Morgan Stanley Finance LLC \$7,424,700 Trigger GEARS

Linked to a Basket of International Indices due March 28, 2024

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

Investment Description

These Trigger GEARS (the “Securities”) are unsecured and unsubordinated debt securities issued by Morgan Stanley Finance LLC (“MSFL”) and fully and unconditionally guaranteed by Morgan Stanley with returns linked to the performance of a weighted basket of international indices (the “Basket”), consisting of the EURO STOXX 50 Index, the FTSE® 100 Index, the Nikkei 225 Index, the Swiss Market Index, the S&P/ASX 200 Index and the Hang Seng Index, each of which we refer to as an “Underlier” and together as the “Underliers.” If the Basket Return is greater than zero, MSFL will pay the Principal Amount at maturity plus a return equal to the product of (i) the Principal Amount multiplied by (ii) the Basket Return multiplied by (iii) the Upside Gearing of 2.81. If the Basket Return is less than or equal to zero, MSFL will either pay the full Principal Amount at maturity, or, if the Final Basket Level is less than the Downside Threshold, MSFL will pay significantly less than the full Principal Amount at maturity, if anything, resulting in a loss of principal that is proportionate to the negative Basket Return. These long-dated Securities are for investors who seek an equity basket-based return and who are willing to risk a loss on their principal and forgo current income in exchange for the Upside Gearing feature and the contingent repayment of principal, which applies only if the Final Basket Level is not less than the Downside Threshold, each as applicable at maturity. **Investing in the Securities involves significant risks. You will not receive interest or dividend payments during the term of the Securities. You may lose a significant portion or all of your Principal Amount. The contingent repayment of principal applies only if you hold the Securities to maturity.**

All payments are subject to our credit risk. If we default on our obligations, you could lose some or all of your investment. These Securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

Features Key Dates

Enhanced Growth Potential: If the Basket Return is greater than zero, the Upside Gearing feature will provide leveraged exposure to any positive Basket Return, and MSFL will pay the Principal Amount at maturity plus pay a ^Qreturn equal to the Basket Return multiplied by the Upside Gearing. If the Basket Return is less than zero, investors may be exposed to the negative Basket Return at maturity.

Contingent Repayment of Principal at Maturity: If the Basket Return is equal to or less than zero and the Final Basket Level is not less than the Downside Threshold, MSFL will pay the Principal Amount at maturity. However, if the Final Basket Level is less than the Downside Threshold, MSFL will pay less than the full Principal Amount, if ^Qanything, resulting in a significant loss of principal that is proportionate to the percentage decline in the value of the Basket. The contingent repayment of principal applies only if you hold the Securities to maturity. Any payment on the Securities, including any repayment of principal, is subject to our creditworthiness.

Trade Date	March 27, 2019
Settlement Date	March 29, 2019
Final Valuation Date*	March 25, 2024
Maturity Date*	March 28, 2024

*Subject to postponement in the event of a Market Disruption Event or for non-Index Business Days. See “Postponement of Final Valuation Date and Maturity Date” under “Additional Terms of the Securities.”

The Securities are significantly riskier than conventional debt INSTRUMENTS. the terms of the securities may not obligate us TO REPAY THE FULL PRINCIPAL AMOUNT OF THE SECURITIES. the Securities CAN have downside MARKET risk SIMILAR TO the UnDERLIERS, WHICH CAN RESULT IN A LOSS OF A SIGNIFICANT PORTION OR ALL OF YOUR INVESTMENT at maturity. This MARKET risk is in addition to the CREDIT risk INHERENT IN PURCHASING our DEBT OBLIGATIONS. You should not PURCHASE the Securities if you do not understand or are not comfortable with the significant risks INVOLVED in INVESTING IN the Securities. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE.

YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER “KEY RISKS” BEGINNING ON PAGE 6 OF THIS PRICING SUPPLEMENT IN CONNECTION WITH YOUR PURCHASE OF THE SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY AFFECT THE MARKET VALUE OF, AND THE RETURN ON, YOUR SECURITIES.

Security Offering

We are offering Trigger GEARS Linked to a Basket of International Indices. The Securities are not subject to a predetermined maximum gain and, accordingly, any return at maturity will be determined by the performance of the Basket. The Securities are offered at a minimum investment of 100 Securities at the Price to Public listed below.

Basket	Basket Weighting	Initial Level	Upside Gearing	Initial Basket Level	Downside Threshold	CUSIP	ISIN
EURO STOXX 50 [®] Index (Bloomberg ticker: SX5E)	40%	3,322.04					
	20%	7,194.19					

FTSE® 100 Index (Bloomberg ticker: UKX)			
Nikkei 225 Index (Bloomberg ticker: NKY)	20%	21,378.73	
Swiss Market Index (Bloomberg ticker: SMI)	7.5%	9,390.59	100
S&P/ASX 200 Index (Bloomberg ticker: AS51)	7.5%	6,135.971	
Hang Seng Index (Bloomberg ticker: HSI)	5%	28,728.25	

See “Additional Information about Morgan Stanley, MSFL and the Securities” on page 2. The Securities will have the terms set forth in the accompanying prospectus, prospectus supplement and index supplement and this pricing supplement.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these Securities or passed upon the adequacy or accuracy of this pricing supplement or the accompanying prospectus supplement, index supplement and prospectus. Any representation to the contrary is a criminal offense. The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or instrumentality, nor are they obligations of, or guaranteed by, a bank.

Additional Information about Morgan Stanley, MSFL and the Securities

Morgan Stanley and MSFL have filed a registration statement (including a prospectus, as supplemented by a prospectus supplement and an index supplement) with the SEC for the offering to which this communication relates. In connection with your investment, you should read the prospectus in that registration statement, the prospectus supplement, the index supplement and any other documents relating to this offering that Morgan Stanley and MSFL have filed with the SEC for more complete information about Morgan Stanley, MSFL and this offering. You may get these documents for free by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, Morgan Stanley, MSFL, any underwriter or any dealer participating in this offering will arrange to send you the prospectus, the prospectus supplement and the index supplement if you so request by calling toll-free 1-(800)-584-6837.

You may access the accompanying prospectus supplement, index supplement and prospectus on the SEC website at www.sec.gov as follows:

- t Prospectus supplement dated November 16, 2017:
https://www.sec.gov/Archives/edgar/data/895421/000095010317011241/dp82788_424b2-seriesa.htm

- t Index supplement dated November 16, 2017:
https://www.sec.gov/Archives/edgar/data/895421/000095010317011283/dp82797_424b2-indexsupp.htm

References to “MSFL” refer only to MSFL, references to “Morgan Stanley” refer only to Morgan Stanley and references to “we,” “our” and “us” refer to MSFL and Morgan Stanley collectively. In this document, the “Securities” refers to the Trigger GEARs that are offered hereby. Also, references to the accompanying “prospectus”, “prospectus supplement” and “index supplement” mean the prospectus filed by MSFL and Morgan Stanley dated November 16, 2017, the prospectus supplement filed by MSFL and Morgan Stanley dated November 16, 2017 and the index supplement filed by MSFL and Morgan Stanley dated November 16, 2017, respectively.

You should rely only on the information incorporated by reference or provided in this pricing supplement or the accompanying prospectus supplement, index supplement and prospectus. We have not authorized anyone to provide you with different information. We are not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information in this pricing supplement or the accompanying prospectus supplement, index supplement and prospectus is accurate as of any date other than the date on the front of this document.

The Issue Price of each Security is \$10. This price includes costs associated with issuing, selling, structuring and hedging the Securities, which are borne by you, and, consequently, the estimated value of the Securities on the Trade

Date is less than \$10. We estimate that the value of each Security on the Trade Date is \$9.49.

What goes into the estimated value on the Trade Date?

In valuing the Securities on the Trade Date, we take into account that the Securities comprise both a debt component and a performance-based component linked to the Underliers. The estimated value of the Securities is determined using our own pricing and valuation models, market inputs and assumptions relating to the Underliers, instruments based on the Underliers, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the Securities?

In determining the economic terms of the Securities, including the Upside Gearing and the Downside Threshold, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the Securities would be more favorable to you.

What is the relationship between the estimated value on the Trade Date and the secondary market price of the Securities?

The price at which MS & Co. purchases the Securities in the secondary market, absent changes in market conditions, including those related to the Underliers, may vary from, and be lower than, the estimated value on the Trade Date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the Securities are not fully deducted upon issuance, for a period of up to 12 months following the Settlement Date, to the extent that MS & Co. may buy or sell the Securities in the secondary market, absent changes in market conditions, including those related to the Underliers, and to our secondary market credit spreads, it would do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. currently intends, but is not obligated, to make a market in the Securities, and, if it once chooses to make a market, may cease doing so at any time.

Investor Suitability

The Securities may be suitable for you if:

- .. You fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.
- .. You can tolerate a loss of all or a substantial portion of your Principal Amount and are willing to make an investment that may have the same downside market risk as a weighted investment in the Underliers included in the Basket.
- .. You understand and accept the risks associated with the Underliers.
- .. You are willing to hold the Securities to maturity, as set forth on the cover of this pricing supplement, and accept that there may be little or no secondary market for the Securities.
- .. You believe the Basket will appreciate over the term of the Securities and you are willing to invest in the Securities based on the Upside Gearing of 2.81.
- .. You can tolerate fluctuations of the price of the Securities prior to maturity that may be similar to or exceed the downside fluctuations in the level of the Basket.
- .. You do not seek current income from your investment and are willing to forgo dividends paid on the stocks included in the Underliers.
- .. You are willing to assume our credit risk, and understand that if we default on our obligations you may not receive any amounts due to you including any repayment of principal.

The Securities may not be suitable for you if:

- .. You do not fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.
You cannot tolerate a loss of all or a substantial portion of your Principal Amount, and you are not willing to make an investment that may have the same downside market risk as a weighted investment in the Underliers included in the Basket.
- .. You require an investment designed to provide a full return of principal at maturity.
- .. You do not understand and accept the risks associated with the Underliers.
- .. You are unable or unwilling to hold the Securities to maturity, as set forth on the cover of this pricing supplement, or you seek an investment for which there will be an active secondary market.
- .. You believe that the level of the Basket will decline during the term of the Securities and is likely to close below the Downside Threshold on the Final Valuation Date.
- .. You are unwilling to invest in the Securities based on the Upside Gearing of 2.81.
- .. You prefer the lower risk, and, therefore, accept the potentially lower returns, of conventional debt securities with comparable maturities issued by us or another issuer with a similar credit rating.
- .. You seek current income from your investment or prefer to receive the dividends paid on the stocks included in the Underliers.
- .. You are not willing or are unable to assume the credit risk associated with us for any payment on the Securities, including any repayment of principal.

The investor suitability considerations identified above are not exhaustive. Whether or not the Securities are a suitable investment for you will depend on your individual circumstances, and you should reach an investment decision only after you and your investment, legal, tax, accounting and other advisors have carefully considered the suitability of an investment in the Securities in light of your particular circumstances. You should also review “Key Risks” on page 6 of this pricing supplement and “Risk Factors” beginning on page 7 of the accompanying prospectus for risks related to an investment in the Securities. For additional information about the Underliers, see the information set forth under “The EURO STOXX 50 Index,” “The FTSE100 Index,” “The Nikkei 225 Index,” “The Swiss Market Index,” “The S&P/ASX 200 Index” and “The Hang Seng Index” on pages 16, 18, 20, 22, 24 and 26, respectively.

Final Terms Investment Timeline

Issuer Morgan Stanley Finance LLC
 Guarantor Morgan Stanley
 Issue Price (per Security) \$10.00 per Security
 Principal Amount \$10.00 per Security
 Term Approximately 5 years
 Basket The Securities are linked to a weighted basket of indices, each of which we refer to as an “Underlier,” as follows:

EURO STOXX 50® Index 40%
 FTSE® 100 Index 20%
 Nikkei 225 Index 20%
 Swiss Market Index 7.5%
 S&P/ASX 200 Index 7.5%
 Hang Seng Index 5%

Downside Threshold 65, which is 65% of the Initial Basket Level

Upside Gearing 2.81

If the Basket Return is greater than zero, MSFL will pay you an amount calculated as follows:

$$\$10 + [\$10 \times (\text{Basket Return} \times \text{Upside Gearing})]$$

If the Basket Return is less than or equal to zero and the Final Basket Level is greater than or equal to the Downside Threshold, MSFL will pay you a cash payment of:

Payment at Maturity (per Security) \$10 per Security

If the Final Basket Level is less than the Downside Threshold, MSFL will pay you an amount calculated as follows:

$$\$10 + (\$10 \times \text{Basket Return})$$

In this case, you could lose up to all of your Principal Amount in an amount proportionate to the negative Basket Return.

Basket Return Final Basket Level – Initial Basket Level

Initial Basket Level

Initial Basket Level 100

On the Final Valuation Date, the Final Basket Level is calculated as:

$$\text{Final Basket Level} = 100 \times [1 + (\text{SX5E Return} \times 40\%) + (\text{UKX Return} \times 20\%) + (\text{NKY Return} \times 20\%) + (\text{SMI Return} \times 7.5\%) + (\text{AS51 Return} \times 7.5\%) + (\text{HSI Return} \times 5\%)]$$

Each of the returns set forth in the formula above refers to the return of the relevant Underlier, which represents the percentage change from the Initial Level for that Underlier to the Final Level for that Underlier.

Trade Date March 27, 2019
Settlement Date March 29, 2019
Final Valuation Date March 25, 2024*
Maturity Date March 28, 2024*
Initial Level In the case of the EURO STOXX 50[®] Index, 3,322.04; in the case of the FTSE[®] 100 Index, 7,194.19; in the case of the Nikkei 225 Index, 21,378.73; in the case of the Swiss Market Index, 9,390.59; in the case of the S&P/ASX 200 Index, 6,135.971; and in the case of the Hang Seng Index, 28,728.25; each of which is the Closing Level of such Underlier on the Trade Date.
Final Level With respect to each Underlier, the Closing Level of such Underlier on the Final Valuation Date.
CUSIP / ISIN 61768X457 / US61768X4575
Calculation Agent Morgan Stanley & Co. LLC

*Subject to postponement in the event of a Market Disruption Event or for non-Index Business Days. See “Postponement of Final Valuation Date and Maturity Date” under “Additional Terms of the Securities.”

Trade Date The Initial Levels are observed, the Initial Basket Level is set to 100 and the Upside Gearing is set. The Final Basket Level and Basket Return are determined on the Final Valuation Date.

If the Basket Return is greater than zero, MSFL will pay you a cash payment per Security equal to:

$$\$10 + [\$10 \times (\text{Basket Return} \times \text{Upside Gearing})]$$

Maturity Date **If the Basket Return is less than or equal to zero and the Final Basket Level is greater than or equal to the Downside Threshold on the Final Valuation Date**, MSFL will pay you a cash payment of \$10 per \$10 Security.

If the Final Basket Level is less than the Downside Threshold on the Final Valuation Date, MSFL will pay you a cash payment at maturity equal to:

$$\$10 + (\$10 \times \text{Basket Return})$$

Under these circumstances, you will lose a significant portion, and could lose all, of your Principal Amount.

INVESTING IN THE SECURITIES INVOLVES SIGNIFICANT RISKS. YOU MAY LOSE YOUR ENTIRE PRINCIPAL AMOUNT. ANY PAYMENT ON THE SECURITIES IS SUBJECT TO OUR CREDITWORTHINESS. IF WE WERE TO DEFAULT ON OUR PAYMENT OBLIGATIONS, YOU MAY NOT RECEIVE ANY AMOUNTS OWED TO YOU UNDER THE SECURITIES AND YOU COULD LOSE YOUR ENTIRE INVESTMENT.

Key Risks

An investment in the Securities involves significant risks. Some of the risks that apply to the Securities are summarized here, but we urge you to also read the “Risk Factors” section of the accompanying prospectus. You should also consult your investment, legal, tax, accounting and other advisers in connection with your investment in the Securities.

The Securities do not guarantee any return of principal – The terms of the Securities differ from those of ordinary debt securities in that MSFL is not necessarily obligated to repay any of the Principal Amount at maturity. If the Final Basket Level is less than the Downside Threshold (which is 65% of the Initial Basket Level), you will be exposed to the full negative Basket Return and the payout owed at maturity by MSFL will be an amount in cash that is at least 35% less than the \$10 Principal Amount of each Security, resulting in a loss proportionate to the decrease in the value of the Basket from the Initial Basket Level to the Final Basket Level. There is no minimum payment at maturity on the Securities, and, accordingly, you could lose all of your Principal Amount in the Securities.

You may incur a loss on your investment if you sell your Securities prior to maturity – The Downside Threshold is observed on the Final Valuation Date, and the contingent repayment of principal applies only at maturity. If you are able to sell your Securities in the secondary market prior to maturity, you may have to sell them at a loss relative to your initial investment even if the level of the Basket would be above the Downside Threshold at that time.

The Upside Gearing applies only if you hold the Securities to maturity – You should be willing to hold your Securities to maturity. If you are able to sell your Securities prior to maturity in the secondary market, the price you receive will likely not reflect the full economic value of the Upside Gearing or the Securities themselves, and the return you realize may be less than the Basket Return even if such return is positive. You can receive the full benefit of the Upside Gearing from MSFL only if you hold your Securities to maturity.

The Securities are subject to our credit risk, and any actual or anticipated changes to our credit ratings or our credit spreads may adversely affect the market value of the Securities – You are dependent on our ability to pay all amounts due on the Securities at maturity, if any, and therefore you are subject to our credit risk. If we default on our obligations under the Securities, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the Securities prior to maturity will be affected by changes in the market’s view of our creditworthiness. Any actual or anticipated decline in our credit ratings or increase in our credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the Securities.

As a finance subsidiary, MSFL has no independent operations and will have no independent assets – As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of

Morgan Stanley-issued securities.

..The Securities do not pay interest – MSFL will not pay any interest with respect to the Securities over the term of the Securities.

The market price of the Securities may be influenced by many unpredictable factors – Several factors, many of which are beyond our control, will influence the value of the Securities in the secondary market and the price at which MS & Co. may be willing to purchase or sell the Securities in the secondary market (if at all), including:

- o the value of the Underliers at any time,
- o the volatility (frequency and magnitude of changes in value) of each of the Underliers,
- o dividend rates on the securities included in the Underliers,
- o interest and yield rates in the market,
- o geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the Underliers or stock markets generally and which may affect the Final Levels,
- o the time remaining until the Securities mature, and
- o any actual or anticipated changes in our credit ratings or credit spreads.

Some or all of these factors will influence the terms of the Securities at the time of issuance and the price that you will receive if you are able to sell your Securities prior to maturity, as the Securities are comprised of both a debt component and a performance-based component linked to the Underliers, and these are the types of factors that also generally affect the values of debt securities and derivatives linked to the Underliers. Generally, the longer the time remaining to maturity, the more the market price of the Securities will be affected by the other factors described above. For example, you may have to sell your Securities at a substantial discount from the principal amount of \$10 per Security if the values of the Underliers at the time of sale are at or below or moderately above their Initial Levels, and especially if the level of the Basket would be

near or below the Downside Threshold, or if market interest rates rise. You cannot predict the future performance of the Underliers based on their historical performance.

The probability that the Final Basket Level will be less than the Downside Threshold will depend on the volatility of the Basket — “Volatility” refers to the frequency and magnitude of changes in the level of the Basket. Higher expected volatility with respect to the Basket as of the Trade Date generally indicates a greater chance as of that date that the Final Basket Level will be less than the Downside Threshold, which would result in a loss of a significant portion or all of your investment at maturity. However, the Basket’s volatility can change significantly over the term of the Securities. The level of the Basket could fall sharply, resulting in a significant loss of principal. You should be willing to accept the downside market risk of the Basket and the potential loss of a significant portion or all of your investment at maturity.

Changes in the values of one or more of the Underliers may offset changes in the values of the others – Movements in the values of the Underliers may not correlate with each other. At a time when the values of one or more Underliers increase, the values of the other Underliers may not increase as much, or may even decline. Therefore, in calculating the Basket Return, increases in the values of one or more Underliers may be moderated, or wholly offset, by lesser increases or declines in the values of the other Underliers. This will be further impacted by the different weightings of the Underliers in the Basket. Changes in the more heavily weighted Underliers will have a greater impact on the value of the Securities than changes in the lower weighted Underliers. If the Final Basket Level is less than the Downside Threshold, you will receive at maturity an amount that is significantly less than the amount of your original investment in the Securities, and which could be zero.

The amount payable on the Securities is not linked to the levels of the Underliers at any time other than the Final Valuation Date – The Final Basket Level will be based on the Closing Levels of the Underliers on the Final Valuation Date, subject to postponement for non-Index Business Days and certain Market Disruption Events. Even if some or all of the Underliers appreciate prior to the Final Valuation Date but then drop by the Final Valuation Date, the Payment at Maturity may be significantly less than it would have been had the Payment at Maturity been linked to the levels of the Underliers prior to such drop. Although the actual levels of the Underliers on the stated Maturity Date or at other times during the term of the Securities may be higher than their Final Levels, the Payment at Maturity will be based solely on the Closing Levels of the Underliers on the Final Valuation Date as compared to their Initial Levels.

The Securities are subject to risks associated with investments in securities linked to the value of foreign equity securities – The Securities are linked to the value of foreign equity securities. Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Although the equity securities included in the Underliers are traded in foreign currencies, the value of your Securities (as measured in U.S. dollars) will not be adjusted for any exchange rate fluctuations. Also, there is generally less publicly available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the United States Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. Local securities markets may

trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times. Moreover, the economies in such countries may differ favorably or unfavorably from the economy in the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payment positions.

Investing in the Securities is not equivalent to investing in the Underliers or the stocks composing the Underliers – Investing in the Securities is not equivalent to investing in the Underliers or the stocks that constitute the Underliers. Investors in the Securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the stocks that constitute the Underliers. Additionally, the Underliers are not “total return” indices, which, in addition to reflecting the market prices of the stocks that constitute the Underliers, would also reflect dividends paid on such stocks. The return on the Securities will not include such a total return feature.

The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the Securities in the Issue Price reduce the economic terms of the Securities, cause the estimated value of the Securities to be less than the Issue Price and will adversely affect secondary market prices – Assuming no change in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., may be willing to purchase the Securities in secondary market transactions will likely be significantly lower than the Issue Price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the Issue Price and borne by you and because the secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the Securities in the Issue Price and the lower rate we are willing to pay as issuer make the economic terms of the Securities less favorable to you than they otherwise would be.

However, because the costs associated with issuing, selling, structuring and hedging the Securities are not fully deducted upon issuance, for a period of up to 12 months following the Settlement Date, to the extent that MS & Co. may buy or sell the Securities in the secondary market, absent changes in market conditions, including those related to the Underliers, and to our secondary market credit spreads, it would do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

The estimated value of the Securities is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price – These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the Securities than those generated by others, including other dealers in the market, if they attempted to value the Securities. In addition, the estimated value on the Trade Date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your Securities in the secondary market (if any exists) at any time. The value of your Securities at any time after the date of this pricing supplement will vary based on many factors that cannot be predicted with accuracy, including our creditworthiness and changes in market conditions. See also “The market price of the Securities may be influenced by many unpredictable factors” above.

Adjustments to any of the Underliers could adversely affect the value of the Securities – The Underlier Publisher for each Underlier is responsible for calculating and maintaining such Underlier. The applicable Underlier Publisher may add, delete or substitute the stocks constituting such Underlier or make other methodological changes required by certain corporate events relating to the stocks constituting such Underlier, such as stock dividends, stock splits, spin-offs, rights offerings and extraordinary dividends, that could change the value of the Underlier. The Underlier Publisher may discontinue or suspend calculation or publication of any of the Underliers at any time. In these circumstances, the Calculation Agent will have the sole discretion to substitute a Successor Underlier that is comparable to the discontinued Underlier, and is permitted to consider indices that are calculated and published by the Calculation Agent or any of its affiliates. Any of these actions could adversely affect the value of any of the Underliers and, consequently, the value of the Securities.

The Securities will not be listed on any securities exchange and secondary trading may be limited – The Securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the Securities. MS & Co. currently intends, but is not obligated, to make a market in the Securities and, if it once chooses to make a market, may cease doing so at any time. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the Securities, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed sale, the cost of unwinding any related hedging positions, the time remaining to maturity and the likelihood that it will be able to resell the Securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Securities easily. Since other broker-dealers may not participate significantly in the secondary market for the Securities, the price at which you may be able to trade your Securities is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the Securities, it is likely that there would be no secondary market for the Securities. Accordingly, you should be willing to hold your Securities to maturity.

..

Hedging and trading activity by our affiliates could potentially adversely affect the value of the Securities – One or more of our affiliates and/or third-party dealers have carried out, and will continue to carry out, hedging activities related to the Securities, including trading in the constituent stocks of the Underliers, in futures or options contracts on the Underliers or the constituent stocks of the Underliers, as well as in other instruments related to the Underliers. As a result, these entities may be unwinding or adjusting hedge positions during the term of the Securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the Final Valuation Date approaches. MS & Co. and some of our other affiliates also trade the constituent stocks of the Underliers, in futures or options contracts on the constituent stocks of the Underliers, as well as in other instruments related to the Underliers, on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the Trade Date could have increased the Initial Levels of the Underliers, and, therefore, could have increased the levels at or above which the Underliers must close on the Final Valuation Date so that investors do not suffer a significant loss on their initial investment in the Securities. Additionally, such hedging or trading activities during the term of the Securities, including on the Final Valuation Date, could adversely affect the Closing Levels of the Underliers on the Final Valuation Date, and, accordingly, the amount of cash payable at maturity, if any.

Potential conflict of interest – As Calculation Agent, MS & Co. has determined the Initial Levels and the Upside Gearing, will determine the Final Levels, the Final Basket Level, the Basket Return and whether any Market Disruption Event has occurred and will calculate the amount payable at maturity, if any. Moreover, certain determinations made by MS & Co., in its capacity as Calculation Agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or non-occurrence of Market Disruption Events and the selection of a Successor Underlier or calculation of the Final Basket Level in the event of a discontinuance of an Underlier or a Market Disruption Event. These potentially subjective determinations may adversely affect the payout to you at maturity, if any. For further information regarding these types of determinations, see “Additional Terms of the Securities—Postponement of Final Valuation Date and Maturity Date,” “—Discontinuance of an Underlier; Alteration of Method of Calculation” and “—Calculation Agent and Calculations” below. In addition, MS & Co. has determined the estimated value of the Securities on the Trade Date.

Potentially inconsistent research, opinions or recommendations by Morgan Stanley, UBS or our or their respective affiliates – Morgan Stanley, UBS and our or their respective affiliates may publish research from time to time on financial markets and other matters that may influence the value of the Securities, or express opinions or provide recommendations that are inconsistent with purchasing or holding the Securities. Any research, opinions or recommendations expressed by Morgan Stanley, UBS or our or their respective affiliates may not be consistent with each other and may be modified from time to time without notice. Investors should make their own independent investigation of the merits of investing in the Securities and the Underliers to which the Securities are linked.

Uncertain Tax Treatment – Please note that the discussions in this pricing supplement concerning the U.S. federal income tax consequences of an investment in the Securities supersede the discussions contained in the accompanying prospectus supplement.

Subject to the discussion under “What Are the Tax Consequences of the Securities” in this pricing supplement, although there is uncertainty regarding the U.S. federal income tax consequences of an investment in the Securities due to the lack of governing authority, in the opinion of our counsel, Davis Polk & Wardwell LLP (“our counsel”), under current law, and based on current market conditions, each Security should be treated as a single financial contract that is an “open transaction” for U.S. federal income tax purposes.

If the Internal Revenue Service (the “IRS”) were successful in asserting an alternative treatment for the Securities, the timing and character of income on the Securities might differ significantly from the tax treatment described herein. For example, under one possible treatment, the IRS could seek to recharacterize the Securities as debt instruments. In that event, U.S. Holders (as defined below) would be required to accrue into income original issue discount on the Securities every year at a “comparable yield” determined at the time of issuance and recognize all income and gain in respect of the Securities as ordinary income. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the Securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features. We do not plan to request a ruling from the IRS regarding the tax treatment of the Securities, and the IRS or a court may not agree with the tax treatment described in this pricing supplement.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by Non-U.S. Holders (as defined below) should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect.

Both U.S. and Non-U.S. Holders should read carefully the discussion under “What Are the Tax Consequences of the Securities” in this pricing supplement and consult their tax advisers regarding all aspects of the U.S. federal tax consequences of an investment in the Securities as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Scenario Analysis and Examples at Maturity

These examples are based on hypothetical terms. The actual terms are set forth on the cover of this pricing supplement.

The below scenario analysis and examples are provided for illustrative purposes only and are hypothetical. They do not purport to be representative of every possible scenario concerning increases or decreases in the level of the Basket relative to the Initial Basket Level. We cannot predict the Final Basket Level on the Final Valuation Date. You should not take the scenario analysis and these examples as an indication or assurance of the expected performance of the Basket. The numbers appearing in the examples below have been rounded for ease of analysis. The following scenario analysis and examples illustrate the payment at maturity for a \$10.00 security on a hypothetical offering of the Securities, and reflect the Upside Gearing of 2.81 and the following terms:

Investment term: Approximately 5 years
 Initial Basket Level: 100
 Downside Threshold: 65
 Upside Gearing: 2.81

Example 1— The level of the Basket *increases* to a Final Basket Level of 110. The Basket Return is greater than zero and expressed as a formula:

$$\text{Basket Return} = (110 - 100) / 100 = 10.00\%$$

$$\text{Payment at Maturity} = \$10 + [\$10 \times (10.00\% \times 2.81)] = \$12.81$$

Because the Basket Return is equal to 10.00%, the Payment at Maturity is equal to \$12.81 per \$10.00 Principal Amount of Securities, resulting in a total return on the Securities of 28.10%.

Example 2— The Final Basket Level is equal to the Initial Basket Level of 100. The Basket Return is zero and expressed as a formula:

$$\text{Basket Return} = (100 - 100) / 100 = 0.00\%$$

Payment at Maturity = \$10.00

Because the Basket Return is zero, the Payment at Maturity per Security is equal to the original \$10.00 Principal Amount per Security, resulting in a zero percent return on the Securities.

Example 3— The level of the Basket *decreases* to a Final Basket Level of 90. The Basket Return is negative and expressed as a formula:

$$\text{Basket Return} = (90 - 100) / 100 = -10.00\%$$

Payment at Maturity = \$10.00

Because the Basket Return is less than zero, but the Final Basket Level is greater than or equal to the Downside Threshold on the Final Valuation Date, MSFL will pay you a Payment at Maturity equal to \$10.00 per \$10.00 Principal Amount of Securities, resulting in a zero percent return on the Securities.

Example 4— The level of the Basket *decreases* to a Final Basket Level of 40. The Basket Return is negative and expressed as a formula:

$$\text{Basket Return} = (40 - 100) / 100 = -60.00\%$$

$$\text{Payment at Maturity} = \$10 + (\$10 \times -60.00\%) = \$4.00$$

Because the Basket Return is less than zero and the Final Basket Level is below the Downside Threshold on the Final Valuation Date, the Securities will be fully exposed to any decline in the level of the Basket on the Final Valuation Date. Therefore, the Payment at Maturity is equal to \$4.00 per \$10.00 Principal Amount of Securities, resulting in a total loss on the Securities of 60.00%.

If the Final Basket Level is below the Downside Threshold on the Final Valuation Date, the Securities will be fully exposed to any decline in the Basket, and you will lose a significant portion or all of your Principal Amount at maturity.

Scenario Analysis – Hypothetical Payment at Maturity for each \$10.00 Principal Amount of Securities.

Performance of the Basket*		Performance of the Securities		
Final Basket Level	Basket Return	Upside Gearing	Payment at Maturity	Return on Securities Purchased at \$10.00(1)
200	100.00%	2.81	\$38.10	281.00%
190	90.00%	2.81	\$35.29	252.90%
180	80.00%	2.81	\$32.48	224.80%
170	70.00%	2.81	\$29.67	196.70%
160	60.00%	2.81	\$26.86	168.60%
150	50.00%	2.81	\$24.05	140.50%
140	40.00%	2.81	\$21.24	112.40%
130	30.00%	2.81	\$18.43
