**Magic Software And Avesta Sign Partnership Agreement To Deliver iBOLT For EAI And BPM Solutions To The Mid-market**

Avesta Embraces iBOLT Philosophy of Delivering Integration Framework

Regardless of Technology or Platform

Irvine, California (October 9, 2003) - Magic Software Enterprises (Nasdaq: MGIC), a leading provider of state-of-the-art integration and development technology, announced an agreement with Avesta Computer Services Ltd., a global system integrator based in Jersey City, New Jersey, who will become an iBOLT Integration partner. With this agreement, Avesta joins a growing list of system integrators worldwide that have signed up as partners to help deliver business integration services using the iBOLT application integration framework from Magic Software Enterprises.

With offices in New Jersey, Pennsylvania, California, Hong Kong and India, Avesta is a leading system integrator and outsourcer specializing in customized solutions for large and mid-sized organizations such as Bank Of New York, Cisco Systems, Merrill Lynch, EDS, Pfizer and HSBC Bank.

With iBOLT, Avesta is gaining key technologies for customer solutions in enterprise application integration (EAI) and business process management (BPM).

"With so much confusion surrounding the many so-called standards today, it is key to deliver integration solutions that embrace the multiple competing standards in the industry," said Pradeep Udhas, Managing Director of Avesta.

"The iBOLT philosophy of delivering an integration process framework regardless of the technology or platform is exactly what customers need. Why bet the future of your IT infrastructure on a single vendor's view of the future?" Udhas asks. iBOLT is BPEL4WS compliant insuring that even the integration framework itself is oriented towards open standards.

iBOLT Integration Suite ([www.magicsoftware.com/ibolt](http://www.magicsoftware.com/ibolt)) provides organizations with an affordable platform for integrating their existing business-critical applications. It is a multi-tiered component-based environment where developers define and combine components to automate business processes. iBOLT empowers companies to dramatically improve performance and return on investment.

"We are training a large team of salespeople, project managers, consultants, integrators and developers at Avesta so that they can deliver solutions directly to their existing customers as well as new ones," said Oren Inbar, CEO of Magic Software's North American subsidiary. "Together we will approach many new mid-market and large enterprises in need of business process integration."

#### About Avesta

Avesta is a privately held, global IT solutions corporation that has been growing at a CAGR of 40% over the past five years. Avesta has over 500 man-years of experience, achieved through the execution of more than 100 projects.
