ENPRO INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Overview, Basis of Presentation and Recently Issued Accounting Pronouncement

Overview

EnPro Industries, Inc. (EnPro or the Company) is a leader in the design, development, manufacturing and marketing of proprietary engineered industrial products that include sealing products, self-lubricating, non-rolling bearing products, precision engineered components and lubrication systems for reciprocating compressors, and heavy-duty, medium-speed diesel, natural gas and dual fuel reciprocating engines, including parts and services for these engines.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. The Consolidated Balance Sheet as of December 31, 2010, was derived from the audited financial statements included in the Company s annual report on Form 10-K for the year ended December 31, 2010. In the opinion of management, all adjustments, consisting of normal recurring accruals, considered necessary for a fair statement of results for the periods presented, have been included. Management believes that the assumptions underlying the consolidated financial statements are reasonable. These interim financial statements should be read in conjunction with the Company s consolidated financial statements and notes thereto included in its annual report on Form 10-K for the year ended December 31, 2010.

Revenues, expenses, cash flows, assets and liabilities can and do vary each quarter of the year. Therefore, the results and trends in these interim financial statements may not be indicative of those for a full year.

All significant intercompany accounts and transactions between the Company s consolidated operations have been eliminated.

Recently Issued Accounting Pronouncement

In December 2010, accounting guidance was amended to clarify the acquisition date that should be used for reporting pro forma financial information for business combinations. If comparative financial statements are presented, the pro forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for all business combinations that occurred during the current year had been completed as of the beginning of the comparable prior annual reporting period. The amendments in this guidance became effective prospectively for business combinations for which the acquisition date is on or after January 1, 2011. There was no impact in the consolidated financial results as the amendments relate only to additional disclosures.

2. Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd.

The historical business operations of Garlock Sealing Technologies LLC (GST LLC) and The Anchor Packing Company (Anchor), have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged personal injury or death as a result of exposure to asbestos fibers. Those subsidiaries manufactured and/or sold industrial sealing products, predominately gaskets and packing,

Table of Contents

that contained encapsulated asbestos fibers. Anchor is an inactive and insolvent indirect subsidiary of Coltec Industries Inc (Coltec). The Company's subsidiaries' exposure to asbestos litigation and their relationships with insurance carriers are managed through another Coltec subsidiary, Garrison Litigation Management Group, Ltd. (Garrison). GST LLC, Anchor and Garrison may be collectively referred to as GST.

On June 5, 2010 (the Petition Date), GST LLC, Anchor and Garrison filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Western District of North Carolina in Charlotte (the Bankruptcy Court). The filings were the initial step in a claims resolution process. The goal of the process is an efficient and permanent resolution of all current and future asbestos claims through court approval of a plan of reorganization, which is expected to establish a trust to which all asbestos claims will be channeled for resolution. GST intends to seek an agreement with asbestos claimants and other creditors on the terms of a plan for the establishment of such a trust and repayment of other creditors in full, or in the absence of such an agreement an order of the Bankruptcy Court confirming such a plan.

GST's financial results are included in the Company's consolidated results through June 4, 2010, the day prior to the Petition Date. However, generally accepted accounting principles require that an entity that files for protection under the U.S. Bankruptcy Code, whether solvent or insolvent, whose financial statements were previously consolidated with those of its parent, as GST and its subsidiaries were with EnPro, generally must be prospectively deconsolidated from the parent and the investment accounted for using the cost method. At deconsolidation, the Company's investment was recorded at its estimated fair value on June 4, 2010, resulting in a gain for reporting purposes. The cost method requires the Company to present its ownership interests in the net assets of GST at the Petition Date as an investment and to not recognize any income or loss from GST and subsidiaries in the Company's results of operations during the reorganization period. When GST emerges from the jurisdiction of the Bankruptcy Court, the subsequent accounting will be determined based upon the applicable facts and circumstances at such time, including the terms of any plan of reorganization.

Financial Results

Condensed combined financial information for GST is set forth below, presented on a historical cost basis.

GST
(Debtor-in-Possession)

Table of Contents

GST
(Debtor-in-Possession)
Condensed Combined Balance Sheets (Unaudited)
(in millions, at historical cost)

	March 31, 2011	December 31, 2010
Assets:		
Current assets	\$ 190.3	\$ 182.5
Property, plant and equipment	40.9	41.2
Asbestos insurance receivable	158.0	158.0
Deferred income taxes	123.5	126.7
Notes receivable from affiliate	227.2	227.2
Other assets	24.6	24.4
 Total assets	 \$ 764.5	 \$ 760.0
 Liabilities and Shareholder's Equity:		
Current liabilities	\$ 48.4	\$ 48.4
Other liabilities	22.4	26.7
Liabilities subject to compromise (A)	469.0	469.2
 Total liabilities	 539.8	 544.3
Shareholder's equity	224.7	215.7
 Total liabilities and shareholder's equity	 \$ 764.5	 \$ 760.0

(A) Liabilities subject to compromise include pre-petition unsecured claims which may be settled at amounts which differ from those recorded in the condensed combined balance sheets. Liabilities subject to compromise consist principally of asbestos-related claims.

Related Party Transactions

The Company regularly transacts business with GST, and previously, these related party transactions had been eliminated in consolidation. Due to the deconsolidation of GST, transactions occurring after June 4, 2010, are now reflected on the Company's Consolidated Statement of Operations. Sales to GST totaling \$5.8 million are reflected in net sales and purchases from GST totaling \$5.2 million are reflected in cost of sales for the quarter ended March 31, 2011. The Company also provides services for GST including information technology, supply chain, treasury, tax administration, legal and human relations under a support services agreement. Amounts due from GST resulting from their purchase of goods and services from the Company totaling \$12.8 million and \$17.0 million are included in accounts and notes receivable and amounts due to GST resulting from the Company's purchase of goods from GST totaling \$4.7 million and \$3.4 million are included in accounts payable in the Company's March 31, 2011 and December 31, 2010, Consolidated Balance Sheets, respectively.

Additionally, the Company and GST had outstanding foreign exchange forward contracts involving the Australian Dollar, Canadian Dollar, Mexican Peso and U.S. Dollar with a notional amount of \$2.9 million as of March 31, 2011. These related party contracts were eliminated in consolidation prior to the deconsolidation of GST.

As discussed more fully in Note 10, the deconsolidation of GST from the Company's results requires short-term borrowings from GST and notes payable to GST, which had previously been eliminated in consolidation, to be

reflected on the Company's Consolidated Balance Sheets. Interest expense related to these borrowings of \$6.6 million is reflected in interest expense for the quarter ended March 31, 2011, and accrued interest of \$6.4 million and \$24.9 million is included in accrued interest payable at March 31, 2011 and December 31, 2010, respectively.

Table of Contents

Debtor-in-Possession Financing

On June 8, 2010, GST entered into a Post-Petition Loan and Security Agreement (the "DIP Loan Agreement") with a bank to establish a secured revolving credit facility pursuant to which GST may from time to time obtain loans, letters of credit and bank products in an aggregate amount up to \$10 million outstanding at any time (with a sublimit of \$8 million for letters of credit). Actual borrowing availability at any date is determined by reference to a borrowing base of specified percentages of eligible accounts receivable and inventory, which borrowing base is reduced by loans and letters of credit outstanding and certain reserves. The obligations of GST under the DIP Loan Agreement are guaranteed by GST LLC and Garrison and secured by certain assets of GST. As a result of the deconsolidation of GST from the Company's financial results, any indebtedness incurred under the DIP Loan Agreement would not be reflected in the Company's Consolidated Balance Sheets.

3. Acquisitions

In January 2011, the Company acquired the assets of Rome Tool & Die, Inc., a leading supplier of steel brake shoes to the North American heavy-duty truck market. The business is part of Stemco, which is in the Sealing Products segment. Brake shoes are the third product line added by Stemco since the third quarter of 2009. Rome Tool & Die's headquarters and manufacturing facility are located in Rome, Georgia.

In February 2011, the Company acquired the business of Pipeline Seal and Insulator, Inc. and its affiliates ("PSI"), a privately-owned group of companies that manufacture products for the safe flow of fluids through pipeline transmission and distribution systems worldwide. PSI primarily serves the global oil and gas industry and water and wastewater infrastructure markets. The business manufactures flange sealing and flange isolation products; pipeline casing spacers/isolators; casing end seals; the original Link-Seal® modular sealing system for sealing pipeline penetrations into walls, floors, ceilings and bulkheads; hole forming products; manhole infiltration sealing systems; and safety-related signage for pipelines. It operates facilities in the United States, Germany and the United Kingdom, and is included in EnPro's Garlock group of companies in the Sealing Products segment. PSI employs about 200 people with primary manufacturing locations in Houston, Texas; St. Neots, United Kingdom; and Nehren and Furth, Germany.

In February 2011, the Company acquired the Mid Western group of companies, a privately-owned business primarily serving the oil and gas drilling, production and processing industries of Western Canada. Mid Western services and rebuilds reciprocating compressors, designs and installs lubrication systems, and services and repairs a variety of other equipment used in the oil and gas industry. The business has locations in Calgary, Edmonton and Grand Prairie, Alberta, and is part of the Company's Engineered Products segment.

The acquisitions completed during 2011 were paid for with \$152.2 million in cash which included \$100.0 million for the purchase of PSI. Additionally, there were approximately \$1.0 million of acquisition related costs recorded during the period. The purchase prices of the businesses acquired were allocated to the assets acquired and liabilities assumed based on their estimated fair values. The excess of the purchase prices over the identifiable assets acquired and liabilities assumed was reflected as goodwill. Goodwill recorded as part of the purchase price allocation was \$51.4 million, of which \$33.3 million is expected to be tax deductible over a period of up to 15 years. Identifiable intangible assets acquired as part of the acquisitions were \$68.5 million, including \$1.2 million of indefinite-lived trade names and \$67.3 million of definite-lived intangibles, such as customer and distributor relationships, proprietary technology, and trade names with a weighted average amortization period of approximately 11.9 years. The Company continues to evaluate the purchase price allocation, primarily the value of certain intangible

Table of Contents

assets, and may revise the purchase price allocation in future periods as these estimates are finalized. The following table represents the preliminary purchase price allocation:

	(in millions)
Accounts and notes receivable	\$ 18.8
Inventories	17.2
Property, plant and equipment	12.3
Goodwill	51.4
Other intangible assets	68.5
Other assets	0.9
Liabilities assumed	(16.9)
	\$ 152.2

Sales for the acquisitions of \$20.3 million and pre-tax income of \$0.4 million are included in the accompanying Consolidated Statement of Operations for the quarter ended March 31, 2011. The following pro forma condensed consolidated financial results of operations for the Company for the quarters ended March 31, 2011 and 2010, are presented below as if the acquisitions had been completed on January 1, 2010:

	Quarters Ended March 31,	
	2011	2010
	(in millions)	
Pro forma net sales	\$ 279.0	\$ 248.5
Pro forma net income from continuing operations	17.7	4.0

The 2011 supplemental pro forma net income was adjusted to exclude \$1.0 million of pre-tax acquisition-related costs and \$1.7 million of pre-tax nonrecurring expenses related to the fair value adjustment to acquisition date inventory. The 2010 supplemental pro forma net income was adjusted to include these charges. These pro forma financial results have been prepared for comparative purposes only and do not reflect the effect of synergies that would have been expected to result from the integration of these acquisitions. The pro forma information does not purport to be indicative of the results of operations that actually would have resulted had the combinations occurred on January 1, 2010, or of future results of the consolidated entities.

4. Discontinued Operations

During the fourth quarter of 2009, the Company announced its plans to sell the Quincy Compressor business (Quincy), which had been reported within the Engineered Products segment. Accordingly, the Company has reported, for all periods presented, the results of operations and cash flows of Quincy as a discontinued operation in the accompanying consolidated financial statements.

On March 1, 2010, the Company completed the sale of Quincy, other than the equity interests in Kunshan Q-Tech Air Systems Technologies Ltd., Quincy's operation in China (Q-Tech). The sale of the equity interests in Q-Tech was completed during the second quarter of 2010.

For the quarter ended March 31, 2010, results of operations from Quincy during the period owned by EnPro were as follows:

Table of Contents

Sales	\$ 20.9
Income from discontinued operations	\$ 2.4
Income tax expense	(0.9)
	1.5
Gain from disposal of discontinued operations, net of tax	91.9
Income from discontinued operations, net of taxes	\$ 93.4

5. Comprehensive Income

Total comprehensive income consists of the following:

	Quarters Ended March 31, 2011 2010 (in millions)	
Net income	\$ 15.2	\$ 99.0
Foreign currency translation adjustments	9.8	(7.9)
Pensions and postretirement benefits	0.8	1.1
Net unrealized gains (losses) from cash flow hedges	1.3	(0.6)
Total comprehensive income	\$ 27.1	\$ 91.6

6. Earnings Per Share

The computations of basic and diluted earnings per share are as follows:

	Quarters Ended March 31, 2011 2010 (in millions, except per share amounts)	
Numerator (basic and diluted):		
Continuing operations	\$ 15.2	\$ 5.6
Discontinued operations		93.4
Net income	\$ 15.2	\$ 99.0
Denominator:		
Weighted-average shares basic	20.5	20.3
Share-based awards	0.3	0.2
Convertible debentures	0.7	
Weighted-average shares diluted	21.5	20.5

Earnings per share basic:		
Continuing operations	\$ 0.74	\$ 0.28
Discontinued operations		4.61
	\$ 0.74	\$ 4.89
Earnings per share diluted:		
Continuing operations	\$ 0.71	\$ 0.27
Discontinued operations		4.56
	\$ 0.71	\$ 4.83

Table of Contents

As discussed further in Note 9, the Company previously issued \$172.5 million in aggregate principal amount of Convertible Senior Debentures (the "Debentures"). Under the terms of the Debentures, upon conversion, the Company would settle the par amount of its obligations in cash and the remaining obligations, if any, in common shares. Pursuant to applicable accounting guidelines, the Company includes the conversion option effect in diluted earnings per share during such periods when the Company's average stock price exceeds the conversion price of \$33.79 per share. The Company's average stock price did not exceed \$33.79 per share in the quarter ended March 31, 2010, so there is no impact on diluted earnings per share from the Debentures for that period.

7. Inventories

Inventories consist of the following at March 31, 2011 and December 31, 2010:

	2011	2010
	(in millions)	
Finished products	\$ 59.5	\$ 54.1
Deferred costs relating to long-term contracts	37.0	49.9
Work in process	19.2	9.4
Raw materials and supplies	36.3	24.2
	152.0	137.6
Reserve to reduce certain inventories to LIFO basis	(10.9)	(10.6)
Progress payments	(37.7)	(50.0)
Total	\$ 103.4	\$ 77.0

The Company uses the last-in, first-out ("LIFO") method of valuing certain of its inventories. An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs, which are subject to change until the final year-end LIFO inventory valuation.

8. Goodwill and Other Intangible Assets

The changes in the net carrying value of goodwill by reportable segment for the quarter ended March 31, 2011, are as follows:

	Sealing Products	Engineered Products	Engine Products and Services	Total
			(in millions)	
Gross goodwill as of December 31, 2010	\$ 93.5	\$ 148.0	\$ 7.1	\$ 248.6
Accumulated impairment losses	(27.8)	(108.7)		(136.5)
Goodwill as of December 31, 2010	65.7	39.3	7.1	112.1
Foreign currency translation	1.3	1.0		2.3
Acquisitions	43.6	7.8		51.4
Gross goodwill as of March 31, 2011	138.4	156.8	7.1	302.3
Accumulated impairment losses	(27.8)	(108.7)		(136.5)
Goodwill as of March 31, 2011	\$ 110.6	\$ 48.1	\$ 7.1	\$ 165.8

Table of Contents

The gross carrying amount and accumulated amortization of identifiable intangible assets is as follows:

	As of March 31, 2011		As of December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
	(in millions)			
Customer relationships	\$ 150.9	\$ 44.0	\$ 101.0	\$ 41.5
Existing technology	28.5	9.2	27.9	8.8
Trademarks	54.6	8.4	39.4	7.9
Other	22.1	13.3	17.1	12.1
	\$ 256.1	\$ 74.9	\$ 185.4	\$ 70.3

Amortization expense for the quarters ended March 31, 2011 and 2010, was \$4.0 million and \$3.5 million, respectively. The Company has trademarks with indefinite lives that are included in the table above with a carrying amount of approximately \$26 million and \$25 million as of March 31, 2011 and December 31, 2010, respectively, which are not amortized.

9. Long-Term Debt***Debentures***

The Company has \$172.5 million outstanding in aggregate principal amount of Debentures, originally recorded net of a discount of \$61.3 million. The Debentures bear interest at the annual rate of 3.9375%, with interest due on April 15 and October 15 of each year, and will mature on October 15, 2015, unless they are converted prior to that date. The Debentures are the Company's direct, unsecured and unsubordinated obligations and rank equal in priority with all unsecured and unsubordinated indebtedness and senior in right of payment to all subordinated indebtedness. They effectively rank junior to all secured indebtedness to the extent of the value of the assets securing such indebtedness. The Debentures do not contain any financial covenants.

Holders may convert the Debentures into cash and shares of the Company's common stock, under certain circumstances described more fully in the Company's most recent Form 10-K. The initial conversion rate, which is subject to adjustment, is 29.5972 shares of common stock per \$1,000 principal amount of Debentures. This is equal to an initial conversion price of \$33.79 per share.

None of the conditions that permit conversion were satisfied at, or during the quarter ended March 31, 2011.

Upon conversion of any Debentures, the Company is obligated to deliver, in respect of each \$1,000 aggregate principal amount of the Debentures being converted (i) cash equal to the lesser of \$1,000 and the Conversion Value (defined below) and (ii) to the extent the Conversion Value exceeds \$1,000, a number of shares equal to the sum of, for each day of the cash settlement period, (1) 5% of the difference between (A) the product of the conversion rate (plus any additional shares as an adjustment upon a change of control) and the closing price of the Company's common stock for such date and (B) \$1,000, divided by (2) the closing price of the Company's common stock for such day.

Conversion Value means the product of (1) the conversion rate in effect (plus any additional shares as an adjustment upon a change of control) and (2) the average of the closing prices of the Company's common stock for the 20 consecutive trading days beginning on the second trading day after the conversion date for those Debentures.

Table of Contents

The Company used a portion of the net proceeds from the sale of the Debentures to enter into call options (hedge and warrant transactions), which entitle the Company to purchase shares of its stock from a financial institution at \$33.79 per share and entitle the financial institution to purchase shares from the Company at \$46.78 per share. This will reduce potential dilution to the Company's common shareholders from conversion of the Debentures by increasing the effective conversion price to \$46.78 per share.

The debt discount, \$35.2 million and \$36.7 million as of March 31, 2011 and December 31, 2010, respectively, is being amortized through interest expense until the maturity date of October 15, 2015, resulting in an effective interest rate of approximately 9.5%. Interest expense related to the Debentures for the quarters ended March 31, 2011 and 2010 includes \$1.7 million of contractual interest coupon in both periods and \$1.5 million and \$1.4 million, respectively, of debt discount amortization.

Credit Facility

The Company's primary U.S. operating subsidiaries, other than GST, amended and extended the maturity date of their senior secured revolving credit facility effective March 31, 2011. The amended agreement provides initially for a \$125 million senior revolving credit facility, \$30 million of which may be used for letters of credit. Actual borrowing availability under the credit facility is determined by reference to a borrowing base of specified percentages of eligible accounts receivable and inventory, and is reduced by usage of the facility (including outstanding letters of credit) and any reserves. Under certain conditions the Company may request that the facility be increased by up to \$50 million, to \$175 million in total. Any increase is dependent on obtaining future lender commitments for those amounts, and no current lender has any obligation to provide such commitment. The credit facility matures on July 17, 2015 unless, prior to that date, the Debentures are paid in full, refinanced on certain terms or defeased, in which case the facility will mature on March 30, 2016.

Borrowings under the credit facility are secured by specified assets of the Company and its U.S. operating subsidiaries, other than GST, and primarily include accounts receivable, inventory, deposit accounts, intercompany loans, intellectual property and related contract rights, general intangibles related to any of the foregoing and proceeds related to disposal or sale of the foregoing. Subsidiary capital stock, real estate, and other fixed assets are not included as collateral.

Outstanding borrowings under the credit facility initially bear interest at a rate equal to, at the Company's option, either (1) a base/prime rate plus 1% or (2) the adjusted one, two, three or six-month LIBOR rate plus 2%. Future pricing under the credit facility at any particular time will be determined by reference to a pricing grid based on average daily availability under the facility for the immediately prior fiscal quarter. Under the pricing grid, the applicable margins will range from 1.00% to 1.50% for base/prime rate loans and from 2.00% to 2.50% for LIBOR loans. The undrawn portion of the credit facility is subject to an unused line fee calculated at an annual rate ranging between 0.375% and 0.50%, depending on the level of outstanding borrowings. Outstanding letters of credit are subject to an annual fee equal to the applicable margin for LIBOR loans under the credit facility as in effect from time to time, plus a fronting fee on the aggregate undrawn amount of the letters of credit at an annual rate of 0.125%.

The credit agreement contains customary covenants and restrictions for an asset-based credit facility, including negative covenants limiting certain: fundamental changes (such as merger transactions); loans; incurrence of debt other than specifically permitted debt; transactions with affiliates that are not on arm's-length terms; incurrence of liens other than specifically permitted liens; repayment of subordinated debt (except for scheduled payments in accordance with applicable subordination documents); prepayments of other debt; dividends; asset dispositions other than as specifically permitted; and acquisitions and other investments other than as specifically permitted.

Table of Contents

In the event that the amount available for borrowing under the credit facility exceeds \$20 million, the limitation on fixed asset dispositions is not applicable. Moreover, the limitations on acquisitions, investments in foreign subsidiaries, dividends (including those required to make payments on our convertible debentures), incurrence of certain cash collateral liens and prepayment of debt other than subordinated debt are generally not applicable if the following conditions are satisfied: the Company's subsidiaries identified as borrowers under the credit facility have either (a) pro forma average borrowing availability under the credit facility greater than the greater of (i) the lesser of 25% of (A) the available borrowing base or (B) the aggregate commitments of the lenders under the credit facility or (ii) \$20 million or (b) (i) pro forma average borrowing availability under the credit facility greater than the greater of (A) the lesser of 20% of (I) the available borrowing base or (II) the aggregate commitments of the lenders under the credit facility or (B) \$17.5 million, and (ii) maintained a pro forma fixed charge coverage ratio that is greater than 1.0 to 1.0.

The credit facility also requires that the Company maintain a minimum fixed charge coverage ratio of 1.0 to 1.0 in the event the amount available for borrowing is less than an amount equal to the greater of (a) the lesser of 15% of (i) the available borrowing base or (ii) the aggregate commitments of the lenders under the credit facility or (b) \$15 million (which amount, in the event of any commitment increase, is increased by 12% of any such commitment increase).

The credit facility contains events of default including, but not limited to, nonpayment of principal or interest, violation of covenants, breaches of representations and warranties, cross-default to other debt, bankruptcy and other insolvency events, material judgments, certain ERISA events, actual or asserted invalidity of loan documentation and certain changes of control of the Company.

Prior to March 31, 2011, the maximum amount available for borrowings under the prior facility was \$60 million. The actual borrowing availability at March 31, 2011, under the Company's senior secured revolving credit facility was \$84.3 million after giving consideration to \$4.1 million of letters of credit outstanding.

10. Short-Term Borrowings from GST and Notes Payable to GST

The deconsolidation of GST from the Company's financial results required certain intercompany indebtedness described below to be reflected on the Company's Consolidated Balance Sheets.

As of March 31, 2011, Coltec Finance Company Ltd., a wholly-owned subsidiary of Coltec, had aggregate, short-term borrowings of \$19.0 million from GST's subsidiaries in Mexico, Canada and Australia. The unsecured obligations were denominated in the currency of the lending party, and bear interest based on the applicable one-month interbank offered rate for each foreign currency involved.

Effective as of January 1, 2010, Coltec entered into a \$73.4 million Amended and Restated Promissory Note due January 1, 2017 (the "Coltec Note") in favor of GST LLC, and the Company's subsidiary Stemco LP entered into a \$153.8 million Amended and Restated Promissory Note due January 1, 2017, in favor of GST LLC (the "Stemco Note"), and together with the Coltec Note, the "Intercompany Notes"). The Intercompany Notes amended and replaced promissory notes in the same principal amounts which were initially issued in March 2005, and which expired on January 1, 2010.

The Intercompany Notes bear interest at 11% per annum, of which 6.5% is payable in cash and 4.5% is added to the principal amount of the Intercompany Notes as payment-in-kind ("PIK") interest. If GST LLC is unable to pay ordinary course operating expenses, under certain conditions, GST LLC can require Coltec and Stemco to pay in cash the accrued PIK interest necessary to meet such ordinary course operating expenses, subject to a cap of 1% of the principal balance of each Intercompany Note in any calendar month and 4.5% of the principal balance of each Intercompany Note in any year. The interest

Table of Contents

due under the Intercompany Notes may be satisfied through offsets of amounts due under intercompany services agreements pursuant to which the Company provides certain corporate services, makes available access to group insurance coverages to GST, makes advances to third party providers related to payroll and certain benefit plans sponsored by GST, and permits employees of GST to participate in certain of the Company's benefit plans. In 2011, \$10.2 million of the PIK interest from 2010 was added to the principal balance of the Intercompany Notes.

The Coltec Note is secured by Coltec's pledge of certain of its equity ownership in specified U.S. subsidiaries. The Stemco Note is guaranteed by Coltec and secured by Coltec's pledge of its interest in Stemco. The Notes are subordinated to any obligations under the Company's senior secured revolving credit facility described in Note 9.

11. Pensions and Postretirement Benefits

The components of net periodic benefit cost for the Company's U.S. and foreign defined benefit pension and other postretirement plans for the quarters ended March 31, 2011 and 2010, are as follows:

	Quarters Ended March 31,			
	Pension Benefits		Other Benefits	
	2011	2010	2011	2010
	(in millions)			
Service cost	\$ 1.3	\$ 1.5	\$ 0.2	\$ 0.2
Interest cost	2.8	3.2	0.1	0.2
Expected return on plan assets	(2.0)	(2.4)		
Prior service cost component		0.2		0.1
Net loss component	1.2	1.8		
Deconsolidation of GST	(0.5)			
Curtailment loss		0.7		
	\$ 2.8	\$ 5.0	\$ 0.3	\$ 0.5

The Company anticipates that there will be a required funding of \$18.0 million to its U.S. defined benefit plans in 2011. The Company expects to make total contributions of approximately \$0.4 million in 2011 to its foreign pension plans.

12. Derivative Instruments

The Company uses derivative financial instruments to manage its exposure to various risks. The use of these financial instruments modifies the exposure with the intent of reducing the risk to the Company. The Company does not use financial instruments for trading purposes, nor does it use leveraged financial instruments. The counterparties to these contractual arrangements are major financial institutions. The Company uses multiple financial institutions for derivative contracts to minimize the concentration of credit risk. Generally accepted accounting principles require all derivative instruments be reported in the Consolidated Balance Sheets at fair value and changes in a derivative's fair value be recognized currently in earnings unless specific hedge criteria are met.

The Company is exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances on its foreign subsidiaries' balance sheets, intercompany loans with foreign subsidiaries and transactions denominated in foreign currencies. The Company strives to control its exposure to these risks through its normal operating activities and, where appropriate, through derivative instruments. The Company has entered into contracts to hedge forecasted transactions occurring at various dates through March 2012 that are denominated in foreign currencies. The notional amount of foreign exchange contracts hedging foreign currency transactions was \$88.8

Table of Contents

million and \$112.7 million at March 31, 2011 and December 31, 2010, respectively. At March 31, 2011, foreign exchange contracts with notional amounts totaling \$43.7 million are accounted for as cash flow hedges. As cash flow hedges, the effective portion of the gain or loss on the contracts is reported in accumulated other comprehensive income and the ineffective portion is reported in income. Amounts in accumulated other comprehensive income are reclassified into income, primarily cost of sales, in the period that the hedged transactions affect earnings. The balances of derivative assets are generally recorded in other current assets and the balances of derivative liabilities are generally recorded in other accrued expenses in the Consolidated Balance Sheets. The remaining notional amounts of \$45.1 million of foreign exchange contracts, all of which have a maturity date of a month or less, are recorded at their fair market value with changes in market value recorded in income.

13. Business Segment Information

The Company has three reportable segments. The Sealing Products segment manufactures sealing products, heavy-duty wheel-end components, polytetrafluoroethylene (PTFE) products and rubber products. The Engineered Products segment manufactures self-lubricating, non-rolling bearing products, aluminum blocks for hydraulic applications and precision engineered components and lubrication systems for reciprocating compressors. The Engine Products and Services segment manufactures and services heavy-duty, medium-speed diesel, natural gas and dual fuel reciprocating engines. The Company's reportable segments are managed separately based on differences in their products and services and their end-customers. Segment profit is total segment revenue reduced by operating expenses and restructuring and other costs identifiable with the segment. Corporate expenses include general corporate administrative costs. Expenses not directly attributable to the segments, corporate expenses, net interest expense, asbestos-related expenses, gains and losses related to the sale of assets, impairments and income taxes are not included in the computation of segment profit. The accounting policies of the reportable segments are the same as those for the Company.

GST LLC's results, prior to its deconsolidation on June 5, 2010, were included in the Sealing Products segment. Segment operating results and other financial data for the quarters ended March 31, 2011 and 2010, were as follows:

	Quarters Ended March 31, 2011 2010 (in millions)	
Sales		
Sealing Products	\$ 115.7	\$ 113.8
Engineered Products	94.3	75.1
Engine Products and Services	60.2	39.6
	270.2	228.5
Intersegment sales	(0.6)	(0.3)
Total sales	\$ 269.6	\$ 228.2
Segment Profit		
Sealing Products	\$ 19.6	\$ 17.8
Engineered Products	10.1	6.4
Engine Products and Services	11.2	10.0
Total segment profit	40.9	34.2
Corporate expenses	(7.9)	(8.0)
Asbestos-related expenses		(14.5)

Interest expense, net	(9.5)	(2.8)
Other expense	(1.6)	(0.6)
Income from continuing operations before income taxes	\$ 21.9	\$ 8.3

Table of Contents

Segment assets are as follows:

	March 31, 2011	December 31, 2010
Sealing Products	\$ 414.8	\$ 253.5
Engineered Products	381.9	329.0
Engine Products and Services	85.8	82.8
Corporate	299.8	483.0
	\$ 1,182.3	\$ 1,148.3

14. Fair Value Measurements

The Company utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

Assets and liabilities measured at fair value on a recurring basis are summarized as follows:

	Fair Value Measurements as of March 31, 2011			
	Total	Level 1	Level 2	Level 3
		(in millions)		
Assets				
Cash equivalents:				
European government money market	\$ 14.2	\$ 14.2	\$	\$
Time deposits	8.7	8.7		
	22.9	22.9		
Crucible back-up trust assets	20.3	20.3		
Foreign currency derivatives	2.3		2.3	
Deferred compensation assets	3.1	3.1		
	\$ 48.6	\$ 46.3	\$ 2.3	\$
Liabilities				
Deferred compensation liabilities	\$ 5.8	\$ 5.8	\$	\$
Foreign currency derivatives	1.4		1.4	
	\$ 7.2	\$ 5.8	\$ 1.4	\$

Table of Contents

	Fair Value Measurements as of December 31, 2010			
	Total	Level 1	Level 2	Level 3
		(in millions)		
Assets				
Cash equivalents:				
U.S. government money market	\$ 64.2	\$ 64.2	\$	\$
Money market	24.0	24.0		
Time deposits	3.3	3.3		
European government money market	13.4	13.4		
	104.9	104.9		
Crucible back-up trust assets	20.0	20.0		
Foreign currency derivatives	0.7		0.7	
Deferred compensation assets	2.8	2.8		
	\$ 128.4	\$ 127.7	\$ 0.7	\$
Liabilities				
Deferred compensation liabilities	\$ 5.8	\$ 5.8	\$	\$
Foreign currency derivatives	0.9		0.9	
	\$ 6.7	\$ 5.8	\$ 0.9	\$

The Company's cash equivalents, former Crucible back-up trust assets and deferred compensation assets and liabilities are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. For further discussion of the former Crucible back-up trust, see Note 15, Commitments and Contingencies—Crucible Materials Corporation. The fair values for foreign currency derivatives are based on quoted market prices from various banks for similar instruments.

The carrying values of the Company's significant financial instruments reflected in the Consolidated Balance Sheet approximate their respective fair values at March 31, 2011 and December 31, 2010, except for the following instruments:

	March 31, 2011		December 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
		(in millions)		
Long-term debt	\$ 139.4	\$ 221.3	\$ 135.8	\$ 240.7
Notes payable to GST	237.4	251.1	227.2	235.7
	\$ 376.8	\$ 472.4	\$ 363.0	\$ 476.4

The fair values for long-term debt are based on quoted market prices or on rates available to the Company for debt with similar terms and maturities.

The fair value of intangible assets associated with acquisitions was determined using a discounted cash flow analysis. Projecting discounted future cash flows required the Company to make significant estimates regarding future revenues and expenses, projected capital expenditures, changes in working capital and the appropriate discount rate. This non-recurring fair value measurement would be classified as Level 3 due to the absence of quoted market prices or observable inputs for assets of a similar nature.

Table of Contents

15. Commitments and Contingencies

General

A description of environmental, asbestos and other legal matters against certain of the Company's subsidiaries is included in this section in more detail. In addition to the matters noted herein, the Company is from time to time subject to, and is presently involved in, other litigation and legal proceedings arising in the ordinary course of business. The Company believes that the outcome of such other litigation and legal proceedings will not have a material adverse affect on its financial condition, results of operations and cash flows.

Environmental

The Company's facilities and operations are subject to federal, state and local environmental and occupational health and safety requirements of the U.S. and foreign countries. The Company takes a proactive approach in its efforts to comply with environmental, health and safety laws as they relate to its manufacturing operations and in proposing and implementing any remedial plans that may be necessary. The Company also conducts comprehensive compliance and management system audits at its facilities to maintain compliance and improve operational efficiency.

Although the Company believes past operations were in substantial compliance with the then applicable regulations, the Company or one of its subsidiaries has been named as a potentially responsible party or is otherwise involved at 15 sites at each of which the costs to the Company or its subsidiary are expected to exceed \$100 thousand. Investigations have been completed for 11 sites and are in progress at the other four sites. The majority of these sites relate to remediation projects at former operating facilities that were sold or closed and primarily deal with soil and groundwater contamination. The laws governing investigation and remediation of these sites can impose joint and several liability for the associated costs. Liability for these costs can be imposed on present and former owners or operators of the properties or on parties that generated the wastes that contributed to the contamination.

The Company's policy is to accrue environmental investigation and remediation costs when it is probable that a liability has been incurred and the amount can be reasonably estimated. The measurement of the liability is based on an evaluation of currently available facts with respect to each individual situation and takes into consideration factors such as existing technology, presently enacted laws and regulations and prior experience in remediation of contaminated sites. Liabilities are established for all sites based on these factors. As assessments and remediation progress at individual sites, these liabilities are reviewed periodically and adjusted to reflect additional technical data and legal information. As of March 31, 2011 and December 31, 2010, EnPro had accrued liabilities of \$14.3 million and \$14.7 million, respectively, for estimated future expenditures relating to environmental contingencies. These amounts have been recorded on an undiscounted basis in the Consolidated Financial Statements.

The Company believes that its accruals for environmental liabilities are adequate based on currently available information. Actual costs to be incurred for identified situations in future periods may vary from estimates because of the inherent uncertainties in evaluating environmental exposures due to unknown and changing conditions, changing government regulations and legal standards regarding liability.

Colt Firearms and Central Moloney

The Company has contingent liabilities related to divested businesses for which certain of its subsidiaries retained liability or are obligated under indemnity agreements. These contingent liabilities include, but are not limited to, potential product liability and associated claims related to firearms manufactured prior to 1990 by Colt Firearms, a former operation of Coltec, and for electrical transformers

Table of Contents

manufactured prior to 1994 by Central Moloney, another former Coltec operation. The Company also has ongoing obligations, which are included in retained liabilities of previously owned businesses in the Consolidated Balance Sheets, with regard to workers' compensation, retiree medical and other retiree benefit matters that relate to the Company's periods of ownership of these operations.

Crucible Materials Corporation

Crucible, which was engaged primarily in the manufacture and distribution of high technology specialty metal products, was a wholly owned subsidiary of Coltec until 1985 when a majority of the outstanding shares were sold. Coltec divested its remaining minority interest in 2004. Crucible filed for Chapter 11 bankruptcy protection in May 2009.

In conjunction with the closure of a Crucible plant in the early 1980s, Coltec was required to fund a trust for retiree medical benefits for certain employees at the plant. This trust (the Benefits Trust) pays for these retiree medical benefits on an ongoing basis. Coltec has no ownership interest in the Benefits Trust, and thus the assets and liabilities of this trust are not included in the Company's Consolidated Balance Sheets. Under the terms of the Benefits Trust agreement, the trustees retained an actuary to assess the adequacy of the assets in the Benefits Trust in 1995 and 2005. A third and final actuarial report will be required in 2015. The actuarial reports in 1995 and 2005 determined that the Benefits Trust has sufficient assets to fund the payment of future benefits.

Concurrent with the establishment of the Benefits Trust, Coltec was required to establish and make a contribution to a second trust (the Back-Up Trust) to provide protection against the inability of the Benefits Trust to meet its obligations. The assets of the Back-Up Trust were reflected in the Company's Consolidated Balance Sheets in other non-current assets and amounted to \$20.3 million and \$20.0 million as of March 31, 2011 and December 31, 2010, respectively. As noted above, based on the valuation completed in early 2005, an actuary determined there were adequate assets in the Benefits Trust to fund its future obligations.

On July 27, 2010, the Company received court approval of a settlement agreement with the trustees of the Benefits Trust and, as a result, is no longer obligated to maintain the Back-Up Trust. The sole asset of the Back-Up Trust, a guaranteed investment contract (GIC), was divided into two parts and distributed in accordance with the agreement. The Company received one GIC with a contract value of approximately \$18 million, and another GIC with a contract value of approximately \$2.3 million. The second GIC is being held in a special account in case of a shortfall in the Benefits Trust. In addition, the Company contributed \$0.9 million directly to the Benefits Trust.

The Company also has ongoing obligations, which are included in other liabilities in the Consolidated Balance Sheets, including workers' compensation, retiree medical and other retiree benefit matters, in addition to those mentioned previously, that relate to the Company's period of ownership of Crucible.

Warranties

The Company provides warranties on many of its products. The specific terms and conditions of these warranties vary depending on the product and the market in which the product is sold. The Company records a liability based upon estimates of the costs that may be incurred under its warranties after a review of historical warranty experience and information about specific warranty claims. Adjustments are made to the liability as claims data and historical experience warrant.

Changes in the carrying amount of the product warranty liability for the quarters ended March 31, 2011 and 2010 are as follows:

Table of Contents

	2011	2010
	(in millions)	
Balance at beginning of year	\$ 3.5	\$ 3.6
Charges to expense	0.5	1.5
Settlements made (primarily payments)	(0.6)	(0.8)
Balance at end of period	\$ 3.4	\$ 4.3

Asbestos

Background on Asbestos-Related Litigation and Recent Developments. The historical business operations of GST LLC and Anchor have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged that exposure to asbestos fibers in products produced or sold by GST LLC or Anchor, together with products produced and sold by numerous other companies, contributed to the bodily injuries or deaths of such plaintiffs. Those subsidiaries manufactured and/or sold industrial sealing products that contained encapsulated asbestos fibers. The Company's subsidiaries' exposure to asbestos litigation and their relationships with insurance carriers are managed through Garrison.

On the Petition Date, GST LLC, Garrison and Anchor filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Western District of North Carolina in Charlotte. GST LLC, Anchor and Garrison are sometimes collectively referred to as GST. The filings were the initial step in a claims resolution process. See Note 2 for additional information about this process and its effects on the Company.

As a result of the initiation of the Chapter 11 proceedings, the resolution of asbestos claims is subject to the jurisdiction of the Bankruptcy Court. The filing of the Chapter 11 cases automatically stayed the prosecution of pending asbestos bodily injury and wrongful death lawsuits, and initiation of new such lawsuits, against GST. Further, the Bankruptcy Court has issued an order enjoining plaintiffs from bringing or further prosecuting asbestos products liability actions against affiliates of GST, including EnPro, Coltec and all their subsidiaries, during the pendency of the Chapter 11 proceedings, subject to further order of the Bankruptcy Court.

GST LLC and Anchor have been among a large number of defendants in actions filed in various states by plaintiffs alleging injury or death as a result of exposure to asbestos fibers. Among the many products at issue in these actions are industrial sealing products, including gaskets and packing. The damages claimed have varied from action to action, and in some cases plaintiffs seek both compensatory and punitive damages. To date, neither GST LLC nor Anchor has been required to pay any punitive damage awards. Since the first asbestos-related lawsuits were filed against GST LLC in 1975, GST LLC and Anchor have processed more than 900,000 asbestos claims to conclusion (including judgments, settlements and dismissals) and, together with their insurers, have paid over \$1.4 billion in settlements and judgments and have incurred over \$400 million in fees and expenses.

Beginning in 2000, the top-tier asbestos defendants' companies that paid most of the plaintiffs' damages because they produced and sold huge quantities of highly friable asbestos products sought bankruptcy protection and stopped paying asbestos claims in the tort system. The bankruptcies of many additional producers of friable asbestos products followed. The plaintiffs could no longer pursue actions against these large defendants during the pendency of their bankruptcy proceedings, even though these defendants had historically been determined to be the largest contributors to asbestos-related injuries. Many plaintiffs pursued GST LLC in civil court actions to recover compensation formerly paid by top-tier bankrupt companies under state law principles of joint and several liability and began identifying GST LLC's non-friable sealing products as a primary cause of their asbestos diseases while generally denying exposure to the friable products of companies in bankruptcy. GST LLC believes this targeting

Table of Contents

strategy effectively shifted damages caused by top-tier defendants that produced friable asbestos products to GST LLC, thereby materially increasing GST LLC's cost of defending and resolving claims.

Almost all of the top-tier defendants that sought bankruptcy relief in the early 2000s have now emerged, or are positioning to emerge, from bankruptcy. Their asbestos liabilities have been assumed by wealthy 524(g) trusts created in the bankruptcies with assets contributed by the emerging former defendants and their affiliates. With the emergence of these companies from bankruptcy, many plaintiffs will seek compensation from the 524(g) trusts. These trusts have aggregate assets exceeding \$20 billion specifically set aside to compensate individuals with asbestos diseases caused by the friable products of those defendants. The Company believes that as billions of dollars of 524(g) trust assets continue to become available to claimants, defendants will obtain significant reductions in their costs to defend and resolve claims. As of the Petition Date, however, the establishment of these 524(g) trusts had taken longer than anticipated and the trusts had a significant backlog of claims that accumulated while the trusts were being established. Additionally, procedures adopted for the submissions of asbestos claims in bankruptcy cases and against 524(g) trusts made it difficult for GST LLC and other tort-system co-defendants to gain access to information about claims made against bankrupt defendants or the accompanying evidence of exposure to the asbestos-containing products of such bankrupt defendants. The Company believes that these procedures enable claimants to "double dip" by collecting payments from the remaining defendants in the tort system under joint-and-several-liability principles for injuries caused by the former top-tier defendants while also collecting substantial additional amounts from 524(g) trusts established by those former defendants to pay asbestos claims. Because of these factors, while several 524(g) trusts had begun making substantial payments to claimants prior to the Petition Date, GST LLC had not yet experienced a significant reduction in damages being sought from GST LLC.

In light of GST LLC's experience that (a) its cost of defending and resolving claims had not yet declined as anticipated although 524(g) trusts had begun making substantial payments to claimants, and (b) new mesothelioma claims filings against it in recent years had not declined at a rate similar to the rate of decline in disease incidence, GST initiated the Chapter 11 proceedings as a means to determine and comprehensively resolve their asbestos liability.

During the pendency of the Chapter 11 proceedings, certain actions proposed to be taken by GST LLC, Garrison and Anchor not in the ordinary course of business will be subject to approval by the Bankruptcy Court. As a result, during the pendency of these proceedings, the Company will not have exclusive control over these companies. Accordingly, under generally accepted accounting principles, the Company's investment in GST was deconsolidated from its financial results beginning on the Petition Date. As a result, the Company's financial results for the year ended December 31, 2010, which include the results from GST only through the Petition Date, may not be comparable to those of prior year periods.

Much of the remaining portion of this section updates information about the Company's subsidiaries' asbestos claims management experience prior to the Petition Date.

Claims Mix. Of the more than 90,000 open cases at the Petition Date, the Company is aware of approximately 4,900 that involve claimants alleging mesothelioma. A large majority of the amount of settlement payments made by GST LLC in recent years have been paid in connection with mesothelioma claims.

Product Defenses. The asbestos in products formerly sold by GST LLC and Anchor was encapsulated, which means the asbestos fibers incorporated into the products during the manufacturing process were sealed in binders. The products were also nonfriable, which means they could not be crumbled by hand pressure. The U.S. Occupational Safety and Health Administration, which began generally requiring warnings on asbestos-containing products in 1972, has never required that a warning

Table of Contents

be placed on products such as GST LLC's gaskets. Even though no warning label was required, GST LLC included one on all of its asbestos-containing products beginning in 1978. Further, gaskets such as those previously manufactured and sold by GST LLC are one of the few asbestos-containing products still permitted to be manufactured under regulations of the U.S. Environmental Protection Agency. Nevertheless, GST LLC discontinued all manufacture and distribution of asbestos-containing products in the U.S. during 2000 and worldwide in mid-2001.

Recent Trial Results. During the first half of 2010, GST LLC began three trials. In a Texas mesothelioma case, the jury awarded the plaintiff \$3 million; GST LLC's 45% share of this verdict was \$1.35 million. GST LLC appealed. Two mesothelioma trials in Philadelphia settled during trial prior to a verdict.

GST LLC won defense verdicts in ten of nineteen cases tried to verdict in the period from January 1, 2006 through the Petition Date. In the ten successful jury trials, the juries determined that either GST LLC's products were not defective, that GST LLC was not negligent, or that GST LLC's products did not cause the claimants' injuries. GST LLC's share of the nine adverse verdicts, most of which are being appealed, ranged from \$0 to \$1.35 million and averaged about \$490 thousand.

Appeals. In March 2010, the Illinois Court of Appeals, in a unanimous decision, overturned a \$500 thousand verdict that was entered against GST LLC in 2008, granting a new trial. At June 4, 2010, five GST LLC appeals were pending from adverse verdicts totaling \$3.6 million.

Insurance Coverage. At March 31, 2011, the Company had \$167.0 million of insurance coverage the Company believes is available to cover current and future asbestos claims against GST LLC and certain expense payments. GST has collected insurance payments totaling \$23.6 million since the Petition Date. In addition, at the Petition Date, the Company had classified \$4.2 million of otherwise available insurance as insolvent. Of the \$167.0 million of collectible insurance coverage and trust assets, the Company considers \$163.6 million (98%) to be of high quality because the insurance policies are written or guaranteed by U.S.-based carriers whose credit rating by S&P is investment grade (BBB) or better, and whose AM Best rating is excellent (A-) or better. The Company considers \$3.4 million (2%) to be of moderate quality because the insurance policies are written with various London market carriers. Of the \$167.0 million, \$131.0 million is allocated to claims that have been paid by GST LLC and submitted to insurance companies for reimbursement and the remainder is allocated to pending and estimated future claims. The insurance available to cover current and future asbestos claims is from comprehensive general liability policies that cover Coltec and certain of its other subsidiaries in addition to GST LLC for periods prior to 1985 and therefore could be subject to potential competing claims of other covered subsidiaries and their assignees.

Liability Estimate. Prior to mid-2004, the Company maintained that its subsidiaries' liability for unasserted claims was not reasonably estimable. The Company estimated and recorded liabilities only for pending claims in advanced stages of processing, for which it believed it had a basis for making a reasonable estimate. The Company disclosed the significance of the total potential liability for unasserted claims in considerable detail. During 2004, the Company authorized counsel to retain Bates White, a recognized expert, to assist in estimating its subsidiaries' liability for pending and future asbestos claims. The Company has updated its estimate of the subsidiary liability regularly.

Quantitative Claims and Insurance Information. The Company's recorded asbestos liability at the Petition Date was \$472.1 million. As of the Petition Date, the Company had remaining insurance and trust coverage of \$192.4 million. Included is \$156.3 million in insured claims and expenses that the Company's subsidiaries have paid out in excess of amounts recovered from insurance. These amounts are recoverable under the terms of its insurance policies and coverage amounts, subject to potential

Table of Contents

competing claims of other covered subsidiaries and their assignees, and have been billed to the insurance carriers.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following is management's discussion and analysis of certain significant factors that have affected our financial condition, cash flows and operating results during the periods included in the accompanying unaudited consolidated financial statements and the related notes. You should read this in conjunction with those financial statements and the audited consolidated financial statements and related notes included in our annual report on Form 10-K for the fiscal year ended December 31, 2010.

Forward-Looking Information

This quarterly report on Form 10-Q includes statements that reflect projections or expectations of the future financial condition, results of operations and business of EnPro that are subject to risk and uncertainty. We believe those statements to be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. When used in this report, the words may, hope, will, should, expect, plan, anticipate, intend, believe, estimate, predict, potential, continue, likely, and other expressions identify forward-looking statements.

We cannot guarantee actual results or events will not differ materially from those projected, estimated, assigned or anticipated in any of the forward-looking statements contained in this report. In addition to those factors specifically noted in the forward-looking statements and those identified in the Company's annual report on Form 10-K for the year ended December 31, 2010, other important factors that could result in those differences include:

- The value of pending and the number and value of future asbestos claims against Garlock Sealing Technologies LLC (GST LLC) and risks inherent and potential adverse developments that may occur in the Chapter 11 reorganization proceeding involving GST LLC, The Anchor Packing Company (Anchor) and Garrison Litigation Management Group, Ltd. (Garrison);
- general economic conditions in the markets served by our businesses, some of which are cyclical and experience periodic downturns;
- prices and availability of raw materials; and
- the amount of any payments required to satisfy contingent liabilities related to discontinued operations of our predecessors, including liabilities for certain products, environmental matters, guaranteed debt payments, employee benefit obligations and other matters.

We caution our shareholders not to place undue reliance on these statements, which speak only as of the date on which such statements were made.

Whenever you read or hear any subsequent written or oral forward-looking statements attributed to us or any person acting on our behalf, you should keep in mind the cautionary statements contained or referred to in this section. We do not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

Table of Contents

Overview and Outlook

Overview. We design, develop, manufacture and market proprietary engineered industrial products. We have 56 primary manufacturing facilities located in the United States and 9 other countries.

We manage our business as three segments: a Sealing Products segment, an Engineered Products segment, and an Engine Products and Services segment.

Our Sealing Products segment designs, manufactures and sells sealing products, including metallic, non-metallic and composite material gaskets, rotary seals, compression packing, resilient metal seals, elastomeric seals, hydraulic components and expansion joints, as well as wheel-end component systems, including brake products, PTFE products, conveyor belting and sheeted rubber products. These products are used in a variety of industries, including chemical and petrochemical processing, petroleum extraction and refining, pulp and paper processing, heavy-duty trucking, power generation, food and pharmaceutical processing, primary metal manufacturing, mining, water and waste treatment, aerospace, medical, filtration and semiconductor fabrication. In many of these industries, performance and durability are vital for safety and environmental protection. Many of our products are used in applications that are highly demanding, e.g., where extreme temperatures, extreme pressures, corrosive environments, and/or worn equipment make sealing and product performance difficult.

Our Engineered Products segment includes operations that design, manufacture and sell self-lubricating, non-rolling, metal-polymer, solid polymer and filament wound bearing products, aluminum blocks for hydraulic applications and precision engineered components and lubrication systems for reciprocating compressors. These products are used in a wide range of applications, including the automotive, pharmaceutical, pulp and paper, natural gas, health, power generation, machine tools, air treatment, refining, petrochemical and general industrial markets.

Our Engine Products and Services segment designs, manufactures, sells and services heavy-duty, medium-speed diesel, natural gas and dual fuel reciprocating engines. The United States government and the general markets for marine propulsion, power generation, and pump and compressor applications use these products and services.

The historical business operations of certain subsidiaries of the Company's subsidiary, Coltec Industries Inc (Coltec), principally GST LLC and Anchor, have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged personal injury or death as a result of exposure to asbestos fibers. Information about GST LLC's asbestos litigation is contained in this Management's Discussion and Analysis of Financial Condition and Results of Operation in the Asbestos subsection of the Contingencies section.

On June 5, 2010 (the Petition Date), GST LLC, Anchor and Garrison filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Western District of North Carolina in Charlotte (the Bankruptcy Court). GST LLC, Anchor and Garrison are sometimes referred to jointly as GST in this report. The filings were the initial step in a claims resolution process. GST LLC is one of the businesses in our broader Garlock group. GST LLC and its subsidiaries operate five primary manufacturing facilities, including operations in Palmyra, New York and Houston, Texas. The filings did not include EnPro Industries, Inc. or any other EnPro Industries, Inc. operating subsidiary.

GST LLC now operates in the ordinary course under court protection from asbestos claims. All pending litigation against GST is stayed during the process. We address our actions to permanently resolve GST LLC's asbestos litigation in this Management's Discussion and Analysis of Financial

Table of Contents

Condition and Results of Operation in the Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd. section.

The financial results of GST and subsidiaries are included in our consolidated results through June 4, 2010, the day prior to the Petition Date. However, U.S. generally accepted accounting principles require that an entity that files for protection under the U.S. Bankruptcy Code, whether solvent or insolvent, whose financial statements were previously consolidated with those of its parent, as GST's and its subsidiaries were with ours, generally must be prospectively deconsolidated from the parent and the investment accounted for using the cost method. At deconsolidation, our investment was recorded at its estimated fair value as of June 4, 2010, resulting in a gain for reporting purposes. The cost method requires us to present our ownership interests in the net assets of GST at the Petition Date as an investment and not recognize any income or loss from GST and subsidiaries in our results of operations during the reorganization period. Our investment of \$236.9 million as of March 31, 2011, is subject to periodic reviews for impairment. When GST emerges from the jurisdiction of the Bankruptcy Court, the subsequent accounting will be determined based upon the applicable circumstances and facts at such time, including the terms of any plan of reorganization. See Note 2 to our Consolidated Financial Statements for condensed financial information for GST and subsidiaries.

Our Quincy Compressor business designed, manufactured and sold rotary and reciprocating air compressors, vacuum pumps and air systems used in the automotive, pharmaceutical, natural gas, health, air treatment and general industrial markets. In December 2009, we signed a definitive agreement to sell Quincy Compressor to the Atlas Copco Group for approximately \$190 million in cash. The sale of Quincy's U.S.-based operations closed on March 1, 2010, and the sale of Quincy Compressor's subsidiary in China closed during the second quarter of 2010. Accordingly, Quincy Compressor is presented as a discontinued operation throughout this Form 10-Q. Additional information regarding the sale of Quincy Compressor is included in Note 4 to our Consolidated Financial Statements.

In January 2011, we acquired the assets of Rome Tool & Die, Inc., a leading supplier of steel brake shoes to the North American heavy-duty truck market. The business is part of Stemco, which is in the Sealing Products segment. Brake shoes are the third product line added by Stemco since the third quarter of 2009. Rome Tool & Die's headquarters and manufacturing facility are located in Rome, Georgia.

In February 2011, we acquired the business of Pipeline Seal and Insulator, Inc. and its affiliates (PSI), a privately-owned group of companies that manufacture products for the safe flow of fluids through pipeline transmission and distribution systems worldwide. PSI primarily serves the global oil and gas industry and water and wastewater infrastructure markets. The business manufactures flange sealing and flange isolation products; pipeline casing spacers/isolators; casing end seals; the original Link-Seal® modular sealing system for sealing pipeline penetrations into walls, floors, ceilings and bulkheads; hole forming products; manhole infiltration sealing systems; and safety-related signage for pipelines. It operates facilities in the United States, Germany and the United Kingdom, and is included in EnPro's Garlock group of companies in the Sealing Products segment. PSI employs about 200 people with primary manufacturing locations in Houston, Texas; St. Neots, United Kingdom; and Nehren and Furth, Germany.

In February 2011, we acquired the Mid Western group of companies, a privately-owned business primarily serving the oil and gas drilling, production and processing industries of western Canada. Mid Western services and rebuilds reciprocating compressors, designs and installs lubrication systems, and services and repairs a variety of other equipment used in the oil and gas industry. The business has locations in Calgary, Edmonton and Grand Prairie, Alberta, and is part of our Engineered Products segment.

Table of Contents

These acquisitions were paid for with approximately \$152 million in cash. The purchase price allocations are still subject to finalization of the valuation of certain assets and liabilities as well as purchase price adjustments pursuant to the acquisition agreements.

In August 2010, we acquired CC Technology, Progressive Equipment, Inc. and Premier Lubrication Systems, Inc. These businesses design and manufacture lubrication systems used in reciprocating compressors and are included in the Engineered Products segment.

In September 2010, we acquired Hydrodyne, which designs and manufactures machined metallic seals and other specialized components used primarily by the space, aerospace and nuclear industries. This business is included in the Sealing Products segment.

Outlook. The condition of our markets and the programs that improved our results in 2010 should continue to benefit us in 2011. The deconsolidation of GST and subsidiaries, which occurred in June 2010 on the Petition Date, will affect year-over-year comparisons, but we expect our Sealing Products and Engineered Products segments to benefit from stronger markets and increased volumes, as should GST. In our Engine Products and Services segment, we expect sales and engine shipments will be similar to 2010, but profits are likely to be slightly lower because of a less attractive product mix and higher research and development spending. Because the current engine shipment schedule calls for all remaining 2011 engine sales in the third quarter, sales in that quarter should be substantially higher than in the second and fourth quarters; however, we caution that engine shipment schedules sometimes change at the request of a customer. Our market-driven growth in 2011 should be complemented by the acquisitions we completed in 2010 and so far this year. These acquisitions expand our presence in attractive markets and, together with growth in our markets, should offset a significant portion of the effect of GST's deconsolidation. We expect the businesses acquired in the first quarter of 2011 will be modestly accretive to 2011 earnings, and we expect their value will increase as we integrate them into our continuous improvement programs.

Our effective tax rate is directly affected by the relative proportions of revenue and income before taxes in the jurisdictions in which we operate. Based on the expected mix of domestic and foreign earnings, we anticipate our effective tax rate for the remainder of 2011 will be between 31% and 34%. Discrete tax events may cause our effective rate to fluctuate on a quarterly basis. Certain events, including, for example, acquisitions and other business changes, which are difficult to predict, may also cause our effective tax rate to fluctuate. We are subject to changing tax laws, regulations, and interpretations in multiple jurisdictions. Various foreign and state tax returns are currently under examination and may conclude within the next twelve months. The final outcomes of these audits are not yet determinable; however, management believes that any assessments that may arise will not be material to the Company's financial condition or results of operations. Corporate tax reform continues to be a priority in the U.S. and other jurisdictions. Changes to the tax system in the U.S. could have significant effects, positive and negative, on our effective tax rate, and on our deferred tax assets and liabilities.

Our U.S. defined benefit plans continue to be underfunded. Based on currently available data, which is subject to change, we estimate we will be required to make contributions to the U.S. defined benefit plans in 2011 totaling approximately \$18.0 million, of which about \$2.2 million was contributed in the first quarter of 2011. We may be able to make a portion of the required 2011 contributions by contributing a guaranteed investment contract, or the proceeds from liquidating this contract, which we received from the Crucible Back-Up Trust as discussed in Note 15 to our Consolidated Financial Statements. However, there can be no assurance as to the approval of this contribution by the U.S. Department of Labor or the timing of any approval. Additional significant cash contributions are likely to be required in 2012 and beyond; however, actual contributions will depend on pension asset returns, pension valuation assumptions, plan design, and legislative actions. We estimate annual pension expense

Table of Contents

in 2011 will be about \$11.1 million, which would be \$1.5 million less than in 2010, primarily due to the deconsolidation of GST as of the Petition Date.

In connection with our growth strategy, we will continue to evaluate acquisition opportunities in 2011; however, the effects of such acquisitions, if any, cannot be predicted and therefore are not reflected in this outlook.

We address our outlook regarding our actions to permanently resolve GST LLC's asbestos litigation in this Management's Discussion and Analysis of Financial Condition and Results of Operations in the Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd. section.

Results of Operations

GST's results, prior to their deconsolidation on June 5, 2010, are included in the Sealing Products segment. See Note 2 to our Consolidated Financial Statements for condensed financial information for GST and subsidiaries.

	Quarters Ended March 31,	
	2011	2010
	(in millions)	
Sales		
Sealing Products	\$ 115.7	\$ 113.8
Engineered Products	94.3	75.1
Engine Products and Services	60.2	39.6
	270.2	228.5
Intersegment sales	(0.6)	(0.3)
Total sales	\$ 269.6	\$ 228.2
Segment Profit		
Sealing Products	\$ 19.6	\$ 17.8
Engineered Products	10.1	6.4
Engine Products and Services	11.2	10.0
Total segment profit	40.9	34.2
Corporate expenses	(7.9)	(8.0)
Asbestos-related expenses		(14.5)
Interest expense, net	(9.5)	(2.8)
Other expense, net	(1.5)	(0.6)
Income from continuing operations before income taxes	\$ 21.9	\$ 8.3

Segment profit is total segment revenue reduced by operating expenses and restructuring and other costs identifiable with the segment. Corporate expenses include general corporate administrative costs. Expenses not directly attributable to the segments, corporate expenses, net interest expense, asbestos-related expenses, gains/losses or impairments related to the sale of assets or deconsolidation of operations, and income taxes are not included in the computation of segment profit. The accounting policies of the reportable segments are the same as those for EnPro.

Table of Contents

First Quarter of 2011 Compared to the First Quarter of 2010

Sales of \$269.6 million in the first quarter of 2011 increased 18% from \$228.2 million in the same quarter of 2010. Sales from acquisitions completed since the first quarter of 2010 contributed twelve percentage points of the increase. In addition, sales increased as a result of higher volumes in all of our segments as nearly all customer markets have improved over the past year. Sales in the first quarter of 2010 included GST sales. GST sales to third parties in the first quarter of 2011 of \$52.4 million were not included in our results as a result of the deconsolidation of GST and its subsidiaries effective on the Petition Date.

Segment profit, management's primary measure of how our operations perform, increased 20% to \$40.9 million in the first quarter of 2011 from \$34.2 million in 2010. Segment profit increased primarily due to the increase in volumes across all segments and nearly all markets. This was partially offset by cost increases, including those in manufacturing and selling, general and administrative expenses, which were not fully covered by price increases. Segment margins, defined as segment profit divided by sales, improved slightly from 15.0% in 2010 to 15.2% in 2011. Segment profit in the first quarter of 2010 included GST's results. GST reported segment profit of \$10.5 million during the first quarter of 2011, which is not included in our segment profit as a result of the deconsolidation.

Due to the deconsolidation of GST, asbestos-related expenses during the first quarter of 2011 were zero, which represented a decrease of \$14.5 million compared to the first quarter of 2010.

Net interest expense in the first quarter of 2011 was \$9.5 million compared to \$2.8 million during the same quarter in 2010. The increase in net interest expense was caused primarily by the deconsolidation of GST and the reflection of the interest expense on related-party short-term borrowings and related-party notes, which had previously been eliminated in consolidation.

We recorded an income tax expense of \$6.7 million on pre-tax income from continuing operations of \$21.9 million in the first quarter of 2011, resulting in an effective tax rate for the quarter of 30.4%. During the first quarter of 2010, our effective tax rate was 32.3% as we recorded an income tax expense of \$2.7 million on pre-tax income from continuing operations of \$8.3 million. Our effective tax rate continues to be lower than the U.S. statutory rates primarily due to the earnings in lower rate foreign jurisdictions. In the U.S., we also benefited from certain tax incentives such as the deduction for domestic production activities, and credits for research and development.

Net income from continuing operations was \$15.2 million, or \$0.71 per share, in the first quarter of 2011 compared to net income from continuing operations of \$5.6 million, or \$0.27 per share, in the same quarter of 2010. Earnings per share are expressed on a diluted basis.

Net income was \$15.2 million, or \$0.71 per share in the first quarter of 2011 compared to net income of \$99.0 million, or \$4.83 per share, in the same quarter of 2010. Earnings per share are expressed on a diluted basis.

Following is a discussion of operating results for each segment during the quarter:

Sealing Products. Sales of \$115.7 million in the first quarter of 2011 were 2% higher than the \$113.8 million reported in the same quarter of 2010 despite the deconsolidation of GST as of the Petition Date. Increases in volume plus additional sales from acquisitions completed since the first quarter of 2010 at Garlock and Stemco exceeded the sales decrease caused by the deconsolidation of GST. GST reported \$52.4 million of third party sales in the first quarter of 2011, which are not included in the segment results. Garlock experienced improved demand in nearly all markets most notably in the oil and

Table of Contents

gas, semiconductor, and aerospace markets. Stemco saw increases in aftermarket and OEM activity across the North American heavy-duty trucking industry.

Segment profit of \$19.6 million in the first quarter of 2011 increased 10% compared to the \$17.8 million reported in the first quarter of 2010. The increase in profit at Garlock reflected the effect of higher volumes, partially offset by the deconsolidation of GST. Stemco reported an increase in profit through improvements in the heavy-duty vehicle markets and the resulting higher volume, partially offset by cost increases. Operating margins for the segment increased to 16.9% in the first quarter of 2011 from 15.6% in the first quarter 2010.

Engineered Products. Sales of \$94.3 million in the first quarter of 2011 were 26% higher than the \$75.1 million reported in the first quarter of 2010. Acquisitions completed since the first quarter of 2010 at CPI favorably impacted revenue by 10 percentage points. In addition, sales for GGB in 2011 were significantly higher than last year as activity increased in several markets, principally industrial, pumps, and automotive.

The segment profit in the first quarter of 2011 was \$10.1 million, which compares to \$6.4 million in the same quarter last year. GGB captured increased profitability in connection with its increased volumes, while selected price increases and an improved mix essentially offset cost increases. Profits at CPI were flat because the recently acquired businesses generated limited segment profit, which was offset by cost increases in the business. Operating margins for the segment were 10.7%, which improved from the 8.6% reported in the comparable quarter last year.

Engine Products and Services. Sales increased 52% from \$39.6 million in the first quarter of 2010 to \$60.2 million in the first quarter of 2011. The increase in sales was a result of shipping six engines in 2011, compared to shipping two engines in 2010, and an increase in service revenue. The increase in engine shipments and service revenue was partially offset by lower parts sales.

The segment reported a profit of \$11.2 million in the first quarter of 2011 compared to \$10.0 million in the first quarter of 2010. The year-over-year improvement was a result of the increase in engine shipments and services, partially offset by the decline in parts volume and manufacturing cost increases. The increase in engine sales had a significant effect on operating margins and contributed to a decrease in operating margins from 25.3% in the first quarter of 2010 to 18.6% in the same quarter this year.

Liquidity and Capital Resources

Cash requirements for, but not limited to, working capital, capital expenditures, acquisitions, pension contributions, and debt repayments have been funded from cash balances on hand and cash generated from operations. We are proactively pursuing acquisition opportunities. It is possible our cash requirements for one or more of these acquisition opportunities could exceed our cash balance at the time of closing. Should we need additional capital, we have other resources available, which are discussed in this section under the heading of Capital Resources.

Cash Flows

Operating activities from continuing operations consumed cash in the amount of \$12.8 million in the first quarter of 2011 compared to a use of cash of \$3.8 million in the same period last year. The use of cash in both periods was primarily the result of increases in working capital as sales activity in each period increased over the respective preceding quarters, and inventory increased in the first quarter of 2011 compared to the same quarter last year.

Table of Contents

Investing activities from continuing operations consumed \$157.5 million in cash in the first quarter of 2011 to fund \$152.2 million, net of cash acquired, of acquisitions and \$5.3 million of capital expenditures. Investing activities from continuing operations generated \$181.0 million of cash during the first quarter of 2010, primarily due to the divestiture of Quincy Compressor for which we received \$184.2 million.

Financing activities from continuing operations in the first quarter of 2011 included repayment of \$3.7 million of related-party debt, which was previously eliminated in consolidation prior to the deconsolidation of GST.

Capital Resources

Our primary U.S. operating subsidiaries, other than GST, amended and extended the maturity date of our senior secured revolving credit facility effective March 31, 2011. The amended agreement provides initially for a \$125 million senior revolving credit facility, \$30 million of which may be used for letters of credit. Actual borrowing availability under the credit facility is determined by reference to a borrowing base of specified percentages of eligible accounts receivable and inventory, and is reduced by usage of the facility (including outstanding letters of credit) and any reserves. Under certain conditions we may request that the facility be increased by up to \$50 million, to \$175 million in total. Any increase is dependent on obtaining future lender commitments for those amounts, and no current lender has any obligation to provide such commitment. The credit facility matures on July 17, 2015, unless, prior to that date, our convertible debentures are paid in full, refinanced on certain terms, or defeased, in which case the facility will mature on March 30, 2016.

Borrowings under the credit facility are secured by specified assets of ours and our U.S. operating subsidiaries, other than GST, and primarily include accounts receivable, inventory, deposit accounts, intercompany loans, intellectual property and related contract rights, general intangibles related to any of the foregoing and proceeds related to the foregoing. Subsidiary capital stock, real estate, and other fixed assets are not included as collateral.

Outstanding borrowings under the credit facility initially bear interest at a rate equal to, at our option, either (1) a base/prime rate plus 1% or (2) the adjusted one, two, three or six-month LIBOR rate plus 2%. Future pricing under the credit facility at any particular time will be determined by reference to a pricing grid based on average daily availability under the facility for the immediately prior fiscal quarter. Under the pricing grid, the applicable margins will range from 1.00% to 1.50% for base/prime rate loans and from 2.00% to 2.50% for LIBOR loans. The undrawn portion of the credit facility is subject to an unused line fee calculated at an annual rate ranging between 0.375% and 0.50%, depending on the level of outstanding borrowings. Outstanding letters of credit are subject to an annual fee equal to the applicable margin for LIBOR loans under the credit facility as in effect from time to time, plus a fronting fee on the aggregate undrawn amount of the letters of credit at an annual rate of 0.125%.

The credit agreement contains customary covenants and restrictions for an asset-based credit facility, including a fixed charge test if availability falls below certain thresholds, and negative covenants limiting certain: fundamental changes (such as merger transactions); loans; incurrence of debt other than specifically permitted debt; transactions with affiliates that are not on arms-length terms; incurrence of liens other than specifically permitted liens; repayment of subordinated debt (except for scheduled payments in accordance with applicable subordination documents); prepayments of other debt; dividends; asset dispositions other than as specifically permitted; and acquisitions and other investments other than as specifically permitted.

However, in the event that the amount available for borrowing under the facility exceeds \$20 million, the limitation on fixed asset dispositions is not applicable. Moreover, the limitations on

Table of Contents

acquisitions, investments in foreign subsidiaries, dividends (including those required to make payments on our convertible debentures), incurrence of certain cash collateral liens and prepayment of debt other than subordinated debt are generally not applicable if certain financial conditions are satisfied related to the facility.

The credit facility contains events of default including, but not limited to, nonpayment of principal or interest, violation of covenants, breaches of representations and warranties, cross-default to other debt, bankruptcy and other insolvency events, material judgments, certain ERISA events, actual or asserted invalidity of loan documentation and certain changes of control of the Company.

Prior to March 31, 2011, the maximum amount available for borrowings under the prior facility was \$60 million. The actual borrowing availability at March 31, 2011, under our senior secured revolving credit facility was \$84.3 million after giving consideration to \$4.1 million of letters of credit outstanding.

On June 8, 2010, GST entered into a \$10 million debtor-in-possession revolving credit and letter of credit facility to satisfy working capital and letter of credit needs during the pendency of its asbestos claims resolution process. See Note 2 to the our Consolidated Financial Statements and the section of this Management's Discussion and Analysis of Financial Condition and Results of Operations entitled "Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd." for additional information.

We issued \$172.5 million of convertible debentures in 2005. The debentures bear interest at an annual rate of 3.9375%, and we pay accrued interest on April 15 and October 15 of each year. The debentures will mature on October 15, 2015. The debentures are direct, unsecured and unsubordinated obligations and rank equal in priority with our unsecured and unsubordinated indebtedness and will be senior in right of payment to all subordinated indebtedness. They effectively rank junior to our secured indebtedness to the extent of the value of the assets securing such indebtedness. The debentures do not contain any financial covenants. Holders may convert the debentures into cash and shares of our common stock at an initial conversion rate of 29.5972 shares of common stock per \$1,000 principal amount of debentures, which is equal to an initial conversion price of \$33.79 per share, subject to adjustment, before the close of business on October 15, 2015. Upon conversion, we would deliver (i) cash equal to the lesser of the aggregate principal amount of the debentures to be converted or our total conversion obligation, and (ii) shares of our common stock in respect of the remainder, if any, of our conversion obligation. Conversion is permitted only under certain circumstances that had not occurred at March 31, 2011.

We used a portion of the net proceeds from the sale of the debentures to enter into call options, i.e., hedge and warrant transactions, which entitle us to purchase shares of our stock from a financial institution at \$33.79 per share and entitle the financial institution to purchase shares of our stock from us at \$46.78 per share. This will reduce potential dilution to our common stockholders from conversion of the Debentures and have the effect to us of increasing the conversion price of the debentures to \$46.78 per share.

Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd.

The historical business operations of GST LLC and Anchor have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged personal injury or death as a result of exposure to asbestos fibers. Those subsidiaries manufactured and/or sold industrial sealing products, predominately gaskets and packing, containing encapsulated asbestos fibers. Anchor is an inactive and insolvent indirect subsidiary of Coltec. The Company's subsidiaries' exposure to asbestos litigation and their relationships with insurance carriers are managed through another Coltec subsidiary, Garrison.

Table of Contents

On the Petition Date, GST LLC, Anchor and Garrison filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in Bankruptcy Court. The filings were the initial step in a claims resolution process. The goal of the process is an efficient and permanent resolution of all current and future asbestos claims through court approval of a plan of reorganization, which is expected to establish a trust to which all asbestos claims will be channeled for resolution. GST intends to seek an agreement with asbestos claimants and other creditors on the terms of a plan for the establishment of such a trust and repayment of other creditors in full, or in the absence of such an agreement an order of the Bankruptcy Court confirming such a plan.

Prior to its deconsolidation effective on the Petition Date, GST LLC and its subsidiaries operated as part of the Garlock group of companies within EnPro's Sealing Products segment. GST LLC designs, manufactures and sells sealing products, including metallic, non-metallic and composite material gaskets, rotary seals, compression packing, resilient metal seals, elastomeric seals, hydraulic components, and expansion joints. GST LLC and its subsidiaries operate five primary manufacturing facilities, including GST LLC's operations in Palmyra, New York and Houston, Texas.

Garrison's principal business is to manage the defense of all asbestos-related litigation affecting the Company's subsidiaries, principally GST LLC and Anchor, arising from their sale or use of products or materials containing asbestos, and to manage, bill and collect available insurance proceeds. When it commenced business in 1996, Garrison acquired certain assets of GST LLC and assumed certain liabilities stemming from asbestos-related claims against GST LLC. Garrison is not itself a defendant in asbestos-related litigation and has no direct liability for asbestos-related claims. Rather, it has assumed GST LLC's liability for such claims and agreed to indemnify GST LLC from liability with respect to such claims. Anchor was a distributor of products containing asbestos and was acquired by GST LLC in 1987. Anchor has been inactive and insolvent since 1993.

The financial results of GST and subsidiaries are included in our consolidated results through June 4, 2010, the day prior to the Petition Date. However, U.S. generally accepted accounting principles require that an entity that files for protection under the U.S. Bankruptcy Code, whether solvent or insolvent, whose financial statements were previously consolidated with those of its parent, as GST's and its subsidiaries were with ours, generally must be prospectively deconsolidated from the parent and the investment accounted for using the cost method. At deconsolidation, our investment was recorded at its estimated fair value on June 4, 2010, resulting in a gain for reporting purposes. The cost method requires us to present our ownership interests in the net assets of GST at the Petition Date as an investment and to not recognize any income or loss from GST and subsidiaries in our results of operations during the reorganization period. When GST emerges from the jurisdiction of the Bankruptcy Court, the subsequent accounting will be determined based upon the applicable circumstances and facts at such time, including the terms of any plan of reorganization. See Note 2 to our Consolidated Financial Statements for condensed financial information for GST and subsidiaries.

As a result of the deconsolidation of GST, we conducted an analysis to compare the fair market value of GST to its book value. Information about this analysis is contained in Note 2 to our Consolidated Financial Statements. Based on this analysis, we recognized a \$54.1 million non-cash pre-tax gain on the deconsolidation of GST in the second quarter of 2010. The fair value of GST, net of taxes on the gain on deconsolidation, was recorded at \$236.9 million. GST will be presented using the cost method during the reorganization period, and the \$236.9 value of our investment is subject to periodic reviews for impairment.

In connection with the bankruptcy filing, GST LLC and Garrison entered into a \$10,000,000 debtor-in-possession revolving credit and letter of credit facility with Bank of America, N.A. with a maturity date of December 7, 2011. The actual borrowing availability at March 31, 2011, under the facility was \$7.3 million after giving consideration to \$2.7 million of letters of credit outstanding. We

Table of Contents

have assessed GST LLC's and Garrison's liquidity position as a result of the bankruptcy filing and believe they can continue to fund their, and their subsidiaries', operating activities and meet their debt and capital requirements for the foreseeable future. However, the ability of GST LLC and Garrison to continue as going concerns is dependent upon their ability to resolve their ultimate asbestos liability in the bankruptcy from their net assets, future profits, cash flow, and available insurance proceeds, whether through the confirmation of a plan of reorganization or otherwise. As a result of the bankruptcy filing and related events, there is no assurance that the carrying amounts of assets will be realized or that liabilities will be liquidated or settled for the amounts recorded. In addition, a plan of reorganization, or rejection thereof, could change the amounts reported in the GST LLC and Garrison financial statements and cause a material change in the carrying amount of our investment. See Note 2 to our Consolidated Financial Statements for additional information about GST's bankruptcy proceeding.

Critical Accounting Policies and Estimates

Please refer to our annual report on Form 10-K for the fiscal year ended December 31, 2010, for a complete list of our critical accounting policies and estimates.

Recently Issued Accounting Pronouncement

See Note 1 to our Consolidated Financial Statements in this Form 10-Q for a description of new accounting pronouncements.

Contingencies

General

A description of environmental, asbestos and other legal matters against certain of our subsidiaries is included in this section in more detail. In addition to the matters noted herein, we are from time to time subject to, and are presently involved in, other litigation and legal proceedings arising in the ordinary course of business. We believe the outcome of such other litigation and legal proceedings will not have a material adverse affect on our financial condition, results of operations and cash flows.

Environmental

Our facilities and operations are subject to federal, state and local environmental and occupational health and safety requirements of the U.S. and foreign countries. We take a proactive approach in our efforts to comply with environmental, health and safety laws as they relate to our manufacturing operations and in proposing and implementing any remedial plans that may be necessary. We also regularly conduct comprehensive environmental, health and safety audits at our facilities to maintain compliance and improve operational efficiency.

Although we believe past operations were in substantial compliance with the then applicable regulations, we or one of our subsidiaries have been named as a potentially responsible party, or are otherwise involved, at 15 sites where the costs to us are expected to exceed \$100 thousand. Investigations have been completed for 11 sites and are in progress at the other four sites. The majority of these sites relate to remediation projects at former operating facilities that were sold or closed and primarily deal with soil and groundwater contamination.

As of March 31, 2011 and December 31, 2010, EnPro had accrued liabilities of \$14.3 million and \$14.7 million, respectively, for estimated future expenditures relating to environmental contingencies. See Note 15 to the Consolidated Financial Statements for additional information regarding our environmental contingencies.

Table of Contents

Colt Firearms and Central Moloney

We have contingent liabilities related to divested businesses for which certain of our subsidiaries retained liability or are obligated under indemnity agreements. These contingent liabilities include, but are not limited to, potential product liability and associated claims related to firearms manufactured prior to March 1990 by Colt Firearms, a former operation of Coltec, and for electrical transformers manufactured prior to May 1994 by Central Moloney, another former Coltec operation. Coltec has ongoing obligations, which are included in retained liabilities of previously owned businesses in our Consolidated Balance Sheets, with regard to workers' compensation, retiree medical and other retiree benefit matters in connection with Coltec's periods of ownership of these operations.

Crucible Materials Corporation

Crucible Materials Corporation (Crucible), which was engaged primarily in the manufacture and distribution of high technology specialty metal products, was a wholly owned subsidiary of Coltec until 1985 when a majority of the outstanding shares were sold. Coltec divested its remaining minority interest in 2004. Crucible filed for Chapter 11 bankruptcy protection in May 2009 and is no longer conducting any operations. See Note 15 to the Consolidated Financial Statements for information about certain liabilities relating to Coltec's ownership of Crucible.

Subsidiary Bankruptcy

Three of our subsidiaries filed voluntary Chapter 11 bankruptcy petitions on the Petition Date as a result of tens of thousands of pending and expected future asbestos personal injury claims. The filings were the initial step in a claims resolution process. The goal of the process is an efficient and permanent resolution of all pending and future asbestos claims through court approval of a plan of reorganization that will establish a trust to which all asbestos claims will be channeled for resolution and payment. See the additional information provided earlier under the heading Garlock Sealing Technologies LLC and Garrison Litigation Management Group, Ltd., the discussion under the heading Asbestos below and Notes 2 and 15 to our Consolidated Financial Statements.

Asbestos

Background on Asbestos-Related Litigation and Recent Developments. The historical business operations of GST LLC and Anchor have resulted in a substantial volume of asbestos litigation in which plaintiffs have alleged that exposure to asbestos fibers in products produced or sold by GST LLC or Anchor, together with products produced and sold by numerous other companies, contributed to the bodily injuries or deaths of such plaintiffs. Those subsidiaries manufactured and/or sold industrial sealing products that contained encapsulated asbestos fibers. Our subsidiaries exposure to asbestos litigation and their relationships with insurance carriers have been managed through Garrison.

On the Petition Date, GST LLC, Garrison and Anchor filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Western District of North Carolina in Charlotte. See above under the heading Subsidiary Bankruptcy and Notes 2 and 15 to our Consolidated Financial Statements for more information about this bankruptcy filing and its effects.

GST LLC and Anchor have been among a large number of defendants in actions filed in various states by plaintiffs alleging injury or death as a result of exposure to asbestos fibers. Among the many products at issue in these actions are industrial sealing products, including gaskets and packing. The damages claimed have varied from action to action, and in some cases plaintiffs seek both compensatory and punitive damages. To date, neither GST LLC nor Anchor has been required to pay any punitive

Table of Contents

damage awards. Since the first asbestos-related lawsuits were filed against GST LLC in 1975, GST LLC and Anchor have processed more than 900,000 asbestos claims to conclusion (including judgments, settlements and dismissals) and, together with their insurers, have paid over \$1.4 billion in settlements and judgments and have incurred over \$400 million in fees and expenses.

Beginning in 2000, the top-tier asbestos defendants companies that paid most of the plaintiffs damages because they produced and sold huge quantities of highly friable asbestos products sought bankruptcy protection and stopped paying asbestos claims in the tort system. The bankruptcies of many additional producers of friable asbestos products followed. The plaintiffs could no longer pursue actions against these large defendants during the pendency of their bankruptcy proceedings, even though these defendants had historically been determined to be the largest contributors to asbestos-related injuries. Many plaintiffs pursued GST LLC in civil court actions to recover compensation formerly paid by top-tier bankrupt companies under state law principles of joint and several liability and began identifying GST LLC s non-friable sealing products as a primary cause of their asbestos diseases while generally denying exposure to the friable products of companies in bankruptcy. GST LLC believes this targeting strategy effectively shifted damages caused by top-tier defendants that produced friable asbestos products to GST LLC, thereby materially increasing GST LLC s cost of defending and resolving claims.

Almost all of the top-tier defendants that sought bankruptcy relief in the early 2000s have now emerged, or are positioning to emerge, from bankruptcy. Their asbestos liabilities have been assumed by wealthy 524(g) trusts created in the bankruptcies with assets contributed by the emerging former defendants and their affiliates. With the emergence of these companies from bankruptcy, many plaintiffs will seek compensation from the 524(g) trusts. These trusts have aggregate assets exceeding \$20 billion specifically set aside to compensate individuals with asbestos diseases caused by the friable products of those defendants. We believe that as billions of dollars of 524(g) trust assets continue to become available to claimants, defendants will obtain significant reductions in their costs to defend and resolve claims. As of the Petition Date, however, the establishment of these 524(g) trusts had taken longer than anticipated and the trusts had a significant backlog of claims that accumulated while the trusts were being established. Additionally, procedures adopted for the submissions of asbestos claims in bankruptcy cases and against 524(g) trusts made it difficult for GST LLC and other tort-system co-defendants to gain access to information about claims made against bankrupt defendants or the accompanying evidence of exposure to the asbestos-containing products of such bankrupt defendants. We believe that these procedures enable claimants to double dip by collecting payments from the remaining defendants in the tort system under joint-and-several-liability principles for injuries caused by the former top-tier defendants while also collecting substantial additional amounts from 524(g) trusts established by those former defendants to pay asbestos claims. Because of these factors, while several 524(g) trusts had begun making substantial payments to claimants prior to the Petition Date, GST LLC had not yet experienced a significant reduction in damages being sought from GST LLC.

In light of GST LLC s experience that (a) its cost of defending and resolving claims had not yet declined as anticipated although 524(g) trusts had begun making substantial payments to claimants, and (b) new mesothelioma claims filings against it in recent years had not declined at a rate similar to the rate of decline in disease incidence, GST initiated the Chapter 11 proceedings as a means to determine and comprehensively resolve their asbestos liability.

During the pendency of the Chapter 11 proceedings certain actions proposed to be taken by GST LLC, Garrison and Anchor not in the ordinary course of business will be subject to approval by the Bankruptcy Court. As a result, during the pendency of these proceedings, we will not have exclusive control over these companies. Accordingly, under generally accepted accounting principles, our investment in GST was deconsolidated from our financial results beginning on the Petition Date. As a result, our financial results for the year ended December 31, 2010, which include the results from GST only through the Petition Date, may not be comparable to those of prior year periods.

Table of Contents

Much of the remaining portion of this section updates information about our subsidiaries' asbestos claims management experience through and until the Petition Date. See Note 15 to our consolidated financial statements for additional information about claims mix, product defenses, recent trial results and appeals.

Insurance Coverage. At March 31, 2011, we had \$167.0 million of insurance coverage that we believe is available to cover current and future asbestos claims against GST LLC and certain expense payments. GST has collected insurance payments totaling \$23.6 million since the Petition Date. In addition, at the Petition Date, we had classified \$4.2 million of otherwise available insurance as insolvent. See Note 15 to our consolidated financial statements for additional information about the quality of these insurance and trust assets.

Liability Estimate. Prior to mid-2004, we maintained that our subsidiaries' liability for unasserted claims was not reasonably estimable. We estimated and recorded liabilities only for pending claims in advanced stages of processing, for which we believed we had a basis for making a reasonable estimate. We disclosed the significance of the total potential liability for unasserted claims in considerable detail. During 2004, we authorized counsel to retain Bates White, a recognized expert, to assist in estimating our subsidiaries' liability for pending and future asbestos claims. We have updated our estimate of the subsidiary liability regularly.

Quantitative Claims and Insurance Information. Our recorded asbestos liability at the Petition Date was \$472.1 million. As of the Petition Date, we had remaining insurance and trust coverage of \$192.4 million. Included was \$156.3 million in insured claims and expenses that our subsidiaries have paid out in excess of amounts recovered from insurance. These amounts are recoverable under the terms of our insurance policies and coverage agreements, subject to potential competing claims of other covered subsidiaries, and have been billed to the insurance carriers.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to certain market risks as part of our ongoing business operations, including risks from changes in foreign currency exchange rates and interest rates that could impact our financial condition, results of operations and cash flows. We manage our exposure to these and other market risks through regular operating and financing activities and through the use of derivative financial instruments. We intend to use derivative financial instruments as risk management tools and not for speculative investment purposes. For information about our interest rate risk, see

Quantitative and Qualitative Disclosures about Market Risk - Interest Rate Risk in our annual report on Form 10-K for the year ended December 31, 2010, and the following section.

Foreign Currency Risk

We are exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances of our foreign subsidiaries, intercompany loans with foreign subsidiaries and transactions denominated in foreign currencies. Our objective is to control our exposure to these risks and limit the volatility in our reported earnings due to foreign currency fluctuations through our normal operating activities and, where appropriate, through foreign currency forward contracts and option contracts. The following table provides information about our outstanding foreign currency forward and option contracts as of March 31, 2011:

Table of Contents

Transaction Type	Notional Amount Outstanding in Millions of U.S. Dollars (USD)	Maturity Dates		Exchange Rate Ranges
Forward Contracts				
Buy British pound/sell euro	\$ 22.4	Apr 2011	Mar 2012	0.814 to 0.881 pound/euro
Sell British pound/buy Australian dollar	18.5	Apr 2011		1.557 Australian dollar/pound
Buy euro/sell USD	17.4	Apr 2011	Jun 2012	1.225 to 1.405 USD/euro
Buy USD/sell euro	5.3	Apr 2011	Mar 2012	1.224 to 1.412 USD/euro
Sell euro/buy Singapore dollar	2.1	Apr 2011		1.778 Singapore dollar/euro
Sell USD/buy Canadian dollar	1.2	Apr 2011	Mar 2012	0.984 to 1.049 Canadian dollar/USD
Buy USD/sell Canadian dollar	1.2	Apr 2011	Mar 2012	0.984 to 1.049 Canadian dollar/USD
Sell USD/buy Australian dollar	1.1	Apr 2011	Mar 2012	0.793 to 0.950 USD/Australian dollar
Buy USD/sell Australian dollar	1.1	Apr 2011	Mar 2012	0.793 to 0.950 USD/Australian dollar
Buy Mexican peso/sell British pound	1.1	Apr 2011		19.178 peso/pound
Sell British pound/buy Canadian dollar	0.7	Apr 2011		1.554 Canadian dollar/pound
Sell British pound/buy Swiss franc	0.7	Apr 2011		1.472 franc/pound
Sell Mexican peso/buy USD	0.5	Apr 2011	Mar 2012	12.375 to 13.270 peso/USD
Buy Mexican peso/sell USD	0.5	Apr 2011	Mar 2012	12.375 to 13.270 peso/USD
	73.8			
Option Contracts				
Buy Brazilian real/sell USD	8.5	May 2011	Nov 2011	1.735 real/USD
Sell Brazilian real/buy USD	6.5	May 2011	Nov 2011	2.18 to 2.39 real/USD
	15.0			
	\$ 88.8			

Item 4. Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures. The purpose of our disclosure controls and procedures is to provide reasonable assurance that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 (the Exchange Act), including this report, is recorded, processed, summarized and reported within the time periods specified, and that such information is accumulated and communicated to our management to allow timely decisions regarding disclosure.

Based on the controls evaluation, our chief executive officer and chief financial officer have concluded that our disclosure controls and procedures are effective to reasonably ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods

specified, and that management will be timely alerted to material information required to be included in our periodic reports filed with the Securities and Exchange Commission.

In addition, no change in our internal control over financial reporting has occurred during the quarter ended March 31, 2011, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II
OTHER INFORMATION

Item 1. Legal Proceedings.

A description of environmental, asbestos and other legal matters is included in Note 15 to the Consolidated Financial Statements included in this report, which is incorporated herein by reference. In addition to the matters noted therein, we are from time to time subject to, and are presently involved in, other litigation and legal proceedings arising in the ordinary course of business. We believe that the outcome of such other litigation and legal proceedings will not have a material adverse affect on our financial condition, results of operations and cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table sets forth all purchases made by or on behalf of the Company or any affiliated purchaser, as defined in Rule 10b-18(a)(3) under the Exchange Act, of shares of the Company's common stock during each month in the first quarter of 2010.

Period	(a) Total Number of Shares (or Units) Purchased (1)	(b) Average Price Paid per Share (or Unit) (1)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
January 1 – January 31, 2011				
February 1 – February 28, 2011				
March 1 – March 31, 2011	774	\$ 36.32		
Total	774	\$ 36.32		

- (1) A total of 774 shares were transferred to a rabbi trust that we established in connection with our Deferred Compensation Plan for Non-Employee Directors, pursuant to which non-employee directors may elect to defer directors' fees into common stock units. Coltec, which is a wholly owned subsidiary of EnPro, furnished these shares in exchange for management and other services provided by EnPro. These shares were valued at a price of \$36.32 per share, the closing price of our common stock on March 31, 2011. We do not consider the transfer of shares from Coltec in this context to be pursuant to a publicly announced plan or program.

Item 6. Exhibits.

The exhibits to this report on Form 10-Q are listed in the accompanying Exhibit Index.
