## 16. FAIR VALUE MEASUREMENTS

ASC 820 Fair Value Measurements establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers are defined as:

Level 1 – Quoted prices in active markets for identical instruments;

Level 2 – Inputs other than quoted prices in active markets that are either directly or indirectly observable.

Level 3 – Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis consisted of the following (in thousands):

	Total	June 30, 2010		Total	December 31, 2009	
		Level 1	Levels 2&3		Level 1	Levels 2&3

17. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

18. RECENTLY ISSUED ACCOUNTING STANDARDS

Fair Value Measurements and Disclosures

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements." This guidance requires new disclosures for transfers in and out of Level 1 and Level 2 fair value measurements. This guidance requires separate presentation about purchases, sales, issuances, and settlements for activity in Level 3 fair value measurements. ASU 2010-06 also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The guidance for new disclosures and clarifications of existing disclosures was effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this part of the guidance had no material effect on the Company's financial position, results of operations or cash flows. The guidance related to presentation of Level 3 fair value measurements is effective for fiscal years beginning after December 15, 2010. The adoption of this part of the guidance is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

19. SUBSEQUENT EVENTS

Senior Unsecured Note Repurchase

On July 2, 2010, the Company closed on a transaction to purchase \$6.5 million of its issued and outstanding senior unsecured 8% notes due January 2012. In connection with this transaction, Titan will record expenses of approximately \$0.3 million in the third quarter of 2010. These expenses relate primarily to a tender premium of \$45 per \$1,000 principal amount of the notes. After this transaction, Titan's senior note outstanding balance was \$139.9 million as of July 2, 2010, compared to a balance of \$146.4 million at June 30, 2010.

Denman Tire machinery & equipment

On July 21, 2010, Titan Tire Corporation, a subsidiary of the Company, purchased the Denman Tire machinery & equipment, including other inventory items, for \$3.0 million. The purchase did not include any land or buildings. The Company plans to move the machinery and equipment to existing Titan facilities.

## OVERVIEW

Titan International, Inc. and its subsidiaries are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

**Agricultural Market:** Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

**Earthmoving/Construction Market:** The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road.

As of the expiration of the tender offer on June 10, 2010, there were \$47.4 million of the notes tendered and accepted for payment which represented 24.4% of the principal amount of notes outstanding. In connection with the tender offer, Titan recorded expenses of \$2.7 million in the second quarter of 2010. These expenses were related to: (i) early tender premium of \$2.3 million (\$50 per \$1,000 principal amount of the notes), (ii) unamortized deferred financing fees of \$0.3 million and (iii) other fees of \$0.1 million.

#### SENIOR UNSECURED NOTE REPURCHASE

On July 2, 2010, the Company closed on a transaction to purchase \$6.5 million of its issued and outstanding senior unsecured 8% notes due January 2012. In connection with this transaction, Titan will record expenses of approximately \$0.3 million in the third quarter of 2010. ### CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

#### Asset and Business Acquisitions

The allocation of purchase price for asset and business acquisitions requires management estimates and judgment as to expectations for future cash flows of the acquired assets and business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair value for purchase price allocations. If the actual results differ from the estimates and judgments used in determining the purchase price allocations, impairment losses could occur. To aid in establishing the value of any intangible assets at the time of acquisition, the Company typically engages a professional appraisal firm.

#### Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 69% of inventories and the last-in, first-out (LIFO) method for approximately 31% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should there be an adverse change in experience, increases to estimated provisions would be necessary.

#### Income Taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions and recognizes and measures uncertain tax positions in accordance with ASC 740 Income Taxes.

As a result of the 2009 net loss, the Company has a net operating loss carryforward for income tax purposes. If Titan would continue to incur net losses, the Company may not be able to realize the tax benefit of these net operating losses.

#### Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. During the first six months of 2010, the Company contributed cash funds of \$0.5 million to its frozen pension plans. Titan expects to contribute approximately \$1 million to these frozen defined benefit pension plans during the remainder of 2010. For more information concerning

these costs and obligations, see the discussion of the “Pensions” and Note 20 to the Company’s financial statements on Form 10-K for the fiscal year ended December 31, 2009.

The sales in the earthmoving/construction segment have improved, yet remain at low levels, off over 30 percent when compared to the second quarter of 2008 or 2007. Income from operations in the earthmoving/construction market was \$2.3 million for the quarter ended June 30, 2010, as compared to \$2.8 million in 2009. ## MARKET RISK SENSITIVE INSTRUMENTS

The Company's risks related to foreign currencies, commodity prices and interest rates are consistent with those for 2009. For more information, see the "Market Risk Sensitive Instruments" discussion in the Company's Form 10-K for the fiscal year ended December 31, 2009.

## PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. These plans are described in Note 20 of the Company's Notes to Consolidated Financial Statements in the 2009 Annual Report on Form 10-K.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined by the Company with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$1 million to these frozen defined pension

plans during the remainder of 2010.

## LIQUIDITY AND CAPITAL RESOURCES

### Cash Flows

As of June 30, 2010, the Company had \$158.3 million of cash balances within various bank accounts. This cash balance decreased by \$70.9 million from December 31, 2009, due to the following cash flow items.

(amounts in thousands)

	June 30, 2010	December 31, 2009
Cash	\$158,253	\$229,182

### Operating cash flows

Summary of cash flows from operating activities:

(amounts in thousands)

	Six months ended June 30,		
	2010	2009	Change
Net income	\$6,647	\$12,951	\$(6,304 )
Depreciation and amortization	18,635	16,289	2,346
Deferred income tax provision	5,501	0	5,501
Accounts receivable	(50,386 )	21,808	(72,194 )
Inventories	(28,282 )	(2,717 )	(25,565 )
Accounts payable	23,790	(34,215 )	58,005
Other operating activities	14,901	7,904	6,997
Cash provided by (used for) operating activities	\$(9,194 )	\$22,020	\$(31,214 )

In the first six months of 2010, operating activities used cash of \$9.2 million. This cash was primarily used by increases in accounts receivable and inventory of \$50.4 million and \$28.3 million, respectively, offset by higher accounts payable of \$23.8 million. Net income of \$6.6 million included \$18.6 million of noncash charges for depreciation and amortization. Deferred tax assets were reduced by \$5.5 million as the Company used current income to reduce the deferred tax asset for previously recorded net operating losses.

In the first six months of 2009, operating activities provided cash of \$22.0 million. This cash was primarily provided by net income of \$13.0 million and a lower accounts receivable balance of \$21.8 million due to a decrease in sales. Included in net income were noncash charges of \$16.3 million for depreciation and amortization. Positive cash flows were offset by a decrease in the accounts payable balance of \$34.2 million due to reduced purchases resulting from the lower sales levels.

Operating cash flows decreased \$31.2 million when comparing the six months ended June 30, 2010, to the six months ended June 30, 2009. Net income in the first six months of 2010 was \$6.3 million lower than the net income in the first six months of 2009. When comparing the first six months of 2010 to the first six months of 2009, cash flows from accounts receivable decreased \$72.2 million and cash flows from accounts payable increased \$58.0 million. This is the result of significant increases in accounts receivable and accounts payable in the first half of 2010, as sales levels increased approximately 48% when comparing the first half of 2010 to the second half of 2009. The inventory increase in 2010 was due to rebuilding inventory balances from the substantially reduced year-end 2009 inventory levels.

The Company invested a total of \$11.7 million in capital expenditures in the first six months of 2010, compared to \$31.7 million in 2009. Of the \$11.7 million of capital expenditures in the first six months of 2010, approximately \$4 million related to the purchase of Denman Tire molds. Of the \$31.7 million of capital expenditures in the first six months of 2009, approximately \$21 million related to the Company's giant OTR mining project, which was substantially completed at the end of 2009. The remaining 2009 and the 2010 expenditures represent various equipment purchases and improvements to enhance production capabilities. Other investing activities in the first six months of 2009 relate primarily to the Company's purchase of additional shares in Titan Europe Plc.

## Financing cash flows

## Summary of cash flows from financing activities:

(amounts in thousands)	Six months ended June 30,		
	2010	2009	Change

Financing cash flows decreased \$20.1 million when comparing the first six months of 2010 to the first six months of 2009. This cash flow reduction resulted primarily from repurchase of senior notes in 2010 offset by payment on debt in 2009.

Debt Covenants

The Company's revolving credit facility (credit facility) contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.
- If the 30-day average of the outstanding revolver balance exceeds \$125 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
- Limitations on investments, dispositions of assets and guarantees of indebtedness.
- Other customary affirmative and negative covenants.

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company is in compliance with these covenants and restrictions as of June 30, 2010. The collateral coverage ratio was not applicable as there were no outstanding borrowings under the revolving credit facility at June 30, 2010. The fixed charge coverage ratio did not apply for the quarter ended June 30, 2010. In connection with the convertible senior subordinated note offer, Titan previously agreed to add an additional mutually agreeable covenant to the Company's revolving credit facility, which is now no longer required by mutual agreement of the parties.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters.

Liquidity Outlook

At June 30, 2010, the Company had \$158.3 million of cash and cash equivalents and no outstanding borrowings on the Company's \$150 million credit facility.

Capital expenditures for the remainder of 2010 are forecasted to be approximately \$9 million to \$11 million including the July purchase of Denman Tire machinery and equipment of approximately \$3 million. Cash payments for interest are currently forecasted to be approximately \$11 million for the remainder of 2010 based on June 30, 2010, debt balances.

In the future, Titan may seek to grow by making acquisitions which will depend on the ability to identify suitable acquisition candidates, to negotiate acceptable terms for their acquisition and to finance those acquisitions. In

September 2009, Titan signed a letter of intent with The Goodyear Tire & Rubber Company to purchase certain farm tire assets, including the Goodyear Dunlop Tires France (GDTF) Amiens North factory. This agreement is non-binding and will be subject to GDTF's satisfactory completion of a social plan related to consumer tire activity at the Amiens North facility, along with completion of due diligence, a definitive acquisition agreement and other standard acquisition approval requirements. At this time, the due diligence process continues. There is no assurance that definitive agreements will be executed or that the acquisition will be consummated.

Subject to the terms of indebtedness, the Company may finance future acquisitions with cash on hand, cash from operations, additional indebtedness and/or by issuing additional equity securities.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs, capital expenditures and potential acquisitions. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding would be negatively impacted.

#### MARKET CONDITIONS AND OUTLOOK

The on-going uncertainty in domestic and global economic conditions makes it difficult to forecast future sales levels. In the second quarter of 2010, Titan experienced a higher sales level when compared to the second quarter of 2009. In the second half of 2010, Titan expects a continuing trend of increased sales when compared to the previous year. During the second half of 2009, Titan implemented extended shutdowns in conjunction with many of the Company's major customers, which resulted in a steep drop in sales. The Company is not currently anticipating the need for extended shutdowns to the extent required in the previous year. The Company continues to see signs that the market for Titan's products experienced the bottom of a cycle in late 2009 and early 2010. Although the Company believes that sales may continue to move higher when compared to the same period in the previous year during the remainder of 2010, there can be no assurance that a decline in sales will not resume.

Energy, raw material and petroleum-based product costs have been exceptionally volatile and may negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

All of the Company's labor agreements for its (i) Bryan, Ohio; (ii) Des Moines, Iowa; and (iii) Freeport, Illinois, facilities expire on November 19, 2010, for the employees covered by their respective bargaining agreements. Titan's business operations may be negatively affected if agreements are not reached or as a result of labor disputes, difficulties and delays in the process of renegotiating the Company's collective bargaining agreements.

#### AGRICULTURAL MARKET OUTLOOK

Agricultural market sales were higher in the second quarter of 2010 when compared to the second quarter of 2009. Agricultural market sales were at reduced levels in the second half of 2009 as the result of extended shutdowns. Titan expects agricultural market sales to continue to be higher when compared to the last half of 2009. The gradual increase in the use of biofuels may help sustain future production. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy.

#### EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Earthmoving and mining sales are beginning to move up from the low levels of the second half of 2009. Metals, oil and gas prices have increased from 2009's lows. Although they may fluctuate in the short-term, in the long-term, these prices are expected to remain at levels that are attractive for continued investment, which should help support future earthmoving and mining sales. The significant decline in the United States housing market continues to cause a major reduction in demand for equipment used for construction. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the on-going banking and credit issues. For the remainder of 2010, the Company expects modest improvement compared to the previous year's low sales levels in the earthmoving/construction market.

#### CONSUMER MARKET OUTLOOK

Consumer discretionary spending has experienced a major contraction as a result of on-going economic issues, housing market decline, and high unemployment rates. Many of the Company's consumer market sales are ultimately used in items which fall into the discretionary spending category. There is no clear consensus among economists as to when there will be a sustained consumer spending rebound. Many factors continue to affect the consumer market including weather, competitive pricing, energy prices and consumer attitude. For the remainder of 2010, the Company expects continued weakness in consumer spending related to Titan's consumer market. For the second half of 2010, the Company expects Titan's consumer sales to stabilize around current levels.

## NEW ACCOUNTING STANDARDS

### Fair Value Measurements and Disclosures

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements." This guidance requires new disclosures for transfers in and out of Level 1 and Level 2 fair value measurements. This guidance requires separate presentation about purchases, sales, issuances, and settlements for activity in Level 3 fair value measurements. ASU 2010-06 also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The guidance for new disclosures and clarifications of existing disclosures was effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this part of the guidance had no material effect on the Company's financial position, results of operations or cash flows. The guidance related to presentation of Level 3 fair value measurements is effective for fiscal years beginning after December 15, 2010. The adoption of this part of the guidance is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

See the Company's 2009 Annual Report filed on Form 10-K (Item 7A). There has been no material change in this information.

### Item 4. Controls and Procedures

#### Evaluation of Disclosure Controls and Procedures

The Company's principal executive officer and principal financial officer have concluded the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) are effective as of the end of the period covered by this Form 10-Q based on an evaluation of the effectiveness of disclosure controls and procedures.

#### Changes in Internal Controls

There were no material changes in internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the second quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluations of the effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
