Letter to Stockholders

ECONOMIC DEVELOPMENTS

During the second quarter of 2001, the U.S. Federal Reserve cut interest rates by 125 basis points in three separate actions, bringing the total reduction in the fed funds rate to 3.25% over a six-month period. The rate cuts were a reaction to a pronounced downshift in economic activity, which was accentuated when manufacturers promptly scaled back production to reduce excess inventories. The U.S. Federal Reserve believes that manufacturing may recover somewhat when the rate of inventory reduction decreases. Further, U.S. consumer demand will find some support from the recent tax cut and lower energy costs. However, there are still considerable uncertainties regarding the current economic situation.

For several years, productivity, GDP growth, and corporate earnings grew at rates far above historic averages. This was largely driven by globalization and investments in information technology. Equity markets reflected this rapid growth, raising equity prices and market multiples to new highs. There is widespread agreement that there was an equity price "bubble" as unsustainable long term projections were mistakenly extrapolated from short term growth rates. The partial reversal of these driving forces has led to the current period of slower economic growth. Since we probably can not expect these forces to resume at earlier peak levels, the rapid growth of the 1990s may not return.

The U.S. Federal Reserve believes that many growth-enabling technologies are not yet mature, nor are they widely adopted. In the coming years adoption of such technologies may provide a catalyst for sustainable long-term growth in GDP and corporate earnings beyond historical averages, though significantly below the rapid pace of the late 1990s. Resurgence in globalization and the acceleration of large emerging economies may provide additional growth opportunities.

Significant pressures on revenues, profit margins, and cash flows have exacerbated weakness in capital spending. Rising energy prices further hindered corporate performance. Cost pressure from growth in unit labor costs may moderate if civilian unemployment rises as projected over the second half of the year. Additionally, energy prices have moderated from levels seen earlier in the

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

year and U.S. inflation remains subdued, with current Fed projections of only 1.75% to 2.5% for 2001 and 2002.

U.S. capital spending remains weak with little agreement among market participants as to when it will strengthen significantly. As successive generations of technology enable increasingly large worker productivity gains, businesses will likely resume capital spending to reap these benefits.

2

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

In the near term, softness continues in all of the world's major economies. The 3% growth rate projected for the U.S. exceeds expectations for other countries. The Japanese economy is saddled with public debt and is undergoing a long overdue restructuring. The European Union continues to digest the integration of member nations and the harmonization of previously independent economies. EU monetary policy can not effectively react to divergent economic conditions within member nations, while individual fiscal policies are limited by EU laws and strained by "subsidies" for the less developed nations. The weak euro makes matters more difficult, as EU members are at an increasing disadvantage on global commodity markets. A strict EU regulatory environment continues to discourage foreign investment. Most notable among the disincentives to investment in the EU are high tax regimes, increasingly burdensome labor regulations, and the growing divergence of U.S. and EU policies. These are evidenced by the EU Commission's aggressive stance on the GE/Honeywell merger, for which there is no appeal process.

THE SWISS ECONOMY

The Swiss economy is growing at a fairly stable rate and has held up reasonably well in spite of the slowdowns in the U.S. and Europe. Economic growth is expected to be about 2% for the year, down from 3.4% in 2000, the strongest year since 1990. Such growth is near the long-term potential of the Swiss economy. Unemployment is low, at 1.6%, down from 2.0% at the beginning of the year, and remains below the level of any country in the European Union.

INTEREST RATES: The Swiss National Bank did not change the LIBOR target band of 2.75%-3.75% during the quarter after a mild reduction earlier in the year. The target is roughly in line with recently reduced U.S. interest rates. Switzerland still has very low unemployment despite the slowdown, and economic development is near its long-term potential according to the president of the Swiss National Bank. Though inflation is well contained, further cuts are unlikely without changes in the economic environment.

Swiss producer prices have fallen, and the Swiss National Bank predicts inflation of only 1.4% this year, down 0.2% from last year and well within the targeted 2% ceiling.

The two key risks identified by the president of the Swiss National Bank are linked to the U.S. The first risk consists of potentially volatile oil prices, which are denominated in U.S. dollars. The more significant risk is the development of the U.S. economy itself, and the possibility of U.S. dollar depreciation. A strong dollar makes the U.S. an attractive and important export market for Swiss goods and services.

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

There are rough spots in the Swiss Economy. The Swiss Index of leading economic indicators (Konjunkturbarometer) has been declining since March of 2000, suggesting an economic slowdown in the near future. It now stands at 0.25, down from 0.46 in March.

CURRENCY

During the quarter, the Swiss franc lost nearly 3% against the dollar. Global investors continued to seek security in U.S. currency as troubles mounted in Turkey and East Asia. The U.S. dollar has been less affected than other currencies in the context of the global economic slowdown because its main trading partners have yet to show weakness. However, the U.S. dollar became an increasingly expensive currency. The dollar ended the quarter near 12-month highs relative to the euro, yen, and Swiss franc, even as interest rates continued to decline. The risk of lower real returns on U.S. dollar denominated assets, especially financial instruments, can reverse the flow of money that had come into the U.S. dollar since the beginning of the year.

The Swiss franc has historically been a stable currency during times of regional distress due to its relative economic neutrality. Switzerland has a healthy domestic economy and a free-floating currency supported by an independent monetary and fiscal policy.

However, during the quarter, movements in the franc closely tracked movements in the euro, suggesting that broad movement into the dollar was the primary factor driving currency exchange rates. Further, current EU inflation is 3.4% and has remained above the targeted ceiling of 2% for over 13 months, limiting the European Central bank's ability to use monetary policy to provide economic stimuli. The current EU benchmark interest rate remains unchanged at 4.5%.

The EU Central Bank's ("ECB") declared objective is to ensure price stability. Unlike the U.S. Federal Reserve, the ECB is not charged with stimulating economic activity. So long as inflation remains above the 2% target, rate reductions are unlikely.

In addition to the problem of an inflexible monetary policy, the EU can not rely on fiscal stimuli to promote growth. Under the Stability and Growth Pact, EU members face stringent budgetary restrictions aimed at reducing debt. Members are limited in their ability to reduce taxes or incur debt. While this may be good long-term policy, the EU is left with few fiscal or monetary options to help its faltering economy. Unaided by fiscal or monetary policy, EU economic growth may remain sluggish relative to the U.S., keeping a cap on the euro.

Management believes there is a possibility that the Swiss franc will appreciate in the near future as investors seek a less expensive safe haven than the U.S. dollar. Switzerland's lower inflation and more flexible monetary policy should provide a degree of downside protection against the euro.

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

While the Swiss franc's depreciation of more than 11% over the past two quarters is quite significant, the June 29th closing price of 1.79 francs per dollar is still below the rates seen as recently as November 2000.

The weakness of the franc against the U.S. dollar provides significant export opportunities for Swiss companies. At the same time, Swiss companies must bear the increased cost of dollar denominated commodities and imports, such as oil.

SWISS STOCK MARKET REVIEW:

After the year's bad start, the Swiss market has performed better than its European peers over the last three months. The strong showing by stocks like UBS, Credit Suisse, Nestle, and Swiss Re helped to balance negative performance from Zurich, Roche and, to a lesser extent, Novartis.

In response to the recent law change permitting reduced par value for Swiss equities, companies continue to announce stock splits. The following table summarizes the major splits that impacted the Fund's portfolio during the quarter.

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

EARNINGS RELEASE

Earnings of Swiss companies were affected by the ongoing deterioration of global economic conditions. Overall, results were weaker than expected with specific standout exceptions within two sectors: the medical technology sector, including Phonak, Disetronic and Tecan, and the technology sector, with strength from Logitech and Leica Geosystem. The engineering sector and the majority of the technology sector saw sharp declines in earnings momentum. Among the blue chips, the bright spots were Nestle (first quarter volume growth above expectations), SwissRe (strong 2000 results) and Swisscom (first quarter margin above consensus). On the other side of the blue chip performance spectrum, ABB and Roche struggled to show some growth, while Richemont and Adecco were hit by the slowing global economy. UBS and Credit Suisse were mostly in line with expectations despite lower trading volume and activity levels in the investment banking business.

SWZ PERFORMANCE

Although the fund slightly outperformed its benchmark during the last quarter, it is still lagging year-to-date. The mid and small cap segments of the market suffered lower trading volume and sharper valuation compression than the first tier companies. This negatively affected Fund performance due to its heavier weighting of second tier companies relative to the index. Novartis was a negative factor as well, not so much because of sub par operating performance, but because of negative news specific to the company and to the sector (e.g. slowdown at FDA, U.S. Medicare reform talks, push for over-the-counter drugs and potential U.S. imports of cheaper drugs).

The market price return of the Fund was better than the return of the Swiss Performance Index by a wide margin for the current year.

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

This was due to a narrowing of the Fund's discount. One possible explanation may be that the market has rediscovered the benefits of value investing.

MAJOR CORPORATE NEWS FOR THE QUARTER

NOVARTIS: After announcing a fast track approval of its cancer drug Gilvec (for chronic myelogenous leukemia with potential for more applications), the company suffered a set-back on Zelnorm, a new promising compound to treat irritable bowel syndrome. The U.S. Food and Drug Administration regulators issued a "not approvable" letter requesting additional data on the drug mainly due to concerns over potential side effects. Despite this negative development, Novartis' management reiterated its growth targets.

Earlier during the quarter Novartis announced that it had bought a stake worth \$2.8 billion in rival Roche (20% of the company's bearer shares) at 151 Sfr.--(5% above the closing price of the day preceding the transaction). Novartis declared that it was a financial investment as opposed to a "strategic" one.

ACTELION: This biotech company's experimental drug, Veletri, for treatment

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

of the symptoms of heart failure, which was co-developed with Genentech of the U.S., failed to show significant improvement in patients' shortness of breath even though it showed to be effective in hemodynamics tests (blood flow) in a previous trial. Even if a new study is successful, this disappointing result will delay the introduction of the drug for at least two years.

LEICA-GEOSYSTEM: This manufacturer of surveying and mapping equipment agreed to buy Erdas and LH Systems of the U.S. for a total of \$45 million in cash, hoping to become the most comprehensive supplier in the field of geographic information systems and the remote sensing market.

SOCIETE GENERALE DE SURVEILLANCE: The company continued its restructuring and simplified its shareholder structure leading to a higher free float of shares. At its shareholder meeting in May a large majority voted to unify the company's registered and bearer shares.

LOGITECH: One of the top performers this year on the Swiss Performance Index, the company signed a deal with Yahoo of the U.S. to include the Yahoo instant-messaging software in its QuickCam line of webcams. Yahoo is the first instant-messaging provider to offer such a Webcam service. It also shows that the ongoing effort by management to transform Logitech into a branded retail product company continues to bear fruit.

KUEHNE & NAGEL: The largest sea-freight company agreed to buy USCO Logistics in an attempt to establish itself as a leading player in supply-chain management, linking the three businesses of international forwarding, contract logistics and warehousing.

In June the European stock exchange Virt-X PLC, a joint-venture between the Swiss Exchange and investment banks that include Deutsche Bank and Merrill Lynch, began trading operations. Companies listed on this European platform include Switzerland's largest companies, the members of the Swiss Market Index (SMI).

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

OUTLOOK

Business conditions are expected to remain difficult across the board, with no industry immune to the macro-economic conditions. For that reason Management continues to focus on stock selection with particular attention paid to the quality of balance sheets and low historical valuation. Management strategy is to find the winners in the next up cycle, companies that can sustain the downturn (based on their management track record) and gain market share during the very difficult current economic conditions. The economic situation should soon stabilize in the U.S. and begin to improve toward the end of the year. Since Europe is lagging in the economic cycle, the recovery of its stock markets could come later. We expect the Swiss market to be resilient because of its high defensive (healthcare and food) and service, insurance and financial services components which should fare well in a global economy with below average growth and a greater tendency towards deflation in the medium term. Based on fundamental analysis, the current Swiss market exhibits some downside protection. The equity risk premium stands currently at 2.3%, which is above its historical level. Current valuations reflect heightened risk aversion to uncertainties regarding future earnings growth.

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

Even after recent downward revisions of earnings amid growth projections, expectations for the Swiss market remain positive for 2002. While estimated 2001 earnings growth

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (concluded)

for the SPI stands near -2%, forecasts for 2002 are roughly 11.2%. These projections imply a market P/E of 17.8 based on projected 2002 earnings. Swiss mid and small caps are discounted even further, with a 2002 forward P/E of 15 based on projected earnings growth of 20%. Swiss blue chips are expected to increase earnings by 9.3% in 2002, for a forward P/E of 18.4, after an expected contraction of 1.5% in 2001. However, these figures, like all projections, are subject to uncertainties.

Many Swiss companies, among the world's largest and most internationally diverse, are well positioned to capitalize on the ongoing processes of globalization, consolidation and trade liberalization.

During the first half of 2001, the Fund repurchased 358,500 of its shares, at an average price of \$14.28 and an average discount of 17.88%. This program has enhanced stockholders value by \$1,099,740. During the same period, the discount was between 12.95% and 19.76% finishing the first six months at 16.21%.

VOTING RESULTS

At the Annual Meeting held on May 15, 2001, stockholders supported management's proposals by a wide margin. These final results, certified by the Fund's independent inspector of elections, show that stockholders took the following actions:

- O REELECTED ERIC R. GABUS, CLAUDE W. FREY AND ALEXANDRE DE TAKACSY AS CLASS I DIRECTORS OF THE FUND FOR THREE YEAR TERMS EXPIRING IN 2004 (RECEIVING OVER 63% OF THE VOTES CAST FOR DIRECTORS);
- O CONFIRMED THE CONTINUANCE OF THE FUND'S INVESTMENT ADVISORY AGREEMENT WITH HOTTINGER CAPITAL CORP. (WITH SUPPORT FROM OVER 72% OF THE VOTES CAST ON THIS PROPOSAL); AND
- O DEFEATED BANKGESELLSCHAFT BERLIN AG'S PROPOSAL TO TERMINATE THE FUND'S INVESTMENT ADVISORY AGREEMENT WITH HOTTINGER CAPITAL CORPORATION (WITH FAVORABLE VOTES FROM 25% OF THE SHARES PRESENT AT THE MEETING VS. THE 67% LEVEL REQUIRED TO TERMINATE).

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

THE FINAL RESULTS SHOW THAT 59.9% OF THE FUND'S 24,047,809 OUTSTANDING SHARES VOTED OR WERE OTHERWISE PRESENT AT THE MEETING IN PERSON OR BY PROXY. THE OFFICIAL OUTCOME OF THE VOTE WAS CERTIFIED BY I.V.S. ASSOCIATES, INC.

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

- A. SIGNIFICANT ACCOUNTING POLICIES -- The Swiss Helvetia Fund, Inc. (the "Fund") which was incorporated in Delaware on October 24, 1986 and began operations August 27, 1987, is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end Investment Management Company. Its objective is to seek long-term growth of capital through investment in equity and equity-linked securities of Swiss companies.

When preparing the Fund's financial statements, management makes estimates and assumptions in accordance with accounting principles generally accepted in the United States. These estimates affect 1) the assets and liabilities that we report at the date of the financial statements; 2) the contingent assets and liabilities that we disclose at the date of the financial statements; and 3) the income and expenses that we report for the period. Our estimates could be different from the actual results.

Under certain circumstances, it is necessary to reclassify prior year information in order to conform to the current year's presentation. The Fund's significant accounting policies are:

VALUATION OF SECURITIES -- The Fund states its investments at value. The Fund values a security that is traded on the Swiss stock exchange at the last sales price on the day of valuation. If there is no sales price available, the Fund values the security at the mean between the closing bid and asked prices for that day. A security that is not traded on the Swiss stock exchange is valued at the mean between the current bid and asked prices. If bid and asked prices are not available, the Fund uses a fair value that is determined in good faith by or under the direction of the Fund's Board of Directors.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME -- The Fund uses the trade date to account for securities transactions and the specific identification method for financial reporting and income tax purposes to determine the cost of investments sold or redeemed. Interest income is recorded on an accrual basis. Dividend income is recorded on the ex-dividend date. The Fund records Swiss withholding tax as an expense, net of an amount receivable from Swiss tax authorities in accordance with a tax treaty.

FOREIGN CURRENCY TRANSLATION -- The Fund's books and records are maintained in U.S. dollars. The Fund translates Swiss franc amounts into U.S. dollars based on the following criteria.

- o The Fund adjusts asset and liability accounts to reflect the exchange rate at the end of the period.
- o The Fund includes in the period's net realized foreign exchange gain or loss, the exchange gain or loss that occurs due to exchange rate changes from the time an income or expense amount is accrued and the time it is realized.
- o The Fund records securities at cost based upon exchange rates at the time that Swiss francs are purchased or received. Exchange rates are identified on a first-in, first-out basis.

It is not practical for the Fund to distinguish the portion of its operating results attributable to exchange rate changes from the portion attributable to market price changes.

FEDERAL INCOME TAXES AND DISTRIBUTIONS -- The Fund determines its distributions according to income tax regulations, which may be different from accounting principles generally accepted in the United States. As a result, the Fund occasionally makes reclassifications within its capital accounts to reflect income and gains that are available for distribution

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

under income tax regulations.

The Fund declares and pays dividends from net investment income annually, and records distributions of capital gains on the ex-dividend date. The Fund is organized as a regulated investment company under Subchapter M of the Internal Revenue Code. As long as it maintains this status and distributes to its stockholders all of its taxable net investment income and net realized capital gains, it will be exempt from most, if not all, federal income and excise taxes. As a result, the Fund has made no provisions for federal income taxes.

SECURITIES LENDING -- The Fund may lend securities to broker-dealers. The loans are secured by collateral at least equal at all times to the market value of the securities loaned. Loans are subject to termination at the option of the borrower or the Fund. Upon termination of the loan, the borrower will return to the Fund securities identical to the loaned securities. The Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of

21

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (continued)
(Unaudited)

the securities fail financially. The Fund receives compensation, net of any rebate, for lending its securities in the form of fees. The Fund continues to receive dividends on the securities loaned and any gain or loss in the market price of the securities loaned that may occur during the term of the loan.

- B. INVESTMENT ADVISORY FEES, TRANSACTIONS WITH AFFILIATES AND OTHER FEES -- Hottinger Capital Corp. ("HCC"), which is owned jointly by Hottinger U.S., Inc. and Hottinger & Cie (Zurich), is the Fund's investment advisor. As compensation for its advisory services, the Fund pays HCC an annual fee based on the Fund's month-end net assets. This fee is calculated and paid monthly at the following annual rates. 1.00% of the first \$60 million, 0.90% of the next \$40 million, 0.80% of the next \$100 million, 0.70% of the next \$100 million, 0.65% of the next \$100 million, 0.60% of the next \$100 million, 0.55% of the next \$100 million, and 0.50% of the amount over \$600 million. The Fund paid Hottinger & Cie \$8,775 in brokerage commissions for the period ended June 30, 2001.

Investment Company Capital Corp. ("ICCC"), is the Fund's administrator. As compensation for its administrative services, the Fund pays ICCC an annual fee based on the Fund's average net assets. This fee is calculated daily and paid monthly at the following annual rates: 0.10% of the first \$250 million, 0.05% of the next \$250 million and 0.03% of the amount over \$500 million.

Certain officers and/or directors of the Fund are officers and/or directors of HCC, Hottinger U.S., Inc., Hottinger & Cie (Zurich) and/or ICCC.

Swiss American Securities Inc. is the Fund's custodian. Swiss American Securities, Inc. and the Fund have entered into an agreement with Credit

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

Suisse First Boston that provides for the custody of Swiss securities that the Fund holds. PFPC, Inc. is the Fund's transfer agent.

- C. CAPITAL SHARE TRANSACTIONS -- The Fund is authorized to issue up to 50 million shares of \$.001 par value capital stock. HCC owned 92,528 of the 23,997,809 shares outstanding on June 30, 2001. During the period the Fund issued 1,177,572 shares and repurchased 358,500 shares through a stock repurchase program.
- D. STOCK REPURCHASE PROGRAM -- On February 5, 1999, the Fund announced that its Board of Directors had authorized the Fund to repurchase up to 1,000,000 shares of its common stock in open market purchases to be effected on the New York Stock Exchange. On December 7, 1999, the Fund announced that its Board of Directors had increased this authorization for 2000 to 2,000,000 shares. The Board of Directors and Management made these purchases from time to time during 1999 and 2000. The principal purpose of the repurchases is to enhance stockholder value by increasing the Fund's net asset value per share without creating a meaningful adverse effect upon the Fund's expense ratio and without generating capital gains to fund the program. This may also have the effect of temporarily reducing the current discount of approximately 16 percent. During the period ended June 30, 2001 the Fund repurchased and retired 358,500 shares at a cost of \$5,120,030 at an average price of \$14.28 (includes broker commissions) and a weighted average discount of 17.88%.

Notice is hereby given in accordance with section 23(c) of the Investment Company Act of 1940 that the Fund may, from time to time, purchase shares of its Common Stock in the open market in addition to the above program.

- E. DIRECTORS' FEES -- The Fund pays each director who is not affiliated with the Fund, its investment advisor or administrator approximately \$15,000 per annum in compensation, except for the Chairman of the Audit Committee, who receives an annual fee of approximately \$16,500. In addition, each unaffiliated director receives \$750 for each attended directors' meeting and \$750 for each committee meeting attended, if it is held separately, and reimbursement for out-of-pocket expenses in conjunction with attendance at meetings.

22

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (concluded)
(Unaudited)

Each Director who is a non-interested Director and who is a member of the Discount or Litigation Committees of the Board is compensated for his work on the committees on an hourly basis at the rate of \$300, less the \$750 meeting fee otherwise payable to committee members for each meeting attended.

- F. INVESTMENT TRANSACTIONS -- Excluding short-term obligations, purchases of investment securities aggregated \$54,124,488 and sales of investment securities aggregated \$55,759,793 for the period ended June 30, 2001.

On June 30, 2001, aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

\$150,829,480 and aggregate gross unrealized depreciation of all securities in which there is an excess of tax cost over value was \$12,197,626.

- G. LENDING OF SECURITIES -- The Fund has the ability to lend its securities to brokers, dealers and other financial organizations. Loans of the Fund's securities are collateralized by cash and/or government securities that are maintained at all times in an amount equal to 102% of the current market value of the loaned securities for domestic securities.

At June 30, 2001

Market Value of Loaned Securities	Market Value of Collateral	% of Portfolio on Loan
-----	-----	-----
\$107,901	\$141,349	0.04%

- H. TAX RECLAIMS RECEIVABLE -- Swiss taxes are withheld from dividends received by the Fund subject to partial reclaim upon application to the Swiss Federal Tax Administration (SFTA). The Fund records receivables for tax reclaims in the normal course of business. Recently the SFTA suspended payment of reclaims to U.S. regulated investment companies, such as the Fund, pending a review of their eligibility to receive such reclaims. Based upon information available to it, including the advice of Swiss tax counsel, and recent statements by the SFTA, management believes these tax reclaims are collectible.
- I. LITIGATION -- On April 2, 2001 and May 8, 2001 two complaints were filed in purported class actions on behalf of stockholders of the Fund in the Court of Chancery of the state of Delaware by individuals claiming to be Fund stockholders against the Fund, each of its Directors and Hottinger Capital Corp., the Fund's Investment Advisor (collectively, the "defendants"). The complaints in these cases, entitled KIMBERLY KAHN VS. PAUL HOTTINGUER ET AL. and CHARLES MILLER VS. PAUL HOTTINGUER ET AL., allege that the defendants have: (A) breached fiduciary duties to stockholders and violated Section 109(a) of the Delaware General Corporation Law by adopting amendments to the Fund's Bylaws requiring a vote of 75% of the Fund's outstanding shares to alter, amend or repeal the Bylaws or to adopt other bylaws; (B) breached fiduciary duties to stockholders by adopting amendments to the Fund's Bylaws requiring nominees for election as directors to satisfy certain qualifications; and (C) breached fiduciary and contractual duties through the manner in which the Fund effected a capital gains distribution in December 2000. The complaints seek as relief among other things: (i) a declaration that the defendants have breached their fiduciary duties to stockholders and that the amendments to the Bylaws are null and void; (ii) an injunction in connection with any meeting of stockholders preventing the defendants from enforcing the Bylaw amendments; and (iii) certain unspecified damages. The defendants, including the Fund, believe that each complaint is without merit and are defending against them vigorously.

THE SWISS HELVETIA FUND, INC.

Proxy Results (Unaudited)

At the Annual Meeting of Stockholders, held on May 15, 2001, the shares voted on the following three proposals presented to the Stockholders, as reported by IVS

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30D

Associates, Inc., independent Inspectors of Election, were as follows:

1. TO ELECT THREE CLASS I DIRECTORS TO SERVE FOR A THREE-YEAR TERM AND UNTIL THEIR SUCCESSORS ARE ELECTED AND QUALIFIED.

	FOR -----	WITHHELD/ ABSTENTIONS -----
Alexandre de Takacsy	9,109,524	605,986
Claude W. Frey	9,136,031	580,389
Eric R. Gabus	9,110,674	604,746
Dirk Kipp	4,630,693	53,420
Gregory L. Melville 1	4,630,441	53,672
Moritz A. Sell 1	4,630,441	53,672

The following persons continue as Directors of the Fund: The Baron Hottinger, Didier Pineau-Valencienne and Samuel B. Witt, III, Esq. (Terms Expire in 2002); and Paul Hottinguer, Claude Mosseri-Marlio and Stephen K. West, Esq. (Terms Expire in 2003).

2. TO CONSIDER A PROPOSAL TO CONFIRM THE BOARD OF DIRECTORS' DECISION TO CONTINUE THE INVESTMENT ADVISORY AGREEMENT WITH HOTTINGER CAPITAL CORP.

FOR -----	AGAINST -----	WITHHELD/ ABSTENTIONS -----
10,391,014	3,782,139	223,897

3. TO CONSIDER A STOCKHOLDER PROPOSAL TO TERMINATE THE FUND'S INVESTMENT ADVISORY AGREEMENT WITH HOTTINGER CAPITAL CORP.

FOR -----	AGAINST -----	WITHHELD/ ABSTENTIONS -----
3,577,602	1,044,577	59,458

Under the Investment Company Act of 1940, with 59.9% of the Fund's outstanding shares present at the Meeting in person or by proxy, the approval of the stockholder proposal to terminate the Fund's Investment Advisory Agreement with Hottinger Capital Corp. required the approval of at least 67% of the shares present at the Meeting. With only 3,577,602 votes cast "FOR" this proposal, it received only 25% of the shares present at the Meeting and was soundly defeated.

In connection with the election of directors, there were no abstentions. In addition, because the matters before the Meeting were contested, brokers were not permitted to cast "broker non-votes" and no such votes are included in the above totals.

Following the Meeting, the Fund's investment advisor, Hottinger Capital Corp., agreed to reimburse the Fund in full for expenses incurred in connection with the engagement of Georgeson Shareholder Communications Inc. as the Fund's proxy solicitor. The amount of the reimbursement is \$96,508.72.

-
- 1 PRIOR TO THE MEETING, THE FUND'S BOARD OF DIRECTORS DETERMINED THAT MESSRS. MELVILLE AND SELL FAILED TO MEET THE QUALIFICATION REQUIREMENTS OF THE FUND'S BY-LAWS TO BE NOMINATED AS DIRECTORS OF THE FUND. ALTHOUGH THOSE NOMINEES WERE NOT BEFORE THE STOCKHOLDERS, THE FUND'S INDEPENDENT INSPECTOR OF ELECTION REPORTED VOTING TOTALS FOR THEM, BECAUSE A STOCKHOLDER SOLICITED PROXIES FOR ALL ITS NOMINEES. TOTALS FOR MESSRS. MELVILLE AND SELL ARE INCLUDED HERE FOR INFORMATION ONLY.
