NOTES TO FINANCIAL STATEMENTS (unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

Petroleum & Resources Corporation (the Corporation) is registered under the Investment Company Act of 1940 as a non-diversified investment company. The Corporation's investment objectives as well as the nature and risk of its investment transactions are set forth in the Corporation's registration statement.

Security Valuation--Investments in securities traded on national security exchanges are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options) are valued at amortized cost. Purchased and written options are valued at the last quoted asked price.

Security Transactions and Investment Income—Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

2. FEDERAL INCOME TAXES

The Corporation's policy is to distribute all of its taxable income to its shareholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities, including options, at September 30, 2002 was \$333,238,690, and net unrealized appreciation aggregated \$98,536,448, of which the related gross unrealized appreciation and depreciation were \$143,099,984 and \$44,563,536, respectively.

Distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, annual reclassifications are made within the Corporation's capital accounts to reflect income and gains available for distribution under income tax regulations.

3. INVESTMENT TRANSACTIONS

Purchases and sales of portfolio securities, other than options and short-term investments, during the nine months ended September 30, 2002 were \$35,584,450

and \$31,192,124, respectively. Options may be written or purchased by the Corporation. The Corporation, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. The risk associated with purchasing options is limited to the premium originally paid. Option transactions comprised an insignificant portion of operations during the period ended September 30, 2002. All investment decisions are made by a committee, and no one person is primarily responsible for making recommendations to that committee.

4. CAPITAL STOCK

The Corporation has 5,000,000 unissued preferred shares without par value.

On December 27, 2001, the Corporation issued 579,054 shares of its Common Stock at a price of \$22.725 per share (the average market price on December 10, 2001) to stockholders of record November 19, 2001 who elected to take stock in payment of the distribution from 2001 capital gain and investment income.

The Corporation may purchase shares of its Common Stock from time to time at such prices and amounts as the Board of Directors may deem advisable. Transactions in Common Stock for 2002 and 2001 were as follows:

NOTES TO FINANCIAL STATEMENTS (continued)

The Corporation has an employee incentive stock option and stock appreciation rights plan which provides for the issuance of options and stock appreciation rights for the purchase of up to 895,522 shares of the Corporation's Common Stock at 100% of the fair market value at date of grant. Options are exercisable beginning not less than one year after the date of grant and extend and vest over ten years from the date of grant. Stock appreciation rights are exercisable beginning not less than two years after the date of grant and extend over the period during which the option is exercisable. The stock appreciation rights allow the holders to surrender their rights to exercise their options and receive cash or shares in an amount equal to the difference between the option price and the fair market value of the common stock at the date of surrender.

Under the plan, the exercise price of the options and related stock appreciation rights is reduced by the per share amount of capital gain paid by the Corporation during subsequent years. At the beginning of 2002, there were 148,997 options outstanding at a weighted average exercise price of \$17.1543 per share. During the nine months ended September 30, 2002, the Corporation granted options including stock appreciation rights for 23,769 shares of common stock with an exercise price of \$23.1350. The benefits are based on years of service and compensation during the last five years of employment. The Corporation's current funding policy is to contribute annually to the plan only those amounts that can be deducted for federal income tax purposes. As of September 30, 2002, the plan assets, consisting primarily of investments in individual stocks, bonds and mutual funds were \$4,405,413. In determining the actuarial present value of the projected benefit obligation, the interest rate used for the weighted average discount rate was 7.25%, the expected rate of annual salary increases was 7.0%, and the long-term expected rate of return on plan assets was 8.0%. The projected benefit obligation as of September 30, 2002 was \$3,620,318. Prepaid pension cost included in other assets at September 30, 2002 was \$1,578,006.
