employee benefits, travel, information systems, human resources, training, corporate rent, professional and consulting fees, and corporate insurance costs.

Preopening Expense. Preopening expense consists of costs incurred prior to opening a new restaurant and is comprised principally of manager salaries and relocation, payroll and related training costs for new employees, including food and beverage costs associated with practice and rehearsal of service activities, and rent expense incurred from the date we obtain possession of the property until opening. We expense restaurant preopening expenses as incurred. We expect preopening expenses to commence six to eight months prior to a restaurant opening. Although the actual preopening expenses for a particular location depend upon numerous factors, our historical cash preopening expenses average approximately \$450,000 per location, and non-cash preopening rent expense that typically ranges from \$50,000 to \$100,000 per location. Our preopening costs will fluctuate from period to period depending upon the number of restaurants opened, the timing of new restaurant openings, the location of the restaurants, and the complexity of the staff hiring and training process.

Depreciation and Amortization. Depreciation and amortization expense consists of the depreciation of property and equipment. Depreciation and amortization expense also includes accelerated depreciation expense and gains or losses on the disposal of fixed assets, primarily associated with remodel activities.

Interest Expense, net. Interest expense consists primarily of the cost of servicing our debt obligations, the amortization of debt issuance costs and commitment fees on the line of credit. Interest expense is offset by interest earned on cash equivalents and investment balances. We capitalize interest incurred on borrowings for restaurant construction.

Income Tax Expense. Income tax expense reflects management's best estimate of the effective tax rate expected to be applicable for the full fiscal year. This estimate will be re-evaluated by management each quarter based on the Company's estimated income tax expense for the year.

Financial Performance Overview

The following table sets forth certain information regarding our financial performance for the three and nine months ended September 30, 2015 and 2014.

	Three Months Ended				Nine Months Ended			
	September 30,				September 30,			
	2015	2014	2015	2014	2015	2014	2015	2014
Restaurant sales growth	19.6	% 22.6	% 19.9	% 18.6	%	%	%	%
Same-store sales percentage change ⁽¹⁾	1.6	% 2.7	% 1.6	% 4.0	%	%	%	%
Average weekly sales – comparable restaurant base	\$84,700	\$83,500	\$86,900	\$85,800				
Average weekly sales – non-comparable restaurant base	\$84,500	\$92,800	\$85,000	\$85,800				
Average unit volume (in thousands) ⁽²⁾	\$1,111	\$1,097	\$3,404	\$3,348				
Sales per square foot ⁽²⁾	\$154	\$156	\$473	\$474				
Restaurant operating profit (in thousands) ⁽³⁾	\$5,550	\$5,352	\$17,614	\$16,093				
Restaurant operating profit as a percentage of sales ⁽³⁾	15.4	% 17.8	% 16.8	% 18.4	%	%	%	%
Adjusted EBITDA (in thousands) ⁽⁴⁾	\$2,805	\$2,987	\$9,106	\$9,127				
Adjusted EBITDA as a percentage of sales ⁽⁴⁾	7.8	% 9.9	% 8.7	% 10.4	%	%	%	%

Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base compared to the prior year. In calculating the percentage change for same-store sales, we include a restaurant ⁽¹⁾ in the comparable restaurant base after it has been in operation for more than 18 months. We remove restaurants from the comparable base for periods in which they are closed, primarily related to remodel activities.

⁽²⁾Includes only those restaurants in the comparable restaurant base.

Restaurant operating profit is not a financial measurement determined in accordance with U.S. generally accepted accounting principles (see reconciliation below) and should not be considered in isolation or as an alternative to income from operations. Restaurant operating profit may not be comparable to the same or similarly titled ⁽³⁾ measures computed by other companies. We believe restaurant operating profit is an important component of financial results because it is a widely used metric within the restaurant industry to evaluate restaurant-level productivity, efficiency, and performance. We use restaurant operating profit as a percentage of restaurant sales as a key metric to evaluate our restaurants' financial performance compared with our competitors.

⁽⁴⁾Adjusted EBITDA is not a financial measure determined in accordance with U.S. generally accepted accounting principles (see reconciliation below) and should not be considered in isolation or as an alternative to income from operations. Adjusted EBITDA is defined as income from operations plus depreciation and amortization, preopening expense, stock-based compensation and unusual or non-recurring items. Adjusted EBITDA is presented because: (i) we believe it is a useful measure for investors to assess the operating performance of our business without the effect of non-cash items such as depreciation and amortization expenses and stock-based

compensation as well as the costs of opening new restaurants; (ii) we believe that investors will find these measures useful in assessing our ability to service or incur indebtedness; and (iii) we use Adjusted EBITDA internally as a benchmark to evaluate our operating performance and compare our performance to that of our competitors.

The following tables set forth our reconciliation of Adjusted EBITDA and restaurant operating profit to our income (loss) from operations, the most comparable U.S. GAAP measure.

	Three Months Ended		Nine Months Ended

Three Months Ended September 30, 2015 Compared with Three Months Ended September 30, 2014

Restaurant Sales. Restaurant sales increased \$5.9 million, or 19.6%, to \$35.9 million during the third quarter of 2015 from \$30.0 million in the third quarter of 2014, primarily attributable to incremental sales from our six restaurants opened since the third quarter of 2014 partially offset by lower sales at our Denver restaurant due to a remodel. Our same-store sales increased 1.6% year over year, with a 2.8% growth in average check resulting from a 1.5% menu price increase in April 2015 and shift in menu mix partially offset by a 1.3% decrease in customer traffic. The 1.6% same-store sales growth in the third quarter of 2015 compares to a 2.7% increase in same-store sales in the third quarter of 2014.

Cost of Sales. Cost of sales increased \$1.4 million, or 17.0% to \$9.8 million in the third quarter of 2015 compared to \$8.4 million in the same prior year period, with the increase attributable to our new locations opened since the third quarter of 2014 more than offset the decrease at our comparable restaurant units. As a percentage of restaurant sales, cost of sales was 27.3% compared to 27.9% in the prior year quarter, primarily reflecting improved kitchen efficiencies for both our comparable and non-comparable restaurants and favorable commodity pricing on chicken, pork and shrimp compared to last year.

Labor. Labor costs increased \$2.6 million, or 25.3%, to \$12.7 million year over year primarily attributable to the new restaurants opened since the third quarter of 2014. Labor expenses as a percentage of restaurant sales increased to 35.3% from 33.7% in the same prior year period, reflecting increased overtime hours as we experienced staffing shortages from a tight labor market, higher benefit costs and labor inefficiencies from our newly opened locations. We expect labor cost as a percentage of sales to typically trend higher upon opening and gradually improve as our new restaurant management and employees become more efficient in operating their restaurants.

Occupancy. Occupancy expenses increased \$0.6 million or 27.9% to \$2.6 million year over year, primarily associated with base rent and common area maintenance charges for new locations opened since the third quarter of 2014. Occupancy expenses as a percentage of restaurant sales were 7.3% in the third quarter of 2015 compared to 6.9% in the third quarter of 2014.

Restaurant Operating Expenses. Restaurant operating expenses increased \$1.1 million, or 27.5%, to \$5.2 million in the third quarter of 2015, primarily due to the additional operating expenses for the new restaurants opened since October 2014. Restaurant operating expenses as a percentage of restaurant sales were 14.6% and 13.7% in the third quarter of 2015 and 2014, respectively.

General and Administrative. General and administrative expenses were \$3.1 million and \$2.6 million in the third quarter of 2015 and 2014, respectively. As a percentage of sales, general and administrative expenses were 8.6% in

both the third quarter of 2015 and 2014. The increased costs reflect human capital investment and additional travel costs to support our unit growth expansion and start-up efforts for our international business development, as well as higher stock-based compensation expense.

Preopening Expense. Preopening expense of \$1.4 million in the third quarter of 2015 was primarily attributable to the Miami, Florida restaurant opened at the beginning of October 2015, and in preparation for the Cincinnati, Ohio restaurant opened in late October 2015 and expenses for the two restaurants scheduled to open for the remainder of the year. Preopening expense of \$0.5 million in the third quarter of 2014 was primarily attributable to the Sarasota, Florida; Alpharetta, Georgia and Columbus, Ohio restaurants which opened in the fourth quarter of 2014.

Depreciation and Amortization. Depreciation and amortization expense increased \$0.6 million or 33.6% to \$2.5 million year over year. Incremental depreciation expense associated with the six new restaurants opened since the third quarter of 2014 more than offset the lower depreciation expense for comparable restaurants due to fully depreciated assets during the quarter. Depreciation and amortization expense as a percentage of restaurant sales was 6.9% and 6.2% of restaurant sales in the third quarter of 2015 and 2014, respectively.

Interest Expense, Net. Net interest expense is attributable to the amortization of deferred loan fees and the commitment fees associated with the KeyBank credit facility partially offset by interest income earned from cash equivalents and investment balances. Interest expense during in the third quarter of 2014 also includes interest expense associated with a sales tax audit pertaining to previous years.

Income Tax Expense. We recorded an income tax expense of \$25,000 primarily relating to state income tax expense for which no net operating loss carryforwards or other credits existed during the third quarter of 2015. We recognized an income tax benefit of \$25,000 during the third quarter of 2014 due to projected net operating loss carryforwards expected to be generated from tax planning strategies and available credits to offset taxable income.

Nine Months Ended September 30, 2015 Compared with Nine Months Ended September 30, 2014

Restaurant Sales. Restaurant sales increased 19.9% to \$105.0 million in year to date 2015 from \$87.5 million in year to date 2014. The increase was due to the additional sales from our eight new restaurants opened since the first quarter of 2014 and an increase in same store sale partially offset by the remodel closure at our Denver location. Our same store sales increased year over year by 1.6%, driven by a 2.1% increase in average guest check, partially offset by a 0.6% decrease in guest traffic.

Cost of Sales. Cost of sales increased \$4.4 million, or 18.4% to \$28.6 million in year to date 2015, with new locations opened since the first quarter of 2014 accounting for \$5.0 million of the total increase. As a percentage of restaurant sales, cost of sales improved 30 basis points to 27.2% from to 27.5% during the same prior year period, primarily reflecting improved kitchen efficiencies for both our comparable and non-comparable restaurants and decreased commodity pricing for chicken, pork and shrimp year over year.

Labor. Labor costs in year to date 2015 grew 23.8% to \$36.5 million compared to \$29.5 million in the comparable prior year period. Incremental labor costs for new locations accounted for \$6.5 million of the total increase. Labor expenses as a percentage of restaurant sales increased to 34.7% compared to 33.6% in the prior year period driven mainly by inefficiencies associated with our newer units, staffing challenges associated with a tight labor market and increased benefit costs year over year due to the Affordable Care Act.

Occupancy. Occupancy expenses increased \$1.6 million or 26.9% to \$7.5 million in the first nine months of 2015 compared to \$5.9 million in the prior year period. Base rent and common area maintenance charges associated with the new locations accounted for the majority of the total year over year increase. Occupancy expenses as a percentage of restaurant sales increased to 7.1% in year to date 2015 compared to 6.7% in the same prior year period.

Restaurant Operating Expenses. Restaurant operating expenses increased \$2.8 million, or 23.7%, to \$14.8 million during the first nine months of 2015 compared to \$12.0 million in the same period in 2014. Restaurant operating expenses as a percentage of restaurant sales were 14.1% in year to date 2015 compared to 13.7% in year to date 2014. Of the total increase, \$2.5 million is attributable to the additional operating expenses associated with our restaurants opened since the beginning of 2014.

General and Administrative. General and administrative expenses increased by \$1.9 million, or 25.3% to \$9.5 million from \$7.6 million year over year. General and administrative expenses increased as a percentage of sales by 40 basis points to 9.1% in year to date 2015 compared to 8.7% in the prior year period. Increased costs associated with additional headcount investment to support our unit growth expansion and start-up efforts for our international franchising strategy, higher travel costs for increased real estate development activities and increased stock-based compensation expense contributed to the year over year increase.

Preopening Expense. Preopening expense was \$3.3 million and \$1.4 million in year to date 2015 and 2014, respectively. Preopening expense in year to date 2015 was primarily attributable to the three locations opened during the first nine months of the year and the four locations opened or scheduled to open during the fourth quarter. Preopening expense during the first nine months of 2014 primarily related to the Fort Worth and El Paso, Texas restaurants which opened in February and June of 2014, respectively, and the Sarasota, Florida, Alpharetta, Georgia and Columbus, Ohio restaurants which opened in the fourth quarter of 2014.

Depreciation and Amortization. Depreciation and amortization expense increased \$1.7 million or 32.2% to \$6.9 million year over year, primarily attributable to the eight new restaurants opened since the first quarter of 2014 and accelerated depreciation expense associated with the remodel of our Denver restaurant. Depreciation and amortization expense as a percentage of restaurant sales was 6.6% and 6.0% of restaurant sales in the first nine months of 2015 and 2014, respectively.

Other Expenses. Other expenses of \$0.2 million in year to date 2015 primarily related to an expected settlement of a state use tax audit which has been ongoing for several years.

Interest Expense. Interest expense decreased in the first nine months of 2015 as compared to the prior year period, primarily due to the repayment of all outstanding borrowings under the KeyBank credit facility in June 2014.

Income Tax Expense. Income tax expense of \$32,000 in year to date 2015 relates to state income tax expense for which no net operating loss carryforwards or other credits existed partially offset by refunds primarily associated with prior year federal income tax. We did not recognize any income tax expense in 2014 year to date due to projected net operating loss carryforwards expected to be generated from tax planning strategies and available credits to offset taxable income.

Potential Fluctuations in Quarterly Results and Seasonality

Our quarterly operating results may fluctuate significantly as a result of a variety of factors, including the following:

- timing of new restaurant openings and related expenses;
- fluctuations in commodity and food protein prices;
- preopening costs for our newly-opened restaurants and operating costs for those locations, which are often materially greater during the first several months of operation than thereafter;
- timing of restaurant remodels and potential lost sales associated with remodel closure;
- labor availability and costs for hourly and management personnel;
- profitability of our restaurants, especially in new markets;
- increases and decreases in comparable restaurant sales;
- impairment of long-lived assets and any loss on restaurant closures;
- changes in borrowings and interest rates;
- general economic conditions;
- weather conditions or natural disasters;
- timing of certain holidays;
- changes in government regulations;

settlements, damages and legal costs associated with litigation;
new or revised regulatory requirements and accounting pronouncements; and
changes in consumer preferences and competitive conditions.

Our business is also subject to seasonal fluctuations. Historically, sales in most of our restaurants have been higher during the spring and summer months and winter holiday season. Consequently, our quarterly and annual operating results and comparable restaurant sales may fluctuate significantly as a result of seasonality and the factors discussed above. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year and comparable restaurant sales for any particular future period may decrease. In the future, operating results may fall below the expectations of our investors. In that event, the price of our common stock would likely be impacted.

Liquidity and Capital Resources

Currently, our primary capital requirements are for new restaurant development and remodeling of existing restaurants. Similar to many restaurant companies, we utilize operating lease arrangements for all of our restaurant locations. We believe that our operating lease arrangements provide appropriate leverage for our capital structure in a financially efficient manner. We are typically required to expend cash for leasehold improvements, furniture, fixtures and equipment to construct and equip each restaurant. We also require capital resources to maintain our existing base of restaurants, including remodeling, and to further expand and strengthen the capabilities of our corporate and information technology infrastructures.

The following tables set forth, as of the dates and for the periods indicated, a summary of our key liquidity measurements (amounts in thousands):

	September 30,	December 31,
	2015	2014
Cash and short-term investments	\$ 15,961	\$ 36,756
Net working capital	\$ 2,706	\$ 27,018

	Nine Months Ended September 30,	
	2015	2014
Cash provided by operating activities	\$6,796	\$10,580
Capital expenditures	\$28,062	\$16,117

Future Capital Requirements

Our capital requirements, including development costs related to the opening of new restaurants, have historically been significant. Over the past year, we funded development of new restaurants and remodels primarily from cash flows from operations and proceeds from our June 2014 equity offering. Our future cash requirements and the adequacy of available funds will depend on many factors, including the operating performance of our current restaurants, the pace of expansion and remodels, real estate markets, site locations, the nature of the arrangements negotiated with landlords and capital market accessibility.

We plan to grow organically through unit expansion, with a goal of 20% unit growth annually over the next several years. We achieved a unit growth rate of 20% for 2014, with five openings during the year. We expect 23% unit growth for 2015, with seven restaurants scheduled to open during the year, including our San Juan, Puerto Rico restaurant that opened in the first quarter of 2015, our Plano, Texas and Arlington, Virginia restaurants opened during the second quarter of 2015 and our Miami, Florida and Cincinnati, Ohio restaurants opened in October 2015. We remodeled our Denver restaurant during 2015 and continue to incur maintenance capital expenditures for existing restaurants and our corporate office. We also are diligently working on our real estate pipeline and expect to incur capital expenditures during the remainder of 2015 for restaurants scheduled to open during the first half of 2016. We expect to spend approximately \$40 million in capital expenditures in 2015, exclusive of tenant improvement allowances, for the planned construction and remodels scheduled to be completed during 2015 and to a certain extent, planned construction and remodels scheduled to be completed for the first half 2016.

As of September 30, 2015, we had working capital of \$2.7 million and no borrowings under our \$35 million credit facility. We believe existing cash and short-term investments of \$16.0 million, the ability to draw on the credit facility and cash flow from operations will be sufficient to fund planned capital expenditures and operating activities for 2016.

Any reduction of our cash flow from operations or an inability to draw on our credit facility may cause a delay or cancellation of future restaurant development or remodels of existing restaurants. Financing to construct new restaurants or remodels for amounts in excess of the line of credit availability may not be available on acceptable terms, or at all, and our failure to raise capital when needed could impact our growth plans, financial condition, and results of operations. Additional equity financing may result in dilution to current stockholders and debt financing, if available, may involve significant cash payment obligations or financial covenants and ratios that may restrict our ability to operate our business.

Debt and Credit Agreements

On April 19, 2013, we entered into a Credit Agreement for a \$20 million revolving line of credit maturing on April 19, 2017 with KeyBank National Association (“KeyBank”) and Stearns Bank National Association (“Stearns Bank”). On November 7, 2014, we entered into an Amended and Restated Credit Agreement (the “Amended Credit Agreement”) with KeyBank to (i) increase the credit facility from \$20 million to \$35 million, and (ii) extend the maturity date of the credit facility to November 7, 2019. The credit facility is secured by our personal property and assets. Certain of our wholly owned subsidiaries have also guaranteed the credit facility. The entire \$35 million under the credit facility was available at September 30, 2015.

The interest rate under the Amended Credit Agreement is KeyBank’s prime rate or LIBOR, at our option, plus an applicable margin depending on our leverage ratio. The LIBOR margins range from 1.5% to 2.5% and the base rate margins range from 0.5% to 1.5%. Payments on the credit facility are interest only, payable quarterly with respect to each base rate loan and at varying times with respect to LIBOR rate loans, with outstanding principal and interest due at maturity. Prepayment is permitted at any time without penalty, subject to certain restrictions on the order of repayment or prepayment. We are obligated to pay a commitment fee at an annual rate of 0.175% to 0.350%, depending on our leverage ratio, times the unused total revolving commitment of the credit facility based on the average daily amount outstanding under the credit facility for the previous quarter. The commitment fee is payable quarterly in arrears.

During the three months ended September 30, 2015 and 2014, we incurred gross interest expense of \$43,000 and \$65,000, consisting primarily of loan fee amortization of \$21,000 and \$26,000, respectively, and commitment fees of \$22,000 and \$26,000, respectively. During the nine months ended September 30, 2015 and 2014, we incurred gross interest expense of \$137,000 and \$191,000, consisting primarily of loan fee amortization of \$61,000 and \$79,000, respectively, and commitment fees of \$66,000 and \$67,000, respectively.

Unamortized loan fees of \$342,000 at September 30, 2015 are being amortized over the life of the credit facility and are included in other assets in the consolidated balance sheet.

The credit facility also requires us to comply with certain covenants, including (a) a fixed charge coverage ratio of not less than 1.50 and (b) a maximum leverage ratio of 5.0 to 1.0 through March 31, 2016 and 4.75 to 1.0 from April 1, 2016 through the maturity date. We were in compliance with all covenants at September 30, 2015.

Cash Flows

The following table summarizes our primary sources and uses of cash during the periods presented (in thousands).

	Nine Months Ended September 30,	
	2015	2014
Net cash provided by (used in):		
Operating activities	\$6,796	\$10,580
Investing activities	(28,145)	(16,172)
Financing activities	554	37,883
Net increase (decrease) in cash and cash equivalents	\$(20,795)	\$32,291

Operating Activities. Our cash flows from operating activities provided \$6.8 million and \$10.6 million of net cash during the first nine months of 2015 and 2014, respectively. The net change in cash from operating activities year over year is primarily due to lower net income and timing of payments and receipt of tenant allowance reimbursements.

Investing Activities. Capital expenditures for the nine months ended September 30, 2015 were \$28.1 million, primarily associated with our San Juan, Plano and Arlington restaurant construction and Denver remodel during year to date 2015, as well as architecture, design and construction-related costs associated with our Miami and Cincinnati locations opened in October 2015 and two new restaurants scheduled for the remainder of 2015. Capital expenditures for the nine months ended September 30, 2014 were \$16.1 million, primarily associated with our Fort Worth and El Paso restaurants opened during the first nine months of 2014 and architecture, design and construction-related costs associated with our other three restaurants opened in the fourth quarter of 2014.

Financing Activities. Net cash provided by financing activities during the first nine months of 2015 consisted primarily of proceeds from stock option exercises. Net cash provided by financing activities during the first nine months of 2014 was \$37.9 million and consisted primarily of \$40.9 million in proceeds, net of issuance costs, from our equity offering, and \$0.5 million from employee stock option exercises. This increase in cash was partially offset by the \$3.5 million repayment of all borrowings under the Credit Facility.

Off-Balance Sheet Arrangements

As of September 30, 2015, we had no off-balance sheet arrangements or obligations.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are both significant and that require us to make difficult, subjective or complex judgments, often because we need to estimate the effect of inherently uncertain matters. We base our estimates and judgments on historical experiences and various other factors that we believe to be appropriate under the circumstances. Actual results may differ from these estimates, and we might obtain different estimates if we used different assumptions or conditions. We had no significant changes in our critical accounting policies and estimates since our last annual report. Our critical accounting policies and estimates are identified and described in our annual report on Form 10-K for the year ended December 31, 2014.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Commodity Price Risk

Our primary market risk exposure is commodity costs. Many of the food products purchased by us can be subject to volatility due to changes in weather, production, availability, seasonality, international demand, and other factors outside our control. Substantially all of our food and supplies are available from several sources, which help to diversify our overall commodity cost risk. We also believe that we have the ability to increase certain menu prices in response to food commodity price increases.

Inflation

The primary inflationary factors affecting our operations are food, labor costs, energy costs and labor and materials used in the construction of new restaurants. Increases in minimum wages could directly affect our labor costs. Many of our leases require us to pay taxes, maintenance, repairs, insurance, and utilities, all of which are generally subject to inflationary adjustments. These increases could impact our operating results to the extent that such increases cannot be passed along through higher menu prices. Over the past five years, inflation has not significantly affected our operating results.

Interest Rate Risk

We may also face market risk exposure due to the variable interest rates on the credit line obtained from KeyBank. Interest on the loans is subject to adjustment based on changes to the prime or LIBOR rates. Interest rate fluctuations may adversely impact our financial condition or results of operations.

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) that are designed to ensure that information required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of September 30, 2015, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

Internal Controls

There were no changes during the three months ended September 30, 2015 in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. *Legal Proceedings*

We are engaged in various legal actions, which arise in the ordinary course of our business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of our management, based upon the information available at this time, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the results of operations or financial condition of our company.

On February 10, 2014, Kona Grill Macadamia, Inc., a wholly-owned subsidiary of the Company (“Macadamia”), filed a Motion to Set Aside Default Judgment in the Circuit Court of Jackson County, Kansas City Missouri relating to a default judgment of approximately \$3.5 million entered on December 18, 2013 against Macadamia. The underlying personal injury claim, Frank Neal Goss v. Kona Macadamia, Inc. and Anthony DeAngelo, revolves around a fight that two alleged restaurant patrons had outside of the Company’s Kansas City restaurant on March 1, 2011, which is claimed to have resulted in physical injury to the plaintiff. Following the hearing held on April 3, 2014, the Circuit Court issued a written order on April 7, 2014 granting Macadamia’s Motion to Set Aside Default Judgment. The underlying personal injury case is proceeding in the Circuit Court. On August 17, 2015, Macadamia filed a Motion for Summary Judgment requesting judgment in its favor on all claims asserted by the plaintiff. On August 18, 2015, the plaintiff filed for a voluntary dismissal of the claim without prejudice. Under Missouri law, the plaintiff has up to one year to re-file the claim. We believe that we have a strong defense to the claim asserted by the plaintiff and insurance coverage should the plaintiff decide to re-file the claim.

Item 1A. Risk Factors

There have been no material changes in our risk factors since our annual report on Form 10-K for the year ended December 31, 2014. A description of the risk factors associated with our business is contained in Part I, Item 1A, “Risk Factors,” in our Annual Report on Form 10-K for the year ended December 31, 2014. These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks, and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC.
