prove effective in addressing the issue.

(unaudited)
Dear Shareholder:
When I wrote last year, Market Vectors ChinaAMC SME-ChiNext ETF (NYSE Arca: CNXT) had traded for just over five months. After trading 12 full months, and despite significant volatility in the market and its precipitous downturn in the middle of the year and August, the Fund returned a healthy 45.94% during this period. Our other China-focused ETF, the Market Vectors ChinaAMC A-Share ETF (NYSE Arca: PEK), provided a modest positive return of 0.22% for the same period.
While China's economy may currently be slowing down, the country remains both an important part of the world economy and, we believe, continues to offer interesting investment opportunities.
At the center of China's economy, small and medium enterprises (SMEs) now account for 60% of the country's gross domestic product and provide 80% of urban employment. However, despite rate cuts, small, non-government backed firms are still struggling to access capital because large banks generally do not offer them financing. Established as a way to help promote private innovation in the public markets, the SME and ChiNext Boards (the former under the Shenzhen Stock Exchange (SZSE) and the latter as a wholly owned but independent arm of the SZSE) continue to

As of December 31, 2014, a total of 732 companies were listed on the SME Board with a combined market value of \$823.52 billion, while 406 companies traded on the ChiNext Board with a combined market value of \$352.43 billion. At the end of 2015, these figures had risen to 776 companies (up 6%) listed on the SME Board with a combined market value of \$1.6 trillion, and 492 companies (up 21%) traded on the ChiNext Board with a combined market value of \$860.91 billion.

We still believe CNXT provides not only exposure primarily to China's market for innovative, non-government owned companies, but also to the very sectors that are increasingly recognized as underpinning the growth of China's New Economy. CNXT gives investors a liquid, transparent way to gain access to some of these growing companies.

SME-ChiNext 100 Index[‡]

Management Discussion (unaudited	nagement Discussion	(unaudited)
---	---------------------	-------------

The performance of funds in the suite of Market Vectors Country/Regional ETFs was predominantly negative during the 12 month period. Five funds, from a total of 14, posted positive total returns. The top performing fund was the Market Vectors ChinaAMC SME-ChiNext ETF (NYSE Arca: CNXT) (+45.94%).

January 1 through December 31, 2015 Market Vectors Country/Regional ETFs Total Return

Source: Van Eck Global. Returns based on each fund's net asset value (NAV). The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the funds reflects temporary waivers of expenses and/or fees. Had the funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

Country/Regional Overviews

Africa

The financial sector was the greatest detractor from performance for the 12 month period. In addition to energy, the materials, telecommunications services, and consumer staples sectors were also significant detractors. No one sector provided positive contributions to overall performance. Mid- and large-cap companies detracted most from performance. Geographically, Kenya contributed positive performance, albeit minimally. Egypt, South Africa, and Nigeria were the most significant negative contributors to total return.

Brazil

If the first half of 2015 was a challenging period for Brazil, so, too, was the second. Dropping to 9% in April, their lowest ever for a Brazilian president, Dilma Rousseff's approval ratings had risen only a single percentage point by the end of September, but, as the year drew to a close, they were still languishing in single figures. Having deteriorated steadily in the first half of the year, economic activity in the third quarter (down 1.41% from the previous three months), contracted for the fourth straight quarter, pushing the country deeper into recession—its worst for 25 years. Independent economists were forecasting that the economy would contract 3.10% in 2015. In November, the country's public sector deficit rose to one of the highest levels on record. Only one sector, consumer staples, contributed positively, and, then only minimally, to return over the 12 month period. The consumer discretionary and industrial sectors were the two greatest detractors from performance.

MARKET VECTORS COUNTRY/REGIONAL ETFs

(unaudited) (continued)

China

During the first half of 2015, the Chinese government continued its efforts to support the economy through accommodative monetary policy, including four separate interest rate cuts. The A-share equity market grew significantly during the period, spurred by mainland retail investors who began to take highly leveraged positions as they were confident in the government's ability to sustain market growth. However, having peaked in mid-June, the equity rally began to sputter thereafter, largely driven by investors' concern that regulators would soon tighten requirements for margin investing. The second half of the year was notable for further precipitous declines in the market both at the start of July and toward the end of August. While it recovered somewhat thereafter, the remainder of the year was marked by uncertainty both as to the growth prospects for the country going forward, and as to the extent and nature of government policy for dealing with the country's economic predicament and, in particular, the value of the yuan.

While the Market Vectors ChinaAMC A-Share ETF (PEK) began direct investment in the A-share constituents of the CSI 300 Index* on January 8, 2014, thereby eliminating the majority of its exposure previously achieved through swap contracts, some contracts remained outstanding as of December 31, 2015. These are presented in the Fund's Schedule of Investments. While most sectors contributed positively to performance during the period under review, of those that detracted from performance, the financial sector was the most notable.

Both relative to PEK (which ended the year up slightly) and in absolute terms, the performance of the Market Vectors ChinaAMC SME-ChiNext ETF (CNXT) was exceptional. This was to be expected from a fund that seeks to provide not only exposure primarily to China's market for innovative, non-government owned companies, but also to the very sectors that are increasingly underpinning the growth of China's "New Economy". The vast majority of the Fund's notable returns came from companies in the information technology sector, followed by both the healthcare and consumer discretionary sectors. The energy sector did, however, detract from performance.

Egypt

Having reached highs in early February, Egyptian stocks fell thereafter, albeit fitfully, throughout the rest of the year. This decline was recorded despite GDP growth of 4.1% during 2014/2015, compared to 2.2% for 2013/2014.⁶ (The country's fiscal year runs from July to June.) After a slight recovery in the first half of the year, due primarily to improved political stability,⁷ the destruction of a Russian plane over Sinai by a terrorist bomb (with the loss of all 224 passengers on board) at the end of October⁸ dealt a severe blow to Egyptian tourism. (Tourism remains exceptionally important to the country, making up 11.3% of the country's GDP, and providing up to 14% of its foreign currency revenue.⁹) During the year, the dearth of foreign currency in the country, particularly U.S. dollars, and particularly to

pay for imports, continued to hurt businesses and was seen by some as contributing to a "sharp slowdown in growth in the first half of the year.^{‡0} In December, Fitch forecast that inflation would continue to run near 10% through the end of the year.^{‡1} On December 24, citing inflationary pressures, the country's Monetary Policy Committee raised benchmark rates by 50bps, the first such rate hike since July 2014.^{‡2} While every sector detracted from performance, the financial and telecommunications services sectors were the greatest detractors. Mid- and small-cap companies, both with significant average weightings, together detracted the most from performance. Large-cap companies with a much smaller average weighting detracted commensurately less.

Gulf States

During the first six months of the year, the Fund posted a positive total return. However, the second half of the year was challenging, and it ended the 12 month period posting a negative total return of -13.42%. Although the Gulf States were, of course, hit by the drop in the price of oil during 2015, not only had most member countries bolstered reserves when the oil price was high, but also, for a number, growth is not tied to the hydrocarbon sector. As noted in a report on the Middle East published in November: A combination of diversification and drawing on financial reserves will allow oil-exporting GCC countries to continue their economic growth plans in the short term. However, strong performance down the line will require reconsideration of both public spending priorities and sources of government revenue. Something that, with its budget proposals announced at the end of the year, Saudi Arabia appeared prepared to do. But this did not prevent countries in the Gulf Cooperation Council, as a regional grouping, falling victim economically to the depressed price of oil.

No one country contributed positively to total returns. Geographically, the United Arab Emirates, with the greatest average country weighting, detracted most from performance. Qatar and Kuwait, with the second and the third greatest average country weighting respectively, were, likewise, the second and third greatest detractors. Financial stocks were the greatest detractors, with industrial stocks the other significant detractors from performance. Large-cap stocks detracted the most from performance, while small-cap stocks detracted the least.

India

Despite an economy that grew by 7.5%¹⁷ in the first quarter, and 7.1%¹⁸ in the second quarter of 2015, and despite the IMF's prediction that it would increase further the following year (making the country the world's fastest growing large economy¹⁹), total capital expenditure in the private sector declined severely during the year. In mid-October, according to the rating agency Fitch, it was "set to hit its lowest level since 2010." The third quarter of the year, however, brought with it further economic expansion, with gross domestic product growing 7.4%²¹ from a year earlier. In particular, during the three months ended September 30, manufacturing output rose 9.3%²² from a figure of 7.2% in the previous quarter. For the 12 months under review, the Fund recorded a small gain of just more than 1%. A number of sectors, in particular healthcare, industrials and information technology, provided creditable positive returns. These were, however, offset by negative performance in the consumer discretionary, materials, and utilities sectors, and, in particular, in the financial sector, the greatest detractor from performance.

Indonesia

In early May 2015, President Joko Widodo promised to boost investment, increase infrastructure spending and, by 2017, expand the economy by 7%. However, GDP during the first quarter of 2015 contracted 0.18% over the previous quarter, a year-on-year growth figure of 4.71%. It was the slowest since the third quarter of 2009.²³ As the year progressed, there was little improvement: 4.67% year-on-year during the second quarter and 4.73% during the third.²⁴ At the beginning of November, the country's finance minister, Bambang Brodjonegoro, said that growth in 2015 would, at most, be 4.8% (the slowest since 2009). President Widodo's initial target for growth in 2015 had been 5.7%.²⁵ Challenging conditions faced by Indonesia's economy included forest fires and haze which, according to the World Bank, cost the country's economy an estimated 1.9% of GDP and subdued private sector investment?⁶

For mid- and large-cap names, the focus of the Indonesia ETF, all sectors detracted from performance, with financial stocks detracting by far the most, and industrial stocks the least. Similarly, among small-cap stocks, the focus of the Indonesia Small-Cap ETF, not one sector contributed positively to performance. The financial, energy, and consumer discretionary sectors were by far the worst performing sectors, with the healthcare sector detracting the least from performance.

Israel

After a weak first half in 2015, Israel's economy bounced back in the third quarter. Both investment and exports rebounded, resulting in annualized growth for the quarter of 2.5%.²⁷ In particular, private spending—recently the country's main growth driver—ticked up to 2.4% for the quarter from 1.5% the previous quarter The public sector aside, in the third quarter Israel's economy grew at an annualized rate of 2.7%. By the end of the year, however, the Bank of Israel's Research Department had revised down its growth forecast for 2016 to 2.8%, from the 3.3% it had previously forecast in September. Over the period under review, the list of positive contributing sectors was topped by the telecommunications services and energy sectors. Of those sectors detracting from performance, the materials and information technology sectors were notable.

Poland

In May, in an unexpected turn of events, conservative candidate, Andrzej Duda won the presidential election against the incumbent president Bronisław Komorowski³¹ And while President Duda may have become leader as the country's economy started to pick up—GDP grew 1% in the first quarter and inflation rose to -1.1% in April from the March rate of -1.5%³²—Polish stocks fell inexorably, if erratically, from the middle of May through to the end of the year. Between the election and late-December, the index of Poland's main stock exchange had fallen 17.5%³ and, in response to concerns about the country's significant shift to the right, its administration (in the form of deputy prime minister Mateusz Morawiecki) felt it necessary to reassure investors of the

MARKET VECTORS COUNTRY/REGIONAL ETFs

(unaudited) (continued)

government's pro-market credentials. In an interview he was quoted as saying: "I am extremely open to international investors, especially those that bring lots of added value . . . we want to open the gates as broadly as possible. "A Over the 12 month period under review, Polish stocks fell 9.62% in local currency terms (zloty) and 18.38% in terms of the U.S. dollar.

Three sectors, consumer staples, energy, and information technology each contributed positively to performance. However, together with the financial sector, the greatest detractor from performance, the materials and utilities sectors, both provided negative returns. Small-cap companies detracted the least from performance. Mid-cap companies, followed by large-cap companies, detracted the most from performance.

Russia

Over the first six months of 2015, Russia's economy continued to suffer both from the imposition of sanctions stemming from its involvement in Ukraine and falling energy prices. Year-on-year, the economy contracted by 1.9% in the first quarter³⁵ and inflation rose to 17%.³⁶ However by the end of May, the ruble had bounced back to its mid-November 2014 level.³⁷ By the end of the first half, the Russian stock market index had risen over 19.7%.³⁸ While sanctions dampened investor exposure in 2015, the economy proved more resilient than expected—in part due to the fact that the authorities opted for a more orthodox policy response allowing the currency (rather than the international reserves) to act as a shock-absorber. By December 31, 2015, the stock market had risen 32.33% in local currency (ruble) terms for the full 12 month period, but only 0.41% in U.S. dollar terms.

Financial and utilities companies contributed positive returns to the large-cap fund, the Russia ETF. The materials sector detracted the most from performance. In the Russia Small-Cap ETF, companies in the materials sector performed well. Similarly sized companies in the consumer discretionary and consumer staples sectors were, however, the bottom performers.

Vietnam

In October, Vietnam's Prime Minister, Nguyen Tan Tung, raised the target for GDP growth, set in November 2014, from 6.2% to at least 6.5%.³⁹ If this growth was actually achieved, it would be the fastest in eight years.⁴⁰ The government remained intent upon diversifying export markets by signing trade agreements, increasing domestic production, and developing substitute industries for imported products.⁴¹ Should it be ratified by participating countries, the recently signed Trans-Pacific Partnership will improve the Vietnam's medium-term growth outlook

significantly.⁴² In the present, however, the Fund ended the 12 month period down 18.87%.

Mid-cap companies actually performed positively over the 12 month period, but only minimally. With an average weighting of approximately 55%, small-cap companies were by far the greatest detractors from performance. While no sector contributed positively to total return, the materials sector detracted the least and the energy sector performed the worst.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the fund. An index's performance is not illustrative of the fund's performance. Indices are not securities in which investments can be made. PERFORMANCE COMPARISON

December 31, 2015 (unaudited)

Hypothetical Growth of \$10,000 (Since Inception)

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹	NAV	MVAFK	KTR ²
One Year	(29.95)%	(29.41)%	(29.07)%
Five Years	(10.15)%	(9.57)%	(8.59)%
Life* (annualized)	(8.24)%	(8.02)%	(6.78)%
Life* (cumulative)	(47.41)%	(46.46)%	(40.86)%
* since 7/10/2008				

Index data prior to June 21, 2013 reflects that of the Dow Jones Africa Titans 50 IndexSM. From June 21, 2013, forward, the index data reflects that of the Market Vectors® GDP Africa Index (MVAFKTR). All Index history reflects a blend of the performance of the aforementioned Indexes.

Commencement date for the Market Vectors Africa Index ETF was 7/10/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (7/10/08) to the first day of secondary market trading in shares of the Fund (7/14/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data

quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.82% / Net Expense Ratio 0.79%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.78% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

AFRICA INDEX ETF

PERFORMANCE COMPARISON

(unaudited) (continued)

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors® GDP Africa Index (MVAFKTR) tracks the performance of the largest and most liquid companies in Africa. The weighting of a country in the index is determined by the size of its gross domestic product.

Market Vectors GDP Africa Index (the "Index") is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. INDONESIA INDEX ETF

PERFORMANCE COMPARISON

December 31, 2015 (unaudited)

Hypothetical Growth of \$10,000 (Since Inception)

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹	NAV	MVIDX	TR ²
One Year	(22.38)%	(22.69)%	(21.85)%
Five Year	(6.69)%	(6.59)%	(5.87)%
Life* (annualized)	14.14 %	14.10 %	15.07	%
Life* (cumulative)	151.05%	150.42%	165.64	%
* since 1/15/2009				

Commencement date for the Market Vectors Indonesia Index ETF was 1/15/09.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (1/15/09) to the first day of secondary market trading in shares of the Fund (1/20/09), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.72% / Net Expense Ratio 0.58%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.57% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/11/09) to the first day of secondary market trading in shares of the Fund (8/14/09), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.67% / Net Expense Ratio 0.67%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.76% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

VIETNAM ETF

PERFORMANCE COMPARISON

(unaudited) (continued)

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Market Vectors® Vietnam Index (MVVNMTR) is a rules-based, modified market capitalization-weighted, ²float-adjusted index comprised of publicly traded companies that are domiciled and primarily listed in Vietnam, or that generate at least 50% of their revenues in Vietnam.

Market Vectors Vietnam Index (the "Index") is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Vietnam ETF (the "Fund") is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

PREMIUM/DISCOUNT INFORMATION

(unaudited)

Information regarding how often the Shares of each Fund traded on NYSE Arca, Inc. or The NASDAQ Stock Market LLC as applicable, at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund during the past four calendar quarters, as applicable, can be found at www.vaneck.com.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2015 to December 31, 2015.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

During the year ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$4,040,849, transfers from Level 2 to Level 1 were \$8,575,393 and transfers from Level 2 to Level 3 were \$192,085. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2015:

	Common Stocks	
	South	United
	Africa	Kingdom
Balance as of December 31, 2014	\$ —	
Realized gain (loss)	_	_
Net change in unrealized appreciation (depreciation)	(6,171)	(184,059)

Purchases	_	—
Sales	_	
Transfers in and/or out of level 3 ^	6,384	185,479
Balance as of December 31, 2015	\$213	1,420

[^]Transfers from Level 2 to Level 3 resulted from a lack of observable inputs to value the securities.

Non-income producing

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the

Board of Trustees. The aggregate value of fair valued securities is \$1,183,578 which represents 1.8% of net assets.

Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from

registration securities offered and sold outside of the United States. Such a security cannot be sold in the United

States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise 144A restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$315,201, or 0.5% of net assets.

During the year ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$27,642,476 and transfers from Level 2 to Level 1 were \$527,615. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the year ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$3,528,853 and transfers from Level 2 to Level 1 were \$133,487. These transfers resulted primarily from changes in securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Total	\$6,674,115	\$164,485,726	\$ 44,148	\$171,203,989

During the year ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$6,449,104 and transfers from Level 2 to Level 1 were \$5,709,367. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2015:

	Common Stocks
	Consumer
	Services
Balance as of December 31, 2014	\$ —
Realized gain (loss)	_
Net change in unrealized appreciation (depreciation)	9,040
Purchases	35,108
Sales	_
Transfers in and/or out of level 3	_
Balance as of December 31, 2015	\$44,148

Food, Beverage & Tobacco			189,760		189,760
Materials		_	174,585	44,016	218,601
Media			105,344	—	105,344
Pharmaceuticals, Biotechnology		_	248,405		248,405
Real Estate			2,329,014		2,329,014
Retailing			224,816	_	224,816
Technology Hardware & Equipment			338,315		338,315
Total	\$	_	\$5,914,591	\$ 44,016	\$5,958,607

During the year ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$265,078. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2015:

	Common Stocks		
	Energy	Materials	
Balance as of December 31, 2014	\$ —	\$ —	
Realized gain (loss)			
Net change in unrealized appreciation (depreciation)	(31,539)	(61,294)	
Purchases		105,310	
Sales			
Transfers in and/or out of level 3 ^	31,539		

Balance as of December 31, 2015

\$0

\$44,016

^Transfers from Level 2 to Level 3 resulted from a lack of observable inputs to value the securities.

On July 1, 2013, the Fund effected a 1 for 3 reverse share split as described in the Notes to Financial Statements (See Note 10). Per share data has been adjusted to give effect to the share split.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

December 31, 2015

Note 1—Fund Organization—Market Vectors ETF Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of December 31, 2015, offers fifty-four investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC A-Share ETF, ChinaAMC SME-ChiNext ETF, Egypt Index ETF, Gulf States Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Indonesia Small-Cap ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF and Vietnam ETF (each a "Fund" and, together, the "Funds"). China Asset Management (Hong Kong) Limited (the "Sub-Adviser") is the sub-adviser to ChinaAMC A-Share ETF and ChinaAMC SME-ChiNext ETF. ChinaAMC A-Share ETF and ChinaAMC SME-ChiNext ETF seek to achieve their investment objective by primarily investing directly in A-shares via the A-share quota granted to the Sub-Adviser. India Small-Cap Index ETF makes its investments through the India Small-Cap Mauritius Fund (the "Subsidiary"), a wholly owned subsidiary organized in the Republic of Mauritius. Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by the China Securities Index Co. Ltd., BlueStar Global Investors LLC or Market Vectors Index Solutions GmbH, a wholly owned subsidiary of Van Eck Associates Corporation (the "Adviser").

The Funds' commencement of operations dates and their respective indices are presented below:

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification ("ASC") 946 Financial Services — Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m.

99

Eastern Standard

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of the Adviser. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 — Quoted prices in active markets for identical securities.

Level 2 — Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 — Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Basis for Consolidation—The Subsidiary, an Indian exempted company, was incorporated on February 25, 2010 and acts as an investment vehicle for the India Small-Cap Index ETF (the "SCIF") in order to effect certain investments on behalf of the SCIF. The SCIF is the sole shareholder of the Subsidiary, and it is intended that the SCIF will remain the sole shareholder and will continue to control the Subsidiary. The consolidated financial statements of the SCIF include the financial results of its wholly owned subsidiary. All material interfund account balances and transactions have been eliminated in consolidation.

Federal Income Taxes—It is each Fund's policy to comply with the provisions of the Internal Revenue Code **C.** applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

100

Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when

- **E.** accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.
- **Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the **F.** securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.
- Repurchase Agreements—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of December 31, 2015 are reflected in the Schedules of Investments.
- H. Use of Derivative Instruments—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter ("OTC") derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. GAAP requires enhanced disclosures about the Fund's derivative instruments and hedging activities. Details of this

disclosure are found below as well as in the Schedule of Investments.

Swap Agreements—The Funds may enter into swap transactions to gain investment exposure for total return or for hedging purposes. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net payment to be received by the Funds and/or the termination value at the end of the contract. Therefore, the Funds consider the creditworthiness of each counterparty to a contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying reference asset or index. Entering into these agreements involves, to varying degrees, market risk, liquidity risk

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

and elements of credit, legal and documentation risk in excess of amounts recognized in the Statements of Assets and Liabilities. The Funds may pay or receive cash as collateral on these contracts which may be recorded as an asset and/or liability. The Funds must set aside liquid assets, or engage in other appropriate measures, to cover their obligations under these contracts. Swap contracts are marked to market daily and the change in value, if any, is recorded as unrealized appreciation or depreciation. Upfront payments, if any, made and/or received by the Funds are recorded as an asset and/or liability and realized gains or losses are recognized over the contract's term/event. Periodic payments received or made on swap contracts are recorded as realized gains or losses. Gains or losses are realized upon termination of a swap contract and are recorded in the Statements of Operations. The Funds, other than ChinaAMC A-Share ETF, held no swap contracts during the year ended December 31, 2015. ChinaAMC A-Share ETF invests in the following type of swap:

A total return swap is an agreement that gives a Fund the right to receive the appreciation in the value of a specified security index or other instrument in return for a fee paid to the counterparty, which will typically be an agreed upon interest rate. If the underlying asset declines in value over the term of the swap, the Fund may also be required to pay the dollar value of that decline to the counterparty. During the year ended December 31, 2015, the average monthly notional amount of the total return swap contracts in ChinaAMC A-Share ETF was \$2,716,806. Outstanding total return swap contracts for the ChinaAMC A-Share ETF held at December 31, 2015 are reflected in the Schedule of Investments.

At December 31, 2015, ChinaAMC A-Share ETF held the following derivatives:

Asset Derivatives Equity Risk

Swap contracts, at value¹ \$95,211

¹Statements of Assets and Liabilities location: Swap contracts, at value

For ChinaAMC A-Share ETF, the impact of transactions in derivative instruments, during the year ended December 31, 2015, was as follows:

Equity Risk

Realized gain(loss): Swap contracts²

\$652,634

Net change in unrealized appreciation (depreciation): Swap contracts³ (627,565)

²Statements of Operations location: Net realized gain (loss) on swap contracts

Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at December 31, 2015 is presented in the Schedules of Investments. Refer to related disclosure in Note 2G (Repurchase Agreements) and Note 9 (Securities Lending).

The table below presents both gross and net information about the derivative instruments, eligible for offset in the Statements of Assets and Liabilities, subject to master netting or other similar agreements, as well as financial collateral received or pledged (including cash collateral and margin) as of December 31, 2015. Collateral is disclosed up to 100% of the net amount of unrealized gain/loss or market value of the respective financial instruments. In general, collateral received or pledged exceeds the net amount of the unrealized gain/loss or market value of financial instruments. Refer to the Schedules of Investments and Statements of Assets and Liabilities for collateral received or pledged as of December 31, 2015.

³ Statements of Operations location: Net change in unrealized appreciation (depreciation) on swap contracts

Fund	Description	Gross Amount of Recognized Assets	Gross Amount Offset in the Statements of Assets and Liabilities	Net Amount of Assets Presented in the Statements of Assets and Liabilities	Financial Instruments and Cash Collateral Received*	Net Amount
ChinaAMC A- Share ETF	Swap contracts, at value	\$95,211	\$—	\$95,211	\$ —	\$95,211

^{*}Gross amounts not offset in the Statements of Assets and Liabilities

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets. The Adviser has agreed, at least until May 1, 2016, to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense limitation (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) listed in the table below.

The current expense limitation and the amounts waived/assumed by the Adviser for the year ended December 31, 2015 are as follows:

	Expense	Waiver of	Expenses
	Expense	warver or	Assumed
Fund	Limitation	Management Fees	by the

During the year ended December 31, 2015, the following Funds utilized accumulated capital loss carryforwards: ChinaAMC A-Share ETF utilized \$312,686; India Small-Cap Index ETF utilized \$9,353,236.

During the year ended December 31, 2015, Russia ETF had \$1,049,748 of its accumulated capital loss carryforwards expire.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

During the year ended December 31, 2015, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, net operating losses, expiration of capital loss carryforwards, deemed distributions on shareholder redemptions and tax treatment of in-kind redemptions, the Funds' incurred differences that affected undistributed (accumulated) net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

	Increase	Increase	
	(Decrease)	(Decrease)	Increase

Vietnam ETF	(796,534)	5,543,194	(4,746,660)

The Funds recognize the tax benefits of uncertain tax positions only where the position is "more-likely-than-not" to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds' tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds' financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

Uncertainties in the Chinese tax rules governing taxation of income and gains from investments in A-Shares could result in unexpected tax liabilities for the ChinaAMC A-Share ETF and ChinaAMC SME-ChiNext ETF. China generally imposes withholding tax at a rate of 10% on dividends and interest derived by Qualified Foreign Institutional Investors ("QFII") from issuers resident in China. China also imposes withholding tax at a rate of 10% on capital gains derived by nonresident enterprises from investments in an issuer resident in China. Effective November 17, 2014, Qualified Foreign institutional investors (QFIIs) and Renminbi Foreign institutional investors (RQFIIs), which includes these Funds, are exempted temporarily from capital gains tax for a period of three years.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2015, the Funds did not incur any interest or penalties.

The Indian Finance Minister announced the introduction of a general anti-avoidance rule ("GAAR") in the Indian tax law in the 2012/2013 budget. GAAR would be applicable where the main purpose of an arrangement is tax avoidance and would empower Indian tax authorities to declare such arrangement as an impermissible avoidance arrangement. Presently, GAAR is expected to become effective April 1, 2017. A special committee was constituted by the Indian Revenue authorities to provide clarity and guidance on the application and implementation of GAAR and have submitted proposed recommendations. As the rules and guidelines have not yet been approved by the Indian Parliament, the Adviser cannot assess whether the India Small-Cap Index ETF, investing through its Mauritius Subsidiary, will fall within the scope of the GAAR provision.

Note 6—Capital Share Transactions—As of December 31, 2015, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the

Funds' underlying index plus a small amount of cash. For the year ended December 31, 2015, the Funds had in-kind contributions and redemptions as follows:

Fund	In-Kind	In-Kind	
Tulid	Contributions	Redemptions	
Africa Index ETF	\$5,417,121	\$8,105,185	
Brazil Small-Cap ETF	1,161,842	124,136	
Egypt Index ETF	4,368,766	5,550,396	
Gulf States Index ETF	_	210,167	
India Small-Cap Index ETF	274,929	1,311,335	
Indonesia Index ETF	907,900	63,238,643	
Indonesia Small-Cap ETF	2,212,226	_	
Israel ETF	24,702,315	20,861,875	
Poland ETF	2,819,232	914,542	
Russia ETF	814,242,064	522,435,895	
Russia Small-Cap ETF	717,792	14,773,619	
Vietnam ETF	33,790,110	27,199,434	

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund's daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect shareholder transactions including any cash component of the transactions.

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a "passive" or index approach to achieve each Fund's investment objective by investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

As a result of recent events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers' held by Russia ETF and Russia Small-Cap ETF.

Should the Chinese government impose restrictions on the ability of ChinaAMC A-Share ETF and ChinaAMC SME-ChiNext ETF to repatriate funds associated with direct investment in A-Shares, the Funds may be unable to satisfy distribution requirements applicable to regulated investment companies ("RICs") under the Internal Revenue Code of 1986, as amended, and the Funds may therefore be subject to Fund-level U.S. federal taxes.

At December 31, 2015, the Adviser owned approximately 4.3% of ChinaAMC A-Share ETF and 7.4% of ChinaAMC SME-ChiNext ETF.

During the year ended December 31, 2015, Vietnam ETF paid \$301 in commissions to Saigon Securities Inc. while being an affiliated broker of the Adviser.

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the "Plan") for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in "Trustees' fees and expenses" in the Statements of Operations. The liability for the Plan is shown as "Deferred Trustee fees" in the Statements of Assets and Liabilities.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds' custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders', administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds' behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at December 31, 2015 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

Effective May 1, 2015, the Funds adopted new accounting guidance under Accounting Standards Update No. 2014-11, Transfers and Servicing (Topic 860) *Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosure* which requires expanded disclosures related to financial assets pledged in secured financing transactions, such as securities lending, and the related contractual maturity terms of these secured transactions. Accordingly, the following table presents repurchase agreements held as collateral by type of security on loan pledged as of December 31, 2015:

Note 10—Share Split—On January 19, 2011, the Adviser announced the Board of Trustees approved a 3 for 1 share split of the Indonesia Index ETF. This split took place for shareholders of record as of the close of business on January 28, 2011 and was payable on January 31, 2011. Fund shares began trading on the split adjusted NAV on February 1, 2011. The Financial Highlights prior to February 1, 2011 for the Fund have been adjusted to reflect the 3 for 1 share split.

On July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Russia Small-Cap ETF, and 1 for 4 reverse share splits for Egypt Index ETF and India Small-Cap Index ETF. Fund shares began trading on the split adjusted NAV on July 1, 2013. The Financial Highlights prior to July 1, 2013 for the Funds have been adjusted to reflect these reverse share splits.

Note 11—Bank Line of Credit—The Funds may participate in a \$200 million committed credit facility (the "Facility") to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2015, the following Funds borrowed under this Facility:

^{*}Remaining contractual maturity of the agreements: overnight and continuous

				Outstanding Loan
	Days	Average Daily	Average	Balance as of
Fund	Outstanding	Loan	Interest	December
	υ	Balance	Rate	31, 2015

Note 12—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2015, there were no offsets to custodian fees.

Note 13—Subsequent Event Review—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

MARKET VECTORS ETF TRUST

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders of Market Vectors ETF Trust

We have audited the accompanying statements of assets and liabilities (consolidated as it relates to India Small-Cap Index ETF), including the schedules of investments (consolidated as it relates to India Small-Cap Index ETF), of Africa Index ETF, Brazil Small-Cap ETF, China AMC A-Share ETF, China AMC SME-ChiNext ETF, Egypt Index ETF, Gulf States Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Indonesia Small-Cap ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF, and Vietnam ETF (fourteen of the series constituting Market Vectors ETF Trust) (the "Funds") as of December 31, 2015, and the related statements of operations (consolidated as it relates to India Small-Cap Index ETF), the statements of changes in net assets (consolidated as it relates to India Small-Cap Index ETF) and the financial highlights for the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2015, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position (consolidated as it relates to India Small-Cap Index ETF) of Africa Index ETF, Brazil Small-Cap ETF, China AMC A-Share ETF, China AMC SME-ChiNext ETF, Egypt Index ETF, Gulf States Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Indonesia Small-Cap ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF, and Vietnam ETF (fourteen of the series constituting Market Vectors ETF Trust) at December 31, 2015, the results of their operations (consolidated as it relates to India Small-Cap Index ETF), the changes in their net assets (consolidated as it relates to India Small-Cap Index ETF) and the financial highlights for the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

MARKET VECTORS HARD ASSETS ETFs
(unaudited)
Dear Shareholder:
We are in the 14th month of the current commodities bear market at this yearend. Commodity downturns have generally lasted 18 months. If this is a normal cycle—and unless commodity prices fall much further—in our opinion, our analyses suggest a bottom occurring during the first half of 2016, with the first quarter more likely.
CRB Commodity Composite Price Index ¹
Source: Economagic.com (4/30/1947 – 12/31/1983); Bloomberg (1/31/1984 – Present). Note: Shaded areas are longer period of falling commodity prices (>10 months). Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index.
Market Vectors Natural Resources ETF (NYSE Arca: HAP) may offer an interesting opportunity to participate broadly in the sector. The fund tracks the most comprehensive global natural resources index providing diverse exposure to commodity-producing companies across all commodities sectors and along the entire supply chain. Its upside capture ratio ² is also higher than the S&P Global Natural Resources Index ³ and MSCI ACWI Commodity Producers Index. ⁴

As was 2014, 2015 was not kind to energy stocks. The energy story in 2015 was, however, not one of total doom and gloom. There were some bright spots, especially when it came to alternative energy and, in particular, solar and wind power generation. The alternative energy industry was happy when, as part of a \$1.15 trillion federal spending bill, federal subsidies for renewable energy, which includes both solar and wind, were extended.

Despite these punishing couple of years, we still believe in the opportunities offered by the energy ETFs in our suite of hard assets ETFs, not least because they combine both broad-based and focused funds. More specifically, looking at several different scenarios for energy going forward, we see opportunities in each.

If oil prices begin to recover supporting upstream energy companies, then we see opportunities in both Market Vectors Oil Services ETF (NYSE Arca: OIH), the largest and most liquid oil services ETF, and Market Vectors

Unconventional Oil & Gas ETF (NYSE Arca: FRAK), the first and only ETF dedicated to the unconventional energy segment with a heavy concentration in exploration and production companies.

If oil prices fail to recover, or even drift lower, then the Market Vectors Oil Refiners ETF (NYSE Arca: CRAK), the first and only ETF to offer exposure to global oil refiners (which have, historically, provided differentiated energy exposure), has the potential to benefit from lower oil prices.

In light of the Paris climate talks, and subsequent agreement, investors may have a *renewed* interest in alternative energy. (Paired with this, any positive news out of China could be a positive in the space.) We see the opportunities in this scenario lying with the Market Vectors Global Alternative Energy ETF (NYSE Arca: GEX), which provides broad-based global alternative energy exposure, and the Market Vectors Solar Energy ETF (NYSE Arca: KWT), which provides solar energy exposure. Market Vectors Natural Reources ETF (NYSE Arca: HAP) is also one of the few broad-based natural resources ETFs to provide exposure to alternative energy.

Going forward, we will, of course, continue to seek out and evaluate the most attractive opportunities for you as a shareholder in the hard assets space. Please stay in touch with us through our website (http://www.vaneck.com) on which we offer videos, blogs, and email subscriptions, all of which are designed to keep you up to date with your investment in Market Vectors ETFs.

On the following pages, you will find the performance record of each of the funds for the period ended December 31, 2015. You will also find their financial statements. As always, we value your continued confidence in us and look forward to helping you meet your investment goals in the future.

Jan F. van Eck Trustee and President Market Vectors ETF Trust

January 22, 2016

Represents the opinions of the investment adviser. Past performance is no guarantee of future results. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

CRB Commodity Composite Price Index measures the overall direction of commodity sectors. The CRB was designed to isolate and reveal the directional movement of prices in overall commodity trades. Upside capture ratio measures whether an index outperformed a calculation benchmark index in periods of market 2strength. The calculation benchmark in this instance is the S&P® 500 Index and is for the five year period ending December 31, 2015.

S&P® Global Natural Resources Index (SPGNRUT) includes 90 of the largest publicly traded companies in natural resources and commodities businesses that meet specific investability requirements, offering investors diversified and investable equity exposure across three primary commodity-related sectors: agribusiness, energy and metals and mining.

4MSCI ACWI Commodity Producers Index captures the global opportunity set of commodity producers in the energy, metal and agricultural sectors.

Management Discussion (unaudited)

Hard Assets Market Overview

The *Rogers*TM-Van Eck Natural Resources Index* (RVEIT), which includes equities of the world's largest and most prominent hard assets producers, remains the most comprehensive index in the hard assets producer space. For the 12 month period ending December 31, 2015, the index returned -19.49%. The table below shows average sector weightings within this index and the total return of each sector for the 12 month period ending December 31, 2015.

		12 Month Total Return
RVEIT Sector	Average Sector Weighting	g for Period Ending
		December 31, 2015
Energy	41.21%	-21.69%
Agriculture	31.08%	-11.33%
Base/Industrial Metals	12.37%	-36.71%
Precious Metals	7.01%	-28.05%
Alternatives	4.20%	+18.78%
Paper & Forest Products	8 4.13%	-3.74%

Source: Van Eck Global; FactSet; S-Network Global Indexes, LLC. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index.

One out of the six sectors—alternatives—had positive returns over the 12 months ended December 31, 2015. While the alternatives sector, with the second smallest average weighting, posted the highest total return for the 12 month period, the third largest sector by average weighting, base and industrial metals, posted the worst total return for the same period.

Out of the suite of 12 Market Vectors Hard Assets ETFs that traded for the full 12 month period, a single fund, the Market Vectors Global Alternative Energy ETF (NYSE Arca: GEX) (+1.45%), posted positive total returns.

January 1 through December 31, 2015 Market Vectors Hard Assets ETFs Total Return

Note: Market Vectors Oil Refiners ETF is not included above as it was launched on August 18, 2015.

Source: Van Eck Global. Returns based on each fund's net asset value (NAV). The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflects temporary waivers of expenses and/or fees. Had the funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

MARKET VECTORS HARD ASSETS ETFs

(unaudited) (continued)

Agribusiness

While the agribusiness industry may have proved resilient in the first six months of the year, despite general weakness in commodities markets, the second half of the year was more challenging. The primary drivers of negative performance for the 12 month period were companies in the materials sector and, in particular, those in the fertilizer and agricultural chemical segment. Geographically, the greatest positive returns came from companies in Switzerland, while the greatest negative returns came from those in the U.S. and Canada.

Coal

If the first six months of 2015 were difficult for the coal industry, the second six months were even worse. By the end of June, coal production and consumption in the U.S. over the previous six months had already dropped approximately $8.2\%^1$ and $12.7\%^2$, respectively, against the same period in 2014. In mid-November, China, one of the world's largest coal consumers, published its Energy Development Strategy Action Plan (2014 – 2020)n which it stated that "annual coal consumption will be held below 4.2 billion tonnes until 2020, 16.3 percent more than the 3.6 billion tonnes burned last year," and that the share of coal in energy consumption will be reduced to under 62%. Currently, nearly two-thirds of China's electricity alone comes from coal! Just one country contributed positive returns: Russia. The U.S., with an average weighting of close to 29%, detracted most from the sector's performance.

Global Alternative Energy

Global alternative energy stocks as a whole performed strongly during the first half of 2015. While their performance was lackluster in the second half of the year, the fund recorded a positive return for the 12 month period. The strongest positive contribution came from companies involved in wind energy. The strongest contribution geographically came from companies in Denmark and Spain. Companies in the United States, with by far the largest average weighting in the sector, detracted the most from performance.

Gold Miners

Larger gold miners underperformed their junior peers over the 12 month period under review. In addition, both junior miners and their larger peers underperformed the metal over the same period. Gold prices fell approximately 10% over

the course of 2015. Among the larger mining stocks, Australian companies were the only positive contributors to performance. Their performance was vastly overshadowed by the negative performance of companies in Canada (with by far the largest average weighting in the sector), the U.S., and South Africa. Among the juniors, while Australian companies contributed somewhat more to performance than did their larger peers, their positive performance was, once again, vastly overshadowed by the negative performance of companies in Canada (with, again, by far the largest average weighting in the sector), the U.S. and South Africa.

Oil Refiners

By December 31, the Fund had only been trading a little over four months. During that period, however, refiners benefited from continuing low crude oil prices and, subsequently, low refinery feedstock prices. Refiners out of South Korea and Australia were top contributors to performance for the period while exposure to refiners in the U.S. and Poland detracted the most from performance.

Oil Services

Hit by the precipitous drop in oil prices at the start of the year, their halting rise from mid-March through to early-June, and decline thereafter, oil services stocks were on a roller coaster during the first six months of 2015. As oil prices continued their erratic fall thereafter, the second half of the year also proved challenging, with oil services stocks never again regaining the levels recorded in the first half of the year, not least because of the swinging cuts in both capex and opex (capital expenditure and operating expenditure) made across the spectrum of companies involved in oil production. By the end of June, the total U.S. rig count stood at 859, having, in the middle of the month hit its lowest level since January 2003.⁵ This was a decline of 53% since December 26, 2014. By the end of the year, the rig count had fallen to 698, a drop of 61% since the beginning of the year. Oil service stocks in the U.S., by far the largest average weighting in the sector, detracted the most from performance.

Rare Earth and Strategic Metals

Despite Molycorp (sold by Fund by period end), the only U.S. rare earth producer of rare earths, filing for Chapter 11 bankruptcy protection at the end of June,⁸ the subsequent suspension of operations at its Mountain Pass mine in October,⁹ and the announcement by China's top six producers that they would produce 10% less in 2016,¹⁰ rare earth prices saw a lackluster second half of 2015. While cuts may have helped short term, illegal production continued to exert downward pressure on prices.¹¹ Companies operating in Australia and Argentina, involved specifically in the mining and refining of rare earths, and lithium and boron respectively, were the greatest contributors to performance. The greatest detractors from performance included companies involved in both titanium and molybdenum. Large- and mid-cap companies performed considerably better than their small-cap peers during the period under review.

Natural Resources

Only one sector, alternatives, contributed positively to performance during the period under review. Within the sector, companies involved in wind energy generation were particularly strong performers. All five other sectors detracted from performance, with energy companies, constituting the largest segment of the natural resources industry, the worst performers, and paper and forest products companies detracting the least from performance.

Solar Energy

Despite performing strongly in the first half of 2015, solar energy stocks languished in the second half of the year and posted a loss for the full 12 month period under review. Within the sector, the strongest contribution came from companies in Germany, followed by those in France and Canada. Companies in U.S., followed by China, were the most significant detractors from performance.

Steel

If first half of 2015 was hard for the steel industry, so, too, was the second half of the year. While, on year-on-year terms, the global consumption of steel fell throughout 2015,¹² the market not only remained hugely oversupplied, but capacity utilization also fell,¹³ especially in China—which accounts for over 50% of total global production. Xu Lejiang, chairman of China's second largest steel producer, Shanghai Baosteel Group, was quoted as saying, in October, that Chinese steelmakers were "bleeding cash.4" With the two largest average weightings in the sector during the period under review, the U.S. and Brazil were the two greatest detractors from performance. Russian companies were the

greatest positive contributors to the Fund's return for the period.

Unconventional Oil & Gas

During the 12 month period, unconventional energy companies continued suffer from the fall in oil prices that occurred toward the end of 2014 and continued into and through 2015: capital expenditure was slashed across the industry and the U.S. onshore rig count dropped dramatically. Having dropped to 859 by the end of June, a decline of 53%¹⁵ for the six-month period, by the end of the year the total U.S. rig count had fallen to 698, a decline of approximately 61% for the full 12 month period. More explicitly, the oil component of this count fell 64% during the year from 1,482 to 536.¹⁶ Having already fallen nearly 46% in 2014, to end the year at \$53.27 per barrel, by the end of December 2015, West Texas Intermediate (WTI) front month crude prices had fallen to \$37.04 per barrel, a decline of 30% over the 12 month period. U.S. stocks (on average approximately 80% of the fund by weight during the period under review) detracted most from performance.

Uranium and Nuclear Energy

Performance in 2015 was negative. Utility companies, with the largest average weighting over the period under review, produced the vast majority of the sector's negative total return. Geographically, companies in the U.S., followed by those in Japan, detracted most from performance, while South Korea was the only country to contribute positively to performance, and only minimally.

In Japan, Kyushu Electric Power (1.7% of Fund net assets) announced that, on August 31, Sendai 1 had reached 100% capacity and that, on November 19, its 846 megawatt Sendai 2 pressurized water reactor in Kagoshima prefecture "had attained full commercial operation". However, the remaining 43 of the country's

MARKET VECTORS HARD ASSETS ETFs

(unaudited) (continued)

operable reactors are still shut.¹⁷ While, in the U.K., the nuclear industry received a boost in October with the announcement that China would invest about US\$9 billion for a 33% share in a new reactor to be built at Hinkley Point¹⁸ in Somerset, England, in the U.S., the viability of nuclear energy production remains in question.¹⁹

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

The *Rogers*TM-Van Eck Natural Resources Index (RVEIT) is a rules based, modified capitalization weighted, float adjusted index comprising publicly traded companies engaged in the production and distribution of commodities and commodity-related products and services in the following sectors: 1) Agriculture; 2) Alternatives (Water & Alternative Energy); 3) Base and Industrial Metals; 4) Energy; 5) Forest Products; and 6) Precious Metals.

AGRIBUSINESS ETF

PERFORMANCE COMPARISON

December 31, 2015 (unaudited)

Hypothetical Growth of \$10,000 (Since Inception)

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹	NAV	MVMO	OTR ²
One Year	(8.97)%	(8.96)%	(9.17)%
Five Years	(0.76)%	(0.68)%	(0.29))%
Life* (annualized)	3.13 %	3.15 %	3.59	%
Life* (cumulative)	29.31%	29.47%	34.16	%
* since 8/31/2007				

Index data prior to March 18, 2013 reflects that of the DAXglobal Agribusiness Index (DXAG). From March 18, 2013, forward, the index data reflects that of the Market Vectors® Global Agribusiness Index (MVMOOTR). All Index history reflects a blend of the performance of the aforementioned Indexes.

Commencement date for the Market Vectors Agribusiness ETF was 8/31/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/31/07) to the first day of secondary market trading in shares of the Fund (9/5/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data

quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.55% / Net Expense Ratio 0.55%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

JUNIOR GOLD MINERS ETF

PERFORMANCE COMPARISON

(unaudited) (continued)

Market Vectors® Global Junior Gold Miners Index (MVGDXJTR) is a rules-based, modified capitalization-weighted, float-adjusted index comprised of a global universe of publicly traded small- and ²medium-capitalization companies that generate at least 50% of their revenues from gold and/or silver mining, hold real property that has the potential to produce at least 50% of the company's revenue from gold or silver mining when developed, or primarily invest in gold or silver.

Market Vectors Global Junior Gold Miners Index (the "Index") is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. Market Vectors Junior Gold Miners ETF (the "Fund") is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

NATURAL RESOURCES ETF

PERFORMANCE COMPARISON

December 31, 2015 (unaudited)

Hypothetical Growth of \$10,000 (Since Inception)

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹	NAV	RVEIT ²
One Year	(19.96)%	(19.48)%	(19.49)%
Five Year	(5.31)%	(5.22)%	(5.05)%
Life* (annualized)	(3.63)%	(3.60)%	(3.39)%
Life* (cumulative)	(23.74)%	(23.61)%	(22.37)%
* since 8/29/2008			

Effective May 1, 2014, the name of the index that the Fund seeks to replicate changed from The RogersTM-Van Eck Hard Assets Producers Index to The RogersTM-Van Eck Natural Resources Index (the "Index"). In connection with that change, the Board of Trustees of the Trust approved changing the Fund's name to Market Vectors Natural Resources ETF and, accordingly, the Fund's investment objective changed such that the Fund will seek to replicate as closely as possible, before fees and expenses, the price and yield performance of The RogersTM-Van Eck Natural Resources Index.

Commencement date for the Market Vectors Natural Resources ETF was 8/29/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/29/08) to the first day of secondary market trading in shares of the Fund (9/3/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes

that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.75% / Net Expense Ratio 0.50%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

PERFORMANCE COMPARISON

(unaudited) (continued)

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

² NYSE Arca Steel Index (STEEL) is a modified capitalization-weighted index comprised of publicly traded companies predominantly involved in the production of steel products or mining and processing of iron ore.

NYSE Arca Steel Index (the "Index") is a trademark of NYSE Euronext or its affiliates (NYSE Euronext), is licensed for use by Van Eck Associates Corporation in connection with Market Vectors Steel ETF (SLX). Market Vectors Steel ETF (the "Fund") is not sponsored, endorsed, sold or promoted by NYSE Euronext and NYSE Euronext makes no representation as to the accuracy and/or completeness of the Index or the results to be obtained by any person from the using the Index in connection with trading the Fund.

PREMIUM/DISCOUNT INFORMATION

(unaudited)

Information regarding how often the Shares of each Fund traded on NYSE Arca, Inc. or The NASDAQ Stock Market LLC as applicable, at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund during the past four calendar quarters, as applicable, can be found at www.vaneck.com.

UNCONVENTIONAL OIL & GAS ETF

PERFORMANCE COMPARISON

December 31, 2015 (unaudited)

Hypothetical Growth of \$10,000 (Since Inception)

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹	NAV	MVFRA	KTR ²
One Year	(38.21)%	(38.60)%	(38.67)%
Life* (annualized)	(13.89)%	(13.96)%	(13.87))%
Life* (cumulative)	(44.03)%	(44.19)%	(43.98)%
* since 2/14/2012				

Commencement date for the Market Vectors Unconventional Oil & Gas ETF was 2/14/2012.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (2/14/12) to the first day of secondary market trading in shares of the Fund (2/15/12), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.72% / Net Expense Ratio 0.54%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.54% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

URANIUM+NUCLEAR ENERGY ETF

PERFORMANCE COMPARISON

December 31, 2015 (unaudited)

Hypothetical Growth of \$10,000 (Since Inception)

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Total Return	Share Price ¹		NAV		MVNLI	RTR ²
One Year	(9.49)%	(9.26)%	(9.81)%
Five Years	(5.69)%	(5.59)%	(6.01)%
Life* (annualized)	(7.36)%	(7.33))%	(7.29))%
Life* (cumulative)	(47.32)	2)%	(47.16	5)%	(46.98)%
* since 8/13/2007						

Index data prior to March 24, 2014 reflects that of the DAXglobal® Nuclear Energy Index (DXNE). From March 24, 2014, forward, the index data reflects that of the Market Vectors® Global Uranium & Nuclear Energy Index (MVNLRTR). All index history reflects a blend of the performance of the aforementioned Indexes.

Commencement date for the Market Vectors Uranium+Nuclear Energy ETF was 8/13/07.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (8/13/07) to the first day of secondary market trading in shares of the Fund (8/15/07), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data

quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Gross Expense Ratio 0.70% / Net Expense Ratio 0.61%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.60% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2015 to December 31, 2015.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Total	\$604,790,762	\$332,660,516	\$ —	\$937,451,278

During the period ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$13,235,737 and transfers of securities from Level 2 to Level 1 were \$5,569,730. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended December 31, 2015:

	Common Stocks China / Hong Kong
Balance as of December 31, 2014	\$1,352,155
Realized gain (loss)	_
Change in unrealized appreciation (depreciation)	_
Purchases	
Sales	
Transfers in and/or out of level 3	(1,352,155)
Balance as of December 31, 2015	\$—

Transfers from Level 3 to Level 1 resulted primarily from security resuming trading activity.

During the period ended December 31, 2015, transfers of securities from Level 2 to Level 1 were \$6,439,772. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the period ended December 31, 2015, transfers of securities from Level 1 to Level 2 were \$265,090, transfers of securities from Level 2 to Level 1 were \$213,511 and transfers of securities from Level 2 to Level 3 were \$0. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended December 31, 2015:

	Common China /	Stocks
	Hong Kong	Spain
Balance as of December 31, 2014	\$10,727	\$ 0
Realized gain (loss)	_	_
Change in unrealized appreciation (depreciation)		

Purchases	_	_
Sales	_	
Transfers in and/or out of level 3	(10,727)	
Balance as of December 31, 2015	\$ —	\$ 0

Transfers from Level 3 to Level 1 resulted primarily from security resuming trading.

[†]Security fully or partially on loan. Total market value of securities on loan is \$5,803,762.

During the period ended December 31, 2015, transfers of securities from Level 2 to Level 1 were \$922,273. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

(a) Commencement of operations

Total return is calculated assuming an initial investment made at the net asset value at the beginning of period, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

Total return is calculated assuming an initial investment made at the net asset value at the beginning of period, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the period. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

See Notes to Financial Statements

On July 1, 2013, the Fund effected a 1 for 3 reverse share split (See Note 10). Per share data has been adjusted to reflect the share split.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

December 31, 2015

Note 1—Fund Organization—Market Vectors ETF Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of December 31, 2015, offers fifty four investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Natural Resources ETF, Oil Refiners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (each a "Fund" and, together, the "Funds"). Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index sponsored, licensed or managed by the NYSE Group Inc., Ardour Global Indexes, LLC, S-Network Global Indexes, LLC and Market Vectors Index Solutions GmbH, a wholly owned subsidiary of Van Eck Associates Corporation (the "Adviser").

The Funds' commencement of operations dates and their respective Indices are presented below:

Fund	Commencement of Operations	Index
Agribusiness ETF	August 31, 2007	Market Vectors Global Agribusiness Index*
Coal ETF	January 10, 2008	Market Vectors® Global Coal Index*
Global Alternative Energy ETF	May 03, 2007	Ardour Global Index SM (Extra Liquid)
Gold Miners ETF	May 16, 2006	NYSE Arca Gold Miners Index
Junior Gold Miners ETF	November 10, 2009	Market Vectors® Global Junior Gold Miners Index*
Natural Resources ETF	August 29, 2008	Rogers TM —Van Eck Natural Resources Index
Oil Refiners ETF	August 18, 2015	Market Vectors® Global Oil Refiners Index*
Oil Services ETF	December 20, 2011	Market Vectors® US Listed Oil Services 25 Index*
Rare Earth/Strategic Metals ETF	October 27, 2010	Market Vectors® Global Rare Earth/Strategic Metals Index*
Solar Energy ETF	April 21, 2008	Market Vectors® Global Solar Energy Index*
Steel ETF	October 10, 2006	NYSE Arca Steel Index
Unconventional Oil & Gas ETF	February 14, 2012	Market Vectors® Global Unconventional Oil & Gas Index*
Uranium+Nuclear Energy ETF	August 13, 2007	Market Vectors® Global Uranium & Nuclear Energy Index*

^{*}Published by Market Vectors Index Solutions GmbH.

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification ("ASC") 946 Financial Services — Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of the Adviser. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 — Quoted prices in active markets for identical securities.

Level 2 — Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 — Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Federal Income Taxes—It is each Fund's policy to comply with the provisions of the Internal Revenue Code **B.** applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

- Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.
 - Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when
- **D.** accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the E. securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

Repurchase Agreements—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the

F. repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of December 31, 2015 are reflected in the Schedules of Investments.

Use of Derivative Instruments—The Funds may invest in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter ("OTC") derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange

G. interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the year ended December 31, 2015.

Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting agreements or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or

- **H.** securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at December 31, 2015 is presented in the Schedules of Investments. Also, refer to related disclosures in Note 2F (Repurchase Agreements) and Note 9 (Securities Lending).
- I. Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the

ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is 0.35%. The Adviser has agreed, at least until May 1, 2015 (for Oil Refiners ETF until May 1, 2017) to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense limitation (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) listed in the table below.

The current expense limitations and the amounts waived/assumed by the Adviser for the December 31, 2015 ended December 31, 2015, are as follows:

	Expense	Waiver of	Expenses Assumed
Fund	Limitations	Management	•
Tund	Limitations	Fees	Adviser
Agribusiness ETF	0.56 %	\$ —	\$ —
Coal ETF	0.59	51,720	
Global Alternative Energy ETF	0.62	2,686	
Gold Miners ETF	0.53		
Junior Gold Miners ETF	0.56

Oil Refiners ETF	0.59	5,900	46,017
Oil Services ETF	0.35	401,447	
Rare Earth / Strategic Metals ETF	0.57	117,748	
Solar Energy ETF	0.65	88,735	
Steel ETF	0.55	85,752	
Unconventional Oil & Gas ETF	0.54	99,949	_
Uranium+Nuclear Energy ETF	0.60	49,442	

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' "Distributor". Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

Note 4—Investments—For the December 31, 2015 ended December 31, 2015, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Cost of Investments	Proceeds from		
Durchagad	Investments		
Fulcilaseu	Sold		
\$ 252,557,757	\$264,469,834		
28,148,225	28,253,742

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Qualified late-year losses incurred after October 31, 2015 and within the taxable year, are deemed to arise on the first day of the Funds' next taxable year. For the year ended December 31, 2015, the Funds intend to defer to January 1, 2016 for federal tax purpose qualified late-year losses as follows:

	Late Year
Fund	Ordinary
	Losses
Global Alternative Energy ETF	2,282
Junior Gold Miners ETF	591,323

At December 31, 2015, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

	Post-Effective No Expiration Short-Term	Post-Effective No Expiration					
	Capital	Long-Term	Amount Expiring in the Year Ended December 31,				
Fund	Losses	Capital Losses	2018	2017	2016

During the year ended December 31, 2015 the following funds had a portion of its accumulated capital loss carryforwards expired: \$28,875 from Agribusiness ETF; \$67,613 from Global Alternative Energy ETF and \$500,169 from Uranium+Nuclear Energy ETF.

During the year ended December 31, 2015, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, partnerships, expiration of capital loss carryforwards and tax treatment of in-kind redemptions, the Funds incurred differences that affected undistributed net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

The Funds recognize the tax benefits of uncertain tax positions only where the position is "more-likely-than-not" to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds' tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken

on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds' financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2015, the Funds did not incur any interest or penalties.

Note 6—Capital Share Transactions—As of December 31, 2015, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index plus a small amount of cash. For the December 31, 2015 ended December 31, 2015 the Trust had in-kind contributions and redemptions as follows:

Fund	In-Kind	In-Kind	
ruliu	Contributions	Redemptions	
Agribusiness ETF	\$82,207,473	\$524,094,686	
Coal ETF	15,050,270	32,266,554	
Global Alternative Energy ETF	14,617,892	5,869,311	
Gold Miners ETF	2,791,700,242	2,250,142,007	
Junior Gold Miners ETF	496,062,125	387,518,298	
Natural Resources ETF	18,082,629	7,627,498	
Oil Refiners ETF	3,434,920	_	
Oil Services ETF	6,263,636,077	5,762,120,382	
Rare Earth / Strategic Metals ETF	_	2,972,571	
Solar Energy ETF	2,732,027	2,767,924	
Steel ETF	44,328,349	31,437,038	
Unconventional Oil & Gas ETF	15,122,628	11,082,873	
Uranium+Nuclear Energy ETF		21,983,802	

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund's daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect gross shareholder transactions including any cash component of the transactions.

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a "passive" or index approach to achieve each Fund's investment objective by

investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

As a result of recent events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers held by the Funds.

At December 31, 2015, the Adviser owned 2,500 shares of Gold Miners ETF.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the "Plan") for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in "Trustees' fees and expenses" in the Statements of Operations. The liability for the Plan is shown as "Deferred Trustee fees" in the Statements of Assets and Liabilities.

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds' custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders', administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds' behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at December 31, 2015 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

Effective January 1, 2015, the Funds adopted new accounting guidance under Accounting Standards Update No. 2014-11 Transfers and Servicing (Topic 860) *Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosure*, which requires expanded disclosures related to financial assets pledged in secured financing transactions, such as securities lending, and the related contractual maturity terms of these secured transactions. Accordingly, the following table presents repurchase agreements held as collateral by type of security on loan pledged as of December 31, 2015:

Gross amount of recognized liabilities for securities loaned in the Statements of Assets

and Liabilities*

Note 10—Share Split—Effective February 14, 2012, the Board of Trustees of the Trust approved a 3 for 1 share split for the Oil Services ETF. Fund shares began trading on a split-adjusted basis on February 14, 2012. The Financial Highlights for the Oil Services ETF prior to February 14, 2012 have been adjusted to reflect the 3 for 1 share split.

Effective July 2, 2012, the Board of Trustees of the Trust approved a 1 for 15 reverse share split for Solar Energy ETF. Fund shares began trading on a split-adjusted basis on July 2, 2012. The Financial Highlights for Solar Energy ETF prior to July 2, 2012 have been adjusted to reflect the 1 for 15 reverse share split.

Effective July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Global Alternative Energy ETF and Uranium+Nuclear Energy ETF, and 1 for 4 reverse share split for Junior Gold Miners ETF and Rare Earth/Strategic Metals ETF. Fund shares began trading on a split-adjusted basis on July 1, 2013. The Financial Highlights prior to July 1, 2013 for the respective Funds have been adjusted to reflect the reverse share splits.

Note 11—Bank Line of Credit—The Funds may participate in a \$200 million committed credit facility (the "Facility") to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2015, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	•	Outstanding Loan Balance as of December 31, 2015
Agribusiness ETF	281	\$3,084,365	1.53 %	\$ 1,384,110
Coal ETF	91	265,047	1.54	
Global Alternative Energy ETF	70	184,816	1.55	
Gold Miners ETF	160	5,774,624	1.52	_
Junior Gold Miners ETF	304	7,090,139	1.53	14,212,697
Natural Resources ETF	310	333,223	1.53	465,628
Oil Services ETF	262	2,328,085	1.53	1,675,138
Rare Earth / Strategic Metals ETF	145	216,875	1.54	
Solar Energy ETF	30	182,312	1.52	
Steel ETF	144	119,797	1.53	
Unconventional Oil & Gas ETF	84	202,124	1.52	
Uranium+Nuclear Energy ETF	94	131,271	1.52	153,555

Note 12—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could

have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2015, there were no offsets to custodian fees.

Note 13—Subsequent Event Review—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

MARKET VECTORS ETF TRUST

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders of Market Vectors ETF Trust

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Natural Resources ETF, Oil Refiners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF, and Uranium+Nuclear Energy ETF (thirteen of the series constituting Market Vectors ETF Trust) (the "Funds") as of December 31, 2015, and the related statements of operations (for the period August 18, 2015, commencement of operations, through December 31, 2015 as it relates to Oil Refiners ETF), the statements of changes in net assets and the financial highlights for the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2015, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Natural Resources ETF, Oil Refiners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF, and Uranium+Nuclear Energy ETF (thirteen of the series constituting Market Vectors ETF Trust) at December 31, 2015, the results of their operations (for the period August 18, 2015, commencement of operations, through December 31, 2015 as it relates to Oil Refiners ETF), the changes in their net assets and the financial highlights for the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

MARKET VECTORS ETF TRUST

APPROVAL OF INVESTMENT MANAGEMENT AGREEMENT

(unaudited)

At a meeting held on June 9, 2015 (the "Meeting"), the Board of Trustees (the "Board") of Market Vectors ETF Trust (the "Trust"), including all of the Trustees that are not interested persons of the Trust (the "Independent Trustees"), considered and approved an investment management agreement between the Trust and Van Eck Associates Corporation (the "Adviser") (the "Investment Management Agreement") with respect to the Market Vectors Oil Refiners ETF (the "Fund").

The Board's approval of the Investment Management Agreement was based on a comprehensive consideration of all of the information available to the Trustees and was not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations and how the Trustees considered those factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors.

In advance of the Meeting, the Trustees received materials from the Adviser, including expense information for other funds. The Adviser provided the Trustees with information regarding, among other things, the various aspects of the Fund's proposed investment program, fee arrangements and service provider arrangements. The Independent Trustees' consideration of the Investment Management Agreement was based, in part, on information obtained through discussions with the Adviser at the Meeting regarding the management of the Fund, information obtained at other meetings of the Trustees and/or based on their review of the materials provided by the Adviser, including the background and experience of the portfolio managers and others proposed to be involved in the management and administration of the Fund. The Trustees also considered the terms and scope of services that the Adviser would provide under the Investment Management Agreement, including the Adviser's commitment to waive certain fees and/or pay expenses of the Fund to the extent necessary to prevent the operating expenses of the Fund from exceeding agreed upon limits for a period of at least one year following the effective date of the Fund's registration statement.

The Trustees considered the benefits, other than the fees under the Investment Management Agreement, that the Adviser would receive from serving as adviser to the Fund, including any benefits it may receive from serving as administrator to the Fund and from an affiliate of the Adviser serving as distributor to the Fund. The Trustees did not consider historical information about the cost of the services provided by the Adviser or the profitability of the Fund to the Adviser because the Fund had not yet commenced operations. In addition, because the Fund had not yet commenced operations, the Trustees could not consider the historical performance or the quality of services previously provided to the Fund by the Adviser, although they concluded that the nature, quality and extent of the services to be provided by the Adviser were appropriate based on the Trustees' knowledge of the Adviser and its personnel and the operations of the other series of the Trust.

The Independent Trustees were advised by and met in executive session with their independent counsel at the Meeting as part of their consideration of the Investment Management Agreement.

In voting to approve the Investment Management Agreement, the Trustees, including the Independent Trustees, concluded that the terms of the Investment Management Agreement are reasonable and fair in light of the services to be performed, expenses to be incurred and such other matters as the Trustees considered relevant in the exercise of their reasonable judgment. The Trustees further concluded that the Investment Management Agreement is in the best interest of the Fund and the Fund's shareholders.

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus contains this and other information about the investment company. Please read the prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.800.826.2333, or by visiting vaneck.com, or on the Securities and Exchange Commission's website at http://www.sec.gov.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at http://www.sec.gov and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.800.826.2333 or by visiting vaneck.com.

Item 2. CODE OF ETHICS.

- (a) The Registrant has adopted a code of ethics (the "Code of Ethics") that applies to the principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions.
- (b) Not applicable.
- (c) The Registrant has not amended its Code of Ethics during the period covered by the shareholder report presented in Item 1 hereto.
- (d) The Registrant has not granted a waiver or an implicit waiver from a provision of its Code of Ethics during the period covered by the shareholder report presented in Item 1 hereto.
- (e) Not applicable.
- (f) The Registrant's Code of Ethics is attached as an Exhibit hereto.

Item 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The Registrant's Board of Trustees has determined that David Chow, R. Alastair Short and Richard Stamberger, members of the Audit and Governance Committees, are "audit committee financial experts" and "independent" as such terms are defined in the instructions to Form N-CSR Item 3(a)(2).

Item 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The principal accountant fees disclosed in Item 4(a), 4(b), 4(c), 4(d) and 4(g) are for the Funds of the Registrant for which the fiscal year end is December 31.

- (a) Audit Fees. The aggregate Audit Fees of Ernst & Young for professional services billed for the audits of the financial statements, or services that are normally provided in connection with statutory and regulatory filings or engagements for the fiscal years ended December 31, 2015 and December 31, 2014, were \$713,740 and \$681,480, respectively.
- (b) Audit-Related Fees. Not applicable.
- (c) Tax Fees. The aggregate Tax Fees of Ernst & Young for professional services billed for the review of Federal, state and excise tax returns and other tax compliance consultations for the fiscal years ended December 31, 2015 and December 31, 2014, were \$578,143 and \$832,098, respectively.
- (d) All Other Fees

None.

(e) The Audit Committee will pre-approve all audit and non-audit services, to be provided to the Funds, by the independent accountants as required by Section 10A of the Securities Exchange Act of 1934. The Audit Committee has authorized the Chairman of the Audit Committee to approve, between meeting dates, appropriate non-audit services.

The Audit Committee after considering all factors, including a review of independence issues, will recommend to the Board of Trustees the

independent auditors to be selected to audit the financial statements of the Funds.

(f) Not applicable. (g) Not applicable. (h) Not applicable. Item 5. AUDIT COMMITTEE OF LISTED REGISTRANTS. The Registrant's Board has an Audit Committee established in accordance with Section 3(a)(58)(A) of the Exchange Act (15 U.S.C. 78c(a)(58)(A)) consisting of four Independent Trustees. Messrs. Chow, Short, Sidebottom and Stamberger currently serve as members of the Audit Committee. Mr. Short is the Chairman of the Audit Committee. Item 6. SCHEDULE OF INVESTMENTS. Information included in Item 1. Item 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES. Not applicable. Item 8. PORTFOLIO MANAGER OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES. Not applicable. Item 9. PURCHASE OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS. Not applicable. Item 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS. None. Item 11. CONTROLS AND PROCEDURES. (a) The registrant's principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act") (17 CFR 270.30a-3 (c)) are effective, as of a date within 90 days of the filing date of the report that includes the disclosure required by this paragraph, based on their evaluation of these controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (17 CFR 240.13a-15(b) or 240.15d-15 (b)). (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a(d)) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting. Item 12. EXHIBITS. (a)(1) The code of ethics is attached as EX-99.CODE ETH (a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2 under the Act (17 CFR 270.30a-2) is attached as Exhibit 99.CERT. (b) Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 is furnished as Exhibit 99.906CERT.
