1ST STATE BANCORP, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2003 (UNAUDITED) AND SEPTEMBER 30, 2002

NOTE 1. NATURE OF BUSINESS

1st State Bancorp, Inc. (the "Company") was incorporated under the laws of the Commonwealth of Virginia for the purpose of becoming the holding company for

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

1st State Bank (the "Bank") in connection with the Bank's conversion from a North Carolina-chartered mutual savings bank to a North Carolina-chartered stock savings bank (the "Converted Bank") pursuant to its Plan of Conversion (the "Stock Conversion"). Upon completion of the Stock Conversion, the Converted Bank converted from a North Carolina-chartered stock savings bank to a North Carolina commercial bank (the "Bank Conversion"), retaining the name 1st State Bank (the "Commercial Bank"), and the Commercial Bank succeeded to all of the assets and liabilities of the Converted Bank. The Stock Conversion and the Bank Conversion were consummated on April 23, 1999. The common stock of the Company began trading on the Nasdaq National Market System under the symbol "FSBC" on April 26, 1999.

NOTE 2. BASIS OF PRESENTATION

The accompanying consolidated financial statements (which are unaudited, except for the consolidated balance sheet at September 30, 2002, which is derived from the September 30, 2002 audited consolidated financial statements) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (none of which were other than normal recurring accruals) necessary for a fair presentation of the financial position and results of operations for the periods presented have been included.

The results of operations for the three and six month periods ended March 31, 2003 are not necessarily indicative of the results of operations that may be expected for the year ended September 30, 2003. The preparation of consolidated financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make certain estimates. These amounts may be revised in future periods because of changes in the facts and circumstances underlying their estimation.

Certain amounts in the March 31, 2002 consolidated financial statements have been reclassified to conform with the presentation adopted in 2003. Such reclassifications did not change net income or stockholders' equity as previously reported.

NOTE 3. EARNINGS PER SHARE

For purposes of computing basic and diluted earnings per share, weighted average shares outstanding excludes unallocated ESOP shares that have not been committed to be released. The deferred compensation obligation discussed in note 5 that is fully funded with shares of the Company's common stock has no net impact on the Company's earnings per share computations. Diluted earnings per share includes the potentially dilutive effects of the Company's stock-based benefit plans. There were no antidilutive stock options for the three and six months ended March 31, 2003 and 2002. A reconciliation of the denominators of the basic and diluted earnings per share computations is as follows:

THREE MONTHS ENDED MARCH 31,	
2003	2002
-----	-----

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

Average shares issued and outstanding	2,995,606	3,289
Less: Unvested MRP shares	--	(42)
Less: Unallocated ESOP shares	(179,585)	(223)
	-----	-----
Average basic shares for earnings per share	2,816,021	3,023
Add: Unvested MRP shares	--	42
Add: Potential common stock pursuant to stock option plan	122,277	86
	-----	-----
Average dilutive shares for earnings per share	2,938,298	3,152
	=====	=====

SIX MONTHS ENDED
MARCH 31,

	2003	2002
	-----	-----
Average shares issued and outstanding	2,999,280	3,289
Less: Unvested MRP shares issued	--	(42)
Less: Unallocated ESOP shares	(183,449)	(227)
	-----	-----
Average basic shares for earnings per share	2,815,831	3,019
Add: Unvested MRP shares	--	42
Add: Potential common stock pursuant to stock option plan	124,438	87
	-----	-----
Average dilutive shares for earnings per share	2,940,269	3,149
	=====	=====

NOTE 4. EMPLOYEE STOCK OWNERSHIP PLAN ("ESOP")

The Company sponsors an employee stock ownership plan (the "ESOP") whereby an aggregate number of shares amounting to 253,050 or 8% of the stock issued in the conversion was purchased for future allocation to employees. The ESOP was funded by an 11 year term loan from the Company in the amount of \$4,899,000. The loan is secured by the shares of stock purchased by the ESOP. During the three and six months ended March 31, 2003 and 2002, 7,560 and 8,507 and 15,288 and 17,203 shares of stock were committed to be released and approximately \$181,000 and \$172,000 and \$371,000 and \$350,000 of compensation expense was recognized, respectively.

NOTE 5. DEFERRED COMPENSATION

Directors and certain executive officers participate in a deferred compensation plan, which was approved by the Board of Directors on September 24, 1997. This plan generally provides for fixed payments beginning after the participant retires. Each participant is fully vested in his account balance under the plan. Directors may elect to defer their directors' fees and executive officers may elect to defer 25% of their salary and 100% of bonus compensation.

Prior to the Conversion, amounts deferred by each participant accumulated interest at a rate equal to the highest rate of interest paid on the Bank's one-year certificates of deposit. In connection with the Conversion, participants in the plan were given the opportunity to prospectively elect to have their deferred compensation balance earn a rate of return equal to the total return of the Company's stock. All participants elected this option concurrent with the Conversion, so the Company purchases its common stock to fund this obligation. Refer to the Company's notes to consolidated financial statements, incorporated by reference in the Company's 2002 Annual Report on Form 10-K for a discussion of the Company's accounting policy with respect to this deferred compensation plan and the related treasury stock purchased by the Company to fund this obligation.

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

The expense related to this plan for the three and six months ended March 31, 2003 and 2002 was \$60,000 and \$72,000 and \$120,000 and \$164,000, respectively. This expense is included in compensation expense.

10

NOTE 6. MANAGEMENT RECOGNITION PLAN

The Company has a Management Recognition Plan ("MRP") which serves as a means of providing existing directors and officers of the Bank with an ownership interest in the Company. On June 6, 2000, restricted stock awards of 126,482 shares were granted. The shares awarded under the MRP were issued from authorized but unissued shares of common stock at no cost to the recipients. The shares vest at a rate of 33 1/3% per year with a one-third immediate vest on the date of the grant and annually thereafter. The Company recorded no compensation expense associated with the MRP during the three and six months ended March 31, 2003 as all shares became fully vested in June 2002. Compensation expense of \$260,000 and \$520,000 associated with the MRP was recorded during the three and six months ended March 31, 2002, respectively.

NOTE 7. STOCK OPTION AND INCENTIVE PLAN

On June 6, 2000 the Company's stockholders approved the 1st State Bancorp, Inc. 2000 Stock Option and Incentive Plan (the "Plan"). The purpose of this plan is to advance the interests of the Company through providing select key employees and directors of the Bank with the opportunity to acquire shares. By encouraging such stock ownership, the Company seeks to attract, retain and motivate the best available personnel for positions of substantial responsibility and to provide incentives to the key employees and directors. Under the Plan, the Company granted 316,312 options to purchase its \$0.01 par value common stock in fiscal year 2000. The exercise price per share is equal to the fair market value per share on the date of the grant of the stock. Options granted under the Stock Option Plan are 100% vested on the date of the grant, and all options expire 10 years from the date of the grant. As a result of the one-time cash dividend of \$5.17 paid on October 2, 2000, the exercise price for the options repriced from \$18.44 to \$14.71. No options were exercised or granted during the three and six months ended March 31, 2003 and 2002. At March 31, 2003, 316,312 options are outstanding, all of which are exercisable.

In December 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 148 "Accounting for Stock-Based Compensation - Transition and Disclosure" (SFAS 148) an amendment of FASB Statement No. 123, "Accounting for Stock-Based Compensation" (SFAS 123), which provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS 148 amends the disclosure requirements of SFAS 123 to require prominent disclosure in both annual and interim financial statements about the method of accounting for stock-based compensation and the effect of the method on reported results. The Company does not have any plans to change its method of accounting for stock-based employee compensation. There is no pro forma impact for any of the periods presented or for either of the two prior fiscal years.

NOTE 8. MORTGAGE SERVICING RIGHTS

The rights to service mortgage loans for others are included in other assets on the consolidated balance sheet. Mortgage servicing rights ("MSRs") are capitalized based on the allocated cost which is determined when the underlying loans are sold. MSRs are amortized over a period which approximates the life of the underlying loans as an adjustment of income. Impairment reviews of MSRs are performed on a quarterly basis. As of March 31, 2003 and September 30, 2002 MSRs

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

totaled \$484,000 and \$370,000, respectively, and no valuation allowance was required.

Amortization expense totaled \$71,000 and \$30,000 for the six months ended March 31, 2003 and 2002, respectively.

11

The estimated amortization expense for the mortgage servicing rights for the years ended September 30, 2003, 2004, 2005, 2006 and 2007 and thereafter is as follows:

ESTIMATED AMORTIZATION EXPENSE (In Thousands)

2003	40,000
2004	40,000
2005	40,000
2006	40,000
2007	40,000
2008 and thereafter	170,000

	\$370,000
	=====

The estimation of future amortization expense presented above is based on assumptions (such as estimate of prepayment of loans) subject to change in future periods. Accordingly, the amortization expense in future periods may be different from the amounts disclosed above to the extent that any of these assumptions are modified due to a change in the underlying estimations.

NOTE 9. STANDBY LETTERS OF CREDIT

In November 2002, the FASB issued Interpretation No. 45 (FIN 45), "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others", which addressed the disclosure to be made by a guarantor in its interim and annual financial statements about its obligations under guarantees. FIN 45 requires the guarantor to recognize a liability for the non-contingent component of the guarantee, such as the obligation to stand ready to perform in the event that specified triggering events or conditions occur. The initial measurement of this liability is the fair value of the guarantee at inception. The recognition of the liability is required even if it is not probable that payments will be required under the guarantee or if the guarantee was issued with a premium payment or as part of a transaction with multiple events. The initial recognition and measurement provisions are effective for all guarantees within the scope of FIN 45 issued or modified after December 31, 2002. The Company issues standby letters of credit whereby the Company guarantees performance if a specified triggering event or condition occurs (primarily nonperformance under construction contracts entered into by construction customers). The guarantees generally expire within one year and may be automatically renewed depending on the terms of the guarantee. The maximum potential amount of undiscounted future payments related to standby letters of credit at March 31, 2003 is \$265,000. At March 31, 2003 the Company has recorded no liability for the current carrying amount of the obligation to perform as a guarantor and no contingent liability is considered necessary as such amounts are deemed immaterial. Substantially all standby letters of credit are secured by real estate and/or guaranteed by third parties in the event the Company had to advance funds to fulfill the guarantee.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

When used in this Form 10-Q, the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project" or similar expressions are intended to identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties including changes in economic conditions in our market area, changes in policies by regulatory agencies, fluctuations in interest rates, demand for loans in our market area, and competition that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. We wish to caution you not to place undue reliance on any such forward-looking statements, which speak only as of the date made. We wish to advise you that the factors listed above could affect our financial performance and could cause our actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements.

We do not undertake, and specifically disclaim any obligation, to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

GENERAL

1st State Bancorp, Inc. was formed in November 1998 and became the holding company for 1st State Bank on April 23, 1999. As a result, portions of this discussion (as of dates and for periods prior to April 23, 1999) relate to the financial condition and results of operations of 1st State Bank.

Our business consists principally of attracting deposits from the general public and investing these funds in loans secured by single-family residential and commercial real estate, secured and unsecured commercial loans and consumer loans. Our profitability depends primarily on our net interest income, which is the difference between the income we receive on our loan and investment securities portfolios and our cost of funds, which consists of interest paid on deposits and borrowed funds. Net interest income also is affected by the relative amounts of interest-earning assets and interest-bearing liabilities. When interest-earning assets approximate or exceed interest-bearing liabilities, any positive interest rate spread will generate net interest income. Our profitability is also affected by the level of other income and operating expenses. Other income consists of miscellaneous fees related to our loans and deposits, mortgage banking income and commissions from sales of annuities and mutual funds. Operating expenses consist of compensation and benefits, occupancy related expenses, federal deposit insurance premiums, data processing, advertising and other expenses.

Our operations are influenced significantly by local economic conditions and by policies of financial institution regulatory authorities. Our cost of funds is influenced by interest rates on competing investments and by rates offered on similar investments by competing financial institutions in our market area, as well as general market interest rates. These factors can cause fluctuations in our net interest income and other income. Lending activities are affected by the demand for financing of real estate and other types of loans, which in turn is affected by the interest rates at which such financing may be offered. In addition, local economic conditions can impact the credit risk of our loan portfolio, in that local employers may be required to eliminate employment positions of many of our borrowers, and small businesses and other commercial borrowers may experience a downturn in their operating performance

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

and become unable to make timely payments on their loans. Management evaluates these factors in estimating its allowance for loan losses, and changes in these economic conditions could result in increases or decreases to the provision for loan losses.

Our business emphasis has been to operate as a well-capitalized, profitable and independent community-oriented financial institution dedicated to providing quality customer service. We are committed to meeting the financial needs of the communities in which we operate. We believe that we can be more effective in servicing our customers than many of our nonlocal competitors because of our ability to quickly and effectively provide senior management responses to customer needs and inquiries. Our ability to provide these services is enhanced by the stability of our senior management team.

13

Beginning in the late 1980's, we have sought to gradually increase the percentage of our assets invested in commercial real estate loans, commercial loans and consumer loans, which have shorter terms and adjust more frequently to changes in interest rates than single-family residential mortgage loans. These loans generally carry added risk when compared to a single family residential mortgage loan, so we have concurrently increased our allowance for loan losses as we have originated these loans.

CRITICAL ACCOUNTING POLICIES

The Company's significant accounting policies are set forth in note 1 of the consolidated financial statements as of September 30, 2002 which was filed on Form 10-K. Of these significant accounting policies, the company considers its policy regarding the allowance for loan losses to be its most critical accounting policy, because it requires management's most subjective and complex judgments. In addition, changes in economic conditions can have a significant impact on the allowance for loan losses and therefore the provision for loan losses and results of operations. The Company has developed appropriate policies and procedures for assessing the adequacy of the allowance for loan losses, recognizing that this process requires a number of assumptions and estimates with respect to its loan portfolio. The Company's assessments may be impacted in future periods by changes in economic conditions, the impact of regulatory examinations, and the discovery of information with respect to borrowers which is not known to management at the time of the issuance of the consolidated financial statements.

COMPARISON OF FINANCIAL CONDITION AT MARCH 31, 2003 AND SEPTEMBER 30, 2002

Total assets decreased by \$3.5 million or 1.0% from \$350.5 million at September 30, 2002 to \$347.0 million at March 31, 2003. As market rates remained low during the six months ended March 31, 2003, many of the Company's callable investments were called by the issuers. The proceeds from investment maturities and calls totaled \$66.5 million for the six months ended March 31, 2003 compared with investment purchases of \$50.2 million; therefore, total investment securities decreased from September 30, 2002. Cash and cash equivalents increased \$12.6 million or 66.6% from \$18.9 million at September 30, 2002 to \$31.4 million at March 31, 2003 as a result of the decrease in investment securities. Loans receivable, net increased while loans held for sale decreased. Deposits decreased by \$1.9 million or 0.7% from \$260.7 million at September 30, 2002 to \$258.8 million at March 31, 2003. This decrease resulted from the runoff of \$4.7 million of certificates of deposits held by municipalities as part of the Company's asset liability strategy. This decrease in certificates of deposit was offset partially by growth in transaction accounts.

Investment securities available for sale decreased \$18.6 million from \$78.6

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

million at September 30, 2002 to \$59.9 million at March 31, 2003. During the six months ended March 31, 2003, we purchased \$48.2 million of securities available for sale and received \$66.5 million in proceeds from maturities and issuer calls of investment securities available for sale. Investment securities held to maturity increased from \$11.1 million at September 30, 2002 to \$13.1 million at March 31, 2003 as \$2.0 million of investment securities held to maturity were purchased during this period.

Loans held for sale decreased by \$2.6 million from \$6.8 million at September 30, 2002 to \$4.2 million at March 31, 2003. Loans receivable, net increased \$3.9 million from \$220.0 million at September 30, 2002 to \$223.9 million at March 31, 2003. The decrease in loans held for sale resulted from timing differences in the funding of loan sales. During the six months ended March 31, 2003 our mortgage originations and prepayments continued at record levels. Mortgage rates declined to record low levels during this period, and many borrowers took advantage of this opportunity to refinance their existing mortgage loans. Mortgage loans secured by single family dwellings decreased by \$10.1 million during this period as a result of the tremendous refinancing activity. During this same period, increases in commercial and home equity line loans more than offset this single family mortgage loan decrease.

Stockholders' equity increased by \$842,000 from \$61.6 million at September 30, 2002 to \$62.4 million at March 31, 2003 as a result of net income of \$1,980,000 and release of ESOP shares of \$370,000. These increases were offset by cash dividends to stockholders declared of \$503,000, purchases of treasury stock of \$743,000 and a decrease in unrealized gain on available for sale securities of \$262,000.

14

COMPARISON OF OPERATING RESULTS FOR THE THREE MONTHS ENDED MARCH 31, 2003 AND 2002

Net Income. We recorded net income of \$997,000 for the quarter ended March 31, 2003, as compared to \$925,000 for the quarter ended March 31, 2002, representing an increase of \$72,000, or 7.8%. For the three months ended March 31, 2003, basic and diluted earnings per share were \$0.35 and \$0.34, respectively, compared to the basic and diluted earnings per share for the quarter ended March 31, 2002 of \$0.31 and \$0.29, respectively. The increase in net income resulted primarily from increased other income and decreased operating expenses that were offset partially by decreased net interest income and increased income tax expense. The decrease in net interest income resulted from lower net interest margins. The average prime interest rate for the quarter ended March 31, 2003 was 4.25%, a decrease of 50 basis points from 4.75% which was the average prime for the quarter ended March 31, 2002. The repricing of certificates of deposits, savings and money market investment accounts decreased the Company's cost of funds to partially offset the decrease in asset yield which resulted from the lower prevailing interest rates during the quarter ended March 31, 2003.

Net Interest Income. Net interest income, the difference between interest earned on loans and investments and interest paid on interest-bearing liabilities, decreased by \$20,000 or 0.7% for the three months ended March 31, 2003, compared to the same quarter in the prior year. This decrease results from a \$539,000 decrease in interest income that was offset in part by the \$519,000 decrease in total interest expense. The average net interest income as a percentage of average earning assets decreased 5 basis points from 3.67% for the three months ended March 31, 2002 to 3.62% for the quarter ended March 31, 2003.

Interest Income. The decrease in interest income for the three months ended March 31, 2003 was the result of a decrease in yield on interest-earning assets of 71 basis points from 6.10% for the three months ended March 31, 2002 to 5.39%

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

for the three months ended March 31, 2003 which was partially offset by a \$2.7 million increase in interest earning assets. Average loans receivable increased \$13.7 million from \$215.1 million for the quarter ended March 31, 2002 to \$228.8 million for the quarter ended March 31, 2003. Average investment securities decreased \$13.9 million for the quarter compared to the prior year. Average interest-bearing overnight funds increased \$2.9 million for the quarter compared to the prior year. The decrease in asset yield resulted from the lower rates prevailing in the marketplace. The increase in average interest earning assets increased interest income by approximately \$43,000 and the decrease in the average yield on interest earning assets decreased interest income by approximately \$582,000.

Interest Expense. Interest expense decreased in the three months ended March 31, 2003 due to a decrease in the cost of interest-bearing liabilities of 79 basis points from 2.97% for the three months ended March 31, 2002 to 2.18% for the three months ended March 31, 2003. Average interest-bearing deposits increased by \$2.8 million while average FHLB advances decreased \$1.5 million for the three months ended March 31, 2003 compared to the same quarter in the prior year. The decrease in the average cost of interest-bearing liabilities accounted for the decrease in interest expense.

15

The following table presents average balances and average rates earned/paid by the Company for the quarter ended March 31, 2003 compared to the quarter ended March 31, 2002.

	THREE MONTHS ENDED MARCH 31, 2003			THREE MA

Interest rate spread	3.21%
Net interest margin (3)	3.62%
Ratio of average interest-earning assets to average interest-bearing liabilities	122.92%

Provision for Loan Losses. We charge provisions for loan losses to earnings to maintain the total allowance for loan losses at a level we consider adequate to provide for probable loan losses, based on existing loan levels and types of loans outstanding, nonperforming loans, prior loss experience, general economic conditions and other factors. We estimate the allowance using an allowance for loan losses model which takes into consideration all of these factors. Our policies require the review of assets on a regular basis, and we assign risk grades to loans based on the relative risk of the credit, considering such factors as repayment experience, value of collateral, guarantors, etc. Our credit management systems have resulted in low loss experience; however, there can be no assurances that such experience will continue. We believe we use the best information available to make a determination with respect to the allowance for loan losses, recognizing that future adjustments may be necessary depending upon a change in economic conditions. The provision for loan losses was \$60,000 and net charge-offs were \$0 for the quarter ended March 31, 2003 compared with a provision of \$60,000, and net charge-offs of \$7,000 for the quarter ended March 31, 2002. Nonperforming loans were \$4.4 million at both March 31, 2003 and September 30, 2002. The majority of the non-performing loans resulted from two unrelated, unique credits which are not necessarily indicative of the credit quality of the entire portfolio. There was no significant impact on the provision as these loans are well secured by property and equipment. The provision for the quarter ended March 31, 2003 was positively

16

impacted by the decrease in charge-offs which was offset by the shift in the loan portfolio to commercial loans which receive higher allocations in the allowance for loan losses model. The Company made no significant changes to the allowance for loan losses methodology during the period which impacted the provision for loan losses.

During the quarter ended March 31, 2003 commercial and home equity loans continued to increase as well as the percentages of these loans to the total portfolio. Although these loans normally have a relatively short maturity management believes that there is greater risk inherent in these loans than the typical one-to-four family residential mortgage loan. Therefore, management assigns these types of loans a higher risk weighting in the analysis of the loan loss reserve. The commercial loans that have been originated are loans made to businesses to either produce a product, sell a product or provide a service. Many of these loans are asset-based loans which are loans where repayment is based primarily on the cash flow from operations and secondarily on, the liquidation of assets such as inventory and accounts receivable.

Other Income. Other income increased \$119,000, or 15.4%, from \$775,000 for the quarter ended March 31, 2002 to \$894,000 for the quarter ended March 31, 2003. Commissions from sales of annuities and mutual funds increased \$61,000, or 62.2% from \$98,000 for the quarter ended March 31, 2002 to \$159,000 for the quarter ended March 31, 2003. This increase results from higher sales of annuities and mutual funds. Mortgage banking income, net increased \$102,000 from \$357,000 for the quarter ended March 31, 2002 to \$459,000 for the quarter ended March 31, 2003 as a result of higher loan sales. Proceeds from the sale of mortgage loans totaled \$23.7 million for the quarter ended March 31, 2003 as compared to \$16.7 million for the quarter ended March 31, 2002. The increased loan activity resulted from heavy mortgage loan refinancing activity which resulted from the attractive mortgage loan rates available in the marketplace. The Company recorded gains on the sale of investments of \$47,000 for the quarter

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

ended March 31, 2002 which were not present in the current quarter.

Operating Expenses. Total operating expenses were \$2.2 million for both the quarters ended March 31, 2003 and 2002. Compensation and related benefits expense decreased \$161,000 from \$1.6 million for the quarter ended March 31, 2002 to \$1.4 million for the quarter ended March 31, 2003. Compensation and related benefits expense for the quarter ended March 31, 2002 included \$260,000 of MRP expense which was not present in 2003 as the final vesting date for the MRPs was June 6, 2002. Partially offsetting this decrease was increased personnel expense related to increased number of employees and increased salary and benefit costs. Occupancy and equipment expense increased \$73,000, or 23.4% from \$311,000 for the quarter ended March 31, 2002 to \$384,000 for the quarter ended March 31, 2003. This increase was primarily the result of increased depreciation on new equipment. Expenses incurred in operating real estate owned were \$4,000 for the three months ended March 31, 2003 compared to income of \$50,000 for the quarter ended March 31, 2002. During the quarter ended March 31, 2002, the rent receipts on real estate owned properties exceeded operating expenses by \$50,000.

Income Tax Expense. Income tax expense increased \$72,000 from tax expense of \$513,000 for the quarter ended March 31, 2002 to \$585,000 for the quarter ended March 31, 2003. The effective tax rates were 37.0% and 35.7% for the quarters ended March 31, 2003 and 2002, respectively. The increase in the effective rate was primarily due to an increase in non-deductible expenses over the prior period.

COMPARISON OF OPERATING RESULTS FOR THE SIX MONTHS ENDED MARCH 31, 2003 AND 2002

Net Income. We recorded net income of \$2.0 million for the six months ended March 31, 2003, an increase of \$210,000, or 11.9% over the \$1.8 million reported in the six months ended March 31, 2002. For the six months ended March 31, 2003, basic and diluted earnings per share were \$0.70 and \$0.67, respectively. The Company reported basic and diluted earnings per share for the six months ended March 31, 2002 of \$0.59 and \$0.56, respectively. The increase in net income resulted primarily from increased net interest income, increased other income and decreased operating expenses. These increases in income were partially offset by increased income taxes. The increase in the net interest income resulted from higher net interest margins. The average prime interest rate for the six months ended March 31, 2003 was 4.35%, a decrease of 61 basis points from 4.96% which was the average prime for the six months ended March 31, 2002. The rate decrease caused a greater reduction in the average rate paid on interest-bearing liabilities than the average yield on earning assets.

Net Interest Income. Net interest income, the difference between interest earned on loans and investments and interest paid on interest-bearing liabilities, increased by \$134,000 or 2.3% for the six months ended March 31, 2003,

17

compared to the same six months in the prior year. This increase reflects a \$1.2 million decrease in interest income that was more than offset by the \$1.3 million decrease in total interest expense. The average net interest margin increased 8 basis points from 3.58% for the six months ended March 31, 2002 to 3.66% for the six months ended March 31, 2003.

Interest Income. The decrease in interest income for the six months ended March 31, 2003 was due a decrease in yield on interest-earning assets of 73 basis points from 6.24% for the six months ended March 31, 2002 to 5.51% for the six months ended March 31, 2003 that was partially offset by an increase of \$225,000 in average interest-earning assets compared to the same period in the

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

prior year. The increased volume of average interest-earning assets increased interest income by approximately \$66,000 and the decreased yield decreased interest income by approximately \$1.3 million. Average loans receivable increased \$8.1 million for the six months ended March 31, 2003 compared with the prior year. This increase was offset in part by a decrease in average investment securities of \$7.0 million and a decrease of \$845,000 in average interest bearing overnight funds.

Interest Expense. Interest expense decreased in the six months ended March 31, 2003 due to a decrease in average interest-bearing liabilities of \$1.2 million and a decrease in the cost of interest-bearing liabilities of 99 basis points from 3.28% for the six months ended March 31, 2002 to 2.29% for the six months ended March 31, 2003. Average deposits decreased by \$628,000 while average FHLB advances decreased \$562,000 for the six months ended March 31, 2003 compared to the same six months in the prior year. The decrease in average interest-bearing liabilities decreased interest expense by approximately \$24,000 and the decrease in the average cost of interest-bearing liabilities decreased interest expense by approximately \$1.3 million.

18

The following table presents average balances and average rates earned/paid by the Company for the six months ended March 31, 2003 compared to the six months ended March 31, 2002.

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

Net interest margin (7)	3.66%
Ratio of average interest-earning assets	123.65%

Provision for Loan Losses. The provision for loan losses is charged to earnings to maintain the total allowance for loan losses at a level considered adequate to absorb estimated probable losses inherent in the loan portfolio based on existing loan levels and types of loans outstanding, nonperforming loans, prior loan loss experience, general economic conditions and other factors. Provisions for loan losses totaled \$120,000 for both the six months ended March 31, 2003 and 2002. The provision for loan losses was impacted by the continued shift in the portfolio to commercial loans which require a larger allocation of allowance for loan losses. The effects of this continued shift in the portfolio were offset to a certain degree in 2003 by a decrease in net loan charge-offs.

Other Income. Other income increased \$70,000, or 4.3%, from \$1.6 million for the six months ended March 31, 2002 to \$1.7 million for the six months ended March 31, 2003. Mortgage banking income, net increased \$114,000 from \$779,000 for the six months ended March 31, 2002 to \$893,000 for the six months ended March 31, 2003. During the six months ended March 31, 2003, we sold fixed-rate mortgage loans held for sale of \$48.6 compared with loan sales of \$42.0 million for the six months ended March 31, 2002. Gains on sales of investment securities of \$47,000 were recognized during

19

the six months ended March 31, 2002 that were not present in the current year.

Operating Expenses. Total operating expenses were \$4.4 million for the six months ended March 31, 2003, a decrease of \$122,000, or 2.7% over the \$4.5 million recorded for the six months ended March 31, 2002. Compensation and related benefits expense decreased \$347,000, or 11.0% from \$3.1 million for the six months ended March 31, 2002 to \$2.8 million for the six months ended March 31, 2003. Compensation and benefits expense for the six months ended March 31, 2002 included \$520,000 of MRP expense which was not present in 2003 as the final vesting date for the MRPs was June 6, 2002. Partially offsetting this decrease was increased personnel expense related to the increased number of employees and increased salary and benefit costs. The Company recognized income from real estate operations of \$32,000 during the six months ended March 31, 2002 compared to expenses of \$9,000 in the six months ended March 31, 2003.

Income Tax Expense. Income tax expense increased \$116,000 from tax expense of \$1.0 million for the six months ended March 31, 2002 to \$1.2 million for the six months ended March 31, 2003. The increase resulted from a \$326,000 increase in income before income taxes. The effective tax rates were 36.9% and 37.0% for the six months ended March 31, 2003 and 2002, respectively.

COMMITMENTS, CONTINGENCIES AND OFF-BALANCE SHEET RISK

The Company is a party to financial instruments with off-balance sheet risk including commitments to extend credit under existing lines of credit and commitments to sell loans. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

Off-balance sheet financial instruments whose contract amount represents credit and interest rate risk are summarized as follows:

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

March 31, 2003

(dollars in thou

Commitments to originate new loans	\$1,787
Commitments to originate new loans held for sale	--
Unfunded commitments to extend credit under existing equity line and commercial lines of credit	64,409
Commercial letters of credit	265
Commitments to sell loans held for sale	4,710

The Company does not have any special purpose entities or other similar forms of off-balance sheet financing arrangements.

Commitments to originate new loans or to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Loan commitments generally expire within 30 to 45 days. Most equity line commitments are for a term of 15 years, and commercial lines of credit are generally renewable on an annual basis. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amounts of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower.

Commitments to sell loans held for sale are agreements to sell loans to a third party at an agreed upon price. At March 31, 2003, the agreed-upon price of these commitments exceeded the book value of the loans to be sold.

20

CONTRACTUAL OBLIGATIONS

As of March 31, 2003

	Payments due by period			
	Less than 1 year	1-3 years	4-5 years	Over 5 y
Deposits	\$230,882	19,920	8,004	--
Long-term borrowings	--	--	20,000	--
Lease obligations	19	56	42	38
Total contractual cash obligations	\$230,901	19,976	28,046	38

ASSET QUALITY

At March 31, 2003, we had approximately \$4.6 million in non-performing assets (nonaccrual loans and real estate owned) or 1.32% of total assets. At September 30, 2002, non-performing assets were \$4.4 million or 1.25% of total assets. At March 31, 2003 and September 30, 2002, impaired loans totaled \$3.8

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

million and \$3.7 million, respectively, as defined by Statement of Financial Accounting Standards No. 114, "Accounting by Creditors for Impairment of a Loan." The impaired loans at March 31, 2003 result from three unrelated commercial loan customers, all of which have loans secured by commercial real estate and business assets in Alamance County. At March 31, 2003, the entire \$3.8 million of the impaired loans were on non-accrual status, and their related reserve for loan losses totaled \$210,000. The average carrying value of impaired loans was \$3.7 million during the three and six months ended March 31, 2003, respectively. Interest income of \$75,000 and \$117,000 has been recorded on impaired loans on a cash basis in the three and six months ended March 31, 2003, respectively. The Bank's net charge-offs for the three and six months ended March 31, 2003 were \$0 and \$2,000, respectively. The Bank's allowance for loan losses was \$3.8 million at March 31, 2003 compared with \$3.7 million at September 30, 2002 and \$3.6 million at March 31, 2002. As a result of our continued, gradual shift toward commercial, construction, consumer and home equity loans, the recent decrease in residential mortgage loans, the modest increase in non-performing loans as a percentage of total loans as well as the continued decline in the local and regional economy, the ratio of the allowance for loan losses to total loans, net of loans in process and deferred loan fees increased to 1.69% at March 31, 2003 compared to 1.67% at September 30, 2002.

The following table presents an analysis of our nonperforming assets:

	At March 31, 2003 ----	At September 30, 2002 ----
Nonperforming loans:		
Nonaccrual loans	\$ 4,414	\$ 4,204
Loans 90 days past due and accruing	--	--
Restructured loans	--	--
	-----	-----
Total nonperforming loans	4,414	4,204
Other real estate	177	183
	-----	-----
Total nonperforming assets	\$ 4,591	\$ 4,387
	=====	=====
Nonperforming loans to loans receivable, net	1.97%	1.91%
Nonperforming assets as a percentage of loans and other real estate owned	2.05%	1.99%
Nonperforming assets to total assets	1.32%	1.25%

Regulations require that we classify our assets on a regular basis. There are three classifications for problem assets:

21

substandard, doubtful and loss. We regularly review our assets to determine whether any assets require classification or re-classification. At March 31, 2003, we had \$5.1 million in classified assets consisting of \$5.0 million in substandard and loss loans and \$177,000 in real estate owned. At September 30, 2002, we had \$5.1 million in substandard assets consisting of \$4.9 million in loans and \$183,000 million in real estate owned.

In addition to regulatory classifications, we also classify as "special mention" and "watch" assets that are currently performing in accordance with their contractual terms but may become classified or nonperforming assets in the future. At March 31, 2003, we have identified approximately \$1.1 million in assets classified as special mention and \$30.7 million as watch.

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

LIQUIDITY AND CAPITAL RESOURCES

The Bank must meet certain liquidity requirements established by the State of North Carolina Office of the Commissioner of Banks (the "Commissioner"). At March 31, 2003, the Bank's liquidity ratio exceeded such requirements. Liquidity generally refers to the Bank's ability to generate adequate amounts of funds to meet its cash needs. Adequate liquidity guarantees that sufficient funds are available to meet deposit withdrawals, fund loan commitments, maintain adequate reserve requirements, pay operating expenses, provide funds for debt service, pay dividends to stockholders and meet other general commitments.

Our primary sources of funds are deposits, principal and interest payments on loans, proceeds from the sale of loans, and to a lesser extent, advances from the FHLB of Atlanta. While maturities and scheduled amortization of loans are predictable sources of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and local competition.

Our most liquid assets are cash and cash equivalents. The levels of these assets are dependent on our operating, financing, lending and investing activities during any given period. At March 31, 2003, cash and cash equivalents totaled \$31.4 million. We have other sources of liquidity should we need additional funds. During the three and six months ended March 31, 2003, we sold loans totaling \$23.7 million and \$48.6 million, respectively. Additional sources of funds include FHLB of Atlanta advances. Other sources of liquidity include loans and investment securities designated as available for sale, which totaled \$64.1 million at March 31, 2003.

We anticipate that we will have sufficient funds available to meet our current commitments. At March 31, 2003, we had \$1.8 million in commitments to originate new loans, \$64.4 million in unfunded commitments to extend credit under existing equity lines and commercial lines of credit and \$265,000 in standby letters of credit. At March 31, 2003, certificates of deposit, which are scheduled to mature within one year, totaled \$127.4 million. We believe that a significant portion of such deposits will remain with us.

The FDIC requires the Bank to meet a minimum leverage capital requirement of Tier I capital to assets ratio of 4%. The FDIC also requires the Bank to meet a ratio of total capital to risk-weighted assets of 8%, of which 4% must be in the form of Tier I capital. The Commissioner requires the Bank at all times to maintain certain minimum capital levels. The Bank was in compliance with all capital requirements of the FDIC and the Commissioner at March 31, 2003 and is deemed to be "well capitalized."

The Federal Reserve also mandates capital requirements on all bank holding companies, including 1st State Bancorp, Inc. These capital requirements are similar to those imposed by the FDIC on the Bank. At March 31, 2003, the Company was in compliance with the capital requirements of the Federal Reserve.

On October 2, 2000, the Company paid a one-time special cash distribution of \$5.17 per share to its stockholders. The distribution was made to manage the Company's capital and enhance shareholder value. Returning capital to the stockholders reduced the Company's equity to asset ratio from 21.2% to 17.2%. The Company's equity to asset ratio at March 31, 2003 was 18.0%. The Company's capital level is sufficient to support future growth.

The Company has declared cash dividends per common share of \$0.10, \$0.08 and \$0.08 for each of the three months ended March 31, 2003, September 30, 2002 and March 31, 2002, respectively. The Company's ability to pay

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

dividends is dependent upon earnings. The Company's dividend payout ratio for the three months ended March 31, 2003, September 30, 2002 and March 31, 2002 was 29.4%, 26.4% and 27.6%, respectively.

ACCOUNTING MATTERS

On October 3, 2001, the FASB issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS No. 144), which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. While SFAS No. 144 supercedes SFAS No. 121 (Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of), it retains many of the fundamental provisions of SFAS No. 121. SFAS No. 144 also supersedes the accounting and reporting provisions of Accounting Principles Board Opinion No. 30 (Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions) for the disposal of a segment of a business. However, it retains the requirement in Opinion No. 30 to report separately discontinued operations and extends the reporting to a component of an entity that either has been disposed of (by sale, abandonment, or in a distribution to owners) or is classified as held for sale. By broadening the presentation of discontinued operations to include more disposal transactions, the FASB has enhanced management's ability to provide information that helps financial statement users to assess the effects of disposal transactions on the ongoing operations of an entity. The provisions of SFAS No. 144 are effective for financial statements issued for fiscal years beginning after December 15, 2001, and interim periods within those fiscal years. Adoption of SFAS No. 144 on October 1, 2002 did not have a material impact on the Company's consolidated financial statements.

In June 2002, the FASB issued Statement of Financial Accounting Standards No. 146 (SFAS No. 146), "Accounting for Costs Associated with Exit or Disposal Activities," which addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies Emerging Issues Task Force (EITF) Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." This Statement applies to costs associated with an exit activity that does not involve an entity newly acquired in a business combination or with a disposal activity covered by SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." Those costs include, but are not limited to, the following: a) termination benefits provided to current employees that are involuntarily terminated under the terms of a benefit arrangement that, in substance, is not an ongoing benefit arrangement or an individual deferred compensation contract (hereinafter referred to as one-time termination benefits), b) costs to terminate a contract that is not a capital lease and c) costs to consolidate facilities or relocate employees. This Statement does not apply to costs associated with the retirement of a long-lived asset covered by FASB Statement No. 143, "Accounting for Asset Retirement Obligations." A liability for a cost associated with an exit or disposal activity shall be recognized and measured initially at its fair value in the period in which the liability is incurred. A liability for a cost associated with an exit or disposal activity is incurred when the definition of a liability is met. The provisions of this Statement are effective for exit or disposal activities that are initiated after December 31, 2002, with early application encouraged. This statement will impact the Company to the extent it engages in exit or disposal activities in future periods.

In November 2002, the FASB issued Interpretation No. 45 (FIN 45), "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others", which addresses the disclosure to be made by a guarantor in its interim and annual financial statements about its

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

obligations under guarantees. FIN 45 requires the guarantor to recognize a liability for the non-contingent component of the guarantee, such as the obligation to stand ready to perform in the event that specified triggering events or conditions occur. The initial measurement of this liability is the fair value of the guarantee at inception. The recognition of the liability is required even if it is not probable that payments will be required under the guarantee or if the guarantee was issued with a premium payment or as part of a transaction with multiple events. The disclosure requirements are effective for interim and annual financial statements ending after December 15, 2002. The initial recognition and measurement provisions are effective for all guarantees within the scope of FIN 45 issued or modified after December 31, 2002. The Company issues standby letters of credit whereby the Company guarantees performance if a specified triggering event or condition occurs (primarily nonperformance under construction contracts entered into by construction customers.) The guarantees generally expire within one year and may be automatically renewed depending on the terms of the guarantee. The maximum potential amount of undiscounted future payments related to standby letters of credit at March 31, 2003 is \$265,000. At March 31, 2003, the Company has recorded no liability for the current carrying amount of the obligation to perform as a guarantor and no contingent liability is considered necessary, as such amounts are deemed immaterial. Substantially all standby

23

letters of credit are secured by real estate and/or guaranteed by third parties in the event the Company had to advance funds to fulfill the guarantee.

In December 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure' (SFAS 148) an amendment of FASB Statement No. 123, Accounting for Stock-Based Compensation (SFAS 123), which provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS 148 amends the disclosure requirements of SFAS 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The transition provisions of the statement are effective for financial statements for fiscal years ending after December 15, 2002 while the disclosure requirements are effective for interim periods beginning after December 15, 2002, with early application encouraged. The adoption of SFAS 148 have resulted in enhanced disclosures for the Company's stock-based employee compensation plan effective January 1, 2003.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the possible chance of loss from unfavorable changes in market prices and rates. These changes may result in a reduction of current and future period net interest income, which is the favorable spread earned from the excess of interest income on interest-earning assets over interest expense on interest-bearing liabilities.

The Company considers interest rate risk to be its most significant market risk, which could potentially have the greatest impact on operating earnings. The structure of the Company's loan and deposit portfolios is such that a significant decline in interest rates may adversely impact net market values and net interest income.

The Company monitors whether material changes in market risk have occurred since September 30, 2002. The Company does not believe that any material adverse

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

changes in market risk exposures occurred since September 30, 2002.

ITEM 4. CONTROLS AND PROCEDURES

(a) Within 90 days prior to the date of this report, we carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective in timely alerting them to material information required to be included in our periodic SEC reports.

(b) In addition, there have been no significant changes in our internal controls or in other factors that could significantly affect those controls subsequent to the date of their last evaluation.

24

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company's Annual Meeting of Stockholders was held on January 28, 2003. At this meeting 2,574,001 shares of the Company's common stock were represented in person or by proxy.

Stockholders voted in favor of the election of three nominees for director. The voting results for each nominee were as follows:

Nominee	Votes in Favor of Election	Votes Withheld
Bernie C. Bean	2,571,002	2,999
James C. McGill	2,561,735	12,226
Virgil L. Stadler	2,570,478	3,523

There were no broker nonvotes on the matter.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a.) Exhibits.

99 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

to Section 906 of the Sarbanes-Oxley Act of 2002

(b.) Reports on Form 8-K.

On March 20, 2003, the Company filed a report on Form 8-K regarding its March 19, 2003 news release in which it announced an increase in its cash dividend to \$0.10 per share. The full text news release dated March 19, 2003 was attached as Exhibit 99(a) to this Form 8-K filing.

25

SIGNATURES

Pursuant to the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

CERTIFICATION

I, James C. McGill, President and Chief Executive Officer of 1st State Bancorp, Inc., certify that:

1. I have reviewed this quarterly report on Form 10-Q of 1st State Bancorp, Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for

Edgar Filing: 1ST STATE BANCORP INC - Form 10-Q

establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

a) Designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b) Evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and

c) Presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
